Leiji Matsumoto possesses an impressive CV, including creating several of Japan's most successful anime series, *Starblazers* and *Captain Harlock* among them. These two hundred plus page books are published following serialisation in animation magazine *Animerica*, and they're a sequel to Matsumoto's original *Galaxy Express 999* series, which ran over four thousand pages. It remains unseen in an English language version, which is a shame, not least because it's plain that anyone reading this would take far more away if familiar with the original. References to it, whether footnoted or otherwise obvious, are plentiful to begin with, and support the claim that this is the project closest to Matsumoto's heart. This being the case, self-indulgence abounds, particularly in the first volume. Overall it's an extremely frustrating series, with plenty of irritations and faults, and sometimes only ethereal fragments of plot, yet for all that, very occasionally it's wonderful. There are many glorious images of the old steam train chugging through space, and brief, but inventive, science-fiction stories offering commentary on the constants of human nature. The knowing Maetel and the innocent Tetshuro journey across the galaxy in the train, largely passive observers of formidable threats and, all too often, the demise of a civilisation. The gloomy character of Maetel annoys, forever given to wistfully oblique pronouncements and portentous references to a future larger purpose. It's years away at the current rate of publication, and if the joy of the series is the journey, not the destination, why continually refer to it? Also vexing is the constant fashion in which Matsumoto's earlier creations drop in and out for purposeless cameos, although that may be an extra treat for some. As it really makes little difference where you start, volume 4 is cited as the best so far, and if you like that investigate further.~WJ

GAMBIT

Oracle: *2 issues 1986*
Eternity: *1 issue 1988*

Gambit is an express freighter, fighter-bomber and habitat, as well as being the fastest ship in the galaxy. It's captained by Gem Bel-Sonnek, who rescues political activist, Sean Jaxton, from his prison satellite. Sean ends 2 facing a life-threatening situation, but by the time of the Eternity issue, he's head of the mysterious project Malaclypse, and still attracting unexplained accidents. This shows some promise in its original incarnation, though there is clearly a lot for its creator, Scott Bieser, to learn. As he doesn't provide much background story for the re-launch, however, readers will make little sense of it on its own.~NF

GAMBIT

Marvel: *4 issue miniseries 1994, 4 issue miniseries 1997, 25 issues, 2 Annuals 1999-2001, one-shot (Gambit and Bishop: 'Alpha') 2001, 6 issue miniseries (Gambit and Bishop) 2001*

Before he was an X-man, Gambit was a member of the Thieves Guild, bitter rivals of the Guild of Assassins. Gambit married the daughter of the Assassins' leader and both Guilds pay tribute to an immortal sorceress called Candra for which she provides an elixir of life. Gambit's wife is hovering in a coma between life and death. It's time for the latest dose of elixir to be doled out. Got it? Now go watch *Romeo and Juliet*. Howard Mackie and Lee Weeks must have before churning out such predictable, sophomoric melodrama. Mackie returns for the second outing, aided by Terry Kavanagh, Klaus Janson and Bill Sienkiewicz to tell the tale of Anielle, an Angel who has fallen to Earth and become the prey of evil gangsters and prominent church folk alike. On the run, she turns to the chivalrous Gambit for protection. It's pretentious and silly.

The series begins at a breakneck pace with the Cajun thief stealing alien technology from a freshly discovered pyramid, incurring the wrath of a private security force, captivating the mandatory sexy archeologist and coming to the attention of recurring villain the X-Cutioner, all the while slowly advancing a major plot strand. This is the unravelling of the seemingly benevolent master planner New Son's secret plan, which winds through the entire series, leading to a time-trip to the 1890s a retooling of Gambit's powers, other dimensions, an exploration of his mysterious origins and lots of guests. Fast paced and well crafted by Fabian Nicieza, Steve Skroce, Yanick Paquette and others, it manages to avoid many of the pitfalls of a comic so closely tied to *X-Men* continuity

In *Gambit and Bishop*, Bishop, fellow X-Man and mutant from the future, has been mysteriously afflicted with an alien symbiote, so he and Gambit, who don't like or trust each other, go off on a jaunt to find out where it came from and if it's dangerous. Somehow this takes another six issues to tell, and naturally it leads to lots of fighting and explosions and the potential destruction of the Universe. Scott Lobdell and Joe Pruett totally waste the talents of pencillers Cary Nord and Georges Jeanty. Completists only.~WW

GAMBIT AND THE XTERNALS

Marvel: 4 issue miniseries 1995

One of the miniseries in Marvel's 'Age of Apocalypse', which placed the *X-Men* characters in an alternate world where their enemy rules the Earth. *Gambit and the Xternals* was probably the least interesting of the series, pitting the Cajun card-thrower and the immortal Externals against nothing very interesting as they attempt to steal the M'Kraan crystal and restore normality to a fractured universe. It's more cosmic than the other 'Age of Apocalypse' comics, but lacks the character-driven analysis which made the best ones worth the effort, leaving a story that would be dull no matter what world it was set on.~JC

GAMERA

Dark Horse: *4 issue miniseries 1996*

Those outside Godzilla fandom will be unaware that Gamera is a giant-flying-turtle equivalent of the Big G, and the guardian of the universe to boot. He's summoned via an amulet by a psychic teenager, and called forth initially to fight a genetically engineered giant pterodactyl. Gamera is competent without ever being outstanding, but should appeal to all enthusiasts of big monster movies.~WJ

GAMMARAUDERS

DC: *10 issues 1989*

Based on the role-playing game, this reads and looks like an inventive TV cartoon show. The story focuses on Jok Tadsworth, handler of a bioborg (a giant combination of beast and technology), and his well-characterised fellow-handlers. Martin King and Dave Cooper's artwork (most issues) is delightful, and Peter Gillis' scripts are light and witty.~WJ

GANG BUSTERS

DC: 67 issues 1947-1958

Based on the popular US radio show (1936-1957) in which true crime stories were broadcast and the FBI offered descriptions of wanted criminals, *Gang Busters* began as a fifty-two-page comic (1-23) with four stories and a 'Case Book Mystery' in which the reader was given the opportunity to spot where the criminal had slipped up before the strip ended. This feature became 'You Be The Detective' before being dropped in 1956. With artwork generally above average, the stories, as varied as possible, attempt to pick out the more interesting cases (catching criminals with a police badge, the criminal in the line-up accusing the eyewitness of the crime etc.). Artists include Dan Barry, Ruben Moreira and Mort Meskin, with occasional strips by Nick Cardy, Frank Frazetta and Jack Kirby.~NF

GANGLAND

DC/Vertigo: *4 issue miniseries 1998**

A strong cast of contributors (Richard Corben, Jamie Delano, Peter Kuper, Frank Quitely, Eric Shanower, Lucius Shepherd) produces a selection of crime stories in this anthology series. Although seemingly unsure if they're doing *Reservoir Dogs* or *Twilight Zone*, much of the material is strong and fresh. Especially noteworthy are 'Clean House' by Brian Azzarello and Tim Bradstreet and 'The Bear' by Dave Gibbons both in 1 and 'The Big Snooze' by David Lloyd in 4.~WW
Recommended: 1, 4

THE GARGOYLE

Marvel: *4 issue miniseries 1985*

As introduced in *The Defenders*, the Gargoyle was a rare interesting idea sinking in a sea of mediocrity. Already in his eighties, Isaac Christians didn't want to die, and was granted his wish by a demon at the cost of being trapped in the body of a gargoyle and therefore shunned by all who knew him. In this series Christians learns the Gargoyle was a malevolent living entity who was transferred into his old body. In parts charming and wistful, particularly when dealing with Christians' past and lost love, and offering some interesting theological theories, the whole never quite gels. It's because the Gargoyle's a superhero and therefore he has to fight, but J.M. DeMatteis and Mark Badger aren't very interested in that concept.~FP

GASM

Stories, Layouts and Press: *4 issues 1977-1978*

Publisher Myron Fass built a career on cheap rip-offs of other people's comics, and *Gasm* was an extraordinarily quick off the mark *Heavy Metal* clone. Fass picked up on *Heavy Metal*'s spaceships and unclothed lovelies but missed out on the subtleties and depth. However, whether by luck or judgement, he built up an eclectic roster of young contributors, including Matt Howarth, Mark Wheatley, Chuck Dixon and even Ben Katchor. With some minor

---

* Available in a collected edition

Richard Corben strips in later issues, this is far from the worthless package it could so easily have been, although much of the material here is patchy at best. A curio.~DAR

GASP

ACG: *4 issues 1967*

A horror anthology title with nothing outstanding, but with the odd flash of originality in each issue. For instance, in 'The Devil's a Businessman' (1) we see time-and-motion studies being applied in hell, in 'The Fourth Wish' (2) there's a nice spin on the genie-in-a-bottle yarn, and 'You've got the Wrong Ghosts'(3) is unusual for dealing with cowardice in war. Even in the best stories, the endings fall flat, but you can tell that they're trying.~FC

GASP!

Gasp: *One-shot 1994*

Four sample pages from sixteen independently produced titles. There are no publication details, but this was presumably a co-funded project intended as a convention giveaway. *Strangers In Paradise* has the largest following, but there's also *Buck Godot, Dragonrok, Tyrant, Strange Attractors, Wolff & Byrd, THB, Poison Elves* and *Rarebit Fiends* among others. As all the pages come from issues of the comics and this is more difficult to come by than any of them, don't bother.~WJ

GATECRASHER

Black Bull: *4 issue miniseries ('Ring of Fire') 2000*, 6 issues 2000-2001*

Alec Wagner is a typical high-school klutz who happens to belong to a secret organisation (The Split-Second Squad) that protects the Earth from inter-dimensional invasions. 'Ring of Fire' establishes the basic premise that Alec screws everything up, but because he's accidentally become the only means of spotting where the invasions are going to occur, he's also very important. The series continues with Alec now in college and focuses on his rivalry with fellow squad member, Trystan. Played for laughs by writer Mark Waid, this can be entertaining and it's pleasingly drawn by Amanda Conner and Jimmy Palmiotti, but Alec is so stupid, it's difficult to feel any empathy for the character. The final issue promises storylines will be continued in future miniseries.~NF

Jademan Opens THE GATES OF THE NIGHT

Jademan: *4 issue miniseries 1990-1991*

A variety of horror stories in the manner of DC's old mystery anthologies, except with more room for the creators to play. Jademan don't bother with credits, which is a shame because all the art is of a decent standard, if sometimes a little cramped, and a few stories are excellently drawn. The plots are very much hokey old horror standbys, with the one about a person being influenced by an evil object overused. There is a good story about a demon baby in 4, but the best is the horrific 'Bridge of No Return' in 1, in which the ghosts of the Japanese soldiers that occupied Hong Kong in World War II return in all their brutality. The best issue overall is 2, comprising one long story about a devil doll constructed to the 1980s straight-to-video horror template. Read with a screeching violin soundtrack.~FP

GAY COMICS

Kitchen Sink: *5 issues 1983-1984*

Bob Ross: *20 issues (6-25), 1 Special 1985-1998*

Initially an annual collection of comics by or about gay people, edited by Howard Cruse (1-4) and then Robert Triptow (5-13), with issue 6 Bob Ross, publisher of San Francisco's *Bay Area Reporter*, took over and announced a quarterly schedule. Though the contributors didn't have to be gay or lesbian themselves, the content of the stories was always predominantly about homosexual experience. Generally, this meant a light-hearted approach, but harder-edged tales also found their way in and even with the comedy, the difficulties and politics of gay life were never far from the surface. Kitchen Sink's issues contain stories from such notables as Lee Marrs (1-4), Roberta Gregory (1-5), Howard Cruse (1-5), Jerry Mills (4, 5) and Tim Barela (5). Mills' 'Poppers' stories and Barela's 'Leonard and Larry' strips would become firm favourites with the readership, the former a clean, bright comedy about sexy, dumb boys with big muscles, the latter a soap opera about a mature gay couple. 9 is an all 'Poppers' issue, and 'Leonard and Larry' featured in the 1992 special.

The change in publisher didn't affect the style or direction to any great degree, although Cruse was a less common contributor (Wendel débuted in 6, but the only other Cruse strips are in 10 and 14). There was some effort to give the book an international flavour, with Patrick Marcel's funny animal strip 'Night of the Hunter' and other contributions from 3-12, Theo Bogart in 2, and Brits Howard Stangroom and Steve Lowther in most issues from 11 onwards. Their 'Ride the Wild Surf' in 14 is an effective Archie and Romance parody rolled into one. With 14 Andy Mangels became editor and generally tried to include shorter strips from a wider range of contributors, some more successful than others. Ivan Velez Jr, Roberta Gregory, Donna Barr, Jennifer Camper and Ralf König became regulars. Of the newer contributors, Catherine Doherty (23) looks most promising. 19 was an Alison Bechdel special and 22 was a funny-animal special with Waller and Worley's Omaha, plus contributions from Leanne Franson, Diane Di Massa and Joan Hilty. Sam Kieth contributes a story featuring characters from The Maxx, in 24. 25 is an eighty-page anniversary issue gathering seventy-one new contributions from the creators of past issues. Though the resultant strips are largely one-pagers, this is a fine introduction to the diversity of the material produced so far. It's also a farewell to the title, though new issues aren't ruled out entirely. As an anthology, *Gay Comix* has suffered from a lack of depth to the story-telling and relied too much on short gag-based strips. The special issues have been the only place where a consistent quality of contribution has been apparent. Too many issues seem to have earnest but dull contributions or more of the same old jokes about gay life. Mangels attempted to address this with the themed or single-contributor issues and, to be fair, there is something in each issue to make it worth reading.~NF

Recommended: 1-6, 14, 15, 19, 22

GAZILLION

Image: *One-shot 1999*

Writer Howard Shum transfers cold-war politics to a future galactic scenario for this focus on spy Gazillion, sent to infiltrate an enemy base to destroy a super weapon. Decently enough written, it tested the waters for a series that never materialised, possibly due to the unappealling art.~FP

Batman GCPD Gotham City Police Department

DC: *4 issue miniseries 1996*

Chuck Dixon writes *Hill Street Blues* with the *Batman* supporting cast and weaves several investigations and an eccentric cast with aplomb, even managing a subtle Batman cameo. The fusing of Jim Aparo and Bill Sienkiewicz's very individual art styles is strange at first, but Aparo's solid storytelling shines through. Solid story and good art make this a benchmark for the minimum standard all comics should attain.~WJ

GE ROUGE

Verotik: *3 issue miniseries 1997*

More of Verotik's unsavoury association of titilation with extreme violence, this time with a voodoo theme. Wanton slash'n'gore with tits'n'bums galore, but a plot, heaven forbid, no. Anyone with an IQ higher than their shoe size is advised to stay well clear.~FP

Doug TenNapel's GEAR

Fireman Press: *6 issue miniseries 1998-1999**

Simon, Waffle, Gordon and Mr Black are cats sent to capture a guardian (giant robot) to help protect their home of Newton from attack by the mantid insects of South Plate.

Unknown to them is that the cats of North Plate have allied themselves with the dogs of Dogtown in order to defeat them both. At the same time, the semi-legendary Forbidden Mechanism (Gear), is being sought by factions on all sides and will prove decisive in the coming battle. Blockily defined, with few brushstrokes, Douglas TenNapel's artwork is impressionistic with a rough delineation that makes some panels hard to read. His story's an odd mix of black humour and adventure, but visually impressive (most of the time).~NF

GEAR STATION

Image: *5 issues 2000*

Dan Fraga's two-fisted fairytale where innocent country boy Bryce Carter is caught in the intrigues of his land's corrupt rulers. Prince Arthur leads a secret resistance against the wicked Drach Domo, inquisitor to the King, and he and his allies help Bryce train to become a court champion. Just then the slinky Fable arrives from the future. The initial story arc ends in 4 after Domo's showdown with Arthur. 5 is a disappointing fill-in, but Felipe Smith's masterful five page 'GS Animated' puts the entire series to shame. This series' artwork features the gimmick of linework round the characters separating from the rendered backgrounds like an animated cel. Too bad that the figurework, proportion and storytelling is borderline inept.~SW

Brother Power, The GEEK

DC: *2 issues 1968*

DC/Vertigo: *One-shot 1993*

Well, where shall we begin? This series was ridiculed for decades, and only in recent years has DC owned up to it. "Here is the real-life scene of the dangers in Hippie-Land!"exclaims the first cover. As you may have gathered, The Geek is a period piece set in the heyday of flower power from ageing hippy Joe Simon, the man who gave us Captain America and instigated various comic-book genres. Brother Power is a tailor's dummy who's brought to life by a bolt of lightning and given superstrength (hey, this is comics, remember). Befriended by hippies he helps them further the cause of peace, love and flower power, beats up a bunch of Hell's Angels, goes to school, gets kidnapped by the Psychedelic Circus (oh yes) and forced to appear in their freak show, escapes and naturally runs for Congress, is hounded by the police and eventually drowns. And this is only the first issue. The second is just as, er... inventive. *The Geek* is actually an original, well-crafted, enjoyable, if indulgent, tale that every comic reader should really experience. Just wear a flower in your hair to get you in the mood, though.

Iin some ways *The Geek* could be seen as the forerunner to DC's mature imprint, Vertigo, who published the 1993 special (just titled *The Geek*). Scripter Rachel Pollack brings back some elements from the original series – the circus freak, corruption in corporate America and a good dose of Nazis – but updates the character to a sort of "toy spirit". Disjointed in places, there seems to be a need to legitimise the character to lessen the absurdity. Why bother? Anyway the art by Michael Allred more than makes up for any shortcomings. *Brother Power, The Geek*: cool or crap – you decide!~HY

Recommended: 1-2

GEEKSVILLE

3 Finger Prints: *3 issues 1999*

Image: *7 issues (0-6) 2000-2001*

Picking up from *The 3 Geeks*, this follows three, male teenagers obsessed with superhero comics, who spend their time discussing continuity, artists and what they would do if they were in charge of *The X-Men*. The first series is one-off stories, while the second is mainly about their attempts at self-publishing. In the last issue, Rich Koslowski writes an editorial saying how disappointed he is that comic fans don't want to read a comic about them, which in some ways shows where he went wrong. Superhero-reading 14-year-olds want to read superhero comics, not read about what geeks they are, and those comic types who hate Marvel zombies would find his portrayal of them here too affectionate. *Geeksville* also contains back up material, but nothing of great note. The Geeks return in *Dork Tower*.~DB

GEISHA

Oni Press: *4 issue miniseries 1998*, one-Shot ('Out of Tune') 2000*

Jomi Sohodo is an android, adopted into a family of bodyguards. When her latest art exhibition fails, she asks her father for a job in the company, and he decides to give her all of the boring jobs until she decides to go back to painting. During her first assignment, however, she runs across a blackmailer, Brant, who's involved with Kelowna Peck, who has just asked Jomi to forge a Vermeer for him. 'Out of Tune' is a more thoughtful strip with various characters looking for inspiration to solve a particular problem. Andi Watson writes and draws appealing, down-to-earth characters and manages to keep the whole light-hearted without playing it entirely for laughs.~NF

Recommended: 1-4, 'Out of Tune'

GEMINAR: 72 Page Special

Image: *One-shot 2000*

Created by Terry Collins and Al Bigley, Geminar is a human, given superpowers by aliens, who encourage him to serve the cause of justice against the empire building K'Trall. Intended originally as separate issues, the story is effectively told in three parts, the key to each being that nothing is as it seems. Bigley's agreeable artwork displays the influence of Joe Staton and Steve Ditko, though it's sometimes over-inked.~NF

GEMINI BLOOD

DC/Helix: *8 issues 1996-1997*

Science-fiction novelist Christopher Hinz adapts his own books about a chaotic future America where genetically engineered people with 'gemini blood' have two bodies, controlled by the same consciousness. Threatened by a gemini assassin, a large corporation hires a team of misfit mercenaries to protect itself. Hinz's world is full of fascinating detail, but his characters lack life. He falls back on every cliché in the book – gentle giant, genius leader, traumatised veteran – hey, it's The *A-Team*! Tommy Lee Edwards' heavy, blocky artwork suits the action-packed nature of the comic but doesn't seem particularly suited to portraying emotion. Which is fine because there isn't much. Average shoot-em-up that could have been much better.~FJ

GEMMA BOVERY

Jonathan Cape: *Graphic Novel 1999*

One of the myths of the graphic novel is that if it has a squarebound spine it must be for "adults" despite invariably being populated by men in tights. This is that rarest of creatures; a graphic novel worthy of the name dealing with adult themes and emotions in a gripping, intelligent way. It's also witty, ironic, perceptive, beautifully drawn and ultimately one of the finest comics ever drawn.

For years now Posy Simmonds has been cartoonist in residence on the *Guardian* newspaper's Women's page, and once a week the space has been hers to do with what she wants. Over the course of two years she serialised the saga of the capricious, beautiful Gemma Bovery, her husband Charlie, her lovers and her final downfall. Simmonds details Gemma's life through her diaries, which are interspersed with comments from her obsessive neighbour Joubert, who has stolen the books. Visually, Simmonds mixes her beautiful soft pencil and wash drawings with excerpts of text, and occasional dialogue. There is a lot of reading here, but the art is never extraneous or overpowered. Her drawing has never been better, with subtly realised people and wonderfully evocative settings that pull you into the story. This is simply a perfectly realised combination of words and pictures.

Gemma is portrayed as a complex force of nature, constantly wanting the unattainable, and unrelentingly acerbic, but also a romantic and somewhat tragic figure destined never to find contentment. The story described her early romance with Charlie in London, their subsequent retreat to rural France and her almost inevitable affairs and liaisons. Simmonds creates believable and human characters while also satirising them, and takes delight in picking over the foibles and relationships of the British middle classes. Her observations are cutting and perceptive.

The title is more than a throwaway gimmick. The characters are aware of Flaubert's tragic romance *Madame Bovary*, but that doesn't stop them unswervingly echoing the plot. I'ts a simple device, but by having her protagonists comment on it and fight against it Simmonds imbues the book with added levels of intrigue and perception. It is a rare comic that succeeds on every level and is an unmitigated triumph, but this is that comic. No serious collection should be without it.~DAR

GEN ACTIVE

DC/WildStorm: *6 issue miniseries 2000*

Having proved he can handle young superhero soap admirably with his run on *Titans* and *Green Lantern*, Jay Faerber gets a shot at WildStorm's teens-to-20-somethings Gen^{13} and their alternate numbers DV8. Ably assisted by penciller Whilce Portacio, this is good, solid superhero fun in the DC tradition and a sound marketing move to introduce the parent company's long-term readers to its new acquisitions at the WildStorm imprint.~JC

GEN 12

Image/WildStorm: *5 issue miniseries 1998*

There's a complex set of connections between a significant proportion of the major characters populating the WildStorm produced titles at Image. Chronologically everything starts with Team 7, and their history is gradually being filled in by series revealing the details, of which this is one. The death of covert operations director Miles Craven initiates an investigation, during the course of which more letters are dotted and crossed, slotting further information between previously revealed segments. It's to writer Brandon Choi's credit that if you've not read any other WildStorm titles this is an engrossing thriller, but those familiar with the other titles will enjoy the cameos and exposition. The art by Michael Ryan and Sal Regla is occasionally static, but generally functional given their brief to illustrate pages of talking heads at a time.~FP

GEN^{13}

Image/WildStorm: *6 issues miniseries (0-5) 1994, 36 issues 1995-1998*

WildStorm: *41 issues (37-77) 1999-2002, series two 4 issues + 2002 to date*

The original miniseries told a competent tale of teenagers co-opted against their will into Project Genesis, an attempt to unleash the powers inherited from their fathers, the government-created super-soldiers of Team 7. It also dealt with the group's escape from the shady government operation, but it is with the ongoing series that Gen 13 really comes into its own, as Jim Lee, Brandon Choi and Scott Campbell settle down to have real fun with their characters. Unlike most teen groups, these kids are irreverent, badly behaved and far from their clean-cut predecessors. They defeat villains by distracting them with bad guitar playing, sneak out in the night, smoke, fart and generally act like real teenagers (with superpowers). Their adventure on an island of half-naked nympho (possibly) lesbian amazons is the creative team at their tongue in cheek best (3-5). The fun and games continue throughout the first 25 issues, consistently well written by Choi and beautifully pencilled by Campbell and his successor Al Rio, who begins as a fill-in artist in the mid-teens and eventually takes over. It's a fast-moving, light-hearted superhero romp all the way, with the alternate future yarn in 22-24 particularly worth a mention. The miniseries and 1-13 are collected in a cheaply priced black and white *WildStorm Archives* book.

Choi's sign-off in issue 25 seems to mark the end of Gen^{13}'s raison d'etre. Whereas the creators were never afraid to play for laughs, their replacements, John Arcudi and Gary Frank never quite hit the same note, often making the characters and plots seem idiotic rather than funny. Their introduction of Fairchild's long-lost father as a supporting character provides an interesting diversion, but overall the seventeen issues they produce are little more than run-of-the-mill superheroics. One problem that couldn't be ignored by this point was that WildStorm's decision to age its characters, if not in real time then in quicker time than is the norm for comics, meant that its teenagers had grown up to be twenty-somethings. The next generation of writers did their best to play on this. Adam Warren takes the title back to its comedy roots in 43 and 44, and. Scott Lobdell and Ed Benes continue the trend to 54 with stories making the most of Gen 13's strengths: their ages and their slacker tendencies. They're just as funny as directionless, trust-fund twenty-somethings as they were as irreverent teens, needing a writer with a good grasp of comedy to bring out the best in them.

Lobdell departs mid-story in 55, and Warren returns with 60. Perhaps aware that the joke has started to wear thin, he favours stand-alone stories. Each issue is good enough when taken alone, but leaves nothing to entice the reader back. The teen comic lacked any teenagers, and something had to give. As the series edged past 60, Warren slowly introduced new, younger cast members who were intended to replace the old. Sadly, they weren't anywhere near as interesting. The decision to write this off as a mistake in favour of another entirely new cast of disaffected teens brought with it the obvious editorial gimmick of restarting with a new issue 1. Priced at just 13 cents, it was an appealing jumping on point for new readers, or jumping back-on point for those who'd fallen by the wayside. Unfortunately, a well past his best Chris Claremont writes, and his execrable dialogue reads like what it is: a middle-aged man churning out stereotype ideas of teen angst tired before these characters were born. In some respects, *Gen^{13}* has been a victim of its own success. Ageing characters has necessitated major line-up changes. The new batch of persecuted superkids, however, seems dull and derivative, leaving the impression that *Gen^{13}* has really had its day.

As with many Image comics, several issues have variant covers, including fourteen for issue 1, and four for 24, while issue 13 is split into three one-third sized mini-issues numbered 13a, 13b and 13c.~JC

GEN^{13} BOOTLEG

Image/WildStorm: *20 issues, 1 Annual 1996-1998*

Issued, apparently to provide versions of the characters other than those from the creators of the regular title. Possibly also to have another *Gen^{13}* title on sale while the characters were hot. Cancellation came, though, as *Bootleg* was still selling, the reason given being it was becoming difficult to attract top of the line creators. One can sympathise with the editorial viewpoint. While never outstanding, there are no poor stories in the first dozen issues, although Adam Warren does stretch plot and patience with three issues of Grunge's Hong Kong action film in 8-10*. The team of Alan Davis and Mark Farmer always deliver, and in 1-2 it's Farmer writing as well as inking, and 3 is a text and illustration medieval fairy tale by Dan Norton and Sandra Hope. The medieval theme returns from James Robinson and Scott Hampton, but in the setting of a modern day renaissance fair for 7, and Walt and Louise Simonson produce 4, guest starring a member of Weapon Zero. Terry Moore's time travel story in 5-6 is somewhat undermined by Tomm Coker's stylish and static art, but not significantly. Walt Simonson is back in 11 and 12, but merely in a scripting capacity for what is Aaron Lopresti's baby crushing several homages together, with *The Island of Dr Moreau* providing the plot.

Beyond 12 the best stories are Jan Strnad's tale of Roxy's death in 15-16, nicely illustrated by Sean Shaw and Kevin Nowlan and 20's resurrection issue by Christopher Golden and Charlie Adlard. Both maintain the light feel of the parent title while dealing with potentially tragic subjects. The annual from Warren Ellis and Steve Dillon, however, strays too far from the fun world occupied by Gen13.~FP

GEN^{13} Miniseries and One-shots

Image/WildStorm: *One-shot ('Rave') 1995, one-shot (Gen 13/Maxx) 1995, 2 issue microseries ('Ordinary Heroes') 1996, one-shot ('Unreal World') 1996, one-shot (Gen13/Generation X) 1997, one-shot ('3-D Special') 1997, one-shot ('Yearbook') 1997, 3 issue miniseries ('Interactive') 1997-1998*, 3 issue miniseries ('Magical Drama Queen Roxy') 1998, 2 issue microseries (Gen 13/Monkeyman and O'Brien) 1998*

WildStorm: *One-shot ('Going West') 1999, one-shot ('Grunge Saves the World') 1999, one-shot ('Wild Times' 1999, one-shot ('Wired') 1999, one-shot ('Carny Folk') 2000, one-shot ('A Christmas Caper') 2000, one-shot (Gen 13/Fantastic Four) 2001, one-shot ('Medicine Song') 2001, one-shot ('Science Friction') 2001*

Of the team-ups, *The Maxx* and *Fantastic Four*, illustrated by Tomm Coker and Kevin Maguire respectively, are the most successful, the latter a comedic race to stop a giant-sized Qeelocke from meeting another member of his alien species on a rampage in New York. *Generation X* and *Monkeyman and O'Brien* are both illustrated by Arthur Adams, but only the latter, with its tale of a world of moral opposites, approaches a natural use of the characters. Adams is also responsible for the short 'Mauling' in the '3-D Special' also including one of Tom McWeeney's adventures of a miniature Gen13. These 'mini' characters are also the heroes of 'A Christmas Caper', a fantasy adventure with Santa Claus captured by International Operations. Other comedy adventures include 'Grunge Saves the World' by Kevin Altieri, 'Magical Drama Queen Roxy' by Adam Warren and 'Science Friction' drawn by Matt Haley and Aaron Lopresti; all are entertaining, but unchallenging reading. 'Interactive' offers readers the chance to choose how certain plot elements will be worked out, by voting between issues. This is an interesting experiment, but hardly leads to great comics.

Of the stories with a more serious intent, 'Ordinary Heroes' suffers from over-dark colouring and overwriting, but otherwise Adam Hughes' strip is a downbeat look at the nature of heroism. 'Wired', by Mike Heisler and Richard Bennett, looks good, but its story is slight and 'Unreal World', by Heisler and Humberto Ramos features a rather pedestrian battle against a mind-controlling villain. 'Going West' is an interesting mix of good-intentioned storytelling and humour, as Fairchild and Rainmaker investigate the ominous birth of a white buffalo whilst their team-mates hunt for gold. Written by Joe Pruett and drawn by Andrew Robinson, who are atypical creators for Gen^{13}, this is one of the better uses of the characters. The best characterisation of all is provided in 'Medicine Song' by writer Ben Raab, as Rainmaker returns to her home to face a rogue shaman and her own fears. Unfortunately, the artwork by Brent Anderson and Will Blyberg does not complement the script. 'Carny Folk' reprints backup strips from the regular series (32, 34, 36, 38), 'Yearbook' is largely pin-ups whilst 'Rave' contains interviews with the creators, character biographies, pinups and a one-page strip by Matt Feazell.~NF

GENE DOGS

Marvel UK: *3 issues 1993*

A team of counter-terrorists are saved from death by a secret weapon that rewrites their DNA in combination with the genetic material of various animals, including a dinosaur. The resulting hero-type creatures battle superfoes engaged in a war between rival conglomerates. Bold story-telling can't hide the lack of originality in the premise or the characters.~NF

GENERATION X

Marvel: *75 issues, 5 Annuals, 2 Specials 1994-2001*

In 1994 Image were successfully selling comics with continuity-shy artwork featuring pin-up-friendly characters. Ever the bandwagon-jumpers, Marvel added in direct links to the X-Men, namely Jubilee and their dullest ever scripter Scott Lobdell, and achieve their own Imagey hit. A new group of students attend *Xavier's Academy for Gifted Children*, which is now run by Emma Frost (The White Queen) and Sean Cassidy (The Banshee). They bicker, but there's an understated romance going on for the first few years. Joining Jubilee in class are Husk – New Mutant Cannonball's little sister, who can shed her skin to reveal new bodies and substances; Chamber whose telekinetic power literally erupts from his mouth and throat; invulnerable telepath Monet StCroix known as M. Synch who can attune himself to other nearby mutants' abilities, Angelo 'Skin' Espinosa who can control ductile lengths of his grey skin, and the enigmatic Penance is diamond hard with razor-sharp edges all over her scarlet body. The first villain to raise his head is genetic vampire Emplate who keeps returning due to his links with Penance and Monet.

Lobdell scripts the first 28 issues passably, concentrating on character interaction, although his cartoon Londoner dialogue for the oddly spelled Jonothon is unbearable. Co-creator and artist Chris Bachalo is usually inked by Mark Buckingham in 1-6, 18-22, and 27-31. Many hands draw the series in between, occasionally very nicely, but none with a flair that even approaches Bachalo's. The stories concentrate on the cast and are therefore hard to summarise individually. The mutants fight to control Penance in 3, and she provides a surprise revelation in 12. Synch falls under Emplate's influence in 14 and battles his team-mates in 15, and Howard the Duck guest stars in 21-25 where Nightmare influences Emma's dreams, which begin to affect reality. 27 features the classic short 'Cooking With Jubilee' by Jim Mahfood, who also produces 1998's Underground Special.

32 ignores several hanging threads from 31 as the comic changes creative hands, with Larry Hama writing mediocre stories to 47, including the team spending several mystified issues inside a fantasy jungle with locomotives running through it. Terry Dodson's decorative art starts in 38 with its pronounced Adam Hughes influence. Apart from the occasional explosion of action, the title is doomed to two years of catalogue poses and exquisite talking heads. There are important revelations about Penance in 40, and having dipped his toes in the water with 45, Jay Faerber renders *Generation X* readable again between 48 and 62. His highlights include Generation X versus The X-Men in 54-55, even if they are wearing Hellions costumes. 59 is devoted to visiting morlocks Artie and Leech's day out in Manhattan with the classmates and Uncle Juggernaut calls round with season's greetings in 61, while. Monet solos in 62. Warren Ellis collaborates with Brian Wood on the writing from 63 leaving it in Wood's hands for the last five issues, and artist Steve Pugh takes over for 64-72 and 74. His storytelling style is a feast of body language and able continuity, but he never finds a good inker. Their issues mark a darker trend in the themes handled in Generation X. 'Correction' deals with traders in children in 63-66, featuring new costumes, and Emma's sister Adrienne returns in 67-70. The new, casual style costumes in 71 don't save the title, with 'Four Days' in 71-74 amounting to a series of solo portraits of Chamber, M and Jubilee, Skin and Banshee then Paige. Everyone really does just decide to call it a day in 75, and the series' undertaker is the suitably dreary Ron Lim.

There was a not-unentertaining *Generation X* television movie made in 1996 starring Finola Hughes as Emma with characters like Chamber, Husk, Synch and Penance replaced or omitted due to budget restrictions. The 1995 annual features the group's encounter with The Hellfire Club, 1996's annual is an extended everyday sequence ruined by Andreas and Andrea Strucker and their mutagen wave projector and the annual for 1997 is based on the first *Generation X* novel where they meet D'Spayre. Annual 1998 chronicles a visit from Dracula and the 1999 Annual focuses on Jubilee. There's also a Holiday Special to coincide with Christmas 1998 where the kids are menaced by Orphanmaker and Nanny, and, yes, they do meet Santa. The comic celebrates Christmas in 4, 24, 60. As a next generation of X-Men this is a better fist than *New Mutants* or the feeble *X-Factor* to be sure, but that's hardly a compliment. Bachalo's imaginative, if oblique, approach quickly lost out to uninspired fill-ins and the safe slickness of Dodson. When some decent scripting finally came along with Faerber and then Ellis the title no longer had any individuality to cash in thanks to years of straw editing.~SW

Superman & Batman: GENERATIONS

DC: *4 issue miniseries 1999*, 4 issue miniseries ('II') 2001*

This Elseworlds tale covers the lives of Batman and Superman as if they aged in real time. The first series covers 1929 to 1999 in ten-year leaps (including a look at 2929). The second spans 1942 to 2019 in eleven-year steps. John Byrne takes the opportunity to give Bruce Wayne and Clark Kent families with more or less tragic consequences as the Ultra Humanite spends a lifetime seeking revenge against his earliest enemies. The second series adds detail to the first whilst including more DC heroes and their children. Byrne has fashioned a story respectful of pre-*Crisis* continuity yet playful as well in accepting its inconsistencies. One for the fans.~NF

Recommended: Miniseries one 1-4

Alan G. Oldham's GENERATOR COMICS

Caliber: *1 issue 1994*

He's not lacking an ego is Alan G. Oldham, penning a self-aggrandising editorial promoting his DJ activities, and bestowing a meaningless title on the comic named after his music company. At first glance the stylish retro-future style art would seem to confirm a talent, but start reading and it's dire. Cliché follows cliché interspersed with contemporary cultural references for a story set in 2097, and wish fulfilment women. The back-up is slightly better, but overall look without venturing further.~FP

The GENERIC COMIC BOOK

Marvel: *One-shot 1984*

My, what a jest in 1984 as Marvel turned out a generic comic by generic creators with a generic superhero, a generic origin and a generic fight. Had it been released five years later it would have put the rest of the line to shame.~FP

GENESIS

DC: *4 issue miniseries 1997*

Odd power fluctuations annoy the superheroic community, linked to a background radiation, the Kurtzberg Field, permeating the DC Universe. To the New Gods, this phenomenon is known as "The Godwave", and... it's just too stupid, okay? The upshot is, writer John Byrne attributes every DC super power to the New Gods, in a cack-handed tribute to the late Jack Kirby, nee Kurtzburg. While superheroes as we know them wouldn't be here without Kirby, this after-the-fact deification – literally, as it's revealed superheroes are what were, in ancient times, referred to as demigods – is inappropriate and offensive. While touting itself as the series that would make major changes to DC, the only people even semi-permanently affected were odd members of the Legion of Super-Heroes, the Teen Titans, and Young Heroes in Love, hardly movers and shakers. Oh, and Takion died, got better, and was installed as the new Highfather. Do yourself a favour, and if you're given these for free, rip off the rather nice Alan Davis covers and throw the rest away.~HS.

Codename GENETIX

Marvel UK: *6 issues 1993*

A team of mutants unsure of its origins battles against one of the evil corporations that also turn up in *Gene Dogs*. Heavily dependent on the dynamics of other, well-established Marvel teams (they have a Danger Room), their membership consists of token stereotypes and they don't even warrant new villains. Dull.~NF

GENOCYBER

Viz: *6 issue miniseries 1993*

The peculiar Japanese blend of innocence and ultra-violence strikes again as a teenage girl's natural psychic talents are accelerated by machine and combined with a battlesuit. This series is an origin story, but the character hasn't been seen since in English translation.~FP

GENTLEMAN JIM

Hamish Hamilton: *1 volume 1980*

Jim is a middle-aged lavatory cleaner of limited intelligence, dissatisfied with his position, but feeling trapped due to his lack of education. Given to fantasising about outrageous alternative careers, Jim eventually tries his hand at being a highwayman. Reading it, you can almost hear the Peter Sallis voiceover. In addition to producing a very good children's story, Raymond Briggs is making a few points about the failures of British social systems, and the manner in which everyone is assigned a place and not expected to rise above it. Despite depicting an obvious comedic figure, Briggs is never patronising about Jim: his eccentricities are presented in poignant fashion, and the depictions accentuate Jim's innocence in the face of more knowing caricatures. Briggs would become a little more strident in later works, and Jim's stoic naivety fatal in *When the Wind Blows*.~WJ

GENUS

Venus: *22 issues 1993-1997*

Radio Comix: *35 issues (23-57) + 1997 to date, 3 issues ('Spotlight') 1998-2000, one-shot ('Genus Male') 2002*

A perhaps surprisingly long-lived anthology, but then it does combine anthropomorphism and sex, so there's a wide target audience. A number of creators have been with the series from the start, sometimes with recurring characters and serials, other times with short stories. These include Kjarten Arnorsson whose magic-weaving Mink is a frequent presence, Brian Sutton, with his own 'Amy's Adventures' or writing for others, Shon Howell, Brad Lesher, and Dennis Clark, whose 'Collars and Cuffs', with Robin Lane and Joyceanna Brock, about a couple of female police officers, is another regular. A sampling of that can be found in a 'Collars and Cuffs' special. Early issues contained strips from Lea Hernandez (2) and Donna Barr (7), experimented with themes like a "Bondage and Fetish Issue" (4, 8), and surely set some sort of record with its "Extra-Large Lesbian Unicorn Issue" (10).

James Hardiman is another regular contributor, whose 'Skunkworks', about three sisters, Natasha, Onyx and Lori, is the subject of the three 'Spotlight' issues, which include new and reprint strips. 'Desert Storms' is an irregular series by Dean Lee Norton and Michael Hirtes, and Richard Moore provides occasional pinups, as well as strips in 40 (his 'Pound' characters), 51 and 57. Mixing softcore and hardcore sex, and willing to apply the sexual situations to all sorts of genres, *Genus* is never less than interesting (assuming you're past the obvious entry requirements), but rarely produces extraordinary material. 'Genus Male' is a gay-themed issue, and there are also two issues of Genus Greatest Hits, which reprint the best of 1-20.~NF

GEOBREEDERS

CPM Manga: *35 issues 1999-2002**

Stylish, violent, spooky cop drama played heavily for laughs as the hapless Taba joins a private agency dedicated to the destruction of supernatural entities that threaten the stability of the world, while all he wants is a day off and a pay rise. As with much contemporary manga, the hero is a bit of a klutz until the action starts, and he vacillates between being overawed or beguiled by his archetypal sexy female co-workers. They seek to battle infernal outbreaks during an interminably long-running subplot concerning good and bad Phantom Cat spirits. Enjoyable fluff with all issues available collected.~WW

GEOMANCER

Valiant: *8 issues 1994-1995*

Clay McHenry, blind cop on the take, is the unlikely choice as Geomancer, Guardian of the Earth. This tradition, established before recorded history began, chooses one

* Available in a collected edition

individual every generation to reaffirm humanity's link with the mother planet. The superheroics are competent, but writer Maurice Fontenot's efforts are insufficient to distinguish the title from the rest of the pack. Geomancer's mystically-imbued powers exhibit too many shades of Daredevil, and the slate would have been better filled by examining the roles and responsibilities of the Geomancer, as opposed to parading a string of bad guys for bicep-flexing fodder.~APS

GESTALT

NEC: *1 issue 1993*

Odd pacing and sparse art characterises this story of a Russian woman during World War II fed an experimental drug enabling her to tune in on the thoughts of others. The first issue concentrates more on humanity than heroics, and that's all we got.~FP

GESTALT

Caliber: *1 issue (0) 1998*

Spin off from Seeker, telling the story of Tracy Le Master who believes that she becomes Seeker when possessed by the spirit of an Atlantean warrior called Kiryn. Captured and imprisoned for two years without contact with Kiryn, Tracy feels lost when she escapes, but her former employers believe she could still be of use to them. Mostly scene setting and exposition, this is hardly promising.~NF

GHOST

Dark Horse: *One-shot 1993, Series one 36 issues, 3 Specials 1995-1998, Series two 22 issues 1998-2000, one-shot ('Handbook') 1999*

Introduced in a one-shot as part of *Comics Greatest World*, Ghost is Elisa Cameron, searching the city of Arcadia for clues to her past and how she's come to be dead, but still able to handle a pair of forty-fives. Initial issues team her with other Comics Greatest World characters King Tiger (2-3), Barb Wire (4) and X (9), and a Predator (5). Her sister, Margo becomes a victim of the villain, Scythe and the Furies, an all-female paranormal strike force are introduced (9-12) and remain important characters throughout both series. Barb Wire returns to share a kiss (18-19, Special 2), as does X unfortunately, before Elisa goes hunting for the city under Arcadia (20-25) leaving her with a new role as protector of Arcadia, above and below ground. 'Painful Music' (28-31) sees Elisa meeting other ghosts, but unable to follow them as they're given their final release and Margo returns as the deadly, Silhouette in 'Jade Cathedral' (33-36). In the second series, Chris Warner turns Elisa's origin on its head as, in fighting the villain Trouvaille, it is revealed that Margo has been possessed by a demon and that other demons have been deliberately given human hosts (1-6). A team-up with King Tiger against Scythe leads to a meeting with Vortex (7-10) before 12-15 has the conclusion of the Silhouette storyline.

The first series is entirely written by Eric Luke, the second by Chris Warner (1-15) and Mike Kennedy (7-10 (co-writer), 16-22). The title has many problems, not least that no-one seems to have known what to do in respect of Elisa's origin. There were too many supernatural stories at the expense of crime or mystery, and various attempts at a new direction were all short-lived. It can't have helped either, that Ghost was incapable of retaining an artist, with eleven contributing to the first series and four to the second. The best of the artwork is provided by Adam Hughes (series one 1-3) and Scott Benefiel (series one 6-7, 26), but John Cassady (27), Ivan Reis' run on the first series (17-25, 28-31, 33-36) and Ryan Benjamin's on the second (11-15, 18-19, 21) are all enjoyable. The earliest and later issues of the first series are available in collections (sometimes spliced together), as are 1-6 of series two.~NF

GHOST Miniseries

Dark Horse: *One-shot (Ghost and The Shadow) 1995, 2 issue microseries (Ghost/Hellboy) 1996, 4 issue miniseries (Ghost/Batgirl) 2000*

Doug Moench has The Shadow unfrozen from hibernation in order to protect the world from a demon encased in Jade that an old enemy is planning to unleash, with the unwilling aid of Ghost, whose sister has been kidnapped. This is well characterised and has an old-fashioned feel as drawn by H. M. Baker, but is rushed at the end. The possessed spirits of men murdered by gangsters in Arcadia, try to trick Ghost into defeating Hellboy so they can take his hand, in Mike Mignola's customarily creepy plot, attractively drawn by Scott Benefiel and Jasen Rodriguez. Missing women bring Batgirl to Arcadia where she teams up with Ghost against Malcolm Greymater, who's building an army of zombies with which to rule the underworld, and Two-Face, who's annoyed by Greymater's recruiting techniques. Mike Kennedy's script rambles and Ryan Benjamin's artwork is inconsistent, though when inked well, as by Michael Bair on 2, the whole is much more attractive.~NF

Tales of GHOST CASTLE

DC: *3 issues 1975*

A couple of Robert Kanigher-penned tales don't stop this representing DC's horror line at its most mediocre. The predictable stories all have EC format 'shock' endings, with retribution from beyond the grave and ironic dénouements predominating. Lucien the Librarian makes his first comic appearance as host of Ghost Castle, so being a *Sandman* completist is probably the only reason for bothering with the title now.~NF

GHOST DOG: The Way of the Samurai

Oni Press: *One-shot 2000*

Based on the character from the film of the same name, Scott Morse's comic is an attractive package to look at, with his black and white brushwork beautifully executed. His story of the American samurai/assassin, however, is so gently paced that almost nothing happens during its 25 pages.~DB

GHOST IN THE SHELL

Dark Horse: *8 issue limited series 1995**

Deceptively straightforward action adventure series for the first six issues, becoming a treatise on artificial intelligence and the nature of life in the final two. In the near future, a vast computer network covers the planet and a crack team of covert operatives exists to combat terrorism of all kinds. The field leader of this team is the beautiful but deadly Major Kusanagi, an android with a 'ghost' (a sort of artificial soul). Each issue leads the team into deeper and deeper political waters until in 7 Kusanagi undergoes a transformation requiring the assistance of an Artificial Intelligence in the network. Masamune Shirow doesn't provide much in the way of characterisation beyond the hard-headedness of Kusanagi but his technology-heavy stories are still very readable. His artwork is detailed if not particularly elegant while his people can tend towards caricatures, but the action is fluid and the overall effect is unique.~NF

Recommended: 1-8

GHOST MANOR

Charlton: *Series one 19 issues 1968-1971, series two 77 issues 1971-1984*

Charlton's third 1960s mystery anthology was hosted by a blue skinned, green haired hippy in a mini-skirt and sunglasses, Wanda the Witch. Despite occasional stories from the likes of Joe Gill and Steve Skeates, and the odd bit of drawing from Jim Aparo, Steve Ditko and Pat Boyette, the title suffered from Charlton's late 1960s mediocrity (which is really too complimentary a term for the general standard here). The title became *Ghostly Haunts* in 1971, with Wanda renamed Winnie. Do we detect some disapproval from Marvel, whose Scarlet Witch was also named Wanda?

Three months after the title was changed, *Ghost Manor* was back with a new host, a ghostly undertaker called Mr Bones. Now typical of mid 1970s Charlton mystery anthologies, there's nothing of note. Writing was by Joe Gill, Mike Pellowski and Nick Cuti, and art by Ditko, Joe Staton, Don Newton, Tom Sutton, Pete Morisi (PAM), and Wayne Howard. From the late 1970s there were also innumerable stories by very poor (especially on Charlton rates) South

* Available in a collected edition

American artists and the dreadful Korean artist Sanho Kim. Many of the covers from 20 to 32 were painted, and issues from 33 on are all reprint, sometimes dredging as far back as the 1950s.~SW

GHOST RIDER

Marvel: *7 issues 1967*

Ghost Rider mark one originated at Magazine Enterprises, and when the copyright expired, Marvel pounced. He was drawn in the 1950s by Dick Ayers, who returned for this incarnation. He was a Western character whose gimmick was to coat his clothing and horse with "a phosphorescent substance" to give the appearance of coming from beyond. One presumes his demise was from a particularly hideous form of cancer. Six of his issues were reprinted as *Night Rider* when the 1970s Ghost Rider was popular, and he went on to star in *Western Gunfighters*.~FP

GHOST RIDER

Marvel: *Series one 81 issues 1973-1983, Series two 94 issues, 2 Annuals 1990-1998, 6 issue miniseries 2001-2002**

The second incarnation of the Ghost Rider is one of the most visually striking characters created for Marvel. Mike Ploog's design has a flaming skeleton clad in leather biker's gear that leaves only the skull visible sitting atop a flaming motorcycle. Carnival stunt-rider Johnny Blaze makes a deal with the devil (modified to Mephisto in more conservative times), and comes out possessed by the spirit of a demon. This occurs in Marvel Spotlight 5-11, and was reprinted in the wake of the 1990s version's popularity as a series titled *The Original Ghost Rider*. It's unlikely that any other title as shoddy as the 1970s *Ghost Rider* has lasted half the length. It's difficult to find any redeeming features in 1-68, although Jim Starlin's tale of a cross-country race against death (35) stands out by default among the assorted demons and other half-arsed satanic clichés. Perhaps in desperation, then newcomer Roger Stern was appointed writer (68), and something astounding occurred: he raised the title above the mediocrity line. 'Freaks' (70), despite appropriating ideas from DC's early *Swamp Thing*, was touching, and the return of very silly villains the Circus of Crime (72,73) was also enjoyable. By that time, though, the damage had been done, and the series was adequately concluded by the team of J.M. DeMatteis and Bob Budiansky as Blaze separated from his demonic other half. These later stories were reprinted as seven issues titled *The Original Ghost Rider Rides Again*, and those desperate to see Johnny Blaze again should look for *Spirits of Vengeance* and Blaze.

The second series begins well. This time teenager Danny Ketch is drawn to the Ghost Rider's motorcycle in a graveyard, and his transformation enables him to save lives. Far more an obvious force for good than Johnny Blaze in his possessed identity, he also has some other abilities, a particularly inventive one being that when he stares into a villain's eyes said villain is confronted with all the pain they've caused others. 1-7 are collected, and the first dozen issues written by Howard Mackie with the art team of Javier Saltares and Mark Texeira produce a body count so high it's a wonder anyone's left living in Marvel's version of New York. Despite the inevitable return of Johnny Blaze (14) and a nifty glow-in-the-dark cover on 15, the title is a long time recovering from the loss of Saltares after 12. It drags from fight scene to angst-ridden soul searching as Mackie tantalises with hints of the Ghost Rider's origin and past. Ironically, it's only once this is revealed (41-43 and *Spirits of Vengeance* 14 & 15) that things improve. An interesting new Ghost Rider takes over the title for 46-50, and the arrival of Salvador Larocca as penciller from 52 finally drags the art back up and beyond the originally established standard. With 66 the Ghost Rider is given a harder edge, becoming the spirit of vengeance the original character was, and that issue has a shock value long absent, but it doesn't last. Despite Larocca improving all the while, the series is dragged down by the scripts of Ivan Velez Jnr. He's caught between a rock and hard place in attempting to move away from the satanic clichés and angst, yet retain an obviously declining readership. An injection of humour doesn't work, and 82 deserves a mention for the inexplicable and incompatible guest appearances of Devil Dinosaur and Howard the Duck. The cartoony art of Pop Mhan (82-87) doesn't work either, and even the returning Saltares from 89 can't prevent cancellation. Those compelled to check out later issues should start with 86, an investigation into how the Ghost Rider is perceived by neighbourhood residents. Don't bother with the preceding three chapters of the usual nonsense, but 93 is a spirited issue that serves, to all intents and purposes as a conclusion to the series.

Warren Ellis fans might want to seek out the second annual, but don't come with expectations raised, and at the height of Ghost Rider's renewed popularity three one-shots were issued. *Fear* teamed Ghost Rider with Captain America and the *Ghost Rider Special* reprinted the Ghost Rider and Cable teaming from *Marvel Comics Presents* 90-98. Both are very ordinary. *Hearts of Darkness* is not, sadly, in this instance a terrifying look into the bleakness and torment of humanity under stress, but a crap team-up of Ghost Rider, Wolverine and Punisher.

The Marvel Knights imprint usually guarantees a certain level of competence, but *Ghost Rider* seems to possess some over-ride. The miniseries revisits Johnny Blaze, who puts out a contract on Ghost Rider while travelling road movie style, encountering other bikers along the way. It's as wretched as anything from twenty-five years previously.~FP

GHOST RIDER 2099

Marvel: *25 issues 1994-1996*

Cyberpunk reworking of the flaming skulled, bike-riding spirit of vengeance. After his murder data-pirate Kenshiro Cochrane A.K.A. Zero has his consciousness downloaded into an invincible war robot by a conclave of artificial intelligences and embarks on a crusade to clean up the world and avenge the deaths of his friends. Fast, edgy writing from Len Kaminski and art from Chris Bachalo, Mark Buckingham and latterly Ashley Wood provide suitable graphics for a pacy action romp. A treat for Sci Fi fans.~WW

GHOST SHIP

Slave Labor: *3 issues 1996*

Surreal sea adventures by Jon Lewis, set aboard the not-so-good ship Cassowary as cartoonist and poet John Conk'roo settles into his new permanent home and learns to live with the most peculiar crew afloat. Most of the material concerns the odd-couple relationship between John and first mate DeQuayne, although Dr Rahblablah and the surly crows get a few good one-liners. Competent, but not as funny or as poignant as it thinks.~WW

Filmation's GHOSTBUSTERS

First: *6 issues 1987*

Oh, the superior knowledge of TV executives. The *Ghostbusters* movie had been a global hit, and the cartoon rights fell to Filmation, who decided that with a little tweaking they could improve matters. "Who needs the original characters?" they reasoned. "Let's have their descendants. And a giant talking ape, a ghost-possessed car and a flying vampire bat/pig." Apathy from the kids was resounding, so much so that a new cartoon was speedily conceived stressing it was the *Real Ghostbusters*. That said, given the duff ideas, Hilarie Staton came up with just the right level of fantasy and humour in the comics to appeal to young children (although not beyond), integrating puzzle and activity pages into the stories. The plots are basic, but have a charm and artifice altogether lacking in Now's comic based on the succeeding cartoon show.~WJ

GHOSTDANCING

DC/Vertigo: *6 issue miniseries 1995*

An apocalyptic tale featuring drumming, revelatory drugs, rock concerts, and a few Native American spirit gods. It sounds desperately worthy, but no – it's fun! The enthusiasm in Jamie Delano's writing is infectious, and the treatment is refreshingly matter-of-fact, as if you've known this story all along, and don't need any lectures. Richard Case's vibrant and direct artwork brings out the best of this approach and it all makes for a great read.~FC

Recommended: 1-6

GHOSTLY HAUNTS

Charlton: *39 issues (20-58) 1971-1978*

Formerly titled *Ghost Manor*, this mystery anthology was typical of 1970s horror fare. Hosted by Winnie, formerly Wanda, the Witch, a mini-skirted, blue-skinned hippy narrator, there's little inspiration. Stories by Joe Gill (whose many pen names included Jack Daniels and Tom Tuna), Mike Pellowski and Nick Cuti are illustrated by the usual roll call of 1970s Charlton artists: Ditko, Boyette, Staton, Howard, Newton, Sutton. Work by Mike Zeck and Rich Larson is accompanied in the later issues by art from South American and Korean studios of the most execrable quality. In 1975 Charlton started running painted covers, and issues from 54 onwards are almost exclusively reprint.~SW

GHOSTLY TALES

Charlton: *115 issues 1966-1976 (55-124), 1977-1984 (125-169)*

As was often the case with Charlton comics, the numbering was inherited from a completely unrelated title, in this case the Blue Beetle series. This was Charlton's first new mystery anthology of the 1960s, and featured their horror host Doctor Graves, who occasionally involved himself in the stories he told. Under editor Dick Giordano there were several interesting artists, although most of the scripts are appalling, the better ones being by Steve Skeates (as Norm DiPlume), Denny O'Neil (as Sergius O'Shaughnessy), Joe Gill and Dave Kaler. Stories drawn by Pat Boyette, Steve Ditko and Jim Aparo are the exception rather than the rule.

Dr Graves moved into his own title, and was replaced here by Mr Lazarus Dedd from 71. When Giordano departed to DC most of his better contributors went with him, leading to an appalling slump in the late 1960s. By the mid-1970s, though, newer talents like Don Newton, Tom Sutton, Joe Staton, and later Mike Zeck and Rich Larson, joined Boyette and Ditko. Writers included Gill (under assorted pseudonyms), Mike Pellowski and Nicola Cuti. From the 1977 revival the comic is exclusively reprint.~SW

GHOSTS

DC: *112 issues 1971-1982*

The cover proclaims that this horror anthology featured "True tales of the weird and supernatural". Despite this, the content was typical of DC's mystery books. One notable feature was that for the first fifty issues almost all the stories were written by Leo Dorfman, which contributed to the lack of highpoints. The stories weren't bad, simply uninspired, with the exception of 22's camp classic 'The Last Shrill Laugh of the Phantom', wherein Benito Mussolini was haunted by the ghost of Julius Caesar!

Throughout its run *Ghosts* seemed cursed with more than its fair share of John Calnan and Jerry Grandenetti art, though the first five issues did at least have a smattering of choice 1950s reprints. Issues in the teens and twenties have a higher proportion of quality art by the likes of Alfredo Alcala, Gerry Talaoc and Rico Rival, with a Nestor Redondo strip in 13 being particularly nice. Undoubtedly the title's best-ever story was the Bayou shocker 'Blood on the Moon' (31), illustrated in riveting style by forgotten comics genius Bill Payne. Later issues are less impressive, although an occasional decent art job would surface, such as the nice Michael Golden strip in 88. A three-part Spectre story in 97-99 failed to raise much interest, probably due to its total lack of inspiration, and the last few years are best left to collectors who simply can't get enough of Ruben Yandoc's 'unique etchings'. A number of the best early strips were reprinted in 40, a hard-to-come-by sixty-eight-page giant.~DAR

Recommended: 13, 31, 88

G.I. COMBAT

DC: 245 issues (44-288) 1957-1987

Continuing the numbering after DC purchased the title from Quality, early issues consisted of short unrelated war stories written by the likes of Bob Haney, Bill Finger and editor Robert Kanigher. Though eminently readable, they suffer from an over-reliance on gimmicks and were hamstrung by The Comics Code and DC's reluctance to explore the darker side of war. Almost all early issues feature art by Joe Kubert, Russ Heath, Jerry Grandenetti and Ross Andru, though particularly notable were a number of strips by Mort Drucker (48, 61-64, 66, 71, 72, 76, 78). 87 introduced Kanigher's 'Haunted Tank' strip, which ran almost unbroken until the comic's demise. Jeb Stuart, whose tank was also rather confusingly called Jeb Stuart, was haunted by the ghost of his idol, Confederate cavalry leader (you've guessed it) Jeb Stuart. The ghost would pop up periodically to give Jeb advice, but in all other respects it was a straightforward war strip, with the most surprising aspect being how Kanigher kept coming up with fresh ideas, although he unerringly did. The likes of Kubert (99, 100, 102-113), Andru (134-136) and Irv Novick (89, 116, 118-120, 122, 127) all took their turns at the strip, but it belonged to its first artist Russ Heath, a man seemingly incapable of drawing badly. The Kanigher/Heath team so consistently turned out quality work that it's hard to pick out particular highpoints, though 121, 125, 126, 141 and 142 are at least spectacularly well drawn. 138 introduced another long-running strip, The Losers, later to gain their own series in *Our Fighting Forces*.

After a Doug Wildey fill-in on Haunted Tank in 153, veteran war artist Sam Glanzman took over, drawing it in one form or another until its demise. Some later issues contain Glanzman inks over Dick Ayers pencils, but the difference is barely noticeable. More significant was the departure of Kanigher, replaced by writer/editor Archie Goodwin (159-173), who gave the strip a higher emphasis on characterisation and continuity. Symptomatic of this was the death of long-time crew member Aron Asher in 162, and though Kanigher's stories were always well crafted, Goodwin's tenure was the book's best period. Kanigher returned with 174 and the rest of the run remains readable, if rarely inspired. 201 saw *G.I. Combat* transformed into a dollar comic with a vastly increased page-count and included 'O.S.S.' (by Kanigher and E.R. Cruz) and a number of short stories in addition to three 'Haunted Tank' stories each issue. 242 introduced 'The Mercenaries', by Kanigher and Vic Catan, which, with 282, eventually supplanted Haunted Tank as cover feature, but this couldn't save the comic from cancellation. 128, 140, 144-154 and 169 are all or part reprint.~DAR

Recommended: 48, 61-64, 66, 71, 72, 76, 78, 121, 125, 126, 141, 142, 159-168, 170-173

G.I. JOE

Marvel: *155 issues, 4 Yearbooks 1982-1994*

Based on an ever-increasing line of action figures, initial issues feature substandard art and uninspired scripts coupled with the most ridiculous character names until Rob Liefeld's Image titles dredged the barrel still deeper. Breaker, Clutch, Zap, Rock'n'Roll... there's even an Eskimo named Kwinn in 2. Appalling quality notwithstanding, there was a rabid market. *G.I. Joe* was enormously successful, spawning numerous spin-offs and two reprint titles. The digest-sized *G.I. Joe Comics Magazine* ran for thirteen issues, reprinting 1-37, and *Tales of G.I. Joe* reprinted 1-15, all of them wretched. 1 is also reprinted as a treasury edition and in the first yearbook, and there's a 1995 *G.I. Joe Special* reprinting the Todd McFarlane pencilled 60. More permanently, 1-30 can be found in three collections.

Described as an élite counter-terrorist strike force, G.I. Joe's target is Cobra, an organisation dedicated to the principle of divide and rule. After the awful early issues, generally drawn by Don Perlin or Herb Trimpe, writer Larry Hama's multi-issue missions develop a greater complexity. He turns the title into an action soap opera with a massive cast. New characters are constantly added, although names didn't improve, with Quick-Kick, Crazylegs, Payload and Snow-Job among them. Letters make comparisons with *Hill Street Blues*, although *Burun Murchstansangar* would be as close, and the title is increasingly hamstrung by having to incorporate more characters and vehicles from the toy line and cartoon show. For a strike force, there's an astonishingly low mortality rate for the first hundred issues, but immediately thereafter the cast is reduced considerably, adding a new edge to the title. Beyond the first twenty-five or so issues *G.I. Joe* is an undemanding and generally reasonably produced action comic, albeit one with the pernicious subtext of glorifying war and violence in a real world setting. A representative issue encompassing the spirit of the title is 82, in which Hama has a bit of fun with the new recruit programme before delivering a short mission, while *Transformers* fans should check 139-142. The best of the yearbooks is 2, with the lead story drawn by the uncredited Mike Golden.~FP

G.I. JOE

Dark Horse: *4 issue miniseries 1996*

Veteran Mike Barr fails to lift this derivative, floundering series of vignettes used to promote a new toy line. This time, the paramilitary wonders are saving the world of the future from Iron Klaw and his legions of Skar. This should be for adults only as children aren't that impressionable.~WW

G. I. JOE: A Real American Hero!

Image: *13 issues + 2001 to date, 3 issue miniseries ('Battle Files') 2002, 3 issues + ('Front Line') 2002 to date*

The Cobra Commander has returned and the G. I. Joe Task Force is reformed under its own commanders, Flint, Scarlett, Roadblock, Shipwreck and Snake Eyes. Cobra Commander suffers a betrayal by Destro, however, who has his own plans for some deadly nano-mites (1-4). 5 is a flashback to Duke's battle with Major Bludd. 6-9 concern Cobra Commander's attempts at revenge for his treatment by Destro, at the same time, sending Storm Shadow to kill General Tomahawk. 10 has fill-in artwork from Jamal Igle on a tale of Zartan's sister, Zarana, leading into the four-part, 'Malfunction', in which the Dreadnoks take delivery of a Battle Android Trooper. It develops autonomous thought and goes on a rampage, chased by the Dreadnoks, G. I. Joes and Cobra Commander's Alley Vipers. Written by Josh Blaylock, this is celebrated for its realistic approach to military life in all of its various forms, but is really just another superhero strip, poorly illustrated by Steve Kurth (1-4, 6-9), and Kevin Sharpe (from 11), with stiff, badly proportioned, overly muscled characters. 'Battle Files' is illustrated information about the huge cast and the various organisations and weaponry involved, while 'Front Line' is a second, ongoing series, written by Larry Hama and drawn by Dan Jurgens, which at least means better artwork. In the first storyline (1-4), the Joes are escorting a device for what's meant to be their last mission before being disbanded, when they're attacked en route, but it has very dull dialogue and is poorly designed.~NF

G.I. JOE AND THE TRANSFORMERS

Marvel: *4 issue miniseries 1987**

A magnificent sermon on the concept of predestination as experienced by a rich and varied cast, and infused with the clash of the instinctive and the intellectual. No, hang on, that's *War and Peace*. This teams giant mutating robots and all-American heroes to protect a military project from the evil Decipticons and Cobra. It's rubbish.~WJ

G.I. JOE SPECIAL MISSIONS

Marvel: *28 issues 1986-1989*

"The missions we couldn't talk about until now" proclaims the cover of the first issue. Can't figure why, since there's little difference between this and the regular title right down to the creative team of Larry Hama and Herb Trimpe. The only notable distinguishing feature is that most of the stories here are self-contained.~FP

G.I. WAR Tales

DC: *4 issues 1973*

Reprints of solid but unspectacularly written war stories drawn by a stellar selection of artists. Over four issues there's Neal Adams, Mort Drucker, Russ Heath, Joe Kubert and, most astonishingly, Bernie Krigstein in 4.~WJ

GIANT-SIZE CHILLERS

Marvel: *1 issue 1974*

Marv Wolfman and Gene Colan are responsible for a story that slots between *Tomb of Dracula* 22 and 23. Restoring Dracula's daughter Lilith to life and introducing the tragic Sheila Whittier, this is an issue of Dracula's own title in all but name, and bears the same quality. Dracula related reprints from Marvel's 1950s monster titles round out the issue.~FP

Recommended: 1

GIANT-SIZE MINI COMICS

Eclipse: *4 issue miniseries 1986*

The minicomics phenomenon was particularly invigorating and satisfying. There's much dispute as to when the idea started (with a case to be made for the 1920s 'Tijuana Bibles' sex comics), but the principle was that the creator, operating under nothing but personal constraints, wrote and drew and self-produced comics that were photocopied, stapled and distributed, usually in smaller-than-pocket-size format. This series attempted to feature the best of them. Very wisely, four separate editors were each given an issue to present their selection of the best. The greatest variety is in 4, so that's the place to start, but the most biting cartoon of the entire run is Ron Hauge's 'The Known World' in 3, encompassing the US's feelings of paranoia and xenophobia.~WJ

GIANT-SIZE SUPER-HEROES

Marvel: *1 issue 1974*

Very ordinary extra-length three way battle between Spider-Man, Man-Wolf and Morbius.~FP

GIANTKILLER

DC: *6 issue miniseries, one-shot ('A-Z Field Guide to Big Monsters) 1999-2000*

Charming, vigorously painted and written by Dan Brereton, Japanese big monsterfight film type aliens destroying California story, with sweet monster/human DNA test-tube product hunk falls for sassy mutated super-crossbow wielding ex-agent fleshy blonde twist, plus humane meddling scientist and gruff military nuke enthusiast. Nothing wrong with this at all. Full marks.~GK

Recommended: 1-6

THE GIFT

First: *One-shot 1990*

Basically a sampler for First comics, *The Gift* was a squarebound-format 'Holiday Special' for Christmas 1990, featuring short stories about the major First characters, including Nexus, Grimjack and Badger. Some have a festive theme, all lead into a framing sequence by John Ostrander and Ian Gibson. Incidentally, it wasn't a gift at all. The package cost $5.95, and the name referred to the gift of life needed to save a child's life.~JC

GIFTS OF THE NIGHT

Vertigo: *4 issue miniseries 1999*

In a fairytale Europe we meet Reyes, tutor to the king's son Magdin, a slow-witted boy. It's a position of little or no power until Magdin starts to reinterpret the legends Reyes tells him as visions for his father. At first Reyes fuels Magdin's imagination accidentally, but soon starts to manipulate the boy to fulfil his own small dreams. All well and good, until another courtier, realising what Reyes is doing, uses the boy for his own, much darker, ends. Paul Chadwick's script is disappointing and the slight story could have been wrapped up in ten pages. Think how much time this would have saved poor John Bolton, who had to paint this dull slog.~DB

GILGAMESH II

DC: *4 issue miniseries 1989*

Written and drawn by Jim Starlin at a very low ebb of creativity. Gilgamesh and Otto, the last survivors of their race, arrive on a deserted planet Earth. They are soon battling the tentacled Nightshadow creature. In a grief stricken turn-around Gil comes over all philosophical and embraces a white, featureless void – allowing a variation of background from Starlin's usual black-with-stars. Despite the mythological tropes this reads like Robert E Howard doing science fiction rather than the retelling of a Sumerian epic.~SW

GINGER FOX

Comico: *Graphic Novel 1986, 4 issue miniseries 1988*

What should have been a run-of-the-mill tale of Hollywood folk was, incredibly, one of the most bizarre comics of the 1980s. Actually, the graphic novel by Mike Baron and a young Mitch O'Connell was a largely uninteresting affair, enlivened only by its stylish art. For the miniseries, however, O'Connell was replaced by the Pander brothers, for whom the description "eccentric" is an understatement of gargantuan proportions. While the comic is ostensibly about studio boss Ginger Fox and her tussles with murderous actresses and unruly directors, the expressionistic, distorted art transforms it into an insane, nightmare world. However, whereas the Panders' art is unrelentingly demented and staggeringly ugly, Baron leaves no cliché untapped, with every Hollywood stereotype present and accounted for. It's a rare title that manages to be outrageously camp and soul-destroyingly banal at the same time, but Ginger Fox is that comic.~DAR

GIRL

DC/Vertigo: *3 issue miniseries 1996*

Teenage rebellion par excellence from Pete Milligan and Duncan Fegredo. Simone's awful family live in a high-rise block where the local boys hang out in her lift counting whether there are more used condoms than syringes in there today. When she breaks the TV and blames it on her dog, her father throws him out the window. Milligan's parody of modern Britain is at once funny and hideous. Simone's fumbling attempts to get laid, her daydream of watching her gas-bloated corpse explode all over her family's winning lottery ticket; the make-believe bravura with which she confronts school bullies with a breadknife: Fegredo illustrates all in a brash, over-coloured style full of knock-kneed adolescents and over-made-up tarts. It's not a very deep story. When we discover a lot of what Simone tells us is actually fantasy it comes as no surprise, and the blithe ending rather negates any social criticism, probably in the name of irony. But it is fun, and if you're a mixed-up fourteen-year-old it probably reads very sympathetically.~FJ

GIRL CRAZY

Dark Horse: *3 issue miniseries 1996**

Gaby, Maribel and Kitten are friends whose sixteenth birthdays are fast approaching. One's a lawyer in the Fifties, one's a jungle heroine and the last's a collection agent for the I.R.S., who now control everything. Kitten takes a day off to meet up with her friends to celebrate and they decide to break Una out of prison (she's another friend about to turn sixteen). It's not going to be easy, though, with the I.R.S.'s robot Gaby out to stop them. This odd fantasy series by Gilbert Hernandez is at once a superhero satire and an attempt to explain what growing up is really all about. Humorous for the most part, there's an underlying sadness at the loss of innocence necessitated by age.~NF

Recommended: 1-3

GIRL GENIUS

Studio Foglio: *9 issues + (0-8*) 2001 to date*

Engaging tale of young Agatha Clay, erstwhile student of the Transylvania Polygnostic University, premiere educational establishment on an alternate earth where the Industrial Revolution was a global armed conflict. The major terror weapon in this world is that rare creature, the Mad Scientist, called "Sparks" by normal people, and every nation wants to corner the market in them. Is our heroine a Spark? Agatha's mysterious and deliberately suppressed past holds many secrets and a major conflict is brewing involving the powerful warlord who sponsors all progress on this steam-punk world and the nebulous forces that have used her as an unknowing pawn. Phil Foglio maintains his usual high standard blend of adventure and comedy in this engrossing fable. Witty and worthwhile.~WW

Recommended: 0-4, 6-7

GIRL TALK

Fantagraphics: *4 issues 1996*

Following a debut as a flip-book with *Real Girl* 7, this women-only series didn't seem to have a sense of direction, and floundered aimlessly. By 3, it was beginning to pull itself together, with two notable stories, Luella Wright's trippy, disturbing 'Tight Top', and Vicky Rabinowicz's 'O Fuck I'm a Victim' rising out of the ordinary, but the improvement wasn't sufficient to prevent this being dismissed as just another 'womyn's' anthology.~HS

GIRLFRENZY

DC: *7 one-shots (Batgirl, Donna Troy, Lois Lane, The Mist, The Ravens, The Secret, Tomorrow Woman) 1998*

As a '"special event", DC spotlighted their female characters, no doubt expecting it to compensate for their second-class status the rest of the year. Each one-shot starred a supporting player from an established series, and they looked great, with a very fetching nouveau-Mod design enticing readers to open them up. That's where the trouble started. *Donna Troy*, by Phil Jimenez, was intelligent and perceptive, with the former Wonder Girl/Darkstar/Troia pondering her many roles in life. *Tomorrow Woman* featured the deceased JLA member in smart, sassy superheroics, nothing remarkable. *The Mist* had what should have been the advantage of the parent series' writer, James Robinson, working on it, but it manages to be mawkish and pretentious at the same time. *The Ravens* introduced a villainess alliance scheduled to become the Birds of Prey's nemeses, but succeeded only in being the first pedestrian and tedious *BoP* comic. *The Secret* is technically a prequel to *Young Justice*; our gaseously evanescent heroine does little other than hang around while the boys save the day. For *Lois Lane* and *Batgirl* see their respective entries. This makeshift, faux-feminist non-event (advertised with a "No Boys Allowed!" tagline, assembled by a 95% male creative team) served no purpose, other than getting DC sued by Erica Smith, publisher of the UK's *Girlfrenzy* fanzine, effectively preventing DC from producing any more *Girlfrenzy* specials. Hey, maybe there is a silver lining there, after all... ~HS

Recommended: *Donna Troy*

GIRLHERO

Highdrive Publications: *6 issues 1993-1996*

After leading an unsuccessful revolution at her workplace, a young woman transforms her arm into a rivet gun and starts a not terribly successful career as a working-class superhero, aided by her gifted, but largely useless, friends, Animata and Yolanda. Back-ups are slice-of-life stories or non-serial fantasies by writer-artist Megan Kelso. They're rather more successful than the continuing tale, and collected as *Queen of the Black Black*.~HS

GIRLS' LOVE STORIES

DC: *180 issues 1949-1973*

After the success of Jack Kirby and Joe Simon's pioneering romance titles *Young Love* and *Young Romance*, every comics publisher jumped on the moonlight-and-roses bandwagon in the late 1940s. Most successful of the imitators was DC, who produced very creditable facsimiles using top-notch talent, and created a six-pack of romance titles that lasted until the 1970s. *Girls' Love Stories* was the career-girl variant, a significant number of tales involving the heroine's enforced choice between her career (always in a suitably girly profession such as actress or model. No lady engineers on view!) and The Man. Guess who invariably won. There's some superb art by many distinguished names, among them Gene Colan, Jay Scott Pike and John Romita, a staple of DC's romance line for many years before moving to Marvel.~HS

* Available in a collected edition

GIRLS OF NINJA HIGH SCHOOL

Antarctic: 9 *issues 1991-1999*

This annual series enabled creators other than Ben Dunn to have a try at his popular characters. To his credit, as editor, Dunn was as likely to feature strips by total unknowns as more established creators, although this often results in cases of enthusiasm supplanting talent. Rod Espinosa does a nice job including some recognisable characters in 7, and many artists prove they can ape the manga style, but this is very much preaching to the converted, with some stories making little sense in isolation.~WJ

GIRLS' ROMANCES

DC: *160 issues 1950-1971*

A clone of DC's successful *Girls' Love Stories* released a year later in the hope of repeating its sister's success, which for two decades it did. There's Alex Toth art in some early issues, and a Neal Adams cover and splash in 134, but otherwise the mixture's as before: lovely elegant artwork gracing outstandingly sappy and naïve stories.~HS

GIVE ME LIBERTY

Rip-Off: *One-shot 1976*

Years before Miller and Gibbons, Patrick Henry's quote was used to title a bicentennial special in which Gilbert Shelton, Ted Richards, Garry Hallgren and Willy Murphy apply the wit of the underground to the events of the War of Independence. Basically an educational title, the humorous cartoon style employed minimises dry historical detail while covering all the salient points, making learning a pleasure. Sadly long out of print, this is memorable and incisive and should have been a standard text in US schools during 1976.~FP

Recommended

GIVE ME LIBERTY

Dark Horse: *4 issue miniseries 1990-1991**

Frank Miller's scripts for what are essentially war stories play to Dave Gibbons' strengths: the ability to draw amazing landscapes believably; fast changes of pacing from explosive action to moments of reflection; using heroic poses and angles without irony or pomposity. In near-future Chicago Martha Washington, an angry young black woman who's been brought up in a fenced-in ghetto where the poor are imprisoned, is desperate to get out into the world. Her skills with computers and the encouragement of a liberal teacher seem to point the way until he is murdered and she goes after the killer. Traumatised by her action, she's sent to a mental facility, where she stumbles on an illegal government experiment to use schizophrenic psychics to control computers.

Thrown out of the mental home she ends up joining PAX, America's 'peace keeping' force, and makes a name for herself protecting the Amazon rainforest against rebel fast-food corporations. Although Martha begins fighting solely for her own survival, political change is taking place and she finds herself agreeing with the idealistic new President. She makes an enemy of her superior when she observes him betraying his men. They are the only two survivors of the action and, knowing she won't be believed, Martha keeps quiet about his duplicity, an action which brings trouble on her head for the rest of the story. She meets up with one of the schizophrenics from the mental hospital when sent to stop a gay, right-wing extremist organisation from nuking Washington, and together they set out to do the right thing, even when government and generals are deceiving everyone. Miller's political satire doesn't exactly stretch the reader, but it's lushly illustrated by Gibbons and, compared to your average Marvel comic, a masterpiece of insight. Her story continues in *Martha Washington* miniseries.~FJ

GIZMO

Chance: *1 issue 1985*

Mirage: *Series one 5 issues 1986-1987, series two 2 issues 1989*

Feeble humour comic about a metal man and his giant koala companion. For the second Mirage series the Fugitoid gets equal billing, and Michael Dooley's artwork has improved immensely.~WJ

GLOBAL FREQUENCY

WildStorm: *2 issues + 2002 to date*

Warren Ellis' take on *Thunderbirds* sees an organisation of specialists linked by the butch and mysterious Miranda Zero who gathers the appropriate teams to fend off disaster whenever the world is threatened by total obliteration. It's an entertaining take on the doomwatch genre with art by the a host of UK star talent such as Garry Leach (1) and Glenn Fabry (2) that so wants to be a TV show. The series is planned to be twelve issues.~WW

GLOOM COOKIE

Slave Labor: 14 *issues + 1999 to date*

Serena Valentino writes the eccentric and stylish adventures of a crew of groovy Goths who spend their time sleeping with each other, swanning about in dark clothes, going to parties and being bitchy and miserable. Underlying that is a mystical mystery, as cute little Max tries to find true love, friend Sebastian seeks the answers to his psychic episodes, Chrys seems to subsist on a diet of monsters and the evil Queen Isabella plots and manipulates everyone. Ted Naifeh, John Gebbia and latterly Breehn Burns illustrate a dark, lyrical blend of *Dangerous Liaisons* and *EastEnders*, by way of *Sleepy Hollow*. Subversively compelling.~WW

GLORY

Image/Extreme: *17 issues (0-16), 2 Specials 1995-1996, one-shot (Glory/Avengelyne) 1995, one-shot (Glory/Angela) 1996*

Maximum Press, *6 issues (17-22) 1996-1997, 3 issue miniseries (Glory/Celestine) 1996*

Awesome: *1 issue (0) 1999*

Avatar: *3 issues (0-2) 2001-2002*

As a supporting character in Rob Liefeld's Extreme Studios titles for Image, Glory seemed heavily derivative of Wonder Woman. When she gained her own title, it became clear she was an entire rip-off, from the Amazonian heritage and matriarchal island home down to the bracelets and lasso accessories. Mary Jo Duffy, scripter for the vast majority of the Image and Maximum issues, tried to start each issue on a strong scene or character note, frequently dealing with members of Glory's troublesome family (demon father, power-crazed goddess mother, fallen angel auntie...) By the mid-point, however, it always appeared as if Duffy got depressed and wandered away, leaving the story to flounder in inflato-bint 'anatomy' to the exclusion of any attempt at characterisation, storytelling or even the most basic narrative.

The flow was not helped by three consecutive issues (8-10), which crossed into and out of three different inter-company crossovers, but then, given the low standard of storytelling, the series probably wasn't hurt by the protracted interruption, either. Mike Deodato drew the first story arc, then it was the "Deodato Studios", who finally gave way to Ed Benes, purveyor of ineptly-drawn tits n' ass to the gentry.

After cancellation Glory started appearing as a supporting character in the acclaimed *Supreme* stories written by Alan Moore, and plans were announced for a new *Glory* series, written by Moore. An issue 0 was produce a for Liefeld's Awesome Comics, offering eight pages by Moore and Brandon Peterson, expanded to twelve by running two as 'portrait' double-page spreads. It established Glory's new human identity of Gloria West, broken-down and possibly

* Available in a collected edition

delusional waitress. A fascinating teaser, expanded upon somewhat in Alan Moore's *Awesome Adventures Handbook*, where extensive notes by Moore on what he planned to do with Glory were published. Given the frankness of some of Moore's comments in these notes, it is difficult to believe they were published with his intent or consent, particularly in view of his admitting, in print, that Glory was a blatant rip-off of Wonder Woman. It's not like people didn't know that, but it's one thing, legally, to have it understood, and quite another to have it admitted. Since Awesome folded shortly thereafter, it looked like no harm had been done. Glory then passed to Avatar, who re-issued 0, with Moore and Peterson's prelude. Using left-over Awesome material 1 and 2 came out to great acclaim; finally the character had some focus and direction, and the 'flashback' interludes, evoking the old "Charles Moulton" Wonder Woman tales, were a riot. Sadly, though, the inventory appears to have dried up, (or possibly DC interceded?) and Glory's career, just as it was becoming worthy of the term, has ground to a halt again.~HS

GLYPH

Labor of Love: *Series one 3 issues 1996-1997, series two 4 issues 1998*

A first issue Mike Kaluta cover introduces a decent black and white anthology magazine with the only familiar interior contributor being Sarah Byam. A wealth of talent accompanies her, from the brutal almost *Raw*-style art of Pia Guerra to the unpredictable heart-tugging writing of Daniel Rivers, both sadly absent thereafter. David Lee Ingersoll's seemingly unconnected vignettes under the collective title of 'Bonecage Graffiti' are initially charming little slices that drop into a finely dialogued story and drop right back out again, but they disappoint on coalescing in 3. His toned art, though, is gorgeously expressive and he should go far. Of the other contributors, David Lasky manages a madcap Neil Young strip each issue, but too many serials begin never to be completed. Donna Barr fans should look for the Stinz story in 3, and Shepherd Hendrix's art is seen throughout, sadly never matched with a story befitting his talent. A negative aspect is the few pages given over to prose, almost all dull stuff to the final word, and you're better off ignoring Fred Burke's wanky editorial to 2. The text pages are overtly political in 3, though, and all the better for it.

The second series was a newsprint magazine distributed free in the Seattle area, to which Ingersoll contributes the wordless 'Zazkwotch', and Jeff Swenson the uneven gag strip 'Kevin's Muse' in four page segments. The text fiction is improved in this incarnation, and there's a new, although slight, Billi 99 story in 4, which also has two of Keith Knight's funny 'K Chronicles' strips. Sean Black is another new talent unearthed by Glyph, and his angry 'The Widower' is 2's highlight.~WJ

GNATRAT

Prelude: *One-shot (The Dark Gnat Returns) 1986*
Dimension Graphics: *One-shot (Happy Birthday Gnatrat) 1986*
Mighty Pumpkin: *One-shot (Darerat) 1987*
Innovation: *One-shot (Gnatrat: The Movie) 1990*

Although the first one-shot is seemingly merely yet another parody of *The Dark Knight Returns*, writer/artist Mark Martin scores on two counts. Firstly that it's not, it merely appropriates the plot in the loosest sense, and the art style, and secondly because it's actually good. A tirade about the endless slew of substandard comics festering in the wake of *Teenage Mutant Ninja Turtles* is combined with Martin's excellent cartooning and unpredictable sense of humour to produce a very funny and impassioned début. *Happy Birthday Gnatrat* parodies a *Batman* anniversary cover and casts the net far wider, lampooning early *Batman*, Bill Sienkiewicz, Truman Capote, old ads in comics, Rose O'Neill's Kewpies and more besides. A series of gags rather than a sustained plot, it points the way towards Martin's later extraordinary *20 Nude Dancers* 20. The third comic is an ill-advised and very thin take on Miller's *Daredevil* and *Elektra* stories, in which the more obvious focus seems more an exercise in selling comics than anything heartfelt. The same applies to the *Batman* movie parody, although the cartooning remains nice. A collection reprints all four issues.~FP
Recommended: *The Dark Gnat Returns, Happy Birthday Gnatrat*

GO GIRL!

Image: *5 issues 2000-2001**

Lindsay's mother was a superhero, Go-Go Girl, now retired, so when her friend Haseena is kidnapped, Lindsay decides to pick up where her mother left off. Having captured the kidnappers, Lindsay's subsequent adventures include visiting an alternate universe, fighting a demon who's been replacing the boys in her school with simulacra, meeting rustlers and aliens on a ranch and capturing an old enemy of her mother's, Chatty Catty. Trina Robbins is clearly aiming this at a young, female audience, but there is still some charm in its retro-superheroics for older readers. Anne Timmons artwork is simplistic, in line with the aims of Robbins' storytelling, but overall the lack of sophistication can make for uninspiring reading.~NF

GO-GO

Charlton: *9 issues 1966-1967*

The 1960s were swinging and so was Charlton, or, as it said on the cover, "Join the In-Crowd. We're so in we're out!" Of course, in reality, this being a Charlton comic, they missed the mark by a mile. The star was Miss Bikini Luv, world famous movie star and part-time secret agent whose catchphrase "Just call me Luv" probably tells you all you need to know. From 5 the bland Jon D'Agsotino was replaced by the much more appealing Denny O'Neil and Jim Aparo to great effect. In fact 'Miss Bikini Luv' was Aparo's first strip. The rest of the comic was padded out with 'Blooperman' (atrocious), 'Return to Peculiar Place' (like *The Munsters*, but not as funny), and 'The Rotting Stumps'. Clearly not an essential purchase, but what other comic would invite you to "Turn on with... Petula Clark"?~DAR

GO-MAN

Caliber: *Graphic Novel ('N') 1989, 4 issues 1989*

Graduating from its strip in *Nerve* magazine, collected as 'N', this buzzy and highly readable strip details the story of the corporate superhero of Hyperia, who dresses like a cool 1960s game-show host and fights an increasingly wild variety of supervillains with non-violent superscience, camera crew in tow. His 'Go-Show' is the top rated entertainment in the city, featuring as it does music videos, chat, recipes/infotainment and live superhero combat. Wacky and unorthodox, the series failed to find an audience and creator Bill Widener had to complete the initial storyline in *Caliber Presents*. See also *Go-Man/Mack The Knife* graphic novel.~WW
Recommended: 1-4

GO NAKED

Last Gasp: *One-shot 1993*

Following the notoriety of the 'punk' mini-comic *Yama Yama Ugly Head*, there was a sudden rush of cartoonists desperate to draw in a childish scrawl, and Go Naked was a collection of these 'explorations'. With a line-up that included Art Spiegelman, Robert Williams and Kaz, this could have been a fascinating anthology, but unfortunately it resembled nothing more than a bunch of scatalogically obsessed school kids let loose with felt pens and paper. Only Matt Groening and Charles Burns emerge with credit, but they are not enough reason on their own to buy the comic.~DAR

---

* Available in a collected edition

THE GOAT

Acclaim: *One-shot 1998*

The four-footed sidekick of Quantum & Woody gets his own title, in which he, well, shambles around aimlessly, drinks out of the toilet, eats everything in sight... in short, acts just like a real animal would if he got super-powers. A perfunctory plot concerning the deadliest boy in the world (a contemporary Typhoid Mary) is appended, but, while convoluted, it isn't actually very interesting.~HS

THE GOBLIN

Warren: *3 issues 1982*

Although the Goblin first appeared in *Eerie* 71, this particular strip continues from the last issues of *The Rook*, and is typical of Warren's final years. The Goblin strip and its co-features Tin Man, Troll Patrol and the Micro Buccaneers were meant to appeal to superhero fans and horror fans, but end up falling between both camps, satisfying neither. There's lots of nice art on hand, though, from the likes of Lee Elias and Rudy Nebres, but particular mention should be made of Alex Niño's strip in the third issue, which is spectacular even by his standards and needs to be seen to be believed.~DAR

Recommended: 3

GOD NOSE

Rip-Off: *1 issue 1969*

This Jack Jackson strip was originally self-published in 1964, giving it some claim to being the first underground comic, though the humour is more beatnik than counterculture. As a historical artefact *God Nose*, literally the adventures of God, is highly significant, though to a contemporary audience it may seem little more than a dated curio with contents typical of the college humour of the period. It features such things as Jesus becoming a folk singer and God advising a young couple on birth control. Certainly Jackson was to go on to far better things.~DAR

GODDESS

DC/Vertigo: *8 issue limited series 1995-1996**

Rosie Nolan suddenly finds herself manifesting extraordinary and uncontrollable powers at a level at which she accidentally severs Scotland from the British mainland. This kind of behaviour attracts the attention of both a mad CIA agent and a misanthropic British bobby and his brutal Neanderthal henchmen. It's just as well Rosie has a more down-to-earth eco-terrorist companion, enabling her to stay a step ahead of her pursuers. Garth Ennis depicts almost the entire cast as levels of caricature, and Phil Winslade draws up a storm, and a missile attack, a plane crash, an ocean-liner crash... Don't expect anything more than a fast-paced romp with some terrific art and you'll enjoy Goddess.~FP

GOD'S HAMMER

Caliber: *3 issues 1990*

Moraldo is given a playing card, but then becomes the target of various factions fighting for it. With the help of Merlyn, he tries to avoid being killed whilst travelling to Merlyn's employer, who holds the key to the mystery. Written and drawn by J. Calafiore, apart from being one long chase, this is a metaphysical (or nonsense, if you prefer), science-fiction fantasy with a European (Moebius) feel.~NF

GODWHEEL

Malibu: *4 issue (0-3) miniseries 1995**

Ancient God Argus is a tad distressed to discover that the artefacts required to replenish his strength have been spirited away. Unable to expend the energy required to retrieve them himself, he summons the good and the bad from Malibu's Ultraverse to locate and return the artefacts. Predictably enough, the remainder of the series is good guys vs bad. The slim plot is stretched beyond belief, and beyond the capacity of some nice artwork to redeem it. Don't be suckered in by Thor's appearance in the cover box or prominence on the cover of the collection. He only turns up in the final five pages of the final issue.~FP

GODZILLA: King of the Monsters

Marvel: *24 issues 1977-1979*

Pitifully dumb but strangely entertaining series which sees the legendary lizard invade the USA and the Marvel universe, as a succession of superfolks (S.H.I.E.L.D., the Champions, Avengers, Spider-Man, Fantastic Four and even Devil Dinosaur!), ordinary people and cheesy giant monsters try to contain, coddle or clobber the misunderstood monster. Doug Moench and Herb Trimpe produce a weirdly illicit thrill, like playing with the action figures after the kids have gone to bed.~WW

GODZILLA, King of the Monsters

Dark Horse: *One-shot 1987, 6 issue miniseries 1988-1989*, one-shot 1992, one-shot ('Godzilla vs Barkley') 1993, 16 issues 1995-1996*, 6 issue miniseries ('King of the Monsters') 1996*, 6 issue miniseries ('Terror of Godzilla') 1998-1999*

The 1987 special was a horror story told from the point of view of a little girl traumatised during the reawakening of Godzilla and his fellow disaster monsters. Inagos, the Locust King, is particularly frightening. Steve Bissette worked excellently on the story and art and the issue also includes some smashing pin-ups by Paul Chadwick, Rick Geary, and Keith Giffen as well as an interesting article by Bissette that lists all the *Godzilla* films.

The first miniseries was a translation, in black and white, of the Japanese adaptation of the film *Gojira 1984*. It's a very ordinary story, with art to match by Kazuhisa Iwata. The 1992 *Godzilla Color Special*, superbly drawn, and co-written by Arthur Adams, is a grand story about a huge stone statue coming to life when the island it stands on is threatened by Godzilla. The less said about *Godzilla Vs Barkley* the better.

The brightly coloured 1995 series is a surprise treat. Brandon McKinney's art is the best the character has ever had in US comics, and Kevin Maguire's witty script, acknowledging that characters sometimes have more than one motive each, has some ironic plot twists and surprisingly black humour. This gets broader when Arthur Adams takes over on issue 5. The subsequent art by Tatsuya Ishida, and Adams (who drew most of the excellent covers), is exciting on the monster action and adequate elsewhere. McKinney later returned to the comic with scripts by Ryder Windham. This team's work is worth reading, though not as sophisticated as the early issues. The last issue features Godzilla in the days of the dinosaurs. What more do you want? Maybe some reprints to coincide with the release of the US *Godzilla* film. 'King of the Monsters' reprints the 1987 Bissette story, a story from *Dark Horse Comics* 10-11, and 1-4 of the ongoing series, while *Terror of Godzilla* is the Gojira 1984 adaptation in colour.~GK

Recommended: Ongoing 1-4

GOJIN

Antarctic: *8 issues 1995-1996*

Unlike most Japanese comics, or perhaps in reaction to them milking every aspect of a scene, *Gojin* cuts right to the chase, dispensing with vast quantities of story as precised captions. This tends to confuse, as does awkward and unclear art. The basis of *Gojin* is an alien invasion of feudal Japan, but any originality is washed away by the torrent of slapstick action. Issue 4 was published numbered 3.~FP

GOLD DIGGER

Antarctic: *4 issue miniseries 1993, series one 50 issues 1993-1999*, series two 42 issues +, 9 Annuals 1999 to date, one-shot ('Perfect Memory') 1996, one-shot ('Minus 18') 1998, one-shot ('Gold Digger-Beta') 1998*

Hit or miss American anime style comic by Fred Perry that recounts the adventures of cute archaeologist, scientist and action-heroine Gina and her Were-Cheetah step sister Britanny as they roam the universe, righting wrongs and having fun. With mixed success it switches from broad humour to pathos, always served up with huge helpings of breakneck action. Although often slipping into over-cutesy

mode, when at its best it is highly enjoyable. 'Gold Digger-Beta' is a full colour action adventure and 'Minus 18' is a black and white anthology of humour and slice of life set when the girls were children, hence minus 18 years, told from the point of view of their superhero parents. 1-35 of series two are also available in collections.~WW
Recommended: Miniseries (1-4), series one 9-16

GOLD KEY SPOTLIGHT

Gold Key: *11 issues 1976-1978*

Funny-animal and comedy strips from the Gold Key stable like Tom, Dick and Harriet and The Wacky Adventures of Cracky occupy most issues. The exceptions are a new Dagar story in 6, more from the Occult Files of Dr Spektor in 8 and Tragg and the Sky Gods in 9, all every bit as dull as in their regular titles.~SW

THE GOLDEN AGE

*DC: 4 issue miniseries 1993**

World War II has ended and many of DC's 1940s superheroes no longer seem to have a purpose in the post-atomic society. Most fall back into civilian life, but Tex Thompson parlays wartime acclaim as the Americommando into a fast-track political career. As America drifts from the golden age of post-war optimism towards McCarthyism a different threat manifests itself, and the retired heroes find themselves back in action as a new decade begins. James Robinson and Paul Smith produce a fond and nostalgic look at some second-string heroes barely given any kind of personality in almost fifty years. The fourth issue's big revelation comes straight from dopey pulp fiction, but the portrayal of the cast throughout the series is so well conceived that what might be a major flaw elsewhere can be forgiven.~WJ
Recommended: 1-4

GOLDEN AGE GREATS

AC/Paragon: *14 issues 1994-1999*

These volumes run to a minimum eighty pages reprinting material from 1939 to 1955 culled from a wide variety of smaller, less well-known publishers of the time. That's not to say that these comics don't have their share of good stories and art, though. Otto Binder and Gardner Fox, for example, produced hundreds of stories for Fawcett Comics and Magazine Enterprises respectively. There were plenty of good artists around, too, whether freelancers or members of one of the 'shops' such as the Jerry Iger/Will Eisner or the Harry 'A' Chesler studios. Bill Black, as editor, has been on a crusade for over twenty years to represent and preserve the best work from the period, and although in black and white, this is an excellent project that will provide something for anyone interested in the history of the medium.

There is some attempt to present the different styles in a complementary manner. Each issue has a theme and comes with historical articles and checklists. 1 features the Green Lama (two stories by Mac Raboy), Catman (Bob Fujitani), Rocketman and Miss Victory. 2 is dedicated solely to Matt Baker's work on Phantom Lady while 3 contains work by the Iger/Eisner studio – The Flame (Lou Fine), Espionage: Black X (Eisner) and The Black Terror and Fighting Yank, both by Jerry Robinson and Mort Meskin. The Fawcett Heroes are featured in 4 – Spy Smasher (Alex Blum), Minuteman (Phil Bard), Mr Scarlet (Jack Binder), Bulletman (Fujitani), plus Ibis the Invincible by Mac Raboy. 5 is a Crimebuster vs. Ironjaw story from Boy Comics 60-62, written by Charles Biro and drawn by William Overgard, Fred Kida and Norman Maurer. 6 and 8 are both fighting-females issues with examples of The Black Cat, Yankee Girl, Miss Masque, Phantom Lady, Blonde Phantom, Mysta of the Moon, Lorna, Jungle Queen, Miss Victory (different stories illustrated by Charles M. Quinlan, Nina Albright and L. B. Cole), Rulah, Senorita Rio (Nick Cardy) and Lady Luck (Klaus Nordling). The 'Best of the West' in 7, features Western strips from Magazine Enterprises, including 'Trail Colt' and 'Dan Brand and Tipi' by Frank Frazetta, Durango Kid, Tim Holt, The Lemonade Kid (Bob Powell), Straight Arrow (Fred Meagher) and the Calico Kid, The (original) Ghost Rider and The Presto Kid, all by Dick Ayers.

9 offers a selection of Fiction House fighting females (Sheena, Mysta by Ruben Moreira, more Senorita Rio, Firehair and Camilla, both by Bob Lubbers, Tyger Girl, Sky Girl and Glory Forbes, all by Baker, Kaanga by Maurice Whitman and Futura by Walter Palais). 10 collects stories that feature heroes fighting their arch-foes. There are several returns (Cat-Man, Crimebuster and Ibis) but also new faces, including Captain Flash with lovely work by Mike Sekowsky, The Avenger (Bob Powell), Frankenstein (Dick Briefer), Don Winslow of the Navy (Carl Pfeufer and John Jordan), Daredevil (Jack Cole) and, uh, Supermouse.

'Roy Rogers and the Silver Screen Cowboys' (11) contains a very comprehensive article (forty-eight pages) about the comic series featuring cinema cowboys along with strips by John Buscema (Roy Rogers), Russ Manning (Dale Evans), Alex Toth (Rex Allen), Doug Wildey (Lash Larue), Steve Ditko (Rocky Lane's Black Jack – his horse) and Al Williamson (John Wayne). 12 is 'Thrilling Science Fiction' with examples of artwork from Baker, George Evans, Reed Crandall, Wally Wood, Jack Kirby, Bernie Krigstein and Ditko. 13 features the stories by Robinson and Meskin, separately and together, 14 has a series of articles covering its theme of 'Jungle Comics', with another strip from Baker and one from Frazetta. Despite the quality of the artwork these later issues do largely suffer from uninteresting writing. All in all, however, a rewarding series that will have to do in the absence of any systematic reprinting of these characters.~NF
Recommended: 3, 8, 10, 11

THE GOLDEN AGE OF MARVEL COMICS

Marvel: *2 volumes 1997, 1999*

Volume 1, introduced by Roy Thomas, features strips from the first twenty years of Marvel's publishing history, when the company was known as Timely. Included are the very first Sub-Mariner strip from 1939 as well as two punch-ups with The Human Torch, Captain America, the supernatural Vision, The Angel, a costumed copy of The Saint, and The Destroyer, a masked freedom fighter in the European War. Following these are strips from the 1950s 'Atlas' period: Sub Mariner, Torch and Cap are joined by Pluvian super-kid Marvel Boy, the goddess Venus, Black Knight's medieval valour drawn by the great Joe Maneely, and The Yellow Claw, whose arch villainy was briefly chronicled by Jack Kirby and writer Al Feldstein in 1957. Volume 2, introduced by Mickey Spillane, features all Timely material, starting with the origin of The Human Torch as well as more appearances from Cap and his sidekick Bucky, Sub-Mariner and The Vision. There are also some more obscure 1940s characters: The Fiery Mask and The Red Raven by Joe Simon, the super-fast Hurricane and the beautifully inked Tuk the Caveboy by Kirby both from *Captain America Comics*, The Whizzer, a speedster whose origin might raise an eyebrow or two!, wartime fighter Citizen V, Black Marvel (the one in the panther skin), not forgetting The Fin, another elegantly drawn undersea character by Bill Everett. A planned third volume never saw print, but some strips ended up in 1998's *Marvel Mystery Comics*. This is fascinating reading for any fan interested in how crude but curiously exciting early superhero comics were. It is, however, less than surprising that so few script credits exist for these stories.~SW

GOLDEN AGE SECRET FILES AND ORIGINS

DC: *One-shot 2001*

Not connected with *The Golden Age*, this refers to the 1940s era of superheroes. Unlike most Secret Files issues, the content is almost all stories, the longest chronicling the past of DC's earliest superhero, the Crimson Avenger. It also features a glimpse at the social divisions among 1940s JSA members, a rare look at Zatara the magician, and a monologue from young scientific genius Sivana. It's all competent, if not enthralling, and should appeal to fans of DC's earliest superheroes.~WJ

John Bergin's GOLGOTHIKA

Caliber: *4 issues 1996-1997*

One has to admire John Bergin's imagination. He's created an entire world and populated it with extraordinary creatures and concepts, very few of them poor. Unfortunately, though, beyond that he hits a brick wall, having little idea how to marshall his bleak ideas into a plot and lacking the artistic skill that may have gone some way to compensating.~FP

GON

Paradox Press: *4 issue miniseries 1996*, one-shot (Gon Swimmin') 1997,one-shot ('Color Spectacular') 1998, one-shot (Gon Underground) 1998, one-shot (Gon on Safari) 1999*

Outstanding work from Masashi Tanaka, who draws stunning landscapes and depictions of nature. Throw in an anomaly in the form of a voracious mini-dinosaur, Gon, and you have a masterpiece. There's no natural predator that Gon won't attack to assuage his all-consuming appetite. Lions, bears, sharks and eagles all fall prey in these very funny strips. Each issue is a variation on the same theme, three to an issue, but the stunning detail of the artwork more than compensates, and each is given a separate title: *Here Today, Gon Tomorrow, Gon Again, Going, Going, Gon.* The colour one-shot collects strips originally published in colour sections of Japanese comic *Morning* and is the only comic size publication, the remainder being digest sized paperbacks. Because a collection comprising roughly the first four Paradox issues was published prior to them in the UK by Mandarin, the Paradox issues have never been imported to the UK despite Mandarin long ago giving up the ghost. As all strips are silent, however, they're easily understood from the European imported editions available in *Forbidden Planet* shops. Five Casterman volumes cover all but the colour issue.~WJ

Recommended: 1-4, 'Color Spectacular', *Gon On Safari, Gon Underground*

GOOD GIRLS

Fantagraphics: *5 issues 1987-1990*
Rip-Off: *1 issue 1991*

Carol Lay's solo showcase, this features two series, each drawn in a more realistic style than her later work. 'Ms. Lonelyhearts' describes the adventures of a columnist for a trash paper, as she gets involved with sundry weirdos and psychos. The ongoing saga of lost heiress Irene Van Der Kamp tells of her struggle to find love and acceptance in the modern world, even though her African tribal foster-parents ritually disfigured her to conform to their standards of beauty. Flip, insouciant, good fun. An anomaly is 4's 'The Visitation', in which, mid-story, Lay draws herself as giving up, uninspired. Cue a visit from her muse, who proceeds to gleefully trash her apartment. This is the first evidence of the looser, more manic style that would show up in her later strips.~HS

THE GOOD GUYS

Defiant: *9 issues 1993-1994*

The "unique selling point" of this woeful series is that the lead characters are all based on real Defiant readers. Quite why creative genius Jim Shooter thought this would make the comic more interesting is hard to fathom, as the adventures of The Good Guys are no more "realistic" than those of any other superhero team. Full of self-conscious references to popular comics – Rob Liefeld even makes a "special guest appearance" in issue one – The Good Guys gain their powers after they're exposed to a magical "wish box" which turns them into the hero of their dreams. Much of the action seems to take place in comic shops frequented by Shooter and his cronies. Bet they didn't sell many of this turkey...~AL

GOODY GOOD COMICS

Fantagraphics: *One-shot 2000*

Hi-jinks from Gilbert Hernandez as editor and major contributor (20 out of 28 pages) to this looks-good-and makes-no-sense anthology. He expands his cast of characters, but not his range, with the giant–economy sized Roy and friends in 'Extend the hand of Love to all who Can Use It'. It's a blend of fantasy, autobiography and allusion that is all but indistinguishable from most of his other short works, which of course means it's sad, funny, rude outlandish and stylish in equal measure, and shouldn't be missed if you like your comics with a bit of edge to them. His brother Jaime gets the back cover to play with and cartoonist cohorts Rick Altergott and Johnny Ryan pad out the package. 'Human Diastrophism' it is not.~WW

The GOON

Avatar: *3 issue miniseries 1999**
Albatross Exploding: *One-shot ('Color Special') 2002, 3 issues + 2002 to date*

Delicious pastiche of EC Comics, the works of Jack Kirby and Wally Wood and everything horrific and/or gangsterish. Eric Powell relates the hard-boiled adventures of The Goon, Enforcer, Leg-breaker and Muscle-for-Hire, who with his faithful sleaze-ball sidekick Franky, is just trying to make a few bucks and kill the scum-sucking Voodoo Zombie Priest who's trying to take over the rackets with his undead legions and other spooky tricks. There's undead giant apes, walking dead torpedoes, two-headed thugs, evil ghosts and big, dumb Palookas all vying for the honour of most gratuitous final, final moment from the best thug in comics. A veritable hoot for the black-humoured insensitives among us.~WW

Recommended: Miniseries 1-3, Special, 1-2

Batman: GORDON OF GOTHAM

DC: *4 issue miniseries 1998*

This is the untold story of how James Gordon came to leave Chicago for Gotham. It involves corrupt policemen, a politician who'd literally murder his own mother to get elected and an assassin whose help Gordon needs but for which he can't be grateful. Denny O'Neil rehashes the elements of Gordon's character with which we're already familiar, so this adds only a few narrative details to the established history. Dick Giordano and Klaus Janson's grainy artwork completes the sense that while there's nothing terribly wrong with this series, neither does it reach any particular heights.~NF

GORDON YAMAMOTO and the King of the Geeks

Humble Comics: *3 issue miniseries 1997-1998*

Gordon Yamamoto is a high school bully, but when he crowns newcomer Miles Tanner "King of the Geeks" he's unaware that their destinies are due to become inextricably entwined. Gene Yang's story has a point to make about forgiveness, a topic he muses over in the editorial pages, but it's largely an unpredictable romp involving blocked nasal passages, manifestations of hate, and a lot of laughs. Yang's cartooning improves immensely between 1 and 2, starting well but evolving into a less cluttered and more fluid style. This is good stuff, and it's a shame Yang produces very little comics work.~WJ

Batman GORDON'S LAW

DC: *4 issue miniseries 1996-1997*

A first solo fling for long-standing Batman ally Gotham Police Commissioner Gordon. A robbery goes wrong, but the perpetrators still escape, and after six months there are still few clues as to their identity. Gordon discovers, however, that the likely culprits are Gotham police officers, and has to root them out without tipping them off. Klaus Janson's art is moody and complementary to the tale, and it's a surprisingly impressive story from Chuck Dixon, better known for action adventure than characterisation.~FP

* Available in a collected edition

GORE SHRIEK

FantaCo: *6 issues 1986-1988, one-shot ('Delectus') 1989, series two 2 issues, 1 Annual 1990*

The first series contains some gruesome, but effective horror tales from Bruce Spaulding Fuller (1, 3), Steve Bissette (1-4), Rolf Stark (2-3) and Greg Capullo (1-4, on his own and with writers, Bill Townsend and Tom Skulan). With 5, and the addition of articles, including one on horror in the Undergrounds, some of the initial impact has been lost. Series two, which heavily features the work of Gurchain Singh, places too much reliance on humour and EC-style shock endings, though it does also offer the strangeness of Eric Stanway's adaptations of stories by Charles Dickens (1) and Robert Louis-Stevenson (2). An ashcan-sized 6_ was released, but not to the wholesale market, while 'Delectus' is a collection of the best strips from the first series, primarily from 1-4.~NF

GORGANNA'S GHOUL GALLERY

AC: *2 issues 1994*

Dismal cobbling together of sub-standard horror shorts with some 1950s reprints. The work has no redeeming features. You've read the plots a hundred times before and a hundred times better, and even the reprint material seems to be the worst they could possibly find. Gorganna herself is a character from the infinitely superior *Fem Force*. Avoid at all costs.~WW

GORGO

Charlton: *23 issues 1961-1965*

Gorgo was a *Godzilla*-style British movie and the first issue of the comic is an adaptation of the film; thereafter, they made it up as they went along. Gorgo is a huge reptile who's captured and exhibited at Battersea Park, but all too soon his mum comes to rescue him and tramples much of London in the process. Since they are both totally indestructible, further tramplings were inevitable, though the action moves from London after 1. However, in 10 the two save Earth from a Venusian invasion, and in 22 Gorgo chomps on Communist China, so they're not totally lacking in community spirit. It's standard giant-monster nonsense. Steve Ditko drew 1 and 2 and gave the monsters presence, but thereafter the art was generally uncredited and certainly unremarkable, from the likes of Ernie Bache, Vince Colletta and Bill Montes. There was a back-up "strange fantasy" story in most issues, presumably to make the Gorgo story look good.~FC

Batman: GOTHAM ADVENTURES

DC: *60 issues 1998-2003*

Based on the Warner Brothers' cartoon show, this essentially just continues Batman and Robin Adventures, with Batman supported by Batgirl, Nightwing and Robin. Most stories involve one or more of the well known cast of villains, including on their own, The Joker (1, 31, 60), Two-Face (2, 12, 44), Clayface (30, 39), Mr Freeze (5), Poison Ivy (20, 53), The Riddler (11, 28) and the Scarecrow (3, 32) and in pairs, Harley Quinn and the Joker (10, 14), Harley Quinn and Poison Ivy (29), Mr Freeze and Talia (40), and Mr Freeze and Clayface (51). There are few guest stars, but Flash (25), Superman (36) and the Creeper (58) make appearances and the origin of Deadman is retold in 6. In an excellent tale from Ed Brubaker, the Phantom Stranger shows Batman what life in Gotham would be like, if his parents hadn't been killed (33). A new villain, Kim, is introduced in 49, an intelligent young man, who believes that crime can be artistic and tries to use the robberies of Killer Croc to paint a picture across the map of Gotham. Kim returns for related stories pitting his wits against the Riddler in 56-57. Finally, mention must be made of three terrific issues featuring Catwoman (4, 24, 50), in which her relationship to Batman is both tested and confirmed. Like most of the comics based on the animated *Batman* shows, these are thoughtful, well crafted tales, exploring the nature of crime and Batman's reactions to it. Ty Templeton writes 1-12, 14 and 61, and Scott Peterson most other issues. Artwork is initially by Rick Burchett (1-13, 55), then by Tim Levins, who pencils all but a few issues from 15. Both provide clean and clear artwork, compatible with the source material, without really stamping any of their own personality on it, though this is achieved by Joe Staton (29) and Brad Rader (33, 51).~NF

Recommended: 4, 24, 33, 50

GOTHAM CENTRAL

DC: *3 issues + 2003 to date*

Ed Brubaker and Greg Rucka create a nastier and more human corner of the Batman universe as the ordinary cops of Gotham City try to do their jobs in a harsh urban environment that is also the arena of choice for many of the world's most powerful psychopathic thrill-killers. The careful blending of police procedural drama and classic Noir thriller with the careful non-use of the Caped Crusader makes for a compellingly novel read in a woefully over-familiar environment. Michael Lark's smoothly subdued art adds to the subtle tension. Definitely one to watch.~WW

Recommended: 1-3

GOTHAM GIRLS

DC: *5 issue miniseries 2002-2003*

Set squarely in the animated Batman Gotham, this teams Batgirl and Detective Montoya against Poison Ivy and Harley Quinn with Catwoman as a wild card. It's little more than one long well-choreographed and decently drawn chase sequence, with a few insights into the backgrounds of the various characters. The best aspects are the striking pin-up covers of the cast by Shane Glines (1-4) and Rian Hughes (5).~FP

GOTHAM KNIGHTS

DC: *34 issues + 2000 to date*

Each issue of this oddity is a sandwich of superb bread with iffy filling: Always exceptional covers by the unmistakable and brilliant Brian Bolland (from 2) top full-length colour stories in the front, and short black and white ones in the back. The lead stories, usually written by Devin Grayson, are pretty standard post *Dark Knight* fare, focussing on the close relationships among Batman and his many helpers, including Nightwing, Robin, Alfred, Batgirls old and new, Commissioner Gordon, Superman, and the local GP. Successive regulars Dale Eaglesham and Roger Robinson produce the majority of the art for the lead strips, and it's little more than functional and not well coloured. Despite this, Bat-freaks will dig the main man's impassiveness in the face of others' emotions, junior psychology students will thrill to the dissection of quasi-family life, but surely everyone else thinks that there are too many *Batman* comics already.

Not true! After an unpromising start in 1 with the most outrageous Frank Miller rip-off, by Jim Lee, the quirky black and white back-ups have been some of the best things in mainstream comics. Almost all of them are interesting, often by big stars such as John Byrne in 2, John Buscema in 7, and Dave Gibbons in 12, or unusual creative teams, including writers from other mediums such as Alan Brennert in 10, and Harlan Ellison in 13. Several are worthy of special mention: Paul Pope's 'Broken Nose' in 3 has a Batman seemingly out of the 1940s movie serial out for petty sadistic vengeance, and prompted complaints. Then there's Howard Chaykin and Jordi Bernet in 9 and Bob Kanigher and Kyle Baker's beautiful and barking mad 'Snow-Job' with Batman Junior, in 11. Best of all is a surpassingly funny and sexy story, perfect really, of Harley Quinn and Poison Ivy in Arkham Asylum by Paul Dini and Ronnie Del Carmen, in 14. A frightening hallucinatory effort by Alan Grant and Enrique Breccia is in 16, 'Fat City' by Mick McMahon in 18, Dan DeCarlo inked by Terry Austin in 21, and 'The Delusions of Alfred Pennyworth' by Danielle Dwyer and Scott Morse in 34. Many of these stories have been collected in a hardback book. It's a treasure trove.~GK

Batman: GOTHAM NIGHTS

DC: *4 issue miniseries 1992, 4 issue miniseries 1995*

The first series is about a number of troubled couples whose problems cause them to converge on a particular area of Gotham when a lonely woman decides to attract the Batman's attention by shooting at people from a high tower. It's a nicely told tale by John Ostrander which heads towards sentimentality at the end but which perfectly encapsulates the Batman's feelings for his city. The artwork by Mary Mitchell is quietly effective and Eduardo Barreto provides some evocative covers. After this, the second series is disappointing. It sees Ostrander and Mitchell back with a story revolving around the people who inhabit or work on Little Paris, a floating theme park in Gotham Bay, but it takes rather predictable paths and Dick Giordano's inks overpower the pencils, removing many of the subtleties of Mitchell's landscapes.~NF

GOTHIC NIGHTS

Rebel Studios: *2 issue microseries 1995*

"A strange and terrifying romance" proclaims the intro page, referring to 'romance' in the classical sense, and so it is. While occasionally straying into the realms of the desperate to impress, thesaurus-assisted writer, David Barbour produces a Hammer Horror script with extra nudity and graphic violence. The alluring countess, pitiful villagers, werewolves, and Baron Frankenstein are all illustrated in fine Wrightsonesque style by Tim Vigil. If this mixture entices, don't be put off by Vigil's first issue cover painting of an unfortunately deformed woman.~FP

THE GRACKLE

Acclaim: *4 issue miniseries 1997*

The big surprise about this is how much Paul Gulacy's art had developed. Although he's still enamoured of zipatone special effects, most of the stiffness and fiddling around with fancy page layouts has disappeared, leaving a gorgeous, realistic but relaxed fine-line style behind. Pity the story's not up to much. Mike Baron has extracted a number of hoary plot devices from various hard-boiled concepts to give us Cross, an ex-policeman who, on the skids, was rescued by the mysterious Colonel. In return the Colonel uses Cross, and a number of other agents world-wide, for his own ends. In the first story-line we find Cross guarding a Chinese Triad boss from usurping Vietnamese gang members who're trying to muscle in on the trade in Firefly, a designer drug that turns users who OD into human torches. The plot is very complicated, but Baron doesn't seem to realise that complicated doesn't equal complex, or indeed good. Reading *The Grackle* you can't help but feel he's crammed a load of favourite things into one comic, rather uneasily. Would have gone down a storm in 1984, but now seems rather dated wish fulfilment stuff.~FJ

GRAFFITI KITCHEN

Tundra: *One-shot 1993*

Eddie Campbell: *One-shot 1998*

One of Eddie Campbell's semi-autobiographical Alec MacGarry stories, this is a tale of a compulsive relationship with a young girl, and the consequences on our hero and his circle of friends. By turns it's crass, lyrical, loutish, sparkling, sordid and poetical to heartrending effect. In some places, it's quite a horrible story, but still coughs laughter out of the reader at unexpected moments. At the conclusion, you're left depressed, spent and empty, but oddly, in a good way. Probably the best thing Campbell's done to date. A second printing was issued by the author's own imprint in 1998, and it's now collected as part of *Alec Three Piece Suit*.~HS

GRAFIK MUSIK

Caliber: *4 issues 1990-1991*

Michael Allred comes into his own with this showcase title. It continues 'It Was' from *Graphique Musique* and runs 'Citizen Nocturne' into 'Goulash'. The latter, bringing in the Frank Einstein character from *Creatures of the Id*, is the strip that will soon become Madman, once Allred realised that a costume and codename was more commercial. Both strips provide a taste of Allred at his enthusiastic, least constrained best.~JC

GRAPHIC STORY MONTHLY

Fantagraphics: *7 issues 1990-1991*

Once again Fantagraphics rolled up their sleeves and prepared to give the American public a mostly humorous, intelligent, cultivated anthology of cartoons and illustrated stories. Once again the title folded just as it was getting interesting.

The first issues contained *Prime Cuts* leftovers, including Douglas Michael's 'Adventure Ohio' series and Rick Geary's illustrated version of *Flaubert's Dictionary of Received Ideas*, which is almost finished! 1-5 contain Jacques Tardi's adaptation of the Nestor Burma mystery, 'Fog Over Tolbiac Bridge', from the book by Leo Malet. It's faithful to the original, with its 1950s setting and atmospheric detail, as, typically, Burma receives a mysterious note from an old friend who abruptly dies, which draws him into the shady world of anarchist activists. The other translated material is Franquin's 'Gomer Goof', one page of which appears in all issues.

The other regular strips include yet another Jaxon horror tale set among missionaries and Indians in Mexico (4-6, dull as usual) and Craig Maynard's stories of childhood, which communicate mostly by what they don't say or show (1, 4, 5). There are also regular chunks of Disney producer Ward Kimball's car humour in 'Asinine Alley', a collection of observations and single-panel cartoons.

The Tardi is well worth having, but is available in a collected edition, and there's precious little else of a must-have nature in *Graphic Story Monthly*. Plenty of things raise the odd smile, such as Jim Siergey's 'America', written by Tom Roberts, in which artist Siergey takes a Bill Brysonesque role to praise burger culture and motel comforts in humorously overwrought language in 5, or Roger Langridge's 'Professor Cucumber and his Stereotyped Assistants' in 6. There's little consistency, though. 7 was a cartoonists-on-cartoonists special, ignoring regular strips, and was blessed with a great cover and series of pages by Joe Matt. There's also a sharp parody in the form of Dennis Pimple and T. Motley's 'I was a Self-Confessional Cartoonist', and Brian Sendelbach's absurdist 'Billy Mathers' strips which, rather in the manner of *Ernie Pook's Comeek*, ramble childishly on about dead dogs and haircuts.~FJ

Recommended: 7

GRAPHIQUE MUSIQUE

Slave Labor: *3 issues 1990*

This Michael Allred showcase contains two strips, 'It Was...' and 'Citizen Nocturne'. The former is a surreal adventure through the daydreams and subconscious of Calvin Lennox, a child who sees himself as an adult. The latter is a bizarre vampire love story. Allred's style is still in need of a little polish here as he finds his feet with the medium and plays around with the luxury of time to develop the stories, but his promise is already apparent and both strips are valuable to the later continuity of the characters depicted.~JC

GRATEFUL DEAD COMIX

Kitchen Sink: *Series one 7 issues 1991-1993, series two 2 issues 1993-1994*

Grateful Dead songs visually interpreted in underground style by a variety of artists (most notably Tim Truman) with little but song lyrics as text. Occasionally, experiences at live concerts are transcribed. Deadheads will lap this up. For the uninitiated, there is little point.~APS

GRAVEDIGGERS

Acclaim: *4 issue miniseries 1996-1997*

Complex whodunnit from Acclaim's crime-fiction line by Mark Moretti and Rodney Ramos. The title refers to a government department that handles long-unsolved cases. Well constructed with vivid backgrounds but it would be better served without the petty, snide asides at the comics industry giants.~APS

GRAVESTONE

Malibu:*7 issues 1993-1994*

A gravestone marks the location of something deceased and mouldering, so that would be about right, then.~WJ

GRAVESTOWN

Ariel: *1 issue 1998*

There's very nice artwork in places from Roger Gibson, but the twist on the woman at large in the haunted house scenario isn't as intriguing as it's intended to be. Further minus points accrue from having our otherwise independent heroine wandering around in her underwear and an open coat for the entire issue.~FP

GREASEMONKEY

Kitchen Sink: *2 issues 1995*
Image: *2 issues 1998*

Although the title is commonly applied to mechanics, in this case the Greasemonkey is actually a gorilla, living in the 21st century on an almost destroyed Earth. Following the devastation, with sixty per cent of humanity destroyed, some kindly aliens bestowed intelligence on various species. 'Mac' Gimbensky, the gorilla in question, is a star mechanic looking after his all-female squadron, the Barbarians, along with his young human assistant. Written, illustrated and excellently coloured by Tim Eldred, he produces entertaining human-interest stories in a clean, crisp style. It's a lot of fun, especially the sequences featuring the dreaded dentist. Mac, of course has nothing to fear as modern dentistry techniques often offer painless solutions. A shame this series never continued as there were lots of opportunities for some interesting space yarns. The Image issues are merely black and white reprints. Get the Kitchen Sink ones.~HY

Recommended: Kitchen Sink 1-2

GREEN ARROW

DC: *4 issue miniseries 1983, 4 issue miniseries ('The Wonder Year') 1993, series one 139 issues (0-137, 1,000,000), 7 Annuals 1988-1995, series two 18 issues +, 2001 to date*

Created by Mort Weisinger in 1941, DC's ace archer and his bag of trick arrows survived the cancellation of superheroes in the late 1940s, and was still around as a back-up feature in titles edited by Weisinger for their revival a decade later. Oliver Queen was a wealthy adventurer who fought crime with his trusty sidekick, Speedy. Always a second-stringer until the 1970s, in *The Brave and the Bold* 85 he was redesigned before sharing equal billing in Green Lantern 76-89, where he became a socially aware crusader without fortune. His first solo title finally appeared in 1983. Written by Mike W. Barr, an old flame of Oliver Queen's leaves him her company to run, much to the displeasure of the other relatives. Predictably enough he's soon a murder target. It's not the sort of story expected for an action-oriented character like Green Arrow, but the art by Trevor Von Eeden and Dick Giordano works well.

The ongoing series began where *The Longbow Hunters* left off, written by Mike Grell and illustrated by Ed Hannigan and Dick Giordano. All are on top form, as the relationship between Green Arrow and his lover/partner Black Canary is fully explored. They're now based in Seattle, and their adventures have a greater human-interest angle, concentrating more on down-to-earth criminal activities. The series carries a 'mature readers' advisory, as sex and violence play a major role, and while the violence is never glorified there's sometimes the feeling that Grell is setting out to shock. The problems of gay-bashing and local gang warfare are highlighted in 5-6, while 17-18 feature the sadistic 'Horseman', who butchers a stripper. Fans of Grell's Jon Sable title may want to check 15 and 16.

The mysterious Japanese warrior woman, Shado, from the *Longbow* series returns in 9-12 on the run from her previous employers, Japanese gangsters the Yakuza. This story introduces Eddie Fyers, a free agent who works for various organisations, and who is a catalyst for many plots to come. Shado nearly kills Green Arrow in the course of the story, but while he's recuperating something happens that's later beyond his recall. It's strongly suggested in her next appearance, that her child is also his. In 21-24 it's kidnapped by the Yakuza, who blackmail her to assassinate a famous politician. By this time Dan Jurgens is pencilling Grell's stories, reuniting a team that worked on *Warlord*, who duly makes an appearance in 27-28, with everyone confusing the two bearded characters. The succeeding story explores environmental pollution.

Green Arrow does some soul-searching in 33, after being tortured in the previous issue and rescued by Black Canary. He recalls killing Black Canary's torturer in *The Longbow Hunters*, although he could've stopped him without killing him, but decided not to. This was a major departure from the old Green Arrow, who was practically comatose when he killed a crook in the early 1970s. The 'Black Arrow' saga begins in 35, with Green Arrow having to hunt down Eddie Fyers, or be labelled a traitor. Black Canary enlists the aid of Shado, and the revelations of the conclusion force Oliver to reconsider his allegiances. Starting with 39 Green Arrow travels, stumbling across IRA gun smuggling, an adventure in Wales, and in 46-48 he tackles the problems of animal poaching in Africa. The series is now illustrated by Denys Cowan, who supplies a harsher mood reflecting Green Arrow's turbulence. Fulfilling his spiritual quest, he's back home with Black Canary in 50 and shows he can be quite nimble in bed for a man of forty-seven years. Hope for us all then.

59-60 deal with a killer released from prison wanting revenge, and 63-66 again feature Shado, whom Green Arrow is hired to find to repay a debt. Of course nothing is as clear-cut as it seems. Rick Hoberg has pencilled from 53, and Grell leaves with 80, but his swansong is splitting up the Green Arrow/Black Canary relationship, a DC fixture for over twenty years. Chuck Dixon writes from 83, with art by Jim Aparo, whose work looks wonderful under the inks of Gerry Fernandez. Their multi-part saga ends with the *Zero Hour* crossover in 90. Green Arrow's on the move again as he reaches a 'crossroads' in his life, but the series is now set firmly within the DC Universe, with guest appearances from Catwoman in 86 and the JLA in 88. Set between 90 and 91, Issue 0 between has Oliver Queen in a monastery re-evaluating his life as he gives up killing and playing Green Arrow, but he's befriended by a young monk, Connor Hawke, who, strangely, is old enough to be his son. Connor accompanies Queen when he leaves the monastery and the youngster dons the Green Arrow outfit, being a top archer and fan of Green Arrow. Artistically the feature is by now in the capable hands of rising star Rodolfo DaMaggio until 113. It's not before long that Eddie Fyers turns up to involve the archers in another espionage caper, and 96-100 involve Hal Jordan, once Green Lantern, and Arsenal, who used to be Speedy, Green Arrow's sidekick. Queen becomes involved with eco-terrorists, leading to a plane exploding with him on board.

The series carries on with young Green Arrow searching for his estranged mother. There's a blast from the past in 110-111 crossing over with *Green Lantern* 76-77, where the two youngsters, who are searching for Green Lantern's father (there are lots of displaced parents in the DC Universe), head for a town called Desolation. Their predecessors visited here during their early 1970s travels. The young Green Arrow certainly appears to be a chip off the old block, and with Eddie Fyers along as a good supporting character there's lots of scope for action-oriented adventures which Dixon never fails to deliver. Dougie Braithwaite keeps up the high standard of art from 118 when Connor and Eddie go in search of the adult Green Arrow, but encounter some dinosaurs instead. It's not all action all the way as Dixon adds various supporting characters such as Connor's old mentor, Master Jansen, and his mother's arms-dealing husband, and to top it all, he becomes the owner of a building. There's an impressive crossover with *Green Lantern* 92, in 125-126 where Dixon explores racial conflict, and in 132-133 Eddie Fyers returns with super-powers in an amusing tale guest starring the JLA. It's above average action again in 134-135 with the 'Brotherhood of the Fist' crossover with *Detective Comics* 723, *Robin* 55 and Nightwing 23. 136 is yet another crossover with Green Lantern, 104 this time, featuring Hal 'Green Lantern' Jordan hunting down Oliver Queen's "killers". Connor re-evaluates his life in 137 and the series actually ends with issue 1,000,000 featuring Oliver Queen's descendants... and they're not all from Connor either, so does this mean Oliver Queen is alive ready to produce new offspring? Actually, at the last count, it's been hinted that he's sired three children, none of which he knew anything about!

Mike Grell also wrote *Green Arrow: The Wonder Year*, fleshing out Green Arrow's origin as he's marooned on a desert island. Once back in civilisation he begins his crimefighting career and meets an old girlfriend, who's not all she appears. Despite trotting out Green Arrow's origin again, it's a decently produced series, nicely drawn by Gray Morrow. The origin is retold again in annual 7, bearing little resemblance to the Grell version. Of the other annuals 1-3 all guest-star the Question, and are written by Denny O'Neil, so make for good reading, with 2 the best of them, mainly due to the back-up story featuring Dinah (Black Canary) Lance and her mother, the original 1940s Black Canary.

More good reading is found in the second ongoing series written by film-maker Kevin Smith, with the art team of Phil Hester and Andé Parks. Smith knows his DC Universe and populates the continuing 'Quiver' story in 1-10* with strange concepts and guest stars. Oliver Queen is alive and well ready to produce more offspring, but how? And why is he ten years out of date? Well, the mystery is a complex one, but under Smith it all makes sense, and it takes someone with great skill to incorporate DC's old humour characters, Stanley and His Monster into the storyline! As well as bringing back the original Green Arrow, Smith handles his relationship with his two 'kids' Roy (Arsenal) Harper and Connor Hawke with great care and also shows respect to his ex-lover Black Canary. Throw in Jason (The Demon) Blood, Batman, Aquaman, Hal (The Spectre) Jordan, Barry (Flash) Allen, and others, and you have a wonderful cocktail of action and intrigue. Smith ends his run exploring the Green Arrow/Black Canary relationship against as backdrop of a nasty killer who endangers Connor's life. So how do you top Kevin Smith? Editor Bob Schreck pulls it off by hiring best-selling author Brad Meltzer. 16 starts 'The Archer's Quest', investigating who was at Oliver Queen's funeral and why, in the company of Arsenal and an old JSA villain, and thus far it's very entertaining. Credit must also go to Hester and Parks for keeping up the high standard of artwork. Definitely a title to keep an eye on.~HY

Recommended: Series one, 5-6, 9-12, 17-19, 21-24, 59-60, 100-101, 132-135, series two, 1-10, 12-18

GREEN CANDLES

Paradox: *3 issue miniseries 1995**

Written by novelist Tom DeHaven, *Green Candles* revolves around the idea of recovered memory. Under the care of her psychotherapist, Grace Penny has been remembering ritual satanic abuse and is now receiving a series of photos each showing a candle that's getting closer to burning out. Convinced that she's become a target of her abuser, she hires a private detective. He's not good enough to save her, but can he track down her killer? It's a reasonable, if predictable tale, ably if unimpressively drawn by Robin Smith.~NF

GREEN GOBLIN

Marvel: *13 issues 1995-1996*

Thirty-one years and three deaths (allegedly) since his first appearance, long-time Spider-Man villain the Goblin finally gets his own title. Teenager Philip Urich, nephew of the veteran *Daily Bugle* reporter, stumbles across one of the Green Goblin's infinite secret hideaways whilst investigating a Norman Osborn warehouse. Startled by a rat, he trips into a vat of Goblin creation chemicals, with predictable consequences. The tone is set for the rest of the series as Tom DeFalco attempts to mimic the teenage angst of Peter Parker's early days with sledgehammer subtlety, assisted by Scott McDaniel's Lego-brick artwork. Kudos goes to Philip's attitude (he just wants some kicks from the costume and glider, never mind the hero shtick) and the realistic conclusion. But hey, like, DeFalco's rad dialogue imparted to the gnarley dude is, like, so incredibly mega-cool, man, it really psyches you out and, like, leaves you totally kicking. Pass the barf bag.~APS

The GREEN HORNET

Gold Key: *3 issues 1967*

Expository dialogue and wafer-thin plots characterise this pedestrian attempt at transferring the Green Hornet from the small screen to comics. Look out for the third issue's cameo appearance of TV football commentator Jimmy 'the chin' Hill.~FP

The GREEN HORNET

Now: *Series one 14 issues 1989-1991, series two 39 issues, 3 Annuals 1991-1994*

Series one establishes a family legacy of Green Hornets and Katos in accounting for the original pulp incarnation of the 1930s and the TV version of the 1960s. Both take their share in the spotlight as Ron Fortier and Jeff Butler run through the family history in 1-7 and set up an inexperienced Green Hornet and female Kato for the 1990s. Series two sees Mishi Kato replaced by her brother in a more traditional pairing for comics distributed beyond comic shops, and has Chuck Dixon's more action-based scripts until 12, when Fortier returns. Later issues are written by Joan Weis, and changing artists are a feature of the title. Remaining light adventure throughout, there's not a bad issue in either series, nor is there an excellent one. For a sample of the first series issue 1 is as good as any, and 33-34 of series two feature a recurring villain and spotlight Green Hornet's romantic life.~WJ

Tales of the GREEN HORNET

Now: *2 issue microseries 1990, 4 issue miniseries 1992, 3 issue miniseries 1992, one-shot 1992*

Wanting to flog their *Green Hornet* licence for all it was worth, Now had created rather a sticky wicket for themselves by updating the concept to the 1990s in the regular title. Never mind, how about some miniseries of the 'classic' 1940s and 1960s versions? 1960s TV Green Hornet Van Williams plotted the first series, but it's nothing special, and inappropriate, foggy art from Del Barras rather scuppers the project. The following two series are dull. Avoid.~FP

GREEN LANTERN

DC: Series one: 224 issues, 3 Annuals 1960-1972 (1-89), 1976-1988 (90-224), series two 155 issues +, 9 Annuals, 3 80-page Giants, 2 Secret Files 1990 to date, one-shot ('Annual No 1, 1963') 1998

"In brightest day, in darkest night no evil shall escape my sight. Let those who worship evil's might beware my power: Green Lantern's light." With that oath Hal Jordan recharges his power ring, a device that enables him to do anything provided his willpower is up to the task. This was the concept as introduced in *Showcase* 22, when a red-skinned alien crashed on Earth, summoning test pilot Jordan, whom he's selected to succeed him in his role as an intergalactic protector. Given the power ring, Jordan must recharge it once every twenty-four hours from a power battery, which resembles a green lantern, the name Jordan adopts as his crimefighting guise.

The concept actually updated a 1940s character, although beyond the idea of the ring Jordan bore little similarity to his predecessor, whose background was more mystical. Editor Julius Schwartz, writer John Broome and illustrator Gil Kane were the initial creators. Broome's plots were science-fiction-based, but he was also adept at characterisation, and Kane was noted for his action-packed style: his layouts were very distinctive and dramatic, although he was often subdued by inker Joe Giella. The first issue reveals that Jordan isn't the only Green Lantern, but a member of a corps under the Guardians of the Universe, little blue men sworn to protect the universe and operating 3600 Green Lanterns. Jordan's personal life was a constant counterpoint to the superhero action. He was employed by Ferris Aircraft and had romantic intentions towards Carol Ferris, her father's choice of company M.D. She attempted to distance herself from Jordan while lusting after Green Lantern, which made Jordan determined to make her love him for himself. The other supporting character was a young Eskimo grease-monkey called Pieface, although his real name was Thomas Kalmaku. Despite the patronising nickname, he was actually a decently portrayed non-white character. Notable villains included the belligerent Weaponeers of Qward introduced in 2, the giant intellect of Hector Hammond, Sonar master of magnetism, and, in 7, the renegade Green Lantern Sinestro. The red-skinned Sinestro had been expelled from the Green Lantern Corps, but obtained a yellow power ring. The significance of this was yellow being the one weakness of the Green Lanterns, due to an impurity in the power source. His threat would be the most frequent over the years. Second on that list was actually Carol Ferris, who in 16 was transformed into Star Sapphire by a race of warrior women. It wasn't permanent, but did recur, mostly without her knowledge, thus presenting an extra dilemma when she fought Green Lantern. Their relationship was developed in a back-up strip concentrating on Hal Jordan's civilian life, from 22 the exclusive territory for Broome, who was replaced as writer on the lead feature by Gardner Fox.

13 featured the first teaming of the revived Flash and Green Lantern, a partnership successfully repeated many times over the next twenty years. By now Kane's art was looking even better due to the occasional inking of Murphy Anderson, to be followed by Sid Greene, whose delicate feathering style was very suited to dynamic superheroics. 1-29 have so far been gathered in four volumes of *Green Lantern Archives*. Broome was back as the writer for 40. It gave the Guardians of the Universe an origin and featured the 1940s Green Lantern, Alan Scott. He would make occasional appearances over the next few years, and there was always a nice feel to the issues in which the two characters got together. The mid-1960s saw some changes for Jordan, and after his relationship with Carol Ferris collapsed he quit his job to become an adventurer. 59 introduced Guy Gardner in an 'imaginary' story positing what might have occurred had the power ring initially been given to the second-choice Gardner, then a teacher and a very different character from the one who would later become popular. There were assorted creative changes from 61, with Mike Friedrich and Denny O'Neil contributing stories, and Kane's spectacular return in 68 after a short absence, now inking his own pencils. The big change, though, came with 76, now renowned, but at the time a desperate attempt to save a dying title. The title now co-credited Green (Oliver Queen) Arrow, who'd been given a personality refit in *The Brave and the Bold* 85, and was now a socially aware crusader and one of the first of the grittier superheroes. His teaming with Green Lantern led them to explore the social issues of the time in 76-89, marvellously written by Denny O'Neil, lavishly pencilled by Neal Adams and inked by Dick Giordano. The Guardians of the Universe had one of their number accompany the pair as they explored America to learn more about humanity. There was a far greater sophistication than in any other superhero comic to that date, and topics covered included corrupt slumlords, pollution, the treatment of Native Americans, small-town mentality, religious sects and overpopulation. O'Neil never forgets the superhero soap opera elements, and the reappearance of Carol Ferris in 84 is particularly touching. 85-86 are the most famous issues from this run, spotlighting the problems of drugs as personified by Green Arrow's former partner Speedy, Roy Harper. Commendably, it offers no easy solutions, but an understanding of how anyone can become hooked. There's also some fine characterisation as Green Arrow, knowing and self-righteous throughout the run, is faced with his own shortcomings. 87 introduces John Stewart, an African-American in a story focusing on racial prejudice. Stewart is the Guardians' choice of replacement for Jordan should he be unable to fulfil his duties, and will become an increasingly important character over the years. In the Green Arrow back-up titled 'What Can One Man Do?' a riot ends in tragedy, resulting in Oliver Queen deciding to run for mayor. The run ends with a powerful story counterbalancing ecological needs with employment needs. Despite winning numerous industry awards, the series wasn't popular enough with the readership to ward off cancellation. From that point the back-up strip in Flash was Green Lantern's home for the next few years. The O'Neil/Adams stories were later reprinted as a seven-issue series (including their final tale from *Flash* 217-219) titled *Green Lantern/Green Arrow* and more recently in a luxurious hardback.

Green Arrow was still part of the title when Green Lantern was revived in 1976, and O'Neil, in the company of artist Mike Grell, concentrated on superhero and human-interest stories without the overt social issues. The best of the early issues was a pseudo-medieval setting with Sinestro in 92. 100 introduced a new Air Wave, Hal Jordan's cousin, an introduction made when someone noticed the 1940s Air Wave was named Larry Jordan, so, of course, they had to be related! Alex Saviuk offered basic super-hero artwork. John Stewart along with Green Arrow's lover/partner Black Canary were featured supporting characters until Green Lantern flew solo again with 122, while 116 returned Guy Gardner, now a Green Lantern for the first time. O'Neil gradually defined his more aggressive and objectionable character up until 131.

123 introduced the artwork of Joe Staton, and new scripter Marv Wolfman, introduced Bruce Gordon, Eclipso, to the cast. Along with a greater soap opera feel he dropped subplots here, there and everywhere. Wolfman also began featuring other Green Lanterns, many of them aliens introduced in the Tales of the Green Lantern Corps miniseries, and 148 began a back-up strip with that title, replacing the uneventful Adam Strange series in place from 132. Wolfman introduced the Omega Men, later to have their own title, in the undistinguished 141-144, but his best idea was his swansong, exiling Green Lantern from Earth for a year, in 152-171. Although giving a needed change to the title, these attempts to emulate the old-style DC science-fiction stories didn't work, with a 1980s audience expecting a contemporary comic, not one rehashing old stories. Mike Barr's wonderfully titled 'Rotten to the Corps' in 154-156 was the best of the run, extrapolating the cultural differences between various Green Lanterns, with 156 drawn by Gil Kane. Keith Pollard replaced Staton from 157, and was far more suited to the space stories, and 171 is notable for the art of Alex Toth, inked by Terry Austin. It was all change with 172 as a vast improvement was instituted by the new creative team of writer Len Wein and artist Dave Gibbons, who'd drawn a few back-up strips previously. Gibbons was by far and away the best artist to work on the revived strip, with an appealing style and excellent story-telling skills. Hal Jordan was returned to Earth and to Ferris Aircraft, where company problems result in an ultimatum from Carol Ferris that sees Jordan resigning from the Green Lantern Corps, to be replaced by John Stewart. With 186, though, Wein and Gibbons left to allow Steve Englehart and the returning Joe Staton to take over. Neither were on good form. Stewart remained as Green Lantern, becoming romantically involved with red-skinned Green Lantern Katma Tui. Star Sapphire was also back in 192, and 194-198 involve the entire Green Lantern Corps, Sinestro, and a battle between Guy Gardner and John Stewart. Hal Jordan returns as Green Lantern with 199, and with 201 the title changes to *The*

Green Lantern Corps in order to accommodate the proliferation of Green Lanterns, although the series remains set on Earth. The unfortunately named Killowog becomes a popular character, and 208-210 see him enlisted by the Soviet Union. Not caring for the politically divisive nature of Earth politics, he's happy to develop battle armour for the Soviets, resulting in the Rocket Reds. The story is badly let down by an appalling 'oh, the Commies are bad after all' plot, painting Mikhail Gorbachev, the man who in reality revolutionised the Soviet Union and helped end the Cold War, as a deceiver and murderer! This remains Englehart's lowest career point. Fragmentation left the series too diluted from its main essence: one man with a ring able to do anything. Surrounded by a team of similarly endowed characters, endearing as they were, it lost any impact and the series limped to a close.

The first and second series were bridged by *Emerald Dawn*, recounting Hal Jordan's background prior to becoming Green Lantern. The first new issues, by Gerard Jones and Pat Broderick, reduce the cast to Jordan, Gardner and Stewart, with none of them predominating, and 1-8 collected as 'The Road Back'. Jones' tenure is very hit-and-miss, although a sense of humour serves well for stories starring the doglike Green Lantern G'Nort (9-12). 14-17 introduce the idea of 'Mosaic', battles between cities on the Guardians' home planet, and John Stewart is moved over into a solo series with that title. 19 was the fiftieth anniversary of the Green Lantern concept and features the 1940s version in a story drawn by his creator Martin Nodell. 30-31 cross over with *Flash* 69-70 for Jones to have some fun with the 'Gorilla Warfare' story, co-starring two more above-average intelligent animals, Detective Chimp and Rex The Wonder Dog. Apart from nostalgic interludes, though, there was little occurring to grab anyone's attention. 46, however, plays a big role in the advancement of Hal Jordan's character as his home city is destroyed, and 48 begins the 'Emerald Twilight' series written by Ron Marz. Jordan attempts to resurrect Coast City and all its inhabitants, apparently contravening the personal-gain clause of the Guardians' code. The Guardians demand the surrender of his ring and at the same time devastate the restored city, thus driving Hal Jordan to insanity. By the time the plot concludes in 50 (under a glow-in-the-dark cover) pretty much everything has been changed, and when the power ring is passed to the younger Kyle Rayner in 51 Guy Gardner is the only other Green Lantern left. There was a need to revitalise *Green Lantern*, both title and character, but the way it occurred defied all previously established facets of Hal Jordan's character. Short-term shock value pre-empted any consideration for the fans sticking with the character. The phrase "piss on them" comes to mind. The story has been collected.

With a new Green Lantern in place, the same old themes prevailed, the only difference being the aspect of someone learning on the job. Being an artist, Rayner uses his ring more imaginatively than his predecessors, but sometimes a good old-fashioned giant green boxing glove says it better. Hal Jordan is still around, now known as Parallax, and meets his successor in 55, while Guy Gardner drops by in 60. 71-73* feature 'The Hero Quest', as the new Green Lantern tries to discover just what it is to be a hero, encountering guest stars aplenty, each with a different idea. He's also been romancing Donna Troy, formerly Wonder Girl of the Teen Titans and now one of the Darkstars, the organisation replacing the Green Lantern Corps as protectors of the universe. 76 and 77 shadow those issues from the first series, guest-starring the new Green Arrow. Writer Ron Marz and artist Darryl Banks are no O'Neil and Adams, but they maintain a decent balance of superheroic battles and human interludes. There's a good homage in 81 to Hal Jordan, with many guest appearances highlighting his heroic past, and enabling Kyle Rayner to fly free of any previous associations.

Not a bad writer, Marz is more at ease concentrating on personalities rather than action. The 'Retribution' story in 83-85 was uneventful, but introduced a major new villain, Fatality, a warrior woman bent on killing any remaining ex-Green Lanterns out there. Things hot up for young Kyle in 86 when the green-skinned Jade, ex-Infinity Inc member and daughter of Alan Scott joins the series. She eventually takes over as the love interest (nothing like keeping it in the family) after Donna Troy departs due to a personal tragedy. Green Arrow and the Flash guest-star in a crossover in 96, while it's off to the 30th Century in 98-99 for an adventure with the Legion of Super-Heroes where they have to battle a bunch of Green Lantern baddies. On the way back to the present in 100 he overshoots and ends up in the past just in time to see Hal Jordan and Sinestro engaging in one of their regular skirmishes. Jordan follows Rayner to the present in 101-106*, where he discovers the fate of Coast City and his role in the destruction of the Green Lantern Corps. Various adventures with the JLA and Green Arrow follow, ending in a battle with Jordan's older self, Parallax. In 107 Jade, who has lost her previous powers is offered a Green Lantern ring. From 108 she is the new Green Lantern while Rayner goes off for a space adventure, continued in the 'Circle of Fire' miniseries. The next few issues reveal the past of the new Green Lantern, who is helped along with her adventures by Wonder Woman, Green Arrow and her father, now renamed Sentinel. Just as she's being clobbered by Fatality, Rayner comes back to assist in 112.

115-116 guest-star Plastic Man and Booster Gold and are a bit of a hoot involving a mis-delivered package, and Hal Jordan returns yet again in 119 this time in the guise of The Spectre. Marz's last major offering before he leaves in 125 is a rather convoluted space opera featuring a new Green Lantern Corps. New regular writer Judd Winick arrives with 129 and he's off to a bumpy start with his first few issues in which Green Lantern battles the robotic Manhunters and Fatality, and a prolonged battle with new villain Nero to 136, available as a collection. Winick is more successful concentrating on Kyle Rayner who takes a regular illustration assignment for *Feast* magazine and introduces a young assistant, Terry Berg, who would become the centre of media attention. Subplots involving Jade and Terry are interesting, especially when a proposal of marriage is made. Young Terry doesn't take the news too well in 137, as he himself has feelings towards Rayner. Winick handles the situation of a young man coming to terms with his homosexuality with sensitivity and maturity. It's not the sort of story expected in this series, but it makes a welcome change from all the mindless action. Winick's next major plot, though, is far more interesting as Rayner's capabilities undergo some fundamental changes. He becomes omni-powerful and takes up the identity of Ion from 146. Nothing seems beyond his abilities, which makes for interesting situations. Regular fill-in penciller Dale Eaglesham has by now progressed from regular fill-ins to regular. A spotlight on the now crippled, ex-Green Lantern John Stewart in 147 is worthy of attention, with this sort of personal stories Winick's strength. Continuing his Ion persona, Rayner restores Jade's original powers in 148, and worries the JLA in 149. Everything comes to a head in 150 where Rayner meets his estranged father, relinquishes his beefed-up powers and offers hope for a revived Guardians of the Universe. Oh, and he gets a nifty new costume. Continuing human-interest themes, 153 is an enjoyable tale about a high-school reunion and Jade meeting Rayner's mother. This rather good-natured story leads into 154, which attracted considerable media attention covering its theme of gay-bashing, as Terry Berg is brutally beaten. Even without mainstream acknowledgement, now that Winick has settled in, Green Lantern is currently experiencing its best period for many years.

None of the annuals are worth much attention, though 9 introduces a Tunisian heroine. The 80-page giants are a bit better, with 1 and 2 offering plenty of enjoyable short stories featuring various Green Lanterns and JLA members, while 3 is a full-length saga set on Darkseid's Apokolips, and deals with a forgotten Green Lantern by Scott Beatty. Early adventures can be found reprinted in DC's Archive series and in 1998, a special 'Green Lantern Annual No 1, 1963' , also reprinting early stories, made a long overdue appearance.~HY

Recommended: Series one 40, 52, 63, 76-87, 89, series two 81, 115-116, 137, 147, 150, 153, 154

GREEN LANTERN CORPS QUARTERLY

DC: *8 issues 1992-1994*

Spinning off from Green Lantern's own title, this explores various aspects of the intergalactic peace-keeping force, headed by the Guardians of the Universe. Each of the 3600 members protects a sector of the universe; they're limited only by their will in what their power rings enable them to do. Additionally, the series concentrates on Alan Scott, the original 1940s Green Lantern, and a man with no connection to the Corps. His stories are a bit of a treat for fans of the Justice Society of America, as various members guest-star, nicely told by Roger Stern. The story in 3 is a sad occasion, as it concerns the death of the original Black Canary.

The Green Lantern Corps are certainly a mixed bunch. In 1, we're introduced to Jack T. Chance, who's as bad as they come. He's from a long line of loveable rogues and is clearly inspired by that mean-son-of-a-bitch intergalactic hitman, Lobo, and it's no surprise that they meet in 8. The other regular feature stars G'Nort, a canine Green Lantern, who isn't very good at what he does and is played for laughs. Lots of choice creators contribute to some decent short stories, one of the best being in 6 by Mike Baron and Chas Truog, featuring a middle-aged female alien looking after a community based very much on the old West. She's the local sheriff, but tries not to use her power ring too often, and doesn't like flying because it makes her sick. Others to look out for include Doug Moench / Paul Gulacy collaborations in 1 and 2, a nicely drawn story by Dave Cockrum in 3, and fan favourite Travis Charest contributing to a tale in 6. There should be something here for everyone.~HY

GREEN LANTERN Miniseries and One-shots

DC: *One-shot ('Ganthet's Tale') 1992, one-shot (Green Lantern/Silver Surfer: 'Unholy Alliances') 1995, one-shot ('Plus The Ray') 1996, 2 issue microseries (Green Lantern/Flash: 'Faster Friends') 1997, one-shot ('3-D') 1998, 3 issue miniseries (Green Lantern & Sentinel: 'Heart of Darkness') 1998, one-shot ('Fear Itself') 1999, 2 issue microseries ('Circle of Fire') 2000, one-shot (Green Lantern/Adam Strange) 2000, one-shot (Green Lantern/Atom) 2000, one-shot (Green Lantern/Firestorm) 2000, one-shot (Green Lantern/Power Girl) 2000, one-shot (Green Lantern/Green Lantern) 2000, one-shot (Green Lantern/Superman: 'Legend of the Green Flame') 2000, 3 issue miniseries ('Dragon Lord') 2001, one-shot ('1001 Emerald Nights') 2001, one-shot ('Willworld') 2001, one-shot ('Brightest Day, Blackest Night') 2002, one-shot ('Our Worlds at War') 2002, 3 issue miniseries ('Evil's Might') 2002*

Dark Horse: *4 issue miniseries (Green Lantern versus Aliens) 2000*

'Ganthet's Tale' is by Larry Niven and John Byrne and tells the secret of the Guardians' origin as Dawlakispokpok, an Oan, his Zamoran wife, and his son and daughter, attempt to undo the work of Krona, who is credited with unleashing evil upon the Universe. Ganthet is a Guardian, who comes to Earth to recruit Hal Jordan and some Earth-born Maltusians to help stop them. Despite being an interesting story about the folly of good intentions, the first section dealing with the Maltusians seems like padding, unnecessarily tagged onto the main theme.

'Unholy Alliances' is an uninteresting a tale of cosmic death and creation drawn by Darryl Banks and written by Ron Marz, who's also responsible for the team-up with the Ray as the pair battle Doctor Polaris. There's a cop-out ending and the Ray doesn't have much to do, though the script plays up the similarities between Ray Terrill and Kyle Rayner. 'Faster Friends', by Mark Waid and Brian Augustyn with artwork from Val Semeiks, begins in the past with Alan Scott and Jay Garrick handing an alien over to the government. Years later, the alien, much experimented on, dying and pissed off, directs a race of alien parasites towards Earth. It takes two Green Lanterns and two Flashes to sort things out while dealing with a dying Jay Garrick. Full of parallels and emphasising friendships, this just feels old and predictable. '3-D', in which Kyle and new Green Lantern, Jade, fight Dr Light inside Kyle's power battery, is forgettable, unless you're a fan of 3-D effects. 'Heart of Darkness' is another excuse to mess about with the ages and powers of the JSA and its children as an embodiment of chaos magic attempts to claim Alan Scott's children as its own. It's pretty much one long fight, while 'Fear Itself' features all three Green Lanterns in separate episodes, facing their greatest nightmares, but has particularly awful computer-generated artwork.

'Circle of Fire' begins with the defeat of the JLA by Oblivion, a villain that Kyle Rayner believes he created in one of his childhood comics. Wishing for help, Kyle draws Green Lanterns from the past and future, as well as from an alternate reality, to aid him, along with JLA reservists, Power Girl, Firestorm, Atom and Adam Strange over a series of one-shots. In the second issue, Green Lantern must face himself, while the remaining heroes struggle against an unstable quasar, created by Oblivion. Written by Brian K. Vaughan and drawn by Norm Breyfogle (1) and Robert Teranishi (2), the twist's not obvious, but the action itself lacks imagination. The one-shots try to offer some insight into its characters, more or less successfully, but none are particularly convincing.

Then novice comics writer Neil Gaiman originally wrote 'Legend of the Green Flame' for *Action Comics* (when weekly), featuring all of the then serialised characters in guest appearances or cameos. The plot is basic in that Superman and Green Lantern visit Hell after touching an old power battery, and have to work out how to return to Earth. The list of artists assembled for this is impressive (Michael Allred and Terry Austin, Eric Shanower and Art Adams, Mark Buckingham, John Totleben, Matt Wagner, Jim Aparo, Kevin Nowlan, Jason Little and Eddie Campbell), but the nature of the exercise works against any noteworthy result. In 'Dragon Lord', Earth's first Green Lantern, the monk, Jong Li, tries to rescue Jade Moon, concubine of a despotic Emperor, and her son, when they escape from his palace. Written by Doug Moench and drawn by Paul Gulacy, this is a compelling (albeit imperfect) story about the nature and meaning of love, freedom and heroism. The first Elseworlds *Green Lantern* story, '1001 Emerald Nights' is a clever use of the *Arabian Nights*, with Scheherazade telling Prince Ibn Rayner her tales of a jade genie and its owner, Al Jhor Dan. Terry LaBan tells an excellent story and Rebecca Guay's painted artwork works very well in this context.

Set in 1944, 'Brightest Day, Blackest Night' concerns a plane downed by Nazis in Gotham's swamp, which then becomes the battleground for Solomon Grundy and Alan Scott. Writer, Steven T. Seagle makes some attempt to provoke thought about the nature of evil and the devices that men create, while the painted artwork, by John K. Snyder III, is exaggerated and impressionistic, but not unpleasant. In 'Willworld', Hal Jordan finds himself (without any memory of who he is) in the Land of Odd. With the help of six-armed Kelly, Mu-Fon and the angel, Glance, he comes to realise that he's trapped in his own dreams. This is very enjoyable, almost entirely due to the terrifically imagined dream world, brought to life by artist Seth Fisher (influences include Moebius and Geof Darrow). On the other hand, J. M. DeMatteis' examination of the will and how to use it doesn't really bear close inspection. 'Our Worlds at War' is a standard crossover with the *Superman* series featuring a missing planet and the return of Sinestro.

'Evil's Might' is another Elseworlds story, this time by Howard Chaykin and David Tischman, with artwork from Marshall Rogers. Kyle Rayner is a cartoonist and member of a street gang, the Bowery Greens, led by Alan Scott. Kyle leaves the gang after they kill a shopkeeper, who can't pay for their protection, and is given a Green Lantern by another, grateful, shopkeeper. Thereafter, he becomes involved in the workers' rights and women's suffrage movements, much to the distress of City Hall, which hires Scott to kill him. He also manages to come between the rich Carol Ferris and her fiancé, Inspector Hal Jordan, creating another enemy. This is a good blend of established Green Lantern lore and Irish myths, very well presented. Hal Jordan meets and subdues some aliens in *Green Lantern versus Aliens*, re-locating them to the living planet (and Green Lantern) Mogo, instead of destroying them. In the present day, Kyle Rayner is called upon to help rescue a ship that's crashed on Mogo, but can he come up with a better solution than Hal, let alone survive? By Ron Marz and Rick Leonardi, this is okay without being inspired, making little use of the aliens themselves.~NF

THE GREEN PLANET

Charlton: *1 issue 1962*

This contains three science-fiction stories, the longest and most entertaining of which is 'The Green Planet', which deserves a special award for the lack of realism in its depiction of political exile on an uncolonised planet. The other two stories are just as ridiculous, but with no laughs.~FC

GREENER PASTURES

Kronos Komics: *7 issues 1997-1998*

It's a surprise for Farmer Russell Wells when his prize stud bull announces he's bored of being in the field and goes off to experience life, adopting the name Trevor. Originally published in Australia, and previously seen in *Hepcats* 7 and 10, Tim McEwan and Michael Michalandos use the comic to put over some points about society. There are funny moments, but in general it takes a long time to say little and there's no compensation in the form of great plot or characterisation.~WJ

GREENHAVEN

Aircel: 3 *issue miniseries 1988*

Barry Blair had so much story to tell in *Elflord* that he couldn't possibly fit it in the one title, hence this miniseries starring Falcon and Purebreeze. In no way a shoddy method of prising more money from a select group of fans for badly drawn startlingly average fantasy material.~FP

GREENHOUSE WARRIORS

Tundra: *1 issue 1992*

Phil Elliott Publishing: *4 issues 1993-1996*

Phil Elliott's plant-based superheroes are a great deal less politically correct than the concept may suggest. In fact they're a lot of fun, despite fighting eco-villains and occasionally coming on like public-service announcements. Elliott's art is extremely pared down for this title, giving it the feel of a comic for very young children, but his gentle humour and complex characterisation are certainly for adults.~FJ

GREGORY

Piranha Press: *4 issues 1989-1993*

Gregory conclusively proves that Marc Hempel is one of America's most consistently underappreciated comic illustrators. Almost every page in this series contains some delightfully designed drawing, a moment of inventive continuity or a piece of sly visual humour. Gregory is a virtually mute little boy who lives in a lunatic asylum. Although he's offered the chance of freedom, Gregory understandably prefers the comfort of his cell to the terrors of the outside world. His best friend is Herman Vermin, a wisecracking rodent who becomes a little bit tiresome when given the spotlight in *Gregory* 2. In fact, after the self-contained pleasures of the first and longest volume, the following three instalments all seem slightly superfluous, just rehashing the same scenes and situations found in issue one. 4 is particularly disappointing, as Hempel descends into bathos with a story about a dysfunctional family who adopt Gregory and are healed by his innocent goodness. However, for most of the run Hempel's craft and compassion ensure that *Gregory* is never less than an off-beat, pleasantly gentle read, one which should interest readers bored by the standard brutalities of most mainstream comics.~AL

GREMLIN TROUBLE

Anti-Ballistics Pixelations: *30 issues + 1996 to date*

Set at the end of the 21st century this quirky, seriously tongue-in-cheek Manga style fantasy from E.T. and Elizabeth Bryan primarily features the misadventures of a Stormfairy called Cypher. In this future humanity has indolently retreated to huge automated community edifices where they dream away their lives in virtual reality. With mankind pretty scarce on the ground, all the mythical races – elves, fairies, goblins and the like – have returned. Stormfairies take care of the weather and Cypher is just going about her business when she runs afoul of the Chief Imp, who steals her wings and mutates her with toxic waste into a Gremlin. She's adopted by the Gremlin tribe and becomes their official Princess. She is also instinctively attuned to human technology, which adds a nice edge of substantiality to the mystical fluffiness.

When the few conscious humans, who actually run the sleeping world discover the returnees they initially try to eradicate them, but eventually their leader Delage forms an alliance with Cypher and the tribe. His old boss though, forms a pact with the Forces of Darkness to take over the world, and to that end converts some of the sleeping human population into goblins to conquer the mythical races. The ensuing blend of intrigue, war, and hokey Japanese style humour interspersed with the obligatory soap opera love triangles between the ever expanding cast, makes for a light but engaging read. Not recommended for the serious, sober science fiction consumer, though. 1-20 are available as paperback collections.~WW

GRENDEL

Comico: *Series one 3 issues 1983-1984, series two 40 issues 1986-1990*

Dark Horse: *10 issue limited series ('War Child') 1992-1993, One-shot ('Devil by the Deed') 1993, one-shot ('Cycle') 1995, one-shot ('Devil Quest') 1995, 4 issue miniseries ('Black, White & Red') 1998-1999, 2 issue microseries ('Devil Child') 1999, 12 issue limited series ('Devil's Legacy') 2000-2001, 3 issue miniseries ('The Devil Inside') 2001, 4 issue miniseries ('Red, White & Black') 2002*

After first appearing in *Comico Primer* 2, Matt Wagner's Grendel enjoyed cult success in black and white. Wagner's early artwork showed promise but lacked finish, and these early strips remain more of a curiosity than an essential part of what would become a significant tale. Wagner's commercial potential was fulfilled with Mage, which, from 6, contained a Grendel back-up. Christine Spar's novel, 'Devil by the Deed' (reprinted by Dark Horse), is beautifully designed and rendered by Wagner, falling somewhere between comic strip and illustrated story. It relates the tale of the original Grendel, Hunter Rose, and his downfall at the hands of the wolf Argent. Christine is the daughter of Stacy, adopted daughter of Hunter Rose, who was his heir. From then the role of Grendel, a masked assassin who carries a deadly, dual-bladed spear, evolves into something more.

The second Comico series is a number of separate tales of various lengths in which the nature of the Grendel persona changes, moving on from one person to the next. 1-12 tell the story of how Christine Spar becomes Grendel after the kidnapping of her son by the vampire Tujiro. Though she can't kill Tujiro she forces him into hiding but can't relinquish the mask. It's very stylishly drawn by Arnold and Jacob Pander and reprinted by Dark Horse as 'Devil's Legacy'. Christine's boyfriend Brian Li Sung becomes the next Grendel (13-15), illustrated by Bernie Mireault and reprinted as 'The Devil Inside'. This is followed in 16-19 with tales of Hunter Rose as told by Captain Albert Wiggins, a policeman who had known, illustrated in an experimental manner by Wagner himself. The next four issues leap into the future and examine the way that Grendel moves from physical villain to archetype, the devil, illustrated by Hannibal King and Tim Sale. This is the precursor to 'God and the Devil' (24-33), in which a dominant Christian Church has become despotic under the leadership of Pope Innocent XLII. He plans to build a tower in Denver containing a nuclear-powered gun meant to eradicate the

Sun and is opposed by an idiot-savant Grendel, a terrorist, and politician Orion Assante. 'Devil's Reign' (34-40) sees the return of Tim Sale as Orion forges a worldwide empire. Orion's troops begin to refer to themselves as Grendels and following his code of ethics, and the first Grendel-Khan is introduced. 'War Child' picks up the story when, on his death, Orion's wife tries to assume power. The cyborg Grendel Prime kidnaps Orion's heir, Jupiter. After nearly being killed fighting the remnants of the vampires and his mother's troops, Jupiter becomes the second Grendel-Khan, in a series illustrated by Patrick McEown with inks by Wagner. 'Cycle' is a history of the title and character with a timeline and primer illustrated by Wagner. 'Devil's Vagary' (1987) was a special story produced for the Comico Collection, written by Wagner and illustrated by Dean Motter. 'Devil's Quest' is a single issue reprint of the Grendel Prime back-up story from *Grendel Tales*.

'Black, White & Red' is a series of short stories, written by Wagner but drawn by, amongst others, Tim Sale and D'Israeli (1), Tim Bradstreet and Paul Chadwick (2), Mike Allred, Guy Davis and the Pander Brothers (3) and Jason Pearson, Troy Nixey and Woodrow Phoenix (4). As the title implies, the stories are in black and white with the addition of red in appropriate places. As these tales mostly involve Grendel being very nasty to his enemies, there's a lot of red per page. However, the use of a wide range of artistic styles keeps the stories fresh and interesting. This formula is repeated, but not quite as successfully, for 'Red, White & Black', with good work from Jill Thompson, Stan Sakai and Tom Fowler on 1, Kelley Jones and Dan Brereton on 2, Mike Huddleston on 3 and Farel Dalrymple, Darick Robertson and Michael Zulli on 4. With 'Devil Child', Diana Schutz became the first person other than Wagner to write about the first Grendel. She explores the life of Stacy after Grendel's death, describing her period in an institution, her marriage and the birth of her daughter. Drawn by Tim Sale, this is beautifully crafted but very grim.

Grendel is an intelligent and ambitious series that thwarts expectations. It can be read simply as an adventure strip (albeit one with a long and complex plot), but it's also an examination of the nature of evil and a satire on the relationship between society and religion, politics and the media. Numerous collections are testament to its broad appeal.~NF

Recommended: Series two 16-40, 'Devil By The Deed', 'Warchild' 1-10, 'Black, White & Red' 1-4, 'Devil Child' 1-2

GRENDEL TALES

Dark Horse: *6 issue miniseries ('Four Devils, One Hell') 1993-1994, 3 issue miniseries ('The Devil's Hammer') 1994, 5 issue miniseries ('The Devil in our Midst') 1994, 2 issue microseries ('Devils and Deaths') 1994, 3 issue miniseries ('Homecoming') 1994-1995, 4 issue miniseries ('Devil's Choices') 1995, 6 issue miniseries ('The Devil May Care') 1995-1996*

Grendel Tales is the vehicle by which writers other than creator Matt Wagner can have a go at Grendel stories. Set in the world following 'War Child', these concern individual Grendel soldiers, the people they protect (or not) and the clan societies into which the Grendels have fallen.

James Robinson and Teddy Kristiansen get the series off to a good start with 'Four Devils, One Hell', starting as a character-based view of people in a Grendel-run society, and descending into a battle for the throne of France, climaxing in a violent New Orleans Mardi Gras. In 'Devil's Hammer' Rob Walton and Bernie Mireault have a young man, the lone survivor of a village destroyed by Grendels, who becomes one himself for revenge, but is unable to release the power of Grendel once that revenge has been taken. 'The Devil In Our Midst' has a Grendel seeking redemption at an Ice Station in Antarctica but there's a mysterious virus killing the crew and he comes under suspicion as the cause of the disease. This is a fine thriller by Steve Seagle, with excellent artwork by Paul Grist. Darko Macan and Edvin Biukovic's 'Devils And Deaths' seems like another straightforward tale of rivalry amongst Grendels, but blends deception, despair and heroism into a grim little tale about the need to belong.

Grendel Susan returns home to her lover Avril, who has become a whore to the local Grendel clan, in 'Homecoming', by Patrick McEown and Dave Cooper. When Avril tries to leave, she is killed and Susan exacts a bloody revenge. Similarly emotional, though not so violent, is Terry LaBan and Peter Doherty's 'The Devil May Care', a love story, albeit a doomed one. LaBan's script is complemented by Doherty's Moebius-like artwork. Macan and Biukovic return for 'Devil's Choices', which is about clan rivalries and an attempt by several of the Grendels to escape what they see as a life with no future.

Obviously lacking the direction that gave the Grendel series its coherence, *Grendel Tales* are generally of a high quality, enriching the Grendel world set up by Wagner as the creators stamp their individual visions onto the overall structure. 'Devil Quest', reprinted as a single issue, runs as a back-up by Wagner from 'The Devil's Hammer' to the first issue of 'Devil's Choices'.~NF

GREY

Viz: *9 issues 1988-1989**

The only way the exotically named Grey Death can escape the grim reality of life in the future is to join The Troopers and work his way through the ranks to Class A, at which point he'll be granted status as a citizen and afforded a comfortable existence. The odds against this are 33 to 1. Grey's progress is phenomenal, but then he begins caring, and to learn more of the world he inhabits. Long, albeit spectacularly drawn, battle-action sequences give the feel of watching someone play a computer game, and the payoff is predictable once issue 6 reveals the background to Grey's world. Warning: don't read Harlan Ellison's first issue introduction as it rather gives the game away.~FP

GREY LEGACY

Fragile Elite: *1 issue 1994*

The genial Les begins his university career by becoming starstruck in the presence of the glamorous Taija. His constant paeans of praise are a source of distraction and irritation to his room-mate, the studious Grey, who's apparently going to develop into someone who'll change the universe. This collects the first two issues, which were originally self-published, which accounts for the abrupt change of pace halfway through as Les befriends a small alien kept as a class specimen. There's an endearing charm and innocence to this story that might almost date it from the 1950s, but the dialogue is sharper than most 1950s material, and the excellent cartooning comes via Jaime Hernandez and Phil Foglio. Wayne Wise and Fred Wheaton are listed as creators, and it's a great shame there was apparently no second issue.~WJ

GREYLORE

Sirius: 5 *issues 1985-1986*

Heroic fantasy saga of two linked worlds, one technological, the other medieval, and rogue hero Greylore, who forms the nexus between them. Meddling wizards steer his actions to ensure that "destiny is fulfilled". Bat-like familiar Pox provides the better moments of comic relief. Production problems plague Bo Hampton's artwork and the absence of issue 6 in a six issue miniseries – advertised but never published – renders the whole affair irrelevant.~APS

GREYSHIRT: Indigo Sunset

ABC: *6 issue miniseries 2001-2002**

Alan Moore's tribute to Will Eisner's *Spirit* earns a longer outing after a run of shorts in *Tomorrow Stories*, with Rick Veitch once again handling the bulk of the creative chores with occasional guest shots from the likes of John Severin (4) to add spice to the mix. The eponymous hero is a business-suited mystery man, face obscured by a red bandanna, who strives to clean up the moral cesspool of Indigo City, a state of affairs he in no small part contributed to in his past life as racketeer Frank Lafayette. Good old fashioned masked guy fighting thugs'n'masterminds stuff using the narrative device of clippings and features from the evening newspaper the *Indigo City Sunset*. Adroit but somewhat short of the charm of the source material.~WW

THE GRIFFIN

Slave Labor: *3 issues 1988*
DC: *6 issue miniseries 1991-1992**
Amaze Ink: *1 issue 1998*

In 1967 Matt Williams is recruited by an alien race called the Acacians and transformed into a super-solider. Homesick twenty years on, Williams returns to Earth, causing complications all round. Family and friends have assumed him dead for two decades, and the Acacians, believing him to have deserted, are prepared to destroy the planet to ensure his return. By concentrating on the emotions prompted by the scenario, and the political machinations on Earth and Acacia, Dan Vado and Norman Felchle construct a compelling story. Not the least of their triumphs is the transformation of Williams from boy hero with stunted emotional growth to possible planetary saviour. Fine artwork from Felchle and inker Mark McKenna rounds off an excellent title.

The Slave Labor issues are re-drawn as the first book and a half of the DC series, and the story returns to Slave Labor's Amaze Ink imprint for the second series. Intelligent writing is assured with Dan Vado, and he sets up an intriguing story, but sadly sales appear to have been more potent than the return of old enemy Anarchy.~FP
Recommended: DC 1-6

GRIFFITH OBSERVATORY

Rip-Off: *1 issue 1979*
Fantagraphics: *1 issue 1993*

By far Bill Griffith's most accessible work, *Griffith Observatory* is also a career peak, the success of *Zippy the Pinhead* notwithstanding. Collecting one-page syndicated strips, Griffith exposes the foibles, obsessions and trivialities of late-1970s culture with a venomous yet considered eye. Always interesting, by turns it's also wistful, heartfelt, angry and informative. Where else could one learn under one cover about Mansard roofs, that people collect barbed wire, and that Jimmy Durante once played a violin duet with Albert Einstein? And one of his predictions for the 1980s is distressingly true for the 1990s. Griffith would later mine similar territory in more abstruse fashion through Zippy, although never as pleasingly. The Rip-Off edition appeared while the strip was still in syndication, so the magazine-sized Fantagraphics collection reprinting the entirety along with sixteen new pages is the better purchase.~WJ

GRIFTER

Image/WildStorm: *Series one 10 issues 1995-1996, series two 14 issues 1996-1997, one-shot ('Wild Times') 1999*

WildStorm's favourite tough-guy-with-a-heart gets his own series, and the opportunity to delve a little deeper into his past, motivations and psyche. Flashbacks to childhood abuse and his complicated relationship with Zealot flesh out the action, the continuing theme of which is that no matter how hard Grifter tries to live a quiet life, trouble always finds him. The series loses its way a little in the middle, due more to inconsistent artwork (between 4 and 10 there are five changes of penciller) than to Stephen Seagle's relentlessly action-packed scripts. The last issue finds our hero in a depressed and contemplative mood for a conclusion rounding off the series more logically and sensitively than you might expect. The second series, by Stephen Grant, Mel Rubi and Richard Friend, tells single-issue stand-alone stories which fill in more information on the character's background and motivations. Issue 3 is outstanding. He's now found in *Point Blank*.~JC
Recommended: Series one 2-6, 10, series two 3

GRIFTER/BADROCK

Image: *2 issue microseries 1995*

Amusing story of the mismatched superheroes trying to rescue Badrock's mother from The Covenant of the Sword, the plot elements continuing from *Badrock & Co* 5. Rob Liefeld and Chap Yaep don't produce many panels of artwork but it's well enough suited to the high action script from Eric Stephenson. Issue 2 is a flip-book, which the indicia claims is *Badrock* 2, guest starring Savage Dragon in another story continued from elsewhere. Issue three never appeared, leaving both stories unfinished.~NF

GRIFTER AND THE MASK

Dark Horse: 2 *issue microseries 1996*

If you enjoy the manic antics of the Mask you'll probably enjoy this tale entitled 'Cleaving Las Vegas' in which the two title characters clash at a gun show. Steven T. Seagle produces a script full of the sort of lame humour you'd expect from the *Mask* cartoon series without compromising the characterisation of Grifter but as stories go, it's not much more than one long fight and chase. There's some fun to be had with the rednecks vs. gun control subplot, but don't come looking for any deep insights into the subject.~NF

GRIFTER/SHI

Image/Crusade: *2 issue microseries 1996**

WildStorm's favourite gunslinger and Crusade's ninja babe team up to stop a Korean nuclear bomb from devastating Japan. It's prettily put together by members of both characters' regular creative teams, including some lovely pencil work by Travis Charest; the writing is adequate though nothing special. The "story so far" at the start of 2 takes a whole page of text and tells you a good couple of hundred years of Japanese history, in case you ever wanted to know where to find it in a comic.~JC

THE GRIM GHOST

Atlas: *3 issues 1975*

Satan offers a 17th-century highwayman the opportunity to return to 20th-century USA equipped with a flying horse and assorted superpowers. His purpose is to ensure a steady supply of evil souls flowing to hell. No classic, but readable, with nice art from Ernie Colón.~FP

GRIMJACK

First: *81 issues 1983-1991*

Grimjack should have been First's best title. It's set in the city of Cynosure, where the wily, grizzled bruiser John Gaunt initially showed great potential. Writer John Ostrander set up a peach of a situation, with Cynosure the place where all realities met. This let Grimjack have all sorts of adventures, from hard-boiled detective stories to dimension-spanning epics, from Cat-and-the-Canary-suspects-trapped-in-a big-house horror tales to Western shoot-em-ups. Grimjack himself is a classic anti-hero with a sob-story background and a tough reputation redeemed by random acts of kindness. And Ostrander is clever enough to underpin the series with a titanic struggle between Grimjack and the bunch of winning outsiders he has drawn around him, and an array of human and demonic villains, mostly from Grimjack's unpleasant past.

The title started life as a back-up in *Starslayer* 10-18, a pleasing mixture of sudden action and whimsy (particularly reflected in its own back-up strip, Munden's Bar, which attracted all sorts of guest writers and artists and its own special). Although Tim Truman was clearly still learning, he picked things up fast and the initial awkwardness of action is largely gone by the third or fourth issue. 1-12 are well worth reading for a satisfying mix of ongoing plotting and terse story-telling, as Ostrander fleshes out the mysterious city and his broody protagonist's many acquaintances. The *Starslayer* shorts and 1-4 are reprinted as *Grimjack Casefiles*. Soon afterwards, however, things get a bit too complicated for their own good. The balance between ongoing mega-plot and satisfactory short sub-plots shifts and suddenly there are so many things to explain that there's barely time to allow existing characters to grow. Ostrander solves this by introducing more and more bad guys from Grimjack's murky past, who pop up whenever the bodycount's getting too low. The other great problem is the characterisation of Grimjack himself. He's a pawn of the situation, changing from understanding old bouncer to killing machine to tortured soul depending on the needs of the month's plot. However, up until 19, when Truman left the title, there was enough going for it to keep it readable.

Replacement artist Tom Sutton did a competent job as plots nose-dived towards magic and demon wars. When Tom Mandrake took on the art chores with 31 (and he drew like it was a chore), the title was firmly in decline. Grimjack was about to be killed and re-born younger, one page relishing death, the next swearing to come back for revenge. Conveniently, his re-birth allowed him to develop psychic and mystical powers. Having faced up to his past for the umpteenth time, Grimjack mark two bit the dust in 54 after meeting his far-future self, and 55 saw the character re-born yet again, 200 years into the future. At which point most sensible people sighed and gave up, if only because in Flint Henry First found an artist even less capable than Mandrake. Maybe Ostrander fancied a bit more science fiction, a bit more American Flagg-style cleverness? Who knows, or indeed wants to know? Anyone who can enjoy the series beyond 50 is to be saluted.~FJ

GRIN AND BARE IT!

Boomerang: *3 volumes 1995-1998, 2 specials 2001-2002*
NBM: *3 volumes (1-2, 4) 1998-1999, 7 issues + 2001 to date*

Reprinted from material published in Europe by the Belgian publisher, Boomerang (e.g. in the Dutch magazine, *Rooie Oortjes*), these are one-page gag strips on a sexual theme, often wordless, usually amusing without being laugh-out-loud funny. NBM reprinted the first two Boomerang volumes, directly imported the third and then added a fourth. They're produced by a number of different writers and artists, the former normally unannounced and the latter only known through their signatures. Amongst the artists, Dany (real name Daniel Henrotin) has a detailed cartoon style on the first and third volumes, much like his countryman, Franquin, while Gursel bears similarities to Jack Davis (providing the only strips in the second and fourth volumes and the two specials). The regular series contains a mixture of creators including Gursel, Gurcan (who appears to be the same artist with a different writer), Jaap, Di Sano and Dixon (who draws like a sleeker Don Martin).~NF

GRIP: The Strange World of Men

DC/Vertigo: *5 issue miniseries 2002*

The first word that comes to mind is "bonkers". This Gilbert Hernandez tale contains: gangsters; vigilante Mystery Girls; a man in a woman's skin; a powerful cult leader (who can convince anyone to do anything, but who spends a lot of time out of his skin); a one-eyed girl with the power of life and death; a stripper; a gangster wannabe and his girlfriend; and a couple of police detectives. The storytelling's a demented mix of 1950's paranoia coupled with a healthy dash of Tarantino coincidence and violence. Of course, it's also very funny, and not just in a coal-black kind of way.~NF

GRIT BATH

Fantagraphics: *2 issues 1993-1994*

Deliberately provocative mixture of scatological black humour and child sexuality from writer/artist Renée French. Her crude, naïve art-style makes this a deeply unsettling comic, one likely to offend a great many readers. Certainly unique, but difficult to recommend.~AL

GROO The Wanderer

Pacific: *8 issues 1982-1984*
Eclipse: *One-shot 1984*
Marvel/Epic: *120 issues, 2 Graphic Novels 1985-1995*
Image: *12 issues 1995-1996*
Dark Horse: *4 issue miniseries ('The Most Intelligent Man in the World') 1998*, 4 issue miniseries ('Groo and Rufferto') 1998-1999*, 4 issue miniseries ('Mightier than the Sword') 2000*, 4 issue miniseries ('Death and Taxes') 2001-2002**

Groo the Wanderer is an expert fighter whose sword is for hire to whomsoever will pay him or feed him. He's quite possibly the greatest warrior in his fantasy world (whatever you might hear from that blond braggart Arcadio). It has to be said, however, that Groo is a bit (okay, a lot) short on cunning and intelligence. Oh, and he's accident-prone. And he doesn't bathe. In fact, he's so fond of a fray that he's as likely to rush in and kill everyone as work out first which side he's supposed to be fighting for. And, whatever you do, don't invite him to build anything for you; or demolish anything, for that matter. And, especially, don't let him anywhere near your fleet – he can sink a ship just by looking at it. Groo has a sister, Grooella, who is always embarrassed by him, and he has a dog, Rufferto, whose devotion to his master is surpassed only by his willing blindness to Groo's stupidity. Groo's world is further populated by The Sage (a wise man who acts as occasional narrator, and is almost as accident-prone as Groo), The Minstrel, whose fondness for singing about Groo can lead to trouble in itself, Taranto (Groo's former mercenary buddy who's usually trying to kill him), the witches Arba and Dakarba, who want revenge on Groo, and Pal and Drumm, the one a promoter, the other a dumb fighter who can't believe that Groo's better than him. Not forgetting the beautiful Chakall, skilled she-warrior with whom Groo fancies himself in love.

Driven by a desire for cheese dip, a hatred of being called a mendicant and the inability to hold down a job for longer than it takes to ruin whatever semblance of civilisation he finds himself in, Groo somehow manages to survive. Even if he doesn't come out on top, he ends each adventure in a better state than the unfortunates he's been fighting (or, for that matter, helping). Created, written and drawn by Sergio Aragonés (with scripting assistance from Mark Evanier, lettering by Stan Sakai and colouring by Tom Luth), Groo can be achingly funny, but usually it's merely hilarious. The running joke is that every Groo story is the same, although you'll find you appreciate it more, the more you read. Aragonés is a genius cartoonist whose densely peopled panels are full of detail, interest and incidental humour.

In the first Dark Horse miniseries, most of the characters from the past appear in response to a mystery surrounding Groo's having become the most intelligent man in the world. Six issues of *The Groo Chronicles* reprint the Pacific and Eclipse issues and over half of the Epic issues have been collected. *The Death of Groo* graphic novel has Groo trying to play St George, but rumours of his death, greeted with some jubilation, are exaggerated. *The Life of Groo* covers his birth and youthful adventures, and is available in a standard-comic-sized issue – extremely difficult to find – and a Graphitti Designs book-sized package.~NF

Recommended: as many as you can carry

Fantagraphics: *2 issues 1989*

Certainly unique as a Dr Suess/Vaughn Bodé hybrid in four panel gag form, the gags never transcend the obvious *Garfield* style. Still millions of people love Garfield, and they can't all be wrong, can they?~WJ

GROOVY

Marvel: *3 issues 1968*

Not a comic per se, but a comic-shaped collection of gag cartoon panels from cheap men's magazines. Terrible stuff, badly reproduced.~HS

---

* Available in a collected edition

GROSS POINT

DC: *14 issues 1997-1998*

This amusing and well-drawn parody takes on the horror genre, teenagers and small-town America, though the humour is noticeably strained by 9. Brian and Terri are the new kids in town, but, of course, their parents don't see the weirdness all around them. Living next door to a duck-shaped house might have been taken as a hint of strangeness by many parents. Matt Wayne and Dan Slott do most of the writing and Roger Langridge provides pencils or inks to maintain consistency. Other frequent artists include Joe Staton and Rick Parker.~NF

GROUND POUND

Blackthorne: *1 issue 1987*

A selection of underground cartoon strips from prestigious illustrator John (*Garbage Pail Kids*) Pound. Gorgeously illustrated, but tediously dated stories showing off Pound's artistic versatility as he lambastes both the funny animal and EC comics of his youth. Look, do not read.~WW

Mike Baron's THE GROUP LARUE

Innovation: *3 issue miniseries 1989*

The strained title-pun apart (the French for werewolf is loup-garue – geddit?), there's little of note in this inane fantasy title, where a group of gamers actually get to live out their fantasies, one of them being transformed into a man-wolf, hence the title.~FP

GROWING UP ENCHANTED

Too Hip Gotta Go Graphics: *1 issue + 2002 to date*

Jack Briglio and Alex Szewczuk continue the adventures of Olianna, a little girl who is also a baby sorceress in training, and her friends and neighbours in the little village of Anywhere. A charming all-ages fable that mixes the wide eyed excitement of growing up with knights, dragons and trolls leavened with the eternal verities and troubles of being a smart kid that grown-ups won't listen to. Exuberant and fun, two short tales appeared in the anthology title *Mythography*.~WW

Recommended: 1

GRRL SCOUTS

Oni Press: *4 issue miniseries 1999**

On the basis of this Jim Mahfood has a long career in trendy advertising illustrations ahead of him. He's fused *Deadline*'s Tank Girl and Wired World for this girls with attitude comic. Silly, enthusiastic, ephemeral and very much a snapshot of the times.~WJ

GRUNT

Grunt Records: *2 issues 1972-1973*

One of the strangest comics ever created, Grunt was supposedly a promotional comic issued by Jefferson Airplane's Grunt record label. In the hands of writer Tom Veitch and artist Greg Downs, however, it became a crazed satire of the music business, full of the requisite sex and drugs. The rather loose narrative charts the descent of The Ripped Whips from a good natured acid rock group to a degenerate satan-worshipping S&M band, with Irons gleefully delineating each tawdry excess in blinding dayglo colour. And not a single Grunt record is even mentioned. Weird.~DAR

Recommended: 1-2

GTO Great Teacher Onizuka

Tokyopop: *9 volumes + 2002 to date*

Onizuka is a former teenage gang leader who dreams of being known as great, but spends his time staring up the skirts of high school girls from the bottom of an escalator. Actually meeting one, and a succession of job rejections, convinces him the way to meet more high school girls is to become a teacher. The general direction from this shallow beginning is as might be expected, but not as directly as would be the case under lesser hands. Hefty doses of humour, both visual and narrative characterise the first volumes, and creator Tohru Fujisawa's comic timing is adroit. He further has a talent for setting up a scene and confounding expectations as to the outcome. His art is standard manga drama style, telling the story competently without flash, but also without any mistakes. Onizuka remains a likeable and unpredictable rogue throughout, his background providing unorthodox solutions to problem classes, although karate skills are sometimes useful. Having run the obvious new teacher plot in 1, there's a curve thrown in 2, but by 3 Onizuka is teaching in a private school where one troublesome pupil is confronted in the video arcade. Another is dealt with in a manner that brings the PTA down on him to start 4, by which point the formula is decaying. Fujisawa rectifies that rapidly, injecting more poignant plots and characterisation into 5, providing tougher opponents and challenges, and upping the adventure content at the expense of humour. While it renews the series, it's at the expense of ripping the unique heart out to be left with what's still decent drama for teenagers, but no longer standing so far above standard material.

It should be pointed out that whether for purposes of authenticity or saving on production costs these small paperback volumes have been published Japanese style. They have to be read from back to front, while on the page the story sequence reads from right to left. You'll soon get used to it.~WJ

Recommended: 1-3

GUANO Comix

Print Mint: *1 issue (4) 1972*

Discursive ramblings presumably passed off as being of some worth through peer group pressure. Those pointing out the emperor's new clothes were just not getting with the scene, despite the title's dead giveaway. Amid all the guano, though, there's an excellent fantasy illustration credited to 'DRT'. Oh yes, and to mess with your mind, the only issue was numbered 4, although only the terminally addled would want to search out the non existent 1-3.~FP

GUARDIAN ANGEL

Image: *2 issues + 2002 to date*

Christian Angelos is a movie star and orphan. When he's attacked by demons during a party at his mansion, he discovers he's also a lot more than that. Jonathan Peterson's script has managed to generate some anticipation for the revelations to come, whilst simply setting the scene so far, but, if the series can keep the clean, detailed artwork of Aron Weisenfeld, it should have a good future.~NF

GUARDIANS OF METROPOLIS

DC: *4 issue miniseries, 1994-1995*

Kirby's Guardian and Newsboy Legion get their own series courtesy of Karl Kesel and Keiron Dwyer. A dopey but entertaining romp through Project Cadmus and the big city as the boys aim to 'rescue' their mentor's great-niece from the clutches of Granny Goodness. Not the most intelligent comic of the decade, but great fun.~JC

GUARDIANS OF THE GALAXY

Marvel: *62 issues, 4 Annuals 1990-1995*

This was originated by Arnold Drake in *Marvel Super-Heroes* 18 in 1968 where four rebels pool resources to fight for the Solar System after a 31st century invasion. There were later guest appearances in *The Defenders* and *The Avengers* spliced by their own feature in Marvel Presents in the 1970s. The 31st century boys are Charlie 27, a rotund, bullish native of the moons of Jupiter; Martinex, a crystalline scientist from Pluto; Vance Astro who is a thousand year old Earthman thanks to a space voyage made in suspended animation and a sail-headed bowman from Proxima Centauri named Yondu. *Defenders* 26-29, added the literally flame-haired Nikki from Mercury and the godlike Starhawk who is a cataclysmic amalgam of a couple from Arcturus named Stakar and Aleta (conveniently split apart in 3). The Guardians patrol the galaxy in their starship Captain America (later replaced by the Icarus), and have a headquarters of sorts on the planet

* Available in a collected edition

Klaatu, which is run by Mainframe, a computer intelligence formerly known as The Vision. The basic premise for the series is that the super-beings in the current Marvel Universe would profoundly affect the future. Legends, religions and whole cultures have sprung up in the millennium since The Avengers last assembled.

There are many, often overlapping, story arcs. After a quest to claim Captain America's shield The Guardians meet Malevolence, Mephisto's daughter in 7 and the Warlock-like Protege in 15 both of whom have a villainous impact on the series. They also travel to Haven, a planet of mutants, where they fight Rancor and eventually witness the transformation of Giraud, the Phoenix of the 31st century. Starhawk is expelled for reabsorbing Aleta before the team's return to Earth in 17, and Martinex also leaves. A cat-like Inhuman named Talon joins in 20 just as Astro renames himself Major Victory and adopts a woefully kitsch costume to go with Cap's Shield. They also meet a thousand-year-old Wonder Man who's now known as Hollywood (featured with Martinex in 1994s *Galactic Guardians* miniseries). A darker Starhawk returns in 22 and we find that The Silver Surfer has become The Keeper of Quasar's Quantum Bands in 24. This leads to a confrontation with Galactus and Yondu's departure in Annual 2, in which a recreated Korvac prompts a battle featuring every ally the team have ever had. 26 is a key issue that retells the Guardians' origins with extra details added. 20th century ex-villain Rita 'Yellowjacket' DeMara joins up in 29 and a freed Aleta escapes Starhawk in 33 boosting the female membership by two. Loki leads renegade Inhumans against Asgard where the tide is finally turned by Woden, son of Thor in 43. Yondu returns to the team in 44 as things get cosmic with The Beyonder and his meeting with Protege. What follows is a trial for the Arcturan Hawk God who created Starhawk. The Protege then makes his long-awaited move at the gathering of Eternity, The Living Tribunal and the Celestial called Scathan The Approver. Astro has returned to his all-over bodysuit in the meantime. Cuchulain, The Irish Wolfhound, was so popular in Annual 3, set in Killraven's time, that he's inducted in 51, at the same moment Charlie is imprisoned and Talon mutates himself into something wilder. An encounter with the Martian serial killer Ripjak in 54 leads the Guardians to a showdown with plague-bringer Bubonicus in 59, guest starring The High Evolutionary. Starhawk also discovers he's the son of Quasar and embarks on a quest of self-discovery, splitting the title to 62. Annual 1 features the Guardians first time travel meeting with The Silver Surfer and the introduction of Earth's current Sorceror Supreme, Krugarr. Annual 4 sees Rancor's revenge as well as finishing the 'Future History' serial begun in 50 and continued in *Galactic Guardians* 1.

Jim Valentino wrote and laid out the series up to 29 and the first two annuals. His storytelling is arch-derivative, and the series is essentially a licence to futurise existing Marvel concepts. It's the referential elements, though, that inject what little fun there is. The guest art by Mark Texeira in 23 shows just how exciting the title could've been. Finisher Steve Montano deserves a gold watch for long service on nearly every issue! Replacing Valentino as writer, Michael Gallagher's approach reads more along the lines of a cosmic soap opera with penciller Kevin West bringing nothing new to the table apart from an obvious over-interest in drawing cleavage and his character Ripjak. Unlike the far-from-perfect Starlin titles from the 1980s that it aspires to, *Guardians* has no central theme beyond strip-mining Marvel continuity for throwaway stories. A good idea betrayed by mediocre execution and crass content. 1-6 were collected.~SW

The Adventures of GUERRILLA GROUNDHOG

Eclipse: *2 issues 1987*

This was among the best of the anthropomorphic titles to slipstream Teenage Mutant Ninja Turtles. Not concentrating on parodying other comics was a good start, taking its lead from 1970s Hanna-Barbera cartoons was a decent second step. Chuck Wagner's scripts raise a few grins, and Andy Ice's cartooning is fine. Fans of funny animal comics might want to investigate.~FP

GUFF

GUMBY'S FUN SPECIALS

Comico: *2 issues 1987-1988*

Gumby's Summer Fun Special is a lot of fun. Really. Despite being based on the green clay US children's character. Gumby and Pokey, his orange horse chum, some children and a baby-sitting werewolf get mixed up with hysterical aliens (bad guys) and space bears (good guys), a group of nice pirates and a crazy town where it's permanently Hallowe'en. Bob Burden's script is minimal and funny, with the plot always on the brink of coming apart at the seams The fact that he manages to keep all the plates in the air makes for manic fun, while Art Adams' detailed artwork is always a joy.

The *Winter Fun Special*, scripted by Steve Purcell, doesn't have the same effortless quality that makes the first special so good. Gumby and Pokey have an underground adventure with Mole Men, the Devil and Santa Claus in which the plot's stretched thin and the lunacy is forced in places, especially the satirical references. The joy of *Gumby* is that it is simplistic, pure entertainment. Not that the Winter Special doesn't have some good scenes, which, coupled with Art Adams' intricate, carefully-balanced artwork, make it worth seeking out.~NF

GUN FURY

Aircel: *10 issues 1988-1989, 4 issue miniseries 1990*

With marked similarities to The Tick, Gun Fury was an equally pompous and musclebound clod fighting a variety of media and reality inspired villains. As written by Barry Blair, it just doesn't have that offbeat wackiness that elevated *The Tick*, although it's not bad. With a four panel page crowded in comparison to most, *Gun Fury* is hardly a long read, but it should raise a smile or two each issue, and does have the early professional art of Dave Cooper, working from Blair's layouts. The miniseries ('The Return of…') takes obvious swipes at the comic industry and is far weaker for it.~FP

GUN RUNNER

Marvel UK: *3 issue miniseries 1993*

Fast-paced but incredibly predictable series, featuring an alien warrior with no memory who's befriended by an independent-minded female. He saves her from danger and they're attacked by other aliens. The appearance of Blaze and Ghost Rider just gives less room to develop any individuality the strip might have had. Impressive inks from Adolfo Buylla almost make this worth-while, though.~NF

Mobile Suit GUNDAM

Viz: *8 issue limited series (0079) 1994*, 13 issue limited series (0083)1994-1995**
Tokyopop: *4 issue miniseries ('The Last Outpost') 2002*
Viz: *5 issues + ('The Origin') 2002 to date*

Earth begins colonising space in the future, but far from being a solution to problems, it creates worse ones, particularly increasing conflict between the space dwellers and the home planet. Balancing the power of both sides are eighteen-foot-tall battle robots, known as Gundam. Enormously successful in Japan, where the saga is an animated film, the Viz comics take their artwork directly from animation cels, and dialogue directly from the film. It's sometimes an awkward procedure, despite similarities between the two media, and as much of the film is action-based there's a distinct lack of emotional involvement in the comic. After much to-ing and fro-ing everything amounts to an unremarkable series of battles in space. And you've never seen any less convincing military types than our two flighty leads Kou and Nina, who're more like two children playing at being soldier and pilot.

The Tokyopop series reads in authentic Japanese fashion from back to front and right to left, and draws on the rich legacy of the animated series, but appears to tie in more with *Mobile Suit Gundam Wing*. It's another alterniverse story of new pilots for new robots, but only those completely immersed in the premise should investigate.

The 2002 Viz magazine series is packed with new designs and poor story as the upstanding Earth Federation's war against the insidious Principality of Zeon is going badly. The noble crew of the White Base, burdened by cargo of revolting aliens, have to resort to the experimental new protection of the Mobile Suit Gundam. The battles are long, and the soap opera tedious.~WJ

GUNFIGHTER

EC: *10 issues (5-14) 1948-1950**

In contrast to EC's other western series *Saddle Justice*, *Gunfighter* contains several strips with recurring heroes. All issues feature Gunfighter (by Graham Ingels) whose adventures tend to involve his rescuing of ladies in distress, and The Buckskin Kid, a white man raised by Indians who spends his time in pursuit of the Blackfoot villain who killed his adoptive parents. All but 13 and 14 feature 'Saddle Justice', the name for a series of 'true' western tales (much as fill the issues of that title). This strip's replacement is 'The Old Prospector's Tale' by Fred Peters in which the old man recounts salutary tales of greedy miners, very much a precedent for the horror hosts to come. Sheldon Moldoff's superheroic Moon Girl appears in a western setting in the first two issues, though it appears that they are inventory material. The Buckskin Kid is given a new origin and The Six-Gun Sisters are introduced for 13 in an attempt to revamp the series but it was too late as the title joined the New Trend as *The Haunt of Fear*.

The stories are more varied and the artwork is of a higher quality than *Saddle Justice*, but *Gunfighter* suffers from much the same problem, a lack of consistently interesting characters. The tales written by Johnny Craig and Al Feldstein are largely precursors to the crime and horror strips to come, while Gardner Fox's unreconstructed Indians make for unsettling reading now. Craig and Ingels provide decent artwork throughout but with the latter often providing two strips in an issue, it can seem rushed. Ingels' pencils only the Gunfighter strip in 8 and the 'Saddle Justice' episode in 10 by F.C. Aljon (Feldstein and Craig) are worth mentioning. Other high points come towards the end of the series with Craig's return to The Buckskin Kid (from 11) and The Six-Gun Sisters in 13-14 by Harry Wood (Harry Harrison and Wally Wood).~NF

GUNFIRE

DC: *14 issues (0-13) 1994-1995*

Introduced in *Deathstroke* Annual 2, Gunfire can agitate the molecules of solid objects. Simply put, it enables him to fire bullets from anything he picks up. If there were a template for the bog-standard superhero comic, *Gunfire* would be it. It's superheroics by numbers for the first few issues, but from 6 the art of Ed Benes transforms Gunfire into a distorted and crippled figure and the title from a 1980s template to a 1990s template. There's thousands of comics to read before you even think of sampling this.~FP

GUNHAWKS

Marvel: *7 issues 1972-1973*

Any comic starring Reno Jones and Kid Cassidy isn't going to be the subtlest of plagiarisms; this one is of interest only for featuring a black Western character.~FP

GUNHED

Viz: *3 issue miniseries 1990*

This is adapted from a Japanese movie: a giant robot has to be re-programmed to destroy a computer intent on taking over the world. Crash! Bang! Wallop! Oh, it's over.~WJ

GUNS OF THE DRAGON

DC: *4 issue miniseries 1998-1999*

Set in 1927, minor DC characters Bat Lash, Enemy Ace, Biff Bradley and Chop-Chop team up for an adventure on Dinosaur Island where they find themselves caught between Chinese and Japanese agents and the machinations of Vandal Savage. This is an intriguing pulp yarn from Tim Truman that plays to the strengths as well as the disparities between the leads – the cynical, but charming Bat Lash, morbid Enemy Ace, gung-ho Bradley and faithful Chop-Chop. Truman's artwork is the only letdown, his own inking often lacking consistency on the characters' faces.~NF

GUNSLINGERS

Marvel: *One-shot 2000*

Was some obscure trademark retention purpose the reason for publishing this? It was never going to sell. Hardly prime material at the time, and already reprinted as *Mighty Marvel Western* 3, these 1950s strips by Stan Lee, Jack Kirby and Dick Ayers have aged badly, and the Living Totem in the Rawhide Kid story beggars belief. The grittier Caleb Hammer (from *Marvel Premiere* 54) by Peter Gillis and Dan Day is better, but hardly a sought after back issue.~WJ

GUNSMITH CATS

Dark Horse: *10 issue limited series 1995-1996*, 7 issue limited series ('The Return of Gray') 1996-1997*, 5 issue miniseries ('Shades of Gray') 1997*, 7 issue limited series ('Goldie vs. Misty') 1997-1998*, 6 issue miniseries ('Bad Trip') 1998*, 9 issue limited series ('Bean Bandit') 1999*, 10 issue limited series ('Kidnapped') 1999-2000*, 11 issue limited series ('Mister V') 2000-2001*, 1 Special 2001*

Kenichi Sonoda's manga is the inspiring tale of Rally Vincent and Minnie-May Hopkins, two young women sharing a love of guns, cars and bombs. It's set in Chicago, where Rally is a gun shop owner who makes most of her money as a bounty hunter. Minnie-May is her business partner, ex-Mob, ex-prostitute, and current bomb-maker. Other recurring characters include their friend, Becky, an ex-criminal, Misty, who involves the girls with Goldie, a mob enforcer, Bean, the best getaway driver in the business and long-suffering detective, Roy Coleman.

Gray is the major villain of the first three series, Goldie of the next two and 'Mister V', in which she attempts to take over the mob and use Rally's father against her. 'Bean Bandit' and 'Kidnapped' are more relaxed after the intensity of 'Bad Trip', in which Goldie attempts to enslave Rally (for personal and professional use) with the mind-control drug, Ketamine. *Gunsmith Cats* is fast-paced, displays a deep appreciation of guns and cars and is not very politically correct. However, Sonoda knows how to make his action work on the page and there are some excellent set pieces that owe much to Hong Kong cinema. His main characters are well defined and even villains like Goldie display complex motivations.~NF
Recommended: 'Kidnapped' 1-10, 'Mister V' 1-11

GUNSMOKE WESTERN

Atlas/Marvel: *56 issues (32-77) 1955-1963*

This Western anthology was one of the few titles to survive Atlas' 1957 collapse. The one constant feature was the Kid Colt strip by Stan Lee and Jack Keller. Unfortunately it was as unexciting here as it was in the regular title, although fans might be interested in 72's origin story. In 32-35 a transparent Davy Crockett rip-off Billy Buckskin was enlivened by Mort Drucker art, but the remainder of the Atlas run consisted of short one-off stories. These were resolutely inconsequential, but also very nicely drawn, and the likes of Doug Wildey, Angelo Torres, Al Williamson, Gene Colan and Matt Baker crop up regularly. Atlas stopped commissioning new material after 42, but had stockpiled enough art to last a considerable time. 50 and 61 contained a couple of lovely Reed Crandall strips, but from 50 on *Gunsmoke* was more typically drawn by Marvel stalwarts Dick Ayers, Paul Reinman and the redoubtable Jack Kirby. The much maligned Don Heck produced some of his best work here with his strips in 70 and 76 particularly crisp and stylish. The Marvel era restored a second series with Wyatt Earp by Lee and Ayers appearing periodically in 45-56, and Two-Gun Kid (by Lee and John Severin) in most issues between 57 and 63. As ever, they were pretty to look at, but disappointing to read.~DAR

Recommended: 50, 61, 70, 76

The GUNWITCH: Outskirts of Doom

Oni Press: *3 issue miniseries 2001**

The Gunwitch is the corpse-like bodyguard of Doc Horror's daughter, Halloween Girl in *The Nocturnals*. Here the Gunwitch takes 'The Man With No Name' role in Heliopolis, a town torn apart by rival gangs of vampires as they fight over a young girl, who may be the means of resurrecting a lost vampire queen. Dan Brereton's script pays playful homage to *A Fistful of Dollars*, but Ted Naifeh's artwork fails to achieve a complementary atmosphere.~NF

GUTTERSNIPE

Fantagraphics: *2 issues 1994-1996*

Funny-animal (and funny-foliage) stories by Glenn Head, involving porn, violence, drugs, and the death of God. It's familiar territory for an underground comic, but there are a few surprises, mostly in 1. 'Happy Shiny Flowers' takes an unexpectedly positive view of the meeting of the 'good' flowers and the 'bad' weeds, 'Dream of the Porno Fiend' is good on the experience of being disgusted by your own imagination, and the autobiographical 'Ultra Violence' takes an intelligent approach to the common fascination with violence. After 1, the stories are still entertaining, but there are no new themes.~FC

GUY GARDNER

DC: *3 issue miniseries ('Guy Gardner Reborn'), 43 issues, 2 Annuals 1992-1996*

A one-shot character introduced in issue 59 of the 1960's Green Lantern series, Guy was brought back in the 1980's as a tonsorially-challenged misanthrope with a grudge against Hal Jordan for usurping Guy's 'role' as the Green Lantern of Earth. A major focus of the relaunched *Justice League* from 1987, he spun-off into his own miniseries, in which, having been stripped of his power ring, he acquires the yellow Qwardian power ring operated by Sinestro, and sets out to kick arse and take names. Written by Gerard Jones, drawn by Joe Staton, the miniseries, and the first 10 issues of the ongoing title, are fuelled more by violence and chutzpah than narrative skill. An attempt was made to add more depth in 'Yesterday's Sins' by Chuck Dixon (11-14), exploring Guy's troubled childhood, but before there was a fair chance to see if it helped, the title became Guy Gardner: Warrior from 17. From here Guy's temperamental 'foreign-made' power ring gave up the ghost, and he had to seek other sources of power. 'Emerald Fallout' in 18-21 effectively closes the book on Guy's days as a ring-wielder, and new writer Beau Smith settled on an *Indiana Jones* theme. Guy and a team of adventurers lead an expedition to exotic climes, and he ends up drinking the 'Waters of the Warrior' which activates his conveniently latent genetic potential. It turns out our all-American Guy was part alien. How embarrassing. This genetic gift enables him to armour up and construct both edged and projectile weapons out of his own tender flesh. From there, although often amusing in a boneheaded 'Manly Thrills' kind of way, the series wanders, with Smith unwilling to either espouse or take the piss out of his hero's attitude. Guy gathers around him a team of has-beens and leftovers from the far corners of the DC Universe, including Wildcat, Lead of the Metal men, a time-lost Lady Blackhawk from the 1940's, and fellow former Green Lantern Arisia. While the series is usually worth a glance (particularly issue 42, where our macho hero has to get in touch with his feminine side as 'Gal Gardner') it's seldom more than competent fight scenes. An honourable exception is 29, beautifully illustrated by Phil Jimenez, in which Guy's superhero theme bar, *Warrior*'s, opens, with guest-shots by almost every DC character active at that time. It's quite charming, and if you try it, you'll have sampled the best of this series by a very long way.~HS.

Recommended: 29

GUZZI LEMANS

Antarctic: *2 issue microseries 1996*

Guzzi Lemans is an outcast in a future society split into gangs and federal agencies. She lives in a garage with a beloved AC Cobra and her dog, and earns a living by making deliveries in a truck rigged to protect her against marauding mutants. Jim Lawson's art and storytelling style has a very sparse European feel to it, and while the lack of depth precludes wholehearted recommendation, these should not disappoint if found cheap.~WJ

GWAR

Last Gasp: *One-shot ('Skulheadface') 1994*

Gwar was a rock 'n' roll band with a flamboyant theatrical approach and fifteen to twenty members, but only about six musicians. The remaining members help make up Slave Pit, performing other creative duties associated with the band, and who had their own comic, *Slave Pit Funnies*. 'Skulheadface' is an adaptation of Gwar's video movie, providing an origin of sorts, and pitting them against a villain, who's trying to subjugate Earth under the orders of Cardinal Syn.~NF

GYRE

Abaculus: *3 issues 1997-1998*

Edgy supernatural thriller from Martin Shipp and Marc Laming wherein the US military hunts for Jacob Guyler a psychic of immense power, who can apparently channel the stored energy of the unquiet dead. Worth a look. 2 and 3 also contain short 'Six Degrees' fillers from Shipp and John Welding.~WW

GYRO FORCE

Rip-Off: *One-shot 1987*

Intended as the first of a series of related comics, Mark Bodé's fantasy pilots obviously never caught the imagination. The pilots are the first line of defence against alien attackers, and while Bodé has put a lot of thought into the background, it's at the expense of attention to plot, which is largely a mundane shoot-em-up.~FP

---

* Available in a collected edition

THE HACKER FILES

DC: *12 issues 1992-1993*

Jack Marshall creates a computer operating system for Digitronix, but then decides that the corporation's evil and must be stopped. With the aid of friends Yoshio, an ex-wife, a gang of young hackers and Justice League Europe, he sets about confounding the company's plans for world domination through use of an Artificial Intelligence. As ludicrous as it sounds, writer Lewis Shiner clearly has something to say about freedom (information or otherwise) and individualism, including as he does the crippled Oracle (5-6) and a lengthy subplot about a renegade student from China (7-10). The artwork by Tom Sutton, inked by Mark Buckingham, lacks Buckingham's own flourishes and any real sense of place, experimentation with computer graphics in the later issues notwithstanding. This is a worthy, pre-*X-Files* attempt to show ordinary people caught up in conspiracies, real or imagined but fails in the end because there are too many compromises in the storytelling, particularly with the intrusion of superheroes.~NF

HAIGHT STREET STORIES

Streets of America: *One-shot 2001*

Three anecdotes transcribed in comic form by artist 'Ant', with an additional *Where's Wally/Waldo* aspect as he draws a likeness of himself into each story. The stories deal with a first tattoo, a drunken night out and its consequences and a missionary child. They're well told, but in places writer Harry Moss dwells a little, edging out a possible fourth tale. Why Haight Street when the subjects are universal? Well, in possibly the most encouraging aspect of the comic, many Haight Street businesses have not only sponsored it, but are selling it as well. Why not pop into *Say Cheese* or *All California Mortgage Inc* for your copy.~FP

David Zapanta's HAIRBAT

Slave Labor: *1 issue 1995*

In tone this is very much like the whimsical gloom such as *Squee* and *Lenore* with which Slave Labor would later enjoy success. Distinctively drawn, there's little else to recommend it, with a nonsensical story about a boy confined in a mental hospital hosting a talking bat in his hair. The puppet show prologue brings you up to speed from the earlier minicomics, but there's very little point to any of it.~FP

HALLOWEEN HORROR

Eclipse: *One-shot 1987*

The final issue of *Seduction of the Innocent* in all but name, this contains the brand mix of baby-eating ogres, slimy demons, and gruesome vampires. It's the underrated art of Lou Cameron that stands out in an issue also presenting Jay Disbrow and the eccentric 'Frankenstein' by Dick Briefer. Of interest, but hardly essential.~WJ

John Bolton's HALLS OF HORROR

Eclipse/Quality: *2 issues 1985*

John Bolton's understairs cupboard more likely; a ragbag of English reprints. Polished enough artwork, but the monster-club framing sequence can't explain away why the majority of the second issue is devoted to a 2000 Years BC caveman adventure.~FJ

HALO an Angel's Story

Siruis: *4 issue miniseries 1996**

Chris Knowles' story is a welcome departure from the norm. It details the 1980s experiences of the teenage Halo, drifting through various locations unaware she has a guardian angel looking after her, and intervening unobtrusively at pivotal moments of her life. The story is absorbing, despite a major drawback in Halo's passive blank slate of a character, and Knowles' deliberately heavyset art adroitly overcomes the limitations of a talking heads comic. Each issue is a largely self-contained slice of Halo's life, and should appeal beyond the conventional comic audience.~FP

HALO AND SPROCKET

Amaze Ink: *3 issues + 2002 to date*

Katie lives with an angel, Halo, and a robot, Sprocket. Given his mechanical nature, Sprocket can be infuriatingly and remorselessly logical, while Halo's celestial origins imbue a touch of arrogance. The sitcom set-up produces three short stories each issue. They're simple, funny, charming and well conceived, with Kerry Callen's polished cartooning a treat. Show it to people who don't read comics; it has a wide appeal.~FP

Recommended: 1-3

The Ballad of HALO JONES

Quality: *12 issue limited series 1987-1988**

Reprint of Alan Moore and Ian Gibson's futuristic coming-of-age tale that originally appeared in *2000AD*. Although limited by the need to provide a climax every six pages or so, Moore manages to create a cohesive overall story which attracted many female readers. Ian Gibson, frequently overrated, produces some of his best ever artwork. The lack of 'prettiness' in his open-lined forms and stubby blocks of ink suits the unromantic tone of the stories perfectly. The stories were planned as individual books, each occupying four issues.

Halo Jones begins with the heroine living in a violent future of floating cities and follows her attempts to escape from the numbing boredom of Earth. She has a naïve vision of what space travel will be like, and in the third book (9-12) is forced to join the galactic army when down on her luck. Each of the three stories has its own mood. In the first, incredibly, she and her friends strap on grenade-launchers and machine-guns and attempt to go shopping, as Moore gently takes the piss out of ultra-violent science fiction. It ends on a poignant note as, with a job on a space cruiser, she (and we) realise that none of her friends will make the same huge leap. 5-8 are a collection of largely stand-alone stories, including beautifully crafted shorts such as 'I'll Never Forget Whatsisname?', about a stowaway who's become so good at hiding that everyone forgets him seconds after meeting him (an idea Neil Gaiman would develop in his *Neverwhere* TV series). The third book is an unsophisticated, but very moving, diatribe against war. As excellent a way to introduce young girls to the delights of comics as you could wish, but by turns entertaining and moving for the rest of us, too.~FJ

Recommended: 5-12

The HAMMER

Dark Horse: *4 issues miniseries 1997-1998, one-shot ('Uncle Alex') 1998, 3 issue miniseries ('The Outsider') 1999*

Written and drawn by Kelley Jones, this is the story of a creature that attaches itself to the back of an archaeologist's head in order to fight an evil Death Cult attempting to bring Hell to Earth. 'Uncle Alex' continues The Hammer's humorous attempts to come to terms with modern life – including being led to a demon by the blending of the relish and mustard in a hot dog. 'The Outsider' introduces an other-dimensional patchwork man who comes to the Hammer's aid against Cthulu. With the trappings of Lovecraft and mythic heroes generally, this is not bad but doesn't really work, possibly resembling a superhero title too closely. The Hammer's naivety, love of junk food and single-minded approach are all sources of humour but the series as a whole lacks depth.~NF

HAMMER OF GOD

First: *4 issue miniseries 1990, 2 issue microseries ('Sword of Justice') 1991*
Dark Horse: *3 issue miniseries ('Butch') 1994, one-shot ('Pentathalon') 1994*

Nexus supporting character Judah Maccabee takes the spotlight, dispensing his religion-fuelled sense of justice across the Galaxy. The idea of an alien from a persecuted race raised by Hassidic Jews should never, if we're being honest, have survived to be more than a one-issue joke, and the wackiness of the concept doesn't really hold up as the centre of attention. The first series is more interesting as a chance to see Steve Epting before he'd really learned to draw than for its often tedious plot of Maccabee fighting political corruption by standing for office himself. The Dark Horse issues bring nothing more to the title or the character. After all, apart from Steve Rude's beautiful pencils there was never a lot to the Nexus concept anyway. Take away those and the lead character and there's really nothing of substance left.~JC

HAMMER OF THE GODS

Insight Studios: *5 issues 2001-2002**

A glorious collaboration between Michael Avon Oeming and Mark Wheatley concerning the ancient Norse legends. It was Oeming's idea, and his jagged cartooning conjures a bleak world that Wheatley tightens into stories. They're skillfully and sparsely written, maintaining the detached quality of the legends, with mythical characters dropping in and out, and dragging the acts of the gods down to caprice and petulance. As the baby Modi lies dying, his distraught parents beg the Gods to intervene. They do, with a Valkyrie named Skögul ensuring not only his survival, but also bestowing a blessing of prodigious strength and great wisdom. It comes with a caveat, though: should Modi raise a weapon his sould will be forfeit. Despite his gifts the adult Modi becomes disillusioned with the Gods, and swears to destroy them. Of course, he'll have to find a way to Valhalla first, but another meeting with Skogul under completely different circumstances in 3 enables this, and Valhalla is not what he expected. The story originally appeared in black and white, but is best read in the recent Image collected edition with subtle colouring, also by Wheatley, and further issues are expected from Image in 2003.~WJ
Recommended: 1-5

HAMMERLOCKE

DC: *9 issues 1992-1993*

"Tomorrow's superhumans are here!" it says on the cover of Issue 1. They may well be, but it's hard to spot them among all the talk about corporate politics and the astral railway, which isn't nearly as exciting as it sounds. Boring beyond belief. One point of interest: all the women have lips like sink plungers.~FC

HAMSTER VICE

Blackthorne: *9 issues 1986-1987*
Eternity: *2 issues 1989*

Puerile and appallingly drawn anthropomorphic humour comic about police hamsters. Creator Dwayne Ferguson won Marvel's try-out contest, but on the basis of this the other entries must have been unmentionable. Blackthorne also published two 3-D issues, the second reprinting the first issue of the regular series.~FP

HAND OF FATE

Eclipse: *3 issue miniseries 1988*

It's unusual to find Bruce Jones writing a series about a hard-boiled detective. Of course there's plenty of fantasy, science-fiction and horror elements to the story: what else do you expect when the hero's called Artemus Fate, with a psychic girl-friend and a pet raven? The down at heel Artemus investigates unusual cases, from haunted lighthouses to a woman more spider than human, to killer pussy cats. Gerald Forton's artwork gives the whole thing a 1950s feel and his story-telling's good, although the overall look of the strip isn't particularly pleasing on the eye. A bit of a curiosity.~NF

HANDS OF THE DRAGON

Atlas: *1 issue 1975*

Kung-Fu comics by numbers. Got that checklist ready? Tibetan monastery? Yup. Mystical medallion? Yup. Aged mentor? Yup. Years of training? Yup. Typically dull Atlas shot at bandwagon jumping? Yup.~FP

THE HANGED MAN Chronicles of Mazeworld

Caliber: *2 issue microseries 1997*

During the course of his suspension by the neck the first man to be hanged in Britain for three decades is somehow transported, hood intact and irremovable, to Mazeworld. In this fantasy world controlled constructed from adjoining mazes, those who have the maps hold the power. Here Adam is believed to be a long lost hero to some and an inconvenient nuisance to others. In the UK 'Mazeworld' was seen in colour weekly instalments, and while completed in speedier fashion by Caliber that doesn't compensate for running the series in black and white, thus further reducing the detail of Arthur Ranson's sumptuous artwork. Alan Grant's concept is fascinating, and this is merely the opening chapter. It's a decent adventure story, but not, as yet, all it might become.~FP

HAPPY

Top Shelf: *2 issues + 2001 to date*

The title is, sadly, ironic as yet another twenty-something delivers his nihilism unto the world. Josh Simmons is so painfully self-aware that he devotes a seven page prologue, parading his nous and excusing his autobiographical piece in 2. It's a shame as while he might have little to say, he is a talented artist, and the pseudo-Victorian cartooning, again in 2, is very nice indeed.~WJ

HAPPY THE CLOWN

Caliber: *2 issues 1994, 2 issues ('The Return of') 1995*

Lenny is a shellshocked, government agent, nicknamed, Happy because of his lack of optimism. He's assigned as bodyguard to the U.S. President at his nephew's birthday party, but his own agency assassinates the President, framing Lenny, who's become glued into his clown suit. Writer, Gary Francis, is clever enough with words to use the names of a dozen different comic publishers on one page. The experimental storytelling techniques, though, both words and pictures, make it seem as if the writer and artist (not so much David Mack on the first series, but particularly Troy Boyle on the second) are working on different pages. It's difficult to tell, but the evidence suggests that the story is unfinished.~NF

HAPPYDALE: Devils in the Desert

DC/Vertigo: *2 issue microseries 1999**

Three murderous kids go on a killing spree before high-tailing it for the Badlands, where they decide to lie low in an isolated and picturesque little town in the middle of nowhere, populated by various hermits, recluses and retired side-show freaks. It isn't long though, before their urge for destruction overwhelms them again and they find to their regret, that nobody settles down in a place like Happydale unless they have secrets of their own to outrun. Good-looking but routine thriller from Andrew Dabb, Seth Fisher and Laura Allred.~WW

HAR HAR COMICS

Fantagraphics: *2 issues 1990-1992*

The last gasp at a Mike Kazaleh title in comics before he decided animation might be a better bet for a secure future. In the first issues there are a number of short gag strips, and a longer one wondering what it would be like if dogs really had anthropomorphic tendencies. 2 accompanies more shorts with the sad tale of Hyper-Al's birthday. The cartooning is brilliant and the comic is, at times, very funny, so well worth picking out of the cheap section if you see it.~WJ

HARBINGER

Valiant: *42 issues (0-41), 2 Yearbooks 1992-1995*
Acclaim: *One-shot 1997*

'Harbinger' is the term applied to those who'd be mutants at Marvel, teenagers with inherent natural superpowers who're harbingers of humanity's future, hence the name. It also applies to the Harbinger Foundation, run by Japanese businessman Toyo Harada, who gathers and trains Harbingers, allegedly in their best interests, thereby enabling them a degree of control over their abilities. This doesn't sit well with Peter Stanchek, a teenager with prodigious mental abilities, who rebels. 1-7, and the supplemental zero issue, are very much plot and character led by writer Jim Shooter and artist David Lapham. Nice touches include the rotund Zephyr, a major comic fan, delighted at becoming a superhero, and Stanchek mentally manipulating his team-mates, one in a particularly despicable fashion. The conflict over Stanchek between female members of the team comes over as puerile wish fulfilment, but otherwise 1-7* are solid enough superhero comics. 8 and 9 are part of Valiant's 'Unity' crossover, including an unlikely revelation for Kris, while Lapham writes and pencils 11-13. Most other issues to 25 are one round of skirmishes after another between Stanchek's team and Harada's agents, but Stanchek returning home to his father for the first time since he fully manifested his powers in 21 is nicely handled. It's the by then regular team of Maurice Fontenot and Howard Simpson, a much underrated artist. 25 is the final conflict between Stanchek and Harada, with more than a few surprises. 26 begins a new direction entirely, and introduces Sean Chen as penciller, but it's an era of high-school superpowered soap operatics with plenty of crossovers, most notably with *H.A.R.D. Corps* in 30 and 31. By 34's 'Chaos Effect' chapter *Harbinger* is almost without focus, and has deteriorated into mediocrity. Succeeding issues are an improvement, returning the title to more or less its original premise, but an abrupt cancellation means there's no real ending.

The Acclaim reboot takes its lead from Image's belligerent teenage team titles, but is merely a serviceable introductory issue.~WJ

HARD BOILED

Dark Horse: *3 issue miniseries 1990-1992**

Brash, ultra-violent, completely amoral. Is this what Frank Miller thought he needed to do to reinvent himself for the 1990s? *Hard Boiled* is a slick, magazine-size short story of a corporate robot whom renegade robots are trying to recruit. It's the blackest of black comedies, drawn by Geof Darrow, whose panels are crammed with detail and oddly disquieting. Many people rave about the detail in Darrow's pages, but his draughtsmanship and story-telling is merely average. Ultimately the series is a triumph of style over content, the violent excesses highlighting over and over Miller's message of the hopelessness of lost humanity.~NF

The H.A.R.D. CORPS

Valiant: *30 issues 1992-1995*

Using implants and satellites, the H.A.R.D. Corps are given a variety of abilities, including flight, power blasts and the projection of protective shields. The snag is they're only able to use one at a time, though can switch instantly by calling base. Teamwork is imperative to ensure maximum efficiency. Ostensibly an interesting concept, for most of the run it's never developed beyond the ordinary, with one-dimensional characters, as exemplified by the best issue being a fill-in starring a one-shot character in 24. Mike Baron improves matters as the team discover they've been manipulated in 26, but by then it's too little, too late.~WJ

HARD LOOKS

Dark Horse: *10 issues 1992-1993**

Hard Looks adapts Andrew Vachss' seriously mean short stories, with one new prose piece each issue. With artists like James O'Barr, George Pratt, Warren Pleece, David Lloyd, Dave Gibbons and Gary Gianni the visual interpretation is as dark as the original prose, and sticking to black and white artwork is very effective. The villains have usually committed sexual crimes of one kind or another and the heroes are often just looking for revenge, but these are powerful stories that steer clear of relying on a twist ending for suspense. A collection picks and chooses from the entire run.~NF

HARDCASE

Malibu: *26 issues 1993-1995*

Tom Hawke is Hardcase, an actor who woke up one morning with super strength. He soon linked up with three others as a super team called the Squad. After a brief string of successes, the Squad were attacked by a Techno-Organic creature called NM-E. Two died and Hawke's girl friend was put into a coma. The series begins a few years later, Hawk is now a movie star playing himself when NM-E returns and Hawke finds himself catapulted into a chaotic world of intrigue and slaughter, embroiled in the schemes of Rex Mundi, Master of Earth, and the builder of NM-E. Solid if uninspired superhero, tough guy action from James Hudnall and a variety of artists.~WW

HARDCORE STATION

DC: *6 issue miniseries 1998*

Ah yes, this is what creator Jim Starlin (helped by inker Joseph Rubinstein) does best: a good old fashioned space opera. The series stars Chief Justice Max, head of security of Hardcore Station, an intergalactic hub of activity that's the place to do business (legal and illegal) with five million aliens. Max dishes out his own brand of fascistic justice, obviously inspired by *Judge Dredd*, and has to thwart various threats and evil-looking baddies. Of course there's a larger plot at hand involving an powerful omni-being – what would we do without powerful omni-beings? – who's obviously up to no good. Starlin's a old hand at this sort of thing, but he goes through the motions with much style and professionalism. Interesting plots and top-notch artwork make for an entertaining read.~HY

HARDWARE

DC/Milestone: *51 issues 1993-1997*

In hero mode, Hardware is essentially a black version of Iron Man, but far more effectively so than Marvel's surrogate. Out of his gear he's Curtis Metcalf, scientific genius employed by ostensibly philanthropic businessman Edwin Alva, who in reality has his finger in any number of criminal pies. Instead of wiping him out straight off, Metcalf figures it's more satisfying to bring down the criminal activities one by one, with Alva, although beyond the reach of the law, powerless to stop a vengeful armoured warrior. It's a satisfying blend of action and personality that's provided by Dwayne McDuffie and Denys Cowan for the initial issues. In 14 Alva discovers the obvious, but the plot isn't resolved in the way everyone might expect. 17 and 18 are part of the *Worlds Collide* crossover, in which the Milestone heroes meet some of their DC counterparts. It's also the end for McDuffie and Cowan (for whom several other artists had already filled in), and the start of a forgettable run.

It's all change again from 32 as Metcalf forms his own company, taking several of his colleagues along, while continuing his fight for justice. An appealing aspect to *Hardware*, and indeed most Milestone titles, is that there's a strong editorial control. Different creators work on the title, and sometimes the change of artistic style can be jarring, but overall plot-lines are continued through to conclusion, and there's no new direction with every change of writer. Towards the end of the series Dan Chichester is in charge, and pulls elements of his stories straight from the real world, with government-sponsored covert-action teams, organ harvesting, and a retired general hawking his autobiography. These issues are deliberately more up front with action and wisecracking, and there's a far higher percentage of guns than previously. Despite being the first and last of the Milestone imprint, *Hardware* is one of the weaker titles throughout. While never bad, almost any of the others are worth investigating before this.~WJ

HARLAN ELLISON'S DREAM CORRIDOR

Dark Horse: *One-shot 1995, series one 5 issues 1995*, series two 1 issue 1996*

Not, as you might expect from the title, the infamous science-fiction writer and self-styled gadfly of the establishment rhapsodising about his ideal hallway, but a rather dreary anthology title featuring well-known cartoonists adapting Ellison's short stories. Ellison completists should note that he co-edits and writes new short prose fiction based on the cover illos and framing sequences (drawn by Eric Shanower) between the adaptations. As entertaining as Ellison's bluster and self-promotion can be, and despite nice packaging and a talented roster of contributors such as Peter David, John Byrne, Doug Wildey, Michael T.Gilbert, Jan Strnad, Skip Williamson and Mike Deodato, the stories are lacklustre. If Ellison's your cup of tea you'd be better off with his collections of short stories.~JC

HARLEM BEAT

Mixx: *9 volumes 1999-2002*

First serialised in *Mixxzine* and then collected and continued as separate volumes, this is the story of basketball player, Nate Torres. Initially playing for a team, Scratch, with Mizzy, Kyle and Masa, volumes 1-5 concentrate on the team's experiences during the Mixxhoopz 3On3 championships, as they beat tough opponents, Three Slam and the girls of Mermaid Force, before they must face the physical and psychological threats of the Ice Picks, whose tactics include kidnapping their friends. In 6-9, Nate is chosen to play for the Johnan High basketball team, which is struggling in the leagues, but still has a chance of playing in the National championships, aided by Nate and then Mizzy.

Realism is sacrificed to a large extent in Yuriko Nishiyama's manga sports series, mostly in the manipulation of timeframes, but also in the lives of the characters. This does not make the story any less interesting and, whatever one might make of the problems thrown in the way of our heroes, Nishiyama does succeed in making the outcome of each game thrilling, building suspense to keep the reader guessing. The uncomplicated artwork also helps to keep the action understandable even to non-sports fans.~NF

HARLEM'S HEROES

Quality: *6 issue miniseries 1992*

It is fifty years since the original Harlem's Heroes played their last game of Aeroball. Earth, now run in all but name by Mega-Corporations, is a totalitarian state where political prisoners and other dregs are sent to labour camps deep underground. The only surcease in a regime of unrelenting toil is the odd game of – you guessed it – Aeroball. The best team is sprung by the theoretically powerless US government for a special mission, but its all a set-up, and the released felons, calling themselves – you're way ahead here – Harlem's Heroes, must fight everybody to clear their names and stay free. Mindless rubbish reprinted from *2000AD*, with scripts by Michael Fleisher only just saved from total worthlessness by the art of Steve Dillon and Kev Walker.~WW

HARLEY QUINN

DC: *One-shot 1999, 28 issues +, 2 Specials, one-shot ('Love on the Lam') 2000 to date*

As was the case with the updated Batgirl in the 1960s, one of the most popular *Batman* characters of all time didn't originate in the pages of any Bat comic. Harleen Quinzel is a fresh young psychiatrist, who connives to get herself assigned to Arkham Asylum, where Batman's most deadly foes are confined between murder sprees, and where an ambitious shrink could get the goods for the biggest pop-psychology book of all time. Once she starts treating the Joker, however, she snaps herself and falls obsessively in love with the evil clown. That's her origin from the Batman animated TV series, it's how she's played in many issues of the various all-ages comics based on the TV show, and it still is when she's co-opted into mainstream Bat continuity

Her first such appearance is in the one-shot set during the 'No Man's Land' event and with Paul Dini and Yvel Guichet doing a bang-up job reprising her history for the grown-up comics crowd. Karl Kesel and Terry and Rachel Dodson are responsible for the regular series, as the ever more buxom, wacky would-be villainess decides to end her abusive relationship with the Joker and strike out on her own. She forms a gang – The Quintettes – and tries very hard to steal lots of money. The adventures are light in tone and roll along rapidly, with few subplots. She becomes the target of a team of bounty hunters and her own gang member Nix, and has lots of guest-stars but there's little to entice the casual reader. After many for forgettable tales, Harley and gal-pal Poison Ivy quit Gotham for the gleaming bright lights of Metropolis (14) where she's employed as the relationship counselor on the Daily Planet during the period of the 'Our Worlds At War' crossover. Her tie-in special is drawn by a host of alternative comics talent such as Paul Grist, Paul Chadwick and Amanda Conner.

She even plays fast and loose with the affections of Jimmy Olsen, and after a run-in with Bizarro and Superman she dies and goes to Hell, providing the most novel story in the entire run. She and the dead members of the Quintettes spend three very amusing issues (20-22) trying to escape Hell and another two getting her a new body. By 25 it's back to the same old eye-candy as Kesel and Dodson hand over to new creative team A. J. Lieberman, Mike Huddleston and Troy Nixey. It never sucks but there's way better comics you could spend your time and money on – such as Harley's appearances in the various *Batman Adventures* comics.~WW

HAROLD HEDD in Hitler's Cocaine

Kitchen Sink: *2-issue microseries 1984*

In a manner reminiscent of Carl Barks' *Uncle Scrooge* epics, Harold Hedd and his cousin Elmo set off in search of a cache of cocaine lost during World War II on its way to Hitler. With a parrot, a shark, a treasure map and two other groups after the loot, there's plenty of slapstick action. Rand Holmes' earlier *Harold Hedd* adventures, reprinted from the same Canadian newspaper that would later début David Boswell's *Reid Fleming*, were also published in two issues by Last Gasp.~NF

Clive Barker's The HARROWERS, Raiders of the Abyss

Marvel/Epic: *6 issues 1993-1994*

Tying into *Hellraiser*, the Harrowers are basically non-costumed superheroes with a mission to save souls from hell, run by the Cenobites. Considering their status as immortal demons the Cenobites are an unimaginative and dull bunch, not improved by Gene Colan pencilling as if he didn't give a damn. The best effort is 'Devil's Pawn' in 5 and 6, wherein the Harrowers have rescued the wrong soul and unwittingly returned a murderer to Earth, but their best story is the Alex Ross-painted début in *Hellraiser* 17.~FP

HARRY THE COP

Slave Labor: *One-shot 1992*

Simply told and illustrated indictment (by Brian McDonald and Wayne Cash) of the institutional racism of the Los Angeles Police Force, describing Harry's racism and bigotry. Produced like a children's story, with few words and a single panel per page, artistically this is at its best when the Eisner influence is clearest. Written before the Rodney King beating, its anger is clearly not misplaced.~NF

HARSH REALM

Harris: *6 issue miniseries 1993**

Dexter Green is your average hard-boiled private eye eking out a surprisingly lucrative living in the near future. Society has become overwhelmingly technologically and environmentally hostile, and a number of corporations offer escape into alternate realities created by supercomputers. Green is hired to retrieve teenager Dan Crawford who has disappeared into GameCorp's 'Harsh Realm' reality. Touted as the ultimate escape, the world can only be affected by people inside. On entering, Green discovers just how powerful the computers are, since even the laws of physics bend to the specifications of the game, and he has to learn to use and survive magic. A further complication occurs as Dan Crawford not only doesn't want to be rescued but is also well on the way to becoming the God of Evil in Harsh Realm. So-so adventure strip from James Hudnall, Andy Paquette and John Ridgway.~WW

HARVEST KING

Caliber: *3 issue miniseries 1997*

Petty criminal Michael Dean is in a quandry. On the one hand a renegade archangel is offering him everything he could ever want or desire in return for his soul, and on the other, his future self has come from the future to stop him from making the biggest mistake of his life... Intriguing take on the temptation parable from Joe Casey and Mike Macropoulos.~WW

HARVEY

Marvel: *6 issues 1970 (1-2), 1972 (3-6)*

Archie.~DAR

HATE

Fantagraphics: *30 issues 1990-1998*, 3 Annuals + 2000 to date*

Long before the term 'slacker' was first applied to a lost generation, Peter Bagge was producing stories about suburban teenager Buddy Bradley and his dysfunctional family in *Neat Stuff*. Given a new title, the misanthropic Buddy aged five years to become the focus. Initially sharing a Seattle flat with the disgusting Stinky and the anal-retentive paranoid George, Buddy stumbles from couch to fridge in a life defined by drink, sex and avoiding responsibility. In 4 Buddy's younger brother Butch drops by. In *Neat Stuff* he was tormented and set-upon, but here he represents redneck America, and is positively frightening. 16 is a turning point. Hate goes to colour as Jim Blanchard starts as inker, and given that the slacker culture is itself unknowing self-referential parody, Bagge was smart enough to move Buddy back to New Jersey, as Seattle went global in the real world. The vicious satire of earlier issues is muted somewhat by a return to the suburbs, but Bagge compensates by proving an adroit writer of domestic sit-com.

Bagge's cartoon style is extraordinary. There's a lineage back to Big Daddy Roth, but he's an original, able to convey a startling array of attitudes with a simple style. He's particularly expressive during moments of great stress for his characters. Eyes bulge, mouths rend agape with tongues elongated into spasm, limbs stretch, and bodies contort to comic effect, yet somehow there's a cohesiveness to the whole effect. At its best, which is most issues, *Hate* is a vitriolic dissection of blue-collar culture. Bagge's not unique in exploring suburban indignity and stereotypes, but only *The Simpsons* (to which he must have been an inspiration) hit the target as often, and he can descend to levels not permitted by network TV. Despite omitting Buddy's appalling girlfriend Lisa, 27 is as good a sample as any of the later issues, although holds a greater resonance for those familiar with Stinky. Various of Buddy's acquaintances are involved in a cover-up that complicates his life.

From 26 the page count is increased to permit outside contributions to sit alongside those from already in place Wally Wood influenced Rick Altergot (from 21). His Doofus strips polarise the readership, and sadly, few of the extra contributions stand out. In isolation Ivan Brunetti's gags in 26 horrify, Gilbert Hernandez illustrates some strange quotes in the same issue, and there's a decent Pat Moriarity one pager in 28. In 27 Bagge teams with Robert Crumb for a pointless pop at the blandness of *Cathy* newspaper strips, but his story of meeting Harvey Kurtzman, illustrated by Danny Hellman in 30, is sad and amusing. That issue also has Karl Willis, whose nihilistic strips at least display some imagination and Bagge collaborating with Alan Moore. Tom King and Walt Holocmbe's 'Fascist Cartoonist' in 27 satirises pre-politically correct cartoons, and while some consider Adrian Tomine a major cartoonist, his strip in 28 is a throwaway. Almost all the text pieces are wretchedly self-indulgent. The annuals are the first inessential *Hate*, although not without merit. The first two serve largely as repositories for illustrated essays that would only otherwise be seen by web browsers, all interesting reading, along with short Buddy strips and 10 more pages of comics. 3 is all comics, again with a short Buddy and Lisa strip, and a few one-joke strips about Murry Wilson, father of several Beach Boys. For the bulk of the issue Bagge resurrects his contented suburban couple from Neat Stuff, Chet and Bunny Leeway. They're used for a few gags about the addictive nature of computers and the web, the failure of dot.com companies and how life changes, and skate dangerously close to the cosy domesticity and predictability of syndicated daily strips. These are satirised via 'Dildobert' in the company of Johnny Ryan, incorporating terrorist references that, while not very funny, at least prove Bagge hasn't completely been emasculated.

Any issue of *Hate* can be read without reference to others, but the lifestyle and attitudes depicted will offend some. That shouldn't put you off as all are highly recommended. After the series concluded Fantagraphics issued the *Hate Jamboree*, containing interviews with Bagge and others and plenty of early Bagge strips and illustrations previously only seen by a limited audience.~FP

THE HAUNT OF FEAR

EC: *28 issues (15-17, 4-28) 1950-1954**
Gladstone: *2 issues 1991*
Russ Cochran: *5 issues 1991-1992*
Gemstone: *28 issues 1992-1997**

Published as *Gunfighter* for 1-14, the comic was retitled *Haunt of Fear*, but the eighteenth issue started numbering from 4, so there are two 15-17s, distinguished from their later counterparts by Johnny Craig covers. As with the other EC horror titles, there was some initial fumbling. The stories were categorised into four styles: a psychological study, an adventure in horror, a journey into the supernatural, and a scientific SuspenStory. As was the EC style, each story ends on a twist, usually quite predictable. There was of course the occasional early gem, such as Johnny Craig's 'Nightmare' in the first 17, where a certain 'John Severin' (a little in-joke on his fellow EC artist) allows himself to be immersed in concrete thinking it's just a nightmare. Craig was the most versatile artist on the early issues, and brought a certain film noir look to his stories before departing to edit *The Vault of Horror*. The other mainstays were luminaries such as Graham Ingels, who conveyed a great sense of grotesqueness and signed himself 'Ghastly', Jack Kamen, who couldn't draw anything looking horrible, Jack Davis, whose art had a slightly humorous tendency, and George Evans' nice polished look. When they were joined by the likes of Reed Crandall, Al Feldstein, Bernie Krigstein, Harvey Kurtzman, Joe Orlando and Wally Wood to name a few, there are no artistic complaints.

Within a few issues, the EC terror-tellers (the GhouLatics), the Old Witch, the Vault Keeper and the Crypt Keeper were introducing all the stories, the latter two always advertising their own titles. Perhaps that's why this title initially seemed the poor relation. Nevertheless, once it picked up stride, it equalled the others in quality. EC was the first major publisher to highlight their creators, featuring biographies of their top professionals. All appear to be happily married with families, which is why it's surprising that so many stories centre on marital unbliss. These Haunt of Fear stories prove the statistics claiming that most murders are committed by family members on each other. 'Take Your

Pick' in 14 is a good example, as is Jack Davis' 'Garden Party' in 17, highlighting his macabre sense of humour. Of course stories that predicted undying love also had their place. In fact 22's 'Wish You Were Here' was adapted for the 1972 *Tales from the Crypt* film. That issue also features a witty take on the Snow White fable. The grisly reworking (or perhaps reclamation) of fairy tales was a regular feature of EC horror titles, but its primary home was Haunt of Fear under the banner of 'The Old Witch's Grim Fairy Tale'.

Most material was written by Bill Gaines and Al Feldstein (although Carl Wessler and others contributed to later issues), who were caught out lifting plots from Ray Bradbury short stories. Far from being litigious, though, he enjoyed the comics and allowed the adaptations to continue, with the proviso that he was credited. Two of his stories do particularly stand out, 'The Coffin' in 16, and especially 'The Black Ferris', a time-travelling story in 18. Overall, after a shaky start, this became an entertaining title. After you've read a few the stories become predictable, but that won't stop you from enjoying them. If however you like a lot of gore in your reading, you may be disappointed. It's a myth that the EC horror tales consisted of many ghastly acts of vileness illustrated in detail. The vast majority of the horrific acts were either told off-panel, hinted at, or rendered in a shadowy silhouette – and rightly so – after all, it's up to your sick imagination, dear reader, to fill in the gaps...blood, guts, warts and all!

The Gladstone and Russ Cochran-published issues are reprints, with the Gemstone series exact facsimiles of the original comics, published in chronological order. They're collected four or five issues at a time as annuals, and the rich might afford the luxurious slipcased black and white hardback reprints.~HY

Recommended: 13, 14, 16, 18, 21, 22

HAUNT OF HORROR

Marvel: *Series one 2 issues 1973, series two 5 issues 1974-1975*

Series one was digest reprints of text stories. Fans might be interested in illos by Frank Brunner and Mike Ploog among others, but they're for completists only. Series two was a late entry in Marvel's black and white magazine line, but never achieved the coherency of its companions. The first issue contains text material planned for the unpublished third digest, although it featured two of the best strips of the run: 'In the Shadow of the City', a psychological shocker by Steve Gerber and Vincente Alcazar, and the beautifully drawn 'Rats' by Gerry Conway and Ralph Reese. The remaining issues were dominated by two continuing strips, 'Gabriel The Devil Hunter' and 'Satanna', the devil's daughter. Though neither was particularly inspired, the latter at least had nice artwork by Romero. The strips continued in *Monsters Unleashed* and *Marvel Preview* respectively.~DAR

Recommended: Series two 1

HAUNTED

Charlton: *75 issues 1971-1976 (1-30), 1977-1984 (31-75)*

Another Charlton mystery anthology hosted by a little white ghost occasionally referred to as Poltergeist. There's very little of note in the first thirty issues, with the same pool of contributors that wrote and drew for *Ghost Manor* and *Ghostly Tales* also submitting here. With 21 the title changed to *Baron Weirwulf's Haunted Library*, and the little poltergeist was evicted on the first page of Don Newton's introductory story. The Baron had a run in all of Charlton's mystery titles in a series of one-pagers by Newton called 'Baron Weirwulf's Library', and his popularity earned him this venue. Some of Newton's painted covers are memorable, but financial problems at Charlton resulted first in cancellation, then in revival as *Haunted*, now an all-reprint affair.~SW

THE HAUNTED

Chaos!: *4 issue miniseries 2002, 1 issue ('Gray Matters') 2002*

Four teens, manifesting strange abilities, are told by the mysterious Stitch that their mothers participated in a medical study they thought was for cancer, but which was actually Mr Gray's Gray Cell organisation trying to create children with occult powers. Now that these have manifested themselves, the Gray Cell has come to collect them. Creator, Peter David, expertly dialogues his characters' teen lives around the themes of death and sex, while they exhibit a post-modern understanding of the nature of the horror that surrounds them. Nat Jones' artwork is clear, atmospheric and the whole is well paced. The second miniseries was a victim of the Chaos! bankruptcy, but it would be good to see David finish this elsewhere.~NF

Recommended: 1-4

This Magazine is HAUNTED

Charlton: *5 issues (12-16) 1957-1958*

Named after its grislier pre-Comics Code predecessor this incarnation inherited its numbering from the obscure Zaza the Mystic. Here was the home of Steve Ditko's other shadowy storyteller Doctor Haunt. He insinuated himself into the artwork of the tales he told with at least as much style as The Mysterious Traveler. Unfortunately the stories he narrated were leavened with others by Charlton's incredibly poor creative teams. 12-14 and 16 feature Ditko stories.~SW

HAUNTED LOVE

Charlton: *11 issues 1973-1975*

One of a couple of Gothic romance comics, this was a decent if largely uninspired title mixing lengthy lead strips with short horror back-ups. Tom Sutton and Joe Staton were among those drawing the comic, and Joe Gill was the principal writer.~DAR

The HAUNTED MAN

Dark Horse: *1 issue 2000*

Intended as a three issue miniseries, this is a print version of an online animated series from Gerard Jones and Mark Badger. Jones' script, about a Jewish superhero battling The Daylight Saviour, who steals periods of time (like 1974), is a tedious attempt at being clever, while Badger's three-dimensional effects simply don't work on paper.~NF

HAVEN

DC: *One-shot ('JLA/Haven: Arrival') 2001, 9 issue limited series ('The Broken City') 2002, one-shot (JLA/Haven: 'Anathema') 2002*

Haven is an alien city spaceship, many of whose occupants have superpowers, which crash lands on Earth. 'Arrival' chronicles the crash as the JLA and members of the ship's Alliance attempt to save the lives of those in its path and stop it falling into the Pacific. 'Broken City' begins with battles between the JLA, Alliance and prisoners of Haven, who escaped during the crash. President Luthor assigns an Ambassador to the city and arranges for aid to be supplied, while Siv, Katalia, Nia, Valadin, Ivas and Mavaar, amongst others, interact with their new, human neighbours. They also have to discover who sabotaged Haven, before the traitor alerts Anathema, from whom they were fleeing. 'Anathema', naturally, covers what happens when she catches Haven and threatens the whole world. Writers Ashley-Jayne Nicolaus and Matthew P. Schuster create a varied set of characters, but are somewhat constrained by the length of the series, which necessarily concentrates of a relatively small number of heroes. Still, it's enhanced by crisp artwork from Ariel Olivetti, whose Moebius and European influences add to the otherworldly atmosphere. It remains to be seen whether other DC writers take the opportunity to embrace the inhabitants of Haven.~NF

HAVOC INC.

Gently humorous funny-animal science fiction misadventures of Chester and Chris, rogues in the Han Solo mold, and their perpetual hunt for The Big Score. Lightweight, but well executed.~WW

HAWAIIAN DICK

Image: *1 issue + 2002 to date*

So far decent first outing for down at heel private investigator Byrd, with the setting adding to the exotic nature for most. He's a sort of 1950s Hawaiian Rockford, hired to find a missing car.~FP

HAWK AND ANIMAL

Antarctic: *2 issues 1999*

Former WWF wrestlers Hawk and Animal are turned into superheroes for this worthless atrocity. In the introduction to 1 we are told that the comic's "stories are focused on educating the readers about the human body." Sadly it looks as if the (wisely) uncredited artists of *Hawk and Animal* have yet to benefit from any of this much-needed tuition.~AL

THE HAWK AND THE DOVE

DC: *Series one 6 issues 1968-1969, 5 issue miniseries 1988-1989, series two 28 issues, 2 Annuals 1989-1991*

Teenage brothers Hank and Don Hall were granted magnified athletic prowess and costumes that appeared by magic. This was courtesy of a mysterious voice in Showcase 75, where they débuted. Hank's belligerent temperament and Don's fervent pacifism determined their transformations into the Hawk and the Dove. The Hall brothers' constant arguing for or against violence and their subsequent styles of crimefighting provided the dramatic tension. Their father's career as a judge and their life at college in the late 1960s provided the criminals and crazies they fought. Created by Steve Ditko with scripts by Steve Skeates, the balance of allegory and drama didn't survive when Gil Kane took over the art with 3. It's interesting to note that the hippie killed at the beginning of 4, Warren Savin, bore Steve Skeates' pen-name from his days at Tower and Charlton. Perhaps this suicide signalled Kane's takeover of the writing with 5.

After the demise of his brother in *Crisis on Infinite Earths*, Hawk lost his sense of moral balance, becoming an increasingly unstable and violent loose cannon. In the 1988 miniseries, admirably illustrated by Rob Liefeld back when he could draw, Karl and Barbara Kesel rectified this by providing a new Dove, a female representative of the force of Order, to counterbalance him. Three potential candidates for Dove's identity were offered, and a fun aspects of a fairly grim storyline is trying to follow the clues to determine who the new Dove is. An unexpected hit, an ongoing title arrived, still written by the Kesels, with very much the same style: flashes of humour, warmth and human concern, set against some quite grisly crimes, now illustrated mainly by Greg Guler. An ill-advised foray into mysticism (15-17) revealed the true relationship of Hawk and Dove to the forces of Chaos & Order, and gave new aspects to their powers. Guest appearances by the Creeper (18-19) and the Female Furies of Apokolips (21) were the highspot, fun, frenzied and flippant. Shortly thereafter, the title lost its way, and, in what most readers remain convinced was a last-minute notion, the events of 1991's *Armageddon 2001* crossover closed the book on this series in a singularly inappropriate and dismissive manner.~SW/HS

Recommended: Series one 2, miniseries 1-5, series two 18-21

THE HAWK AND THE DOVE

DC: *5 issue miniseries 1997-1998*

In late 1997, The Hawk and The Dove names were pasted onto a new and unrelated pair of characters. USAF officer Sasha Martens and grunge rocker Wiley Wolverman became the new Hawk and Dove, with enhanced strength, wings, talons, sonic screams, and a quasi-romantic rapport that may be more than just chemistry. An adequate, if banal, genetic-manipulation origin is given for the pair, but attempts (one suspects last-minute attempts) to tie it into the Genesis miniseries look forced and clumsy. Mike Baron's script overburdens the plot with far too may unemployed characters (Vigilante, Vixen, Suicide Squad) and while Dean Zachary's pencils are attractive, they're not remarkable enough to stop the whole thing from being a bit of a dodo.~HS

HAWKEYE

Marvel: *4 issue miniseries 1983*, 4 issue miniseries 1994, one-shot 1998*

Writer Mark Gruenwald stretches out on a rare yet very acceptable pencilling outing. Hawkeye takes a break from the Avengers in this competent superhero fare, which is slightly degraded by an oddball assortment of antagonists. Check out the last page of the final issue for a genuine surprise ending. Between the first and second series Hawkeye had a long run in *Solo Avengers* (later *Avengers Spotlight*). The second series, by Chuck Dixon and Scott Kolins, embroils the ace archer in a rites-of-passage drama as he struggles to come to terms with a singularly tragic occurrence. The pacing is questionable. Writing off supporting characters built up by issue 2 is an unwelcome lurch in a four-issue series. Inferior to the first take. The double sized one-shot pits Hawkeye and his protege reserve Avengers Justice and Firestar against an assembly of second string villains in a run of the mill plot by Tom DeFalco, routinely pencilled by many hands.~APS

HAWKMAN

DC: *Series one 27 issues 1964-1968, 4 issue miniseries ('Shadow War of...'), 1985, series two 17 issues, 1 special 1986-1987, series three 33 issues 1993-1996, 3 issue miniseries (Legend of the Hawkman) 2000, series four 9 issues +, 1 Secret Files 2002 to date*

Following their reworking from the 1940s characters in *The Brave and the Bold* 34-36, and continuing in 42-44 and a bizarre stint sharing *Mystery in Space* 87-90 with Adam Strange, Katar Hol and his wife were finally given their own title in 1964. Winged police officers of the planet Thanagar, they continued their fight against crime on Earth, posing as Carter and Shayera Hall, curators of the Midway City Museum. The collection of ancient weapons there proved very useful for their style of law enforcement. High points of the first run include the debut of Zatanna, itinerant female magician in 4, the return of the Shadow Thief in 5, the flying gorillas of 6, Ira Quimby and his I.Q. gang in 7, the Viking Queen in 13 and the criminal organisation C.A.W. in 14. Fans of the editorial team of Gardner Fox (writer), Murphy Anderson (artist) and editor Julie Schwartz will be delighted by the first sixteen issues. Anderson's meticulous art style and Fox's obvious enjoyment of scripting a married crime-fighting duo only started to tail off when the size of the original artwork was altered in 1967. This resulted in fewer panels per page and continued stories, something that didn't suit Fox's style at all. The art and story in 22-27 was ugly and feeble. The title was merged with *Atom* from 39 of that series to become *Atom and Hawkman*.

The second series continued directly from *The Shadow War of Hawkman* miniseries, in which Hawkman and Hawkwoman fight their fellow Thanagarians who seek to take over the Earth. This remains an ongoing plot. The rapport between the Hawks is interesting, detailed and quite realistic. Many of the stars of the original *Hawkman* series make welcome returns, in particular the villainous Shadow Thief and the Gentleman Ghost, who becomes a companion to the Hawks. The 'Shadow War' finally climaxes in 10 with the aid of Superman. The best issues of this run are 16-17 concentrating on the couple's relationship and the final fate of the Gentleman Ghost.

The commercially successful, though loudly criticised, revisionist *Hawkworld* series bridged the second and third *Hawkman* runs, and the first issues of series three follow closely from the conclusion of *Hawkworld*. Written by John Ostrander (until 7), readers are kept guessing as to who the latest incarnation of the character is. Once this has been established the plot concerns what happened to Hawkwoman. Both plots intrigue and keep up the suspense. 9-12 feature the 'Godspawn' storyline, the centerpiece of which is a well choreographed battle between two Hawkmen. One of the best ideas in this series is the interaction of the Hawkman with other DC superheroes. 'Eyes Of The Hawk' features the Justice League, Wonder Woman and Aquaman, and 22-23 are chapters of the crossover 'Way of the Warrior', which is linked with

Guy Gardner comics and the *Justice League*. 24 and 25 have the welcome return of Lionmane, a nemesis from the first series, and feature a real insight into Hawkman's character. The concluding story in 31-33 is 'Hunter, Hunted, Prey!', which is simple and effective fast moving heroic action. William Messner-Loebs wrote from 9, and he's particularly effective in explaining the pressure that exists in the life of a superhero. The art varies widely due to a large number artists, although Steve Lieber is responsible for the largest amount of issues. Unfortunately at this stage his art lacks detail and he has particular trouble drawing realistic looking faces.

The 2000 miniseries is an adventure featuring Katar and Shayera as they were in the 1960s, just after their run in *The Brave and the Bold* – although there's no trace of Mavis Trent thankfully! Ben Raab's unprepossessing writing adequately clothes a plot encompassing Thangarian Gods and relics, and Superman, whilst Michael Lark's capacious depictions of cities, shrines and spaceports are inhabited by anodyne figures with little life. The story is excellently told by Lark nonetheless and Lee Loughridge's colour work plays a key role.

After the Hawks were nullified in *Zero Hour*, the DC Universe was without a Hawkman or Hawkwoman for some time. A new incarnation of Hawkgirl (Kendra Saunders, grand-niece of the 1940's heroine) was introduced as a member of the JSA's 1999 relaunch. 24-26 of that series, débuted the new Hawkman, a smoother remix of the old versions with no problem integrating his various memories, was returned to activity, and launched into a fourth eponymous title shortly thereafter. Harking back to the first versions of the characters in 1940's *Flash Comics*, the pair are now established, in all their previous manifestations, as avatars of an ancient Egyptian prince and princess. They were slain by a high priest and destined to be reborn and fall in love time after time until their karmic balance is regained. Now based in the city of St.Roch, the Hawks are exploring the boundaries of their relationship. The twist is that due to an irregularity in the reincarnation process, this version of Hawkgirl isn't automatically in love with him, and isn't at all sure she even wants to know! The theme of reincarnation worked confusingly against the previous version of the character, but is being skilfully played here by writers Geoff Johns and James Robinson. There are frequent, but not excessive, flashbacks to earlier embodiments of the pair, including some familiar faces from more obscure recesses of the DC universe. Rags Morales' art has a power and fluidity unseen in his previous pleasing, but unexceptional, work, and the story so far, while not yet having truly hit its mark, is very promising indeed.~SW / HS

Recommended: Series one 4-6, 12-14, series two 16-17

HAWKMOON

First: *4 issue miniseries ('The Jewel in the Skull') 1986*, 4 issue miniseries ('The Mad God's Amulet') 1987, 4 issue miniseries ('The Sword of the Dawn') 1987, 4 issue miniseries ('The Runestaff') 1988*

Adaptations of Michael Moorcock's *Runestaff* novels. Dorian Hawkmoon is the last hope of an embattled post-Apocalyptic Europe as the Evil Empire of Granbretan consolidates its hold on the defeated continent. When a mind eating black jewel is embedded in his skull it becomes a race against time to gather allies and the mystic weapons The Mad God's Amulet, The Sword of the Dawn and the Runestaff needed to liberate humanity. Gerry Conway and Roger Salick script and Rafael Kayanan illustrates a competent if uninspired yarn of fantasy and high adventure.~WW

HAWKSHAWS

Image: *1 issue 2000*

The black and white artwork looks like it's been shot from coloured plates, making it difficult to read in places, and no-one bothered to proofread the script. Apart from that, this could have been an interesting murder mystery, set in a future Hollywood where guns are rare. Unfortunately, only the first issue was published.~NF

HAWKWORLD

DC: *3 issue miniseries 1989, 32 issues, 3 Annuals 1990-1993*

The miniseries is a drastic retelling of Hawkman's origin that has Katar Hol fall victim to an imperialistic, racist government and commit patricide and murder (albeit during a period of drug detoxification); it includes two Shayera Thals. Tim Truman's script is terse, but full of outrage at the treatment of races conquered by Thanagar, forced to live as slaves or outcasts while the Thanagarians themselves live off their labours. His artwork's harder edges are muted by Alcatena and there is a clear debt (acknowledged) to Joe Kubert.

The regular series, written by Truman and John Ostrander and pencilled by Graham Nolan, picks up from the miniseries with Shayera and Katar on Earth to assist the Thanagarian Ambassador mount an exhibit at a Chicago museum. There they must face the plots of Byth, whom Katar has forced into exile at the end of the miniseries. Shayera has an affair with a Chicago cop and struggles to keep up with Katar's increasingly liberal views. Their seemingly irreconcilable differences do much to keep the title interesting, as each has so much to learn about the other. With Byth captured (9), Truman departs and Shayera spends time back on Thanagar and learns about her past, getting involved again in the injustices still being perpetrated by the government (10-14), while Katar is courted by Mavis Trent. 15 and 16 are 'War of the Gods' crossovers, while 17-19 feature Attila, the vengeful robotic creation of a race destroyed by Thanagar. 'Escape From Thanagar' in 21-25 sees Katar and Shayera aid refugees from Thanagar seeking sanctuary on Earth. In helping them, they are themselves exiled. The final storyline, 'Flight's End', is in two parts. The first, drawn by Jan Duursema, ends in a battle with the original Hawkman, while Tim Truman pencils the final half, which sees the Thanagarian refugees established in their own Netherworld in Chicago but under the influence of Viper, who has apparently killed both Katar and Shayera. This story concludes in the disappointing 1993 Hawkman series. The 1990 annual is a continuity implant featuring two Flashes and revealing how there was a Hawkman on Earth during the 1940s, and Attila returns for the second annual. The third, in 1992, is an *Eclipso:* T'he Darkness Within' crossover. Overall, a better version of Hawkman than any since and certainly a better idea than the preceding 'Shadow War' story-line.~NF

Recommended: Miniseries 1-3, 1-4

HAYWIRE

DC: *13 issues 1988-1989*

If you're into action, mayhem, blood and guts, double identities, betrayal, Y-fronts and kinky villains look no further than this underrated series from writer Michael Fleisher and penciller Vince Giarrano. As the title implies, this was an all-action affair, involving super-psionic armour that gave its unknowing owner many powers. Originally corporate-controlled, Haywire breaks loose and subsequently has to fight agents of his former employers and those of rival organisations with an interest in the armour. They include a beautiful ninja character, White Lotus, who provides the love interest, and Nightlash, a leather-clad S&M villainess who provides... er... something else, especially with her all-powerful whip (be still, your beating heart). Fleisher keeps the readers coming back for more and Giarrano displays a fine artistic talent. It's a shame there's been no follow-up. We never did find out what happened to Nightlash... ~HY

HAZARD

Image: *7 issues 1996-1997*

Hazard's an enhanced human pumped full of nanotechs (that's little tiny machines that do the work of cells, to you and me) that give him superhuman powers. Unfortunately, without a computer to control them they'll also start reproducing at an alarming rate. A bounty hunter by trade, Hazard is souped up by the villainous Dr D'Oro, who wants him to assassinate Stormwatch's Weatherman 1. He escapes, but has just two weeks to find Dr D'Oro before his body starts eating itself up. Jeff Mariotte's plot is certainly contemporary. Roy Allan Martinez's angular, sub-Miller art has colour slimed all over it by computer, but is robust enough to stand this treatment. Entirely average chase book, hastily concluded in issue 7 after Hazard finds out he's not actually going to explode when the nanotechs inside him go haywire, and sets off to find out why.~FJ

HE IS JUST A RAT

Exclaim! Brand: *5 issues 1995-1997*

The rat lives in scuzzy surroundings in a scuzzy town prone to happenings like invasions by drag-racing monkeys. His attitude ranges from surly to aggressive and few survive any meeting with him intact. All he wants, though, is to be left alone. The relentless nihilism of Tony Walsh's strip becomes tiresome after more than a single issue, but the cartooning is good and there is an appeal as proved by the rat's eight year plus career in a Canadian magazine. The comics are not now easily found, but the rat is located at www.secretlair.com/ratboy.~FP

HEADBUSTER

Antarctic: *1 issue 1998*

Think poorly drawn corporate Punisher. Then find something else to read.~WJ

HEADLIGHTS

Personality: *1 issue 1992*

When among the earliest lines in a comic you get "Someone wanted her for a superpowered lackey. They kidnapped her and installed headlights on her breasts" you've every right to expect a laugh-fest. Sadly, though, beyond the hilarious initial concept this runs out of steam quickly and even begins taking itself seriously. Very disappointing.~FP

HEADHUNTERS

Image: *3 issues 1997*

Chris Marrinan the artist delivers a bunch of stylish, if not always anatomically correct characters and scenarios, while the contribution of Chris Marrinan the writer is a bunch of clichés from every action film he's ever seen and every superhero comic he's ever read. Utterly unconvincing dialogue weighs the comic into premature cancellation and the bargain boxes.~FP

HEADMAN

Innovation: *One-shot 1990*

In the future criminals are punished by having their heads removed and sent to the penal colony in space. John Mann, framed for the murder of the US President, discovers that the Reds have been planning to conquer the Free World from space and has to thwart the plot and clear his name. More brainless than headless.~WW

THE HEAP

Skywald: *1 issue 1971*

Continuing the adventures of Skywald's muck-monster from their Warren-wannabe Psycho and Nightmare black and white magazines, this full-colour limp schlock shocker is notable only for a rather nice Kinstler reprint from *Strange Worlds* 8.~HS

HEART OF EMPIRE

Dark Horse: *9 issue limited series 1999**

The long-awaited sequel to *The Adventures of Luther Arkwright*. Twenty-three years later daughter, Victoria takes a central role after her mother, Anne, is beset by constant plots against her iron rule. Her father, Luther, is missing, presumed dead and her brother has been assassinated. While Victoria struggles to cope with constant headaches, she meets old friends and a new, oddly familiar one in Gabriel Shelley, spokesman for the Levellers. Meanwhile, at the centre of the alternate histories, Rose Wylde is called upon to help prevent the end of existence, scheduled for the upcoming Victory Day anniversary in Victoria's reality.

Bryan Talbot has exceeded all expectations, from the strength of line and composition in his artwork to the wealth of detail in his dialogue, pacing and narrative (though some acknowledgement is also required for the rich colouring of Angus McKie). The complex plot reveals many surprises, but apart from the thrilling adventure, *Heart of Empire* blends comedy, social and political satire, romance and fantasy to create a compelling experience that you won't want to end.

For anyone interested in the background to the series, as an alternative to the collection a CD-Rom is also available. It includes high resolution images of the comic pages with annotations, features on the creative process, biographies and several interviews with Talbot – highly entertaining and educational to boot.~NF

HEART THROBS

Quality: *47 issues 1949- 1957*
DC: *99 issues (48-146) 1957-1972*
DC/Vertigo: *4 issue miniseries 1999*

One of the handful of titles DC continued publishing when they bought the defunct Quality line in 1947. The Quality issues are distinguished by very verbose scripts and a tendency to focus on marital or near-marital misunderstandings, with an emphasis on 'good girl' art as supplied by Bill Ward and Gill Fox or their imitators. With 47, the first under the DC banner, the title was retained, but the emphasis changed to conform to DC romance style. The heroines were younger, and stories focussed on first loves, dating triangles and so on. This continued until 1972 with only hairstyles, hemlines and a downslide in the quality of contributors indicating the passing of time, as established talents moved on and the stories were passed to neophytes. 102-123 feature a serial '3 Girls – Their Lives and Loves', obviously intended to ensure a continuing readership a la TV soaps. The title changed to *Love Stories* with 147.

In 1999 DC's 'Mature readers' imprint, Vertigo offered a new spin on the old title. It offered a stellar roster of talent, including Brian Azzarello (2), Timothy Bradstreet (2), Richard Corben (3), Steve Gerber (4), and Daniel Zezelj (4). Each issue presented one outstanding story (Ilya and Frank Quitely's 'Romancing The Stone' in 2; Peter Milligan and Eduardo Rizzo's 'Death of a Romantic' in 3; Bob Fingerman and Pat McEown's 'Kissin' Cousin' in 4.), plus a couple of 'almost theres'. But the first issue is the one to treasure. There's Brian Bolland's long-deferred return to comics with the bitter fairytale 'The Princess and the Frog', Robert Rodi and Phil Jimenez's 'Genes & A T-Shirt', in which a gay man struggles to find true love with the opposite sex, and the disturbing 'Diagnosis' by Steven T. Seagle and Tim Sale. Wry, insightful, winning and unnerving, it set a standard that subsequent issues couldn't quite match. Sadly, sales do not seem to have warranted a further series.~HS

HEARTBREAK COMICS

Last Gasp: *One-shot 1984*
Eclipse: *One-shot 1988*

The nominal star of this book is Laszlo, the great Slavic lover, but it's his affair with Lena Fleming, wife of Reid Fleming, that provides the plot and slapstick action as Laszlo winds up in jail with the maniacal milkman. The original strip appeared in the Vancouver underground paper *The Georgia Straight*. David Boswell re-drew the stories in 1984 and they were published in magazine format by Last Gasp. The Eclipse edition is on better paper as part of their graphic album series. Though Reid Fleming doesn't play a great part in *Heartbreak Comics*, it is his sociopathic behaviour, compared and contrasted with Laszlo's, that provides most of the story's humour. David Boswell is one of the most under-appreciated of all cartoonists and it's easy to see from the detail in his work why so little has been published. *Heartbreak Comics* is a seminal work which all lovers of the medium should read.~NF

HEARTBREAKERS

Dark Horse: *4 issue miniseries 1996*
Image: *2 digests 1998-1999*

There's a complex back-story to *Heartbreakers*, resulting from previous appearances in *Dark Horse Presents* (50-52, 100), which is collected as 'Bust Out', but don't let that bother you and step right into the shoot-out starting the first issue. The lead characters are two clones of a now dead bio-geneticist, each reflecting aspects of her personality. Vector has the scientific mind and Queenie is aggressive and adaptable, which is just as well since there's a corporation on their tails wanting to study the remnants of their creator's work. There's also a growing movement to remove the second-class status accorded clones on Earth. Anina Bennett and Paul Guinan weave a tautly plotted and absorbing tale, while Guinan's art is extremely appealing. His storytelling is compact, expressively portraying the characters without resorting to exploitation or exaggeration, and such is the dominance of his style that Lenin Delsol pencilling the final two issues from layouts meshes seamlessly. Fast-paced and engaging, shame on Dark Horse for letting this sit on the shelf for years.

The digests are fun, but move the feature more into comedy action, and it just doesn't work as well, although other creators drawing stories means some lovely Steve Leialoha art in the second. There are feature and puzzle pages, a 1940s style origin, and those who preferred the characters for themselves rather than the skeletons for a plot will enjoy the digests~FP

HEAVEN SWORD & DRAGON SABRE

Comics One: *1 volume + 2002 to date*

Kung-fu appears the comic orhodoxy in Hong-Kong, and this example was published there and drawn by former Jademan artist Wing Shing Ma, collecting the first four issues, with more planned. Comparisons with Jademan are inevitable, as this follows the same action template with the characters' kung-fu serving more in the way of super powers, and the status quo shifting each chapter. The nominal plot concerns Wu Tang Clan member Jay Shan searching for the murderer of one of his six brothers, and the dragon sabre of the title being taken by a brute of a man. By the end, though, this is already shifting towards a generational saga. If you can't get enough kung-fu comics this will appeal, but despite the good art, there's little new otherwise.~WJ

HEAVY Tragi COMICS

Print Mint: *1 issue 1969*

An early graphic-oriented offering from the great Greg Irons. Always pretty to look at, if occasionally brutal, this is a little short on narrative for most contemporary tastes.~DAR

HEAVY LIQUID

DC/Vertigo: *5 issue miniseries 1999-2000*

Paul Pope has long been one of comics' most mercurial talents, and this is once again an exciting and innovative strip. It stars ex-cop 'S', a cross between Phillip Marlowe and Iggy Pop, and the story revolves around his search for a long-lost lover and a (sort of) drug-deal gone bad in the late 21st Century. Comic strips have often wrongly been compared to cinema, but for once that analogy is spot-on; this strip really moves! It is essentially one long chase, as various terrorists, secret agents and girl gangs pursue 'S' across two continents, but Pope's gift for dialogue and characterisation also imbues the feature with real depth. Throw in all manner of off-kilter art references and an elegiac twist in the tail and you have one of Pope's finest works.~DAR

HEAVY METAL

HM Communications: *137 issues, 8 Specials 1977-1992*
Metal Mammoth: *65 issues +, 22 Specials 1992 to date*

Heavy Metal came into being when the editors of *National Lampoon* chanced upon *Metal Hurlant*, the flagship magazine of a group of radical French cartoonists calling themselves *Les Humanoides Associés* (Druillet, Dionnet, Moebius and Farkas). Initially, under founder editors Sean Kelly and Valerie Marchant, the magazine was content to translate French strips, and since *Metal Hurlant* had begun in 1975 there was a body of work to fall back on. Home-grown product was gradually added. The magazine started as a glossy monthly and its 'adult' persona was defined from the beginning by a choice of contributors whose science fiction and fantasy strips offered plenty of sex and violence. Though it was rarely particularly explicit, a large number of topless and naked women in the title appear to have been a priority, whatever the editorial incarnation.

For the first three years the editorial policy was to offer a mixture of short episodes of long stories, short, stand alone pieces and illustrated text stories. The best strips from this period are the French translations, of which there was almost an embarrassment of riches: Moebius' 'Arzach', 'The Long Tomorrow' and 'The Airtight Garage of Jerry Cornelius' (the latter in two-page episodes from 1-37); Lob and Pichard's 'Ulysses'; Jean-Claude Forest's 'Barbarella'; and Bilal shorts and 'Exterminator 17'. Unusually Serge Clerc's 'Captain Future' was printed complete in 27, setting a trend. Translations of Druillet's extraordinary space stories (mostly shorts but also 'Gael') appeared alongside Dionnet and Gal's 'Conquering Armies' (1-10), Picaret and Tardi's 'Polonius' (5-8) and single pages by the politically-minded Chantal Montellier.

Meanwhile American contributors were being encouraged. *Heavy Metal* became a home for Richard Corben ('Den', 1-13, 'The New Adventures of the Arabian Nights', 15-28, written by Jan Strnad, then 'Rowlff', 'The Beast Of Wolfton', 'Bloodstar' and 'Den II', taking us up to 72). He still occasionally contributes, with 'Fur Trade' in January 1998. Other regular US contributors in the early years include Vaughn Bodé, E.E. Davis (with a Frazetta-ish barbarian tale in 3-8), Gray Morrow ('Orion' and 'Amora'), Angus McKie ('So Beautiful And So Dangerous', collected), plus Trina Robbins and the young Steve Bissette and Rick Veitch. Howard Chaykin did some of his most experimental work here, making a brave if failed stab at adapting Samuel Delany's complex novella about the power of communications, 'Empire', into comics form, and having more success with Theodore Sturgeon's seminal *The Stars My Destination*. So did Walt Simonson, illustrating Archie Goodwin's adaptation of *Alien*. Oddities worth mentioning are Alex Niño's spot illustrations for Doug Moench's version of Sturgeon's *More Than Human* (collected) and the amazing psychedelia of Marshall Rogers drawing Mark Arnold's sexy script for 'Entropics' (26).

With 35 (Jan 1980) Ted White became editor, introducing regular columns on comics, science fiction, music and film. While neither long nor particularly good, they added to a reputation as more of a gentleman's read than a mere comic, the same trick Playboy had pulled in the 1970s. A year later Leonard Mogel took over and replaced the named columns with 'Dossier' (in 51), a freeform arts column that also included interviews. Finally Julie Simmons-Lynch became editor in December 1981 and settled in for an eleven-year stretch.

Initially little changed under Ted White. There was still prose (by the likes of Norman Spinrad, Arthur Byron Cover, Harlan Ellison and Stephen King) and the usual mix of American and European strips, with new translated creators filtering in providing a high-quality backbone. These included short stories by Dick Matena (35, 36, 45, 60, 74, 82), the Schuiten Brothers (36, 39, 45), Caza, Trillo and Breccia's 'Mr Valdemar' in 67, Magnus (48), Gillon (58) and Paringaux and Loustal (58). Alongside these were longer pieces: 'Cymbiola' by the Schuiten Brothers (56-64) paving the way for their 'Hidden Cities' sagas; the excellent if rather poorly translated Christin and Bilal strips 'Progress' (40-44), 'The Voyage Of Those Forgotten' (62-68), 'The City That Didn't Exist' (72-78) and 'The Hunting Party' (87-96), all collected, as well as Bilal's own 'Gods In Chaos' (as 'The Immortals' Party' (50-57) and Christin's popular collaboration with

Mezieres, 'Valerian: Ambassador of the Shadows' (46-49). Heavy Metal also introduced the work of Crepax to America ('Valentina: Reflections' in 45-51) and serialised his moody jazz drama The Man From Harlem, as well as continuing to print work by the founders of Metal Hurlant. Druillet's 'Salammbo' (41, 42, 47, 48) and 'Salammbo II: Carthage' (83-90) appeared along with his 'Yragael' (61-70). Moebius' mindbending collaboration with avant-garde film-maker Jodorowsky, 'The Incal', appeared in 59-65 and 82-87.

You may wonder why *Heavy Metal* isn't the best regarded comic in the world. This is because readers also had to put up with a number of tedious, long-running series like Godard and Ribera's 'Alchemist Supreme' and 'What Is Reality, Papa?', and Fernando Fernandez' 'Zora', which seemed to go on forever but actually only lasted two years (59-78). And then there were the innumerable contributions from Jeronaton. Technically better, but also interminable was Segrelles' 'Mercenary' series (55-62) and Barriero and Juan Gimenez' 'Good-bye Soldier' (49). Also there were few great works by American contributors in this period. Matt Howarth makes an appearance in 35 before beginning his science fiction epic 'Changes' (which introduced *Those Annoying Post Brothers*) in 36. Berni Wrightson's comic 'Captain Sternn' in 39, Jeff Jones' 'Yesterday's Lily', Chaykin's 'Cody Starbuck', Arthur Suydam's 'Mudwogs' and Bruce Jones and Wrightson's 'Freak Show' (65-70) are bursts of creativity, but these have to be weighed up against incredibly long-running duds like Rod Kierkegaard Jr's 'Rock Opera' (34-105). John Findley's grotesque Western 'Tex Arcana' (48-105, with odd issue gaps), ties with Steranko's dire 'Outland' (51-58) for stiffest load of nonsense in the entire run. Fortunately Elaine Lee and Mike Kaluta's groundbreaking 'Starstruck' (68-76) and 'Robot Love' from Charles Burns (70) suggested a new generation of creators to come.

76 was the start of an attempt to free the title from a rut, with the serialisation of Tamburini and Liberatore's 'RanXerox'. Just as a radical movement in French cartooning had produced Metal Hurlant, now Italy's Young Turks were ready to inject some life into the genre. With its high quotient of sex and violence, and a disregard for morality, 'RanXerox' was youthful and rebellious, unlike the rather tired hippy values of many of the strips (though it seemed less fresh by the time of Ranx 3 in September 1997). Charles Burns' weird wrestling detective 'El Borbah' (77, 84-87, 94-99) and Drew Friedman's irreverent cinema strips completed the reformation. By 1984 *Heavy Metal* was attracting interviews with the likes of Roger Corman, John Sayles, John Waters and Federico Fellini. The Schuiten brothers were among the old guard still translated, while 77-81 had Arno and Jodorowsky, Crepax was in 80-85, and Manara's 'An Author in Search of Six Characters' featured in 93-99. They were supplemented by Liberatore (76-86, 94), Pepe Moreno's bold, violent 'Rebel', and stylists like Yves Chaland ('Atomax' in 91 and the excellent 'Elephant Cemetery' in 99-104). Daniel Torres ('Triton' in 92-95 and 'The Whisper Mystery' in 98-102) and the master of clear line, Joost Swarte (81, 92, 93, 101), were also notable among the new blood.

As issue 100 approached the title was in trouble again. From 99 it was no longer printed on glossy paper, and with 106 frequency was reduced to quarterly, at which point issue numbers no longer appeared, and publication cover dates are used for identification. Citing reader frustration over the time it took to complete some stories' serialisation (and on a quarterly schedule this time would be even longer), a new editorial direction promised all-new stories, complete in each issue. With minor variations, this policy has been pursued ever since, one long story backed up by a greater or smaller number of shorts. All non-story pages were dropped, as was the long-running surreal cartoon series 'The Bus' by Paul Kirchner, collected, which had been appearing in an editorial capacity since 30. However, the changes were also the nail in 'Rock Opera's' coffin, proving that every cloud has a silver lining. The quarterly schedule continued until March 1989, when an upturn in sales enabled the title to return to a bi-monthly schedule with no change in format.

Thereafter until Metal Mammoth took over publication, *Heavy Metal* published a lot of excellent material, maintaining the principle of running European strips in translation, and although many of the full-length stories do not warrant individual recommendation it was a good period for the magazine. The big stars of the show were: Hugo Pratt (Winter 1986), Sampayo and Solano-Lopez (Spring 1986), Prado, Bilal ('The Woman Trap', Fall 1986), Yves Chaland (Freddy Lombard in Fall 1987), Torres, Manara, Ruben and Zentner (Summer 1988), Crepax (Fall 1988), Peeters and Schuiten ('Utopias', Winter 1989) plus the Schuiten Brothers ('The Hollow Planet', May 1989, and 'Nogegon', July 1991), Hermann ('Revenge', September 1989, and 'The Towers of Bois-Maury', July 1990), Tronchet and Gelli (January 1992) and Milan Trenc ('Morocco', March 1992). In addition there was Adamov and Cothias' epic five graphic-novel adventure, 'The Waters of Dead Moon' (May 1990, September 1990, May 1991, September 1991, September 1992).

The new format suited a series of short graphic novels such as 'Hombre' by Segura and Ortiz (set in a post-holocaust world similar to Hermann's Survivors series), nine episodes of which appeared between Fall 1986 and September 1998, 'Druuna' by Eleuteri Serpieri (big-breasted sci-fi epic, very well drawn), 'Burton And Cyb', also by Segura and Ortiz, a comedy science-fiction series (fourteen episodes between Summer 1988 and March 1997), and 'Dieter Lumpen' by Pellejero and Zentner, an excellent Hugo Pratt-inspired hard-boiled detective strip (seven episodes 1987-1990). Look out particularly for the Summer 1988 issue, all about censorship and civil rights, after the previous issue had been seized by Canadian customs officials because of the 'Druuna' story. With work from Breccia, Segura and Ortiz, Manara, a Serpieri Western, Prado, Ruben, Zentner, Will Eisner and Yves Chaland, it has a well-drawn and nicely written something for everyone.

When *Heavy Metal* was acquired by Metal Mammoth there were immediate changes, including the addition of a short-lived Striptease slot, a collection of single-page strips by the likes of Mark Martin, Peter Kuper, Kaz, Scott Cunningham, Eric Drooker and Jim Woodring. It's not entirely out of place, but the cartoonists chosen owe more to the underground than to any science-fiction and fantasy background. New owner Kevin Eastman waited until January 1993 before taking on the reins of editorship himself, and started introducing new creators. While some of the material is worth unearthing (Ian Edginton and Matt Brooker's 'Kingdom of the Wicked' springs to mind) most of it isn't. 1993 saw more 'Hombre' stories and lots of Prado shorts, a late, episodic reprinting of Vittorio Giardino's *Little Ego* in the March 1993 issue (already published by Catalan for several years, and distinctly unsexy) plus the return of Den. There are oddities like Turf and Joel Mouclier's 'Ramparts of Spray', in which the softness of Art Suydam meets the rotund cuteness of Mike Ploog for a strange fantasy in a Mark Twain riverboat setting. May 1993 has Antonio Segura and Ana Mirallés' 'Eva Medusa', a stylish noir tale set on a steamy supernatural plantation in South America, and in July 1993 there was Duranoña's atypical 'Hiding', set in 1930s America, about a shoot-out between police and a family of gangsters. Remembering the appeal of Liberatore, and figuring that his work's still rebel-rousing, Heavy Metal began printing creators of strips in a similar vein (Stan & Vince's 'Eden' in November 1993 and later with The Imploder in July 2000 and 'The Bomb' in January 2002, Siro's 'Master Volume' in March 1994 and 1995, and Gess' 'Teddy Bear' in January 1995, May 1997 and September 2000). There was better material from Alfonso Azpiri, Matthias Schultheiss and Font (especially his hard-boiled 'For Private Eyes' in the November issue). Burton and Cyb returned in 1994 (and several times since), and Tronchet and Gelli contributed a Raoul Fleetfoot story, 'Killer Death', to the January issue. Highlights of the year, though, were Baudoin's 'The 11.23 Bus', and Fernando de Felipe's 'The Man Who Laughs', which looks like Jack Davis meets Berni Wrightson. De Felipe would return with 'Museum' 1995-1996 and 'Black Deker', November 1995 and March 1998.

The next few years settle into a pattern of regular contributions from Caza, Azpiri, Ortiz & Segura, Prado, Risso & Barriero, and Schultheiss, and each new volume from Manara (Gullivera, July 1997, 'To See the Stars Again', July 1998) and Serpieri (Mandragora, September 1995, Aphrodisia, September 1997, The Forgotten Planet, May 2001). Only occasionally does something new seem to be offered, whether the modern approach of Baru (September 1996) or the retro, *Storm*, by Lawrence and Lodewijk (January and March 1997). Other strips of note are the stylish, Koshka: 'Death By Betrayal', by Di Marino and De Vicentiis (May 1998), Joe Pearson and Young Gi Yoon's 24 Hour Man (July 2001), a science fiction horror tale with artistic debts to Mike Mignola, and Beatrice Tillier's 'The Fairy and the Gentle Robots' (May 2002). New series include Frezzato's 'Keepers of the Maser' (one episode a year from 1997), Marini and Smolderen's 'Gypsy' (four episodes from May 1995), Felix Vega's 'John Seaseeker' (January 1998, January 2001), in which the seas have dried up, and Adamov's Dayak (three episodes 1994-1998).

Annoyingly, strips began to be serialised. This was not particularly important for gag-strip fillers like those produced by the Morvan & Buchet partnership (1997-2001), that of Trillo, Maicas and Seijas (sexy Flopi, 1999-2000) or the more recent Goupil and Walter efforts (2001-2002). However, it has also been applied to Gimenez's 'Choose Your Game' (over eight issues between July 1999 and January 2001) and its sequel, as well as Ranx 3 and Bernet & Abuli's 'Snake' and Boucq's latest (which is given a new title each time, as if not connected to what has gone before). This is symptomatic of slovenly editorial guidance, as is the lack of co-ordination between the credits on the Contents page with those on the story pages. And the gushing praise for the works of Eastman and collaborator Simon Bisley is in direct disproportion to their quality (*F. A. K. K. 2* – the second *Heavy Metal* film - and 'Fistful of Blood', May 2001 until January 2003). While the short material continues to please, therefore, fewer of the new main stories are of note, suggesting that it's time for another shake-up on the editorial front. The magazine's commitment to European material has been consistent throughout, and without *Heavy Metal* there might never have been European reprints, even if the magazine shied away from many of the more extreme experimental strips printed in Metal Hurlant, as well as the less futuristic strips it serialised over the years. Many stories have been collected, most prominently by Catalan and NBM, and by *Heavy Metal* themselves.

There have been a number of regular special editions, some containing new material, others reprints. In the latter category fall *One Step Beyond, Greatest Hits, Best of Heavy Metal* (2 volumes) and *Fifteen Years of Heavy Metal. Son of, Bride of* and *Even Heavier Metal* all date from the early 1980s and feature a good cross-section of the usual suspects – Crepax, Gimenez, Brecchia, Azpiri, Moebius, Gillon and Loustal. 'War Machine' contains lots of material commissioned by the defunct Tundra, the best of which is material by Garry Leach and Dave Gibbons. Software has 'Druuna: Carnivore' to titillate, 'Special Edition' has the multimedia computer-generated Sinkha and 'Overdrive' contains Charyn and Frezzato's Margot. 'Pin Up' and 'Havoc' both star Jodorowsky and Bess' 'Hannibal 5', while The Venus Interface is a single, hallucinogenic storyline by Lou Stathis and a host of artists including Rick Geary, Peter Kuper and Arthur Suydam. Amongst various themed Specials (1997-2002) are two badly censored 'Erotic' issues featuring the otherwise smart short stories of Horacio Altuna, 'Diabolic', 'Fantasy', with a short Taxi strip from Font and the allegorical 'Wedgwood Tea Set' by Tunic and Stefanovic, the not very horrific 'Horror' with shorts from Azpiri, Bilal and Hermann, Sci-Fi, actually containing Frezzato's fantasy 'The Isle of Dwarves', 'Taboo' with the visually impressive, 'Land Of No Evil', about a white woman living amongst a South American Indian tribe, drawn by Emmanuel Lepage, and shorts from Esteban Maroto, Homs and Andreas, and 'Techno' with Martin, Liberatore and Segura. Others include reprints from Creepy and *Eerie* in *The Best of Richard Corben*, 'Crossroads' containing a second Leo Roa story from Gimenez, the horrible *F.A.K.K.2* movie adaptation, 'Mind Melt' (2001) a showcase for the artwork of Saverio Tenuta, and 'Poster' (2001) with shorts from Cinzia DiFelice, Caza and Pablo Marcos. The '25th Anniversary Special' (2002) has some cute horror strips from Cromwell, but is otherwise undistinguished. Finally, despite its title, 20 Years of Heavy Metal is all new, with strips by Azpiri, Bilal, Boucq, Caza, de Felipe, Frezzato, Liberatore, Ortiz & Segura, Prado, Segrelles, Serpieri, Stan & Vince and Torres.~NF

HEAVY METAL Graphic Novels

Early in *Heavy Metal's* run several stories serialised in the magazine were collected, most notably Archie Goodwin and Walt Simonson's adaptation of the *Alien* movie. Thoroughly entertaining, it remains the best of the home-grown material. Other collections included Angus McKie's *So Beautiful and so Dangerous* and Howard Chaykin's *The Stars My Destination*, but this flurry of late-1970s activity came to a halt until 1989s *The Venus Interface*. Published in the same format as *Heavy Metal* magazine, it's a Lou Stathis story about a shape changer, split into several chapters as she adopts different forms. The art throughout is unappealling, with Peter Kuper, Mark Pacella and Kenneth Smith among the guilty parties. Only the Rick Geary drawn portion about a form of blobby sex-obsessed aliens holds up.

Published first in conjunction with Tundra, and later Kitchen Sink, the editorial aim of the 1990s selection of graphic novels was to present the best European graphic albums in an equivalent hardbound format at an affordable price. Published monthly for almost two years, many of the titles initially saw English-language print in the pages of *Heavy Metal*, so those wanting cheaper-format versions punctuated by ads and strangely separated by other strips are referred to the cover dates of Heavy Metal bracketed by titles.

There's a high percentage of decent material, but overall the writing lags way behind the quality of artwork, never more demonstrably so than in the first release, Margot In Badtown ('Overdrive' Special). Reading as if every third page is missing, the attractive Margot is a naïf in the big city, but Charyn's plot never goes anywhere, while Frezzato's art is gorgeous. Sadly, it's not as good for the sequel Margot: *Queen of the Night* (Winter 1994), but Charyn's plot is better with Margot becoming a protector of the homeless. On his own Frezzato turns out volumes of 'The Tower', which displays a prodigious imagination, great designs, and very good artwork, but where's the story? *The 2nd Moon* (March 1997), *The Isle of Dwarves* (Sci-Fi Special Spring 1998), *Eye of the Sea* (July 1999), and *The Iron Tower* (November 2000) feature a disparate group of humans who've survived a global catastrophe. They're searching for the remainder of humanity believed to be sheltering in a technological haven known as the tower. Having spent so long on his designs, Frezzato seems determined to spin out his thin story as long as possible. The same applies to *FAKK 2* ('Crossroads' Special), endlessly and tiresomely promoted within *Heavy Metal* magazine for what seemed like years. What this movie script adaptation amounts to is one long, violent chase sequence of a woman hunting down the man who murdered her lover. If Simon Bisley couldn't give a toss when he drew it, why should you? Kevin Eastman wrote that and conceived or plotted *Underwhere*, on which he collaborates with Mark Martin for the art and Paul Jenkins for the script. It's a children's fantasy story about a boy transported to a strange world for adventure. The lack of any further plot rather lessens the impact of the very good art, with Martin's bright colouring particularly beautiful. Well drawn in a gloomier style is *Ramparts* (March 1993). Joel Mouclier's exceptionally well conceived primitive mechanical world is engagingly designed, but Turf's accompanying script is a woolly tale of doomed love and a disease without cure.

Big-breasted babes are a *Heavy Metal* staple, and top of that category is Serpieri's *Druuna*, dealt with in a separate entry. Azpiri's Lorna, who stars in *Leviathan*, is equally buxom, naked in even more panels, and indulges in a bit of lesbian sex besides, making it the *Heavy Metal* graphic novel of choice for teenage wankers. *Leviathan* actually achieves a little more plot than the competition to boot. The post-apocalyptic shenanigans of *Attila* (March 1991) ramble, and Attila's breasts aren't as big. What a quandry! There's also an enormous nipple count to Jodorowsky and Bess' *Anibal Cinq: The Last Ten Women I've Known*, which is very silly indeed, but outstays it's welcome even with a giant mutated female ape. Vince's Eden (November 1993) is another step down, with big-breasted babes and gruesome mutants mixing it up in a bog-standard to-be-continued thriller, that never was. More distressingly, neither was Adamov's Dayak: Ghetto 9 (September 1994), a well-drawn ligne claire thriller set in a future where whites are almost extinct, but one of the few remaining has a date with destiny. Adamov's also on hand to draw the samurai tale *Wind of the Gods*, incorporating a particularly detailed and stomach-churning depiction of seppuku, but otherwise ordinary. The same applies to Siro's *Maximum Volume* (March 1994), a confusing story about the mastery of sound, but with semi-naked women aplenty.

Hord (November 1994) actually has a decent, if confusingly released, plot about a role-playing computer game that seeps out to affect reality, but the gruesome art and horrible colour render it almost unreadable. It also shudders to a halt in what seems a very forced fashion, prompting the belief a conclusion was planned. The only total stinker in the entire selection is *The Man Who Laughs* (July 1994). We're back in doomed-love territory, with a mutilated man the heir to a throne, but Fernando de Felipe's art is monotonous, gloomy and ugly and his story trite. Eva Medusa (May 1993) displays how dark and gloomy, and tragic love can be handled with dexterity. It begins with the awakening of a teenage girl in Brazil, who realises she's inherited her mother's charm, beauty and eldritch abilities. Segura's excellent story combines voodoo, desire and degradation, with the subtle colouring of Ana Mirallés adding significantly to her already accomplished art. *Apocalypse* (July 1993) tells of a Vietnamese teenager able to make objects and people explode just by looking at them. There's the germ of a movie, but the story is strangely paced and with no great pay-off.

The two volumes of Régis Loisel's *Peter Pan, London* and *Neverland*, are puzzlers. Presenting the life of Peter Pan in the days before Barrie's novel, they could read to children were it not for the unsubtle insertion of unrequired adult scenes. It's as if Loisel was somehow ashamed to produce childrens' books. His art is gorgeous, very expressive and able to evoke the squalor of Victorian London in the first book equally as well as the fantasies of Neverland in the second. They're an oddly contrasting pair, with the more upbeat *Neverland* more in tune with the children's adventure of the novel. The Julien Boisvert stories of Dieter and Plessix also stretch over two volumes. *Neekibo* is an excellent statement about colonialism and exploitation in Africa, and a coming-of-age story as junior Foreign Office official Julien Boisvert is prompted to uproot against his inclination by the return of his domineering mother. The unpleasant lesson he learns in the ways of the world carries him through the succeeding story *Grisnoir*, concerning an apparently kidnapped child. Plessix's ligne claire art is stunning – expressive, subtle and humorous. Of particular note is the manner in which Boisvert has perceptibly aged between the stories.

Scott Hampton's *The Upturned Stone* (September 1993) is a pre-teenage bonding story in the manner of *Stand By Me*, but with more sinister overtones. Deftly told and atmospherically painted, *The Upturned Stone*'s tale of ghostly retribution should be saved for a dark and stormy night. Oddly enough, over the past four decades the American Western strip has been far more popular in Europe than at home, and *Adios Palomita* (January 1993) is a fine example of the genre. Sumptuously drawn by Fabrice Lamy, it's told equally by flashback and contemporary occurrences, its central characters live and breathe, and it surprises with every plot twist. It concerns a love triangle and the consequences of a bungled bank robbery five years previously, but with great verve and imagination. *Desperadoes* is also set in the American West. Although appealingly drawn in typical European cartoon style and with charm and whimsy, the comedy adventure about a trio of female outlaws never quite takes off. The silhouette cartoons at the bottom of each page are a nice touch, though. Milo Manara's *Fatal Rendevous* is a gorgeously drawn, but thoroughly unpleasant revenge fantasy about a spoiled little rich girl. Perhaps blinded by his fine-lined art, there seems a blithe acceptance of Manara's consistently poor attitude to women throughout his canon. Previously this has been tempered by some wit and imagination, but both are lacking here.~FP

THE HECKLER

DC: *6 issues 1992-1993*

Stu runs a small diner in a big city, but sometimes he has no choice but to don his Heckler costume and cut some trouble-maker down to size. There are nice ideas – like the Generic Man and his plot to reduce everything to his own faceless uniformity – and there's lots of humour in the details of the city and in street-level incidents, but far too much of the comic is given over to the fights, and unfortunately these aren't funny and don't make sense as action. The Heckler would be great as an eight-page strip, but it drowns in twenty-two pages, and it's not surprising to find the following in the last two panels of issue 6:

Heckler: "Hey, don't worry, kids... It'll take a lot more than that to kill the Heckler."

Caption: "Yeah, it'll take crummy sales figures."

Heckler: "... Well, true, that would do it, all right..."

The most tightly told story is in 4, with the Heckler out on patrol with an assassin in pursuit, which has the spirit of a good Roadrunner cartoon. It would be nice to enthuse about all six issues because the artwork's great (Keith Giffen and Malcolm Jones III) and there's no problem with the ideas (Keith Giffen, plot) or the script (Tom and Mary Bierbaum), but those superfluous fourteen pages per issue are just too much to demand of a reader's goodwill.~FC

HELL RIDER

Skywald: *2 issues 1971*

A dreadful magazine attempting to attract the audiences flocking to see the lame biker movies made in the wake of *Easy Rider*'s success. A Vietnam vet is injected with 'Serum Q47', which gives him superstrength. Being named Brick Reese, he sensibly opts for the alias Hell Rider, but it's about the only sensible decision he makes in two issues, both of which have predictable endings. There's good bikers vs bad bikers in 'The Wild Bunch', a sort of grown-up Archie gang, and The Butterfly is soul singer Marion Michaels, who takes almost all her clothes off, attaches a rocket pack and flies off to deal with ne'er-do-wells. 2's Ku Klux Klan story is particularly daft. It's all intended as vaguely titillating, with skimpy costumes and the odd glimpse of breast, but it's dreadful throughout.~FP

HELLBENDER

Eternity: *One-shot 1990*

A Shuriken special that has the martial artist trying to track down a serial killer who is killing women who have degraded themselves. This includes pop stars and actresses as well as the usual call-girls. Insincere moralising as well as bad story and art. Not worth the paper it's printed on.~WW

HELLBLAZER

DC: *62 issues, 1 Annual 1988-1993*
DC/Vertigo: *117 issues + (63-179), 1 Special, 4 issue miniseries ('Bad Blood'), 1988 to date*

Despite the fact that no-one calls him Hellblazer, that's the title of John Constantine's comic. He's a seedy English magician and all-around nasty piece of work, who makes a habit of sticking his nose where it's never welcome but always necessary. He was introduced by Alan Moore in *Swamp Thing* 37, whimsically because artists Steve Bissette and John Totleben were big Sting fans and wanted a chance to draw him in some fashion. The manipulative, smug, cocky and ever so dangerous enigma kept popping up until awarded his own "mature audience" title, where his features slightly altered and something of a character deconstruction began. Jamie Delano and John Ridgway's Constantine was no longer suave and inexplicable, and no longer looked or acted like a popstar. Without giving any secrets away, we saw the uncertain underside of a man who was used by, as much as used, magic, and many of his contradictory aspects were established. We learned that his friends tended to die blaming him for their fates, and that they usually hung around after death to remind him of it. We also saw that in the world of the supernatural, bluff and "face" are often more effective than power.

Constantine is no hero. Long-term enlightened self-interest is what makes him work. When he saves the world, its so he has somewhere to live. If he takes down a hunger demon (1-2), or quiets places of mystic disturbance (a platoon of dead Vietnam GI's in 5) it's a kind of pre-emptive strike. If family are endangered (a cult tries to co-opt his niece Gemma in 4, and his estranged father is menaced by a serial killer 24, 28-31), he responds because they're his. And should his own life be endangered, there is nothing he will not do. After all, this is someone who's led a bad life even by his own standards, and he knows that there is a Hell. Badly injured by a cult, he accepts a blood transfusion from the demon Nergal, which almost drives him to suicide on his 35th birthday. 9-11 feature elements of *Swamp Thing* 76's purpose, where he's Constantine is used as a sperm donor to create the bog monster's daughter. The oft mentioned debacle at Newcastle, which had resulted in his brief stay in Ravenscar Metal Health Facility, used as a plot McGuffin since before *Hellblazer* began, was finally revealed in 11-12. Here a young and arrogant Constantine leads an exorcism that goes horribly wrong, with repercussions that impacted on the series for almost the next hundred issues. 1-16 were collected over four volumes by Titan Books in the UK, while the American 'Original Sins' collection gathers 1-9 in colour.

Under Moore, and especially Delano, social issues and contemporary politics were inextricably entwined with the character, and in many ways the early series can be seen as a barometer of contemporary British life. A flashback in 3 describes an encounter with Yuppie demons on the day Margaret Thatcher became Prime Minister, and continual reference to poverty and substance abuse make for a truly modern horror experience. Themes featured include ecological trauma (13), child abuse (4), neo-Nazism (6), computer-geeks (7), nuclear paranoia (Grant Morrison and David Lloyd's 25-26), and social neglect ('Hold Me' by Neil Gaiman and Dave McKean in 27). Richard Piers Rayner replaces a Ridgway reportedly ill at ease with the subject matter in 9, offering a lighter style of art. The ambitious 'Fear Machine' occupies 14-22. On the run, Constantine is leading a sedate life with Neo-Pagan Travellers when he uncovers a Masonic plot to use ley-lines to power a psycho-mystic terror weapon. This is where the magician works best, floundering but conquering the massed forces of privilege and entrenched power. Constantine as the Arch Anarchist proving that The People just won't take any crap anymore. Mark Buckingham and Alfredo Alcala take over the art from 18 as Piers Rayner finally succumbs to his struggle with a monthly deadline, and it becomes clear that *Hellblazer* is fundamentally a writer's comic, and that the series will always reflect their character and interestsr. The annual, from Delano and Bryan Talbot deals with old Paganism, and introduces the idea that the Constantine family was always involved with magic, as Kon-Sten-Tyn, ancient King of Cumbria, embraces both the new Christianity and the Dark Gods to keep his hold on power. Delano completes his tenure with 'The Hanged Man' (39-40) where Constantine confronts the knowledge he murdered his twin brother in the womb; a child who would have led mankind to a new Golden Age.

The next creative team of Garth Ennis and Will Simpson immediately produced one of the most memorable stories in the series with 'Dangerous Habits' (41-46*). Constantine's life-long smoking leads to terminal lung cancer, and the convolutions he undertakes to beat the rap are, to many, his finest hours. It's also introduces the closest thing to an arch-foe that the series ever had, The First of the Fallen, better known to us as the Devil. Again the interests of the writer are foremost, as Constantine reveals friends he hasn't killed yet, gets a Northern Irish girlfriend, Kit, and drinking plays a greater part in the proceedings. 47-48 deal with property developers and a haunted pub, and 'Lord of the Dance (49) is a Christmas tale with a difference as Steve Dillon draws his first issue, John drinks a skinful and saves the pagan spirit of Drunken Revelry from oblivion. Simpson is back in 50 as the King of Vampires confronts and tempts Constantine, and 'Bad Blood' (52-55) tells of the power elite, English aristocracy, and a sex club where the Heir to the Throne is possessed by the demon who used to be Jack the Ripper.

Dillon joins as regular artist with (57-58), as Constantine stops a scheme where a lab steals corpses to test new firearms on, before a string of tales setting up his eventual showdown with the Devil (59-61). London burns as a mystical plot causes race riots, Constantine's friends start dying again (62-67*), and when Kit leaves him (70, for her own one-shot Heartland) the manner of his eventual victory leaves Constantine a drunken derelict. He's homeless on the streets of London and seemingly helpless prey for the returned and vengeful King of Vampires. Ennis' disgust with British Institutions is obviously as nothing to his feelings for the Catholic Church, and the special highlights this in the tale of a priest who nearly abused and might possibly have murdered the young runaway Constantine. The events of 71 bring him back from the gutter, and Constantine returns to America for a final confrontation with sometime ally, Papa Midnite, and a trawl through the subconscious of the concept of the USA (72-75). Ennis' final tale is 'Rake At the Gates of Hell' (78-83) where the deal Constantine made to stave off cancer rebounds on him and those he cares for. Despite the long build-up, the culmination is everything that could be hoped for and a worthy end to a good run. All issues between 62 and 77 are available in three collections.

New regular artist Sean Phillips illustrates a low-key issue from Delano in 84, then, Eddie Campbell's engaging ghost story (85-88) that leaves Constantine stuck in New Guinea. Paul Jenkins, swiftly ends the Antipodean adventures with a tale of property speculators and the Aborigine Dream Serpent (88-89), before returning to London for an uninspired run echoing better issues. There's another new cast of "old friends" (where do they keep coming from?) and a return to pagan magic, fascist thuggery, haunted houses, post-punk drinking, and the return of the First of the Fallen (in 92-96, and again in 121-124). Jenkins' unremarkable tenure ends in 128 leaving Constantine pretty much as the writer found him. Ennis and John Higgins then bring us 'Son of Man' (129-133), a nasty tale of supernatural gang war, before Warren Ellis and Higgins dredge up Constantine's past as he goes after a gang of London mystics responsible for the ritual slaughter of an old girlfriend (134-139*). Issued at this time 'Bad Blood' is set in 2025 and revisits themes in Ennis' tale of that name, but is unrelated. An aged but unredeemed Constantine chafes under the twin leashes of the fascistically moral New Republic and adherents of the lost Monarchy. Meanwhile, the crazed worshippers of Diana, long dead Princess of Wales follow their own insane agenda. Rumours that the Republic have been assassinating the remaining members of the House of Windsor persist, but a bastard heir to the throne is still out there, and die-hard Royalists will do anything to get her. Delano, Philip Bond and Warren Pleece have a last pop at those institutions that annoy them so much in a light-hearted black comedy.

Brian Azzarello is the first non-British writer of *Hellblazer*, and his 'Hard Time' (146-150*) has Constantine transplanted to the USA, beginning a life sentence in prison for murder, using his "powers" to swiftly make himself top of the heap. Rich Corben provides the requisite gritty visuals, and Marcelo Frusin draws 151-156 as yet another girl from his past embroils Constantine in the grubby underside of rural America. Steve Dillon returns for a bar tale in 157 and Frusin for 158-161, a simple tale of ordinary folk snowed in at the local diner, except that one of them is a legendary serial killer and another is our English magician. With 'Lapdogs and Englishman' (162-163) Azarello finally remembers he's on *Hellblazer*, not *100 Bullets*, in a flashback to John's days with punk band Mucous Membrane, and a scam played on a rich American that will impact upon the rest of Azzarello's time on the series. Although a quality creator, his Constantine is uncomfortable to read, and the unshakable feeling is that nobody concerned really wanted to be doing this.

In recent months Mike Carey has slipped behind the keyboard (175 to date) returning Constantine to England, and sucked into magic conspiracies that directly endanger his family, and with Dillon and Frusin on the art the series is rapidly improving. Let's keep our fingers crossed.~WW

HELLBLAZER/BOOKS OF MAGIC

DC/Vertigo: *2 issue microseries 1997-1998*

Tim Hunter, potentially the most powerful mystic in the DC Universe, is still a schoolboy. When a class project involving time-capsules reveals a small wooden toy buried thirty years previously, demons start popping out of the woodwork and street-smart arch-mage John Constantine finds his life and what's left of his soul on the express route back to hell. So-so horror mystery from Paul Jenkins and Paul Lee.~WW

HELLBOY

Dark Horse: *4 issue miniseries ('Seed of Destruction') 1994*, one-shot ('The Wolves of St.August') 1995, one-shot ('The Corpse and the Iron Shoes') 1996, 5 issue miniseries ('Wake the Devil') 1996*, 2 issue microseries ('Almost Colossus') 1997, one-shot ('Christmas Special') 1997, one-shot ('The Chained Coffin and Others') 1998, 2 issue microseries ('Box Full of Evil') 1999, 4 issue miniseries ('Conqueror Worm') 2001, 2 issue microseries ('The Third Wish') 2002*

In the closing months of World War II a satanic rite by a team of Nazi sorcerers is disrupted by a team of Allied Mystics leading to the hijacking and materialization of a demonic baby from under the Germans' very noses. The apparition is red and muscular with a huge stone gauntlet for a right hand. "Hellboy" is adopted by a British Parapsychologist , and nearly fifty years later he's a respected Ghostbuster working for the Bureau of Paranormal Research and Defense, an international anti-monster task force. When a mysterious outbreak of sinister frogs causes the death of his adopted father, Hellboy and his BPRD team discover that one of the Nazi mystics is behind a plan to destroy the world and that Hellboy himself was to be the instrument. 'Seeds of Destruction' is by Mike Mignola with John Byrne providing dialogue (and Art Adams' Monkeyman and O'Brien running in the back), but for 'The Wolves of St August', originally run in *Dark Horse Presents* 88-91, Mignola graduates to full creative chores for a different spin on a hoary horror icon. 'The Corpse' and 'The Iron Shoes' is also a collection, this time of two tales set in 1960s Ireland and dealing creditably with spooky segments of Gaelic mythology, originally serialised in Dark Horse's promotional giveaways.

'Wake the Devil' has more of those darned left-over magic Nazis reactivating a decades old plot to revive the king of all vampires, leading to another brush with Hellboy's own intrinsic dark side. The series is rounded off with a MonsterMen back up feature from Gary Gianni, also present in 'Almost Colossus' as Hellboy meets an Homonculus and solves the mystery of where all the bodies in all the graveyards disappeared to. *The Hellboy Christmas Special* is an excellent collection of Yule-themed shorts featuring our eponymous lead, Gianni's Monstermen (redubbed Corpus Monstrum), a seasonal spread from Geoff Darrow and a little gem on the nature and rewards of giving called 'Toybox' from Steve Purcell. 'The Chained Coffin' collects previously published tales along with one new tale ('The Baba Yaga'), and 'Box Full Of Evil' returns to the continuing sub-plot of Hellboy as the means by which the earth will be destroyed. It features an evil wizard not unlike Peter Lorre, and a scheme to free the devil from the chest into which St. Dunstan sealed him. A final confrontation with the ubiquitous Nazis comes for Hellboy and Roger the Homunculus as the fruits of the Wehrmacht's space program return to threaten humanity in 'Conqueror Worm'. After a catastrophic conclusion Hellboy quits the BPRD to find himself, for which reason he travels to Africa in 'The Third Wish'. This is possibly the weakest Hellboy tale. Mignola's spectacularly minimalist and usually classically composed art seems rushed and unfinished here, perhaps as at the time of production he was heavily involved with the pre-production of the *Hellboy* movie.

Throughout the run Mignola's obvious love for the horror genre combines with an innovative approach to telling tales and an instinctive certainty as to what makes good comics work. Another innovative and successful ploy is to tailor each tale to its own proper length and not lose quality by churning work out on an arbitrary and unachievable schedule. He's also not afraid to let others play with his toys, as can be seen in the prose novels and short stories from Christopher Golden and others, and inter-company crossovers with Batman, Savage Dragon and others.~WW
Recommended: 'Seeds of Destruction' 1-4, 'The Wolves of St.August', 'The Corpse and the Iron Shoes', 'Wake The Devil' 1-5, 'Christmas Special', 'Conqueror Worm' 1-4

HELLBOY JUNIOR

Dark Horse: *Halloween Special 1997, 2 issue microseries 1999*

Under the warped leadership of Bill Wray, *Hellboy Junior* is a collection of bizarre short stories parodying all manner of loveable Harvey characters. The quality of craft from the likes of Dave Cooper, Hilary Barta and Stephen DeStefano, as well as Wray and Mignola, is outstanding but the comic is not entirely successful. There is a (deliberately) dark tone to the stories, and all the blood, guts and subversion are ultimately wearying and a tad childish.~DAR

HELLCAT

Marvel: *3 issue miniseries 2000*

Steve Englehart (ably assisted by Norm Breyfogle) turns the spotlight on Patsy (Hellcat) Walker. He brought the character from her girls' fashion title beginnings into the superhero wing of the Marvel Universe in *Amazing Adventures*, and his obvious interest in a character he sees as his own comes through here. After being rescued from Hell (in the *Thunderbolts* 2000 annual), the former daughter-in-law of Satan wrestles with literal and metaphorical demons on her way to becoming a regular member of the *Defenders* cast. Honestly, Ms. Walker's life is so utterly bonkers, even by comic standards, that you just know anything she appears in is going to be worth the price of admission. This doesn't disappoint.~JC

HELLCOP

Image/Avalon: *4 issue miniseries 1998-1999*

The Judeo-Christian Hell is in fact an alternate reality catalogued as KRP 1301-A. People who fall through the 'soft spots' between this reality and our own appear to be those who believe they deserve to be there. 'Hellcop' Virgil Hilts is a human working to try and maintain some sense of order and justice in KRP 1301-A. There are some nice ideas buried somewhere in here, but all in all it's little more than the usual good-cop-discovering-inside-corruption-fare, all executed as ham-fisted hack work. Writer Joe Casey can do much better, leaving you wondering how much his hands were tied by editor Brian Holguin, who co-created the character with colourist Brian Haberlin. 1 and 2 have variant covers; 1's by Todd McFarlane.~JC

HELLHOLE

Image: *3 issues 1999*

Policing an inner city area home to a few demons is tough, particularly when the dead can return to life. Wise-cracking Cabrini and monosyllabic Wilson are set on the trail of a demonic arsonist and police corruption. It's decent enough adventure, irritatingly presented in the form of movie storyboards. Why bother working up a separate version if Scott Lobdell's agent can just submit the comics to Hollywood? Artist Adam Pollina couldn't be bothered either, bailing out after 2, and neither creator had enough respect for the readers who bought the comic to conclude the story.~FP

HELLHOUND

Marvel/Epic: *4 issue miniseries 1993*

A gunman and a guitarman (a thinly disguised Robert Johnson) are sent up from hell to stop a woman who is healing the sick and raising the dead. They meet the angel Gabriel, sent down to do the same as 'the balance must be protected'. By no means the mindless bloodfest implied by the covers, though there's certainly enough violence for them as likes it. John Miller's story evokes sympathy for the plight of virtually every character, a very skilful trick indeed, and Floyd Hughes' daring experiment in switching style and technique to suit the scene hits the mark far more than it misses. Flawed, yes, but one to watch out for.~HS

HELLHOUNDS: Panzer Cops

Dark Horse: *6 issue miniseries 1994**

Long, wordless would-be cinematic action sequences are the highlights of this otherwise dull police politics and terrorism manga thriller translation.~GK

Clive Barker's HELLRAISER

Marvel/Epic: *20 issues, 4 Specials 1990-1994*

A horror anthology nominally featuring the Cenobites from the *Hellraiser* films. In reality their appearance is forced in earlier issues, so 7-16 feature chapters of a series titled 'The Devil's Brigade'. The lives of six humans are divined to have a lasting effect on the realm of the Cenobites, so they must ensure that the humans follow the paths of order. Serving to introduce a recurring cast, chapters can be read as individual stories.

Many creators of note (John Bolton, Denys Cowan, Dave Dorman, Neil Gaiman, Sam Kieth, Dave McKean, Mike McMahon) contribute alongside relative unknowns to produce an eclectic, although unremittingly gloomy, mixture. Mark Kneece, Scott Hampton and John Van Fleet's 'The Tontine' in 9 is the best story of the run, depicting the claustrophobia, hope and despair involved in an annual game of Russian roulette, without moral commentary or resorting to gratuitously illustrated violence. 17 introduces 'The Harrowers', a story prefaced in 16 and sumptuously drawn by Alex Ross. To all intents and purposes they're a group of non-costumed superheroes empowered to combat the Cenobites. The best of four specials is the Christmas-themed *Dark Holiday Special*, and stories from 1-4 feature in an **Epic** collection. More recently Checker have published a far larger *Best of* collection covering the entire run.~WJ

HELLSHOCK

Image: *4 issue miniseries 1994, 3 issues 1997-1998*

A mundane story concerning the results of a coupling between angel and teenager occupies the miniseries. Jae Lee's plot is confused and padded beyond belief with purple prose and pin-up pages. While anyone having the gall to fill their first issue with pin-up pages and ads would normally be castigated, here it spares us the tedium of more poorly portrayed angst. This is all rather a shame considering Lee's gloomy stylised art, distinctively coloured by José Villarrubia, is worth a look. The progress between the first and second series, though, is astounding. Lee's first person narrative disturbs and cajoles as a psychiatric unit intern faces a reality beyond her naïve conceptions in 1-2. They're dense, bleak and harrowing comics, and stunning work. While still good, 3 is a drop in standards, and according to Lee's editorial pages they form little more than a prologue to the intended tale. That it was again left dangling is testament to Lee's incapacity to complete a story very close to his heart, which is a great shame. 1-2, though stand alone and are well worth reading anyway.~FP
Recommended: 1-2

HELLSPAWN

Image: *14 issues + 2000 to date*

Trapped in the living hell of New York's sleazy shadows Al Simmons is trying to deal with the aftermath of Angela's death in the main title. Spawn and his untrustworthy guide The Clown seem locked in a battle of wills involving the latter's evil influence on daytime TV shows and internet chatrooms. 5-11 are driven by whether Al will take Malebolgia's place on the throne of Hell – numerous demons, monsters and some decidedly deviant angels go to great lengths to dissuade him. There's also FBI Agent Damascus on Al's trail as well as investigating journalist Mike Moran. In 12 Hel is born fully formed and announces that she's Hellspawn's future wife just before he descends the throne in 14. This is a lot clearer than the travesty of continuity this hateful aggregation of smeared semi-illustration and typesetting represents. The always reliable Brian Michael Bendis, skating on thin ice with the prejudicial diatribes in 2 and 3, floats dialogue strings over Sienkiewicz wannabe Ashley Wood's fazed tableaux before caption-meister Steve Niles takes over in 6. The messy Ben Templesmith takes over the art in 11, completing the handbasket the series has been gradually fashioning for itself. Wood is clearly very talented but his illustrative noodlings are about as inappropriate as Moran's appearances amid this hogwash.~SW

HELLSTORM

Marvel: *21 issues, 1993-1994*

In a feeble attempt to do a Vertigo-style horror comic, Marvel took down the *Son of Satan* from the shelf (admittedly not an A-List character by anyone's definition) and turned him from ridiculous to merely repulsive and tedious, an irritating, amoral and enigmatic poseur. Warren Ellis' intervention on the scripts from 16 merely turned up the squalor. The title has a cult following, but then, so does *On The Buses*.~HS

HELL'S ANGEL

Marvel UK: *16 issues 1992-1994*

Shvaughn Haldane adapts future science for her own ends to avenge her dead father and battle the evil Mys-Tech Corporation. Bizarre attempt to create a New Age hi-tech superheroine, riddled through with pointless guest appearances by sundry X-Men. Following a lawsuit by the international organisation of Hell's Angels (!), the character's name was changed to *Dark Angel* with issue 6, at which point the series was promptly sued again by an independent publisher who had previously issued a title of that name. All this helped the comic not one iota, and it eventually staggered to cancellation, weighed down by its own pretentions.~HS

Tales of HELPLESS ANGER

Helpless Anger: *One-shot 1993*

Sharp political and social satire in the tradition of the Undergrounds. Several of K. L. Roberts' 'Don Thompson: Former Negro' and 'Bill and Al's Totally Excellent White House Adventure' strips appear as single pages throughout, whilst his 'Terroress' continues the story from her own title (she's a mass murderer now exploiting, and being exploited by, the media from prison). 'Spectracide' features an exterminator who acts like a more radical Reid Fleming. Only the 'Miss Lovedoll Beauty Pageant' seems overlong.~NF

---

* Available in a collected edition

HELSING

Caliber: *3 issues 1997-1998*

Yet another outing for the old 'Carrying on the Family Tradition' plot as the last of the Van Helsings (if only by marriage) joins the rest of the Caliber Core characters to make the world safe for people who aren't dead. Amnesiac Samantha Van Helsing is plagued by horrific dreams of her dead husband and joins the family business to track down the Tophet, a secret organization that holds all the answers to her questions. Crucifixes and shadows abound and it's all quite entertaining but Gary Reed and Chris Wozniac are capable of better.~WW

HELTER SKELTER

Antarctic: *7 issues (0-6) 1997-1998*

This is a generally sound magically engineered teen-romance and martial arts comedy manga strip. Artist Duc Tran is good at the action and the funny stuff but, when issues don't provide more than a couple of minutes reading each, the repetitious splashes of 'pretty girls' in bikinis with limbs so absurdly extruded that they look anorexic or nine feet tall can become wearing. Unless, by chance, that should happen to be your special thing...~GK

HELYUN

Slave Labor: *One-shot ('A Simple People') 1990, 1 issue ('Bones of the Backwoods') 1991*

Helyun is from the American south and he believes himself to be a changeling, something that came from the wild to take the place of a human boy. He lived as a human until he finished school, never quite knowing how to fit in, and soon returned to the wilderness, though he found it impossible to avoid humans altogether. Chas Berlin handles the changeling idea and other fantasy elements well, but the comic is mostly about an outsider's view of disgraceful human behaviour, and this is fascinating and unsettling, with artwork that is appropriately grotesque. 'A Simple People' contains four stories, including a lynching in small-town Arkansas, and Helyun's origin, but the best is 'High School Helyun', which makes some very perceptive comments on the various tribal groupings. 'Bones of the Backwoods' is the first issue of a longer story which features Helyun going back to his home town and the brewing of a powerful local cider, but it doesn't stand well on its own, and was never completed.~FC

Recommended: 'A Simple People'

HEMBECK

Fantaco: *7 issues 1980-1983*

Marvel: *One-shot 1989 ('Fred Hembeck Destroys The Marvel Universe'), one-shot 1990 ('Fred Hembeck Sells The Marvel Universe')*

In the late 1970s Fred Hembeck ran one-page humour strips titled 'Dateline -!!?#' in trade paper *The Comics Buyer's Guide*. Imaginative, informative, well cartooned, detailed and funny, these strips comprise the entirety of 1 (later re-issued with extra pages), 2 and 7. The first eight pages of 1 have interviews with Spider-Man and the Flash, synopsise a silly *Lois Lane* story, spotlight some of comics' daftest heroes, discuss old TV shows and Roy Thomas' work on Thor, and revive a horror comics host. This variety is maintained throughout, and that some events featured are then contemporary news is offset by Hembeck's always incisive commentary. Any 'Dateline -!!?#' pages are still worth reading today. There are too few of them in *The Hembeck File* (5), padded with sketches and sample pages, and *Bah, Hembeck* (4) exclusively concerns Superman and Fantastic Four, the lack of diversity weakening the premise. 3's *Abbott & Costello Meet the Bride of Hembeck.* has characters from different companies meeting each other, as does 6, and while both contain plenty of good jokes they stretch slapstick too thin. The same criticism applies to Hembeck's first Marvel work. The second, collecting one-page strips from the promotion title *Marvel Age*, while seemingly tempered by the desire not to bite the hand that feeds, is a partial return to form.~FP

Recommended: 1, 2, 7

HEMP FOR VICTORY

Starhead: *One-shot 1993*

In 1943 the US Department of Agriculture produced a documentary encouraging American farmers to grow marijuana and extolling its use in the war effort. This adaptation of that film by Art Penn is both educational and propagandist, as its final pages detail statistics about hemp and explain more of the history of its persecution. Interesting, but more an illustrated pamphlet than a comic.~NF

HEPCATS

Double Diamond Press: *12 issues 1989-1994**

Antarctic: *13 issues (0-12) 1996-1998*

By the time *Hepcats* appeared 'serious' funny-animal comics were two-a-penny. Although well-liked by fans of this particular genre, *Hepcats* lacked the deftness of touch to break through to a wider audience. Creator Martin Wagner's art is serviceable if not particularly eye-catching. The scripting, however, is laden down with concerns and good intentions. His nice but whiney college buddies act out a soap-opera plot, complete with dark secrets and sudden returns of unmentioned spouses/relatives, which tries to pass itself off as meaningful drama. The reader swiftly gets the feeling that Wagner loves his creations to bits, getting so involved with them that he cannot be objective, to the detriment of the story. The cumulative effect can be both dull and irritating. The Antarctic issues begin with a new colour story in 0, but then simply reprint the first twelve.~FJ

HERBIE

ACG: *23 issues 1964-1967*

A+: *5 issues 1990-1991*

Dark Horse: *2 issues 1992*

ACG: *1 issue 1996*

In thirty years nothing has approached the surreal whimsy of *Herbie*, although *Flaming Carrot* is a spiritual cousin. Débuting in *Forbidden Worlds* 73, and returning in 94, 110, 114 and 116, Herbie Popnecker is presented without an origin. He's a near-somnambulant little fat kid with coke-bottle-bottom glasses who can do anything and is known the world over by human and animal alike, but hides his abilities from his parents, turning the other cheek when referred to as "a little fat nothing" by his father. For variety, Herbie is also an occasional superhero, The Fat Fury, with a sink plunger on his head and a threat of "Bop you with this here lollipop". Without the comic before you it sounds pathetic, but conceive attempting to describe the humour of *Monty Python* to an alien. It can't be done, it has to be experienced, and so it is with *Herbie*. It's the non-existent immaculate 1950s TV suburban life twisted 180 degrees and ironically produced at the birth of drug culture by two men already well into middle age. Writer Shane O'Shea (one of many aliases used by ACG editor Richard Hughes) and artist Ogden Whitney concoct bizarre fantasies in which Mao Tse Tung is fed worms and uniformed animals aid George Washington in defeating the English. It's all presented in totally po-faced fashion, with Whitney excelling at the realistically proportioned art extending the joke. A generation will testify to the appeal of Herbie, so while recent reprints have sunk without trace, a collection is surely more practical. The Dark Horse issues provide cheap samplers of the original material and let John Byrne have a shot at approximating it, which he does with aplomb. The ACG that published the 1996 issue bears no relation to the original publishers, and their issue has a new story (originally prepared for Dark Horse) with astoundingly shoddy Dan Day art.~FP

Recommended: 1-23

* Available in a collected edition

HERCULES

Charlton: *13 issues 1967-1970*

A late addition to the Charlton line of Action Heroes, *Hercules* was the only title to survive their 1968 cancellation. Written by Joe Gill and drawn by comics evergreen Sam Glanzman, the young demi-god's earthly adventures got more and more psychedelic before cancellation in 1970. Steve Skeates and Jim Aparo produce the 'Thane Of Bagarth' back-up strip in the early issues. Issue 1 was reprinted as a one-shot black and white magazine in 1968.~SW

HERCULES

Marvel: *4 issue miniseries 1982*, 4 issue miniseries 1984, Graphic Novel 1985, 3 issue miniseries (Hercules and the Heart of Chaos) 1997*

Hercules had around for fifteen years with but one ordinary solo appearance in *Marvel Premiere* 26 before writer and artist Bob Layton took interest. Hercules is banished from Olympus to learn humility, and acquires a robotic being, The Recorder, whose task is to record the exploits of Hercules as they carouse around the galaxy. The first series is consistently funny, and generated a second, in which the jokes about a vain, yet genial, musclebound clod begin to wear a little thin (although there are still many amusing moments). By the time a graphic novel followed the idea had been bludgeoned to death. That's still better, though, than the 1990s miniseries lacking Layton, almost any humour and all sparkle, in which Hercules could have been replaced by any other Marvel superhero to little discernible difference. *Thor* 356 is, to all intents and purposes, also an okay Hercules solo, and Layton delivers a short in *Solo Avengers* 12.~FP

Recommended: Series one 1-4, Series two 1

HERCULES AMONGST THE NORTH AMERICANS

Penguin: *1 volume 1986*

This collects the very funny strips of the same title produced by Mark Marek for various magazines and anthologies. The Greek demi-God of myth is placed in the USA where he holds down blue collar jobs utilising his great strength, while in a state of perpetual befuddlement at the modern world. The bathos is very finely observed, and the scenes of Hercules confidently applying the skills and social conventions of ancient Greece to everyday situations, hilarious. Marek's distorted, scratchy and seemingly crude art will be very off-putting to many, but those who venture through it will be rewarded.~WJ

Recommended

HERCULES: The Legendary Adventures

Topps: *5 issues 1996*

Quality tie-in to the hit TV show with scripter Roy Thomas in his mythic/historical element providing solid adventure entertainment. Jeff Butler and Steve Montano are equally dependable on the art chores, and fellow TV star Xena: Warrior Princess appears in 3-5. No-nonsense comic storytelling, and dedicated watchers should be satisfied readers.~WW

HERCULES Unbound

DC: *12 issues 1975-1977*

The appealing combination of José Luis Garcia-Lopez and Wally Wood draw 1-6, taking the Hercules of mythology into an alternate Earth dying through nuclear warfare in 1986. Hercules has good reason to be peeved, having been chained to a rock for a thousand years, and his mood darkens on learning that his old enemy Ares is behind the war. With 7 the series is used to tie up a few loose ends in DC continuity as Hercules and companions roam the devastated planet; it's ably illustrated by Walt Simonson. Every issue is better than average, with the encounter with the Atomic Knights in 10 and 11 a good sample. Commendably, the series was actually properly concluded when the sales dried up.~WJ

THE HERETIC of Little Faith

Dark Horse: *4 issue miniseries 1996-1997*

A forty-something old-style superhero undergoes a transformation at the hands of celestial entities in order to save the world. Joe Phillips' story is disjointed, with too many seemingly throwaway ideas included for no good reason and other items unexplained. Why is our hero called the Herectic, for instance? Because all decent names are already copyrighted? That doesn't prevent his wife being named Nike, surely product placement of the daftest kind. The abrasive Heretic has his moments, though, although few are in 4, and the lead strip is a work of genius when contrasted with Brian Stelfreeze's back-up 'Maximum Velocity'. That's seven pages each issue of total cack.~WJ

HERMES VS THE EYEBALL KID

In a story from Eddie Campbell's *Deadface* continuity, the Eyeball Kid and Hermes finally sort out their differences, unaware that Chyson, god of Capitalism, has made a pact with the Society of Evil. As the ancient enemies escalate the slaughter and Chyson and the Society double-cross each other, Joe Theseus tries to prevent the unravelling of reality. Witty and entertaining, but hard to read without considerable back story. Originally presented in **Dark Horse Presents** 77-85.~WW

HERO

Marvel: *6 issue miniseries 1990*

Coby Pace, self-centred 1980s business courier, is transported to a fantasy world to become a hero despite himself. Occasionally amusing, but by and large no better than the fantasy it parodies.~FP

HERO ALLIANCE

Sirius: *2 issues 1985-1986*
Wonder: *1 issue 1987*
Innovation: *Series one 18 issues 1989-1991, series two 4 issues, 1 Special 1991-1992*

Despite the needlessly gratuitous good-girl art which always formed a major part of the series, *Hero Alliance* generally presented a solid superhero yarn with entertaining soap-opera overtones in a number of sub-plots which often outdid the main action and probably accounted for the series' surprising longevity.~JC

Luke Cage HERO FOR HIRE

Marvel: *16 issues 1973-1974*

Consciously introduced as Marvel's first ongoing title featuring a black superhero, it didn't get off to a good start with Luke Cage introduced as a petty criminal who's framed and imprisoned. He participates in cell-regeneration experiments in exchange for parole, and they leave him with bullet-proof skin and vastly increased strength, which he uses to set up as a hero for hire. The ill-judged background aside, Archie Goodwin and George Tuska provide an acceptable origin story over two issues, but the remainder of the run under lesser hands is laughable. Consistent use of 1970s street slang and fashion make this read like a poor blaxploitation movie. The title changed to *Power Man* with 17.~FP

HERO HANGOUT: Bolt and the Multibolts/J-Squad

Enthusiastic superheroics with a comedic bent from Bill Black, R. Lee Brown and Brad Gorby.~WW

HERO HOTLINE

DC: *6 issue miniseries 1989*

After their critical if, sadly, not commercial, success with *'Mazing Man*, writer/artist team Bob Rozakis and Stephen

---

* Available in a collected edition

DeStefano placed this project squarely in the working class of the DC Universe. Hero Hotline is an agency of freelance superheroes available on a work-for-hire basis to do the jobs the big names don't have time or inclination for. Each character is well-rounded, with their own reasons for not wanting to live "The Life" full-time. Microwavabelle is a widowed mother of three, and needs flexible work hours; Hotshot's works to get his nagging mother off his back; Diamondette's only doing the gig to pay her way through medical school, and their interaction is appealingly portrayed. Kind of a superheroic NYPD Blue, only with more overt comedy. It's Rosakis' best writing to date, and DeStefano's pencils, ably backstopped by veteran inker Kurt Schaffenberger, make inventive use of page layout, particularly in sequences dealing with the elderly and irascible elastic hero Stretch, who's over-extended himself so many times over the years that he never quite snaps back into shape! Charming, funny, clever, and sadly ignored; a 'prequel' serial (actually prepared after 1 was completed) ran in *Action Comics* (when weekly) 637-640, and should be sought out for the full picture.~HS

Recommended: 1-6

HERO SANDWICH

Slave Labor: *9 issues 1988-1991**

The Hero Sandwich detective agency is a collection of oddballs. There's an elastic man named Richard, an ordinary human who bears the weird name of Silver Scorpion, a gentleman named Lee with a head that is a dark circle, a crazed female commando named Allison, and Rachel, who runs the agency. The origins of the group's appearances, powers and psychoses remain unrevealed, as we join them bang in the middle of the first story, and things never slow down enough for explanations. In 1-4, the agency is hired by a vampire to track down a murderous vampire wannabe who is, allegedly, giving the species a bad name. Dan Vado's script is skilful and witty, and Chuck Austen's art fluid and appealing. The second story, in which the team has to confront ghosts from their pasts, is less interesting, though sequences of character interaction are still well presented.~HS

HERO ZERO

Dark Horse: *One-shot 1995*

This is a rather pointless comic, starring as it does another size-changing superhero but offering no new insights into anything at all. The artwork's not bad, crisp and sharp in style, but overall the book lacks its own personality.~NF

HEROBEAR AND THE KID

Astonish: *5 issues + 2000 to date*

Mike Kunkel's pencil drawings, reproduced with working lines showing, are of a clever boy and his toy bear which comes to life to fight an evil robot. It's a little close to *Calvin and Hobbes*, really, but very charming and accomplished, although the awkward page layouts suggest an animation artist's unfamiliarity with comics storytelling. This strip would benefit from neatly finished art, colour on more than just the bear's red cape, musical effects and funny voices.~GK

HEROES

Blackbird: *6 issues 1986-1988*

Sadly overlooked mutant team title. On the writing side John Nordland II has some intriguing ideas, not the least of which is personalised narrators who also interact with the cast, and artist John Nordland's grey tones work extremely well, looking like nothing seen in comics before or since. The characters take precedence, and the intriguing foreshadowing and the scenarios set up make the premature demise a shame, but that shouldn't discourage sampling of what was published. 1-3 were magazine format*.~FP

HEROES

Milestone: *6 issue miniseries 1996*

Following the dissolution of the covert Shadow Cabinet, six of its members – Iota, Payback, Donner and Blitzen, Starlight, and the part-timer Static – decide to go public as the first high-visibility superhero group of the Milestone Universe. Establishing a headquarters in New York's Chrysler Building, they set off adventuring, but find that the path to international celebrity doesn't run smoothly. Their 900 number 'Hero Hotline' keeps getting tied up with crank calls, discarded spouses turn up as Lords of the Innerverse (don't you just hate it when that happens?), and the public doesn't take kindly to Donner's cheery media acknowledgement of her and Blitzen's lesbian relationship. A cheerful, high-spirited miniseries by Matt Wayne and illustrator ChrisCross.~HS

HEROES AGAINST HUNGER

DC: *One-shot 1986*

Of course, if he really wanted to stamp out world hunger, Superman could just perform that coal-into-diamonds trick of his and turn the world's poor into millionaires overnight. Back in the real world, sadly, the Ethiopean famine had no such omnipotent saviours; hence this fundraiser from DC and a cast of thousands. Disappointingly, the Jim Starlin story involves Superman and Batman beating the stuffing out of a big, green alien, and the starving seem no better off at the end than they were at the beginning. On the plus side, all manner of the great and good are present and correct (Jack Kirby, Berni Wrightson, Curt Swan, Dave Gibbons, Gray Morrow et al) and for what it's worth Joe Kubert's pages are especially nice. The contents were never the comic's main selling point, though, and one hopes lots of money was raised.~DAR

HEROES & LEGENDS

Marvel: *One-shot 1997*

Odd, tongue-in-cheek look at the changeover between the original Avengers line-up and the second team. Includes pencils by Steve Ditko, Gil Kane and other old guard talent.~DB

HEROES FOR HIRE

Marvel: *19 issues, 1 Annual 1997-1999*

In 1997 the majority of Marvel heroes are drawn into another universe and presumed dead, so the surviving metahumans take up the slack. One of the groups striving to do so is this commercial venture organised by Iron Fist with backing from Oracle, Inc., the company owned by Prince Namor, the Sub-Mariner. Since Namor is among the missing, his colleague Jim Hammond, formerly the Human Torch, is appointed chief of operations at H4H (as the team becomes known). Iron Fist is field leader of a rotating coalition of super-beings, core members including the Black Knight, Hercules, and the White Tiger, a female martial artist with an enigmatic past. Writer John Ostrander appears to be attempting to recreate the critical success he enjoyed with the 1980's incarnation of Suicide Squad. Many of the same elements are present: suspect motives, conspiracies, hidden agendas, and that character interaction is generally the strongest point. Also, Ostrander's determination to display underused characters is in full throttle; She-Hulk, Luke Cage, Ant-Man, Sersi and Thena of the Eternals, Shang-Chi and Jessica Drew (the detective formerly known as Spider-Woman) all pass through, in addition to more commercial guest-stars such the Punisher, Deadpool and the inevitable Wolverine.

For all the ingenuity of the plotting, the series never really comes to life. The stories are too crowded, and while a nice sense of burgeoning friendship between some of the cast is present, too many others remain 'hero X, whose power is Y', and nothing more. Pascual Ferry's art remains pedestrian.~HS

HEROES INC presents CANNON

Armed Forces Dist: *1 issue 1969*

CPL Gang: *1 issue 1976*

Although containing broadly the same strips, these two comics had quite different origins. The first was a regular-sized colour comic created for the armed forces, while the second was a black and white magazine aimed at the comic fan market. Both featured editor Wally Wood's 'Misfits' strips and the hard-boiled spy Cannon, pencilled in each issue by Steve Ditko. Wood's art is terrific throughout, but the stories rather let things down. Rounding out each issue were another Wood strip, the humorous 'Dragonella', and Mike Vosburg's humdrum superheroine The Black Angel in 2.~DAR

Will Eisner's HEROES OF SPORTS

A-List Comics: *1 issue 1999*

Intended as a miniseries, only the first of this shoddy series was published. As usual with A-List comics there is no editorial material or credits, but it contains short text pieces on sportsmen and women (including Kitty Rawls, Joe Louis, Babe Ruth and Cliff Montgomery) accompanied by loose sketches of them in action or as portraits. The only clearly discernible signature is that of 'Erwin', but what this has to do with Will Eisner is left a mystery.~NF

HEROES REBORN

Marvel: *One-shot, ('Special Collectors Issue') 1996, 4 issue miniseries ('The Return') 1997, 7 one-shots ('Doomsday', 'Ashema', 'Masters of Evil', 'Rebel', 'Remnants', 'Young Allies', 'Doom') 1999-2000*

The Heroes Reborn project saw four major Marvel properties transplanted into an alternate reality for a year to be reinvented by hip Image creators whose split from Marvel five years before had resulted in the company sinking into a creative quagmire. Whether Marvel needed a breath of fresh air or simply a chance to rethink its strategy, in general, the experiment was a success and quality improved immeasurably afterwards. The miniseries by Peter David and Salvador Larocca (with virtually every Marvel regular taking co-credit for the concept), merges two realities as Franklin Richards breaks through to the world to which he inadvertently banished his parents, thus making them aware of the false nature of the reality in which they're living. As the Heroes Reborn Earth is about to be destroyed by their version of Galactus, the heroes decide that all things considered, it's time to go home, but Dr. Doom pontificates that he may have a better thing going where he is... This leads to a revisiting of the Heroes Reborn universe in a series of one-shots, tail-ended by the 'Doomsday' and 'Doom' issues, which deal with Doom's return to the alternate reality, which has been left a devastated wasteland ripe for the conquering. As Doom takes control, the intermediate issues focus on the individual experiences of the heroes who have been trying to hold things together in the meantime. 'Ashema', featuring the Celestial who chose to give up her godhood to remain with her mortal friends is the pick of the bunch, not least because, like the Doom issues, it's written by Chris Claremont, and along with them forms a nice continuity of its own. Repercussions from the series are further dealt with in *Fantastic Four* 25 (series three), also by Claremont, while Mark Bagley revisits themes from 'Young Allies' in *Thunderbolts*. Starting in 51 of that title, the alternate world becomes a regular feature. The 'Special Collector's Issue' is a taster-cum-intro to the characters and concepts for new readers.~JC

HERU Son of Ausar

Afrocentric/Ania: *1 issue 1993*

Pitifully inept account of ancient Egyptian deities in the form of horny bodybuilders with X-Men-like superpowers and with psychedelic colouring. It's further inappropriately given to slight misquotations from Shakespeare and the Gospel of Saint Matthew. Nice card insert by Erik 'Savage Dragon' Larsen!~GK

HEX

DC: *18 issues 1985-1987*

In the year 2050, five years after a world-ravaging nuclear holocaust, Reinhold Borsten provides entertainment for high-ranking members of the Conglomerate that controls the life-saving soames (used to purify irradiated water). Using a time-machine, he brings specimens of warriors from different eras and keeps them drugged before staging private battles. For a Western gunfight he collects Jonah Hex and so unleashes a one-man army on this future world. Hex quickly adapts to the new technology and succeeds in destroying the time-machine and Borsten's operation. Teaming up with Borsten's daughter, Hex sets out to investigate the new era, while looking for a way back to his own time.

Michael Fleisher claims that low sales on *Jonah Hex* weren't the primary reason for creating this series, that he'd always wanted to do something "about a bleak, war-torn world where civilised moral values were dead", something without superheroes. It didn't take long before they began to appear, though. A future Batman popped up in 11 and there's The Dogs of War in 13. With 15 Keith Giffen took over as artist and the story involved Hex in an alien invasion. Giffen's impressionistic artwork was entirely inappropriate for the hard-hitting action. Having Hex meet his own stuffed and mounted corpse at the end of 18 was a sad end to Fleisher's vision for one of DC's great Western characters.~NF

HEY MISTER

Insomnia Comics: *2 issues 1997*
Top Shelf: *6 issues +, 1 Special 1998 to date*

There's nothing very much wrong with *Hey Mister*, but neither is there anything very compelling about it either; it exudes a feeling of being a bit second-hand and slightly second-rate. Writer/artist Pete Sickman-Garner specialises in depressing, semi-realistic comedy strips involving a core trio of cynical losers. Mister, Young Tim and Aunt Mary live lives of quiet desperation, watch porn a lot, swear a lot, take drugs a lot, live in poverty, work awful Mcjobs, despise hippies and straights, bemoan the impossibility of finding happiness in a consumer society etc. etc. Unhampered by any great commitment to rigid continuity or realism, Sickman-Garner manages to work a fair amount of mileage and variety out of this basic set-up. Nevertheless, *Hey Mister* is, in its way, as much a prisoner of pre-established generic slacker conventions – laid down by Peter Bagge a decade or more ago in his seminal *Hate* – as any piece of formulaic superhero pap. Wouldn't it be great to read an 'alternative' comic about HAPPY people just once in a while? Sickman-Garner doesn't noticeably improve as an artist either, and even the later issues of the comic are rendered in a rather basic, regulation alt style. The 'Afterschool Special' collects minicomics produced by Garner before the regular series, although you wouldn't know, while the other issues are available in two further collections.~AL

HI HORSE

Bishakh Som: *4 issues + 2001 to date*

Regular contributors, Howard John Arey, Andrice Arp, Bishakh Som and Joan Reilly, offer an intellectual approach to comics in this anthology, preferring comment rather than stories per se. Visually interesting, each creator uses a different stylistic approach, depending on the material. This is usually offbeat, like Som's 'A Turnip's Progress' (2-4), Arey's Robert Crumb-influenced 'Night of the Bully, or a Reilly character's love and fear relationship with the telephone (4).~NF

HIEROGLYPH

Dark Horse: *4 issue miniseries 1999-2000*

Creator Ricardo Delgado has relied on his Moebius-influenced images to do most of the storytelling in this science-fantasy involving astronaut Francisco Chavez's exploration of a desert planet by hover disc. Pyramids, waterfalls and superbly weird dinosaur camels are just a few of the year 2209's visual treats. Unfortunately Delgado's great flair for conveying texture and scale is not complimented by much writing or plotting ability. Chavez's sudden discoveries are gigantic and would be visible for miles and the episodic nature of the story is not helped by the limp pacing. Nice looking but desiccated.~SW

HIGH ADVENTURE

Kitchen Sink: *1 issue 1973*

A very odd comic to have come from Kitchen Sink at the time. While the remainder of their titles featured the best and worst of the counterculture, this, nudity apart, could have been stories from Warren or Marvel's contemporary black and white magazines. There's some early art from the team of Steve Leialoha and John Pound, Mike Royer proving he can pencil as well as ink, and two stories from Mark Evanier, who would certainly progress to better things. Only now of interest as a curiosity.~FP

Amazing HIGH ADVENTURE

Marvel: *5 issues 1984-1986*

It's shameful that there's only been one mainstream historical adventure title in the past thirty years. This is an obvious attempt to emulate the later issues of *Two-Fisted Tales*, with four stories to each issue, and the art from the likes of John Bolton (4), Mike Mignola (3) and EC veteran John Severin (1, 3, 4) is largely excellent. Sadly, the writing doesn't generally reach the standards of the artwork. The best all-round issue is 3, but there's at least one excellent story every issue. Standouts include Steve Englehart and Severin's tale of Cromwell (1) and Mike Baron and John Ridgway's 'Skyhook' (5).~WJ

Recommended: 3

HIGH CALIBER

Caliber: *4 issues 1997**

Another anthology title from Caliber, this time starting in flip-comic format, before piggybacking other titles. 'Ghost Sonata' runs through all four issues, encompassing passion, greed, revenge and a man with an unusual gift, although it's a rather pointless set-up for a final segment revelation. This would appear to be Gary Reed's attempt at a 19th century Russian novel, with its tormented, guilty and reclusive cast, and although a tad ponderous in places it's a good effort, well drawn by Andy Bennett in a scratchy, angular style. Artist Mike Perkins also holds his end up on an impenetrable script in 1-2, as does Jim Schumaker on 'Stained', backing up 3. That's a very awkwardly told story with little logical rationale, but Schumaker was obviously destined for better things. 4 doubles as *Raven Chronicles* 15.~WJ

HIGH ROADS

Cliffhanger: *6 issue miniseries 2002**

America's naivest farm boy turned soldier, Hitler's unknown mistress, a midget actor and a failed kamikaze unite at the tail end of World War II. Their purpose is to liberate a pendant of incalculable wealth from Hitler. Except it's not quite as easy as that. Scott Lobdell writes a professional and fast-paced comedy adventure, and while some plot twists are telegraphed, many still surprise. It's stunningly pencilled by Leinil Francis Yu for a more than diverting read.~FP

HIGH SHINING BRASS

Apple: *4 issue miniseries 1991*

Vietnam specialist Don Lomax relates the story of Robert Durand, who's part of a team co-ordinating raids, ambushes and agitation from within North Vietnamese territory, and covertly into neighbouring countries. He gradually becomes aware that he's surplus to requirements and that his superior officer has ordered him and his squad to be disposed of. It's the likely interference in the war and manipulation of Durand by the CIA that's the central point of his story, and this really only comes to the fore in the final issue. 1-3, while decent war comics, could be three issues of any of Lomax's other titles. The sometimes heavy-handed inking of Rose Lomax renders this a little less desirable, though.~WJ

HIGH STAKES ADVENTURE

Antarctic: *1 issue 1998*

This anthology hosts three features. 'The Big Game' has a Texas Ranger teaming up with a thousand year old oriental sharing his demon fighting adventures and his immortality. 'Giant Fighters has the exploits of a team of interplanetary troubleshooters, and 'S.E.A. Force is thrills and spills with the crew of the Submersible Exploration Ark. Produced by Shannon Denton's Meteor City studio, the art style is an accomplished clearline animation one. The clunky scripts are credited to Kurt Hathaway who clearly hath not. A glorified portfolio low on entertainment value, although 'The Big Game' shows old-style potential.~SW

HIGHWATER BOOKS Graphic Novels

The factor uniting almost all the Highwater Books graphic novels is a childish quality, whether in the presentation, the art, successfully pulling the reader back to the wonder of childhood, or subverting the traditions. It's Greg Cook's *Catch As Catch Can* that achieves the latter most successfully, combining the manic inspiration of a *Ren & Stimpy* cartoon with childhood familiars such as the wolf and the gingerbread man. In this blue and cream book, the gingerbread man has to go on the lam after the police spot him buying cigarettes for the kids. On his journey he survives several perilous encounters. It's funny, silly and drawn in a gloriously amorphous style.

In Geoffrey Willan's brilliantly written comedies of British public school life there's a character called Fotherington-Thomas, caustically referred to by his schoolmates as "uterly wet", who runs about shouting "Hullo birds, hullo sky, hullo trees". He now turns out comics as James Kochalka, whose work is so feckless and insubstantial you fear it will blow away with the page turning. In *Kissers* he obsesses on minor disagreements with his girlfriend (of the sort that couples have every day and forget five minutes later) and provides obvious counterparts to how he views their relationship in a bird and a cat. Most insecure cartoonists could cover that in a few pages, but Kochalka fills 168. The only very moderately more interesting *Tiny Bubbles* covers much the same ground at similar length, with Kochalka this time likening himself to a self-doubting robot. *Kissers* also includes a CD of Kochalka's music (very Jonathan Richman) which suggests his entire artistic output might incorporate a form of obscure irony. To label it complete crap does no service to the accomplished cartooning, but it's wasted effort. The art of Brian Ralph shares many points with Kochalka, but his work is far stronger. His *Climbing Out* is the story of a strange monkey man working in mines with cavemen and homunculi. One day he discovers the means to escape his world. It's a very quick read, but a charming one. So is Ralph's *Cave-In*, the story of another man in a cave looking for a way out. It's a thick, small square book, and the experiment of printing the story in white and single colours other than black works, as the man's journey pries open the imagination. Be warned, though, it leads nowhere.

A wonderful Seth cover of the 1960s X-Men adorns 1997's *Coober Skeber*, a strangely titled anthology of small press creators either appropriating Marvel characters for their own use or producing pin-ups. By and large it proves a lack of imagination wasn't just an affliction unique to Marvel in 1997, exceptions being Pete Cardin's funny Devil Dinosaur piece, while Ron Rege Jr's examination of high school problems via Spider-Man is quite poignant. It's for *Skibber Bee-Bye* that Rege is most acclaimed, and which is Highwater's highest profile volume. It defies a brief description. The apparently disconnected chapters involve recognisable humans, albeit with strange afflictions, interacting with flying elves and a silent blue elephant. They react to stimuli, and descend into grotesque rituals, and in the middle there are a few pages concerning phrases about the California Gold Rush. It is very much about a mood rather than a narrative, although over 256 pages a narrative eventually emerges. There's a childish simplicity to the art and design, but it's detailed and also disturbs. Although not artistically similar, people who admire the work of Jim Woodring and Gary Panter should definitely investigate further. Others will either connect or not.

The one exception to the childish quality is Matt Madden's *Odds Off*, which, to the casual glancer, is likely to have the most widespread appeal, being the most traditional book. Shirin is working hard to enter medical school, and a casualty is her drifting relationship with Morgan, who's becoming obsessed with watching a woman on a TV programme teaching French. He's also the object of lust for Lance, a frustrated writer. Surreal and forced slips into symbolism apart, it's the classic structure for drama, and the art concentrates on people above all else. While in an expressive cartoon style, it does beg considering if this wouldn't have worked better as a novel.~FP

HIGHWAY 13

Slave Labor: *8 issues 1999-2002*

Cool dude Rick and his werewolf pal, Garth, are road-tripping their way across the spooky side of the USA, looking for the weird side of life and having adventures with goblins, ghosties, witches molemen, spacefreaks and other assorted fright night alumni. Cartoonist Les McClaine blends Jack Kerouac with Scooby-Doo in hit-or-miss outings that should appeal to most kids of all ages.~WW

HILLY ROSE

Astro: *9 issues 1995-1997**

Hilly Rose was B.C. Boyer's return to comics seven years after the cancellation of *The Masked Man*. It's science-fiction adventure with a strong humour element used to undercut an otherwise hard-boiled tale. Hilly is a reporter who owes her job to her father's influence. He's a rich crimelord who's been humouring her and is therefore surprised and horrified when she's offered a higher-profile off-world job. As Hilly's investigations into a series of bombings lead her inexorably towards her father, he employs increasingly vicious methods to put her off. *Hilly Rose* is interesting and funny in places, but lacks a coherent voice. The serious side is sometimes lost among the pastiche elements and jokes, and is stopped mid-story.~NF

HIP HOP HEAVEN

Boomtown Productions: *1 issue 1992*

Strange attempt to produce a comic about then contemporary black culture in the watered-down *Keenan and Kel* mode. Rex Perry is a cartoonist with a good fluid style, but it's the odd chuckle rather than laughs on offer here.~FP

HISTORY OF THE DC UNIVERSE

DC: *2 issue microseries 1986**

George Pérez beautifully renders Marv Wolfman's tale, in text form, of DC's Universe, from the beginning of time to the far-flung future. The entirety demonstrates what a splendid heritage DC has in terms of characters and scenarios. We see the birth of the Guardians of the Universe, and progress through encounters with, just to name a few, the cave boy Anthro, the Amazons of Paradise Island, the Viking Prince, the Wild West with Jonah Hex, Enemy Ace in World War I, the Justice Society of America and Sgt Rock during World War II, Superman, the New Gods, Teen Titans, and into the future with Star Hawkins and the Legion of Super-Heroes, before ending with the Time Trapper. Pérez had always been noted for a good sense of design, and, freed from the tight restrictions of having to tell a story, he really pulls out the stops in providing impressive collages and frescos. Later continuity adjustments made some of the events in this series redundant, but DC buffs will nevertheless find it a useful reference guide.~HY

Recommended: 1-2

A HISTORY OF VIOLENCE

Paradox: *Graphic Novel 1997*

Tom McKenna appears to be a normal, small-town family man, until he becomes a media celebrity after stopping thieves at his diner, at which point some vicious killers decide he's a man they've been hunting for twenty years. John Wagner's story is eloquently told, yet brutally honest in its depiction of both how easy and how hard violence can be. Despite some elements of implausibility, he still manages to spring some surprises as well. Vince Locke's scratchy, impressionistic artwork (much like that of Guy Davis), seems designed to soften the impact of some of Wagner's scenes, and may not be to everyone's taste, but is effective in service to the script.~NF

HITCH HIKER'S GUIDE to the GALAXY

DC: *3 issue miniseries 1993*

Prestige-format comic-book version of the first four radio fits or first book, inevitably abridged. It is thus consistent with the myriad other *Hitch-Hiker* adaptations in so far as they are all completely inconsistent with each other. DC had one supremely important decision to make for this series and got it right. They chose a British writer, John Carnell, to create this transcription. The metaphysical imagery of Steve Leialoha's whimsical pencils, particularly on the out-of-phase *Guide* narrations, is really particularly effective. Continues in Restaurant at the End of the Universe.~APS

HITMAN

DC: *61 issues (1-60, 1,000,000) 1 Annual 1996-2001*

Introduced in *Demon Annual* 2, Tommy Monaghan is a professional killer with a few differences. He's got X-ray vision. He can read minds. He only kills people who deserve it. Most important, though is that his creators don't let almighty continuity get in the way of a good story. Hitman is initially modelled on the Hong Kong action movie. Plots are minimal, men are men and the bullets never run dry. Garth Ennis and John McCrea play silly buggers with the DC universe in a procession of blackly funny tales that deal with fatherhood, getting laid and true friendship amidst an absolute welter of blood, guts and booze. The series starts with Tommy and fellow hitmen just chilling out in Noonan's Sleazy Bar, a hangout for contract killers, swapping stories as demonic forces plan his doom and Tommy takes on a contract to kill the Joker. As the series progresses the bar, run by the closest thing to a father that Tommy will ever know grows to be one of the most evocative "characters" in the series, as well as the generator of a good deal of the action and comedy by-play. In short order Tommy gets on the bad side of local and Federal Government, especially when he refuses a gig to assassinate superheroes for a covert agency that distrusts freelance law-enforcement. He will take on corrupt superheroes, mad scientists, an insane flotilla of weird gangsters and goombahs, and a regular parade of super guest-stars turn up for him to embarrass. He pukes on Batman in 1, gets Green Lantern drunk in 10, and remember X-ray vision? Catwoman guests in 'Ace of Killers' (15-20*).

Ennis alternates between straight action comedy such as when Tommy and best friend Nat the Hat go on retainer for the local research lab, clearing up any potentially embarrassing problems that might affect their grant status (such as the lab assistant with a doorway to a hell-dimension up his bottom in 51-52) or the dinosaur incident that nearly devastates Gotham City(44-46) – and genuinely moving insights into the true nature of his profession such as when the SAS come after Tommy and Nat for their accidental killing of serving British soldiers during operation Desert Storm (23-27*) or the 'Closing Time' story arc that ends the series (53-60). It's always entertaining storytelling that owes as much to Sam Peckinpah and Buster Keaton as to Jack Kirby and Alan Moore. The annual, part of the 'Pulp Heroes' event is an impressive tribute to the westerns of Sergio Leone and is drawn by Ennis' long-time co-conspirators Carlos Ezquerra and Steve Pugh.~WW

Recommended: 13-14, 23-27, 53-60

HITMAN / LOBO: That Stupid Bastich

DC: *one-shot 2000*

This is a very funny comic by Garth Ennis and Doug Mahnke, completely disrespectful of Lobo. After shooting Lobo's eyes out, Hitman, Tommy Monaghan, spends most of the issue running away (though still managing to trick

---

* Available in a collected edition

Lobo into fighting his way through a few of Tommy's enemies) before Sixpack's team turn up to help him out. Mahnke's artwork is tightly, but coarsely inked, matching the action and setting.~NF
Recommended

HITOMI And Her Girl Commandoes

Antarctic: *4 issue miniseries ('Shadow Hunter') 1992, 10 issues (Hitomi II) 1993-1997*

In this *Ninja High School* spin-off, the team of Hitomi, Mikki, Nemuri, Fujiko and Asashi try to retrieve a device stolen by the Amerasia Guild ('Shadow Hunter') and then the hunt is on for six crystals linked to the off world Geohammer. Through their friend, Isaac, the series explores issues of racism, but characterisation is otherwise left to humorous episodes during breaks in the action. Creator, Dave Wilson, has an excellent manga style, but the series is let down by near incoherent storytelling.~NF

J.R.R. Tolkein THE HOBBIT

Eclipse: *3 issue miniseries 1989-1990**

Hampered by restrictions, the comic adaptation is never quite able to convey the entire book. This begins well, though. For his part artist David Wenzel refrains from cuteness. His dwarves are careworn weatherbeaten creatures, his Gandalf suitably noble, his Gollum suitably deranged and his vistas beautiful. Only with the hairy feet of Bilbo Baggins does he lack the necessary touch. Three issues permit breathing space, but by 3 writer Chuck Dixon is incorporating large chunks of captioned text and requires massive word balloons for the voluminous amount of dialogue, resulting in cramped illustrations. For this amount of text one might as well read the book. Fans of *The Hobbit* may enjoy a new view of an old friend, but for all the fine illustration this is another compromised adaptation.~FP

HOKUM AND HEX

Marvel/Razorline: *9 issues 1993-1994*

Mediocre offering from the desk of Clive Barker as interpreted by writer Frank Lovece and Anthony Williams. Trip Monroe is a bad stand-up comedian given the power and role of Earth's defender without his knowledge and against his will. Now he must reluctantly defend the world from invading extra-dimensional monsters. Derivative tosh.~WW

HOLIDAY OUT

Renegade: *4 issues 1987*

Feeble local-newspaper humour strips accompany feeble humour-comic strips. Avoid.~WJ

Walt Disney's HOLIDAY PARADE

Disney: *2 issues 1990-1991*

Drawing the material largely from *Dell Giants* and *Christmas Parade* comics, the Carl Barks contributions to each issue apart, these seasonal reprints hadn't been seen for at least a generation. Under charming wraparound covers all the Disney characters famous in the 1940s and 1950s are present, with Talespin additionally represented in 1. A rare reprinted Tony Strobl Uncle Scrooge story features in 1, but otherwise the material is charming and professional without ever being anything more.~WJ

HOLLIDAY

Saddle Tramp Press: *2 issues 2001-2002*

While there's no doubting the enthusiasm of the creators, it's unclear who this was intended to appeal to. The liberties taken with Doc Holliday's life by the inclusion of incongruous supernatural encounters will put off those interested in the historical legend, while others will wonder about the unexplained bouts of coughing, for instance. And for a comic about a gunfighter there sure are a lot of talking heads.~FP

THE HOLLOW GROUNDS

Humanoids Publishing: *3 volumes 2000-2001*

The earliest volume originally, 'Carapaces' contains short science fiction tales on a theme of shells. Amidst the ruins of a civilisation, a couple remove their metal sheathes to have sex. A bio-robot, powering the world, reaches up from its isolation underground to try to touch humanity. The Fog Cutter is constantly interrupted from his obsessive sculpting of the beautiful Ursuline. In 'Zara', we learn that *The Hollow Grounds* is a system of seven planets, of which Zara is the fifth. It has two concentric layers that are independent and support separate civilisations, one horizontal, but constantly migrating so that they're always at the lowest level, the other operating vertically on the inner core. The adventurous Olive travels from the outer to the inner layer, where she meets the all-female inhabitants, including Nelle, but they're all threatened by a band of male pillagers, who think that the women will be an easy target.

'Nogegon' is the story of Nelle's search for Olive on the planet of the same name, the second in The Hollow Grounds. There, Nelle retraces Olive's relationship with a sculptracer, Natan, while trying to adjust to Nogegon laws, which are based on symmetry.

Luc and Francois Schuiten's beautifully drawn and complex worlds are fascinating, as much for the attention to making them believable as for the adventures that takes place on them. 'Carapaces' seems less accomplished overall, but only in so far as the artwork has more flourishes and is less architectural than the later volumes, which are more detailed and designed. All three volumes have previously appeared in *Heavy Metal*.~NF
Recommended: 'Zara', 'Nogegon'

HOLLYWOOD SUPERSTARS

Marvel/Epic: *5 issue miniseries 1990-1991*

Mark Evanier brings his screenwriting background to a series about a down-at-heel private-detective agency. The series is well written and well drawn, by Dan Spiegle, but the anecdotes incorporated into the stories are far more interesting than the stories themselves or the cast. The real highlights, though, are Evanier's rambling end-of-issue text pages, mixing gossip, jokes and a constant incredulity at the stupidity of Hollywood.~WJ

The HOLO BROTHERS

Fantagraphics: *One-shot 1989, 10 issue limited series 1991-1992*

Jim Rohn's anarchic comedy adventure graduates from *Threat* into a special expanding on their background whilst setting the scene for the epic story of a cosmic coup d'etat in the follow-up series. When their good buddy Danny, the Emperor of the Galaxy is nearly assassinated, the Brothers use their individual skills, strategy, technology and excessive force, to save the Empire. Well-made and fun, but a little dated by contemporary standards.~WW

My Name Is HOLOCAUST

Milestone: *5 issue miniseries 1995*

Introduced in *Blood Syndicate*, Holocaust is a dreadlocked pyrotechnic who decides the time has come for him to have a larger slice of the underworld action in Dakota. This becomes awkward for the top-ranking suited criminals, who manoeuvre the legitimate law-enforcement agencies against him. Hot-tempered and often brutal, Holocaust has to learn the art of compromise in the face of insurmountable odds. The meshing of power and politics in a well constructed and conceived plot from Ivan Velez is combined with a decent supporting cast and acceptable art from Tommy Lee Edwards, and at the end of the series Holocaust is a different man.~FP

HOLY AVENGER

Slave Labor: *One-shot 1996*

There's a decent plot concealed in this mess about a priest discovering a mysterious relic and using it to scare off local hoodlums thereby escalating the situation. The problem is the execution, literally in both meanings of the word. The writing is sluggish and cliché-ridden, and the cast don't act in a rational manner.~WJ

HOLY CROSS

Fantagraphics: *3 issues 1994-1995*

Malachy Coney's stories are set in Northern Ireland, where the constant background of distrust and fear affects everyone. By turns poignant, poetic and amusing, the most readily accessible issue is 3, in which a child retreats from parental abuse into comic fantasies. Don't be deterred by the wildly different art styles of Davy Francis, Chris Hogg and Paul Holden, as each conveys the necessary emotion. Anyone enjoying these should also check out Coney and Holden's graphic novel *The Moon Looked Down and Laughed*.~FP

Recommended: 1-3

The HOLY TERROR

Image: *4 issue miniseries 2002-2003*

In advance of the return of the Silent One, masked wrestler Garcia defeats a bear, but loses his mask. Twenty years later, wrestler Max Maximum is given the mask to change his unpopular image and becomes the Holy Terror, only to start having nightmares about confronting his masked self. Gun-toting Father Mando Navarro and his armoured female assistant look to be the most interesting characters, but the wrestling setting is off-putting and at least in the first issue makes no sense. Phil Hester's artwork can by stylish, but there's too much grotesque flesh on show here.~NF

HOMEGROWN FUNNIES

Kitchen Sink: *One-shot 1971*

This is one of the key titles in underground legend Robert Crumb's canon as home to the notorious 'Whiteman Meets Bigfoot'. Whiteman, a typical middle-aged middle class American is captured by a bigfoot while out camping. This being Crumb, he falls for a female bigfoot and all sorts of sexual shenanigans ensue before his hirsute paramour is captured and dragged off to captivity. The strip encapsulates many of Crumb's preoccupations. There's the moral bankruptcy of middle America, the obsession with powerful women, and, as Whiteman and Bigfoot ultimately escape back to the forest, a rejection of modern society. The comic is rounded out with a rather dubious Angelfood McSpade strips that treads on the dangerous ground of ethnic stereotyping and does Crumb few favours. The comic remains one of Crumb's key works both artistically and thematically, but the sexual content will continue to divide audiences.~DAR

Recommended

HOMICIDE

Dark Horse: *One-shot 1990*

Before *The Mask* the team of John Arcudi and Doug Mahnke were turning out good stories about hard-boiled police detective Ford. This one-shot special is a grim tale of religious superstition and human sacrifice. Further stories can be found in *Dark Horse Presents* 25-27, 48-49 and 53-55.~WJ

THE HONEYMOONERS

Lodestone: *One-shot 1986*
Triad: *12 issues 1987-1988*

The famous kitchen sink sitcom of the 1950s starred Jackie Gleason as chubby bus driver Ralph Kramden. His blowhard schemes and antics invariably involve his spindley neighbour Ed Norton and their respective wives Alice and Trixie. Comic fans might enjoy 6's comic theme with guest appearances by The Lone Ranger, The Spirit and a caped crusader who calls himself Bruce, but otherwise every issue is much of a muchness for anyone not a devoted fan of the show. The writer on the one-shot and then 1-4 is Robert Loren Fleming whose dialogue-heavy scripts are still funny. Publisher Norman Abramoff then collaborates with writer Thomas Edward West on all the lumbering efforts that remain. Artist Vince Masucchia relinquishes the pencilling to Win Mortimer from 4, continuing to ink most issues. Mortimer is drawing all but the facials by 8. The pages are coloured with markers, initially by Musacchia, and have a cheap, pastelly, greetings card look to them. Pure cheese – and not the kind one savours.~SW

HONG ON THE RANGE

Image/Flypaper Press: *3 issue miniseries 1997-1998*

The first issue's introduction suggests this is a 'director's cut', as William F. Wu adapts his own novel. In condensing the novel, though, there appears to be a lot of detail missing rather than restored. After an ecological disaster, bionics and solar energy give mankind a second chance but the world's a harsher place and the 'Wild West' has been reborn. Louie Hong is a control-natural, someone whose body can't accept cybernetic implants. This tells his journey westwards as he accidentally becomes a wanted man, falling deeper into trouble the more he follows the real outlaws to clear his name. Jeff Lafferty's artwork is very distinctive, not at all realistic but suited to the many strange mechanics that Wu invents. As a comedy science-fiction western, it has its moments.~NF

HONK!

Fantagraphics: *5 issues 1987-1988*

Generally well-compiled offbeat humour anthology title combining the best material from British and American cartoonists then self-publishing. Every issue has work by Eddie Campbell, Phil Elliott, David Miller and J.R. Williams. Bob Boze Bell, John Callahan and Glenn Dakin are in most, and there's plenty of other good material, including Marc Hempel's forerunner to Gregory in 2, Dan Clowes in 1 and rare translated Gotlib in 4 and 5. Each issue also contains informative interviews, and Alan Moore text pieces from Knockabout are reprinted in 2 and 4.~FP

Recommended: 2, 3, 5

HONKYTONK SUE

Bob Boze Bell: *4 issues 1979-1980*

Apparently collected from a regional newspaper strip and published by the cartoonist himself, the adventures of the "Queen of Country Swing" are bizarre, but hugely enjoyable. Sue is a goddess of the American Mid-West, mistress of every situation. Whether she's dancing the crap out of Mr Disco, getting abducted by aliens and teaching them to line-dance, road-testing all comers to find the world's Most Mediocre Lover, or reuniting the Beatles and converting them to country swing (hey, they were all alive then, okay?), Sue takes charge and kicks ass, backstopped by her loyal, if insecure, nutritionally unchallenged buddy Donna-Jean. Closest in spirit to the 'street-level' comics of the mid-1970s, more mature than the mainstream but not as gross as most undergrounds, these stories are only dated by the odd contemporary reference. Being in a setting totally alien to most comics readers anyway, the freshness of the character remains unimpaired. In the late 1980s, there were rumours of a new *Honkytonk Sue* graphic novel, 'The Man Canyon', but sadly nothing has surfaced.~HS

Recommended: 1-4

THE HOOD

Max: *6 issue miniseries 2002**

A small-time hoodlum chances on a pair of boots that let him walk on air, and a cloak that turns him invisible provided he holds his breath. Seeing these as his ticket to the big score, he and his accomplice plan to rob a big league gangster. In the best tradition of such stories, it goes wrong. Brian Vaughan populates his cinematic script with well-drawn characters, throws in some good jokes and ensures the plot doesn't follow the predictable path. Kyle Hotz's Wrightsonesque flourishes might not be the most appropriate art style for a story set in a gritty real world New York, but he conveys everything necessary. It's not as dialogue driven, but anyone who likes the work of Brian Michael Bendis ought to enjoy this.~FP

Recommended: 1-6

HOOK

Marvel: *4 issue miniseries 1991**

Adaptation that transcends an average film script by virtue of excellent artwork from the likes of Craig Hamilton, Gray Morrow, John Ridgway, Dennis Rodier and Charles Vess (who also adapted the film script).~WJ

---

* Available in a collected edition

THE HOON

Eenieweenie: *6 issues 1995-1996*
Tapestry: *2 issues 1996*

Simple, amiable and obese, the Hoon is a peripatetic smalltown superhero, although he never manifests unusual abilities despite his costume. This is a very well drawn and mildly charming title, by Robb Bihun with the back cover illustrations excellent, but it lacks the compelling hook to make it a compulsory purchase. All issues stand alone, but the best sampler is the first Tapestry comic, giving all the necessary background in a sometimes poignant alien probing of our hero. He later returns in the pages of *Comic Library International*.~WJ

HOPELESS SAVAGES

Oni Press: *4 issue miniseries 2001*, 4 issue miniseries ('Ground Zero') 2002*

The Hopeless Savages are Rat, Arsenal, Twitch and Zero, the children of Dirk Hopeless and Nikki Savage, formerly punk rockers, now peacefully domesticated. In the first series, however, with their parents kidnapped by a former manager of Dirk's, who wants the rights to an old song, the kids must first find Rat, who left home ten years previously. 'Ground Zero', concentrates more on Zero, trying to be a member of her own band and dealing with documentary film makers, re-mastering her mother's music and a first romance. With the first series, Jen Van Meter has written a finely tuned comedy, full of attitude, wit and fist fights (none of the family are shy of defending themselves). Christine Norrie's artwork is like a more jagged, less manga-influenced, Chynna Clugston-Major, who contributes a colour strip to the collection and also a flashback sequence to 'Ground Zero' (as do Andi Watson and Norrie). The second series is less successful, partly because Bryan O'Malley's artwork isn't as sharp as Norrie's, but also because the humour of the family's interactions with themselves and others is diminished.~NF

Recommended: Miniseries one 1-4

HOPPY The Marvel Bunny

Fawcett: *15 issues 1945-1947*

Originally appearing in Fawcett's Funny Animals (from 1), as a clone of Captain Marvel, Hoppy says "Shazam!" to become Captain Marvel Bunny, but must keep his identity a secret, even from girlfriend, Millie, or lose his powers. Each issue contains several Hoppy stories as well as back-ups featuring Sherlock the Monk (who teams up with Hoppy in a story in 5), Benny Beaver, Willie the Worm and Chippy the Chipmunk (in later issues). Not all stories required the powers of Captain Marvel, as Hoppy finds when his cold helps him replace Bing Bunny in 5, but most stories are based on Hoppy's need to rescue someone from villains like Dr Frog, Ignatz Inventor or the powerful perfume of Bubbles LaBunny (9). Other stories are based on literary recreations such as the Taming of Millie in 7, which involves a play featuring most of the series' funny animals. Chad Grothkopf, who created all of the Fawcett funny animals, including Hoppy provided the story ideas and concepts, as well as most of the distinctive artwork, with scripts by various Fawcett writers, and this is a fun, engaging, and undemanding series.~NF

HOPSTER'S TRACKS

Bongo: *2 issues 1998-2000*

Created by Stephanie Gladden, Hopster's Tracks is a fine funny-animal comic in the Barks' tradition, managing to present humour and slapstick without losing sight of character and emotion. Jake builds a fire-breathing dinosaur over a gas station (much to Terry, the owner's horror) in 1 and 2 features a feud over a used-car and insurance headaches for Terry's girlfriend, Melba. Stories featuring these characters first appeared in *Action Girl* 9 and 10.~NF

HORNY BIKER SLUT

Last Gasp: *13 issues 1990-1998*

Few sexual indulgences are left uncatered for within the pages of *Horny Biker Slut*, all with a jism count porn features can only dream of. The prime mover is John Howard, sadly not the Australian Prime Minister, whose violent and insatiable women are so removed from reality as to render their graphic and repeated penetration light years away from sex as we know it.

Equally unsavoury sex is rendered in more appealing fashion by Randy Clark (2, 3), Spain appears in 5, and James Buchett's art starts well (most issues from 3), but deteriorates issue after issue. The comic is very silly and not meant to be taken seriously, but many will be offended, so tread warily.~FP

HOROBI

Viz: *Series one 8 issues 1990, series two 7 issues 1990-1991*

Shuichi and Zen, two friends with the same birthday, find themselves and their mutual friends in the middle of a mystery as students are murdered in horrific ways. To make matters worse, Zen has been dreaming of the murders before they happen and begins to hear voices in the dreams. A series of huge monsters start to appear, causing a great deal of damage before just disappearing, leaving the authorities with no clue to their creation. As the tale unfolds we discover that the deaths and monsters foretell the coming of Horobi, god of destruction, and that the two friends' families (as part of rival political and financial organisations) have been secretly grooming them, one to represent God, the other the Devil, in a final epic battle that will decide the fate of the world. As the friends try to understand the reasons for the events that are happening around them, they find themselves struggling to cope with the demands of their separate romantic and familial relationships. Yoshihisa Tagami's complex storytelling and stylised artwork make this an absorbing read, which slowly builds to a devastating finale. The philosophical observations that underlie the climactic battle are unconvincing but the series is well worth investigation.~NF

HORROR IN THE DARK

Fantagor: *4 issues 1991*

Richard Corben's reputation rests on his artwork, generally enhanced by his unique gloomy colouring style. Seeing his horror stories here in toned black and white then is already disappointing, and further despondency ensues regarding the computer art process, which instead of enhancing muddies the art altogether. More's the pity since from what can be made out this is prime Corben, and surely he can't have been happy with the final reproduction. The stories are the standard horror stuff Corben has drawn over the years for Warren and *Heavy Metal*, fleshed out with the ill-advised inclusion of stories from other Corbenesque artists. Completists may well want this, but for the casual fan there are far better examples of Corben on form.~FP

THE HORROR OF COLLIER COUNTY

Dark Horse Maverick: *5 issue miniseries 1999-2000*

Richard Tommaso's indie comics stew: Take about a pound and a half of the Hernandezes, a cup of Daniel Clowes and a pinch of Charles Burns; Serve on a bed of George Romero zombie film. Nourishing, if not nutritious. Bonus marks for all pages, including front, back and inside covers, being story pages.~GK

HORROR SHOW

Caliber: *1 issue 1991*

Behind a wildly inappropriate Richard Sala cover, this is a collection of Mark Burbey's gory horror and science fiction strips from *Dr.Wirtham's Comix and Stories* and the fanzine *RBCC*. With a range of artists, from Rich Larson, Gene Day and Marc Hempel to several lesser lights, this is inevitably a mixed bag, but there is far worse out there.~DAR

THE HORRORIST

DC/Vertigo: *2 issue microseries 1995*

The Horrorist is a delicately-painted, meandering John Constantine special, in which Constantine, burnt out by all the horrors he's seen, tracks down a young woman who causes catastrophe wherever she goes, from famine to crashes to suicides. The highly symbolic Jamie Delano story comes over as a little pompous, although the dry humour he brings to Constantine is appealing. David Lloyd provides bleak-coloured, loose artwork, full of subtle lines, particularly impressive for its use of underdrawing and coloured linework. Worth a look for the art alone.~FJ

HORSEMAN

Kevlar: *3 issues (0-2) 1996-1997*

It's a shame this comic about a wandering knight in 16th century Korea required more sympathetic art, as the simple stories, at least in 0-1, have an appeal. 2, for some reason, updates the action to present day Japan, and that there was never a 3 says it all.~WJ

Totally HORSES!

Painted Pony Press: *5 issues 1997-1998*

Presumably aimed at younger readers, this magazine anthology contains a strange mix of new, old and translated material. The lead strips are by the clean-lined, Lena Furberg, themed on the love and care for horses. Black Fury strips by Charles Nicholas and Vince Alascia are reprinted in 1-3 and 5 (first published by Charlton). The other material consists of pinups and gag strips, 'Chomper' (again by Furberg) and 'Fred Horse'. 5 was published with a dedication to the U.S. Equestrian Team, a story about trying to make the team, and a proportion of the profits going to them. An oddity, to be sure, though Furberg's artwork is pleasing (even on the more elaborately inked, cartoony 'Chomper').~NF

HOT CRACKERS

Last Gasp: *1 issue 1972*

The casual misogyny of much "underground" material passed off as humour is distressing, and accentuated by the passage of time. There's much of it in *Hot Crackers*, Peter D. Clapp's contribution to Last Gasp's *All-New Underground Comix* series. If you've ever wanted to witness sex between Mickey Mouse and Little Lulu you're advised to seek help, but this is the place to see it.~FP

HOT LIPS

Eros: *2 issue microseries 1993*

Reprint of Benarides and Tobalina's uneasy graphic novel about sexual freedom. Elisa, leaving her partner of 10 years because of her boredom and his unfaithfulness, flies out to a new exciting life in Seville. Whereupon, this being a sex comic, she's immediately set up on by three sexy young toughs who rape her repeatedly. She doesn't enjoy it, but the reader is clearly intended to, just as he/she is intended to cheer as, with the help of her best friend Shelley, a sex counsellor, and her new lover, a therapist, she beats up some other thugs in a psychodrama. Thus she reclaims her femininity, allowing her to screw the therapist without problems. A lot. Tobalinas draws the story in a more detailed, restrained style than some of his later work, with lighter use of blacks and narrower linework, perhaps in an attempt to appeal to a wide audience, which somehow adds to the sense of moral uneasiness and lack of panache about the story.~FJ

HOT STUF'

SQP: *8 issues 1974-1978*

One of several comics serving as a kind of halfway house between the underground and the mainstream scenes, *Hot Stuf'* was a black and white anthology that never quite established a distinctive personality. Typically, many of the strips were science-fiction or fantasy-oriented, by far the best being by Richard Corben (1-3, 5) and Gray Morrow reviving his 'Orion' strip in 2 and 4, and of particular note was a lovely 1930s detective strip from the great Alex Toth in 4. The comic's most interesting artist, however, was Bill Maher, whose work ran the gamut from bigfoot cartoons and slick dystopian science fiction to rough-hewn autobiography and manga pastiches. Most issues contained his work, with 7 and 8 being his best. Peculiarly, he doesn't appear to have cropped up in any other publications and that's very much our loss.~DAR

Recommended: 4, 7, 8

HOT WHEELS

DC: *6 issues 1970-1971*

A tie-in with a line of racing car toys, and aimed at boys of about twelve. Jack Wheeler is the son of a retired racing driver, and he and his friends are the 'good', law-abiding teen drivers in town. Dexter Carter is the son of a millionaire, and he and his henchboys, Dexter's Demons, are giving teen drivers a bad name. With lots of whizzing around race-tracks, attempts at sabotage, and virtue winning through, it's perfectly likeable, helped by artwork by Alex Toth. Worth reading for the shining transparency of the pre-adolescent fantasy – such as the story in which the Chief of Police allows Jack and his friends to soup up four police cars and run their own stakeout on a gang of armed bank-robbers. Ah, innocent times.~FC

Recommended: 3, 4

HOTEL HARBOR VIEW

Viz: *1 volume 1990*

Two terse and extremely disturbing stories by Natsuo Sekikawa and artist Jiroh Taniguchi. The reader is shown in intimate detail the events leading up to two assassinations. The assassins are both women. The book has a distinctly dark, misogynist feel, but to be fair, this is hardly an unusual quality in the hard-boiled detective fiction and film noir that inspired these pieces. The identification of sex with death and of the female as an agent of betrayal could offend. Manga's tendency to give the impression of slow-motion action sequences is unexpectedly magnified to good effect here. The moment of death is spread over several pages where the victims seem to be watching the fatal bullets glide toward them. The slightly stilted art is drawn in a realistic style that nevertheless conveys both stories' sense of place perfectly.~SW

Recommended

HOTSPUR

Eclipse: *3 issue miniseries 1987*

Swashbuckling fantasy as a stage-fight choreographer is transported to another dimension where he's able to live the life he idealises for real instead of vicariously, adopting the alias Hotspur. Rather more successful than DC's role-playing game titles, there's still a feeling of them as Hotspur encounters demons, trolls and the like. He's actually been summoned for A Higher Purpose, but by the third issue you don't really care anymore.~WJ

HOURMAN

DC: *25 issues 1999-2001*

After the *DC One Million* series, the android Hourman from the future tries to come to terms with humanity and being a superhero. He decides Snapper Carr is a good link between the two and goes to live with him. Hourman's naivety then sets up battles with villains like Amazo and the Lord of Time while allowing for appearances by Tomorrow Woman and an ongoing subplot concerning the original Hourman and his son. Hourman and Snapper's ex-wife, Bethany, become romantically involved, leading to complications later during a storyline involving more than one Hourman. A couple of supporting characters are added in the demon Torcher, during the *Day of Judgement* crossover in 8 and original Hourman villain Dr Togg after his attempt to transform Bethany into a Gombezi in 10. The issue of Snapper betraying the JLA is covered in 16; other guest stars include Justice Legion A in 11-13 and the JSA in 18-19. If you enjoy time travel stories, Tom Peyer delivers some clever variations and a consistently entertaining supporting cast whilst the artwork by Rags Morales is sharp without being too flashy.~NF

HOUSE OF HAMMER

Top Sellers/Quality: *30 issues 1976-1978 (1-23), 1982-1984 (24-30)*

This magazine was a strange amalgam of horror reviews and strip adaptations of Hammer films. Despite the format's inevitable shortcomings, it featured some good work from the cream of British comics talent. Writer Steve Moore (among others) performed miracles condensing full-length film scripts into twenty pages (or less), but inevitably it was the art that provided the principal interest. British talents like Paul Neary (1, 5), Brian Bolland (13 with Trev Goring, 17) and David Lloyd (23) acquitted themselves well, as did the magazine's big discovery John Bolton (6, 10, 14). His first adaptation, of *Dracula, Prince of Darkness* spawned the spin-off strip 'Father Shandor', again by Moore and Bolton, in 8, 16 and 22, which far surpassed its source and eventually led to a lengthier run in *Warrior*. Another semi-original strip predated Shandor: 'Kronos, Vampire Hunter' by Moore and Ian Gibson in 1-3, later to be drawn by Steve Parkhouse. The EC-esque back-up 'Van Helsing's Terror Tales' boasted some fine art by Bolton (4), Dave Gibbons (7, 15, 23), Jim Baikie (9) and Pat Wright (16, 20). The comic's highpoint, however, was consistently provided by the veteran Brian Lewis. Whether painting covers (most issues), adapting films (4, 8, 9, 19), or drawing 'Terror Tales' (2, 6, 11, 13), he produced gloriously vibrant, vital strips that deserve to reach a wider audience. The revived magazine was *Halls of Horror*, a title used since 17, and was almost exclusively text-based, its sole strip being a *Monster Club* adaptation by editor Dez Skinn and artists Bolton and Lloyd in 25 and 26 (reprinting a promo booklet drawn a few years earlier), Lewis' final strip was intended for the original, never printed, version of 24 and finally appeared in 29.~DAR

HOUSE OF JAVA

NBM: *1 volume 1998, 4 issues 2000-2001**

Yet again an artist, in this case Mark Murphy, wastes his talent writing his own strips. They're vignettes of contemporary coffee-shop conversation, something like debased Jules Feiffer, and sometimes fun, but there are only a couple in each issue. Otherwise there are rambling tales about the dubious personal growth of young people who work in bars or coffee shops or comic shops. The influence of J. D. Salinger is made explicit in one story. The initial one-off's centrepiece, about a shy girl who comes from small town Texas to Seattle to have allegedly hip fun in bookshops with Australian travellers, is absolutely interminable. No wonder Kurt Cobain shot himself.~GK

HOUSE OF MYSTERY

DC: *321 issues 1951-1983*

DC/Vertigo: *One-shot 1999*

Conceived by editor Jack Schiff as a mystery anthology, the title went through a brief superhero phase in the 1960s before returning to its horror roots for a final fifteen years. The 1950s market was dominated by horror titles, and DC cashed in on the craze, though, typical of the company, its stories were hopelessly compromised by their own timidity. These competent, though uninspired, tales were at least well served artistically by the likes of Mort Meskin, Ruben Moreira and Nick Cardy. Jack Kirby surfaced briefly in the late 1950s, but the era's real gems were provided by Alex Toth in 109, 120 and 149.

With 143 the comic changed direction abruptly as the Martian Manhunter transferred from back-up status in Detective, but Jack Miller's scripts and Joe Certa's art never manages to rise above mediocre. More fondly remembered was a second superhero strip, 'Robby Reed – Dial H For Hero', by Dave Wood and Jim Mooney, with Robby's ever-changing super-alter ego. Neither strip had much staying power, and when Joe Orlando became editor with 174 he wasted no time in booting the pair out.

Orlando redesigned the comics in the mould of EC's infamous horror line, to which he'd contributed, complete with its own 'horror host', Cain. By 178 he had dispensed with reprints and began to feature work by the best writers and artists in the field, cleverly mixing old and new writers. The likes of Robert Kanigher and Jack Oleck were combined with neophyte scripters Gerry Conway, Len Wein and Marv Wolfman, but it was artistically that the comic really shone. Of particular note are strips by Neal Adams (178, 179, 186, 228), Wally Wood (180, 183, 184, 199), Berni Wrightson (179-181,183, 186, 188, 191, 195, 201, 204, 221) and Alex Toth (182, 184, 187, 190, 194). Indeed, it was a Toth strip written by Kanigher that was the highlight of this period, 187's anti-hunting shocker 'Mask of the Red Fox'. Other talented artists such as Gil Kane, Ralph Reese, Gray Morrow and Al Williamson crop up with regularity in 180-200, the latter containing a particularly nice Mike Kaluta job.

Filipino artists like Tony DeZuniga had been introduced as early as 190, and as the comic passed 200 they came to dominate it. With artists of the quality of Alfredo Alcala and Alex Niño (204, 212, 213, 220, 224, 225, 245, 250) this was no bad thing, and consequently any issue between 210 and 230 is worth a look. By far the most technically accomplished Filipino artist was Nestor Redondo and he was on particularly fine form on this title, so any of his strips are worth a look (194, 195, 197, 202, 203, 211, 214, 217, 219, 226, 227, 229, 235, 241). One non-Filipino highlight was the criminally overlooked Canadian artist Bill Payne, who drew two outstanding strips in 206 and 207. 224-229 were hundred-page spectaculars featuring a nice mix of old and new material. Of particular interest was 'Nightmare Castle' in 229, a thirty-six-page Gothic epic by Kanigher and Redondo that climaxes with the heroine giving birth to Satan!

While the title was artistically impeccable, the writers on *House of Mystery* were rarely as inspired, with the notable exception of Michael Fleisher, whose stories always had a bit more bite. Probably his peak was the controversial killer-clown story 'Pingo' (221), drawn with gusto by Frank Thorne. Fleisher aside, 230-250 fell into a curious rut, with only the Oleck / Paul Kirchner and Neal Adams story 'Deep Sleep' in 236 worthy of mention. It took a change of format to bring the comic to life again.

251-259 were dollar comics boasting a full eighty pages of new material, which ensured that each issue had at least a few gems. In addition to the likes of Wood (251), Morrow (255) and Marshall Rogers (254), almost every issue has an Alex Niño masterpiece and 253 featured an all-too-rare Sandy Plunkett art job. 259 and 260 carried gorgeous art by Noly Panaligan, but the last few years of the comic saw new American talent supplant the regular Filipinos, occasionally to the title's detriment. Early discoveries were Arthur Suydam (256, 257, 261) and Michael Golden (257, 259), though it was new writer J.M. DeMatteis who was to have the biggest impact here. His best stories were 'Hellpark', with Rogers, and the ultimate fan-boy exposé 'Collector' (270), beautifully drawn by Jim Sherman and Joe Rubinstein. He also created *House of Mystery*'s last continuing strip, 'I Vampire' (with art from Tom Sutton), which mixed Gothic ambience with his trademark intelligence. It ran from 291-319, and two issues later the comic, and effectively DC's entire horror line, ended, leaving a rich heritage for the discerning reader to discover.

The one-shot is an intelligently crafted compilation of the comic's horror years, with an emphasis on Berni Wrightson's output, and a new framing sequence from Neil Gaiman and Sergio Aragonés. It is as good a place as any for the curious newcomer to start.~DAR

Recommended: 109, 120, 149, 178-195, 200, 204, 206, 207, 219, 221, 224-229, 251-261, 270, 274

HOUSE OF SECRETS

DC: *154 issues 1956-1966 (1-80), 1969-1978 (81-154)*

Like its sister title *House of Mystery* this comic went through an early period of short twist-in-the-tail stories followed by a flirtation with superheroes and finally an EC-styled horror anthology. Following a largely uneventful first few years, *House of Secrets* 23 presented the first regular feature: Mark Merlin, 'sleuth of the supernatural'. These proved to be universally banal adventures, not helped by some very tired

Mort Meskin artwork. Far better was Eclipso, from 61, by Bob Haney and Lee Elias. Whenever top scientist Bruce Gordon is exposed to an eclipse he turns into... Eclipso, the twist being that Eclipso was a villain. The first few stories, particularly those drawn by Alex Toth (63-67) were quite inventive, but the idea wore thin, not helped by some lamentable Jack Sparling art. With 73 Mark Merlin became Prince Ra-Man and 80 saw Eclipso pitted against Prince Ra-Man in mortal combat. Not surprisingly, cancellation beckoned.

House of Secrets was revived as an addition to DC's growing horror line with the portly Abel, Cain's brother, as host. Though patchier than House of Mystery it had its share of top artists like Toth (83), Morrow (89, 90), Wood (91) and Adams (82, 90) and the same mixture of old and new writers. Particularly notable strips were a Gil Kane/Neal Adams sword-and-sorcery epic in 85, a Mike Kaluta insect-fest in 98 and, probably Jack Oleck's best story, the poignant Monster, drawn in the finest EC style by Wally Wood in 96. More importantly, 92 introduced Len Wein and Berni Wrightson's Swamp Thing in a story that remains affecting and well worth searching out in DC's classic reprint series. Despite this, there's too much Jack Sparling and Bill Draut artwork for comfort, and consequently the issues dominated by Filipino artists (99-130) provide the comic's most consistently entertaining period.

Amongst the typically high-quality artwork by Alfredo Alcala and Gerry Talaoc and Co. it's an intricately etched vampire strip by Jess Jodloman in 108 that stands out. Alex Niño provided a number of hallucinogenically compelling masterpieces (101, 103, 106, 115, 117, 126, 128, 131, 147, 153), with 109 demanding a place in any serious collection. It was Nestor Redondo, though, who proved the most compelling draughtsman: his strips in 95, 113 and 134 stand comparison with any of the era's more lauded artists. The best stories of the period were generally written by Steve Skeates, though he never quite reached the inventive heights of Michael Fleisher's 'A Connecticut Ice Cream Salesman In King Arthur's Court', drawn by Alex Toth in 123.

Issues after 130 were a mixed bag, with highpoints being a number of strips by Leo Duranoña, a short medieval strip by José Luis Garcia-Lopez (154) and 140's strip featuring the Patchwork Man by Gerry Conway and Nestor Redondo. Arthur Suydam's unique and disturbing art had cropped up in 119 and 131, but found its best expression in the Cary Burkett-scripted 'Love Me... Love My Demon' in 151. That issue also features a lovely Michael Golden strip so it's well worth searching out, though generally later issues are for completists only. For readers wanting a taste of earlier material 93-98 are all fifty-two pages and reprint a fair number of 1950s stories, many by the ubiquitous Toth.~DAR

Recommended: 63-67, 83, 85, 92, 95, 96, 98, 99, 108, 109, 113, 123, 134, 151.

HOUSE OF SECRETS

DC/Vertigo: *25 issues 1996-1998, 2 issue microseries ('Façade') 2000*

The story of a forthright runaway who is also a habitual liar. Against her wishes Irene "Rain" Harper becomes Witness for The Juris, a ghostly tribunal who occupy the old, cursed house she's squatting in. There Clius, Digol, Ni An, Ruby and corpulent disciplinarian Pfaultz are overseen by the disembodied spirit Plyck as they pass judgement on those whose sins of omission cause real or emotional injustices. Along the way Rain meets Traci another, considerably less mature, runaway and Ben a would-be rock musician. Rain soon establishes herself as the rock group's lyricist, unaware that sleazy private eye Nick Calderone is on her trail along with ex-prostitute Gigi. The opening, introductory sequence in 1-5* sees Traci raped by Rain's boyfriend; a secret not kept for long. A couple of stand-alone issues follow, including 7's recounting of the house's origins. The story continues in arcs: 'The Road To You: Getting There' (8-10) shows how Nick operates, and in 11-16 we learn a lot more about The Juris one by one in 'The Book of Law' whilst 'The Road To You: Being There' continues as a three-page back-up in 11-15. 'The Road To You: Leaving There' (17-19) sees Nick and Gigi finally tracking Rain to Seattle, while in 'The Basement' (21-23) Rain deals with some hellish self-deceptions in preparation for 'The Attic' (24-25). In 'Façade' Rain returns home with Traci and Ben to face more adolescent secrets, but why are The Juris there too?

The narration by Rain, articulated in Steven Seagle's suitably informal dialogue, has subtlety, wit and the impact of modern foul-mouthed vernacular. The striking look of the story is thanks to Teddy Kristiansen who works on the majority of issues with fellow Danes Bjarne Hansen, a really distinctive colourist, and Christian Hojgaard, who provides layouts in 8-10, 15 and 21-25. Guest artists include Duncan Fegredo in 6, Dean Ormston in 11, Guy Davis in 12 and D'Israeli in 16. Kristiansen paints the covers and all of Facade's expressionistic bookend to the series. The use of adult subject matter is always tempered by Seagle's root-concept of secrets being destructive.~SW

HOUSE OF YANG

Charlton: *6 issues 1975-1976*
ACG: *1 issue 1998*
Modern Comics: *12 issues 2000*

Not so much a spin-off of Charlton's other martial arts book, *Yang, House of Yang* is most accurately described as a companion title. Sun Yang is Yang's cousin and, while Yang moved to America, Sun Yang remained in a 19th century feudal China, just coming into contact with the outside world. With typically solid if unspectacular Joe Gill scripts and dynamic, evocative drawings by Korean artist Sanho Kim, this is an unusual and enjoyable, if undemanding, title that is worth the price of admission for its beautiful painted covers alone. The ACG and Modern Comics issues reprint earlier stories.~DAR

HOW TO PICK UP GIRLS IF YOU'RE A COMIC BOOK GEEK

3 Finger Prints: *One-shot 1997*

Although Rich Koslowski draws in a pleasing, broad style, his 'omnipotent narrator tells comic book geek how to get it on with the opposite sex' story is pretty predictable. There are the mandatory jokes about washing, and not wearing your underpants on the outside, but throughout the tone is of a weak in-joke that rests a trifle uneasily but allows readers to think "Gee, well, I'm not as bad as all that then (I hope)." Pretty, but shallow.~FJ

HOWARD THE DUCK

Marvel: *Series one 33 issues, 1 Annual, 1 Treasury 1976-1979 (1-31*), 1986 (32-33), series two 10 issues 1979-1981, one-shot ('Holiday Special') 1996*
Max: *6 issue miniseries 2002**

Howard the Duck was, to begin with, a throwaway joke character that turned up in *Fear* 19, devoted to the adventures of a swamp monster, Man-Thing. The unexpected popularity of writer Steve Gerber and artist Val Mayerik's irascible talking fowl, a more cynical and 'grown-up' variant on Disney's Donald, brought Howard back for two short back-up strips in *Giant-Size Man-Thing* (fnarr fnarr) 4 and 5, both written by Gerber and drawn by the then-fashionable Frank Brunner. The stories chronicled Howard's arrival on Earth from another dimension, and quickly established an enduring theme –the duck's utter fear of, and loathing for, this barbaric new world of 'hairless apes' (or, "trapped in a world he never made", as the cover tagline put it.) All these early stories are reprinted in the handsome Marvel Treasury Edition, which also includes an all-new and very funny Howard story by Gerber and Sal Buscema.

Howard the Duck 1 featured the first appearance of Beverly Switzler, the duck's long-term significant other. This issue proved to be so collectible that Marvel had to go back for a second printing, an extremely unusual occurrence in those days. 2 gave us the first glimpse of the Kidney Lady, Howard's arch-nemesis and the utter personification of corrupt bourgeois morality. The departure of Brunner marked a turning point, with the transitional 3, drawn by John Buscema. It chiefly satirised the macho appeal of martial arts movies and comics, but ended on an highly emotional gracenote that indicated the increasing complexity of Gerber's mature writing style. Joined by definitive Howard art team of Gene Colan and Steve Leialoha from 4 on, Gerber stopped using the comic simply as a vehicle for genre parody and started writing a form of venomous, but hilarious social satire that has rarely been equalled, let alone bettered, in American comics. Howard started to function as a mouthpiece through which Gerber could express all of his own feelings of anger, frustration and disgust at the modern world. As a beautifully warped form of personal expression, *Howard the Duck* therefore had much more in common with seventies American Underground Comix than with standard mainstream fare.

---

* Available in a collected edition

4 to 14 are all virtually flawless, and utterly essential, with 5 the most perfect issue in the entire run, the one where Gerber best sustains the tricky balance between humour, pathos and scorn. In 5, Howard desperately tries to raise some money by taking on a number of highly unsuitable jobs such as repossessing television sets, appearing on a kids TV show, becoming a professional wrestler. This not only cements the duck's status as one of life's losers, but also grounds the comic in an economic reality that's never normally acknowledged in mainstream 'funny books'. The story of Howard's nervous breakdown and demonic possession (10-14) found Gerber straining at the limits of conventional narrative sense, and represented the apex of his experiments with form and style. 16 was given over entirely to a long, indulgent, breathtakingly pessimistic fill-in text piece by Gerber and various illustrators that deconstructed comics, creativity, and the author himself. Elements prompted Gerber's later *Nevada* series. For a while after that the comic lost its way a little, with Gerber getting bogged down in the rather flabby Dr. Bong storyline and seemingly trying just a little too hard to find new targets for his satiric angst and ire. The low point came with lame *Star Wars* parodies in 22-23 that featured the return of artist Val Mayerik, who unfortunately didn't come close to matching Colan's mastery of light, shade and human expression.

Happily, Colan was teamed with the excellent inker Klaus Janson for 25-27, a three part storyline involving old Marvel villain the Ringmaster and his rather faded Circus of Crime. At first sight this represented a nervous retreat from the topical and the surreal on Gerber's part, but in fact his bittersweet celebration of chronic failure and broken dreams marked a welcome and much-needed change of tone and emphasis. Sadly this new stylistic turn wasn't given time to develop, as an escalating dispute with Marvel over creator's rights, as Howard briefly also became a newspaper strip, caused Gerber to abandon the company, and his most famous creation, in mid-story. The series limped on for another four issues, all of them by inferior writers utterly clueless as to the secret of Howard's success. 32 and 33 appeared some seven years later, but were as worthless as the ten issues of the black and white magazine or the one-off Holiday Special issued in 1996. Happily all Gerber stories have been reissued in the cheap format *Essential Howard the Duck.*

Gerber's legal battle with Marvel over ownership of Howard was resolved just prior to the release of the *Howard the Duck* movie in 1986. This notorious cinematic turkey not only trampled all over Gerber's visionary genius, it also effectively killed the character's commercial appeal stone dead for at least the next decade, although Howard still put in a torpid appearances in the likes of *Daydreamers* and *Generation X*. In 2002, however, Gerber finally got the chance to write more *Howard the Duck*, this time illustrated by Phil Winslade and Glenn Fabry, wherein Howard is mutated into a mouse. There were just enough flashes of wit and invention to suggest that Gerber hadn't entirely lost the plot, but the old snap and spark was largely missing. Sad to say, *Howard the Duck* now feels dangerously like a bygone relic of the 1970s, a character best left frozen in time, or in the fond memories of a generation of thirty-something fans. As Howard himself learnt over the course of his comic, you can never go home again.~AL

HUGO

Fantagraphics: *One-shot 1983, 3 issues 1984-1985**

Subtitled "Fairy Tales For Adults" and infused with the sensibilities of 1930s cartoons, Hugo is a rare funny-animal book that's actually funny. Milton Knight's Hugo is the spirited and confident court jester hopelessly in love with the glamorous and selfish Princess Trish, daughter of the downhome King Adolph the Eleventeenth. Hugo vies for the affections of the Princess with the vain and egotistical Sir Loin De Beef, and all regulars take a turn in the spotlight. The one-shot is magazine-sized. Years after publication Aeon produced a collection.~WJ

Incredible HULK

Marvel: *Series one 6 issues 1962-1963*, series two 374 issues (-1, 102-474), 25 Annuals, 1 Giant-Size 1968-1999, series three 46 issues 1999 to date*

The Stan Lee/Jack Kirby first series is now quite rightly revered for its nostalgic, pioneering, collectible status. But by any detached, critical assessment it has dated badly. Artless plots are riddled with non sequiturs and a ridiculous array of villains. Of most interest is the Hulk's formative relationship with Rick Jones. Modern progress has not provided all the answers, though. The Hulk's origin is encapsulated in the first few pages of 1. Nowadays, a plough through the first hundred issues of a new title would unearth a mere handful of circumstantial clues to the protagonist's origin. For those who don't know, scientist Bruce Banner is caught in a gamma bomb blast, and thereafter becomes the enormously powerful Hulk when enraged (although the transformation was originally during the more traditional hours of darkness).

Second-series numbering and publication continues from *Tales to Astonish*. The underlying thread running throughout this comic involves the military's attempts to cure or kill the Incredible Hulk, and therein lies the predicament. Were they ever to succeed, cancellation would surely follow. This dilemma, alongside the Hulk's normal state of mind, which limits his vocabulary to "Hulk smash", makes this a very difficult title to write successfully. Most writers have proved the point with long sequences of desperately dull scripts. Efforts to relieve the tedium usually revolve around changes in his condition (green Hulks, grey Hulks, intelligent Hulks) but this cycle has now been exhausted repeatedly.

The title provided a vehicle for two of Marvel's stalwart pencillers to exercise extended runs. Herb Trimpe pencilled almost every issue numbered one hundred and something and Sal Buscema did likewise in the two hundreds. Early writers Gary Friedrich and Stan Lee to 120, Roy Thomas (121-147) and Archie Goodwin (148-157) churned out routine tales cementing Hulk's stable of villains, rather too many of whom were aliens. Military attempts were personified by General 'Thunderbolt' Ross, whose zeal gradually developed into an obsessive, personal vendetta against a tragic, misunderstood figure searching for peace yet forever hounded by mankind. 102-117 are collected in the paperback *Essential Hulk* vol 2. Steve Englehart finally showed a little flair in 159-171 with a sub-plot describing Major Glenn Talbot's abduction by Commies and replacement by an impostor. Running alongside, Ross' daughter Betty suffered one of many nervous breakdowns and transformed into the Harpy. Len Wein's stint in 179-222 follows the normal modest standards – a glowing exception is the touching 182, a story sadly submerged by that issue's notability for an early Wolverine cameo. 189 maintains a similar heart-warming theme. Wolverine's first cameo (180) and first full appearance (181) are reprinted in the 1986 one-shot *Incredible Hulk and Wolverine.*

Roger Stern's run (223-242) coincided with the prominence of the *Hulk* TV series and, in sympathy with these episodes, Stern's scripts contrived a minimal use of supervillains. A very tame product resulted. Bill Mantlo sustained mind-numbing mediocrity from 245-313. Of marginal interest is the Hulk's spell of full intelligence from 271-296. In 278-281 he is granted a full Presidential Pardon for the billions of dollars of property damage his havoc has wrought. The story goes way over the top as at least six spoons of sugar are loaded into the coffee. Shortly thereafter, the alien Bereet from *Rampaging Hulk* emerges to controversially declare that all the stories in that black and white magazine run are fictional within the Marvel Universe, being the result of her film-making exploits on the planet Krylor. Hulk's intellect goes full circle in 297 as Nightmare turns him completely mindless and inarticulate. In an effort to restrain property-insurance premiums below astronomical levels, Doctor Strange exiles Hulk off Earth in 300 and he embarks on a dire sequence of stories under the 'Crossroads' banner until finally re-emerging on Earth in 313. Mantlo's penultimate issue, 312, is his finest, as we are treated to the history of Bruce Banner's birth, childhood and adolescence. John Byrne kickstarts the title's rehabilitation in 314-319 as Hulk and Bruce Banner are split into separate entities and Bruce and Betty Ross finally wed in 319, some 195 issues after their first attempt was aborted at the altar. Al Milgrom preserves respectability (320-330), initiating new variations on a theme: a Rick Jones Hulk and a grey Banner Hulk, the latter not seen since 1. Milgrom deals the next scripter-elect a favour by allegedly disposing of the tiresome General Ross, now well past his shelf life, in his last issue.

From 1987-1998, Peter David commanded the scripting helm, writing every issue regularly from 331-467, bar two fill-ins (360, 389). He has achieved what many thought impossible on the *Hulk*: a well written comic book infused with sardonic humour and avoidance of the cliché traps of the past. David crafts the finest Leader story ever in 342-346*, strongly enhanced by the patient subplot building to it during preceding issues. The follow-up Leader stories in 364-367 and 397-400 are also of high quality. David has been blessed by many fine pencillers during his run: Todd McFarlane 330-346, Jeff Purves 347-366, Dale Keown 367-398 and Gary Frank 403-425 (bar fill-ins). He joined McFarlane during one of his best, if somewhat warty, artistic periods, prior to attainment of mega-stardom, and their final story in 340-346 is available as a collection.

One of the secrets of David's success is his serious shake-up of locales, supporting characters and plot elements before staleness sets in. In 347 the Hulk goes into hiding, adopts the pseudonym Mr Fixit, and is employed as a bouncer in a Las Vegas casino. He even gets a girl. Marlo Chandler is one of the best comic-book supporting characters introduced in modern times. As her flatmate puts it in 348, "...every guy you meet is intimidated by you, just 'cause you're over six foot and built. Now you finally get lucky..." She has proved a marvellous foil for other characters to play off, not to mention for David's sly wit. Later she dates Rick Jones and eventually becomes Mrs Rick Jones in 418. The underrated Jeff Purves has been unfortunate to live in McFarlane's shadow. His expressive pencils are never better exemplified than in Marlo's reaction to 'a good time' last night with Mr Fixit in 347 and Bruce Banner's realisation that he has lost three months of his life (spent in alter ego form) in 353.

David continued in hot form. 354's vignette of a gambling frenzy on the outcome of an impromptu fist fight involving Mr Fixit is outstandingly funny. Hulk joins the Pantheon from 382-425, a centuries-old *Thunderbirds* style outfit stuffed full with a crew of new superheroes all ripe for the couch. Rick/Marlo's bachelor/hen nights cause rolling in the aisles in 417, yet David shows his versatility with the sobering, sensitive AIDS issue (420). Toward the end of his run, high-class issues are sparser as David strained for inventiveness and the artistic stints of Liam Sharp, Angel Medina and Mike Deodato Jr delivered much flash but little thunder. Storylines spiralled slowly downwards as a surplus of head trips and alternate-reality-future-lines took a stranglehold. Adam Kubert's pencils (454-467, albeit blighted by fill-ins) brought artistic relief, particularly with his talent for altering the mood of the art to match the script. David unleashed a powerful, controlled burst for his finale, surrounding the death (allegedly?) of Betty Ross. Three fine yet highly contrasting issues portray excellent humour (465), drama (466) and pathos (467). The final seven issues resolve the identity of Betty's murderer amongst much padding as time is killed before the relaunch. Writer Joe Casey tries too hard to be too slick and Javier Pulido and Ed McGuinness's pencils are simply odd. Never before has Hulk looked like Tony Blackburn (474, page 9, panel 5).

Following directly, the third series heralds the arrival of Byrne and Ron Garney although the former lasts a mere seven issues. They concentrate on the human touch as the Hulk arrives in a small mid-west town and makes a big impression. Their run is characterised by overlong recaps, primary colours, an overuse of oversize panels plus minimal text without the excellent storytelling that this technique demands. Routine fill-ins tie up Byrne's loose ends leaving Paul Jenkins a clean slate from 12. His multi-part 'The Dogs of War' storyline in 14-20* heralds a vast improvement over everything seen since Peter David's departure as the psychopathic villain General Ryker is introduced and much needed subtlety and intrigue is nurtured. Double sized 25 is a Hulk/Abomination slugfest but with much more under the skin. John Romita Jr's awesomely powerful pencils give it the nod. Bruce Jones takes over writing from 34 with Lee Weeks on pencils from 40 and they play mind games with Banner who is kept constantly on the run from unknown forces whilst the Hulk remains firmly in the background. The entertainment is enhanced by Kaare Andrews' highly striking covers. The Jones issues to 43, a surprise success, are available in two collections.~APS

HULK miniseries and one-shots

Marvel: *One-shot ('versus Quasimodo') 1983, one-shot (Incredible Hulk and Wolverine) 1986, graphic novel (The Incredible Hulk and the Thing) 1987, 2 issue microseries ('Future Imperfect') 1992-1993*, one-shot ('vs Venom') 1994, one-shot ('The Savage..') 1996, one-shot ('Hercules Unleashed') 1996, one-shot (Hulk/Pitt) 1996, one-shot (Hulk Megazine) 1996, one-shot (Hulk vs Superman) 1999, one-shot (Hulk Versus Thing) 1999, 2 issue microseries (Hulk Smash) 2001, 4 issue miniseries (Banner) 2001, one-shot ('The End') 2002*

The Hulk has rarely been well served outside his regular run, exemplified by the bronze medal winner among his one-shots being the all-reprint *Megazine*. There's art by Jack Kirby, Todd McFarlane and the team of Jim Starlin and Alfredo Alcala among others in a well-selected sampler reprinting stories from Hulk 3, 187, 222, 262, 333 and the first Abomination story from *Tales to Astonish* 90-91, by Stan Lee and Gil Kane. Equal best by the length of a gamma propelled leap is the two part 'Future Imperfect', in which the 1990s intelligent Hulk visits his possible future counterpart and doesn't like what he's become. A Peter David script successfully masks a minimal plot with witty references, pithy dialogue, and a well considered finish, but the obsessively detailed art of George Pérez steals the show. David is reunited with former Hulk artist Dale Keown for an average one-shot teaming the Hulk with Keown's creation Pitt, and 'The End', concerning the Hulk at the end of his days. It's adapted from David's novel, and that shows, failing to exploit the possibilities of a different medium. Keown holds his end up, but it's hardly an essential purchase. David also writes the very poor Hercules Unleashed, seemingly dashed off by Mike Deodato while waiting at the supermarket checkout, and contributes framing sequences to *The Savage Hulk*. Here the Hulk's trial is interrupted by depictions of past battles, drawn by the likes of Dave Gibbons, Matt Wagner and Humberto Ramos. Again, it's very ordinary, as is 2001's *Hulk Smash*, two issues where Klaus Janson inks swamp John McCrea's pencils for a slim Garth Ennis plot. The 1987 graphic novel is supposed to be funny. The primary joke, though, is on anyone paying premium prices to see the Hulk with squid on his head and the Thing with a tomato on his, Berni Wrightson drawing a more muscular version of Herb Trimpe's Hulk, and a few set pieces padded beyond belief. *Hulk vs Superman* is gorgeously drawn by Steve Rude, justifying the purchase alone, but Roger Stern also turns in a decent story about Clark Kent and Lois Lane investigating the early Hulk. *The Incredible Hulk vs Wolverine* (later repackaged as *Wolverine Battles the Incredible Hulk*) reprints *Hulk* 181 and the relevant sections of 180 and 182 comprising Wolverine's debut, while *Hulk versus The Thing* reprints battles between the two including FF 25-26 and 112. 1983's Hulk Versus Quasimodo is dreadful, although as it adapts the first episode of the *Hulk* animated series apportioning the blame is difficult. *Banner* is drawn by Richard Corben, who doesn't disappoint, and Brian Azzarello's script is notable for a smarmy, manipulative take on Doc Samson and answering the question "Why doesn't Bruce Banner just kill himself?" As Hulk stories go, it's nearer the top end of the scale.~WJ

* Available in a collected edition

Rampaging HULK

Marvel: 27 issues 1977-1981, series two 6 issues 1998-1999

The first series was a magazine sized anthology with three distinct phases. 1-9 were black and white, with a continuing Hulk story written by Doug Moench, with artists including Alfredo Alcala and Walt Simonson. The plot involved alien invaders and giant robots set in the early days of the Hulk's career and while affording him chance to meet the original X-Men (2), was well-nigh unreadable and later wisely written off as a dream. 1-8 also have a back-up story involving the tedious 10,000-year-old Bloodstone, with a respite in 7 for a bizarre Man-Thing tale.

10-23 correspond with the screening of the *Hulk* TV series, and from 10 the title became *The Hulk!*, all strips graduated to colour, and the storylines (still mostly by Moench) changed in line with the budget of the TV series. Out went the alien invaders, and centre stage was occupied instead by Bruce Banner's plight as an outcast and troubled soul. The result was a much better read, with something of merit in almost every issue and some entertainingly outrageous displays of the Hulk's strength – such as uprooting an entire island and towing it ashore! Highlights are the plane crash (13), the desert island idyll (18), Roy Thomas' mirage story (19), the Ditko homage (20), and the controversial story in which Banner is the subject of an attempted rape (23). The first back-up strip during this period was 'Moon-Knight' (10-18, 20), a caped-hero story written by Doug Moench, with art by Bill Sienkiewicz from 12 on, which improved steadily. The second back-up strip was the gangster story 'Dominic Fortune' (21-25): never mind the plot, just drink in the Howard Chaykin art.

The Hulk story returned to black and white in 24-27 (while Fortune remained in colour) and the main writer for these last issues was Lora Byrne, who produced some satisfying, well-rounded stories, particularly in 26. There's nothing here that counts as a masterpiece, but for an hour's entertainment, you could do a lot worse.

The same could not be said of the second series, which finds some interesting ideas, and then buries them as quickly as possible. It starts with a scientist who wants to become Hulk-like himself, and lies to his old friend Bruce Banner in order to take the necessary samples and measurements – it could have been a real story, but it's over by 3, and thereafter he's on the run through a different pointless 'crisis' each issue.~FC

Recommended: Series one 13, 15, 18, 19, 23, 26

HULK 2099

Marvel: *10 issues 1994-1995*

Making his début in *2099 Unlimited*, the Hulk of the future is John Eisenhart, accidental recipient of the gamma rays designed by the descendants of Bruce Banner to create another Hulk. He's big, he's green, he's scary, he retains his intelligence and he's got a long, wobbly, protruding red tongue. The art and technobabble serve to obfuscate dull stories, most of which concern the Hulk's attempts to protect the film studio he and colleagues run.~FP

The HUMAN FLY

Marvel: *19 issues 1977-1979*

Considering trying this series about a real-life costumed stuntman? Why? Your oven needs cleaning, doesn't it? And that collapsed bookshelf needs fixing. Haven't you been meaning to write to the council about the dog shit on the pavement? What about the pile of ironing, calling your granny, or oiling that squeaky door? Any one of these activities will make you feel you've achieved something. I've read these so you don't have to. And you should see the dust under my microwave, the mud on my football boots and the state of my garden.~FP

The HUMAN TARGET

DC: *1 Special 1991*

DC/Vertigo: *4 issue miniseries 1999*, Graphic Novel ('Final Cut') 2002*

Originating as a back-up strip in *Action Comics* in the 1970s, Christopher Chance is a bodyguard who protects his clients by impersonating them and effectively becoming them for as long as the danger exists. In the Special, released in advance of a TV series, Chance takes the place of a federal agent, due to testify against a drugs baron, who has more than one reason for wanting to kill the agent. Written by Mark Verheiden and drawn by Rick Burchett, this is a competent, but uninspiring outing for the character, expanding the supporting cast and adding to the technical details of Chance's impersonations. Without invalidating any of the character's history and yet with a completely different tone, Peter Milligan concentrates on the effect these impersonations have on the sanity of Chance and one of his assistants. Asked to impersonate Chance after female assassin Emerald has almost succeeded in her mission to kill him, Tom is convinced that he's the real Chance, abandoning his wife and family whilst trying to protect a preacher threatened by local street gangs. Milligan writes these, and the supporting characters, as complex people, each struggling to find their real identity. With artwork by Edvin Biukovic, the miniseries is a terrific tale. Picking up where the miniseries left off, in the hardcover, 'Final Cut', Chance is still dispirited and reluctant to take on new jobs. When he appears to have killed an extortionist who's been preying on Hollywood actors, however, he's convinced to become the dead man in order to save the kidnapped son of one of his victims. Written again by Milligan, and drawn by Javier Pulido in a similar style to Biukovic's, this is another fine exploration of the loss of identity, both Chance's and Hollywood's.~NF

Recommended: miniseries 1-4, 'Final Cut'

HUMAN TORCH

Marvel: *8 issues 1974-1975*

If you're desperate to sample the light fluff that was the Human Torch strip in *Strange Tales*, or short back-ups featuring the 1940s character, this is the place for you.~WJ

HUMAN TORCH COMICS

Timely: *37 issues (2-38) 1940-1949 (2-35), 1954 (36-38)*

Of Marvel's big three superheroes of the 1940s it's the Human Torch who never seems to have had the breaks. His creator, Carl Burgos, was simply nowhere near as gifted as *Captain America*'s Simon and Kirby or *Sub-Mariner*'s Bill Everett, and his origin was ludicrous even by comic standards. Created as an android servant, he spontaneously combusts when exposed to oxygen, and later acquires a kid sidekick when proximity to a circus fire-eater causes the latter to also burst into flame! And while the concept of a man made of fire would seem to beg for exciting and dramatic visuals, few of the original run of artists provided them, with the styles usually employed being either staid or cartoony. Still, the Torch and his little pal Toro plodded on with the occasional burst of imagination, the clashes with Sub-Mariner in 8 and 10 being notable.

In 1948 the Torch, like all of Timely's headlines, responded to certain allegations being made by anti-comics crusader Dr Fredric Wertham: in his case he jettisoned his kid sidekick and adopted a female one. Toro's replacement by Sun Girl assured readers and parents of the Torch's 'normality', but she did little other than shine her 'Sun Ray' (a fancied-up wrist torch) on HT's activities. Right, a man made out of fire really needs a spotlight.

He was the first of the Timely stars to wane; a brief and unimaginative revival failed to catch fire in 1954 and he faded out completely. His name was later borrowed by the Fantastic Four's junior member, but the original returned in *Fantastic Four Annual* 4 and, decades later, in *West Coast Avengers*.~HS

HUMANOIDS Graphic Novels

Many of the albums that Humanoids publishes are part of a series, rather than being standalone. This entry lists those that haven't yet reached three volumes, as well as those that won't. In Ante Genesem 1: 'The Prophet', Jack Stanton is the sole survivor of a disastrous expedition from which he brings proof that an advanced, but evil, civilization walked the Earth before mankind. Preparing to reveal all in a book, he becomes stranded in another dimension that could be Hell. Well presented and told by Xavier Dorison and Mathieu Lauffray, its lasting appeal will depend on future volumes. *The Book of Jack* has another Jack trying to pass a gang initiation test, for which he steals a book from an old mansion, only to find that it tells his own life story as it's happening. When gang leader Stan sees that Sam, a girl who hangs around with them, is attracted to Jack, he finds someone to write in the book that Jack turns into a monster. As Jack's transformation begins, he and Sam must find the book and try to break the spell. Denis-Pierre Filippi's plot is relatively straightforward, but expertly crafted and characterised, with artwork from Olivier G. Boiscommun, who adds an edge of urban decay to the fantasy.

Bouncer 1: 'Cain's Eye' is set at the end of the American Civil War. Diehard rebel Captain Ralton kills his brother and his brother's wife searching for a diamond, but his nephew escapes to find their third brother, the one-armed Bouncer. He relates the family's history and promises to prepare him for Ralton's return. Alexandro Jodorowsky's story has the themes and violence of an Italian, Spaghetti Western, underpinned by his own preoccupations with family and religion, while Francois Boucq's realistic artwork, and grand vistas are contrasted with the dissipation evident on every face. Artistically, *Deicide* 1: 'Rage Against The Gods', drawn by Das Pastoras, owes much to traditional fantasy and Richard Corben, but Carlos Portella's angry satire on the gullibility of religious beliefs, whatever their 'reality', makes this much more interesting. Agon seeks to destroy the god, Madorak, in order to win back the soul of his sacrificed girlfriend. Befriending an annoying, lion-headed, Beluch, the two attempt to breach Madorak's Hell.

Three FBI agents investigate four deaths on one night in the rural Salem, but find the Sheriff and its townspeople uncooperative, though the dull-witted, Tom, seems happy to have some new friends. Richard Marazano's script for *Dusk*: 'Poor Tom' reads much like an episode of the *X-Files*, trying hard to distinguish the agents' characters, but Christian deMetter's painted artwork is unconvincing. *The Fourth Power* has scientists using women's brains to build a super weapon, with which to end a war. Juan Gimenez' artwork is exciting, but his storytelling could be clearer, and there's not much by way of characterisation to make the readers care one way or another what happens. Gimenez also provides *Leo Roa*. He's a young journalist caught up in the mystery of the space-pirate Captain Drake, whose associate, Crapula's sexual desires make thing hot for Leo and his aspiring musician cousin, Meke. In 2, while Leo is sent back in time, Meke is kidnapped to be used as the saviour of an ancient civilisation. Both stories (previously seen in *Heavy Metal*) deliver visually, but the semi-comic tone is annoying rather than amusing. Better science fiction is delivered in *Morgana*:'Heaven's Gate'. Warrior Morgana was rescued as a child by the android, Merlin, and is now part of Merlin's quest to reunite the Arcanes and attain the Purpose. She's opposed by the sorcerer, Voortt in this high calibre fantasy adventure from artist, Mario Alberti, and writer, Luca Enoch.

Eva Stern, at the end of the 20th Century, is reminded of her past by anonymous e-mails containing a photographic history she believes may have been fashioned by her brother. He deserted from the Austro-Hungarian army in 1916, and became a founder of a revolutionary newspaper, joining Lenin in Russia, before falling from favour. Two of three volumes of *From Cloud 99*: 'Memories' have appeared so far, by Yslaire, using mixed media to tell the various tales of Eva, her brother and the various people that crossed their paths through the years. Though the effects can be confusing, this is a powerful examination of history and memory. During the depression, orphan Nola leaves a convent school and after a chance success begins a career as assassin for hire. She convinces pimp Slim to be her partner, and the pair soon develop a strong friendship, helping each other out, as they start to gain a reputation in the profession. Collecting four volumes together, Miss: 'Better Living Through Crime', is a terrifically realised depiction of period New York, full of character and conviction. Philippe Thirault's script is tough, Marc Riou and Mark Vigouroux' artwork is perfectly complementary in a style that shows touches of Corben and Guy Davis.

Unlike the other multi-volume series, *Sanctum* ends on a cliffhanger, as the U.S.S. Nebraska, en route to Syria, discovers the sunken remains of a mysterious Russian submarine outside the entrance to the ancient city of Ugarit. The health and sanity of the crew is strangely affected by proximity to the city, bringing the ship close to disaster. This is a promising horror thriller, from Dorison and Christophe Bec, but the features of the characters are too unevenly portrayed and their similarity to Hollywood actors is also more grating than pleasurable. Fortress Torinth, designed to study the secrets of the human brain is now home to madmen and outcasts. Esiath, its chief architect, has lost control to a monster she created to do her bidding. A stranger arrives in search of his lost love and must survive Torinth long enough to face the monster in Nicolas Fructus' interesting and unusual fantasy Torinth 1: 'The Fool With No Name'.

Humanoids have published new editions of the works of Enki Bilal, previously available from Catalan. *The Nikopol Trilogy* includes *The Carnival of Immortals*, *The Woman Trap*, and a third volume, *Equator Cold*, which Catalan missed. Others are his collaborations with Pierre Christin (*The Black Order Brigade*, *Hunting Party* and *The Town That Didn't Exist*) and with Jean-Pierre Dionnet (*'Exterminator 17'*). They have also published several previously un-translated volumes. *Ship of Stone* and *The Cruise of Lost Souls* are both parts of the Modern Legends series by Bilal with Christin, concerned respectively with the effects on a fishing village of plans to develop a resort, and another village's sudden uprooting from the ground (the result of military experiments), and being blown out to sea. *The Dormant Beast* is a fabulous tale in which Nike, orphan of Sarajevo, uses his extraordinary memory to remember the moment of his birth, whilst trying to find two other orphans, Amir and Leyla, whom he remembers from day eighteen, and being pursued by forces that want to use his memory to rewrite history. *Memories From Outer Space* is a smart collection of eight short science fiction strips from 1974-1977, demonstrating the development of Bilal's style.~NF

Recommended: *Bouncer, The Dormant Beast, From Cloud 99, Miss, Morgana*

HUMBUG

Humbug: *11 issues 1957-1958*

After creating *Mad* for EC and the stillborn *Trump* for Hugh Heffner, Harvey Kurtzman decided to effectively self-publish his next humour magazine. Like the early magazine issues of Mad, it was a mixture of spoof ads, TV lampoons and re-done versions of classic literature, half strips, half illustrated text pieces, but low production values were responsible for *Humbug* being a bit smaller than typical comics of the day. Artists Will Elder, Arnold Roth, Al Jaffee, Jack Davis and Russ Heath produced consistently stunning art in obsessively detailed pen and ink or slickly painted halftones. Unfortunately, while there's no doubting the intention or cultural significance of Kurtzman's writing, from a contemporary perspective it's simply not particularly funny, and the appeal today is an opportunity to see a lot of pretty pictures. A collection represents assorted strips from early issues.~DAR

HUMMINGBIRD

Slave Labor: *One-shot 1996*

There's much to admire in this decidedly odd story of a tempestuous few days in a young girl's life. When her mother starts eating the cat, you know it's not an ordinary comic, and Gregory Benton's cartooning has touches of Ted McKeever about it. Unfortunately his writing isn't as polished. Whimsical detours and *Hummingbird*'s oddly ineffective passivity through an appalling series of events disengage the reader.~FP

HUMP CRAZY

Eros: *2 issues 1995-1996*

Awesomely unerotic porno from 'alternative' cartoonist Jeremy Eaton. *Hump Crazy* is set in an uncensored fantasy land where nympho fairies screw perpetually horny ugly dwarves and speak cutsie-pie filth littered with lousy puns before initiating endless orgies. Angela Carter famously suggested that folk tales are often driven by seething erotic subtexts. Perhaps Eaton, in his sledgehammer way, is making the same point. Or perhaps he just wanted to draw a lot of fucking.~AL

HUMPHREY OSMOND PSYCHEDELIC PIONEER and the Doors of Perception

Drawn and Quarterly: *One-shot 1998*

Prompted to find the origin of the word 'psychedelic' David Lasky researches the life of the person who coined the phrase. British medical doctor Humphrey Osmond was a pioneer in many respects, emigrating to Canada and offering enlightened treatment to the mentally disturbed. His story is preceded by writer/artist David Lasky's experience of Ecstasy, and cut through with Lasky's responses to Osmond. It's a well-considered piece about a little known innovator.~WJ

HUMUNGOUS MAN

Alternative Press: *3 issues 1997-1998*

This may have been the start of something very interesting. Someone who would be considered a superhero by most definitions awakens amnesiac in a multi-levelled city, different sectors of which are seemingly influenced by different periods of human history. It is suggested, though, that this might all be the fantasy of a laboratory creation. These issues intrigue, but the story remains far from complete. Jim Harrison and Dan Stepp combine on art and plot, with both having the work of Dave Sim and the Belgian creators Schuiten and Peeters as major influences. A back-up strip in 2-3, 'Johnny Behind' is a pastiche of the technobabble and angst of later Jack Kirby *Fantastic Four*. Very satisfactory, and still worth looking out today.~WJ

HUNDREDS OF FEET BELOW DAYLIGHT

Drawn & Quarterly: *One-shot 1998*

The second of three pieces depicting the social development and history of the United States. Set in a doomed mining town, the reader is treated to generous helpings of human nature at its worst including racial prejudice, mob violence, greed, sexual inequality and superstition. Author James Sturm's deliberately crude, dark drawings convey the misery of the community's existence perfectly giving the feel of a coarse woodcut. The writing and characterisation are terse and subtle respectively but this makes for very rewarding reading.~SW

HUNTER:The Age of Magic

DC/Vertigo: *18 issues + 2001 to date*

Dylan Horrocks and Richard Case continue from *The Names of Magic* miniseries. Tim Hunter returns to the magical academy The White School just in time to rescue Kalesh, a refugee from the extra-dimensional Gemworld. She quickly becomes a sort of protégé to the rapidly maturing young wizard, and as they grow closer he becomes embroiled in the war ravaging her mystical homeworld and earns the enmity of the enigmatic Red Man and his Sardonyx Warriors. In 7, illustrated by Chris McLoughlin, Hunter graduates into a world, both physical and spiritual, that wants him dead before he becomes too powerful, and in 8, Hunter meets Dr Fabien, a scientist who claims to have discovered the genetic cause of evil. He tempts Tim with the answer, once and for all, to the question of whether he will benefit or endanger the world, but his agenda is as dark as any that Tim fears himself capable of.

As Tim tries to adjust to an independent life, working at the not-what-it-seems Excalibur bookshop, Molly, his first love reappears in 13 as part of a story to 15 that radically alters the tone of the series and winnows out the supporting cast. Portions are illustrated by McLoughlin and David Roach, highlighting just how poorly suited Richard Case is to this type of comic. After the dust settles, Tim seems destined for a much more traditional career, dueling a necromancer in 16, and in mystic contention against old associates The Lotus and Iolanthe. There are rare moments of pure joy in this better than average fantasy hero series, as Horrocks strives for something a little different, yet the rigidly uninspired, misproportioned and stiff Case artwork is an oppressive turn-off. Good stuff shouldn't be this hard on the eyes. 1-5 are now collected.~WW

HUNTER'S HEART

Paradox Press *3 issue miniseries 1995*

Chilling Police Procedural/Crime Noir thriller written and drawn by Randy DuBurke wherein misanthropic cop and hunting enthusiast Pete Lindstrom discovers that the serial killer he's after is the son of a ganglord who controls the city and the police. Before he can act he's framed for the murders of his investigating team and finds himself the subject of a manhunt. Plot twists abound and even the hoary old 'amnesia' cliché gets a new spin. Recommended: 1-3

HUNTRESS

DC: *19 issues 1989-1990, 4 issue miniseries 1994*

The Huntress was introduced in *All-Star Comics* in the 1970s as the daughter of the Batman and Catwoman of a parallel world. When DC expunged all its parallel worlds in 1985, they were left with a popular character whose history had been declared 'never happened'. Thus, Helena Wayne became Helena Bertinelli, daughter of a criminal family, who, after sundry childhood traumas, turned to fighting crime under the mantle of the Huntress. Much underestimated, the first series featured hard-hitting street-crime stories, Joey Cavalieri presenting Helena as an admirable, though screwed-up, character, and an oddball change of style and tone by artist Joe Staton that suited the series well. It was also different in that the new Huntress wasn't a stereotypical comic babe. She was attractive, but looked wiry and tough, with a lean face and a comparatively sensible costume. Dangling plot threads from the first series were wound up in *Justice League International Special* 2. In the mid-1990s, concerted attempts were made to tie in the Huntress with the Batman supporting cast, with numerous guest appearances, resulting in a makeover for the character. Her hair got fuller, her bustline bigger, and her costume developed mysterious cleavage-revealing gaps. This 'bad girl' version was tried out in a miniseries that owed one huge debt to Frank Miller's work, but what was intended to be gritty and noirish ended up merely confusing and ugly.~HS

HUP

Last Gasp: *4 issues 1987-1992*

Let there be no doubt that Robert Crumb is an incredibly accomplished artist. His writing, however, should perhaps come under closer scrutiny. He's at his best when adapting, delivering tirades or with his cringingly open autobiographical pieces. When it comes to turning his hand to fiction, though, the result is deeply unsatisfying and often little more than an embarrassing rendition of sexual fantasy. That's fine and dandy for those sharing the dream of

dominating big-assed women but bores everyone else. *Hup* is all Crumb and every work of genius – like 1's 'My Troubles With Women Part II' (part one was in *Zap* 10) – is balanced by misogynistic fantasy. The return of Mr Natural and Flakey Foont explores this territory to tedious extreme in 2-4. The better strips, however, are so good as to make some issues an essential purchase. Everyone should see the great Crumb, but to do so here you also have to endure the banal.~FP
Recommended: 1, 3, 4

Hiroshi Yakumo's HURRICANE GIRLS

Antarctic: *7 issues 1995-1996*

A peculiar title for a rag-bag of Yakumo's stories, spanning quite some time if the changes in art style are any indication. The theme of women against demons occupies most issues, varying in tone from 5's wrestling mayhem to the longest work, a relatively grim teaming of a private investigator and demon killer in 2-4. An exception is 5's short story of fraternal competition. Overall, though, this is slim material indeed.~WJ

HUSTLER COMIX

Hustler: *Series one 5 issues 1997, series two 5 issues 1998*

As *Penthouse* derived some success with a sex comics line *Hustler* jumped on the bandwagon. The stories were equally silly, but where *Penthouse* offered well-known comics creators, *Hustler* used illustrators unused to telling stories with pictures, and amateurs. Overall the quality level was several notches lower, although fans of Gray Morrow's work might want to check 4-5 of the second series.~WJ

HUTCH OWEN'S WORKING HARD

New Hat: *One-shot 1994*

An anti-capitaliist mini-comic style story by Tom Hart. The fifty-one page scope was made possible by Peter Laird's Xeric Foundation grants. Hutch Owen is an anarchist tramp bent on reminding the world of the evils of consumerism. Other people beg for spare change, Hutch sits by a sign that reads "Will rant for food". The story revolves around Hutch, a young acolyte named Willie and fatcat businessman Dennis T, usually referred to as 'Sir'. Ultra simple artwork but with a heck of a payload storywise.~SW
Recommended

Caliber Presents HYBRID Stories

Caliber: *1 issue 1992*

The largely capricious and vacuous content is superficially redeemed by the variety of drawing styles assumed by Dominic Bugatto. It remains, though, in essence a collection of exercises.~FP

HYBRIDS

Continuity: *Series one 5 issues 1992-1993, series two 4 issues (0-3) 1993, one-shot 1994*

One of the most confusing (in both content and publishing history) of Continuity's titles. The first few issues of *Hybrids* were actually titled *Revengers Special*, and in fact half of the first issue was reprinted from *Revengers* 6. The second series was chapters of the 'Deathwatch 2000' crossover, and the one-shot a chapter of the 'Rise of Magic' crossover. The Hybrids themselves were an extraordinarily unprepossessing bunch of genetically altered people (don't ask) who revelled in confusing fights with a confusing array of dragons, demons and such-like. Artistically it rarely reached the heights of other Continuity comics, exceptions being the zero issue and the 'Rise of Magic' one-shot, both drawn by Mike Deodato before his descent into Image-inspired hackdom.~DAR

HYDE25

Harris: *1 issue (0) 1995*

The first *Vampirella* story is coupled with a chapter from Bruce Bezaire's Jackass series that ran in *Eerie*. It was a moody work that dwelled on the transformation induced by a drug named Hyde-25 in Victorian times. Neither reprint is served well by added colour, but they shine in comparison with the single new story reviving the Hyde-25 drug in the 1990s. The planned series never materialised.~FP

HYDROGEN BOMB Funnies

Rip-Off: *1 issue 1970*

While the strips in this underground anthology title only occasionally deal with the bomb, it nonetheless contains some excellent material. Of the anti-war strips Greg Irons' brutal 'Raw War Comics' is the standout, though Fred Schrier and Foolbert Sturgeon acquit themselves with honour. Other highpoints include a beautifully drawn Dadaist piece by Robert Williams, and a typically imaginative strip by Kim Deitch. The bulk of the comic, however, is given over to Gilbert Shelton, who weighs in with a couple of Freak Brothers strips as well as the lengthy 'Wonder Warthog and the Pigs From Uranus'. Contributions from Robert Crumb, S. Clay Wilson and Dave Sheridan round out a terrific package.~DAR
Recommended

HYENA

Tundra: *3 issues 1992-1993*

In *Hyena*'s brief existence it managed to offend practically every sensibility known to man, and it did so with style. Each issue of the magazine was packed with talented alternative cartoonists. Regular artists included Roy Tompkins ('Harvey the Hillbilly Bastard' in 1 and 2), Jim Woodring (1, 2), Mac White (1, 3) and Hunt Emerson (1, 3). The first issue was the most consistently good, and highlights were unquestionably the indescribable 'Pee Dog' (by Jocko 'Levant' Brainiac 5 and Eddie Nukes) and 'Jeff and Monty', the rudest funny-animal strip of all time, by Jeff Holcombe. The other issues were patchier, but notable strips included 'Woodfield', a strip about planks of wood by Art Baxter, and some lovely art from 'Pic' in 2 and 3.~DAR
Recommended: 1-3

HYPER DOLLS

Ironcat: *6 issue miniseries ('Volume 1') 1998-1999*, 6 issue miniseries ('Volume 2') 1999*, 6 issue miniseries ('Volume 3') 1999-2000*, 6 issue miniseries ('Volume 4') 2000*, 6 issue miniseries ('Volume 5') 2000-2001*

Maika Minazuki and Miyu Fumizuki are the names that the alien Hyper Dolls take when they enrol at school after being sent to Earth by the Central Galaxy to protect it from alien invaders. Humorous situations abound as the girls try to adjust to humanity and emotions and bicker over which of them is fighting the various monsters (giant spiders, centipedes and apes amongst them) in the correct manner. It doesn't help that school friend Akai discovers their identities, their commander's hologram materialises out of a pizza box to give them orders, and official investigator, Ms Ogure, figures out who they are and tries to recruit them against industrialist, Dr Zaikrit. Ironcat have published what material there is, but the strip ended mid-story in Japan. The frenetic comedy only becoms comfortable with its characters towards the end, making for an unsatisfying experience, and doesn't have the greatest visual appeal, though it's enjoyable enough in its own way.~NF

HYPERKIND

Marvel/Razorline: *9 issues, 1 Special 1993-1994*

Clive Barker-created superhero team that survives a dull origin in 1 and 2, to develop some interesting ideas. Best issue is 5, which gives some background to the series, with the team captured by a man who's managed to rewrite history.~FP

HYPERSONIC

Dark Horse: *4 issue miniseries 1997-1998*

During the six years this was shuffled from one company to another the once borderline themes it envelops became pumped into the mainstream via *X-Files* and its ilk. The delay transformed what might have been groundbreaking comics into just another piece of conspiracy and alien infiltration material. It's all professionally produced with nice Gary Erskine art, but lacks the compelling factor to raise it above the parapet.~FP

---

*Available in a collected edition

I AM LEGEND

Eclipse: *4 issue miniseries 1991*

Prestige-format adaptation of the Richard Matheson story about the last man alive trying to survive in a world of vampires. Adequate if perhaps a bit over-reverent.~HS

I BEFORE E

Fantagraphics: *2 issues 1991-1992*

I Before E collects Sam Kieth's strips from places as diverse as *Critters, Stig's Inferno* and *Death Rattle*. Lovingly put together with a few previously unpublished short stories and portfolio material, this is a fine introduction to the work of an artist probably better known for Sandman, Wolverine or *The Maxx*. Kieth's style, with lots of Wrightson and Suydam influences, quickly became distinctive and individual and though many of the stories here are slight there's plenty to enjoy.~NF

I DREAM OF JEANNIE

Airwave Comics: *One-shot 2001, one-shot 2001*

Why anyone would want to publish comics about this thirty-year old TV sitcom is puzzling. Before his days as J.R. Ewing, Larry Hagman starred as astronaut Tony Nelson, who finds a bottle. When he opens it a cute genie pops out, ready to grant his every wish and provoke all sorts of misunderstandings. Unlike, say, *Sgt Bilko*, the show hasn't stood the test of time, and while the comic provides decent enough variations on a very tired and outdated theme there must be better ways to throw away money.~FP

I FEEL SICK, A BOOK ABOUT A GIRL

Slave Labor: *2 issue microseries 2000-2001*

Spin-off from *Johnny the Homicidal Maniac* wherein Devi, an artist, seems to be going slowly bonkers as she struggles to meet a publisher's deadline. As she works she engages in increasingly impassioned arguments with Sickness, a doll she has painted, mostly about the conflict between social and creative independence. Part black comedy, part surreal tragedy and unarguably a treatise on the role and integrity of art, artists and the creative process. Jhonen Vasquez and Rosearik Rikki Simons produce an odd blend of hilarity, pathos and just plain weirdness. Not everyone will like it, but it should be read by any thinking fan of the medium.~WW

I ♥ N.Y.

Linsner.com: *One-shot 2002*

Joseph Michael Linsner records his feelings and experiences concerning the events in New York on September 11th 2001, and in the process probably produces a comic quicker than he's ever done previously. It's nicely drawn, but Linsner has no unique perspective, and therefore there's unlikely to be an appeal beyond his fan base.~WJ

I, LUSIPHUR

Mulehide Graphics: *7 issues 1991-1992**

A hard-drinking elf immune to poison, as indeed are all elves in this canon, Lusiphur is almost crushed by blocks of text on several occasions. This is half-baked and poorly illustrated fantasy, although much in demand as the earliest incarnation of the popular *Poison Elves*, to which the title changed with 8. Enthusiasm propels creator Drew Hayes through, but he's still distinctly feeling his way with these magazine-sized issues. The collection includes text précis only of 1 and 2, Hayes feeling they weren't of the standard he later attained. He was right, although later relented and reprinted them as *Poison Elves Archive Editions* 1 and 2.~WJ

I SAW IT

Educomics: *One-shot 1982*

As a young child, creator Keiji Nakazawa survived the world's first atomic bomb explosion in Hiroshima. This recollection is harrowing, and features many disturbing images. Instead of the overtly cartoon style having a distancing effect, the horrors of Hiroshima are all the more acute for intruding into a familiar and comforting environment. The autobiographical elements extend beyond 1945 to the present day, with the explosion a permanent reminder to Nakazawa of the futility of war. He later expanded on his life in Hiroshima before and after the bombing as *Barefoot Gen*.~FP

Recommended

I WANNA BE YOUR DOG

Eros: *5 issue miniseries 1990-1991*

Lengthy, dense, erotic thriller that exudes seediness, more a slice of sado-masochistic life than a piece of titillation. Writer/artist Ho Che Anderson is full of interesting observations on power in relationships, sexual or otherwise, once you get past his highly stylised artwork. At times, though, it can be hard to work out what's going on as his everyday people fight and fuck.~FJ

Isaac Asimov's I-BOTS

Tekno: *7 issues 1995-1996*

Big Entertainment: *9 issues 1996-1997*

A team of robotic beings engineered to benefit mankind must confront those who seek to corrupt and subvert the technology that created them. Life in the public eye as superheroes protects them from WorldTech, a sinister multi-national corporation controlled by one Annabelle Donahoe, granddaughter of a mobster and daughter of a president, an almost pantomime Dynasty Power Bitch. Asimov's name on the project is intentionally misleading. Tekno/Big's habit was to append random celebrities' names to their titles, regardless of the fact that they contributed nothing more than a concept paragraph, or, as in the case of Mr. Asimov, were not actually alive at the time 'their' series were launched. Howard Chaykin was involved in character development for this series, but jumped ship before the book premiered. His replacement as artist, George Perez, went through the motions, but his heart clearly wasn't in it, and he abandoned the project before the follow-up series, leaving writer Steven Grant stuck with Pat Broderick as illustrator of the second run. Still, he didn't have to churn out this slurry of econo-politico-criminal clichés for long, as readers rapidly wised up. Don't let the star names suck you into reading this third-rate comic.~HS

ICARUS

Aircel: *6 issues 1986-1987*

Very early art from later offbeat creator Dave Cooper is the only reason to look out this interstellar adventure title. Enthusiasm outweighs talent, although the improvement in John Le's back-up strip art between 4 and 5 displayed a growing gift.~FP

ICEMAN

Marvel: *4 issue miniseries 1984-1985, 4 issue miniseries 2001-2002*

It took almost twenty years for the youngest member of the original X-Men to get his own miniseries, and he was with the Defenders at the time. It's unremarkable in every respect as Iceman visits his family, but has to become involved in intergalactic plots and trips through time to appreciate them. The more recent series is set in Hong Kong, where Iceman's ex-girlfriend has a little surprise for him. Aided by an interesting local hero, Foe-Dog, Iceman thwarts the plan of yet another evil corporation hell-bent on doing horrible things to mutants. Karl Kerschl's art is quite messy at times, but the manga style works well for the mood of the story. X-fans obviously shouldn't give it the cold shoulder, but is it a cool comic? Nah, just lukewarm.~HY

ICON

DC/Milestone: *51 issues 1993-1997*

An alien exile to Earth takes the form of the first human he meets in the year 1839. Since the first person he meets is black, that causes him some problems in years to come. Immortal, he lives unchanged through wars and revolution, taking no active part in the world despite his vast power, until a chance encounter with fifteen-year-old Racquel Ervin. She's one of a gang of youths who attempt to burgle his mansion in 1993, and goads him out of his complacency. She persuades 'Augustus Freeman IV', against his better judgement, to become a hero to the desperately needy city of Dakota, and manages to haggle a sidekick's gig for herself into the bargain. As Icon and Rocket, they set out to right wrongs, but things don't quite go as planned, with the police officers on their first case assuming they're the criminals! Just as their rocky relationship with the law is being sorted out, Racquel gets another surprise. Her jerkwater boy-friend, Noble, is responsible for more than trying to lure her into a life of crime. She's pregnant, and even with the powers Icon's alien technology can give her, she risks her life, and the baby's, by adventuring.

Although Icon is the nominal star of the comic, Racquel/Rocket is the emotional lynchpin for the readers. Smart, lively and gutsy, she sets the fires under everybody else's butts to get the action going, but she's not so tough that you don't empathise with her when she faces agonising decisions, such as whether to keep her baby, and, she fears, abandon her dreams of a life of her own. But she proves more resourceful than she suspects. During the latter stages of her pregnancy, she finds a substitute for Rocket in the shape of her pal Darnice, and enlists 'Buck Wild, Mercenary Man' (introduced in 13 as a hilarious parody of *Luke Cage, Hero for Hire*, who nevertheless is invested with a dignity of his own) as a replacement Icon when in the 'Mothership Connection'(17-21) he finds a way back to his homeworld. Ultimately, both the replacements, though well-intentioned, prove inadequate, and the originals are forced to step in. Perhaps the strangest issue is 30, in which a memorial service is conducted for a cast member. Poignant, yet achingly funny, it's quite a skilful piece of storytelling. After Rocket travels to Icon's home, the Collective, and saves Earth (31-36), things seem a bit anticlimactic, but writer Dwayne McDuffie and artist Mark Bright continue to deliver sound and entertaining work to the conclusion. 1-8 are collected as 'A Hero's Welcome'.~HS

Recommended: 1-8, 13, 22-25, 30-36

ICON DEVIL

Spider Optix: *2 issues 1989*

Set in a dystopian future of rat-race days and lawless nights of crime and affordable debauchery, this intriguing story is a spiral descent into the end of the world, as civilisation debates whether to commit total global suicide or abandon the planet en masse. Good stuff, but never completed, which is a shame.~WW

Golden Warrior ICZER-ONE

Antarctic: *4 issues 1994*

Iczer-One falls to ground on the planet Ishua, which the Kthulhu have conquered and where the Seven Generals protect two Princesses. This is a prequel to an anime series, shaping up as another epic fantasy with superpowers and giant robots, but the end of the story was never published.~NF

IDIOTLAND

Fantagraphics: *7 issues 1993-1994*

Quickfire surrealistic nihilism from Doug Allen and Gary Lieb with a dozen strips or more to most issues. One sample might raise a few grins if you're drunk, but no further exploration is necessary.~WJ

IDOL

Marvel/Epic: *3 issue miniseries 1992*

A B-movie being filmed in an almost deserted undersea military base is plagued by power surges and mysterious disappearances. And the base was once used for secret research. Oh oh, could be trouble ahoy. Actually far more entertaining than the formulaic plot would suggest.~FP

IGNORING BINKY

Checkmate Press: *1 volume 2001*

A remorselessly earnest project intending to document the evils of company chairmen, as represented here by one Victor Evertor, whose conscience, the oddly designed Binky, is conveniently repressed. This is simplistic stuff making little attempt to delve into any rationale, and as such is rather biblical in its hectoring. Republicans should give it to young kids on the premise that a whole new generation of plutocrats will evolve rebelling against it.~FP

IGRAT

Verotik: *2 issues 1995-1996*

Wretched stuff indeed about a demoness in fetish gear working for Satan. Minimal plot, and the art's so bad even the hairy palmed purchaser will be disappointed.~WJ

THE ILIAD

Amaze Ink: *2 issues 1997-1998*

Home to two ongoing series, 'Ikaris' by Darren Brady, and 'Toad' by Alex Ogle, neither of which has any direct connection with Homer's poem, but both appear to have had tones added to the artwork by computer, most effectively on 'Toad'. 'Ikarus' is a post-apocalyptic fantasy using elements from Greek mythology alongside Biblical names, which gives some clues as to the amateurish quality of the writing. The artwork suffers from its obvious debt to Conan and other 1970s fantasy/horror fare but is easy on the eye. The huge word balloons conveying vast portions of plot that the artist has chosen not to draw make this a very poor read. 'Toad' is a fantasy strip about a silent, samurai-style female wanderer who rides on the back of a giant Toad. Drawn in big-eyed manga mode, any attempts at establishing location or character have been side-stepped in favour of clichéd dialogue and action. The artwork is as accomplished as the writing is annoyingly pretentious.~SW

ILLUMINATOR

Marvel: *2 issues 1993*

Illuminator is Andy Prentiss, high-school student and Christian superhero. It's moderately entertaining, with more respect for the act of storytelling than you find in most comics with an overt religious mission. There's always a sermon, but it's tacked on at the end and can easily be ignored.~FC

ILLUMINATUS!

Eye 'n' Apple Productions: *One-shot 1987, 3 issue miniseries 1989-1991*

Anarchic underground adaptation of early books in Robert Anton Wilson and Robert Shea's *Illuminatus!* sequence. Issue 1 (second series) reprints the original issue 1 with retouched artwork. The Illuminati is a secret society bent on world conquest by assassination, intrigue and abduction. Any discussion of them is, of course, extremely dangerous because...~APS

Ray Bradbury's THE ILLUSTRATED MAN

Topps: *One-shot 1993*

Ray Bradbury's haunting concept of people seeing their fates in the tattoos of The Illustrated Man is well illustrated by Guy Davis. His segments sandwich what appears to be an EC reprint, drawn by Jack Kamen, and a story beautifully drawn and coloured by P. Craig Russell titled 'The Visitor'. It's decent science fiction, well produced.~FP

IMAGE GRAPHIC NOVELS

As a company, Image is best known for churning out oodles of hyperkinetic superhero comics, but the few graphic novels of original material that they've published largely steer clear of the genre. It's true that *Bluntman and Chronic* (2001) is yet another superhero parody, this time drawn from the 'universe' of cult film director Kevin Smith and cutely illustrated by Michael Avon Oeming. The ripe language, sexual frankness and stoner humour means it has just as much in common with the underground comix of the 1960s. If *Bluntman and Chronic* is a success on its own, rather limited, terms, then Scott McCloud's more ambitious The *New Adventures of Abraham Lincoln* (1998) is an unqualified disaster on every level. This plodding tale has dear dead Abe returning aghast to the 20th Century, but fails as both political satire and humorous fable, and features some extremely ugly computer-generated artwork that already looks dated and tacky. By contrast, the beautiful line drawing and imaginative design in C. S. Morse's "graphic novella" *Visitations* (1997) helps to elevate this rather delicate religious parable into something slightly more substantial and rewarding. Morse's animation-like cartooning draws inspiration from, among other things, Japanese manga, and this stylistic influence is even more apparent in the black and white, pocket-sized graphic novel *Clockwork Angels* (1999), written and drawn by Lea Hernandez. In a gushing introduction, Warren Ellis calls this a "scientific romance" and "a comic for girls", but more accurately it's a faithful exercise in generic pastiche that will no doubt mainly appeal to readers (of either gender) already familiar with fantasy conventions, archetypes and clichés. Finally, there's *Delicate Creatures* (2002), a twee and facile fairy tale from *Babylon 5* creator J. Michael Straczynski. Despite the deluxe hardcover packaging and distinctly average pictures from artist Michael Zulli, this isn't a graphic novel at all, but an illustrated text story, and so thankfully requires no further comment.~AL

IMAGE INTRODUCES

Image: *5 issues 2001-2002*

Tryouts for potential new features, none of which proved popular enough to graduate to their own titles. The best is *Cryptopia*, with a Lara Croft like cryptozoologist, but it's hardly compelling, and is more a taster, with events left unexplained. *The Believer* is a muddled murder story, *Isis* and *Primate* are variations on *The Mummy* and *King Kong* respectively, and *Dog Soldiers* is poorly told war fantasy.~DB

IMAGE TWO-IN-ONE Featuring HERCULIAN and DUNCAN

Image: *One-shot 2001*

This terrific item is the result of Erik Larsen and Chris Eliopoulos responding to Scott McCloud's website dare to single-handedly create twenty-four page comics from start to finish in twenty-four hours non-stop. Both responded superbly. Larsen's 'Guy Talk' is a clever juxtaposition of a downbeat conversation between two brothers in a diner about male/female relationships It's punctuated by ignored, absurd super-violence between Herculian and Punchin' Judy, has a good twist ending and is one of the best things he's ever done. Eliopoulos's 'The Present' mixes art techniques in a hilarious story, about a geeky boy, snubbed at his birthday party, who takes revenge on the world by creating monsters and aliens using a magical crayon.~GK

Recommended

IMAGINE

Star*Reach: *6 issues 1978-1979, 1 Special 1987*

Spin-off from *Star*Reach*, featuring many of the same contributors but offering a broader selection of material than *Star*Reach*'s science-fiction/fantasy remit. With creators like Dave Sim (1,4), Marshall Rogers (1), Gene Day (2) and Michael T. Gilbert (2-5) there ought to be something of interest in every issue, but much of the material is early and unpolished. Much better is P. Craig Russell's beautiful colour artwork in 2 and 3 and Lee Marrs' homage to Moebius (3), or Steve Ditko's illustration of Paul Levitz' 'The Summoning'.~NF

IMMORAL ANGEL

CPM: *12 issues 2000**

A18 Corporation/Manga 18: *6 issues (13-18) 2001**

Lemming Apostle, Dr Kyuso, kidnaps, rapes and enslaves Reimi to bear his child in preparation for a demonic apocalypse. Her boyfriend, Yugo, tries to save her, and ends up battling monsters, before, eventually, the child appears to challenge her father. The hardcore sex of the first part of Koh Kawarajima's would-be epic, gives way to fantasy conflicts (albeit still with lots of nudity), but this confusing and absurd tale is unsatisfying in all respects.~NF

IMMORTAL TWO

Image: *5 Issues 1997*

As comics go this is neither particularly good nor particularly bad, although suffused with writer/artist Mike S. Miller's born-again Christianity, it can be a little hard to take. The back of the comic is filled with letters and articles about Miller's attitude to the comic market, readers and detractors but at least it's not all one-sided. The Immortal Two are sword-wielding babes (but not 'Bad Girls') and the artwork's very much in the Image style of distorted limbs and large panels. Although further issues were scheduled none have yet appeared.~NF

IMMORTALIS

Marvel UK/Frontier: *4 issue miniseries 1993*

Mortigan Goth, the Immortal Man, becomes involved with an old family friend, Jacqueline Falsworth, formerly Spitfire of the Invaders, and a powerless Dr Strange, as they struggle to free her cousin from a vampiric curse. Flashbacks to Goth's origin, and a side trip to Mephisto's Hell, provide the opportunity for rather more theological discussion than is customary in a Marvel comic, but writer Nick Vince makes it all palatable, and Mark Buckingham's illustrations are appealing.~HS

IMPACT

EC: *5 issues 1955**

Gemstone: *5 issues 1999-2000**

The stated policy of *Impact* was to present twist-ending stories, as if they weren't well enough represented in the remainder of the EC line. A rather substandard first issue storywise (despite Reed Crandall, George Evans and Graham Ingels art) is elevated to greatness by possibly the single best-known EC story. 'Master Race' is unrelenting horror, definitely not for the squeamish, and an adult story in the best sense of the term years before its time. Artist Bernie Krigstein takes Al Feldstein's already powerful script about an escaped Nazi haunted by his past and a fear of retribution, and doesn't hold back with the truth. Packed with memorable images and excellent storytelling, it's deservedly known as a masterpiece. Krigstein returns in 5 with a less noteworthy, but nonetheless very good, tale of envy. Given the limiting factor of the twist ending and its high predictability ratio in the horror and science-fiction titles, it's pleasant to note some genuine surprises in *Impact*. Beyond the ending, the stories are able to range over the full breadth of imagination, spanning the likes of the Ingels-drawn, overtly sentimental story of a young girl selling lemonade in front of a crusty shop-owner's premises in 3 to 4's overwritten but well-meaning polemic hitting out against attitudes towards Jews, still unenlightened in the 1950s USA. Generally a decent read, and occasionally excellent, but beware some howlers. 2 has all-too-simple solutions to the threat of a divorce – its parent/child relations grate – and 3's story about an ugly woman's inability to form a relationship is hampered by Jack Kamen's seeming inability to illustrate a plain woman. The Gemstone issues are facsimiles, and collected in one paperback for those unable to afford the slipcased black and white collection.~WJ

Recommended: 1, 3, 5

IMPERIAL GUARD

Marvel: *3 issue miniseries, 1997*

Based on DC's *Legion of Super-Heroes*, the Imperial Guard usually appear in *X-Men* as guardians for the Shi'Ar empire.

Shifting them from their galactic setting to New York proves to be a disappointing affair. The humour of having the aliens survive in New York misses the mark, and it's not helped by the over-cartoony art style of artist Chuck Wojtkiewicz. Stick in the old plot of an organisation trying to turn society against super-powered beings, and you have an absolute mess. Still, by not having to battle the X-Men the Imperial Guard come out on top for once!~HY

The IMPOSSIBLE MAN Summer Vacation Special

Marvel: *2 issues 1990-1991*

Impossible Man is an alien who can turn into anything, and who possesses the lowest boredom threshold in the cosmos. After his initial appearance in *Fantastic Four* 11 (first series) he popped up in stories ranging from the hilarious (*Spider-Woman* 45, *New Mutants Annual* 3) to the tedious (most of the others) in his relentless pursuit of fun. By the time of these holiday specials he'd become painfully dull and not even half a dozen creators plus practically every Marvel hero could make these worth a glance or a giggle.~WW

IMPULSE

DC: *90 issues (0-89), 2 Annuals, one-shot (Impulse + Grossout), 3 one-shots 1995-2002*

Initially written by Mark Waid, and drawn primarily by Humberto Ramos, this hyperkinetic, inattentive teenager with zero attention span and super-speed was mostly a roaring comedy. Bart Allen, grandson of the famous Barry (a.k.a. Flash), is the poster child for the judgement impaired. Born with a disastrous metabolic condition that caused him to age super fast, his grandmother sent him back from the 30th Century to the 20th, where he could learn to control his metabolism, and his other speed powers, before they kill him. Trouble is, because Bart was brought up in a virtual reality world the conventional one is slow motion to him, and he hasn't yet caught on that real life dangers don't have a 'reset' button that gives you another turn! Now, living in Manchester, Alabama with Max Mercury, the "zen master of speed", he's being forced to approximate a normal life and fit in with other people. The edgy Impulse (Bart's code name) and the phlegmatic Max Mercury work against each other in... well, the closest parallel to the relationship is that of Calvin & Hobbes! Skilfully, however, Waid avoids total comedy, and intersects moments of horror and pathos, contrasting admirably with the strips' lighter tone. Particularly notable in a fine run are 6, a shocking but non-clichéd look at child abuse, and 16, where ghosts of Max's past are brought to light. By contrast, Zatanna's guest appearance in 17 is full throttle comedy, but a classic issue. Ramos' kinetic bigfoot artwork, a sort of more frenzied Mike McMahon, is the perfect vehicle for these stories, and the occasional fill-in, most notably Nick Gnazzo in 7, keeps up the high artistic standard. 8 is an *Underworld Unleashed* crossover that can nevertheless be read and enjoyed separately. 9-11 team Bart with his future cousin Jenni (XS of the Legion of Super-Heroes), in a multi part crossover with the Flash's 'Dead Heat' story.

William Messner-Loebs took over the writing and Craig Rousseau the art, from 29 and 28 respectively. They continued to mine the same successful themes, resulting in a high-level comedy-drama, although oddly it's fill-in writer Tom Peyer, in 28, whom we have to thank for the invention of Arrowette, a second-generation super-heroine who was to become a major player, and Bart's team-mate, in Young Justice. She reappears in 41 and 59. Todd Dezago and Carlo Barbieri are the final creative team, and maintain the high standard, as Bart faces loss and challenges in 62-66, in which the existence of his mentor is threatened, and the final story arc, (86-89) in which he gains omnipotent power, but has to face up to responsibility and maturity. Throughout the series, there was never a dramatic falling off in quality, despite the changing creative teams; it seems, rather, that too large a proportion of readers got tired of what Impulse had to offer, which is a great pity. Oh yes, the one-shots. *Impulse* + co-stars Grossout of Scare Tactics, a supernatural rock group who briefly had their own comic title. Grossout collides with Impulse, and temporarily steals his powers, giving both, allegedly, a whole new view of life. Feebly sentimental. *Impulse Double Shot* co-stars the Atom, then a teenager due to the events of *Zero Hour*, in a forgettable clash of personalities with the hyperkinetic Impulse abrading the stodgy and middle-aged Ray Palmer. It's negligible filler, and in the equally unremarkable 'Bart Saves the Universe' Bart goes back in time to team with the Justice Society of America. The collection 'Reckless Youth' reprints early issues.~HS

Recommended: 1-13, 16, 17, 19, 28, 62-66, 86-89

IN THE DAYS OF THE MOB

DC: *1 issue 1971*

In a companion magazine to *Spirit World*, Jack Kirby adapts violent tales of America's gangsters during the 1930s in his usual unsubtle style. Is there no end to the man's versatility? Ma Barker and Al Capone are among those to receive the full Kirby treatment, and even Vince Colletta's inks suited this wonderful period piece. The true crime, of course, was that this only lasted one issue. An advert for the unseen second issue promised "The colorful, beautiful, pragmatic, inscrutable Ladies of the Gang!" We were definitely robbed! A story intended for 2 turned up in the first issue of DC's house magazine *Amazing World of DC*.~HY

Recommended

IN THIN AIR

Tome: *One-shot 1991*

Famed female pilot Amelia Earhart disappeared in mid-flight somewhere over the Pacific Ocean in 1937. No-one knows for certain what happened, although there have been several postulations. For rather more improbable versions in comics see *Dino Island* and *Lost Planet*. Basic art and a basic run-through of Earhart's career accompany a transcript of her final radio transmissions. Tome Press issued two versions of the comic, each offering a different solution to her disappearance.~FP

THE INCAL

Epic/Titan: *3 volumes 1988*

Subtitled 'The Adventures of John DiFool', the *Incal* series of graphic novels, with visionary scripts by film-maker Jodorowsky and art by Moebius, are among the most perplexing but haunting comics to come out of Europe. Jodorowsky's scripts have the discipline that many Moebius stories lack, without losing the psychedelic qualities of most of his best writing. John DiFool is an 'R' Class Investigator who thinks he won't amount to much. Possessed by the Incal, a kind of cosmic force which occasionally helps him out of difficulties, he sets out on a quest across a strange world ruled by dilettantes, by the end of which he will have been accidentally caught up in a rebellion led by a dog-headed man, met the androgynous son he never knew he had, and attained something akin to a state of grace. His purpose, indeed his life's purpose although he doesn't know it, is to unite his Incal with its dark counterpart, held by Anime, the rat Princess who lives under a lake of acid in a world of garbage. See, it's visionary and complicated. Unfortunately it's also unfinished. The good news is you can enjoy it without the aid of illicit substances. Moebius' art is clean, wonderfully open, with occasional points of detail contrasting with the narrow-lined landscapes. He creates a series of amazing settings to flesh out Jodorowsky's elaborate fantasy. Inspired stuff.~FJ

Recommended: 1-3

The INCAL

Humanoids: *12 issues 2001-2002*

The story of orphan, John DiFool, who, during his detective training, chooses to investigate the mystery of his birth to a Red Ring prostitute. Aided by ex-Cybo-cop, Kolbo-5, concrete seagull, Deepo and the robotic, Eyecop, he's opposed by the planet's rulers, the SupraComputer, the TechnoPope and the Prez. Prime Minister's daughter, Luz De Garra, initially betrays John before he convinces her to help him expose the scandal of how Aristos such as herself come to be born. This inventive action-adventure is written by Alexandro

Jodorowsky and drawn by Zoran Janjekov. The artwork, though more tightly inked, is inspired by Moebius, whose original work with Jodorowsky on the characters was due to be reprinted from 13, but will now be continued in a series of graphic novels.~NF

INCREDIBLE SCIENCE FICTION

EC: *4 issues (30-33) 1955-1956**
Gemstone: *4 issues (8-11) 1994-1995**

After the establishment of The Comics Code, EC was forced to change the title of *Weird Science Fantasy*, and *Incredible Science Fiction* was the result. Title changes aside, the comic featured the same intelligent Al Feldstein writing and high-quality artwork from Wally Wood, Joe Orlando and Bernie Krigstein as its previous incarnation, though perhaps without the same level of inspiration. New boy Jack Davis added some welcome vigour with his energetic covers and strips (30, 31, and 33), but the comic's highpoint was undoubtedly Al Williamson and Roy Krenkel's beautiful 'Food For Thought' in 32. It's worth the price of admission for the stunning splash page alone. The Gemstone issues are facsimiles, the different numbering stemming from their decision to dispense with the complex EC numbering resulting from title changes. The final Gemstone issue restores an Angelo Torres illustrated story deemed unsuitable by the Comics Code Authority, and replaced by a reprint in the original.~DAR
Recommended: 32

The Further Adventures Of INDIANA JONES

Marvel: *3 issue miniseries (Raiders of the Lost Ark) 1981, 34 issues 1983-1986, 3 issue miniseries (Indiana Jones and the Temple of Doom) 1984, 4 issue miniseries (Indiana Jones and the Last Crusade) 1989*

Back in the days before Dark Horse had a monopoly of film franchises, it used to be Marvel's job to take movie heroes beyond their cinema incarnations. With Spielberg and Lucas's 1930s archaeologist/adventurer Indiana Jones, they managed to cover all three films and thirty-four issues of *Further Adventures* with original stories. The creative teams on the latter included John Byrne and Terry Austin on the first two issues, as well as Chaykin, Simonson and Ditko (so heavily inked he's hardly recognisable) on later ones. David Michelinie and Herb Trimpe were the most regular creative team, however, and, as you might expect, the majority of issues were nothing special, aspiring to the high-adventure feel of the movies but always falling quite a way short.~JC

INDIANA JONES

Dark Horse: *4 issue miniseries ('Indiana Jones and the Fate of Atlantis') 1991*, 6 issue miniseries ('Thunder in the Orient') 1993-1994, 4 issue miniseries ('The Arms of Gold') 1994, 2 issue microseries ('The Golden Fleece') 1994, One-shot ('The Shrine of the Sea Devil') 1994, 4 issue miniseries ('The Iron Phoenix') 1994-1995, 4 issue miniseries ('The Spear of Destiny') 1995, 4 issue miniseries ('The Sargasso Pirates') 1995-1996*

Dark Horse's efforts at presenting original Indiana Jones material are slightly better than Marvel's. Presented as self-contained series, some are adapted from the Indiana Jones books, some from role-playing games, others are original. The short miniseries approach seems to suit the subject-matter better, allowing a feel of the films to creep back into the narrative, but even so it's unlikely the comics will appeal much to anyone but the most ardent Indiana Jones fan. Do yourself a favour and hire out the videos instead.~JC

INDUSTRIAL GOTHIC

DC/Vertigo: *5 issue miniseries 1995-1996*

In a mystery city in a strange and broken-down world, the ugly and imperfect are imprisoned in a huge house. Pencil has been there throughout the thirty-five years of his life, the child of unacceptable parents. Nickel, his lover, who has no arms or legs, once passed for normal with artificial limbs. The two escape from their prison only to find that getting out is much easier than living with freedom. In search of a semi-mythical tower where rebels are welcomed, they meet all sorts of characters on the road, including violent rednecks and a gang of marauding women, as their relationship is reshaped by their new life. *Industrial Gothic* is one of McKeever's most straightforward stories, a comic road movie in which the various events are secondary to the development of the two lead characters, providing action and moving the story along. What makes the story especially good is the complete lack of moralising or explanation. McKeever's art is dense and textural, deep and dull colours overlaying each other. A feast: action-packed, weighty without being pretentious, endlessly intriguing.~FJ
Recommended: 1-5

INFERIOR FIVE

DC: *12 issues 1967-1968 (1-10), 1972 (11-12)*

Inferior in name, but certainly not in content, DC's humorous superhero group débuted in *Showcase* 62, 63 and 65. The five seemed to parody the 1960s Teen Titans, sidekicks to DC's longer-serving heroes. The membership comprised Merryman, the brains of the gang, though a bit of a wimp; White Feather, a cowardly archer who always missed (unless it was a coincidence); Dumb Bunny, whose image was based on the Playboy bunny, the ultimate bimbo with no brains but plenty of brawn (and, ahem...breasts); The Blimp, an overweight character who could float slowly; and Awkwardman, a clumsy oaf with superstrength and aquatic powers. The characters, with their little quirks, were expertly handled by scripter E. Nelson Bridwell and exaggerated by artist Joe Orlando. Bridwell wrote some first-class stories lampooning the likes of The Justice League of America, Tarzan, *Man From U.N.C.L.E.* and, naturally, various Marvel superheroes. While the humour waned near the end of the run, the earlier issues (and the *Showcase* stories, two of which were reprinted in 11-12 when the title was briefly revived in 1972) should definitely amuse you. Unless of course you're a boring old fart.~HY
Recommended: 1-6

INFERNO

Caliber: *5 issues 1995-1997*

Intriguing title, written by Mike Carey, with unusual, scratchy art by Michael Gaydos, who uses a lot of lines without making the pages look overwrought or busy, although his figure work is sometimes stiff. A man is killed in a mugging and finds himself in a strange "historic" land of the undead, where he's hailed as a familiar figure, attacked, hunted, aided. Except that he knows nothing about what's going on, why he's there, or even where he is. Carey builds character quickly, including a rich cast of sorcerers and immortals, and for a long time it's hard to work out who the good guys are. Fans of Neil Gaiman will probably enjoy taking a look at this.~FJ

INFERNO

DC: *4 issue miniseries 1997*

Surly pyrotechnic bint from *The Legion of Super-Heroes* goes away to find herself during the team's exile in the 20th century, and winds up having visionary experiences in a shopping mall. Less fun than it sounds. Lovely art by Stuart Immonen, and very clever and eye-catching cover designs, do not compensate for the pretentious, leaden story, also Immonen's fault.~HS

INFERNO: HELLBOUND

Image/Top Cow: *3 issues 2002-2003*

Marc Silvestri and a cast of dozens took a very long time to produce three issues of this Dirty Dozen in Hell story. When a demon gate is opened a former marine who killed his wife's murderer is assigned to lead a team of other convicts into hell to stop the demons destroying Earth. There's nothing here that anyone over the age of sixteen hasn't already seen a few times. Having trouble maintaining a schedule, Silvestri cancelled the comic and promises the conclusion in a paperback collecting 1-3. Don't hold your breath.~WJ

Thanos: INFINITY ABYSS

Marvel: *6 issue miniseries 2002**

Given expectations engendered by its poor predecessors, this starts in surprisingly intriguing fashion, with a host of

Thanoses, and a cosy feeling of the old gang getting back together as Gamora, Moondragon, Pip and Warlock all become involved. So do Captain Marvel, Dr Strange and Spider-Man when "blocks of nothingness" start appearing. Jim Starlin writes off less than successful uses by others of the Thanos character he created, while having the enthusiasm to draw the story himself, inked by Al Milgrom as in the good old days. Theirs is a powerful style encompassing quirkily satisfying renditions of planes beyond mortal knowledge. Once the revelations start with 3 the series downgrades slightly, but it's still the best comic Starlin has been involved in for fifteen years.~FP

INFINITY CRUSADE

Marvel: *6 issue miniseries 1993*

Third of the Jim Starlin/Ron Lim *Infinity* sagas, this differs from its predecessors in having an actual concept behind it. A tasteless and grotesque concept, to be sure, but at least they're trying. Adam Warlock's good side, inexplicably incarnated as a woman – The Goddess – recruits the more devout of Earth's heroes to enforce order and bliss upon the cosmos. And it's heathens to the rescue as the remainder go into that "There is no freedom in Utopia" riff, resulting in many crossovers replete with two-fisted action and theological debate, not a serendipitous combination. Oh, and the Universe is destroyed and recreated. Again. Time was when heroes just had to fight to save individual lives, or their city, or very occasionally their country. Now, everybody has to save Everything There Is all the bleeding time, and this overkill numbs the reader. Still, at least this series is equal-opportunity offensive. Both devout and irreligious people will find something to heartily despise within its pages.~HS

INFINITY GAUNTLET

Marvel: *6 issue miniseries 1991**

This multi-crossover series was dubbed Secret Wars III at the time of its release by most critics, but Marvel clearly hoped that Jim Starlin's script and George Pérez's art would give it some credibility. Nice try. Thanos acquires the Infinity Gauntlet, most powerful weapon in existence, and tries to impress his main squeeze, Mistress Death, by wiping out 50% of All That Is. Worlds live, worlds die, nothing will ever be the same again... you know, the usual. This calls for all Marvel's heroes to band together, in this title and in carefully signposted issues of their own titles, to overcome the menace. Pérez's dexterity with cosmic flash and glitter almost fools you into thinking there's something to this, but when over-commitment (he was making a double turkey sandwich, working on this and *War of the Gods* at the same time!) forces him off the comic, to be replaced by Ron Lim, the scales fall off our eyes and you realise what a load of tat it is.~HS

INFINITY INC

DC: *53 issues, 2 Annuals, 1 Special, 1983-1988*

Infinity Inc was another of Roy Thomas's love affairs with the 1940s superheroes. The first issue (drawn by Thomas's co-creators Jerry Ordway and Mike Machlan) saw a number of young heroes, most of whom were children of older members, attempting to join the Justice Society of America. When rejected, they decide to form a team of their own, and are joined by some of the younger JSAers. By 10, Ordway and Machlan's last, they've saved the world from the evil schemes of the Ultrahumanite and have proved their worth to their elders. Following a series of fill-in artists, Todd McFarlane takes over with issue 14, producing some of his earliest professional work between then and 37. Unfortunately, the stories during this period are not as tightly crafted as 1-10, introducing a series of dull villains, including Chroma and the genetic freaks called the Helix, who become the team's main enemies for the rest of the run. One of their members, Mr Bones, eventually joins the good guys. Tie-ins with *Crisis on Infinite Earths* dog the title during issues 19-24, following which many of the stories are (by necessity) taken up with retelling characters' origins in line with revised continuity – if you don't know what *Crisis* is, find out before attempting these issues, as they'll make very little sense if you don't. 27, which tells the first of several flashback stories to when many of the members knew each other as children, is good fun. Most of the new continuity problems have been worked through by issue 31, following which the group embark on an adventure with the Global Guardians, another set of ill-conceived and boring characters. After McFarlane's departure, there's little to recommend in the final issues. Vince Argondezzi takes over the art from 41, in one of the series' most character-driven plots as the team search for missing member the Silver Scarab. The later issues, however, remain largely unremarkable. 45 guest-stars the Teen Titans in a crossover continuing from *Teen Titans* 38, while the final four issues of the series are drawn by Michael Bair.~JC

INFINITY WAR

Marvel: *6 issue miniseries 1992*

Thanos is now on the side of the good guys following *Infinity Gauntlet*, and thus is one of the first to warn the assembled Marvel superheroes of the plan by the Magus (the evil side of Warlock) to replace them all with evil duplicates. One of the most tired and cynical efforts seen even in the money-grubbing crossover stakes. An ideal marketing opportunity for everyone to fight their evil counterpart in their own titles – sometimes for several issues, during which very little else happens. Yawn.~HS

THE INHUMANS

Marvel: *12 issues 1975-1977, one-shot ('The Untold Saga') 1990, Graphic Novel 1991, one-shot 1995, 12 issue limited series 1998-1999*, 4 issue miniseries 2000*

Always popular guest stars, the hidden race of genetically altered beings were perennially dismal when given solo outings, despite art by Neal Adams in their *Amazing Adventures* series and George Pérez and Gil Kane in their first comic. The problem is plot repetition. Ruler Black Bolt is possessed of a voice able to shatter mountains, and must therefore remain mute, but his half-brother Maximus has designs on Black Bolt's throne, and you can bet your copies of Fantastic Four 44-48 (in which the Inhumans débuted) that he's behind any devilry. Would you trust someone known to his face as Maximus the Mad? The Inhumans do time and again, and always pay. Their origin is divulged in another title familiar with repetition of plot, *Thor* 146-152. 'Dismal' adequately sums up all offerings until the 1990s limited series.

A vast improvement is initiated by the simple expediencies of a consistent creative team and the application of thought extending beyond superheroes fighting, although a conflict with humanity spurs the plot. Jae Lee's shadow-led, angular art conveys an incompatibility with the world at large, and Paul Jenkins emphasises the personalities of the hereditary ruling class of core characters to a greater degree than previously. The curious exception is Medusa, very much the blank slate, but the formerly dull Maximus is particularly well handled in manipulative isolation. Occasionally florid scripting, notably in the first issue, can distract, but approaching the series as a social study of an alien community pays off, as does a leisurely pace. In the succeeding miniseries the Inhumans are abducted by their Kree forebears to fight for Kree liberation, learning some truths along the way. Joe Ladronn's art is a bleak synthesis of Moebius and Kirby, while Carlos Pacheco's plot packs some surprises, but overall fails to engage.~FP

INITIAL D

Tokyopop: *4 volumes + 2002 to date*

The teenage Tak makes deliveries for his father's tofu business, driving down a stretch of road used by the local racers, unaware he's better than any of them. When a rival race gang challenge the locals, they win easily, but their best racer then encounters Tak on his morning delivery run and loses, but Tak is more concerned in becoming reacquainted with once time close friend Natalie. Over succeeding volumes he gradually becomes more involved in the racing. For adults it'll play out largely predictably, but this is intended as a boys comic, and as such there's action, thrills and romance, all well plotted and drawn by Shuichi Shigeno, who certainly loves his cars. This is published in the traditional Japanese format, meaning you start at the back and read forwards, scanning the page from right to left.~FP

INKBLOT

Aeon: *1 issue 1994*

Ward Sutton's cartoons are OK, but his subject matter is totally lame: feeling out of place in high school; feeling awkward with racial minorities; having Republican parents; wondering how a dead friend is getting on; and a Monkees reunion show. Hopeless.~GK

INKPUNKS QUARTERLY

Funk-O-Tron: *3 issues 2001-2002*

Spirited anthology title with four manga-influenced adventure features. The best of them is 'Pitchbright', with a decent enough story about a man whose consciousness is downloaded into an android body he constructed as a safeguard. The wonder, though, is in the art of E.J. Su, who starts with a good manga style, and progresses to excellent greytoned pencil work by the third chapter. As his work improved that much from a decent start in such a short time he could well be a talent to reckon with.~WJ

INNER CITY ROMANCE

Last Gasp: *5 issues 1972-1978*

Eccentric and powerful occasional series from artist Guy Colwell dealing with issues of crime, race, sex, poverty and injustice in a highly stylised "real" world. In 1 we follow three convicts in the days immediately following their release from prison in a stark portrayal of the aspirations and limitations of violent men. 2 follows the tragic events of a rock concert broken up by excessive police force, and 3 examines the dreams of men in maximum security prison. 'Ramps' in 4, explores, by allegory, the true story of third world tenants evicted by armed police from their San Francisco dwellings so that the landlords could complete a real estate coup. 5 provides a selection of short tales that highlight the insanity and irony of urban living. Violent, sexually explicit and emotionally challenging throughout. Worth reading.~WW

INNOCENT BYSTANDER

OllieOllie! Oxen Free Press: *6 issues 1997-1998*

Captivating blend of traditional comics storytelling and a more expressive, intimate illustrative style from commercial designer Gary Sassman. It features autobiographical tales of growing up in the 1960s and 1970s, hanging out and watching TV in a small town in the USA, interspersed with notional vignettes on any subject that the author feels like. The hook is that rather than keeping a single narrative viewpoint throughout there is a deliberate attempt to take the reader to other perspectives. 1 deals with Christmas, movies, drive-ins, Atlantic City, cat stuff and Hollywood hair, 2 features 'I Don't Want To Grow Up', Buster Keaton, why *Friends* is lame, owning a Munsters lunchbox and more cat stuff, whilst 3 concentrates on Groucho Marx. 4 has stories lovingly crafted around Sassman's two cats, and is followed by a full length (and painfully honest) exploration of first love in 5. A selection of 'Random Thoughts' comprises 6. These are the thoroughly enjoyable explorations of a life-long comics fan who knows just how much more there is to life. Practically compulsory reading for the jaded reader. Beyond this, Sassman ran strips in *Geeksville*.~WW

INSANE

Dark Horse: *2 issues 1988*

With the title tipping the hat to *Mad*, *Insane* lives up to the parody tradition. The first issue is better, with Hilary Barta's *Grimjack* pastiche packed with inspired lunacy, and the *Godzilla* story good as well. Sadly, it's the poor *X-Men* story that's cover-featured. 2 is only slightly worse, with *Lone Wolf and Cub* and *Concrete* as targets.~WJ

INSANE CLOWN POSSE

Chaos!: *3 issue miniseries 1999*, 12 issue limited series ('The Pendulum') 2000-2001*, one-shot ('Hallowicked') 2001*

Based on the antics and material of "Recording Artists" Violent J and Shaggy 2 Dope, the pair lend their brand appeal to the usual Chaos! blend of exploitative violence and glossy pyrotechnics. The Clownz are lovable psychopaths who just want to live their lives their way (which is apparently without benefit of a dictionary), but fate always has other plans for them. They can't complain however since they have the ability to summon the creatures and powers of a mystic resource they call The Dark Carnival, which can handle any problem that might be beyond their own destructive capabilities. 'The Pendulum' attempts to move beyond the plotless mayhem, by introducing Killnor and his various minions, hell-bent on remaking the world in his/its/their own image, and teaming our fun-loving guys with a faith-healer called Father Jesus, but it's still just mindless fights and gross-outs. The Halloween special is even more of the same. Absolutely pitiful fodder for the mindless.~WW

INSECT FEAR

Print Mint: *3 issues 1970-1972*

One of a number of underground horror comics, *Insect Fear* was an uneven collection of strips, and is best remembered for its inspired name. The first two issues contained work by Justin Green, Kim Deitch, Rory Hayes and Jim Osbourne, but at this early date they were far from their best. By 3 Deitch in particular was experienced enough to come up with the inspired 'Born Again', in which a criminal is reincarnated as a potato, and 3 has an unusually focused and powerful S. Clay Wilson strip as well as some very gory material from Roger Brand and Charles Dallas. The comic's most consistent artist was Spain Rodriguez, whose strip in 3 was beautifully drawn, as were all his covers.~DAR

Recommended: 3

INSOMNIA

Fantagraphics: *One-shot 1994*

This follows Mr Smeltling on his journey to find a cure for his insomnia; something he hopes to find at a special clinic. There are moments of surrealism along the way, and the introduction of some very sketchy supporting characters, but ultimately, one is left asking "so what?".~DB

INSTANT PIANO

Dark Horse: *4 issues 1994-1995*

An excellent humour anthology featuring the work of Mark Badger, Kyle Baker, Robbie Busch, Stephen DeStefano and Evan Dorkin. There are few people able to match the observational dissections of Baker or Dorkin's manic intensity, and *Instant Piano* has the best of both: Baker with chapters of a work in progress, and Dorkin with a very funny selection of three-panel throwaways and knowing satires about the obsessions of collectors. Mark Badger's strip about relationships loses out to Baker's hilarious and more concise musings on the same topic, but he's far better with other material, and Robbie Busch seems out of place, the little brother you've got to take with you. Stephen DeStefano is an enigma, with a fine adaptable art style that varies from Don Martin to 1930s cartoon strips: on top form he's every bit as good as Baker and Dorkin. Better with Sunday-lunch-table recollections than with Marx Brothers-style lunacy, he's the quiet heart of the book reflecting the rest. Also great is each cartoonist's page of things that make life worth living.~FP

Recommended: 1-4

INTENSE

Pure Imagination: *2 issues 1993*

A black and white collection of Basil Wolverton's inspired and inventive 1940s and 1950s comic strips. These draw mostly on his humour material, such as Powerhouse Pepper, Bing Bang Buster, and Mystic Moot and his Magic Snoot, and their manic alliterations and rhyming still stand up today. Add in a stirring Spacehawk strip in 1 and you have a wonderful package that deserves a place in the discriminating collector's life.~DAR

Recommended: 1-2

INTERFACE

Marvel/Epic: *8 issues 1989-1991*

This continues the tale of the characters introduced in Eclipse's *Espers* series. Like *Espers*, James Hudnall provides a well-plotted thriller concentrating on people not powers, but unlike *Espers* it's bogged down by detail. The necessary précis of its precursor occupies much of the first issue, but the cast, so well introduced originally, is thereafter largely reduced to bit players as all sorts of secondary characters are focused on at their expense until the fourth issue. Also detracting from the premise is the revelation of many others with superhuman abilities. This isn't a bad series, but disappoints in comparison with what had gone before. 1-6*, well painted by Paul Johnson, form a self-contained story, and are far better than 7's shoddy story-telling from Bill Koeb and 8's early Dan Brereton. The characters reappear in 1996, once again titled Espers.~FP

THE INTERMAN

Octopus: *1 volume 2003*

Jeff Parker has staked out his intention to resurrect the American adventure comic, and with *The Interman* he's off to a first class start. The roots of the story are in the 1960s and a CIA funded project to create a soldier capable of surviving a nuclear war. It involved genetically manipulating a fetus, theoretically enabling it to assume animal characteristics discarded during the normal gestation period. After a single experiment the project was terminated. Now the man who initiated the project wishes to clear up loose ends, and adventurer Van Meach finds himself the target of assassination attempts. Parker crafts an involving globe-trotting thriller in which everyone introduced serves a purpose, and which is a long read over 128 pages. His art is a little problematical. There are elements of both Doug Wildey and Paul Pope, but Parker doesn't approach the skill of his influences. His storytelling is excellent, though, and that's what counts here. He's set up the character for sequels, and they can't come soon enough.~WJ

Recommended

INTERVIEW WITH THE VAMPIRE

Innovation: *11 issues 1991-1994*

Undoubtedly the best thing about this title is the eerie John Bolton covers on the first two issues, which capture the urbanity and allure of Anne Rice's famous vampire, Lestat. A young reporter sits down to interview Louis, a man claiming to be a vampire, who obligingly tells the tale of how he was 'created' by the mysterious Lestat in early-nineteenth-century Louisiana. Although widely lauded, Rice's homo-erotic ramble, shot through with moments of extreme violence, is nothing new, and this adaptation lacks even the unintentional humour of the lead characters' incessant bickering.~FJ

INTRIGUE

Image: *3 issues 1999-2000*

Writer/inker Howard M. Shum's dialogue is about as clunky as Kaare Andrews's pencils in this acton thriller about Kirk Best, a violently ill-tempered, privately employed paranormal on the run, framed by the president for the murder of the vice-president. The female lead is an FBI agent hostage present only to be tied up or beaten up. The second half of 3 is well cartooned by Tom Bancroft but the story is unfinished.~GK

INTRUDER

TSR: *4 issue miniseries 1990, 6 issue miniseries (Intruder II) 1991*

Comics based on popular role playing games should have been very successful. They weren't, and here the fault must largely lie with writer Steven Grant, just tossing out badly dialogued clichés for the poorly drawn first series. He'd been given a kick up the arse for the second and uses his imagination, and with more serviceable pencilling from Bruce Zick turns in a worthwhile story. Games based on the strips are also included each issue, as are back-up strips, all decent, with Nat Gertler and Joe Staton's hard-boiled detective in 3-4 the best.~FP

INU-YASHA: A Feudal Fairy Tale

Viz: *15 issue limited series ('Part One') 1997-1998*, 9 issue limited series ('Part Two') 1998-1999*, 7 issue limited series ('Part Three') 1999*, 7 issue limited series ('Part Four') 1999-2000*, 11 issue limited series ('Part Five') 2000-2001*, 15 issue limited series ('Part Six') 2001-2002*, 8 issue limited series ('Part Seven') 2002-2003*

This is Rumiko Takahashi's latest series, published almost concurrently with the Japanese edition. It's up to par with her other material, but doesn't offer much that we haven't seen from her before. Kagome is a schoolgirl dragged by a centipede demon into the past, where she's taken to be the reincarnation of a village's heroine, Kikyo. She had saved the village from a half-demon, Inu-Yasha as he was searching for the Shikon jewel in an attempt to increase his powers to full demon level. Kagome wakes Inu-Yasha, the jewel is shattered, and the two must work together to restore it before its power is stolen by any number of other demons. These include Sessho-Maru (Inu-Yasha's half-brother who fights him for the enchanted sword, Tetsusaiga), a Crow demon, Yura of the Hair and the Mask of Flesh, but the worst of them is recurring villain, Naraku, who caused Kikyo and Inu-Yasha to distrust each other in the first place. With help from Myoga the Flea, a servant of Inu-Yasha's, the pair face these demons, all the while (and, of course, slowly) developing a romantic interest in each other, which is complicated by the resurrection of Kikyo, albeit without a soul. Along the way, other characters join them in their quest, including Buddhist priest, Miroku (in 'Part Three'), with a cursed hole in his hand, young fox-demon, Shippo (in 'Part Four'), and professional demon exterminator, Sango (in 'Part Five'). Every now and then Kagome returns to the present where she has to do catch-up exams and explain to her schoolmates that she's not really as ill as everyone's been led to believe, but these incidents become less frequent as the series progresses. *Inu-Yasha* is best described as a romantic comedy, though the romantic entanglements are often given less weight than the rest of the plot, and the grotesque demons add a more than normal element of horror that can be disturbing.~NF

INVADERS

Marvel: *41 issues, 1 Annual, 1 Giant-Size 1975-1979, 4 issue miniseries 1993*

This was Roy Thomas' wonderful project to revive Marvel's big three 1940s superheroes, Captain America the supersoldier, the original Human Torch Jim Hammond (in fact an android) and Namor the Sub-Mariner, along with their kid sidekicks. The tales were of their adventures during World War Two, but written and drawn in 1970s style. Thomas set himself the task of rationalising some of the uncoordinated events of the 1940s comics, and reintroducing, and partially revamping, some obscure old characters and inventing a few new ones in the old mould.

The regular artist was the extremely underrated Frank Robbins, a former Depression-era child prodigy muralist, highly successful newspaper strip artist (on *Scorchy Smith* and *Johnny Hazard*), and writer/sometime artist for DC in the late 1960s. He was still producing superb work for several Marvel titles late in his career, but *The Invaders* seems to have been his favourite. He clearly loved to draw the tanks, planes, submarines and other hardware of the period in accurate high-contrast detail, but never stinted with his extraordinarily dynamic and expressive figures and faces.

The only giant-size issue contains excellent recaps of the major characters' origins and a good story about a Nazi plot against Winston Churchill, but 1-4 were disappointing, concentrating on boring fights with Teutonic deities. Things picked up with 5-6, crossing over with *Marvel Premiere* 29-30, which débuted The Liberty Legion, a septet of more obscure 1940s supercharacters. 6 is essential for Robbins' definitive portrayal of the maniacal Nazi villain The Red Skull. 7-9

Available in a collected edition

introduced the team to an English aristocratic family, one of whom was a World War I superhero, another the vampire Baron Blood. The intense drama of these issues, largely set in darkness, was not matched again. Thomas moved the action to the Warsaw Ghetto, where The Invaders teamed with a traditional Golem (Robbins excelling himself in 12-13), then too soon unveiled another superteam, The Crusaders. 16-22 raised the standard again with a wild story, set in Germany, featuring captures, escapes, recaptures, Hitler, two hilarious post-modern Nazi supersoldiers, and the near-execution of The Invaders in Berlin. 26-28 are outstanding: Captain America's young pal Bucky Barnes stumbles upon the scandal of US concentration camps interning Japanese Americans. Of course, he founds a new multiracial teen superhero group, The Kid Commandos.

The splendid 1977 annual featured the regular creative team alongside new work from artists who had drawn the characters in the 1940s. Alex Schomburg's Human Torch episode is particularly thrilling. Thomas neatly and entertainingly tied up some inconsistencies between *The Invaders* and *Avengers* 71, where he'd had them guest-star eight years before. *What If?* 4, from the same year, drawn throughout by Robbins, does a similarly great job of clarifying the characters' actions immediately after the war. Giant-Size 1, 10, 20 (the 1939 origin of the Sub-Mariner), 21 and 24 are, incidentally, cheap ways to acquire otherwise prohibitively expensive important 1940s stories. The last dozen regular issues, after Robbins left, were unfit to go under the same name as the others. Don Glut scripted with no sign of interest, although Thomas managed a risible two-parter (32-33) in which The Invaders fought Thor, who conveniently believed everything Hitler told him. The artists need not be named.

In the 1993 miniseries The Invaders returned to New York and battled American Nazi villains. Thomas's lively story unearthed a few old characters that might have been better left alone, rather than drawn in bizarrely revealing costumes by Dave Hoover. Slick inking by Brian Garvey saved it. There's also a good Invaders story in *Marvel Univere* 1-3.~GK

Recommended: Giant-Size 1, 5-9, 16-22, 26-28, Annual 1

INVADERS FROM HOME

Piranha Press: *6 issue miniseries 1990*

Bobby Boomer is approaching a mid-life crisis when his wife tells him she's pregnant. Bobby's inability to come to terms with his new role constitutes most of the plot, which is really an excuse to ask all sorts of stupid questions and get back all sorts of stupid answers. Populated by talking ducks, aliens and bickering household appliances, it's a very witty look at life. Written and illustrated by John Blair Moore, this is Piranha's best and most accessible series.~NF

Recommended: 1-6

INVASION!

DC: *3 issue miniseries 1988*

One of DC's less remembered crossovers, but certainly one of the more entertaining. An alien race known as The Dominators want to know why Earth produces so many superpowered beings. They discover the meta-gene, which, when subjected to great stress, mutates the human body, bestowing a special ability. The Dominators live up to their name and enslave Earth by sending in assorted aliens under their control. Naturally enough, the entire pantheon of DC heroes turns out to stop them. It would have been all too easy for this to become a confusing farce, but scripters Bill Mantlo (in a rare outing at DC) and Keith Giffen, one of the most inventive creators working in comics, turn out a well-paced adventure in three eighty-page issues. Giffen also provides the art breakdowns, but other fan favourite artists who worked on the series include Todd McFarlane, Bart Sears and P. Craig Russell. A marvellously exciting slugfest.~HY

Recommended: 1-3

INVASION '55

Apple: *3 issue miniseries 1991**

1950s-style science fiction tale in which a small group of townsfolk must confront an alien invasion before military reinforcements can be summoned. Chuck Dixon writes a solid story with plenty of action and suspense while Lito Fernandez' detailed artwork is a pleasant blend of various American and European adventure-strip styles.~NF

INVINCIBLE

Image: *1 issue + 2003 to date*

His dad is a superhero, and he discovers he can fly and he's inherited his father's invulnerability, so Mark decides to go into the family business. It's light superheroics updating the Spider-Man school and crimefighting template, and while hardly original, it's a decent stab at an old tradition.~WJ

THE INVINCIBLE ED

Summertime Comics: *2 issues + 2002 to date*

Storyboard artist Ryan Woodward so far borrows heavily from the origin stories of Green Lantern and Spider-Man in this charming, but slight, story of high school kid Ed being given alien powers. It's well drawn, and there are hints of other events, but so far it's a very quick read.~FP

INVISIBLE 9

Flypaper Press: *2 issues 1998*

A comic look into who really runs the world and the way they behave. It's an interesting idea, but none of the characters have any depth, and what they're doing just isn't funny enough.~WJ

The INVISIBLES

DC/Vertigo: *Series one 25 issues 1994-1996*, series two 22 issues 1997-1999*, series three 12 issues (12-1) 1999-2000**

Series one begins with the introduction of wild child, Dane McGowan, whose encounters with Tom O'Bedlam teach him that magic exists. This prepares him to join King Mob (the shaven-headed leader), Boy (ironically, a black woman), Lord Fanny (a Brazilian transvestite) and Ragged Robin (a woman in mime make-up) as a member of the Invisibles, taking the name, Jack Frost (1-4). 5-8 see the team travelling in time to meet the Marquis de Sade, while in the present they're threatened by Orlando, whose idea of pruning the team, involves cutting off Jack's finger, which forces him to rethink his presence with the team. Single-issue stories follow, providing background, including Jim Crow and zombies in New Orleans and Sir Miles hunting humans for sport (9-12). Lord Fanny's tale is told in 13-15, as he/she is attacked by Brodie, who works for Sir Miles. While Dane is invited to join Sir Miles, the latter tortures King Mob, but has difficulty breaking through his psychic defences (16-19). Boy's 'origin' is told in 20, and the rescue of King Mob, with battles against an Archon, Miss Dwyer, Sir Miles and the King-of-all-Tears (21-24). The Invisibles set off for America as Division X is sent to investigate the disturbances at Sir Miles' House of Fun, where they learn that the conspiracy reaches into the highest echelons of British society.

In the second series, Jolly Roger, leader of a separate Invisibles cell, arrives at the home of Mason Lang, where King Mob's group have been recuperating. She has lost her team in trying to retrieve an HIV antiviral agent from a military installation. However, she's under the control of Quimper, and leads them into a trap (1-4). While King Mob, Robin and Boy investigate a time machine and uncover a secret about Robin, Lord Fanny and Jack go in search of the Hand of Glory, which they retrieve by dancing for the Harlequinade (5-7). King Mob travels back in time to 1924 to learn how to use the Hand of Glory, revealing more about the past lives of Invisibles, before Boy is captured and must be rescued from Cell 23, which specialises in the psycho-dramatic debugging of Invisibles agents (8-12). The remaining issues involve a complicated plan, with lots of time travel and an assault on the Dulce installation where Quimper believes that Robin will deliver the Invisibles to him, and Jack meets the Blind Chessman, who explains the nature of the world. The third series is numbered backwards, but is essentially a single storyline, in which the team and Division X attempt to prevent the assimilation of the Moonchild by one of the

Archons materialising from trans-dimensional space at Westminster Abbey.

The series had many different artists, most good storytellers, helping, against the odds, to provide some sense and stability amongst the constant stream of ideas flung at the reader. The best of them are Jill Thompson (series one 5-9, 13-15), John Ridgway (series one 11), Steve Parkhouse (series one 12), Phil Jimenez (series one 17-19, series two 1-13, 15-22), Warren Pleece (series three 11-9), and Frank Quitely (series three 1). Brian Bolland's covers for the second and third series, offer another perception and are themselves a highlight of the title.

Grant Morrison tries to make *The Invisibles* a receptacle for conspiracy theories and political ideology (primarily situationism), all suffused with magic and mysticism and innumerable references to cinema, music, literature, television and the events (real or imagined) that make tabloid headlines. He pushes the boundaries of accepted taste (at least within a 'mainstream' series) with tantric sex rituals and ambiguous sexuality, with horror, violence and piercings. Throughout, the key to survival appears to be language, and this is where the series fails. Whilst it all makes a sort of sense at the end (depending on the reader's ability to suspend disbelief), there are plots to follow and there is even some characterisation occasionally, Morrison's ideas aren't satisfying and they're not expressed particularly clearly. The reader is subjected to a great deal of information (and puns), but whilst it might have some context within the Invisibles, it has no context outside of Morrison's own fantasies.~NF

IRON FIST

Marvel: *15 issues 1975-1977, 2 issue microseries 1996, 3 issue miniseries 1998*

Martial artist Danny Rand acquires the mystical power of the Iron Fist in the remote Himalayan monastery of K'un Lun. The first series is a classic Claremont/Byrne production: intelligent dialogue, thoughtful artwork, layers of sub-plot and lovely cameos of Marvel staffers and heroes in civilian ID. There is no failure to shirk controversial issues, as the sympathetic portrayal of reformed IRA terrorist Alan Cavenaugh enhances a fine supporting cast. Claremont's final three issues of the *Marvel Premiere* run (23-25), these fifteen issues and the resolution in *Marvel Team-Up* 63-64 all read seamlessly into a continuing narrative. 1-7 suffer from some slightly convoluted side-tracking, but 8 onwards are tops, with 14 featuring the introduction of Sabretooth and 15 a warm, homely X-Men guest appearance.

James Felder's microseries script harkens back to Iron Fist's Marvel Premiere tales as Danny Rand returns to K'un Lun. Unfortunately, Robert Brown's scratchy pencils fail to depict a single recognisable character from that era. Dan Jurgens crafts an ambivalent miniseries of routine main action sequences interspersed with juicy plot twists aplenty. It's deeply rooted in Iron Fist's early history, a major plus point. Scott Koblish is not the inker for Jackson Guice, whose pencils are nevertheless clean and solid. He pays a lovely homage to Gil Kane in 1's flashback to Iron Fist's origin. Worthwhile, but no masterpiece.~APS

Recommended: 8-15

IRON FIST / WOLVERINE

Marvel: *4 issue miniseries 2000-2001*

An illogical tale of random plot events surrounding K'un Lun's permanent materialisation on Earth embroidered by perfunctory artwork. Considering the plethora of super-hero guest stars, it is hard to fathom Wolverine's title billing. Surely it couldn't be for commercial reasons?~APS

IRON-JAW

Atlas: *4 issues 1975*

Michael Fleisher's metal-mouthed barbarian hero made Conan seem like a New Man. Between threatening to kill children, de rigueur monster-slaying and the attempted rape of his sister, Ironjaw tries to claim his rightful kingdom from some Central Casting tyrants. Artist Pablo Marcos decorates said kingdom with numerous scantily clad lovelies ripe for ravishing. Pretty enough to look at, but some of the dialogue is so deliberately provocative it becomes funny. Most likely to say: "I like a woman with spirit. For the wilder the filly, the better the ride." Least likely to say: "Can I have another piece of quiche?"~FJ

IRON MAN

Marvel: *Series one 332 issues, **15 Annuals, 1 Giant-Size, 2 Graphic** Novels (Crash' 'Iron Man 2020') 1968-1996, one-shot ('The Age of Innocence') 1996, series two 13 issues 1996-1997, series three 60 issues +, 3 Annuals, 2 issue microseries (The Iron Age), 4 issue miniseries ('Bad Blood') 1998 to date*

Mortally wounded in Vietnam, industrialist Tony Stark designs a metal chestplate capable of sustaining his weak heart. This becomes the basis for a weapons and gimmick-heavy armoured suit, with the resulting crimefighter, Iron Man, being officially explained away as Stark's bodyguard.

The first 110 issues are characterised by almost incessant mediocrity. 1-50 have constant coronary scares, secret-identity crises and pedestrian art throughout. You'd have to be mad to want any of them except, perhaps, Barry Windsor-Smith's re-telling of Iron Man's origin in 47 (there's also some great Smith art on a dull story in 232). 50-110 are little better, but do have the odd bright spot. Jim Starlin is obviously making an effort in 55, introducing Thanos, and the Steve Gerber written 57-58 are acceptable, but his strange Annual 3, with a young girl controlling the Molecule Man's all-powerful transmutation wand, is unusual and worth a glance. The much-interrupted supervillains war in 73-81 has its moments, but a terrible ending, and 78 is inexplicably held in high regard by Iron Man fans (and reprinted in series three 46). It's a typically average Bill Mantlo and George Tuska fill-in, commenting on the problems in Vietnam. Mantlo became regular writer from 95, but the spark his scripts possess from 103 is mercilessly extinguished by poor artwork. No sooner has the art improved than Mantlo departs.

116 has writers David Michelinie and Bob Layton (who also inks) join the previous issue's new penciller John Romita Jr. For the first time Tony Stark is actually convincing as an internationally renowned industrial genius, playboy and inventor, and Iron Man as a technology-based superhero, while Romita Jr and Layton's artwork gives Iron Man a polish hitherto unseen. This is a quantum leap in quality, although the really good issues only begin with the first indications that Stark has an alcohol problem. 123-128* resolve that problem amid decently plotted super villainy, corporate shiftiness and a well-rounded supporting cast. 131-132 have an excellent Hulk story, industrial espionage rears its head in 137-141, and there's an offbeat battle with Dr Doom in 149-150 (collected with its reprise a hundred issues later). Michelinie and Layton conclude their plots by 154, and they're gone by 158, at which point *Iron Man* once again becomes very ordinary, with an interminable story from Denny O'Neil, Luke McDonnell and Steve Mitchell. Stark loses his business to Obidiah Stane, slips back into the bottle, and long-time confidant James Rhodes takes over as Iron Man. 182 sees Stark conquer the bottle, followed by another tedious plot as Rhodes goes nuts. Everything concludes in 200 with Stark in charge of a new company and new armour.

215 has Michelinie and Layton back, with penciller Mark Bright, who'd made some later O'Neil issues tolerable. They land Tony Stark with a preposterous pimp's hairstyle in 223, but in the same issue he discovers that many of Marvel's armoured characters are using technology stolen from him, and vows to destroy them all. The 'Armour Wars' story to 231* is a 100% return to form, and all issues to 250 are good superhero comics. A failed assassination leaves Stark paraplegic from 243, and although 248's speedy resolution is cheating (as was the quick conclusion to the initial bout with alcohol), better that than interminably repeated scenes of self-pity. 251-257 are largely fill-ins to be avoided (although 253 is acceptable), but welcome back John Romita Jr as penciller with 256 just in time for 'Armour Wars 2' in 258-266. The title is a misnomer, this having nothing to do with its predecessor, or any other armoured being, John Byrne writing a story about control of Tony Stark. There's a good mystery behind

the plot, but stretched far too thin, as is the succeeding story with old foe the Mandarin, drawn by Paul Ryan and Bob Wiacek to 275, the result being dull comics pointing the way to John Byrne's later slap dash efforts.

Len Kaminski and Kev Hopgood take charge from 280, and their run presents some interesting ideas swamped by dull execution. There's the introduction of substitute Iron Man War Machine in 282, the death and resurrection of Tony Stark, Iron Man becoming nothing more than a remote-controlled shell, and the use of computer capabilities as a recurring feature. Their best is Hopgood's last 'Crash And Burn', a corporate disaster for Stark in 301-306, with plenty of guest stars. Tom Morgan pencils until the end of Kaminski's run with 318, concluding a sometimes touching (and ultimately silly) story about Tony Stark's mentor.

Writer Terry Kavanagh managed what countless foes hadn't: to kill Tony Stark and Iron Man. From 321 to 325 *Iron Man, Force Works* and the *Avengers* tell chapters of the same stupid story relying on shock instead of plot. Despite countless stories offering contrary evidence, Tony Stark is revealed to have been under the control of Avengers enemy Kang for years, and actively working to destroy the team. Although he redeems himself in the end, the Avengers win by pulling a young Tony Stark from an alternate time-stream to save the day, and the star of 325 issues of his own title dies. *The Age of Innocence* re-caps the original's career and foreshadows what's to come as the younger Stark is set up as star of Iron Man with a virtually clean slate in 326. It all seems to have been prepared with the knowledge that the new series would set things right by starting at the beginning once again. The Iron Man graphic novel 'Crash', has computer-generated art and is so dull the script was probably also computer-generated. *Iron Man 2020* is only marginally better. This is Tony Stark's heir, a tormented man susceptible to bad influences, but for all that there's no spark.

An editorial brief to modernise Iron Man, re-working the character from the start using familiar elements from the previous continuity was carried out to decent standards in the second series. It displays spark and imagination even when using old scenarios like Stark being dependent on the energy provided by his armoured chestplate for survival. The first issues intertwine the Hulk's origin with that of Iron Man, and the entire series possesses a dynamism Iron Man hadn't seen in a decade. Jim Lee, Scott Lobdell and Jeph Loeb plot while for the most part, Lee, Whilce Portacio and particularly Ryan Benjamin pencil to great effect. It's a shame everything is negated by a return to the status quo for the third series, which isn't to say that series is bad. As ever, Kurt Busiek's writing picks and mixes the best of the past and gives it a shiny new coating along with sharp characterisation, thereby pushing all the right buttons. Unfortunately he also displays a lazy penchant for expository dialogue that rings jarringly false, thankfully excised with Roger Stern's arrival as co-plotter and scripter with 14. Penciller Sean Chen (to 30) produces fluid and exciting work, and the whole package makes for a decent superhero comic. Warbird is a frequent guest star, her problems with alcohol a recurring theme, and the best sample issues are the scene-setting first or an encounter with the new War Machine and a manipulative rival in 18-20. Busiek with artists Patrick Zircher and Bob McLeod are responsible for *The Iron Age*, a lively expansion of Iron Man and Tony Stark's early careers as experienced by long-time cohorts Pepper Potts and Happy Hogan. Published in 2000, 'Bad Blood' has Tony Stark behaving uncharacteristically and an old enemy lurking, but is a shadow of former triumphs for Michelinie and Layton.

Joe Quesada writes 26-30* (and plots 31-35 and the 2000 annual for Frank Tieri), providing edge of the seat imaginative stories. His first issues tease by turning Stark's life upside down, and Iron Man's armour then develops sentience with harrowing consequences. Quesada characterises the armour first as a jealous partner, then a jilted lover with Stark powerless. Thereafter he turns in a less satisfying plot with roots in Iron Man's origin, before Tieri writes solo to 49. His ideas don't match Quesada's, and stories are hampered by ugly artwork as Iron Man's armour goes through an umpteenth redesign. The best of this period is the 2001 annual in which Chris Claremont writes a story about Stark unable to use his armour, well pencilled by Michael Ryan who takes over on the regular title with 50, drawing a more jagged Iron Man than some, but a solid storyteller. Having previously avoided Marvel over a thirty-year career, Mike Grell writes 50-64. He starts very well, at almost every turn confounding expectations with his plots, which have a basis in the real world. 50-52 are almost as good as Quesada's writing debut, concentrating on Tony Stark rather than Iron Man. Thereafter, though, there's a decline with a trio of stories stretched thin at three issues apiece. 53-55 build on the previous issues, but 56-58 have the unwelcome return of a recent nemesis, and 59-61 send Stark back to the year 1000 in an overlong sorcery story also drawn by Grell. Tony Stark's activities are largely played up at the expense of Iron Man, a matter that's caused consternation among long-time readers, and old villains are nowhere to be seen. Grell is a good writer of human stories, so it's to be hoped he's only in a temporary dip.~FP

IRON MAN AND SUB-MARINER

Marvel: *1 issue 1968*

Between the demise of *Tales of Suspense* and *Tales to Astonish* and the start of their solo titles Iron Man and Sub-Mariner filled what really should have been called *Tales of Astonishing Suspense*. The pair only appear together on the cover, as the individual strips are both parts of longer stories and consist of cover to cover fisticuffs. That said, Gene Colan's muscular, dynamic art on both features is considerable compensation.~DAR

IRON MARSHAL

Jademan: *32 issues 1990-1993*

Iron Marshal, on a quest to avenge his master's death, meets the three dominant kung-fu masters of the time, Unmovable Creep, Great Thor and Blazing Titan. They have themselves been drawn into the search for the Unicorn Treasure, with which Bloody Duke intends to make himself Emperor. Though plot threads and characters remain, this storyline is effectively resolved in 22, after which Iron is framed for murder and becomes the target of assassins in another plot against the Emperor. The dramatic, tightly inked artwork of F.L. Khoo (1-17) and Lee Chi Ching (18-32) is often impressive, but this fantasy martial arts series is really just one long fight, leaving no room for depth in the characterisation.~NF

IRON WINGS

Action Press: *2 issues 1999*
Image: *2 issues 2000*

Jay Juch's mix of mediaeval and eastern fantasy introduces Wing, a young woman seeking redemption for some unknown guilt, and starts her on a quest with a thief, Pike and warrior, Ryder. Juch's artwork is clean and clear while the story, though hardly fresh, quickly establishes its own attitude. More issues would have been welcome, but Image, again, merely re-packaged the existing material before the series disappeared.~NF

IRONWOLF

DC: *One-shot 1986, Graphic Novel 1992*

The one-shot reprints Howard Chaykin's classic 1973 Ironwolf story from *Weird Worlds*. Combining elements of fantasy, science fiction and good old rebel-rousing, Ironwolf causes much destruction to the ruling empire and is a great nuisance to its Empress. It's one of Chaykin's earliest published stories, and remains among his best, with a great sense of adventure, great characters and a lovely raw appeal to his artwork. Almost twenty years after the original story there's a graphic novel follow up titled 'Fires of the Revolution'. This time Chaykin is joined by co-writer John Francis Moore, and the novel is drawn by the art team of Mike Mignola and P. Craig Russell. It's

* Available in a collected edition

a worthy successor. Ironwolf survives seeming death, but lies comatose for eight years. Now awakened, he's once again pitted against the evil Empress and her Blood Legion. Victory, deceit and political manoeuvring are all part of this excellent story, while Mignola and Russell's imagery rivals that of the original series. Perhaps it lacks the cutting edge of the original – it's always difficult to go back home again – but fans of the original series should be satisfied.~HY

Recommended: One-shot, Graphic Novel

IRONWOOD

Eros: *11 issues 1991-1995**

Writer/artist Bill Willingham, who'd already attracted attention for his sexy, sinuous superhero drawings on *The Elementals*, is one of the few creators who took his work for Eros seriously. His fantasy world is packed with the kind of interesting sexual encounters only possible with a cast of centaurs, magicians and four-armed Amazons in flying yachts. His wise-cracking, cocky young hero gets himself in all sorts of trouble, including a mystical quest, in a story that has a structure, pacing and a genuinely engaging plot, rather than being an excuse for a load of bonking. *Ironwood* is probably the horniest 'straight' Eros book, equating sex with fun, rather than the rather lamentable violence found in the likes of *Ramba*.~FJ

ISIS

DC: *8 issues 1976-1978*

Professor Andrea Thomas, with the aid of a magic parchment, transforms herself into the Egyptian goddess Isis, nemesis of evil. Based on a TV series, this is an entirely forgettable comic with cardboard scripts from Jack C. Harris and art to match from Ric Estrada and Mike Vosburg.~SW

IT AIN'T ME BABE

Last Gasp: *1 issue 1970*

Frustrated by the misogyny and sexism that permeated underground comix quite as much as it did the mainstream, a group of San Francisco-based women cartoonists formed a collective to publish their own comic. Taking its title from a feminist newspaper, which presumably appropriated it from the Dylan song, *It Ain't Me Babe* is an odd but interesting combination of trippy fantasies and slice-of-life comics, with contributions from Trina Robbins, Michele Brand, Meredith Kurtzman, Lisa Lyons and others. Two strips stand out from the crowd. Brand's 'Monday' is a tale of the workaday fantasies of a wage slave, and the jam strip 'Breaking Out' features comics icons Betty & Veronica, Little Lulu, Juliet Jones, Petunia Pig and Supergirl escaping the confines of their respective series and forming a consciousness-raising collective! The success of this one-shot led to the establishment of the *Wimmen's Comix Collective* and the still-published *Wimmen's Comix* anthology, and thereby kickstarted many women's careers in cartooning.~HS

IT GIRL

Oni Press: *One-shot 2002*

Luna (It Girl) is a member of superhero team, the Atomics, now a musical group. When Cadaver plays minds games with her boyfriend, Adam, convincing him that he's unworthy of her and the band, she grows wings and goes looking for him. Mike Allred's unassuming story is very nicely illustrated by Chynna Clugston-Major, whose artwork is not normally seen in colour, and loses some of its usual flourishes here.~NF

ITCHY AND SCRATCHY

Bongo: *3 issue miniseries, 1 Special 1994*

Owing much to *Squeak the Mouse*, this ultra-violent version of *Tom and Jerry*, gleefully presented in snippets during *The Simpsons*, translates astoundingly well to comics. The first issue is an exceptional example, with the pacing, timing and gags brilliantly achieved on the printed page. Every bit as carnage-crammed as the cover claims, it's not for the squeamish. Succeeding issues fall short, but are worth a look.~WJ

Recommended: 1

ITCHY PLANET

Fantagraphics: *3 issues 1988-1989*

This series looks at political and social issues in comic strip form. 1 has a nuclear theme, issue 2 deals with politics, and 3 covers elections. Well-meaning but dry, with Joyce Farmer and Lyn Chyvely's story of their trials and tribulations in launching *Tits & Clits*, in 2, being the best entertainment to be had.~HS

IT'S DARK IN LONDON

Serpent's Tail Mask Noir: *Graphic Novel 1996*

The Mask Noir series consists largely of young, radical thriller writers. Walter Mosley is their star turn. This anthology, which unites various of their authors, such as Stella Duffy and Graham Gordon, with cartoonists, is intended as a portrait of the city, generally seen from the underside. There are few identifiable thrillers or detective stories as such. Mostly it's meditations, and sometimes it's a load of wank.

Woodrow Phoenix's series of negative, four-panel pages with wordless views of more and less famous sites sets the tone. The story will appeal more to those recognising the iconography than those who've never been to London, though. Some of the stories happen to be set in London but don't need to be, like Neil Gaiman and Warren Pleece's haunting tale of a beautiful boy from a mysterious race, sold to a gangster with a predilection for beautiful youths. Others, like 'Frozen', by Chris Webster and Carl Flint, in which an artist's model takes revenge on the woman who's carved him out of his own piss, have a tokenistic view of the city in the first panel to justify their inclusion. Only Iain Sinclair and Alan Moore actually address the nature of London with any success, though both their pieces are oblique in approach. There's some good work in *It's Dark in London* but as a collection it lacks consistency and direction. There's too much cleverness on display and too many writers unfamiliar with the medium fumbling for effect.~FJ

IT'S SCIENCE with Dr Radium

Slave Labor: *7 issues, 2 Specials 1986-1992**

In the perfect world of tomorrow Dr Radium practises science (in the abstract), usually on his long-suffering assistant Roy. This is school educational films gone mad, as Dr Radium has to deal with the Elvi and a group of time-travellers from 1954 visiting the future. The first special is bit of a mish-mash, but the second, titled 'The Gizmos of Boola-Boola', is hilarious. Scott Saavedra's very funny material cries out to be adapted as cartoon shorts.~FP

Recommended: 1-3, 5-7, 'The Gizmos of Boola Boola'

JAB

Adhesive: *6 issues 1992-1995*

A comic whose editorial response to the proliferation of gimmick covers from major companies is to shoot bullets of varying calibre through the entire print run is to be cherished. Sadly, the contents of this Texas anthology don't always live up to that idea. The most successful graduate is the introspective lunacy of Shannon Wheeler's Too Much Coffee Man, wearing a giant cup of Java on his head for those occasions when an instant full-caffeinated pick-me-up is required. Tom King's 'Teen Squad' also has a few laughs, and both King and Wheeler incorporate the bullet hole into their third-issue stories. Walt Holcombe is in 1 and 4, the latter also boasting two pages of Chris Ware, but by the final issue, with a ventriloquist dummy theme, all inspiration has departed.~FP

Star Wars JABBA THE HUT

Dark Horse: *One-shot ('The Gaar Suppoon Hit') 1995, one-shot ('The Hunger of Princess Nampi') 1995, one-shot ('The Dynasty Trap') 1995, one-shot ('Betrayal') 1996*

One of the more imaginative characters to originate in *Star Wars*, Jabba the Hut is a corpulent perpetually drooling slug-like creature. He's also the galaxy's greatest criminal trader, thrilling in negotiation and one-upmanship. The appointment of Jim Woodring to write raises the eyebrows, but he's sadly reined in here, although producing perfectly acceptable and occasionally amusing stories adequately pencilled by Art Wetherell. None are essential purchases, but the best sample is the first with Jabba in full dealing mode. The Art of the Deal collects all one-shots.~WJ

JACK HUNTER

Blackthorne/Timeline: *1 issue 1987*
Blackthorne: *3 issues 1989*

Writer Bruce Jones recycles the amnesia plot from his acclaimed *Somerset Holmes* series to far lesser effect for rogue security agent Jack Hunter. A few good ideas are tossed in, only to be diluted or discarded and Jones is on autopilot for much of the run, as is artist Nollie Zamora for 2 and 3. The second series is black and white, and half of the first issue reprints the original first issue minus the appalling colour.~WJ

JACK KIRBY'S FOURTH WORLD

DC: *20 issues 1997-1998*

The odd Fourth World title was coined, and never explained, by Jack Kirby to describe what most consider his greatest work, his connected 1970s titles *Forever People*, *Mister Miracle* and *New Gods*. While not matching Kirby in terms of sustainable creations, John Byrne has equalled his ubiquity over a twenty-five year career, but even he was affected by a strange malaise induced by this cast. Throughout his career Kirby created a multitude of characters, almost all of which easily adapted to the subsequent attentions of others. It's curious, then, that the cast of *New Gods* and *Forever People*, stubbornly refuse to perform successfully for succeeding creators. Nevertheless Byrne produced the best reprise to date. He was respectful of his cares, served a majesty rarely seen in comics today with his best art of the 1990s, plenty of Kirby homages, and had the scope to attempt an extended scenario. There were plenty of fine moments, some good and surprising revelations, and even an explanation of the title in 13. The back-ups spotlighting a single character, often by Walt Simonson, were also good. On the downside, there was a lot of blood and thunder, punctuated by unsubtle infodumps and acres of wordage. In the final analysis, despite Byrne's laudable attempts to move the cast forward, the invidious comparisons invited by Kirby's titular prominence – a marketing contrivance to woo older comic buyers, or genuine tribute, you decide – prove the downfall of an ambitious title. As 1-19 are basically one continued story, if you want to sample try 1, or 12, largely concentrating on the past of Mister Miracle's assistant Oberon. 20 details Superman's first encounter with Kirby's cast.~FP

JACK OF HEARTS

Marvel: *4 issue miniseries 1984*

Intriguing supporting character given his own miniseries, which turns him cosmic with a deus ex machina origin revealing him to be a human-alien hybrid. Bill Mantlo's story limps under fluctuating character motives but George Freeman's all-too-infrequently-seen artwork just manages to save the series.~APS

JACK STAFF

Dancing Elephant: *11 issues 2000-2002*
Image: *1 issue + 2003 to date*

Written and drawn by Paul Grist, this starts as his interpretation of Marvel's Union Jack, with 1-4 based on events in a *Captain America* comic (253) featuring Union Jack that he'd read as a child. In Grist's version there's a Sgt. States, and it's a great introduction to Jack Staff's world – a mix of old-style Marvel and British action weeklies. In 6 and 7, we see the return of the Spider, the classic British anti-hero thief. He is drawn out of retirement by the theft of one of his costumes by a petty criminal, who then goes on a crime spree. Further characters familiar to British comic readers of a certain generation appear in later issues. The appeal of Grist's work is a multitude of simultaneous plot threads, creating genuine interest in the cast's myriad secrets. Who is Tom-Tom the Robot Man? What is chasing Becky Burdock, vampire girl reporter? And most importantly, where was Jack Staff for the twenty years he was missing, and why hasn't he aged? Grist's love of British comics is clear, and here he offers a unique mix of cups of tea and masks and tights. The series has been relaunched in colour at Image.~DB

Recommended: 1-10

JACK THE RIPPER

Eternity: *3 issue miniseries 1991**

Humdrum, tedious and just plain bad rehashing of the Whitechapel murders that manages to be both gratuitous and coy at the same time. Includes the worst drawn top-hat of all time. Avoid.~WW

The JACKAROO

Eternity: *3 issues 1990*

A Jackaroo is the Australian equivalent of a cowboy, and in this case that's Jack Keegan, good bloke in a fight, and not the type to let some bludger make off with his $5000 winnings therefrom. The obvious comparison to Keegan is Crocodile Dundee, but as written by Will Eisner. It isn't written by Eisner, though, it's written and drawn, very nicely as it happens, by Gary Chaloner. In chasing his money Keegan becomes involved with gangsters, robots and kung-fu experts, dealing with them all in his inimitable style. Sadly incomplete when cancelled, this is a forgotten gem of an adventure series that deserved a far wider audience.~WJ

JACK'S LUCK RUNS OUT

Beekeeper Cartoon Amusements: *One-shot 1998*

The lead characters' heads and dress are based on playing cards in Jason Little's very stylish, and stylised lead story. Gambler, Jack, and his girlfriend, Gina, meet and are charmed by bar-owner, Rex, but his intentions are not as friendly as they think. The back-up is about a woman who receives a ransom note before the kidnapping and is therefore prepared when the kidnapper arrives. This has more realistic artwork from Little, presented as stereographic images.~NF

Chaos! Presents: JADE

Chaos!: *4 issue miniseries 2001, 4 issue miniseries ('Redemption') 2001-2002*

Jade is a 4000-year old vampire who has decided to restore the honour of China by defeating all the Triads, which effectively control the country. The first miniseries takes place in China as, aided by the mute ninja, Silence, she takes on the government-backed Kuei agency, which has been monitoring her dreams. She also has to contend with the apparent resurrection of her lover, Shiro and the sorcerer who killed him, Pai Lung, the White Dragon. 'Redemption' takes place in America where the Triads have been raising forces against her and allied themselves with an organisation called The Progeny, dedicated to eliminating all vampires using its Iron Racer armour. Inside the armour is Kayleigh, a young woman fighting to protect her father who invented it and is now a prisoner of the Triads. These two series are both action-driven, without losing track of character development, and, as written by Christopher Golden and Tom Sniegoski, Jade and Silence are an interesting pair with a lot of promise. The pencils by Wilson Tortosa (except for the first issue by Ken Lashley) show a more marked manga influence in Redemption, but fit well with the mix of magic and technology on display.~NF

JADE WARRIORS

Image: *3 issues 1999-2000*

Mike Deodato's skin mag collection provides extensive reference for this story of evil female Japanese warriors seeking to kill a defector from their group. Existing for no other reason than to provide page after page of half-naked women, you'd be better off, and probably achieve greater satisfaction with the original reference material.~FP

JADEMAN KUNG-FU SPECIAL

Jademan: *One-shot 1988*

Promotional anthology that served to introduce the English speaking market to the mega-successful kung fu Superhero comics that are a mainstay of Hong Kong and Chinatowns all over the planet. The four previewed titles are *Blood Sword, Drunken Fist, Force of Buddha's Palm* and *Oriental Heroes,* all credited to Tony Wong, but actually a production line of approximately twenty anonymous creators. They're translated, hopefully very tongue in cheek, by Hong Kong movie addict Mike Baron. The storylines are practically irrelevant, simply a way to get to the long, lavishly illustrated and overblown fight scenes. Lip-synching optional.~WW

THE JAGUAR

DC/!mpact: *14 issues, 1 Annual 1991-1992*

Dispensing with the Archie character, !mpact retain only the name and vague background details for this teenage feral female. William Messner-Loebs and the initial art team of David Williams and José Marzan turn out a fine combination of college angst and superheroics, as Brazilian Maria deGuzman comes to terms with not only university life in a new country but also her genetic inheritance of the Jaguar powers. The supporting cast is well conceived, particularly spoiled teenage prom queen Tracy Dickerson, sadly tempered in later issues. David Williams' pencils in 1-6 are extraordinarily confident for a newcomer (although deadline pressures seem to be affecting him towards the end of his run), and while successors were adequate, they fail in comparison. Improbabilities of plot convenience are the major flaws in an otherwise consistently entertaining series. It could have done without a covert lab beneath the college, for instance, unsubtle expository dialogue and thought balloons, and the occasionally woefully pedestrian diary entries as narrative. On the plus side, Loebs has a fine time prodding at political correctness and insulting comedians, among other more prosaic topics.~FP

Adventures of the JAGUAR

Archie: *15 issues 1961-1963*

Following the moderate success of *The Adventures of the Fly,* Archie launched this companion title, in which zoologist Ralph Hardy discovers a magic Jaguar belt in an ancient temple. It grants him the power of flight (via belt jets – pretty sophis, these ancient Incans), incredible strength and control over all animals. It also, inexplicably, gives him a snazzy red jumpsuit and rips off his moustache (ouch!) whenever he uses it to sally forth and fight crime as The Jaguar. Art for most of the series was by John Rosenberger, benign but bland, and the writers remain anonymous, but were almost certainly moonlighting *Superman* staffers, as the similarities between the two series were marked. Sample 7, in which the Jag's three girlfriends – immortal goddess Cat Girl, "sea Circe" Kree-Nal and secretary Jill Ross – join forces as the "Jaguar Rescue Team" to fill in during his absence. Lightweight, silly fun.~HS

JAGUAR GOD

Verotik: *8 issues (0-7) 1996-1997*

Frothing letters page correspondents would have it that this combination of Frazetta style fantasy action with detailed sex is a breakthrough for adult comics. In reality it's an extremely unpleasant misogynistic coupling of brutality with sex, aimed at retards who consider Conan a wimp and like their decapitations graphically portrayed. Plots? There are a few, but then again, too few to mention, although the art throughout is of a decent standard from an ever shifting cast.~WJ

THE JAM Urban Adventure

Matrix: *1 issue 1987*
Comico: *1 Special 1988*
Slave Labor: *5 issues 1989-1991*
Dark Horse: *3 issues (6-8) 1993-1995*
Caliber: *5 issues (9-13) 1995-1996*

This is almost sit-com, and the Matrix, Comico and Slave Labor issues are magnificent. Bernie Mireault is a one-man-band producing these stories of Gordon Kirby, an ordinary guy who likes to dress up in tracksuit and hood to roam the streets performing good deeds as The Jammer. He encounters bizarre situations, and a rabid and preposterous terrorist group, and serves as a test case for the Devil to ruin his cosy and contented domesticity: this isn't your everyday superhero title. The delightful whimsy begins to fade a little with the Dark Horse issues, in which Kirby is psychoanalysed, and non-Mireault material begins creeping in. At Caliber *The Jam* coasts into navel-gazing and becomes prone to meaningless padding and interludes; while it still contains good ideas, they're stretched very thin indeed. Worse still, issues are packed with wilfully self-indulgent and plain bad strips from other creators. He was given a decent final hurrah, though in *A Caliber Christmas.* Many guides list the existence of a second Matrix issue, which was never actually published, and portions of the Matrix comic were reprinted in the first Slave Labor issue.~WJ

Recommended: Matrix 1, Comico Special, 1-7

JAMES BOND

Acme/Eclipse: *2 issue microseries ('Permission To Die') 1989, One-shot ('Licence To Kill') 1989*

Dark Horse: *3 issue miniseries ('Serpent's Tooth') 1992*, 2 issues ('A Silent Armageddon') 1993, 2 issues ('Shattered Helix') 1995, 3 issue miniseries ('The Quasimodo Gambit') 1995*

Mike Grell started the *James Bond* revivals hoping to revert from the gimmick-ridden format of the later films back to the suave, rather sadistic mood of Ian Fleming's original novels. There are some nice touches, and Grell carefully limits the villains, who're flamboyant, but not ridiculously superheroic characters. Grell also worked on a bog-standard movie adaptation of *Licence To Kill,* written by Richard

* Available in a collected edition

Ashford, and also featuring the art of Chuck Austen, Tom Yeates and Stan Woch.

Doug Moench's take on the quintessentially British superspy in 'Serpent's Tooth' relies much more on our familiarity with films, taking from them its pacing and its reliance on a pretty woman popping up with a vital piece of info whenever the plot starts to droop. Moench attempts some of the trademark one-liners, which, never exactly side-splitting on screen, fall even flatter on paper. A standard-issue mad villain (who's experimented on himself with some lizard genes and become a serpentine hybrid) plans to use stolen nuclear missiles to set off earthquakes that will destroy 83% of the Earth's population and allow him to remake the earth in his own image. Gripping it isn't, and it's not helped by Paul Gulacy's stiff, badly painted artwork that looks like a relic from the 1970s. He'd have been much better off drawing a crimplene safari-suited Moore than a slick, narrow-trousered Connery. Poor show all round.

John Burns restores some dignity, drawing Simon Jowett's scripts for 'A Silent Armageddon', and drags our hero kicking and screaming into the computer age. Jowett's Bond doesn't grate, but neither does he shine, and Burns' art is the real star of the show. For some reason only two parts of the advertised four were ever published. This was also the case with 'Shattered Helix', although Dark Horse had more cautiously only promoted a three-issue run. Jowett's back, with David Jackson pencilling. It doesn't have many twists, though. Bond and a floosy race Cerberus to the CIA's old Antarctic hang-out, which Bond must destroy.

Finally there's Don McGregor's stab at Bond. His characters traditionally have plenty of flair, but here he saves most of it for the villains. Larger-than-life characters are right up his street and the deadly warrior Maximillian 'Quasimodo' Steele could have stepped straight out of an issue of Sabre. The plot, such as it is, is an excuse for a face-off between the two that has Bond tracking Quasimodo and other bizarre disciples of the 'Heavenly Way' through the Georgia swamps.~FJ

JANE'S WORLD

Girl Twirl: *3 issues + 2002 to date*

Featuring a hapless newspaper reporter in a series of gag strips, Jane's World has gathered a respectable following through web page hits (www.janesworldcomics.com), and it's easy to see why. Paige Braddock's sketchy cartooning is very expressive, and her gags match those of most newspaper strips. Rather than just collecting the earlier work, the comics expand on it. This is good clean wholesome fun for everyone but fundamentalist christians.~WJ

JAR OF FOOLS

Black Eye: *2 volumes 1995**

Ernie Weiss is a destitute magician obsessed with his brother's suicide and mourning the termination of a relationship when he encounters a conman and his daughter. The conman wants Weiss to teach his daughter magic, and the trio are accompanied by Al Flosso, former master of the prestidigitatory arts, now nursing-home escapee. Esther, Ernie's former lover, is facing a dead-end working in a coffee bar. All have problems to face and resolve, and over 140 pages creator Jason Lutes skilfully weaves a compelling plot. The warmth and humanity of the cast shine through the pages, and Lutes' assured storytelling is all the more amazing for this being his début. The first part is also available as a self-published volume.~FP

JASON AND THE ARGOBOTS

Oni Press: *4 issue miniseries 2002*

After an earthquake, Jason finds a giant robot buried beneath the desert and uses it to stop some super-powered criminals, who have taken advantage of the quake to escape from a nearby prison. Taking it home to his grandfather and precocious sister, Juni, he learns that his mother built the robot, Chiron, with the help of aliens, who came to warn of a terrible threat from space. Now the military want the robot back. J. Torres writes a good tale, with humour and charm, only hinting at the connection to classical mythology and the much larger adventure to come in 2003. The open storytelling and clean lines of Mike Norton are also appealing.~NF

JASON AND THE ARGONAUTS

Tome: *5 issues 1990-1991*

Patrick Zircher's attempt to be utterly faithful to the original text led to pages of dull material in this adaptation, particularly in 3 when almost the entire issue is occupied by the introduction of dozens of bit players. Discounting that, though, he managed a fine job in bringing the Greek legend to life, and those interested shouldn't be discouraged that it was never completed.~WJ

JASON GOES TO HELL – The Final Friday

Topps: *3 issue miniseries 1993*

A shoddy adaptation of what was at the time the final *Friday the 13th* film with Jason jumping from body to body in an attempt to be reborn.~WJ

JAVA TOWN

Slave Labor: *6 issues 1993-1996*

Scott Saavedra's comic/zine began with strips about coffee and its effects, but evolved into something similar to his later *Comic Book Heaven*, containing reprints old adverts from comics and magazines. Saavedra also creates new stories by cutting up panels from old comics and rewriting dialogue (2-4). In the best of Saavedra's own strips, 'The Brain Eaters of Outer Mongolia' (6) takes coffee as a starting point and then diverges into film parody. The first, forty-eight-page issue is mostly reprinted from *Suburban High Life*, *Splat!* and *Graphic Story Monthly* with some new pages.~NF

JAX AND THE HELLHOUND

Blackthorne: *3 issues 1986-1987*

Jacob 'Jax' Morosco operates as a freelance troubleshooter. When he joins forces with a huge demonic hound named Mulu, who is in fact an interdimensional guardian, his workload becomes more other-worldly. Mulu enhances Jax's occult profile along the way. Dennis Marker's artwork is inventive but not quite up to professional standard, but hints of an affection for Dan Spiegle's work don't do the characters any harm. The writing is better, and greater success might have been achieved in colour.~SW

JAY AND SILENT BOB

Oni Press: *4 issue miniseries 1998-1999**

The characters Jay and Silent Bob have cropped up in all of director Kevin Smith's movies, culminating with their starring role in *Jay and Silent Bob Strike Back*. Written by Smith and illustrated by Duncan Fegredo, this sends the undynamic duo on a rambling road trip to Shermer, Illinois, the setting for many of John Hughes' 1980s teen comedies, where "all the bitches are fine" and "all the dudes are preps and dorks." Along the way the pair encounter the star of *Doogie Howser, MD* (now making 'indie' porno films), grumpy celebrity Mister Rogers, and an escaped female orang-utan. As with Smith's movies, this is filled with an extraordinary amount of slangy, X-rated dialogue revolving around sex, porn, weed and pop culture. It's something of a minor miracle that Fegredo manages to fit in so many excellent drawings amidst the heaving word balloons. Fans of the films will have no cause to complain about this comic's adolescent sensibilities; the unconvinced or unconverted, however, may find fratboy humour, and constant use of the word 'gay' as an insult to be exceptionally tiresome after a while.~AL

JAZZ AGE CHRONICLES

EF Graphics: *3 issues 1989**
Caliber: *5 issues 1990-1991*

Well-researched and engrossing stories set largely in Boston, 1926. The EF series is a very competent début for creator Ted Slampyak, a decent story about a vampire on the loose and a mysterious baroness. It introduces private eye Al Mifflin, uncouth and inventive as should be the case, and Harvard archaeologist Clifford Jennings, cultured, refined and deliberately conceived to play off Mifflin. Many elements of the first Caliber story (1-2) stem from the Boston police strike and rioting of 1919, most pertinently revealing Mifflin's former career, and it's the highlight of the series. While not original, Slampyak has the private-eye routine down well, and if there's a few too many talking-head shots, those interested in detective stories will find the tale compelling enough to overlook them. The final story, 'The Flowers of San Pedro', is the weakest *Jazz Age Chronicles* tale, very much in Indiana Jones territory, with a remote Arizona town falling prey to evil machinations, and two new female characters, one introduced as no more than the irritating bimbo whose part in the plot is to be captured.~FP
Recommended: Caliber 1-2

JAZZBO!

Slave Labor: *2 issues 1994-1995*

Subtitled "Comics That Swing", Eric Searleman mixes off the wall observational humour, some interesting slices of life, and some unobtrusive whimsy, often with musical connections. The whole works far better in the second issue than the bitty first, where a collection of experiences begin with the appearance of a giant egg in Phoenix. Sadly discontinued, the cover theme of a different style of band each issue was also working well.~WJ
Recommended: 2

JEMM, SON OF SATURN

DC: *12 issue limited series 1984-1985*

This is basically DC's version of *E.T.* Jemm is a displaced prince of Saturn – obviously the rightful ruler since he was born with the pulsating jewel embedded in his forehead that allows him to see into people's souls. Luther Mannkin is an orphaned boy living in Harlem, whose elder brother is mixed up with some very nasty people. Jemm and Luther meet, and it's love at first sight. But there are baddies demanding their attention on Earth and on Saturn: gangster bosses with artificial eyes, and Saturnian warrior women with high-heeled boots and whips. In its favour, it's downbeat in unexpected areas, but it seems to go on forever, and the plot (writer, Greg Potter) and storytelling (artists, Gene Colan and Klaus Janson) are very confused. You'd need a heart as big as a house to care a jot about any of the participants, and the last two pages should carry a health warning.~FC

JENNY FINN

Oni Press: *2 issues 1999*

Created and written by Mike Mignola and Troy Nixey, drawn by Nixey, this is a murder-mystery based around a woman fished from the sea, bodily corruption and, possibly, love. It's a surreal, horror, historical melodrama, perfectly suited to Nixey's slippery artwork. Regrettably, it's also only half-finished.~NF

JENNY SPARKS The Secret History of the Authority

WildStorm: *5 issue miniseries 2000-2001**

The Authority's caustic, chain-smoking sweary English girl was the Spirit of the 20th Century. Not the easiest power to define in a fight, but her death at the turn of the millennium provides a good excuse to delve into a bit of retro-continuity dressed up as her final diary entries. Written by Mark Millar and illustrated by John McCrea, this is good superhero fun and a gentle introduction to the WildStorm style, thus a nice jumping on point to anyone thinking of giving *StormWatch, The Authority*, or any of its myriad spin-offs a go.~JC

JEREMIAH

Adventure: *2 issue microseries ('Birds of Prey') 1991*, 2 issue microseries ('A Fistful of Sand') 1991*, 2 issue microseries ('The Heirs') 1991*
Catalan: *1 volume ('Strike') 1990*
Venture: *1 volume ('Gun in the Water') 2002*

Rather suprisingly adapted for television in 2002, this black and white series contains just three of revered Belgian artist/writer Hermann's *Jeremiah* graphic novels, now numbering twenty-three in European editions. Each album is split into two comics. Set in violent and lawless post-apocalyptic America, the series chronicles the adventures of two young drifters, Jeremiah, the young, trusting Everyman, and Kurdy, his worldly-wise partner, as they attempt to survive in a violent and lawless world. 'Birds of Prey' tells how they meet after Jeremiah's farm compound is destroyed by outlaws.

Like *Judge Dredd, Jeremiah* works in many timely icons and fads such as bowling, commenting on current society as it goes. Many of the stories revolve around Western scenarios. 'Fistful of Sand' finds our heroes lost in the desert, trapped between a bunch of thieves and a local militia band, both trying to find and steal a stash of gold. It could just as well be a *Blueberry* strip. The third graphic novel, 'The Heirs', concerns the now infirm but still tyrannical community ruler whose son is a drunken wastrel and whose daughter is scheming to inherit his position. Jeremiah's arrival changes everything.

The reprints are inferior to the colour graphic novel translations as the wider, European-size pages are shrunk considerably to fit the US comic format, and while Hermann's artwork is detailed, but loose and full of energy, the ochres and oranges of coloured versions add greatly to the spaghetti Western atmosphere. One graphic novel, the thirteenth, was published by Catalan. Combining the pleasures of bowling with recruitment for a shady religious cult, it works its way to a facetious, if unpredictable ending. More recently, Venture has published 'Gun in the Water' (22), in which Jeremiah and Kurdy rescue Jason, from a water tank and find themselves involved with his suspicious family, whose guilty secret will endanger them all.~FJ
Recommended: Birds of Prey 1-2

JERRY IGER'S GOLDEN FEATURES

Blackthorne: *6 issues 1986-1987*

Black and white reprints of 1940's and 1950's strips produced by the Iger comics 'shop'. A common practice was for publishers to subcontract the creation of a comic's contents to story factories rather than have writers and artists on salary. The Iger group was responsible for some of the best strips of the period, and *Golden Features* represents them under a separate theme in each issue. 1 showcases Ruth Roche and Matt Baker' gypsy adventuress Flamingo, 2 has superhero Wonderboy, 3 features Girls (scantily clad heroines), 4 recounts the cases of ace spy ZX-5, issue 5 has horror stories and 6 stars child heroes such as Pee-Wee and Kid Patrol. Although many stories seem dated by today's standards, there are many hidden gems dotted throughout, but the spotty reproduction makes enjoying them a rather an effort.~WW

JERRY LEWIS

DC: *84 issues (41-124) 1957-1971*

This was originally *Dean Martin and Jerry Lewis*; the alleged comedian inherited the title when the pair severed their professional relationship, so the 'début' issue of *Jerry* is 41. Mostly, these are innocuous, if irritating, slapstick routines, with little to commend them apart from the sterling work of DC's comedy stable of artists: Bob Oksner, Win Mortimer etal. Hard-core fanatics of one persuasion or another might want to pick up some later issues for one shaky reason or another. 92 has a Superman cameo, 97 a guest-shot by Batman, Robin and Joker, 101-104 are alleged to feature Neal Adams art, though because of the high stylisation in humour comics, picking out styles is tricky. 105 features a full Superman guest appearance, 112 co-stars the Flash, and 117 the non-superpowered version of Wonder Woman.~HS

---

* Available in a collected edition

JESTERCROW

Castle Rain Entertainment: *3 issue miniseries 2000-2001*

Science fiction series from Michael Angelos set in the far future. In the centuries following a catastrophic war many intelligent species band together in an embattled federation called the Quindarin Heirachy and form an elite band of superpowered warrior monks/secret police called the Ves'Da'Va Crow Order. Jester is high in the ranks, and more concerned with the philosophy of the Order in its search to recruit and train the many super-powered outcasts than in their latter-day governmental role. Thus it is no surprise that he finds himself the victim of a traitorous plot from within the Crow military faction that forces him upon a vengeance trail to regain his honour and save the world. Complex and ponderous in all the wrong places, the art from Stephen Sadowski and Scott Lee buoy up the package but can't save it.~WW

JET

WildStorm: *4 issue miniseries 2000-2001*

Jet is Jodi Slayton, daughter of Backlash, now at college after the death of her boyfriend. A reluctant heroine, she's mistrusted by the local police who are forced to accept her help when Mr. Meaner turns up. He's been giving super powers to the likes of Rhyme and Reason and the Timewaster, who cause havoc at the mall and on campus. Written by Dan Abnett and Andy Lanning, the story's amusingly told, portraying Jodi as a young woman with spirit and sense, determined to make her own place in the world. Dustin Nguyen and Derek Fridolfs, on pencils and inks respectively, combine to produce some detailed and very attractive artwork.~NF

JET COMICS

Amaze Ink: *3 issues 1997-1998*

Alex is a high school kid who gains a variety of powers from a mysterious super-science disc. So he does what any youngster would and becomes a superhero. Calling himself Spectrum he sets out to make the world a better, cooler place. A successful foray into reproducing those fun comics of childhood from relative newcomers Josh Olsen and Steven Martinez.~WW

JETCAT CLUBHOUSE

Oni Press: *3 issue miniseries 2001*

The 6 year old superheroine is joined by child rock star Oddette and mummified boy king Tutenstein for delightfully lightweight adventures. Their meetings are also attended by an incontinent monkey named Ploppy. In 2 and 3 we meet Jetcat's super-team The Two-Fisted Five consisting of Teen Idol, Snakefist, Suburbanaut and Neon Varmint. There's an eight page colour section in the centre of 1 and all issues feature adaptations by creator Jay Stephens based on storyboards for Nickelodeon's animated Jetcat shorts.~SW

A JEW IN COMMUNIST PRAGUE

NBM: *3 Volumes 1997-2001*

Very few graphic novels are worthy of the title, but this series of books by Vittorio Giardino is precisely that: a novel in pictures. The story chronicles the early years of a young Jewish boy, Jonas Finkel, growing up in 1950s Prague. Giardino superbly combines a subtle study of adolescent anxieties and relationships with the desperate paranoia of life under totalitarianism and, more to the point, he manages to make it immensely readable. Jonas is a believably complex character trying to support his mother while his father is serving time as a political prisoner, and his teenage insecurities are echoed throughout the three books by the constant threats of persecution or imprisonment. As with his other books, Giardino reveals himself to be a master of economy and his elegant figures, delicate linework and pastel colours are a delight for the eye. Truly one of comics' masterpieces.~DAR

JEZEBEL JADE

Comico: *3 issue miniseries 1988*

Spinning off from *Jonny Quest*, this miniseries spotlights Race Bannon and Hong Kong's best thief, Jezebel Jade, in a fast-moving thriller. The Quests' old foe Dr Zin has kidnapped an American scientist who's working on a formula to prolong life, and it's up to Jade and Bannon to rescue him. Strongly plotted by William Messner-Loebs, with plenty of action and surprises, the illustration by Adam Kubert is excellent. Don't be put off if you haven't read Comico's *Jonny Quest* (although you should): this is superior adventure material.~FP

Recommended: 1-3

JEZEBELLE

WildStorm: *6 issue miniseries 2001*

Magic was introduced into the WildStorm universe in the 2000 annuals during which the demon Ghoulgotha was defeated in his attempt to gain the mystical Soulstone, but at a cost. Now, her sister's death has made Harper (Jezebelle) Harrison the next in line to inherit magical powers and she must deal with her boyfriend's suicide, the return of Ghoulgotha and High School. With nods to *Buffy the Vampire Slayer*, *Jezebelle* is a teen-friendly look at the consequences that all actions have and the responsibilities they engender. Ben Raab and Steve Ellis have produced a pleasant-enough comic but neither script nor artwork are anything special.~NF

JIGABOO DEVIL

Millennium: *1 issue (0) 1996*

Set in a distopian 1968 where a separate Pan African-American nation has existed in North America since the 1930s. We see various deals being made that will make the reunification of the PAAC with the USA result in the continuation of the USA's institutionalised racial prejudice. The appearances of a 1930s masked vigilante named Jigaboo Devil and 1960s artist Keisha Mella's portfolio of paintings depicting him seem set on a public relations collision course. This is writer LaMorris Richmond's a controversial take on a black *V For Vendetta*. The writing, whilst crammed, is accomplished and compelling. Barton McGee and Seitu Hayden's artwork suffers from being mono, characters aren't always named and continuity can be weak as a result. A fascinating story idea that deserved completion.~SW

JIGSAW

Harvey: *2 issues 1966*

Astronaut Gary Jason's body is reassembled by aliens after they have unwittingly injured him. He discovers his limbs now stretch just like Mr Fantastic's and Plastic Man's. A very silly comic.~SW

Hellraiser Nightbreed JIHAD

Marvel/Epic: *2 issue microseriess 1991*

Ninety-six pages of red-flecked painted art by Paul Johnson is a lot to waste on a bloody silly and heavy story, based on characters from two Clive Barker films. The plot, such as it is, is unholy war between Pinhead and chums and another gang of sado-masochistic freaks. And surely, in a tale of dark gods, even Goths would like to see that someone on the project would have noticed that they were mis-spelling 'deity'? There is no parental advisory, but few would want their children to read such sexual and gory material.~GK

JIM

Fantagraphics: *Series one 4 issues 1987-1990, series two 6 issues 1993-1996*

Jim Woodring's first magazine-sized series contains some of a character called Jim's Dreams and Daydreams, the introduction of the cat Big Red, whose gruesome feeding habits are explored, and Pulque (in 4), a frog-shaped vegetable that smells terrible. Woodring packs text stories and pages of novelty items in as well to make for a delightful comic. The dream stories mix surreal images and non-sequiturs, usually involving some sort of artistic endeavour but also as simple as getting drunk before going to the public baths and coming across a one-legged man. These strips remain rooted in an everyday world that proves to have hidden depths of suffering if you know where to look. Some of the greatest pieces in these issues, however, are the covers and single-page images, from the skeleton leaning against a gate-post to the horse's head with a cigarette between its teeth. *The Book of Jim* collects material from these issues.

The second series is collected as *Frank* volume 2, but continues in much the same vein with a mix of stories centring around the above characters but now, significantly, adding Woodring's best-known character, Frank, to the roster. The colour Frank stories are beautiful, wordless reflections on voyeurism, godhood and, as usual, suffering, especially in the plight of the Manhog, usually coming off the worse in his encounters with Frank or the other strange denizens of Jim's fantastic landscape. Woodring's tales of insecurity are simply told, often deceptively so, but whether you feel that there's any real meaning here or not, they're an extraordinary read.~NF

Recommended: Series one 1-4, series two 1-6

JIMBO

Zongo: *7 issues 1996-1997*

Anyone who saw Gary Panter's primitive cartooning in *Raw* will not find it easy to forget. In this series Panter brings back a number of familiar characters, most notably his dense, punk Everyman Jimbo, for a series of oblique adventures. Initial issues are structured as one-page strips, drawn in Panter's distinctive, child-like style. It is almost impossible to explain the quality of his work if you don't see it immediately; if you're put off by the wavering lines and crude panels don't bother with this. However if you like it, *Jimbo*'s a feast, giving Panter room to regularly experiment, producing extraordinary comics pages like the 'Bogstage' sequence in 5. Here he uses a combination of scratchy line and minute hatching alongside crudely outlined negative image drawings in a circular panel framework, drawing deranged, multi-armed rock star monsters and picturing Godzilla, straddling the Empire State Building, strumming away.

One of the great iconographers of our times having fun. Read it.~FJ

Recommended: 1-7

Superman's Pal JIMMY OLSEN

DC: *163 issues 1954-1974*

Introduced very soon after Superman (in *Action Comics* 6), Jimmy Olsen is the red-haired cub reporter at *The Daily Planet*. Always striving to better himself or obtain that elusive scoop, he'll don any disguise no matter how preposterous, indulge in any ruse no matter how ridiculous, or undergo any transformation no matter how astounding. The structure of the strip is very basic, and almost any issue until 133 will feature the same rudimentary elements. Jimmy dates Lois Lane's younger sister Lucy (from 36), and due to his propensity for stumbling into unfortunate circumstances he's got a signal watch, which when activated attracts Superman to bail him out of trouble.

The very early issues have tracing news leads high on the agenda, and are generally light-hearted, but not as preposterous as what would follow. From the late 1950s, though, the title became ever more daft. The news angle was forgotten in favour of densely plotted gimmick stories, often three eight-pagers to an issue. The writers, perhaps advisedly, remained anonymous, but the artists were those regularly used on other Superman titles, usually Curt Swan, with the occasional John Forte, Al Plastino or Kurt Schaffenberger strip. Popular transformations for Jimmy included a rampaging giant turtle man, the superhero Elastic Lad, a wolfman, a human octopus and a human porcupine. All of these and more can be found in 105. Elastic Lad was particularly popular, débuting in 31, and as that character Jimmy would regularly meet the 30th-century Legion of Super-Heroes. Jimmy often went undercover, using myriad disguises, with a particular fondness for cross-dressing, and he's masqueraded as a hitman, an oil millionaire, a robot, a witch doctor and many more.

Any story selected at random gives an indication of these issues as a whole, so here's 'The Menace of Insect Island' from 79, 1964. Jimmy and Lucy see a film about giant ants, and journey back to Metropolis in the *Daily Planet* helicopter. Jimmy is overcome by a "strange mental compulsion" and heads out to sea to land on a remote island. There he and Lucy are greeted by a strange race of... wait for it, ant people! Jimmy pricks his finger on a thorny plant. This, by the way, is packed into eight panels. The ant people are an advanced civilisation transformed when a vengeful scientist infected their water supply with a potion. "Incredible! I took a drink a while ago. Now I'm shrinking into an ant-like creature," says one remarkably detached individual. "Me too!" replies his equally sanguine chum. "And I can detect your thoughts with these antennae which are growing out of my head!" Some red ants escape a war with black ants to land on Earth, but discovering their side won the war they want to return. They require Superman's help to recharge their craft, and so have lured Jimmy, as Superman's pal, to signal him. But Superman's away in space, and won't be back until the next day. And we're still only halfway through the story. The following morning Jimmy wakes to see white protoplasmic blobs edging their way towards the ant people, engulfing them. Jimmy is given an anti-gravity ray, with which he propels himself onto a cliff top, cutting his finger again as he lands. Shining the anti-gravity ray on the blood produces dozens of little Pillsbury dough-boy creatures that chase the white blobs into the ocean. At this point Jimmy realises he could have signalled Superman for help, and does so. Superman refuels the craft, the aliens return home and, back in Metropolis, Jimmy deduces the white blobs and red dough-boys were actually enlarged corpuscles from his dripped blood! That's a contracted synopsis of eight pages from an issue also featuring the equally nutty 'Red-Headed Beatle of 1000 BC', as Jimmy, thrown back in time, earns a living selling Beatle wigs!

There are hundreds of Jimmy Olsen stories every bit as insanely enjoyable, and anyone with a sense of humour should sample at least one. The best way to do so is via the oversize reprint issues 95, 104, 113, 122, 131, 140, each chock-a-block with silliness. This light touch made the series the most enjoyable of the Superman titles on a regular basis, but by the politically aware late 1960s they were beginning to lose their charm. A particular duffer is 'Planet of the Capes' in 117, which features a tale about... er... capes. Pete Constanza was now the main artist, and his cartoony style resisted a more serious tone. When social relevance hit Jimmy Olsen, however, it was noticed, with 127's 'The Secret Slumlord of Metropolis' eliciting more letters than any previous DC comic.

Regular readers must have been shocked when 133 turned up. "Kirby is here!" proclaimed the cover. Not half! Kirby introduced the new Newsboy Legion, children of the 1940s kids gang he co-created with Joe Simon, and their super-vehicle the Whiz Wagon. They and Jimmy become involved with a motor-bike gang and the mysterious Hairies (it's still hippie season in 1970), strange inhabitants of The Wild Area. Kirby was ahead of his time in revealing that The Hairies are clones bred by a secret government organisation called The Project. The Golden Guardian, the Newsboys' mentor, reappears as a clone in 135, while current Superboy supporting character Dubbilex is introduced in 136. Kirby firmly places the series within his *New Gods* saga, as Darkseid's minions are also tampering with DNA in a rival project aiming to develop a creature powerful enough to destroy Superman. 139 introduces Goody Rickles, a double of American comedian Don Rickles, in an amusing story stretching through 140's reprint to 141 and displaying the diversity of Kirby's writing. There's another change in 142-143 with a Count Dracula lookalike, but afterwards Kirby returned to the Project. He certainly ended his run on a high note in 147-148, as Jimmy and the Newsboys take on the megalomaniacal Victor Volcanum. Under Kirby *Jimmy Olsen* almost became a supporting character in his own title, but the great plots compensate. His artwork was stunning. Even the inking of Vince Colletta didn't do much damage, though the issues inked by Mike Royer (146-147) do stand out. 141-148 also offered 1940s reprints of the Newsboy Legion by Kirby and Simon. Could you ask for anything more?

---

* Available in a collected edition

After Kirby everything had to be downhill, and so it proved. Initial replacements John Albano and José Delbo, provided mundane adventure stories, with the Newsboy Legion cast back into limbo, although 149-150 are worth picking up for the Jack Cole Plastic Man reprints. When writers Leo Dorfman and Cary Bates took over they evoked the past with 1960s style stories, but after Kirby and the social upheaval of the era, having Jimmy imagine he's Olsen the Red in Viking times is out of place. Even Kurt Schaffenberger's lovely art was subdued by Vince Colletta. The series numbering was transferred to Superman Family with 164, with Lois Lane and Supergirl also featuring. It couldn't have come too soon.~WJ/HY

Recommended: 133-139, 141-148

Paul Dini's JINGLE BELLE

Oni Press: *2 issue microseries 1999*, one-shot ('All-Star Holiday Hullabaloo') 2000*, one-shot ('The Mighty Elves') 2001*, one-shot ('Jubilee') 2001*, one-shot ('Winter Wingding') 2002*

In the first series, drawn by Stephen DeStefano, Jingle Belle, Santa's daughter, sits in for her father in a New York department store before being tricked by the Blizzard Wizard, who's determined to spoil Christmas. The 'All-Star Holiday Hullabaloo' features short stories, illustrated by Bill Morrison, J. Bone, Chynna Clugston-Major (with characters from Blue Monday), Sergio Aragonés and Jeff Smith. 'The Mighty Elves' has Jingle tricked into playing for Santa's elves' hockey team and having to foil more of the Blizzard Wizard's scheming. 'Jubilee' again contains short stories, this time explaining how Jingle met girlfriends, Tashi Ounce, Polly Green (by Dan DeCarlo and Bill Morrison) and Ida Red (from *Mutant Texas*). In 'Winter Wingding', with less attractive artwork from Tony Cervone, Spike Brandt, Mrs. Claus has to catalogue her daughter's annual misdeeds, including those springing from the all-girl band she starts with her girlfriends.

Writer Paul Dini has created a spirited, rebellious character in Jingle allowing lots of opportunities for humorous adventure as Jingle tries to correct her mistakes before her father spots them, all the while desperate for the attention that he seems so freely to bestow on every child but her. The first collection, 'Naughty and Nice', includes a new painted story by Lawrence Marvit in which Jungle Belle conquers the Martians, whilst the second, 'Cool Yule' features a new Summer vacation strip by DeStefano and a few internet-published strips.~NF

Recommended: 'Naughty and Nice', 'Cool Yule'

JINN

***Image/Avalon Studios:** 3 issue miniseries 2000*

Enjoyable enough variation on an angels and demons theme as cat burglar Karen Lane gains her own personal Jinni (genie), Roland. Unfortunately for her, Roland has a powerful Jinni enemy who plans to kill Karen (and all of humankind straight afterwards). The artwork by Gabriel Rearte is like a cross between Barry Windsor-Smith and Humberto Ramos, never matching either but satisfying except for a lack of facial consistency. J. Cameron's script allows for character and humour and provides a colourful background to the main action plotline.~NF

Brian Michael Bendis' JINX

Caliber: *7 issues, 1 Special 1994-1997**
Image: *5 issues, 3 Specials 1997-1998**

This is an ambitious tale, which doesn't quite come off. We have a present-day female bounty hunter (and aspiring writer!) and her small-time crook boyfriend on the trail of a fortune, told in photo-referenced stark black and white art, a lot of it reminiscent of Frank Miller's work, sometimes jarringly using treated photographs for backgrounds. The story is influenced by writer/artist Brian Michael Bendis' beloved movies, probably especially by Tarantino, and the attempt at highly naturalistic dialogue produces huge strings of twisting and interlocking balloons that can confuse the reader and make the characters seem to be always stuttering. Perhaps they are. The best episode is the forty-three pager in the Caliber published charity special, about the teenage Jinx, which is told almost entirely in photographs. Don't be put off by the huge stack of crummy pin-ups in the back. A massive Image paperback collects the entire works along with sketches, scripts and background articles.~GK

Scott Russo's JIZZ

Fantagraphics: *10 issues 1991-1993*

The product of a seriously disturbed mind, this is part cut-and-paste fanzine and part comic, guaranteed to offend everyone somewhere along the way. Stories range from encounters with celebrities through self-loathing and racial diatribes to autobiographical vignettes. *Jizz* won't be to everyone's taste, but there's plenty of funny content. The best starting point is 9, drawn more traditionally by Jeff Wong and detailing events following a crank assassination letter sent to George Bush signed in Russo's name. Wong also illustrates decent (and disgusting) parodies of the work of Canadian cartoonists in 10.~WJ

JLA

DC: *74 issues +, 4 Annuals, 3 80-Page Giants, 4 Secret Files & Origins, 1997 to date*

This title, which of course abbreviates Justice League of America, has been a top seller since its inception, but it's a mystery as to why. Throughout its run, it's aspired to much, but delivered very little. Trying to get back to basics after the previous, sprawling incarnation of the Justice League, it first focused on DC's biggest hitters: Superman, Batman, Wonder Woman, Green Lantern, Flash, Aquaman, and the Martian Manhunter. This obviously helped sales, which were hardly hurt by the appointment of Grant Morrison as writer.

Arriving with a solid commercial record, although better known for his weirder projects, here Morrison was saddled with an artist just not up to the task. Howard Porter has trouble just telling a story, so it's a chore to read, and Morrison takes a year before producing anything remotely memorable. The first spark comes with 'Rock of Ages' in 10-15*, introducing evil versions of our heroes with more to them than meets the eye. Some very familiar villains comprise a new Injustice Gang, and a story with more than a few nods to Jack Kirby throws in intergalactic villain Darkseid, some time travel and some new members in a convoluted, but fairly interesting adventure. The art doesn't improve, though.

Later writer Mark Waid writes a pair of two part stories in 18-21, disappointing with the first. He redeems himself in the second by repairing some damage done to DC's classy science fiction hero, Adam Strange and his wife Alanna some while back. The JLA's first ever villain, Starro the Conqueror makes a strange reappearance in 22-23, while 24-26* introduce a secret U.S. military super-team, the Ultra-Marines, to battle the JLA. Just how many secret government-based super-teams are there in comics? Are the Ultra-Marines remotely interesting? There's only one answer, and it's not "yes". 28-31* resurrect a regular theme from the 1960s series: a team-up with Justice Society of America. The plot involves a war against the 5th

Dimension featuring various genies and imps, and introduces J.J. Thunder, the new owner of the JSA's Johnny Thunder's thunderbolt. It's a decent effort, and Porter's art is finally starting to tell a story. Morrison's run ends with 'World War III' in 36-41*, featuring Lex Luthor and another new Injustice Gang including a new version of an old JLA villain, the Queen Bee. She adds a nice galactic flavour to the ensuing battle, but a simple alien invasion isn't enough for Morrison, so he throws in an ancient inter-galactic weapon, Mageddon from the time of the Old Gods (who of course became Jack Kirby's New Gods). It's a bit of a muddle. There's a complexity to many of Morrison's tales that only becomes apparent when reading them collected, which they all are. On the one hand better that than rehashing old clichés, but slightly more respect for the readers of the monthly comic would have been nice.

Mark Waid returns as full time scripter with 'Tower of Babel' in 43-46*, featuring old-time Batman villain, Ra's Al Ghul who has somehow learned the weakness of each JLA member. Apparently he gained the knowledge from Batman's secret files. Naturally the other JLA members aren't too pleased by this, so they boot Batman out of the team. It's a shame Waid didn't keep up the good work, seemingly concentrating on maintaining the off-kilter elements Morrison specialised in, rather than writing to his strengths. Still Waid is immensely helped by new pencil artist, Bryan Hitch, who can not only tell a story, but produces dynamic and imaginative pages. In 50 the team reveal their identities to each other, ending questions of trust within the group following the Ra's Al Ghul episode. Here Waid solved another problem, ending the feeling that the JLA were merely members of a group rather than a tightly-knit-team. Their dual identities played an unusual role until 54 when their bodies are split into heroes and alter-egos. 55-58 could've been a great swansong for Waid, but instead gruesome and totally unnecessary violence spoils everything. A mainstream comic like *JLA* isn't the place for scenes such as human brains being scooped out by Martians. Shame on the editors for letting this through. Despite the low quality threshold almost all stories to the end of Waid's run are available in collections.

A new creative team of Joe Kelly and artists Doug Mahnke and Tom Nguyen get off to a good start in 61, but disappoint thereafter until 65, a tale featuring Plastic Man and Batman – and the former's little known son! It's a fun tale where young Plaz has inherited his father's powers. Perhaps a bit sentimental, but it's such a pleasure to read a memorable story in this title. If Kelly concentrated more on his forte – personalities – rather than boring plots involving crows and ancient warrior-priests he'd be by far the best writer on this series. 69-75 disappoint, but return Aquaman, who'd disappeared. Issues alternate between ancient Altantis where the original members are fighting various creatures and such (yawn), and in the present time where their replacements are trying to figure what's going on. They're not the only ones. Nevertheless, there's a sense of hope for the title now.

All annuals are based on the theme of the year. 3 features the JLA as apes (an old DC favourite), while 4 introduces DC's first Turkish character, the female warrior Janissary. *JLA Showcase 80-Page Giant* as well as the first two issues of *JLA 80-Page Giant* feature a multitude of stories featuring past and present powers. The full length story in the third 80 pager, matches the standard of the regular title. Say no more. Three *JLA: Secret Files & Origins* are worth picking up for background information on various characters, old and new, good and bad. *JLA Gallery* features pin-ups of our favourite characters by a multitude of artists. Pointless and indulgent, but nice to look at.~HY

JLA:YEAR ONE

DC: *12 issue limited series 1998**

Mark Waid and Brian Augustyn script and Barry Kitson illustrates an excellent reworking of the early days of the Justice League of America. In DC's revised continuity an alien invasion initially brought Flash, Green Lantern, Aquaman, Black Canary and the Martian Manhunter together, and this is set following that event, nominally, and fluidly, ten years before the current adventures of the JLA. Waid and Augustyn sparkle when contemporising the classic moments of Justice League history. They manage to transfer their affection of the source material to a sharp, extended thriller dealing with an involved plot by a gang of rogue geneticists who plan to remake the world and the life forms upon it, to the specifications of an unknown leader. The tension builds through the team slowly getting to know and trust each other, with plenty of contemporaneous guest stars such as the first Blue Beetle, the original Doom Patrol and the Blackhawks. The finale is a superhero fan's dream as every hero on Earth unites to battle an all out alien invasion and the solid underplayed art from Kitson sucks the reader totally into a gripping climax. When it's done right, there's nothing wrong with being made to feel like you're ten years old again.~WW

JOAN

Comics One: *3 volumes 2000*

A rare Japanese comic produced in colour throughout, and telling the story of seventeen year old Emily, raised as a boy in 14th century France. She lives ten years after Joan of Arc rallied the French, but receives visions of Joan guiding and warning her. Determined to follow in Joan's footsteps, she becomes an important political figure, and over the course of several meetings with the objectionable Dauphin, and his reluctant wife, her destiny appears to be to follow all the way to Joan's final fate. This is ambitious work from Yoshikazu Yasuhiko, rich in historical detail and with an application of emotion subtle compared with most Japanese titles. For all her pious nature, the dogmatic Emily is not a particularly sympathetic lead character, possibly deliberately so as few of the people she encounters could be described as pleasant. The quality of the art and research ensures this is a superior adventure story, but in places it drags and the colouring is very strange as if Yasuhiko is attempting to use all primary shades of the rainbow, but nothing in between.~FP

Cops:THE JOB

Marvel: *4 issue miniseries 1992*

Admirably realistic attempt at recording the day-to-day life of two New York policemen. Larry Hama and former cop turned artist Joe Jusko handle the writing and there's good art from the team of Mike Harris and Jimmy Palmiotti. The breakneck pace of the comics conveys the fast life, where one wrong move can mean death, and dialogue and social interaction are deftly handled. An excellent package, from the Mike Golden covers to the experiences of real cops on the text page.~FP

Recommended: 1-4

JOE SINN

Caliber: *2 issues 1993-1994*

Joe is a brainwashed ex-soldier with an Augmentor jacked into his spine. He can flick a switch and become unbeatably strong and fast. Various agents, including the glamourous Nikki, keep Joe in their sights and occasionally help him out, much to his confusion. It gradually becomes clear that The Augmentor is being tested for use in undercover domestic policing. Brooks Hagan's art is energetic and exciting but lacks professional finish. Writer Scott Finley's gassy script still manages to inject a measure of grit into the first person commentary, but the story was never completed.~SW

JOHN CARTER OF MARS

Gold Key: *3 issues 1952-1953, 3 issues 1964*

Soldier John Carter is injured in battle on Earth, and finds himself walking away from his body, and then, paces later, realises he's on Mars. Yes, that's all there is to it. He's captured by warlike lizard creatures, escapes, is recaptured, rescues a human-like princess, etc., etc. Hopelessly confused and boring. Were people really that desperate for entertainment in 1952 that they'd sit through three issues of this? Read this and you'll never complain about TV again. These Jesse Marsh-drawn issues are reprinted by Gold Key in the 1960s.~FC

---

* Available in a collected edition

JOHN CARTER, Warlord of Mars

Marvel: *28 issues, 3 Annuals 1977-1979*

Unlike Edgar Rice Burroughs' more famous creation, Tarzan, John Carter has never been well known outside the field of fantasy. However Burroughs' early stories of a Virginian gentleman transported when near to death from an Indian-besieged cave to the violent and barbaric world of Barsoom (Mars) were immensely influential in the heroic-fantasy genre. Unlike Conan, John Carter represents the forceful necessities of civilisation, championing the Martian race, who looked most like him, against the numerous funny-shaped, multi-coloured barbarians at the gate and marrying its princess, Dejah Thoris, who promptly laid an egg to establish the Carter dynasty. The comic version is loosely based on the series of novels, many of which feature ludicrous plots, as Carter engages in much sword-swinging to defeat the devilish intentions of wizards, mad scientists and marauding tribes. Marv Wolfman's initial scripts were no more than average, although he was allocated some talented guest pencillers on their off days (Gil Kane, Carmine Infantino and Walt Simonson, for instance). Sadly, few of them lasted long, even when Chris Claremont, a long-time fan of the stories, took over. Unsurprisingly, he made Dejah Thoris into a sword-toting adventurer alongside her husband, and played up the power of their relationship. Unless you particularly like sword-and-sorcery with a remarkably silly slant, John Carter is only of note because a young Frank Miller pencilled issue 18.~FJ

JOHN LAW Detective

Eclipse: *One-shot 1981*

In his attempts to work up a successful newspaper strip in the 1930s, Will Eisner created John Law, hard-boiled detective. The preparatory pages were produced, but no one picked up on the idea, and the stories were later reworked for the successful Spirit. Although there's some nice early Will Eisner artwork, this is nothing more than a curiosity for those wanting a complete collection of Eisner's work.~WJ

JOHNNY THE HOMICIDAL MANIAC

Slave Labor: *7 issues 1995-1997**

This is the archetype of stalk and slash movies taken to logical extremes without the requirement to conform to any parental guidance system. For the more acceptable pieces, gratuitous and explicit violence is served up as the answer to life's trivial annoyances. The less pleasant delve into sordid brutality that creator Jhonen Vasquez seeks to mitigate with blocks of ponderous self-analysis for his lead. It's deliberately unpleasant without any leavening humour, thus all in all very unsatisfactory. As your parents always told you, it's not big, it's not clever, and in this case it's not any good either.~FP

JOHNNY DYNAMITE

Dark Horse: 4 issue miniseries 1994

The return of a 1950s detective strip, updated and spin-doctored by the Ms Tree creative team of Max Collins and Terry Beatty. This starts off as a straightforward hard-boiled sleuth tale, but takes a spin into the supernatural to great effect. Beatty's blocky, down-to-earth style makes the horrific events even more so by its matter-of-fact presentation. Involving Satanic deals and zombie gang-war, it can safely be said that you haven't read anything entirely like this before. Mitch O'Connell's hallucinogenic covers are the icing on the cake.~HS

Recommended: 1-4

JOHNNY NEMO

Eclipse: *3 issue miniseries 1985-1986*

Brutal hard-boiled detective in the future, as previously seen in *Strange Days*. Some nice lines, but otherwise slim fare. Nemo later resurfaced in *Deadline*.~WJ

JOHNNY THUNDER

DC: *3 issues 1973*

This is one of the best of the reprint titles DC were issuing in the early 1970s. It featured the cream of the company's 1950s Western strips, with art by Alex Toth, Mort Drucker, Gil Kane and others at a fraction of the cost of the originals. With stories by Robert Kanigher as well you really can't lose with this comic.~DAR

Recommended: 1-3

THE JOKER

DC: *9 issues 1975-1976, one-shot (The Killing Joke) 1988, Graphic novel (Devil's Advocate) 1996, one-shot (I, Joker) 1998, one-shot ('Joker's Apprentice') 1999, 3 issue miniseries ('It's Joker Time') 2000, 4 issue miniseries (Joker Mask) 2000*, one-shot ('Emperor Joker') 2000, 6 issue miniseries ('Last Laugh') 2001-2002, one-shot ('Secret Files') 2002*

If character inconsistencies between the homicidal maniac seen in Batman and the merry prankster in the 1970s series aren't cause for concern, it's a nice, if bizarre, read, appeallingy drawn by Irv Novick. Most issues guest-star other characters, with the best being the Creeper's appearance in 3. *The Killing Joke* by Alan Moore and Brian Bolland suffers from the weight of expectation brought to it via reputation. It's worth reading, and the best solo Joker story to date, but not as good as you've heard. Few things would be. It supplies an origin for The Joker amid some good art and a life-changing experience for Batgirl. *Devil's Advocate* has the Joker innocent of the crime for which he's about to be executed while Batman attempts to track down the culprit. It's an interesting set-up, but otherwise very ordinary work from Chuck Dixon and Graham Nolan hardly justifying the format and price. The title *Joker's Apprentice* provides the premise for what is largely a decent Batman story by C.J. Henderson and Trevor Von Eeden. Batman is plagued by murders arranged to torment him.

Bob Hall uses *It's Joker Time* to belabour obvious points about the lowest common denominator values of contemporary television with detours into the Joker's brain. It long outstays its welcome, and Hall's *I, Joker* is better, depicting a future in which Batman villains are resurrected as cannon-fodder to appease followers of a corrupted Batman religion. The Joker's insanity quotient is upped and he's given powers to match his state of mind in the very workable *Joker Mask*, although quality dips at the end. Writer Henry Gilroy (with co-plotter Ronnie Del Carmen) milks the possibilities, throwing in Harley Quinn, Poison Ivy and Batman, and includes a good take on Joker TV. The unrestrained cartooning of Ramon Bachs is the polar opposite of Bolland's discipline, and while equally valid might put off those who like their superheroes in a semi-realistic style. *Emperor Joker* is part of a crossover in Superman titles that makes little sense independently, although Joker fans might enjoy a story in which the Joker is given the power to reshape the world.

'Last Laugh' has a chemical compound activating a Joker mentality within an army of super-villains who then seep into most DC titles. It's accompanied by the extrapolation and pin-ups of a Secret Files issue, and while the miniseries can be read without the extras *Robin* 95 is advisable for a full understanding. The plot has a dying Joker creating global mayhem before his demise. There's nice art from the team of Pete Woods and Andrew Pepoy in 1, and a fabulous cover from Bolland on 6, the best issue overall. Otherwise, like most Chuck Dixon comics it levels off at competent.~FP

Recommended: *The Killing Joke, Joker Mask* 1-3

JONAH HEX

DC: *92 issues, 1 Spectacular 1977-1985*

DC/Vertigo: *5 issue miniseries ('Two-Gun Mojo') 1993*, 5 issue miniseries ('Riders of the Worm and Such') 1995, 3 issue miniseries 1999 ('Shadows West')*

Although it's often credited to John Albano, it was Michael Fleisher who wrote the classic tagline: "He was a hero to some, a villain to others, and wherever he rode people spoke his name in whispers. He had no friends, this Jonah Hex, but did have two companions. One was death itself, the other the acrid smell of gunsmoke..." It encapsulates 1870s bounty hunter Jonah Hex succinctly and accurately.

Fleisher starts by altering two constants from Hex's run in *Weird Western*, firstly introducing a thread of continuity while still producing largely single-issue stories. Hex is framed for murder by his old enemy Turnbull and becomes a fugitive, a plot that's very tired by its conclusion in 16 and is recycled to better effect in 44-45. He also introduces crooks who survive Hex's blazing pistols to return, El Papagayo (2) being the first. How Hex became hideously scarred is revealed in 7-8, and his start as a bounty hunter is told in 30. Fleisher continues to be gruesomely inventive throughout the early issues, never more so than in the Russ Heath drawn one-shot *Jonah Hex Spectacular*. It details Hex's death and subsequent movements, and still brings a lump to the throat. 1-43 are drawn by a variety of artists, with Luis Dominguez (24, 30, 31) best at providing a gritty Western flavour, although the cleaner styles of José Luis Garcia-Lopez (1-5, 10, 32) and Vincente Alcazar (12-17, 19, 22, 27) are also appealing.

45 is a turning-point as Hex marries Mei Ling, introduced in 23, a condition of the nuptials being that he renounce his life of violence. By this time Dick Ayers is the regular penciller, inked by original *Hex* artist Tony DeZuniga, for a fine combination who stay until 82, after which DeZuniga manages another six issues solo. Of course, given the demands, Hex's marriage wasn't likely to last and he soon reverts to bounty hunting.

65-71 concern an army payroll robbery and its consequences, and reintroduce Emmy Lou Hartley (from 50), one of many attractive women inexplicably drawn to the gruesomely visaged Hex. Those issues see Fleisher recovering from an uninspired run. From 76 the emphasis switches to continuity-based plots as old characters return. Cliffhanger endings are the norm, and there are fine individual issues (80-81 resolve the Turnbull situation), but the soap-opera tricks are jarring in a title that survived so long with barely a nod to them. Gray Morrow draws the final four issues of the DC series, leaving dangling sub-plots featuring the supporting cast as Jonah is transported to an ignominious future postscript in the pages of *Hex*.

Joe Lansdale and Tim Truman's 1990s take on Jonah Hex is spot-on, with Truman's gritty rendering ideally suited to the character, and Lansdale providing suitably acerbic dialogue. The first two plots seemingly stem from Hex once starring in *Weird Western*, and if you can overlook the anomalous introduction of supernatural elements to the Wild West, the newer stories are tine, but don't match the best of the previous run. The third, though, is woeful, replacing the supernatural with comedy, resulting in a poorly plotted excuse for feeble jokes.~FP

Recommended: 1-3, 7, 8, 10, 11-13, 24, 27, 32, 42-45, 48, 51, 58, 65-70, 73-75, 81-84, 86, Spectacular

JONAS

Caliber: *One-shot 1996*

Another collection of Mike Deodato reprints from Brazil. The title strip is about black cowhand Jonas Creole whose mysteriously white sister Aurelia is tied to a tree and whipped to death. He tracks down the killers in thinly disguised exploitation posing as a western. Two shorter, relatively tasteful pieces, 'Land of Fire' and 'Beyond Life', round out the comic.~SW

JONES TOUCH

Eros: *One-shot 1993*

These days Jeff Jones is a renowned fine artist, but in the early 1970s he was turning out one and two page strips for men's magazines. Seemingly the only criteria was that each page contain female nudity, because Jones' musings are astonishingly idiosyncratic, surreal and sometimes downright perverse, even for the times. The strips suffer from the original pastels being reproduced in black and white, but serve as adequate demonstration of an astonishing talent. For those not captivated by the art, though, this is an extremely slim read at sixteen pages and hardly adheres to the Eros code of arousal. Anyone wanting to investigate further could try looking for Jones' 1979 collection *Idyl*, where art once again dominates.~FP

JONNI THUNDER Aka Thunderbolt

DC: *4 issue miniseries 1985*

Based on 1940s character Johnny Thunder, who could summon a mystical being, this update is a tolerably scripted female-private-investigator story. Ironically, it's the extraneous supernatural elements that spoil the revamp, as writer Roy Thomas is unable to resist giving her superpowers. Dick Giordano illustrates in his usual ineffable fashion.~HS

JONNY DEMON

Dark Horse: *3 issue miniseries 1994*

Lighthearted romp through an era where magic and demons are as commonplace on earth as science today. Average stuff from Kurt Busiek.~FP

JONNY DOUBLE

DC/Vertigo: *4 issue miniseries 1998**

Taking the obscure character introduced in *Showcase* 78, this is an obtuse tale of cross and doublecross as the Private Eye, a crappy 1960s burn-out gets sucked into a plot to (ostensibly) steal the contents of Al Capone's secret bank account. A poor showing from the usually sharp Brian Azzarello, although the art by Eduardo Risso is stylish and effective.~WW

JONNY QUEST

Comico: *31 issues, 2 Specials 1986-1988*

Generally excellent and vastly underrated series based on the 1960s cartoon show, with the care and attention lavished on the series exceptional, from the double-sized cover illustrations on. The writing of William Messner-Loebs underpins everything, with meticulous plots encompassing a vast range of topics, always warm, humorous, and able to adapt to whichever artist is handling a particular issue. And there's a stellar selection of artists before Marc Hempel and Mark Wheatley draw most issues from 14. Doug Wildey and Steve Rude both draw strips in 1, and other highlights include Adam Kubert on 6's story of a great discovery at the North Pole and Murphy Anderson illustrating an undercover operation in 9. Jonny Quest is the pre-teen son of the widowed Professor Benton Quest, all-round boffin, accompanied by his Indian friend Hadji and his dog Bandit. Adventurer Race Bannon keeps a watchful eye on all parties during their travels, particularly when nemesis Dr Zin is in the vicinity. It's rare that a story runs two issues, so sample away. There shouldn't be a dry eye after reading 2's story of Jonny's mother, 11 has Jonny meeting the Princes in the Tower, 20's 'Time Storm' is a trans-temporal mystery and 25 is a Bandit solo. They're four very different stories, but each typical of the series. Loebs has no hand in the specials featuring alternate-reality doppelgängers of Jonny & Co and a re-animated Lenin. They're to be avoided, but check out the affiliated *Jezebel Jade* series.~WJ

Recommended: 2-12, 17-29, 31

The Real Adventures of JONNY QUEST

Dark Horse: *12 issues 1996-1997*

Above average tie-in to the Cartoon Network series that takes the Questworld team all over the world and into cyber-space on a number of adventures ranging from a modern day computer vampire to the Missing Link. One of the few times a licensed property actually captures both the spirit and the letter of its primogenitor. Especially noteworthy iare 1-4 by Kate Worley and Francisco Solano Lopez wherein a Gypsy terrorist takes control of the world's computer and satellite network. Good fun for the youngster in us all.~WW

---

* Available in a collected edition

JONNY QUEST Classics

Comico: *3 issue miniseries 1987*

Doug Wildey adapts three episodes from the original *Jonny Quest* cartoon series 'Shadow of the Condor', 'Calcutta Adventure' and 'Werewolf of the Timberland' ('The Invisible Monster' can be found in *Jonny Quest* 30). Wildey's art is, as always, top notch, but the material he's adapting doesn't have the depth or resonance of the stories written by William Messner-Loebs for the ongoing *Jonny Quest* title.~WJ

JOSHUA'S STORY

Off Panel: *1 issue 1998*

There's a desire to like self-published comics. People with an individual vision possess the faith to devote considerable amounts of money to follow their muse. Unfortunately self-belief can also blind. Jerry Williams devotes eleven pages to a shootout. It's central to the story of a gangster experiencing a crisis of conscience, but represents just under half the comic. The remaining art is hardly great on depth and detail, or transcending the merely 'functional' category. That being the case there's little to lure anyone back, and there was never an issue 2.~FP

She's... JOSIE

Archie: *44 issues 1963-1966.*

Archie artist Dan DeCarlo created Josie in a clear attempt to repeat the winning formula. Josie could have been Archie's long-lost twin sister: redheaded, attractive but wholesome, klutzy, well-meaning, bright and easily distracted by the opposite sex. The majority of her supporting cast were also introduced in 1: her long-suffering parents, wimpy boy-friend Albert, wisecracking best friend, Pepper, Pepper's boy-friend, the dimwitted Sock (short for Socrates), and...Melody. The traffic-stopping blonde bombshell Melody was the closest to a sex symbol one could have in a Comics Code-approved comic. The chaos caused by her inability to grasp facts was equalled only by the disasters that occurred when her startling figure was seen by drivers, traffic cops, or just about any male, who developed a sudden inability to focus on what he was doing. Hugely popular with readers of both sexes, she gave the book such a boost that a proposed Melody spin-off was rejected, for fear Josie would lose too many readers! The only significant later additions to the cast were resident villainous siblings Alexander and Alexandra Cabot, spoilt rich kids who, peculiarly, were the most inept practitioners of witchcraft ever seen in comics. For forty-four issues, Josie and her gang trundled along in teen-comedy misadventures, occasionally interacting with the Archie characters, but pretty much minding their own business. Come 45, the title was suddenly renamed *Josie & The Pussycats*.~HS

JOSIE & THE PUSSYCATS

Archie: *62 issues (45-106) 1966-1982, 2 issues 1993-1994*

Without explanation, Josie and Melody were two sides of a pop triangle. Albert, Pepper and Sock were gone, to be replaced by blond bimboy Alan M. as Josie's new love, and a new character, Valerie, only about the fifth black person seen in Riverdale, as the third Pussycat. Though seen throughout the issue, Valerie's one line of dialogue was a less than groundbreaking 'Yeah!' Maybe Archie didn't want to traumatise the Mid-West by having her be too uppity. No longer students, the trio toured as an internationally famous award-winning rock band – except when the plot required that they be an obscure struggling garage band, in which case that's what they'd always been. Continuity has never been a hallmark of the Archie line! This was done to tie in with the 1970s *Josie and the Pussycats* TV show. Revamping the Josie cast to a pop milieu, the comic was obliged to hastily shoehorn the changes in to gain those TV-led readers. Some changes were for the better. Alan M. couldn't be less fun than Albert, and Valerie, though no substitute for the acerbic Pepper – I've always imagined she and Albert eloped, after burying Sock under a patio! – did eventually develop a personality. The TV show was popular enough to come back as *Josie & The Pussycats In Outer Space*, whose premise was...oh, you guessed. Yep, accidentally launched into deep space, the Pussycats, Alan M. and the Cabots struggled to find their way back to Earth while entertaining bug-eyed monsters galaxy-wide with bubblegum rock. Clearly they did, eventually, make it back, as the title lasted until 106, and the group features in sporadic specials and one-shots to this day. Delightful fluff, usually drawn by either DeCarlo (early issues inked by his brother Vince, whose tragic death robbed DeCarlo of his most sympathetic tinisher) or, later, Stan Goldberg, the Josie books are a fun read as long as you're not expecting deep thought...and let's face it, if you were would you pick up an Archie comic at all?~HS

JOURNEY

Aardvark-Vanaheim: *14 issues 1983-1984*

Fantagraphics: *13 issues (15-27) 1984-1986, 2 issues (Wardrums) 1986*

The life of early-19th-century frontiersman Wolverine MacAlistaire wasn't obvious subject matter in 1983, but the deft writing and Eisneresque art of William Messner-Loebs make for a fine comic, with the entire series occurring over a year. From the extraordinary sixteen-page opening sequence of a bear chasing MacAlistaire, *Journey* stamps itself as unique. In the same issue he agrees to deliver a package to a community called New Hope, thus starting the journey of the title. MacAlistaire is fictional, but you wouldn't know it from the depth of research Loebs brings to Journey, conveying both historical accuracy and a real feeling for the knowledge of a trapper. Fanciful intrusions such as Sasquatch in 3 and a crossover with Normalman in 13 jar. A winter stopover with an old companion whose marriage is wilting through lack of communication in 8-11 is subtle and insightful while also harbouring some dangerous adventure: it's the highlight of the run. MacAlistaire's participation in 14-17 is minimal as the series concentrates on Fort Miami, an outpost precariously close to falling to Tecumseh, and the series is weaker without him. The predicament of folk at Fort Miami becomes dull, and Loebs seems to recognise this by an abrupt change of direction with 18, as MacAlistaire again takes centre stage. Refined Bostonian poet Elmer Alyn Craft plays an increasingly important role from 18, acting as narrator, foil to MacAlistaire's rough-hewn ways and partner as they reach New Hope in 20. The community seemingly belies its name, and conceals several deep secrets that begin to emerge once the package is handed over. The final seven issues are a dark and separate journey which considers just how much is acceptable in protecting a utopian vision, as Craft and MacAlistaire play a deadly game of truth and consequences. *Journey* is best read as a series from the start. There are few concessions to new readers and issues from 8 on are more or less one continuous story, although 12, 18 and 20 just about qualify as jumping-on points. A follow-up series titled *Wardrums* has a memorable start with Wolverine vs beavers and picks up on some of the supporting characters from the Fort Miami issues. It was very promising, but lasted only two issues of a proposed six, as more lucrative assignments came Loebs' way. 1-7 were collected by Fantagraphics along with the *Cerebus* back-ups.~FP

Recommended: 1, 2, 4, 5, 7-12, 21-27, Wardrums 1

JOURNEY INTO MYSTERY

Marvel: *Series one 145 issues, 1 Annual 1952-1966 (1-125), 1996-1998 (-1, 503-521), series two 19 issues 1972-1975*

Despite a brief publication hiatus in 1958 and change of title to Thor from issues 126-502, *Journey into Mystery* enjoyed a forty-six year run. The standard horror/monster shorts in issues 1-82 are most notable for their presentation of the Hulk (no relation) in 62 and 66, a shaggy alien who menaced Earth. Cunningly disguising himself with a name change to Xemnu the Titan, he tried again during his reprints in *Monsters on the Prowl* 11 and 14 and made his formal introduction to the Marvel Universe in battle against the Defenders in *Marvel Feature* 3.

Weird shorts served as back-ups in 83-108 to the new lead feature: The Mighty Thor. Early issues in particular are ludicrously antiquated. Central plot themes involve Thor's love for mortal nurse Jane Foster, Odin's remonstrations with his son regarding non-revelation of his identity to her, and Loki's scheming machinations. The God of Mischief appears in over half of the Thor issues, and Odin's credibility as All-Father is stretched well beyond belief as Loki endlessly beguiles him into overlooking his treachery. Perhaps it is just as well; Stan Lee might have been hamstrung for plot ideas otherwise. He delivers dialogue with pomp and splendour and, with Kirby's power-packed pencils, ensures smooth improvement over the run. Many classic Marvel villains début in this strip. Worthy issues introduce Grey Gargoyle (107) and Absorbing Man (114, 115), although the Carbon Copy Man is probably best left unmentioned. The finest two issues are 110 and 111, in which Loki enhances the powers of two of Thor's most formidable villains, Cobra and Mr Hyde. This story encapsulates all the vital elements of early Thor and, in a stirring climax, a desperate and noble Thunder God clings to Odin's mercy when powerless to save the dying Jane Foster, yet finally "...turns his back upon his defeated foes, and upon the house of darkness, as he walks into the shining light of morning!" They don't make them like that any more. 97-125 include five-page back-up strips of the 'Tales of Asgard'. Mostly set during Thor's boyhood, they feature many characters from the Norse pantheon, hordes of Frost Giants, Storm Giants and Trolls, and encompass the riotous, far-flung corners of Asgard. Two *Marvel Masterworks* volumes reprint the Thor stories from 83-110.

The 1996 title change arose from Thor's revamp following Marvel's 'Onslaught' saga. Tom DeFalco stews the 'Lost Gods' storyline, a potboiler of amnesiac, depowered Norse Gods exiled to Earth. Death God Seth takes advantage with a cunning plan to extinguish all life in the universe. Not much fun during the aftermath then. The tale rises to perfunctory, although Asgardians spouting hip 1990s dialogue is even harder to swallow than the poor man's Shakespearean fare Stan Lee force fed the reader thirty years previously. Deodato uses the opportunity to flash hot babes but thankfully his studio henchmen exert greater influence over later issues and disproportionate limbs become less abundant. *Journey into Mystery* peters to cancellation with eight further anthology issues. A routine Shang-Chi encounter with a narcotics baroness in 514-516 is graced by Brian Hagen's pencilling. Scott Lobdell's Black Widow three parter (517-519) is a spy thriller with plenty of twists, but is hindered by Randy Green's inappropriate, cartoony art. Marv Wolfman spares Hannibal King no torment in the final two issues before the title effectively reverts back to Thor, renumbered from 1, the following month.

The second series reprints 1950's weird shorts, although the first five issues are enlivened with new adaptations of stories by master writers of the macabre Robert E.Howard, Robert Bloch and H.P. Lovecraft.~APS

JOURNEYMAN

Image: *3 issue miniseries 1999*

Journeyman's world is suffering after an inter-dimensional cataclysm known as The Turning. Technology no longer works, and the sun has begun to dry up the planet so water has become a precious commodity. Our hero is a diviner, learning to wield the incredible power of his staff from his mysterious master. The Diviner finds himself up against the conquerors of his world – the Dragon Riders from the beyond. Author Brandon McKinney does a terrific job of putting together the start of a wide-ranging saga in these issues. His artwork and storytelling are clean and well-balanced, and he manages to have you care about the characters in this bleak scenario. Deserves the colour its mono pages cry out for.~SW

JSA

DC: *41 issues +, 1 Annual, 2 Secret Files 1999 to date, 2 issue microseries ('The Liberty File')*

Ever since the cancellation of *All-Star Comics* fifty years ago there has been a clamour to return the Justice Society of America, lest we forget the first long-running super team. Each previous attempt has been short-lived, but this time it's succeeded. DC's promotion was exemplary, trailing the new series with six one-shots named after 1940s comics and two book-ending issues of *All-Star Comics* forming a complete tale. It's no classic, but the plot serves its purpose. Artistically, though, there are some treats. Russ Heath illustrates Hawkman and Wildcat in *Thrilling Comics*, Peter Snejbjerg draws Atom and Starman in *Adventure Comics*, and Chris Weston's version of Sandman, Star-Spangled Kid and Stripesy in *Star Spangled Comics* is joyful. Aaron Lopresti holds his end up on *National Comics*, the best written of the one-shots as Mark Waid relishes his chance to handle Mr Terrific, along with the 1940s Flash.

The title proper was preceded by the introductory 'Secret Files', ostensibly there to whet the appetite and provide background information, but responsible for two nice snippets. There are a fine few valedictory pages for Wesley Dodds, star of *Sandman Mystery Theatre* and Chris Weston draws a discussion between Sentinel (1940s Green Lantern that was) and the new Star-Spangled Kid. Although popular from the off, *JSA* takes a while to hit its stride, with 10 the only wholehearted success in the first year, in which the weakest JSA member Wildcat has to defeat the entire Injustice Society alone, with the added handicap of having a broken arm. Main pencil artist Stephen Sadowski has a superficially attractive style, but his foundation is woeful and not helped by inker Michael Bair, and at first the writing teams seem to unite weaknesses rather than strength. Geoff Johns is co-writer from 6, with his writing partner David Goyer having co-written 1-5 with James Robinson.

There's a neat plot twist in 15, in which several members depart, but with the return of the Injustice Society in 16 things step up a gear, and what had been an okay superhero title becomes, generally, a very good one. While keeping the team resolutely modern and shiny, often to the point of blinding with science, Goyer and Johns never forget there is a tradition. It might be by underlining Justice Society connections with ancient Egyptian dynasties, through the dialogue, or simply reinforcing the legacy by constant references to their museum. Something handled well is the conversion of the evil antithesis to Captain Marvel, Black Adam. His reformation in 18 at first strikes as pointless, yet over succeeding issues the nobility of the man he once was is spotlighted, and he becomes a valuable point of reflection for other cast members. From the start a pattern is set of large stories with the entire team, spliced by smaller catch your breath issues focussing on the individual members, and most importantly from 15, plenty of moments that catch the reader off guard.

Hawkman is returned in 21-25, the JSA are kidnapped to participate in challenges for the benefit of gambling villains in 28, 30, and body switching villain the Ultra-Humanite returns in terrifying fashion in 32-37. Sadowski's final issue is 30, by which point he's improved, but his shortcomings are shown up by guest artists such as Rags Morales (26, 27) and Peter Snejbjerg (31, 32), who provide stunning iconic images of Captain Marvel and Batman respectively in the midst of fine storytelling. 26-31 are collected as 'Fair Play'. Replacement penciller Leonard Kirk doesn't have the flash, but he's more solid all round. If there is a fault to the series it's that a broad cast sees members sidelined for lengthy periods to the point where you've almost forgotten about them. Otherwise superhero fans should enjoy most of this run.

Dan Jolley and Tony Harris' gloomy 'Liberty File' is set during an alternative World War II, and is largely a Batman story with Dr Mid-Nite, Hourman and later Mr Terrific along for the ride. There's some nice art, and the confounding of expectations is well-handled for the climax, but it's otherwise ordinary.~WJ

Recommended: 10, 26-28, 31-37

J2

Marvel: *12 issues 1998-1999*

A line of titles featuring variations of Marvel characters set a century in the future failed, so Marvel had another stab. Voila! A line of titles with variations of their characters set 15 years in the future. Genius! This specimen is the teenage son of X-Men villain the Juggernaut, with Tom DeFalco doing his Stan Lee impersonations for the relentlessly mundane art of Ron Lim and Al Milgrom. It's largely the inspiration free zone one might assume, but the back-up strips in 4-10 can raise a smile.~FP

J.U.D.G.E.

Image: *3 issue miniseries 2000*

The hook for this miniseries is Greg Horn's computer manipulated photographic art. It's ultimately a distracting technique, as the direct use of posed photographs provides no distance, so constantly prevents immersion in the story. The plot very much serves the art, concerning a group of beautiful people in skimpy clothing who're supposed to be a top notch covert action team. It'll look hopelessly dated when you read this.~WJ

JUDGE DREDD

Eagle: *33 issues 1983-1986*

Quality: *Series one 2 issues (34-35) 1986, series two 77 issues 1986-1993*

For those who don't know, Judge Dredd lives in the future, where huge Mega-Cities exist, full to breaking point, with people living on top of one another. Outside the cities there are only radioactive wastelands, the 'Cursed Earth', full of mutants, outlaws and horrible, deadly wildlife, and the Black Atlantic, much the same with water. The Judges are this society's police force, with the right to pass sentence on the job, as it were, whether it be a death sentence or a long jail term. Mega-City One's main problems are the block riots caused by too many people living too close together and venting their frustrations against their neighbours, the Russian Mega-City (always prone to invade) and the normal, average working citizens who can get arrested for countless activities which we'd consider minor. The Law's the thing, here.

Dredd is the greatest of the Judges, totally incorruptible, never seen without his mask and as humourless a character as you could wish for. Fortunately, writers John Wagner, Alan Grant and, sometimes at the start, Pat Mills inject humour (normally very black) into most of his adventures. They range from bizarre fads (like products to make you ugly in 25) that help keep the city's occupants sane (well...) to Dredd's robot helper Walter (who, through a speech impediment, calls him 'Dwedd').

The stories here are reprints from 2000AD, the British weekly comic in which Judge Dredd first appeared (2). The Eagle run starts with the highly polished Brian Bolland-drawn stories, including Judge Death, who comes from a parallel dimension in which the Judges have decided that the only way to keep the law is to kill all humans. When they've finished with their own dimension they come looking for others to cleanse. By 4 we're onto Ron Smith as well as Bolland ('Father Earth', a messianic prophet who seems to be in communication with the Earth itself), and soon Mike McMahon is also represented with the 'Cursed Earth' saga (5-9*), followed by the deranged Judge Caligula's takeover of Mega-City One. 'Block Mania' (18, 19*) and its sequel 'The Apocalypse War' (20-24*) deal with the almost total devastation of Mega-City One, and Dredd's visual creator Carlos Ezquerra draws most of these issues. 27 introduces Chopper, a character who'll later become very popular as a sky surfer, here a graffiti artist. Continuity isn't integral to Dredd, but there are elements, particularly stories sparking from previous tales. From 30 there's a policy of reprinting stories in roughly the same time-frame as originally published, balanced by the attempt to employ only a single artist for each issue. Eagle's final issue is a particularly good look at the ludicrous fads that sweep through the city, featuring 'The League of Fatties', new food product Gunge and people having all facial features removed to become blobs. The Eagle issues have new Brian Bolland covers throughout. Quality take over the title, cancel it and later relaunch it (1986). From this point, *Judge Dredd* is printed on toilet paper and we're onto Steve Dillon's run on Dredd, apart from the first Dredd story, reprinted in number 2 (perhaps not a coincidence).

The poor colouring, appalling printing, and art stretched to fit the American comic page monopolise the Quality title, and the initial issues of its companion title *The Law of Judge Dredd*. Anyone interested in seeing these stories, seemingly selected at random, is directed to the Titan Books black and white reprints. With 38 the logo changes from Quality Comics to Fleetway Quality but the publishers are listed as S.P.Q. Inc (as they have been for some time before). By 57, we're back to reprinting the first Dredd story again and the Steve Dillon werewolf story from 1, and the title becomes *Judge Dredd Classics* from 62. Judge Dredd's politics are definitely suspect but the better writers have made the series a very black comedy, as much a satire on contemporary society as a science-fiction adventure.~NF

Recommended: Eagle 1-33

JUDGE DREDD

DC: *18 issues 1994-1996*

With the advent of the *Judge Dredd* movie UK licence holders Fleetway felt that DC would provide better exposure and dropped their line of reprints from *2000AD*. Regrettably they also chose to totally rewrite the character, and to a great extent the entire concept. He's still a lawman doling out instant justice on the streets of the big, big city, but the mania, irony and black comedy are all missing. 1-10 involve Dredd's role in setting up the Judge system in Mega-City One before being sent to the future to become just another badge on the street. The box office failure of the film mercifully killed the title and its companion *Legends of the Law*.~WW

JUDGE DREDD Collections

Titan: *50 volumes 1982-1990*
2000AD Books: *1 volume ('America') 1991*
Mandarin/2000AD Books: *9 volumes 1992-1996*
Hamlyn/2000AD Books: *8 volumes + 1996-2001*
Titan: *6 volumes + 2001 to date*

Judge Dredd is particularly well served by the 1980s Titan reprint books in black and white. In addition to twenty-five volumes each concentrating on a single artist's interpretation of the character, and two combination tomes, there are a further fifteen volumes collecting longer stories. The best sample is just titled *Judge Dredd*. Witty John Wagner scripts are illustrated by Brian Bolland, and it contains the first appearance of Dredd's arch-nemesis Judge Death (with the remainder of the Bolland Judge Death strips collected in *Judge Death*). Bolland-drawn stories are also part of *The Cursed Earth*, originally published as two separate editions, now collected in a single volume. The only early Dredd stories to strongly feature writers other than John Wagner and Alan Grant, *The Cursed Earth* sees Dredd having to travel across a mutant-infested wasteland to deliver a plague antidote. He encounters alien slave traders, robotic vampires and a tyrannosaurus rex among other oddities. It's consistently inventive, and it's a shame the threat of legal action prevents episodes using advertising trademarks and a war between McDonalds and Burger King ever being reprinted. Completists can find them in the UK's *2000AD* 77-78 and 71-72 respectively. With the exception of the *Judge Child Quest* (three volumes), which has a similar inventive quality to *The Cursed Earth*, successive extended Dredd stories reprinted by Titan are largely disappointing. *Judge Caligula* (two volumes) has a mad judge taking over Mega-City One and Dredd leading a desperate attempt to regain control. Despite several fine individual episodes and strong art from Bolland and McMahon, it lacks the thrust of *The Cursed Earth*, a casualty of a continued story seemingly plotted on a week by week basis. *Apocalypse War* (two volumes) and its precursor *Block Mania* see a full-scale invasion of Mega-City One, and while *Judge Dredd In Oz* (for a surf contest) works in places, there's too much padding. *City of the Damned* picks up from the plot of *The Judge Child Quest*, as the predicted event from which the Judge Child would save Mega-City occurs, but stretches too little too far.

The twenty-seven volumes spotlighting artists almost all contain strong and amusing John Wagner and Alan Grant strips, and that the massive disparity of artistic approaches all work with the character is a testament to the quality of the writing. Ron Smith (5, 6, 8, 10-12, 26) was the most prolific Judge Dredd artist of the late 1970s and early 1980s; the other featured artists are Mike McMahon (2), Carlos Ezquerra (4, 7, 23), Steve Dillon (9, 20), Cam Kennedy (13, 15, 17), Brendan McCarthy (16), Cliff Robinson (18) Ian Gibson (19, 25), John Higgins (21), Brett Ewins (22) and Barry Kitson (27). 3 pairs Mike McMahon and Ron Smith, while 14 is a combination of Smith, Robinson and Dillon. Stories by artists who haven't drawn enough Dredd to warrant their own album are collected in catch-all titles *Mega City Vice* (three volumes) and *Rough Justice*. Despite including Dave Gibbons, Kevin O'Neill, Bryan Talbot and Colin Wilson (largely unknown in the USA, but popular in Europe) alongside other material by artists whose work was already collected, they're hit and miss propositions, although each has some decent strips. The same applies to *Judge Dredd's Crime Files* (four volumes).

In the early 1990s Dredd's home, *2000AD*, went to full colour, Dredd was serialised in Rock Power magazine as 'Heavy Metal Dredd', and a companion title, *The Judge Dredd Megazine*, ensured there was more Dredd material appearing than ever before. The downside was that Wagner and Grant cut back on their Dredd writing. The best colour volume by far is *America*, by Wagner and Colin MacNeil. It's a bittersweet story of love and revolution under tyranny that tested the waters before *2000AD* began licensing material to Mandarin, then Hamlyn. MacNeil also draws half of *Mechanismo* (completed by Peter Doherty), in which giant robot judges are introduced, and, inevitably, begin to malfunction. It's not the best Dredd, but certainly readable, which is more than can be said for *Heavy Metal Dredd*, which has Simon Bisley art, but very slight stories. *Three Amigos* is Wagner back on form with some nice Mike McMahon-style art from Trevor Hairsine, which prompts one to consider why McMahon wasn't asked to draw the story. The amigos are Dredd and his two most popular adversaries, Judge Death and Mean Angel, the unlikely teaming occurring to trap a redneck outlaw. Even better is *The Pit*, another Wagner story, in which Dredd must clear out a Justice Department division riddled with corruption and apathy aided only by misfits. It survives four artists (including the very good Alex Ronald), and only a predictable *Assault on Precinct 13* ending disappoints.

Democracy Now re-runs themes utilised better in Titan's volume 21, but has John Burns art, as does *Blind Justice*. That's two more satisfactory Wagner stories of corruption and manipulation, backed-up by a spectacularly drawn Western. Wagner also writes connected aspects of the same story when a crime boss triggers a takeover of Mega-City One, interpreted by a variety of artists in two volumes. Former Judge Galen DeMarco is the chief protagonist of *Doomsday For Mega-City One*, notable for some fine pages from Colin Wilson. The longer *Doomsday For Dredd*, though, is the better story for most of the book, with Dredd on trial and good art from Wilson, Cam Kennedy, Simon Davies, Charlie Adlard and seven Mike McMahon pages. The remaining collections are lesser quality throughout, either because Wagner and Grant are retreading old ground, or because other writers lack inspiration. John Smith deserves credit for not retreading old plots in *Fetish*, but it's plodding until enlivened by an appearance from camp Vatican martial arts and arcane practices expert Devlin Waugh. The previously high standard of art has also slipped since the introduction of colour, with too many artists hiding basic deficiencies behind layers of acrylic paint. Don't bother with *Rapture*, or *Wilderlands*.

When Titan retrieved the reprint licence, in addition to re-issuing their earlier collections, they made the sound commercial move of prioritising Garth Ennis written Dredd stories. Ennis, however, has never really shone on Dredd and his early stories reprinted in *Death Aid*, with Carolos Ezquerra, and *Emerald Isle*, with Steve Dillon, while not bad, rely on diluted Wagner's innovation. By the work collected in *Goodnight Kiss, Helter Skelter, Justice One* and *Muzak Killer* Ennis' writing was better, but he still coasted on Dredd, which was further cursed by widely variable and often substandard art at this point.~FP

Recommended: *America, Blind Justice, The Cursed Earth, Judge Death, Judge Dredd* Vols 1-3, 5, 11, 13, 17, 19, 21, 25, *The Pit*

JUDGE DREDD In 'The Judge Child Quest'

Eagle: *5 issue miniseries 1984**

Certainly a contender for the best Judge Dredd multi-parter, the *Judge Child Quest* was seemingly begun with an end in mind, yet is flexible enough to permit the eccentric detours that keep Dredd fresh. It also introduces the popular Judge Hershey and the Angel Gang, members of which have proved enduringly recurring foes for Dredd; artists Brian Bolland, Mike McMahon and Ron Smith are on top form. After a slow start, so is writer John Wagner, throwing out good ideas at such a clip there's a frenetic pace to the stories when collected from the originally published weekly versions. Precognitives see a time of great trauma when only Owen Krysler can save Mega City. Krysler is now a child able to see into the future, and has been kidnapped and flown off Earth by the Angel Gang. Dredd has to return him, encountering all sorts of strange beings and planets along the way. The Titan collections reprint the story in black and white, while a Fleetway published volume collects the entire story in colour.~WJ

Recommended: 2-5

JUDGE DREDD The Early Cases

Eagle: *6 issues 1985-1986*

It took almost a year of continuous weekly publication before writer John Wagner fixed his concept of what Dredd was, how his world operated and how best to handle him. The system he settled on was Dredd as straight-faced foil to the lunatic goings-on around him. The early stories, while gradually developing Dredd's world, are relatively primitive, as artists Mike McMahon, Carlos Ezquerra and Ian Gibson also develop their styles. Brian Bolland's first Judge Dredd story is reprinted in 3, and while there's a novelty in seeing a classic strip develop, there's plenty of better Dredd material available.~WJ

JUDGEMENT DAY

Awesome: *3 issue miniseries 1997, one-shot ('Aftermath') 1998*

This series is at once an attempt to define an Awesome universe, to summarise the pasts, and indicate the future paths of the characters that Awesome planned to publish. It's also a homage to comics and genres of the past, an indictment of the comics of the late 1980s and early 1990s, and an introduction to the art of storytelling. It's a specific tribute to the work of Gil Kane, a metaphysical detective story and a cosmic joke. What else would you expect from Alan Moore?

Ostensibly covering the trial of Knightsabre for the murder of Riptide (both members of Youngblood) Moore

challenges the traditional roles of storyteller and reader/listener by having one of the characters be responsible for most of what's written – but how could he be? While Rob Liefeld scripts the 'present day' trial, there are large numbers of guest artists on the flashbacks including Kane himself, Stephen Platt, Keith Giffen, Dan Jurgens, Chris Sprouse, Jim Starlin, Steve Skroce, Rick Veitch and Ian Churchill. In 'Aftermath', Moore portrays Kane (drawn by himself) as an 'imagineer', illustrating six short strips involving the core superheroes in Awesome's line:- Youngblood, Glory, New Men, Maximage, The Allies and Spacehunter. Perhaps not the most challenging of Moore's work but hugely enjoyable for all that.~NF
Recommended: 1-3, Aftermath

JUDGEMENT PAWNS
Antarctic: *3 issue miniseries 1997*

A band of fighters are mystically summoned from other times and other planets to fight a seemingly omnipotent mystical menace. It's an old plot given no purchase inducing twists here, although artist Jean-Sébastien Duberger is worth watching out for as he develops his style.~FP

JUDOMASTER
Charlton: *10 issues (89-98) 1966-1967*

In the usual Charlton fashion, rather than renewing their magazine-rate postal permit they cancelled a title, in this case *Gun Master*, and merely started their new project by continuing the numbering of the old title. In the final months of World War II Sgt Rip Jagger becomes the freebooting Judomaster. From his island base he and his band of raiders foil Japanese sabotage attempts in the South Pacific in what was the first martial arts strip to appear in comics. Drawn by martial arts devotee Frank McLaughlin and débuting in *Charlton Special War Series* 4, Judomaster proved to be one of Charlton's best. The back-up feature, a revival of Sarge Steel, by Steve Skeates and Dick Giordano, was also very good, making for an eminently readable comic.~SW

JUGGERNAUT
Marvel: *One-shot 1997, one-shot ('The Eighth Day') 1999*

Joe Kelly and Duncan Rouleau tell a tale of rednecks and mayhem in the first story as D'Spayre, demon of, well, despair steals the mystic energy that makes Charles Xavier's step-brother an unstoppable engine of destruction. Fast-paced, very readable, and not afraid to make fun of itself. The second one-shot is the last chapter of a company crossover (see *Iron Man* 22, *Thor* 17 and *Peter Parker, Spider-Man* 11). Juggernaut is revealed to be one of eight Exemplars, earthly tools of supernatural entities created to wage war. Cain Marko must fight free of the influence of his patron Cyttorak before he is compelled to battle his supernatural counterparts and consequently devastate the world. Pretty pictures from Terry Shoemaker but Joe Casey's script is mindless nonsense.~WW

JULIUS KNIPL, Real Estate Photographer
Penguin: *1 volume (Cheap Novelties: 'The Pleasures of Urban Decay') 1991*
Little, Brown: 1 volume 1996
Pantheon: *1 volume ('The Beauty Supply District') 2000*

Julius Knipl wanders the streets of New York, ostensibly in his job as a photographer, but actually, for our benefit. He points out the nooks and crannies of the city, the businesses, still flourishing or long gone, leaving behind some small evidence of existence, like a sign on the side of a building that no-one has ever replaced. He chronicles forgotten novelties, gadgets and foodstuffs, real and imaginary, with a weather eye open for sales, as well as the lives of salesmen in single-room apartments and the countless clubs and societies (like *The Holey Pocket League*) that keep men occupied when they're not working.

These volumes reprint selections of Ben Katchor's newspaper strip, but each also contains an extended episode, 'The Cheap Merchandise District', 'The Evening Combinator' and 'The Beauty Supply District' respectively, which, though maintaining the same eight-panel format, allow Katchor to develop specific themes more thoroughly. His narrative is terse, playful and wondrous, his artwork is sketchy and yet full of the minutiae of the streets, shops and lives with which he fills his strip. This is a lyrical, nostalgic, melancholy look at the architecture of life and loneliness, yet it's also funny, heart-warming and deeply felt.~NF
Recommended: 'The Beauty Supply District', *Cheap Novelties, Jules Knipl, Real Estate Photographer*

JUNGLE ACTION
Marvel: *24 issues 1972-1976*

Jungle Action's original remit was to reprint stories of scantily clad male and female Tarzan rip-offs, and apart from some drawn nicely by Joe Maneely in 1-3 there's nothing of note. The Black Panther is the featured character from 6, and was immediately launched into the epic 'Panther's Rage' story until 18. The Panther was a blank slate for writer Don McGregor, who fleshed out the bare bones of his background from previous appearances. The Panther was the ruler of Wakanda, a technologically advanced hidden African society, from which McGregor extrapolated a complex culture, mythology and geography, devising a complete map of Wakanda and the surrounding area, and being consistent in sticking to it for the duration of his run. They may seem obvious pieces of preparation, but few comic creators at the time bothered with background to that degree. In the company of artists Billy Graham and Klaus Janson (from 10), McGregor wove a complex tale of an uprising led by the imposing Erik Killmonger. Mixing exotic characters, a Wakandan travelogue and political machinations, and still finding space for small human moments, it's a considerable achievement, albeit flawed by McGregor's florid writing style. McGregor cared about the feature, though, to the extent of preparing text and illustration pages more in keeping with the tone of the Panther's strip to replace the reprint back-ups, and including an extra level to some stories by, for instance, planting subtle clues as to the identity of a mystery assassin in 9. The complexity of McGregor's plotting and the ideas incorporated make 'Panther's Rage' a forerunner of the current crop of adult-oriented comics. 19 began another multi-parter with the Panther back in the USA confronted by the bigotry of the Ku Klux Klan. Unfortunately, McGregor's prolix tendencies run out of control, producing dull issues. The story was unfinished as Jungle Action was cancelled (to let Jack Kirby start his *Black Panther* title); Ed Hannigan completed it none too satisfactorily in *Black Panther* 14-15 and *Marvel Premiere* 51-53.~FP
Recommended: 8-17

JUNGLE ADVENTURES
Skywald: *3 issues 1971*

Bob Gordon-Manning, film star and cat lover is hit on the head and wanders off to become Zangar, yet another Lord of the Jungle in this second rate adventure series. Of more interest to fans are the classic reprints of Sheena, Jo-Jo, Blue Gorilla, Taanda the White Princess and Slave Girl that fill out each giant sized issue.~WW.

JUNGLE COMICS
Blackthorne: *One-shot (Jerry Iger's Classic Jungle Comics) 1986, 3 issues 1988*
A-List *6 issues 1997-1998*

For Blackthorne, Bruce Jones and Dragan Flaesc give Sheena a potion to return her youth and send her back to Africa to face some poachers, teaming her with Kaänga. The black and white of 2 is a big improvement after the poor colour printing on 1, but perhaps fittingly, 3 ends on a cliffhanger, and story remains unfinished. The one-shot reprints, very badly, the first issue of Fiction House's *Jungle Comics*.

A-List begin promisingly with a reprint of Sheena in 3-D from 1953, and an introduction by Jerry Iger, but the credits disappear completely after 3 and 5-6 (both all Sheena issues) are very poorly printed. 2 contains reprints of Wambi the Jungle Boy by Iger, South Sea Girl by Thorne Stevenson and Hydro Celestial Battle by Lionel Sanders. 3 has the Congo King by Taylor Tibett and Iger, and a two-page parody called Snarzan The Ape, while 4 has episodes of Buck Johnson, Captain Cutlass, Sally the Sleuth and Kismet Man of Fate.~NF

JUNGLE GIRLS

AC: *16 issues 1988-1989 (1-2), 1992-1993 (3-16)*

Serving both as a home for new stories about Tara, a member of the Femforce, and for reprints of various jungle girls of the past, the unremarkable quality of the first and the lack of variety in the latter eventually saw off this title. The artists primarily influence the selection of reprints and these include Bob Powell (Cave Girl), Matt Baker (Tiger Girl, Camilla: Wild Girl of the Congo), Bob Lubbers (Camilla), Maurice Whitman (Nyoka the Jungle Girl), Robert Hayward Webb (Sheena Queen of the Jungle, Tiger Girl), Gene Fawcette (the original Tara, Taanda) and Jack Kamen (Tangi). Recognising the limitations of the genre, Howard Nostrand's *Mad*-style parody, 'Shirl the Jungle Girl', appears in 16. Tara's solo adventures (1-4, 10, 13), are by various creators, including Bill Black (1, 4, 10, 13), Dick Ayers (4) and the John Byrne-like Vic Bridges (10), but none have any depth. An attempt to offer something different begins with Nick Northey's 'Wild Side' (14-16), teaming Tara with Nyoka, Cave Girl, Tygra and Princess Pantha on the island of Taragonia, where nuclear experiments have created a new world of dinosaurs and strange creatures. Though this does spark some characterisation, it was too mediocre to provide the boost the title needed.~NF

JUNGLE JIM

Dell: *20 issues 1953-1959*
King: *1 issue (5) 1967*
Charlton: *7 issues (22-28) 1969-1970*

The original comics featured adventures of Alex Raymond's syndicated hero Jungle Jim Bradley and his faithful companion Kolu in the greenery 'East of Suez'. Despite the newspaper strip being discontinued in 1954, the character's popularity was maintained due to movie B-features starring a post-*Tarzan* Johnny Weissmuller, and a TV series.

The first two Dell comics are issues of *Four Color* (although Jim's name is large on the cover), and the series officially picks up with 3. They're largely drawn by Paul Norris and Frank Thorne in a conservative 1950s style, and the King issue reprints 5. Perhaps that's why it's numbered as such rather than 21. The only additional item of interest was the tantalising Wally Wood cover. When Charlton leased the feature they were given the unpublished art for stillborn future King issues, so 22, 23, and 27 have artwork by Wally Wood (and his assistant Wayne Howard) and Steve Ditko, inked by Wood (or Howard). The balance of the stories are by Joe Gill and Pat Boyette, who did an unconventional but highly reverential job on the strip. The Charlton series also features a one-page lesson on how to speak Swahili each issue.~SW

The Exploits of the JUNIOR CARROT PATROL

Dark Horse: *2 issues 1989-1990*

The whimsical surreality of *Flaming Carrot* is present and correct and Rick Geary's a better artist, yet somehow these junior crimefighters attempting to emulate their hero fall flat.~FP

JUNK CULTURE

DC/Vertigo: *2 issue microseries 1997*

14 year old Eve and Lola are twin sisters who wear blue lipstick and have shaven heads. On the way home from school one day Lola is accidentally electrocuted. Surviving the shock, Lola becomes seriously deranged, spouting advertising slogans and wreaking serious havoc. Then some mysterious men appear out of nowhere and try to fix Lola. It slowly dawns on Eve that she and her sister are both results of an experiment and they're artificial humans. So, being emotionally only fourteen, they throw an incredibly destructive temper tantrum. This reads like a rushed adaptation of a cult carnage movie. *Natural Born Killers* comes to mind with its motif of ubiquitous advertising infecting everyday life, but that overstates how deep the story goes. The scripting is terse and oblique, the art is very stylised, distancing us from the real horror of situations like being clobbered with your own torn-off arm. It's thin stuff with almost no motivation going beyond cliché, but that may be writer/artist Ted McKeever's whole point. If you don't get off on the attitude then there's precious little here to engage the reader.~SW

JUNKWAFFEL

Print Mint: *4 issues 1971-1972*
Last Gasp: *1 issue (5) 1983*

One of the underground's most prolific artists, Vaughn Bodé produced a large body of work that was variously touching and bawdy, profound and cutesy depending on the strip. Junkwaffel was conceived as a receptacle for obscure, early or unpublished stories, and was inevitably a patchy affair, but certainly contained fine work. Highlights of the run include the powerful and violent anti-war strips 'The Machines' in 1, dating from his college days, and 'Cobalt 60' in 2, the chapters of which were later collected from disparate sources. By contrast the magazine-sized 5 reprinted Bodé's charming unpublished newspaper strip 'Zooks', the story of the first lizard in space. Some of the material now appears a tad sexist and inconsequential, but there's much of interest here overall. The issues have been kept in print by Last Gasp, and all are still available.~DAR
Recommended: 1, 2

JUNKYARD ENFORCER

Boxcar Publishing: *2 issues 1998*

Streetwise newsboy Little Bruce joins a junkyard gang of young offenders led by an older kid named Pinchorelli. The gang pulls a heist for gang boss Butch Franco. Things soon go wrong thanks to Pinchorelli's wild-eyed anarchist girlfriend Tanya. Josh Sheppard's writing is gripping although the vagueness of the period the stories take place in undermines the realism. His artwork is suitably dynamic but lacks finesse at the inking stage – this isn't gritty its just inept – and Gerald Forton lends a helping hand with 2. A worthwhile read.~SW

JURASSIC JANE

London Night: *7 issues 1996-1997*

Cover marked "Mature Readers", it's only immaturity that will attract anyone to this collection of titillation and fantasy clichés. Jane wanders an ancient land on a quest, chancing across assorted mystical and neanderthal dangers and flashing her breasts at all and sundry. Further exploiting those adolescent hormones this nonsense is priced at an exorbitant $3 for sixteen pages. For the really desperate there's an alternative edition of this shoddy comic with all characters fully nude at double the price.~WJ

Return To JURASSIC PARK

Topps: *8 issue limited series, 1 Annual 1995-1996*

Tom and Mary Bierbaum pick up where Englehart left off with the *Raptor* series, by introducing a story that parallels the events of the source film. Drs Grant and Sattler investigate the military occupation of Jurassic Park in 1-4. Two new scientists are introduced for 5-8, which features them abandoned on the island during a storm, and coming into conflict with the military. Armando Gil returns as penciller, but Michael Golden's covers are the artistic highpoint of the series. The annual (1995) and *Jurassic Jam* (1996) complete the *Jurassic* spin-offs, the latter a story by Keith Giffen illustrated with single-pagers from the likes of John Byrne, John Bolton, George Pérez and Walt Simonson.~NF

JUST A PILGRIM

Black Bull: *5 issue miniseries 2001, 4 issue miniseries 2002*

The titular Bible-quoting reformed cannibal is nameless, and, pursued by pirates, tries to lead a wagon train of innocents to safety in this violently hilarious post-apocalyptic wild western set on the dried-up bed of the Atlantic Ocean. This could hardly have been written by anyone other than Garth Ennis, and is not for the soft-hearted. Castenado, the hook-handed blind captain whose remaining senses have been enhanced by radiation (reminds me of something), is the wicked pantomime villain of the first series. Carlos Ezquerra's gritty art, well-coloured, is among his best. The second series ties up loose ends while repeating the old routines, so is merely all right.~GK

Recommended: miniseries one 1-5

JUST IMAGINE STAN LEE'S...

DC: *12 issue limited series 2001-2002*

Michael Uslan is credited as initiator of this project, which allows Marvel mainstay Stan Lee to re-imagine DC's major characters, collaborating with artists who are not usually associated with them. The biggest coup in this respect is having Superman drawn by John Buscema, who had not worked outside Marvel for many years, but who, as with most of the other artists, is perhaps better described as 'well-regarded' than a major draw to the series. Lee's scripts are flamboyant (sometimes pompous), and the emphasis on magic and the limited characterisation all count against the series. Nevertheless, it's fun to see Lee's interpretations (with references to as many other DC characters as possible it seems), wrapped up in an overall storyline concerning the plans of the Reverend Darrk to allow his evil master, Crisis to enter and conquer the world. It's hard to complain about any of the artwork, but Jim Lee (*Wonder Woman*), Kevin Maguire (*The Flash*) and Chris Bachalo (*Catwoman*) are the most effective visually, with John Byrne's *Robin* and Joe Kubert's *Batman* perhaps most disappointing. Uslan also provides short backups adding some flesh to the bones of Lee's world, in all but the *JLA* and *Crisis* issues, again illustrated by an eclectic group of artists, including Sergio Aragonés, Kyle Baker, Gene Colan, Darwyn Cooke, Richard Corben, Ramona Fradon, Mike Kaluta and John Severin.~NF

JUSTICE

Marvel: *32 issues 1986-1989*

A memorable disaster area. How on earth did it last for so long? Archie Goodwin created a confused alien called Tensen who had been a law officer on his own world, Spring (the baddies are from Winterland), and continued to punish evildoers after arrival on Earth. He judged them by their black auras and battered and fried them with his electric shield and sword. Steve Englehart took over the scripting from 2, and it's not bad. The earth scenes are typical 1980s sub-Frank Miller mean-streets stuff, and the fantasy elements are by way of vintage Steve Ditko strips such as *Dr Strange* and *Shade The Changing Man*. The chief problem is the eccentric pencilling by Geof Isherwood, plainly inked by Vince Colletta. It looks a mess.

Keith Giffen, heavily under the influence of the South American master José Muñoz, drew some decent issues, written by old hand Gerry Conway (9-11). Then, after some rough fill-ins, halfway through the run someone decided to try some creators who weren't incompetent or clapped-out on the comic. It was revealed that Tensen had been under the hypnotic spell of a paranormal. The editors explained: "Unfortunately, in the creative crunch to get the books done for Marvel's 25th anniversary, we accidentally let a few stray concepts – aliens and alternative dimensions – creep in, concepts we soon realised were 'old universe'." Peter David wrote the strip to its end and packed in a lot of slapstick and digs at comic-book writing and cultural events such as *Live Aid*. 16-32 are quite readable – even funny if you followed the title from the beginning. Lee Weeks and Mike Gustovich's art is clear and dynamic. Tensen learns to walk on his shields (i.e. fly) and the criminals still get incinerated.~GK

JUSTICE Four Balance

Marvel: *4 issue miniseries 1994*

No relation to the 1980s character, this Justice is a telekinetic teenage member of the New Warriors, and later the Avengers. Having suffered heavy beatings as a child, Justice is keen to investigate the death of a possibly abused teenager. The first issue is reasonably well handled, but precedes two issues padded with superfluous cameos and jarring 'fantasy' sequences to stretch the series to four issues. The concluding issue stands apart from the remainder, and is the best of the run, making every necessary point on its own.~WJ

JUSTICE INC

DC: *4 issues 1975, 2 issue microseries 1989*

A contemporary of The Shadow, and like his counterpart operating a pool of agents, The Avenger was created for 1930s pulp novels by writer Kenneth Robeson. An experimental operation by enemies of the state endowed Richard Benson with the ability to morph his features to resemble anyone he chose, a technique he used to the full in fighting crime. The first series can't make up its mind if it's to be a home for adaptations of the novels or for original material, and the identity crisis resulted in an unsatisfactory series. Al McWilliams does a nice job illustrating the first issue and Jack Kirby draws 2-4, but they're strangely lack-lustre, as Kirby often was when working on creations other than his own.

Andy Helfer wisely chose to have the microseries span twenty years from 1948, distancing it from the pulps to avoid invidious comparisons, but retaining the essential period feel. Helfer provides a dense plot, adding elements to the Avenger's origin and portraying him as a man manipulated by the security services from day one. In keeping with the tone of the feature, Kyle Baker's art is distinctly unsettling. He appears to have drawn in coloured chalks, adding black outlines on an overlay, for an overall ghostly and distancing effect. There's perhaps a little too much exposition and set-up beginning the second issue, but once Benson knows the truth about himself he embarks on an ingenious course of action that engrosses until the end. Baker and Helfer don't top their work on *The Shadow*, but they're even less reverential here and their take on *Justice Inc* is well worth reading.~WJ

Recommended: microseries 1-2

JUSTICE LEAGUE Graphic Novels, miniseries and one-shots

DC: *3 issue miniseries ('A Midsummer's Nightmare') 1996*, 2 issue microseries (League of Justice) 1996, one-shot (Justice Riders) 1997, 3 issue miniseries ('Paradise Lost') 1998, 2 issue microseries ('World Without Grown-Ups') 1998, 3 issue miniseries ('The Nail') 1998*, 3 issue miniseries (JLA/Titans) 1998-1999*, one-shot ('Super-Spectacular') 1999, one-shot ('Superpower') 1999, one-shot ('Foreign Bodies') 1999, one-shot ('Primevil') 1999, Graphic Novel ('Earth 2') 2000, 2 issue microseries ('Created Equal') 2000, one-shot ('Realworlds') 2000, one-shot ('Heaven's Ladder') 2000, 2 issue microseries ('Secret Society of Super-Heroes') 2000, Graphic Novel ('A League of One') 2000, one-shot ('Seven Caskets') 2000, 3 issue miniseries ('Act of God') 2000-2001, 5 issue miniseries ('Justice Leagues') 2001, 4 issue miniseries ('Black Baptism') 2001, one-shot ('Gods and Monsters') 2001, one-shot ('Our Worlds At War') 2001, one-shot (JLA/Haven: 'Arrival') 2001, 3 issue miniseries ('Gatekeeper') 2001, 7 issue limited series ('Incarnations') 2001-2002, one-shot ('Riddle of the Beast') 2002, one-shot ('Shogun') 2002, 4 issue miniseries ('Destiny') 2002, one-shot ('Island of Dr Moreau') 2002, one-shot (JLA/JSA Secret Files and Origins) 2002, Graphic Novel (JLA/JSA: 'Virtue and Vice') 2002*

DC/Dark Horse: *One-shot (JLA vs Predator) 2000*

DC/Image: *One-shot (JLA/WildC.A.T.S.) 1998, one-shot (JLA/Witchblade) 2000*

The JLA miniseries and one-shots, with one exception, divide handily into two groups: those that are 'supposed' to have happened, and are in continuity, and 'Elseworlds', which take place outside the main DC Universe, and never 'really happened'.

In terms of the in-continuity adventures, the most important is 'A Midsummer's Nightmare', which presages the ongoing JLA revival. Mark Waid and Fabian Nicieza provide the story, with Jeff Johnson and Darick Robertson the art. The 'Big Seven' – Superman, Batman, Wonder Woman, Flash, Green Lantern, Aquaman and the Martian Manhunter – are stripped of their memory of their superpowers, while the rest of the world's population is suddenly discovering abilities far beyond those of mortal men. This stylish and intelligent prelude set up the reason for these key characters to regroup as the JLA, while sweeping away the debris of all those lesser Leagues – International, Europe, Task Force, Extreme – that had cluttered the playing field for so long. 'Pardise Lost' focuses on Zauriel, the angel introduced by Grant Morrison as a new member of the JLA, in a seeming attempt to offend both the pious and the pagan alike. If you can get past the imposition of the Judeo/Christian heaven as 'real' in the DC Universe, Mark Millar turns in a tolerably entertaining story.

JLA/Titans is the work of two obsessive fannish type creators Devin Grayson and illustrator Phil Jimenez, who bring in, or at least mention in passing, every single member of both teams in an incredibly crowded and convoluted tale of a former Titan who becomes a menace to earth. Lots of nice character touches, snappy dialogue and lovely art do not entirely compensate for the incredibly claustrophobic feel, which ideally could have used another issue to decompress. It was a huge commercial success, however, and resulted in the 1999 *Titans* revival. A similar successful launch for *Young Justice* was engineered by Todd Dezago's entertaining and well-characterised script for 'World Without Grown-Ups'. Earth is split into two worlds, identical in every way, save that one has only adults, and one only teenagers and children, among its population.

'Superpower' introduces Mark Antaeus, a promising young metahuman who joins the League, but ultimately finds the burdens of powers too great, while 'Foreign Bodies' is the old story standby of having the heroes exchange bodies, and their familiarity with each other's strengths and weaknesses being their undoing. In 'Primeval' our heroes must thwart the progressive de-evolution of Earth, and of themselves. These three, like so many other JLA one-shots, illustrate the problem with a popular franchise like JLA spawning endless spin-offs; all are perfectly competent stories, but there's absolutely no reason they should be prestige format one-shots rather than issues of the actual comic. 'Seven Caskets' is lavishly illustrated by Dan Brereton, who also provides the singularly pointless story. Seven undead kings unleash an evil so great that in order to combat it, the JLA must become monsters themselves. Ho-hum.

Three longer stories have been issued as hardcover graphic novels. 'A League of One' is written and painted by Christopher Moeller. It's rather lovely, and really a Wonder Woman story with the JLA guest-starring. Diana receives an oracle's warning that a member of the League will die in battle against an enemy, so she sets out to disable or nullify all the other Leaguers before the menace arrives, in order that she will be the one to sacrifice herself. Beautifully illustrated and a lot of fun, even if the basic plot is very familiar to old *Legion of Super-Heroes* readers, (Saturn Girl and Zaryan the Conqueror, anyone?). 'Earth 2' also revisits an old story (*Justice League of America* 29-30) in which the JLA met their evil counterparts, and gives it a modern dystopian spin. This time rather than being simple thieves, the evil forms of Superman, Batman, Wonder Woman, Flash and Green Lantern are drug addicts, perverts, and sadistic murderers. Given that the creative team are Grant Morrison and Frank Quitely, the whole story possesses rather more style than initially expected, but although well done, it still leaves a sour aftertaste. *JLA/JSA*: 'Virtue and Vice' not only revives the old tradition of team-ups between the Justice League and the Justice Society, but is a substantial improvement on most previous entries in that category. The Seven Deadly Sins possess members of both teams, and the remainder mobilise to stop their rampage, which is, of course, orchestrated by an unexpected enemy. David Goyer and Geoff Johns turn in a deft action thriller that doesn't stint on character touches and snappy dialogue, and the presentation of several of the lesser heroes is particularly appreciated. Carlos Pacheco and Jesús Meriño, having cut their teeth on multi-hero epics in *Avengers Forever*, take this is their stride. Despite the hefty price for the hardcover, the story is a triumph. It was preceded by *JLA/JSA Secret Files*, which includes a prologue, revealing more when re-read after the graphic novel, the revival of Metamorpho and a couple of other competent but undistinguished tales along with some profile pages.

'Heaven's Ladder' was a tabloid-size special introducing the new creative team on the *JLA* monthly at the time, Mark Waid, Bryan Hitch and Paul Neary. A monstrous machine of incalculable scale snatches the Earth from under the nose of the startled JLA, and they pursue to find the machine stringing planets together, like beads in a celestial necklace. The art is sublime on the extra-large pages, and the script is both profound and playful, giving the characters appropriate heroic stature, but we've seen the ending, or variants on it, numerous times. 'Gods and Monsters' takes the interesting premise that DC heroes have been likened to earthbound gods, and combines that with the cult of the celebrity to create a body of people who literally worship the JLA as deities. Needless to say, all is not as it seems, and ultimately very little is done with the concept of literal 'hero worship'.

'Justice Leagues' has the JLA split and rendered amnesiac, forgetting that there ever was a Justice League. Each individual member, however feels compelled to form his/her own Justice League of something, therefore we are offered *JLAliens*, *JLAmazons*, *JLAtlantis*, *JLArkham*, and so on. It's not without moments of interest, but over-extended. The same applies to 'Black Baptism', which unites the DC's magic users against a team of menaces that the JLA themselves are helpless to handle. 'Arrival' is written by Ashley-Jayne Nicolaus and Matt Schuster, with art by Ariel Olivetti. It introduced a new group of alien heroes, and was essentially a pilot for the Haven series. Since the DC was already overstocked with under- or unused heroes, the Havenites eventually went nowhere. 'Our Worlds At War' was the team's entry in that year's company-wide crossover, and was notable mainly for the presumptive death of Aquaman. 'Gatekeeper' was an ill-advised follow-up to *Green Lantern Annual* 9, in which the team has to rescue a foreign heroine trapped in an alternative dimension. Written and drawn by Tim Truman, it's strictly demons-by-the-numbers. 'Incarnations' is a retro-continuity series looking at different eras of the team's history, sincerely intended by writer John Ostrander, but Val Semeiks' art is so poor that the effort is wasted.

The best of the Elseworlds efforts is 'The Nail', written by Alan Davis and sumptuously-illustrated by Davis and Mark Farmer. It takes its inspiration from the old rhyme in which a minor event – the missing nail from a horse's shoe – has catastrophic repercussions. The 'Nail' in question causes a flat tyre on the Kents' truck, so that they don't find the spacecraft from Krypton, and someone else does. That minor event causes the underpinnings of their entire world to erode, and brings them to the brink of disaster. It's genuinely special. 'League of Justice' is pointless magic elfy bollocks recasting the team as folkloric characters. In *Justice Riders* Chuck Dixon re-casts the JLA as western heroes with Wonder Woman as a sheriff gathering an unusually powered posse. It's offbeat, but not without merit. 'Act of God' opens with an inexplicable event stripping all the super-beings of their powers, a potentially interesting premise. Unfortunately, the event is never explained, the premise collapses under examination, and the characterisation of the heroes ranges from the insulting to the outright stupid under Doug Moench. 'Created

Equal' might as well be titled, 'They Saved Superman's Sperm', as half the world's population, with one notable exception, is wiped out, and the survivors have to redefine everything in their lives. Despite the obligatory Supes/WW flirtation, it's actually well-characterised by writer Fabian Nicieza, and Kevin Maguire's art is lovely. The story could, however, have done with a middle bridge to explore the consequences of the situation. In 'Secret Society of Super-Heroes' investigative reporter Lois Lane discovers a secret cabal of super-beings who have been dispensing justice from beyond the law. Howard Chaykin writes in his usual dystopian twists, (though at least refrains from his habitual blowjob scenes), but it's a pretty good read, and Mike McKone's art is suitably edgy. 'Riddle of the Beast' is a *Lord of the Rings* inspired fantasy story in which a young boy named Robin lays claim to his heritage. With more than a dozen artists, this is rambling and dull. 'Shogun' is set in the ancient Japanese Empire, but everyone talks like contemporary Americans. Even amongst the field of *JLA Elseworlds*, in which it has plenty of competition, Ben Raab's story is outstandingly stupid and pointless. 'Island of Dr Moreau' reinterprets the classic novel, with the JLA as 'manimals' in the Victorian era, directed by their creator to hunt down Jack the Ripper. For all its unoriginality, it's reasonably well done by Roy Thomas and Stephen Pugh.

'Destiny' seeks to go one better than 'The Nail' by posing the musical question, "What if Superman and Batman had never happened?". The answer, at least according to this over-long, muddily drawn effort, is "not a lot". Futile and derivative.

Three which are not explicitly 'Elseworlds', but clearly can't be 'in continuity', are one-shot crossovers between the JLA and other characters or properties. *JLA/WildC.A.T.S.* by Grant Morrison and Val Semeiks is a bog-standard slugfest showing no flair or style, done with both eyes on the paycheck, while *JLA/Witchblade* is marginally the least worst of the three, with the enchanted blade seeking out the JLA femmes as its host. *JLA Vs. Predator* has the movie monsters taking on the World's Greatest Super-Heroes in a humdrum battle featuring Kevin Nowlan's most cursory and dismissive art to date.

'Realworlds' defies categorisation. By J.M. DeMatteis and G. L. Barr, the exploits of fictional superheroes inspire all-too-real people to attempt superhuman things. Old friends reunited by a mysterious summons, who used to 'play JLA' together as children, face greater challenges in later life. It's an intelligent and thoughtful story, and, rarely for a DeMatteis tale, not over-written. For completeness' sake, mention should also be made of the *JLA Gallery*, collecting various artists' pin-up interpretations of the team, and the *100 page Super Spectacular* reprinting 1960s JLA tales backed up by a 1940s JSA story.~HS

Recommended: 'Earth 2', 'Heaven's Ladder', 'League of One', JLA/JSA, 'Midsummer's Nightmare' 1-3, 'The Nail' 1-3, Realworlds

JUSTICE LEAGUE ADVENTURES

DC: *15 issues + 2001 to date*

A stylish and enjoyable interpretation of DC's premier super-team derived from the continuity of the 2001 TV cartoon series. All issues to date are smartly done, of a higher and more consistent quality than DC's overblown and pretentious 'main' JLA title, and several are excellent. Ones to watch out for are Dan Slott's 6, in which an apparent triumph for the League's opponents conceals an ingenious 'sting', and Matt Howarth's 9, in which the Flash's dating problems are sharply contrasted with his JLA duties. In 10 Josh Siegal produces a shrewd and non-mawkish exploration of the Martian Manhunter's difficulty in being accepted by Earthlings. The art throughout is generic animated style, but never less than competent. One of DC's best contemporary titles. A collection gathers 1, 3, 6 and 10-13.~HS

Recommended: 6, 9, 10

JUSTICE LEAGUE AMERICA

DC: *113 issues, 9 Annuals, 1 Spectacular* ***1987-1996***

As the previous version of the Justice League had stagnated and died in mediocrity, something radical was required to entice readers back. Writer Keith Giffen (plot and often art breakdowns) came up with the goods. The new JLA's multinational cast were likely to mess up before they came through, and had a difficult time taking the concept, or each other, seriously. Humour is paramount, in the way the characters mesh and J.M DeMatteis' snappy dialogue, but it's backed up with strong plots and thoughtful characterisation, deftly switching tone to tragedy when required.

Of course, it helps that throughout most of their run Giffen and DeMatteis are blessed with gifted art teams. Pencillers Kevin Maguire (1-12*, 16-19, 22-24, 60), Ty Templeton (20, 21, 24-29), Mike McKone (28, Annual 3, 4, 41, 42), and Adam Hughes (30-40, 43, 44, 51), and inkers Al Gordon, Joe Rubinstein and Art Nichols produce slick and dynamic superhero art that flows from page to page. It's likely that if you enjoy one of the Giffen and DeMatteis issues you'll enjoy most of them. Good samples are the Justice League moving into their new global embassies (8), the ludicrous Injustice League (23), or 43-44, in which a novice wins the accoutrements of some of DC's daftest villains in a poker game and proceeds to cause havoc.

From 7 to 25 the title is called *Justice League International* (not to be confused with the later *Justice League International*), and the final Giffen and DeMatteis story arc, 'Breakdowns' (53-60), switches back and forth between this title and *Justice League Europe* 29-37. By then the formula is sagging a little at the seams, not least because Adam Hughes was never adequately replaced as pencil artist. The appointment of Dan Jurgens solves the art problem, but his writing is largely unspectacular with the exception of one excellent story. The first part of 'Destiny's Hand' (72-75) features the shocking return of the old Justice League of America.

After Jurgens it's downhill. Dan Vado (78-91), a good writer on idiosyncratic projects, seems decidedly uncomfortable here, and Gerard Jones (92 on) is on comics-by-numbers mode throughout. Their accompanying art teams, Kevin West inked by Rick Burchett, and Chuck Wojtkiewicz and Bob Dvorak, hold their ends up, but Jones' policy of constant guest stars and temporary members initially leaves little time for any individual focus. The title never reaches the depths plumbed by its predecessor, but the end was just as merciful.~FP

JUSTICE LEAGUE EUROPE

DC: *50 issues, 3 Annuals 1989-1993*

Following the success of 1987's *Justice League America* revival, a spin-off was quickly devised, written by the Keith Giffen J.M. DeMatteis aegis that established the League as an international peace-keeping force, with embassies all over the world. Set initially in the League's Paris embassy, 'Ugly American' jokes abounded, as the team attempted to come to terms with culture shock under the guidance of their formidable Paris liaison. Marred only by the oily, soaplike art of the inexplicably popular Bart Sears, these were cheerful character-based stories with a high comedic element, frequently involving conflicts with the curvaceous and nefarious Queen Bee and her thralls, the Global Guardians, rival international heroes. 6 introduced the Crimson Fox, a French heroine who became an integral and popular team member, and with 15, the Silver Sorceress (who, given her costume, should correctly have been called the Beige Bunnyrabbit) and Blue Jay, displaced heroes from a parallel world, joined the series, as did their sadistic enemies the Extremists. Gerard Jones became co-plotter with Giffen from 17, replacing DeMatteis, but the standard of comedy remained unimpaired, apart from 20, in which lame Basil Fawlty parody, the Beefeater, masquerading as a British hero, appears. This precipitates the team's relocation to London, as an unfortunate accident befalls the Paris embassy. The 'Breakdowns' storyline, alternating with issues of *Justice League America* between 29 and 36, effectively deconstructed both series, preparing them for a more serious relaunch in 1992's *Justice League Spectacular* one-shot. From 37, Gerard Jones was sole writer, with Ron Randall as primary artist, producing an era of blandness. The previous comedy schtick may have become tired, but replacing it with generic superheroics wasn't the answer. Introducing Green lantern (Hal Jordan) and Aquaman as series regulars, and prominent guest-appearances by Batman and Wonder Woman, didn't help sufficiently. The best of these issues is the six-part Red Winter storyline in 45-50, which refines the team to a global line-up. New regulars included the Japanese Dr. Light, Tasmanian Devil from Australia, France's Crimson Fox and the UK's Chandi Gupta, avatar of a Hindu goddess Maya, setting the scene for the series' transition to Justice league international with 51.~HS

JUSTICE LEAGUE INTERNATIONAL

DC: *18 issues (51-68), 2 Annuals 1993-1994*

Not to be confused with the former run of Justice League International, which was actually Justice League America 7-25. This continued from Justice League Europe, and is little more than a succession of pedestrian superhero adventures, the invention and vitality of the series long having fled under writer Gerard Jones (and Will Jacobs to 63). Despite the presence of several likeable characters in the roster, it never gels. The final issue is written by Christopher Priest and introduces Triumph, an all-new founder member of the Justice League. However intriguing this sounds, it's wretchedly executed and cancellation comes as a blessed relief.~HS

JUSTICE LEAGUE OF AMERICA

DC: *261 issues, 3 Annuals, 1 Spectacular 1960-1987*

Astounding as it seems today, there was an era when the uniting of a company's top-of-the-line superheroes was distinctly novel, with the long gone Justice Society of America in *All-Star Comics* still fondly recalled. This despite the characters rarely teaming in more than pairs or trios. Having successfully refurbished DC's more popular 1940s superheroes for the 1960s, editor Julie Schwartz took the next logical step in teaming them in *Justice League of America*. Even then it was a tentative introduction, with the idea having to prove itself commercial through tryouts in *The Brave and the Bold* 28-30.

The early *Justice League* issues have aged badly. Schwartz co-plotted with writer Gardner Fox (author of many of the 1940s Justice Society tales) and with pencil artist Mike Sekowsky and they adhere rigidly to a four or five chapter formula. The unsophisticated, cleancut, radiantly cheerful heroes team in pairs and trios to combat aspects of that issue's menace before uniting for the final chapter. While the plots and means used to deal with villains are imaginative, and Sekowsky's quirky art is oddly appealing, modern-day readers will find 1-20 formularised and naïve. Characterisation was never a priority, and their respective limitations apart, Green Lantern, for instance, could have substituted for Martian Manhunter to little obvious difference. The origin of the League wasn't presented until 9. It's a decently plotted tale that serves as the best sample of the first three years.

With the new versions of their characters instituted, it was inevitable that the Justice League would meet their predecessors. The teaming with the Justice Society in 21 and 22 remains a landmark and set a precedent. Until almost the end of the run the Justice League and Justice Society would team annually. These stories are highlights of the Fox and Sekowsky run, with 29 and 30 introducing Earth 3, where the JLA counterparts are criminals; Earth A in 37-38 introduced an evil version of the JSA's Johnny Thunder.

By 23 Fox has begun integrating his heroes a little, making for a more satisfying read, and by 40 the stories are no longer as formularised. By this time the *Batman* TV show was at the height of its popularity, and Batman dominated the covers of issues in the 40s and early 50s. Inside as well there are reflections of the TV show, with wackier dialogue and more gimmicks, but Fox had the common sense not to let the issues become too entrenched in the times. 46 and 47's teaming with the Justice Society reflect this era, with an inventive menace, several jokes (both visual and verbal) and a decent plot, combined with some ludicrous dialogue. The ongoing hardbound *Justice League Archives* has now reprinted issues to 52.

65 was Fox's last issue, and he upgraded another 1940s superhero in Red Tornado, now a thinking robot with tornado-generating abilities. A good selection of Fox and Sekowsky reprints can be found in 39, 48, 58, 67, 76, 85, 93, the hundred-page *JLA* special, and the hundred-page issues 110-116, but it was time for a change. Whereas Fox might have been a tad predictable, his well-plotted light superhero stories had characterised the JLA, and Denny O'Neil's heavy-handed moralising and frequent overwriting just didn't suit the title. His lasting effect was the well-considered application of a character to Green Arrow, who'd spent forty years without one. From then he was the title's conscience, and often disagreed with his team-mates. In 77 O'Neil also rid the JLA of their enthusiastic teenage mascot Snapper Carr, now well past his sell-by date, in a plot with later ramifications. The best of O'Neil's run was the teaming with the Justice Society in 73-74. Despite a preposterous villain, there's a genuinely touching ending that sees the JSA's Black Canary transfer to the JLA, largely to replace the Martian Manhunter, who'd departed with 71 and wouldn't be seen again for over a decade. Sekowsky was also gone, replaced by Dick Dillin in 64. Dillin, very much an artist of the old school, turned out unpretentious pages of consummate storytelling, finely inked by Joe Giella to 101, Dick Giordano to 116 and Frank McLaughlin thereafter. He drew every non-reprint issue until his death in 1980.

The idea of incorporating relevance into superhero stories was a largely ridiculous conceit that few pulled off successfully, and Mike Friedrich from 86 wasn't among them. Gardner Fox had introduced issue-based stories to *JLA* with 57's unsubtle but well-meant tract on brotherhood. Equally well-intentioned, Friedrich's florid proselytising is almost unreadable today, and his best issues lack a drum to beat. 87 introduces counterparts of Marvel's Avengers shortly after they'd encountered barely concealed JLA equivalents, and 98's desperate last battle against the invincible Starbreaker is okay. Ironically, the worst run of issues *JLA* was to have for many a year was largely graced by excellent Neal Adams covers, and Adams drew portions of 94.

Len Wein's writing from 100 blew away the cobwebs, restoring the superhero aspects with stunning success in a three-part teaming with not only the JSA, but another 1940s group, The Seven Soldiers of Victory. 107-108, introducing a group of heroes acquired from the defunct Quality line, in a world where the Nazis had won World War II, was another triumph, and from that point the annual team-up usually incorporated a third superteam. Wein's entire run to 114 was well conceived, and other highlights were a sentimental yet hard-edged Christmas story in 110, and a tragic story of the original Sandman in 113. On Wein's departure numerous writers took over, producing nothing above ordinary.

The arrival of Steve Englehart with 139 altered that. He defined the Justice League as no previous writer had done, establishing inter-dynamics for the team, noting which members were friends and which didn't get on. He additionally produced page-turning plots, including a now forgotten alternative origin of the Justice League in 144, and mixed in unlikely characters such as the Phantom Stranger and Red Tornado to great effect. That the new villains he created were largely poor was of no concern when his use of existing ones was so deft, particularly the

Key in 150. The new hero he introduced, The Privateer, formerly a Manhunter, and the plots stemming from his appearances, were excellent. Any of Englehart's issues are worth a look, but they're interrupted by an average JLA/JSA and Legion of Super-Heroes team-up in 147-148. Gerry Conway wouldn't have been many people's choice to replace Englehart from 151, and he took a considerable while to settle in, but the unlikely plot of concluding loose ends from his cancelled Secret Society of Super-Villains series in 166-169 sparked something. He seemed to have tapped into the same conduit that had fed Wein, and from that point his plots were more inventive, and usually enjoyable. As was often strangely the case, among his best were the annual team-ups with the JSA. 171-172 was a locked-room murder mystery, and 183-185 was Conway's best ever use of Jack Kirby's New Gods characters, a cast he'd ritually abused in their own title.

Sadly, 183 was to prove Dillin's final issue. Never flashy but always solid, reliable, and versatile enough to be convincing no matter where a story was set, Dillin's art is woefully underrated. His replacement was George Pérez, who had considerable experience with superteams and relished packing his panels with as many characters and as much detail as possible. Seemingly thrilled at drawing the title, his best sample is a strange tarot-related story in 194, but the art is stunning on every issue he illustrates (184-186, 192-197). Sadly, the same can't be said for Don Heck and Rich Buckler, and their regular contributions appear to dissipate Conway's inspiration. The Secret Society of Super-Villains have a sprightly return in 195-197, but Conway's final decent issue is the celebratory 200. Many different artists contribute, a nostalgic joy being a return of pencillers Gil Kane to Green Lantern and Atom, Joe Kubert to Hawkman and Jim Aparo to the Phantom Stranger. The highlight, though, is Brian Bolland, in some of his earliest American work, illustrating a chapter starring Green Arrow, Black Canary and Batman.

With Conway off the boil and sales slipping, radical surgery was required, and it came in the form of the major characters being displaced by third-string heroes and new creations. Only Aquaman, Elongated Man, Zatanna and the returned Martian Manhunter remained from 233. The issues were a disaster, creatively and financially. The audience hated the new characters, and uncharacteristically DC gave the remaining readers what they wanted, with the decimation of the pretenders in the final four issues. Those were written by J.M. DeMatteis, and, all things considered, were a shabby end to what should have been a top of the line title.~WJ

JUSTICE LEAGUE QUARTERLY

DC: *17 issues 1990-1994*

At the height of their popularity the Giffen and DeMatteis version of the Justice League spawned this oversize publication featuring solo and group tales of the superteam, their associates and their enemies. There's a fair amount of decent material, starting with 1's eighty-pager, with Booster Gold forming a new team, the Conglomerate, who appear to be a model of efficiency when compared with the League. 3-12 usually have Mark Waid writing the lead, although his best is the costumeless back-up 'When Titans Date' in 10, a generally excellent issue. When JLQ is bad, though, it's appalling: witness Paul Kupperberg and Don Heck's reduction of parody patriot General Glory to the level of the stories he was conceived to lampoon in 15. Oddly enough, though, Kupperberg redeems himself in 16 with a touching story amid more half-assed homages. The Praxis series running in 11-15 chugs along nicely until a stupid concluding episode, 3's mini-Justice League has excellent art from Mike McKone (also artist on 5), most of the assorted Fire and Ice shorts are worth a look, and Phil Jimenez and John Stokes provide stunning artwork for a Maxima solo in 17.~WJ

JUSTICE LEAGUE TASK FORCE

DC: *37 issues 1993-1996*

After the *Zero Hour* series, the Justice League was split into three titles, supposedly to represent different aspects of the 'Justice' in the title. *Justice League Task Force* began life as a UN police force, sent into trouble spots or assigned to investigate potentially dangerous organisations. J'onn J'onzz, the Martian Manhunter, provides the backbone. Little's been done with him for years and he links the team to the past. He's shown as a clever if manipulative leader, ideally suited to managing young heroes. The original premise creates a new group for each mission and the first story-line featured Nightwing, Flash and Aquaman. 5 and 6 tie into the Batman series 'KnightQuest: The Search', with Gypsy, Green Arrow and Bronze Tiger helping Bruce Wayne find a kidnapped doctor. 7 and 8, written by Peter David, have an all-female team investigating a race of lost women. Bizarrely, J'onn J'onzz, as leader, feels compelled to become a woman for the duration of the mission! Around 16 the permanent team of Gypsy, The Ray and L-Ron/Despero start to coalesce. This issue ties into the other *Justice League* titles and introduces Triumph, an original League member who's been missing (and apparently forgotten) since the League's first adventure. The next issue provides a recurring villain in Vandal Savage, and by 21, with Christopher Priest writing, they're all in matching costumes doing traditional superhero team stuff. Up to this point Sal Velluto had provided a real sense of continuity through his artwork. Though the overall quality is dependent on the skill of his inkers, Velluto's style (somewhere between Gene Colan and George Pérez) gives the series a distinctive look. However, from issue 25 Ramon Bernado takes over the art chores, with a style far too close to Sal Buscema's to have much merit of its own (even if you like Buscema). Later issues rely on traditional DC team plots: fights for leadership, members being tried for criminal activity. They even end up crossing over with Travis Morgan, The Warlord and having a 'land that time forgot' adventure in 34-36, at which point another revamp of the Justice League titles was announced, resulting in the title's cancellation.~NF

JUSTICE MACHINE

Noble: *5 issues 1981-1983*
Texas: *1 Annual 1984*
Comico: *29 issues, 1 Annual, 1 Summer Spectacular 1987-1989*
Innovation: *3 issue miniseries 1990, 7 issues 1990-1991*
Millennium: *3 issue miniseries ('The Chimera Conspiracy') 1993*

The Justice Machine was and is artist Mike Gustovich's baby. The original series in magazine size proved popular enough to spawn a role-playing game and accompanying sourcebook, but issues are so difficult to find that when the series was picked up by Comico in 1987 Gustovich decided to ignore past continuity and start again from scratch, with Tony Isabella handling the script.

The Justice Machine are the government enforcers of the unsubtly named planet Georwell. After meeting up with Earth's Elementals (who débuted in the Texas annual) in issue 4, *Justice Machine vs The Elementals* (1986), they begin to question their orders and when they push too far find themselves framed for treason. After that, it's time to team up with their former enemy, Maxinor, for Justice Machine vs the evil regime, via Earth, where the rebels have allies. The basic idea might not be the most original, but along the way the comic addresses issues of where you draw the line between heroic freedom fighters and evil terrorists. It also tackles drug addiction (Justice Machiner Demon's powers are derived from drugs to which he is addicted), albeit in a way which makes you feel you're being preached at rather than offering much advancement to the plot. Mostly, though, the Comico issues are a competent superhero romp, nothing special but a satisfying, easy read. The Innovation miniseries and subsequent seven issues, and Millennium's miniseries, are poorer quality and best avoided.~JC.

JUSTICE SOCIETY OF AMERICA

DC: *One-shot ('The Last Days of...') 1986, 8 issue limited series 1991, 10 issues 1992-1993*

Allegedly under instructions to eliminate the venerable Justice Society of America from continuity, writer Roy Thomas, rather than killing them, created the contrived one-shot. In order to stop a rip in time eliminating All There Is (what, again?), the JSA'ers sacrifice themselves to an eternal limbo of fighting the battle of Ragnarok over and over again, forever (or at least until DC relented and wanted them back). Lame, but at least his heart was in the right place.

The 1991 series is set in 1950, towards the end of the JSA's original run in *All-Star Comics*, and is a real treat for ageing nostalgists everywhere. The team's immortal enemy Vandal Savage sets out to forcibly regress the world to the Bronze Age, eliminating the 'blights of modern life', which include electricity, atomic power and – gasp! – television. The artistic tag team of Mike Parobeck, Rick Burchett, Tom Artis and Grant Miehm evokes the style of the 1940s stories with a modern vitality, and Len Strazewski reveals a previously unsuspected skill and finesse in plotting and characterisation. Critical and commercial support was such that an ongoing contemporary JSA series was launched. Strazewski returned as a writer and Parobeck became sole artist. The series intelligently and unflinchingly addressed issues many readers had raised, such as whether the heroic ethos of the JSA was outdated or if a group of (on average) septuagenarian superheroes could be effective. It was also a big, splashy, witty adventure deftly put together, and the finest hour for both Strazewski and Parobeck. Although selling adequately, the title was cancelled when the powers that be decided that kids didn't want to read stories about old guys, and the JSA were more or less irrevocably destroyed in *Zero Hour* – a decision that revealed a contemptible attitude towards characters, and readers, over the age of 30.~HS

JUSTICE TRAPS THE GUILTY

Prize Comics/Headline Publications: *92 issues 1947-1958*

One of the few crime comics to survive the introduction of the Comics Code in April 1955, *Justice Traps The Guilty* was another Joe Simon and Jack Kirby foray into the lucrative and popular field of crime fiction. Supplementing their flagship title, *Headline Comics*, which had converted from a superhero/action title to a "True Crime" format in the same year, it began well enough, with Joe and Jack producing well-crafted and thoughtful anthology shorts, aided by their regular team of co-workers, which included Will Elder, Mort Meskin, Jerry Robinson and John Severin, and the likes of Al Feldstein and Bernie Krigstein popping in for the occasional guest shot. The greatest difference between the two titles is a concentration on fictional crime that, as the issues progressed, became somehow less realistic as plots moved in to areas owing more and more to the action/adventure costume dramas they had supplanted. Although they started off well enough, by the twentieth issue, Simon and Kirby were producing less and less material themselves, and the stories lost the feel of being there that was probably due to Kirby's childhood in the slums of New York. Also, a number of lesser artists began to illustrate a greater proportion of the short stories that made up each issue as the big guns were moved around to Prize's other titles. The comic ran until the dissolution of Prize Comics in 1957 and Kirby's return to Atlas/Marvel, although for the last twenty issues, his presence is undetectable.

The numbering is incredibly confusing. The first issue is Volume 2 Number 1 and each volume comprises six issues until the final issue, Volume 11 Number 2, at which point the title limps on as nondescript western *The Fargo Kid* for three further issues.~WW

Recommended: vol 2 No 1-6, vol 3 No 1-3

JUSTY

Viz: *9 issues 1988-1989*

Tsuguo Okazaki's sparse artwork, with its emphasis on facial expression and character, is what defines the quality of this manga. Justy is an agent of the Galactic Patrol with super-psi powers. With his sister Jerna and companion Lieutenant Trever, Justy must fight pirates and renegade espers. Not first-class but well worth reading.~NF

K

The K CHRONICLES

Manic D Press: *1 volume (Dances With Sheep) 1997, 1 volume (Fear of a Black Marker) 1999*
Top Shelf: *1 volume (What A Long Strange Strip It's Been) 2002*

Single page takes on subculture and city-dwelling in 1990s San Francisco. *The K Chronicles* is a syndicated strip first run in *The San Francisco Weekly* by cartoonist Keith Knight. Much of the reference may be outside all but a local reader's scope but Knight is very good at slapstick and comic timing too. Its value as a social document can't be ignored as easily as Harvey Pekar's introduction to the first collection.~SW

KABOOM

Awesome: *3 issue miniseries 1997-1998, 3 issue miniseries 1999*

Awesome's version of Impulse. Geof Sunrise turns 16 and is given these enormous gloves that draw on the energy of the 'Kaboom Cycle'. That's all you need to know, except that Jeph Loeb and Jeff Matsuda handle it with a light touch, and it's all good, clean fun. Each issue comes in a bewildering variety of covers, so don't be fooled.~FC

KABUKI

Caliber: *One-shot ('Fear the Reaper') 1994*, 6 issue miniseries ('Circle of Blood') 1995*, one-shot ('Color Special') 1996*, one-shot ('Dreams of the Dead') 1996*, 4 issue miniseries ('Masks of the Noh') 1996-1997*, 3 issue miniseries ('Skin Deep') 1996-1997**
London Night Studios: *1 issue ('Dance of Death') 1995**
Image: *9 issue limited series 1997-2000*, one-shot ('Dreams') 1998, 2 issue microseries ('Images') 1998, 12 issue limited series ('Classics') 1999-2000, 8 issue limited series ('Agents: Scarab') 1999-2001, one-shot ('The Ghost Play') 2002*

A future Japan is bursting with criminal types following the Communist takeover of Hong Kong and invasion of the Triads. The Noh is a secret government organisation dealing with gangster excesses and government corruption by turn, to keep the country's delicate economy in balance. It's run by an aged general who's officially dead, and staffed with shapely female operators, chief among these his own granddaughter, Kabuki, who kills mercilessly with a pair of scythes (then gets cut up about it later).

After introducing the character in 'Fear the Reaper', writer/artist David Mack settles down to the extremely serious business of recording her origin and epic fight with her father, the old general's Yakuza son, in 'Circle of Blood'. The repetitious nature of the storytelling here is only a prequel for a series of miniseries, which will move the character on not one jot. Whole specials will be spent watching her wallow in guilt and anguish, albeit prettily. Mack has a lot of storytelling quirks that make the story's pacing jerky, and a number of drawing quirks, which also stand in the way of your enjoyment. And later on he manages to employ artists with similar ticks. His strangest habit is to put lingerie catalogue style shots of the various agents posing with their weapons where you'd expect to see them slicing and dicing, while they describe what they're done to various villains. Altogether there are far too many stiff splash pages and 'symbolic' full-page layouts with 1970s style floating heads and images melting into each other. It's like looking at Paul Gulacy circa Sabre being advised by Steranko on particularly 'trippy' pages.

At Image the art becomes even stranger. A series of artists contribute odd chapters, pin ups, or simply employ half a dozen styles in the same issue, including execrable pencil crayon stylings of the sort twelve year old girls consider artistic. And guess what, Kabuki's undergoing psychoanalysis, allowing us to relive her past all again in even more loving detail. Never has one creator made so much money out of having literally one story idea.

Caliber also produced a 'Gallery' with pin-ups by various artists. Image reprinted most of the Caliber and London Night material in 'Classics'. 'Dreams' reprints the 'Color Special' with 'Dreams of the Dead', and 'Images' reprints the first three Image issues. 'The Ghost Play' is produced in mixed media (including photographs of a timorously posed model) and is, frankly, atrocious. There are, finally, four issues of 'Reflections' (1998-2002), which contain pinups, sketches, work in progress and commentary.~FJ

KABUKI AGENTS

Image: *8 issue limited series ('Scarab') 1999-2001*

Kabuki agent Scarab relates her life story from sassy teen to deadly assassin. It works far better than regular issues of *Kabuki* because David Mack only writes, meaning his wretched storytelling isn't an issue for once, enabling what plot there is to shine through. The artist is Rick Mays, whose rapid blossoming after a shaky start is a joy to behold, although he slips near to Mack layouts for the final issues. Fans of *Kabuki* will be pleased that at least one mystery is cleared up here, but there's really no way in for the novice reader.~FP

KAFKA

Renegade: *6 issue miniseries 1987*

A modern thriller, *Kafka* is an ambitious work with experimental elements to both story and art. Steven T. Seagle's script is full of silences and gaps that need attention and Stefano Gaudiano's art-style owes much to Hugo Pratt, and though expressive is somewhat uncontrolled and inexperienced. The story concerns a criminal who undergoes experimental treatment at the hands of the CIA before being given a new identity after testifying against some terrorists. Overall, a well-written, thoughtful attempt to bring European sensibilities to American comics.~NF

KAKTUS VALLEY

Fantagraphics: *1 issue 1990*

Bizarre and quite frankly rather poor collection of material from people who could do much better. The intention appears to have been to produce a comic for children, but it's doubtful children came near this, and those who did surely wouldn't like the scratchy artwork from the two most notable contributors, Gary Panter and Mark Beyer.~WJ

KALGAN (the Golden)

Harrier: *1 issue 1988*

Veteran comic book artist Ron Tiner's art on this title looks as stiff and stilted as the story, adapted from an E.C. Tubb short, about a strange space pirate who has paid a terrible price for his immortality. And what might that price be, you ask? Well, what do immortal characters always whine on about? Not so much SF Classic as the cover proclaims, more SF also ran.~FJ

KAMANDI

DC: *59 issues 1972-1978, 6 issue miniseries 1993*

This was Jack Kirby's most successful series for DC. He'd moved there amid great fanfare in the early 1970s, having made the largest contribution to the foundations for Marvel's lasting success. He immediately set to work on a grand saga encompassing four titles. Within two years every portion was cancelled or neutered, yet this, the simplest of his titles, outlasted everything else he created for DC by some considerable distance.

An unspecified great disaster (known as The Great Disaster) had rendered Earth a barren wasteland. In introducing this concept Kirby went one better than

The Planet of the Apes and bestowed sentience on a selection of the animals still populating the world. Others were mutated into huge and frightening versions of their previous forms. Most humans have been reduced to the state of animals, with Kamandi apparently the sole human to retain his intellect. This is due to his avoiding all contamination through having being raised in a bunker, Command D, from which he also derived his name. He wanders the globe, usually with a trio of mutated humans led by Ben Boxer, and the intelligent dog, Dr Canus, encountering different mutated animals. There's the possibility of danger with every step, and Kirby's inventive mind creates an astounding array of life-threatening situations. While it goes without saying that Kirby supplies a fine portion of action (at an unusually frenetic pace) the old master is surprisingly adept at conveying the tender and wistful moments, making Kamandi more than just another fantasy comic. Kirby drags the reader along from adventure to adventure, with simple plots – like helping an intelligent dolphin across land to water (21) – taking an issue once Kirby has unleashed the assorted menaces. Mood is an important factor, as is mystery, with Kirby only dropping the first hints as to what The Great Disaster was in 16.

Kirby left with 40 and the tradition was adequately maintained by Gerry Conway and Chic Stone. Towards the end of his run Kirby seemed to be losing interest, providing skimpier and skimpier plots, and Conway beefed up the stories. Another of Kirby's creations, Omac, dropped by in 50, but Kamandi's unlikely saviour was writer Jack C. Harris. Harris took over the series with 52 and proceeded to raise it to its pinnacle. Many have tried, but few creators have managed to better a Kirby idea at DC, but Harris' plotting was excellent, and the art of Dick Ayers and Alfredo Alcala matched the plots. Harris even introduced a subtle humour to Kamandi in the form of dog versions of Sherlock Holmes and Dr Watson. The title was cancelled during a period of major cutbacks during 1978, and was certainly one of the sadder losses.

Kamandi was revived in 1993, bearing, in the new continuity-conscious atmosphere, an 'Elseworlds' label, thus indicating it wasn't to be considered part of the now rigid DC company-wide continuity. Writer Tom Veitch takes Kirby's disaster concept one step further and elaborates on his plots, giving Kamandi a possible origin (remember the 'Elseworlds' label). He's raised by a cybernetic mother, then sent on a quest to find the person responsible for the devastated Earth: Superman. On his journey he engages some unlikely allies and is pursued by Ben Boxer, no longer a friend, and his bio-mechs. It's a decent stab at the post-holocaust Earth, nicely illustrated by Frank Gomez and Mike Barriero, and the saga is continued in the *Superman* 'At Earth's End 'one-shot.~HY

KAMIKAZE 1946

Antarctic: *6 issue miniseries 2000-2001*

Ted Nomura's Families of Altered Wars switches theatre of operations to focus on Japan, telling tales of the alternate reality wherein the appearance of a counter-earth orbiting opposite ours leads to an extra-dimensional invasion and the extension of World War II by a year. Nomura's weaving of varied strands into a grand epic has received much praise, and if you're an aficionado there's thrills a-plenty, but there's nothing new added to progress the greater story. Japanese war philosophies of glorious destruction and the belief that all warriors are born to die are interestingly presented. Competent, and engaging, but definitely not the place for new readers to begin.~WW

The Legend of KAMUI

Eclipse: *38 issues 1987-1990**

A translation of Sanpei Shirato's ninja epic. Avenging sons, copyright wrangles over sword-techniques, and constantly shifting alliances. Many solemn quotes along the "War is hell" line, yet it's a restful issue if the count of severed limbs and heads is below twenty. It obviously has its fans, mostly martial arts enthusiasts to judge by the letter column, but the general reader is likely to find it unrewarding.~FC

KANE

Dancing Elephant: *31 issues 1993-2001*

Paul Grist's self-published detective comic is a class act. The story opens with the eponymous detective Kane returning to duty after the investigation of his killing a corrupt partner. Amid a climate of ill feeling the abrupt, confrontational detective makes no attempt to regain the confidence of his disgruntled colleagues, instead plunging into his work with near-maniacal fervour. The comic ably combines ongoing plotlines with satisfying individual cases as it slowly builds up a picture of life in the imaginary city of New Eden. The atmosphere is reminiscent of *Hill Street Blues*, unsurprising since Grist is a big fan who puts in a lot of little references for aficionados of the *Hill* to enjoy. Brutal murders are mixed with absurd criminal activities, including the superb silent-chase sequence in 5 as Kane's young partner Page hunts a man in a pink bunny suit.

Grist develops character slowly within the main thrust of the storyline, rarely showing scenes outside the world of work. His 'hero', Kane, barely appears for the middle issues of the run as police and mayoral policy clash when politicians want to make a show of how they've cleaned up the inner city against police advice. This leads to sniper attacks and an armed siege where the tension is cut through with moments of comedy. The annoying mayor gets his comeuppance in 22 when he winds up tied to the back of a monomaniacal hitman. The hitman is too punch drunk and set on a quest to rescue his first love that when he escapes the baddies he thinks the Mayor's pleas for release are some inner voice talking to him, a moment that mixes pathos with hilarity and a few nods to Frank Miller. Grist's sharp, minimal black and white artwork echoes Kane's brutal world-view. Keep your wits about you when reading: Grist uses some clever tricks to indicate flashbacks, fantasies and different narrators, which have befuddled people trying to skim through. Issues to 16 are now available as books, with more collections planned, and although on temporary hiatus, Grist intends to publish further Kane stories as individual books.~FJ

KAOS MOON

Caliber: *4 issues 1996-1997**

David Boller's very appealing clean and detailed art is the highlight, but by no means the sole virtue of this story about psychic investigator Katja Zakov. She's inhabited by inner personalities who project an astral protector, Kaos Moon, and is investigating the disappearance of odd skulls. There's a wealth of background about the cast in text features, enabling plenty of interesting stories, but sales seemingly only warranted four issues. Nonetheless, *Kaos Moon* should appeal to the *X-Files* audience. Katja is next seen in *Burning Circle*.~FP

KAPTAIN KEEN and Kompany

Vortex: *6 issues 1986-1988*

Bill White's Kaptain Keen is an impossibly large-jawed, clean-cut, generic superhero accompanied by a silent moose sidekick in an alternate version of Bullwinkle and Dudley Doright. It's the 'and Kompany' bit of the title that's the better strip, though, with Gary Fields' cigar-smoking, heavy-drinking and copiously swearing porcine superhero Superswine raising more smiles. White and Fields are both talented cartoonists, but it's chuckles and grins to be found here rather than belly laughs. Superswine later had his own title.~FP

KARATE KID

DC: *15 issues 1976-1978*

Strange attempt to cash-in on the mid-1970s kung-fu craze. Legion of Super-Heroes martial arts master Karate Kid becomes insecure with his role as a 'normal' human among superhumans (some of whom were the likes of Bouncing Boy and Matter-Eater Lad!) and exiles himself to the primitive twentieth century to 'find' himself. Regular *LSH* scribe Paul Levitz set up the first issue, then fled, leaving the next nine to the presumably pseudonymous Barry Jameson, and Ric Estrada's scratchy artwork hindered the first eleven issues. With 12 a new team made a conscientious attempt at a new direction, but it was too late. Immediate plot threads were cleared up in *Kamandi* 58, and long-term storylines were tied up in *The Brave and the Bold* 199.~HS

KATO

Now: *4 issue miniseries 1991-1992, 2 issue microseries 1992*

Green Hornet's companion steps out alone. In the Now continuity, this is the 1960s Kato, who made a series of Hong Kong action movies (in a nod to Bruce Lee, who portrayed the character on TV) after his American escapades. It's now the 1990s, and Mike Baron writes both series. The first takes Kato back to China where the monastery at which he was taught is under fire from government troops, and the second has him playing bodyguard to an obnoxious rock star under threat of assassination. Both are standard action adventure, with the more compact Val Mayerik-drawn second series, titled Kato II, better than the first, drawn by Brent Anderson.~WJ

KATY KEENE

Archie: *62 issues, 6 Annuals 1949-1961*
Red Circle: *33 issues, 1 Special 1983-1990*

Subtitled "The pin-up Queen", brunette model and actress Katy was created by Bill Woggon as a back-up for the Archie title Wilbur in 1945. Identical to any number of other leggy-girl comedy strips, her gimmick of reader participation catapulted her to stardom and numerous spin-off titles. Readers submitted their suggestions for costumes in the hope of seeing their names in print, designs arrived by the sackful, and Katy Keene has been imitated by hundreds of girl-targeted strips since. Woggon's ornate and decorative art style apart, Katy's stories had little to offer, being very lightweight romantic comedies in which she was squired by a succession of doll-like boyfriends. The occasional twist was Katy's chubby, bespectacled sister throwing a spanner in the works. Yup, *Katy* made *Millie the Model* read like Chekhov in comparison.

Unlike other girl strips, *Katy* never made even a token concession to the passing years. Her style remained resolutely 1946 right until the bitter end. Her fans knew what they liked, though, and they liked it a lot. Most of the time you could hardly follow the story for captions crediting 'contributing designers'. Under the Red Circle imprint Archie tried to update Katy for the 1980s, but despite some gorgeous artwork from Barb Rausch (a first-generation Katy fan) the series didn't gel. Reverting to reprints of the classic material with the occasional new strip, the title enjoyed a moderately successful run.~HS

KA-ZAR

Marvel: *Series one 3 issues 1970-1971, series two 20 issues 1974-1977, series three 34 issues ('The Savage') 1981-1984, Graphic Novel ('Guns of the Savage Land') 1990, one-shot ('Sibling Rivalry') 1997, one-shot ('Ka-Zar of the Savage Land') 1997, series four 20 issues 1997-1998*

Not only did Marvel have four goes at a title starring their blond, low-rent Tarzan and his pet sabre-tooth Zabu, he also starred in the first twenty issues of *Astonishing Tales*. First time around the series reprinted Ka-Zar stories (pronounced Kay-sar, true believers) from the original *X-Men* and early issues of *Daredevil*, including a run-in with Spider-Man. Yes, Ka-Zar was one of the many lame-brains J. Jonah Jameson persuaded to beat up the wall-crawler. There are also all new back-ups featuring Hercules (1) and the Angel (2-3). The second series, set in Ka-Zar's Antarctic jungle home The Savage Land, suffered from an ever-shifting creative roll call. After a less than distinguished start under Don Heck, John Buscema and a selection of inkers turned him into a peroxide Conan, and Russ Heath drew beautiful scenery but uninspired action in 8. At the end of the run writer Doug Moench made efforts to involve readers in a multi-issue plot more complex than the usual 'wizard sets monster on Ka-Zar, Ka-Zar kills monster' fare audiences had been suffering, aided by Val Mayerik's sensitive but warty artwork. Mayerik looked much more at home in the 'Tales of Zabu' backup in the third series, where he hardly drew any human beings. The title was cancelled mid-fight, the storyline being finished off as a footnote when the X-Men visit the Savage Land in issue 114 of their own title.

Chuck Dixon and Tim Truman's attempt to breath some life into the character is just mad, and drawn by Richard Villagran in an overwrought, over-coloured style. The 'Guns of the Savage Land' graphic novel has Ka-Zar banished and feral in his English castle, almost raping his wife Shanna when she comes to visit to report strange goings on in Africa, where some mercenaries, who want to exploit its resources, have discovered another entrance to the Savage Land.

When reviving *Kazar* yet again, third-series writer Bruce Jones swiftly introduced new characters and a new origin for the Savage Land, and lost the hyphen. Most significantly, however, he had Kazar act like a grown-up. You know something's good when 1 opens with the muscular Lord Plunder questioning the point of his existence. Jones develops the plot swiftly but the many fights and revelations are merely dressing for the stormy and very adult relationship that springs up between Kazar and his sometime companion Shanna the She Devil. With Brent Anderson handling the pencils and co-plotting 1-15, including an epic Dante's Inferno storyline, Kazar enjoyed a golden period. With 16 Ron Frenz took over and, while entertaining and often whimsical, the stories thereafter were never quite so involving, no matter how much Jones tried to wring the readers' hearts as Kazar and Shanna suffered trauma after trauma. For the fourth outing the theme was jungle tales of marital harmony as Kazar and Shanna married and produced a sprog – yet another heartstring for plotters to tug on. This series climaxed as an ancient race of warrior women, the Bhadwuans from Atlantis, turned up and claimed the Savage Land as part of their heritage. This predictably led to quite a lot of fighting drawn in a really ugly, angular fashion.~FJ

Recommended: Series three 2, 10-12

Mr. Monster's Gal Friday KELLY

Image: *3 issues 2000*

You don't want to bother yourself worrying about whether they have spilled Mr Monster's growth serum on his dried werewolves, or trodden on a gangster cockroach, or the silly Alan Moore script and beautiful Alex Toth pin-up in 3. The nub here is surely: Which do you like best? Kelly's classic movie star shape, the matronly breast of incompetent harridan temp Babs, or the chubby milkmaid charms of Kelly's hapless niece Mary Monster?~GK

KELVIN MACE

Irresponsible and violent P.I. played deadpan by Ty Templeton and Klaus Schoenefeld, but loaded with gags. Schoenefeld was an excellent artist, but died before a third issue.~FP

THE KENTS

DC: *12 issue limited series 1997-1998**

Presumably in order to commercialise his history-heavy Western John Ostrander ties it around Clark Kent's 19th century ancestors, with the Superman logo very much to the fore on covers. The history unfolds through family letters uncovered by Pa Kent, who fills gaps with research. Brothers Nathanial and Jeb Kent move from Boston to Kansas in 1854, a period of frontier justice, civil war and bitter recriminations. Having researched extensively, boy, does Ostrander let the reader know it, with seemingly no detail omitted, and no character too recondite to mention. It all bogs down the essence of the story, which distils to the conflict between the brothers, 19th century Zeligs, encountering almost every Western legend of actual note or DC continuity. Artists Tim Truman and Michael Bair (1-8) and Tom Mandrake (9-12) hold their end up, and the merit far outweighs the meretricious, but *The Kents* is very hard going at times.~FP

KEYHOLE

Millennium: *4 issues 1996-1997*
Top Shelf: *2 issues (5-6) 1998*

Interesting mix of travelogue, autobiography, self-inspection, observation, a daft superhero, and, bizarrely, true tales of financiers from Dean Haspiel and Josh Neufeld. Both artists improve throughout the run and their combined broad tastes ensure this selection is worth a look. The shift to Top Shelf sees a reduction in format to slightly smaller than traditional comic size, and 5 is the best issue, as Haspiel details the origin of his scars and Neufeld relates an edifying trip to Thailand. The financial tales are available collected as *Titans of Finance*, while the brutal Billy Dogma also has a collection.~WJ

Recommended: 5

KICKERS, INC.

Marvel: *12 issues 1986-1987*

An intensifier process gives four members of a football team (plus one spouse) increased strength. They decide to use their powers for good by setting up a foundation (with tax-exempt status, natch) and thus *Kickers, Inc.* is born. Various assignments come through the foundation, mixed in with football games and politics, and it's all thoroughly boring and pointless. The creative team kept changing from issue to issue, but none of them managed to breathe life into the idea.~FC

KID BLASTOFF

Slave Labor: *One-shot 1996*

Very basic adventure about a dumb jock chosen to be a superhero and the smart girl who keeps getting him out of trouble when he realises there's more to it than looking good in tights. By Evan Dorkin and Sarah Dyer, this untaxing stuff originally appeared in *Disney Adventures* the year before.~FJ

KID CANNIBAL

Eternity: *4 issue miniseries 1991-1992*

Sadly the wit of the cover tagline "He came. He Saw. He Ate... Everything" is largely internally absent as *Kid Cannibal* adheres strictly to the teenage horror movie template in which the beautiful and sassy heroine survives as all around her are consumed. If you're a straight to video horror movie fan you might want to investigate, otherwise don't bother.~FP

Western Action Starring KID CODY and The COMANCHE KID

Atlas: *1 issue 1975*

A cliché-ridden story starring Kid Cody, Gunfighter, was backed up by an equally fatuous tale of the Comanche Kid, a white boy brought up by Comanches. Both featured prominently on Atlas' house ads, but such was their lack of appeal they only ever appeared the once. "Comics Are Entertainment", proclaimed those ads. This wasn't, despite Doug Wildey art on the lead.~APS

KID COLT, Outlaw

Marvel: *229 issues, 3 Giant-Size 1948-1968 (1-139), 1969-1979 (140-229)*

As the legend above many stories had it "... years ago Kid Colt killed an outlaw in self-defence! But being young and foolish, he fled, instead of staying to stand trial! Since then he has spent his life trying to atone for his mistake!"Through the decades the comic never strayed far from this premise. Early issues were drawn by the likes of Syd Shores before Jack Keller became regular penciller in 25, a position he held for the next two decades. While Marvel almost threw in the towel, then revolutionised the medium, Keller's solid, but unremittingly pedestrian style remained the same. By contrast the various one-off back-up strips produced most of the interest with artists like Al Williamson (57-60, 66, 88, 89), Reed Crandall (64, 65) and Gene Colan (110, 114) acquitting themselves well. For much of the time Keller was paired with writer Stan Lee, and he made the occasional attempt to introduce a bit of the Marvel style in the 1960s. 110, for instance, introduced Iron Mask, an armour wearing bandit who went on to become something of a nemesis to the Kid, despite being as menacing as a dustbin. 116 featured Dr Danger and the Invincible Gunman, but since the former's terrifying power was being able to throw his voice it's no wonder the fans didn't clamour to see him again. Before cancellation with 139 Keller was replaced with Dick Ayers and Vince Colletta, and Lee with Gary Freidrich, but to little effect. While the cancellation was unsurprising, the revival 18 months later was astounding. Particularly as it lasted another decade reprinting stories that were anachronistic even when originally drawn. That, though, is the enigma of *Kid Colt*. It was the only Marvel comic to be published from the 1940s almost to the dawn of the 1980s, in Keller it boasted their longest serving artist on a single title, and the Kid himself was their most successful Western character. He would also star in *Gunsmoke Western*, *Two-Gun Western*, *All Western Winners*, and augment Two-Gun Kid and even the Avengers, and was always dull.~DAR

KID DEATH & FLUFFY

Event: *One-shot ('Spring Break Special') 1996, one-shot ('Legends of...') 1997*

Unfunny gross-out-fest featuring small psychotic boy with guns and his cyborg killer dog. A comic with little to recommend it.~DB

KID ETERNITY

DC: *3 issue miniseries 1991*
DC/Vertigo: *16 issues 1993-1994*

The original Kid Eternity was an adolescent boy who could conjure up historic figures by shouting the word "Eternity"and was accompanied by a benign old spirit called Mr Keeper. His adventures were whimsical fun, light and innocent, making him, therefore, prime material for the late 1980s trend at DC to recreate any character they could as a grimmer, grittier, more horrible version of the old. Kid Eternity fared better than some. The miniseries, written by Grant Morrison and drawn by Duncan Fegredo, keeps the character's origin – taken to heaven by mistake, sent back to Earth with fantastic powers to compensate – more or less intact. Except that it wasn't heaven he was taken to but hell, and the historical figures he summoned were actually demons (as was Mr Keeper) who just thought they were olden-days heroes. At the start of the miniseries, he's been trapped in hell for the last thirty years, as a result of which he's grown his hair, started wearing dark glasses and swears a lot. He enlists the help of a drunken and dying stand-up comedian to accompany him to hell, free Mr Keeper and set the world to Karmic rights by breeding the next generation of "ascended children". In other words, it's pretentious twaddle. It's better, though, than the continuing series by Ann Nocenti, largely drawn by Sean Phillips, which just tries to be pretentious, falls far short of the mark and doesn't even have the advantage of being nicely drawn. Do yourself a favour and stay well away.~JC

KID'N'PLAY

Marvel: *9 issues 1992*

Rappers Kid'n'Play star in a retelling of their rise to stardom written as if a TV sit-com. Sharply observed by Dwight Coye, with pleasing art from Chuck Frazier and Ron Boyd, it's very much a timepiece, though. Look back and laugh at the hilariously outmoded street talk, styles and behaviour. 2's morality play rather disturbingly equates dope and alcohol with the road to perdition.~FP

KID SUPREME

Image: *3 issues 1996*

Based on Superboy, this is a sometimes amusing series by Dan Fraga. Poor Kid Supreme just wants to lead a normal life, but then one of his teachers turns into a lizard and Kid has to fight him, and after that more murdering super-baddies turn up. Fraga's cutesy art has all the hallmarks of an early era Image superhero title, i.e, small waists and enormous chests, and you should see the women! It works well as a masturbation aid for 13 year old boys and those who don't get out a lot. It's a shame about the lame plots, especially some of the unnecessary black humour in 3, which let down the whole fun aspect of the series. 4 was published as part of *Asylum* 9.~HY

KID TERRIFIC

Image: *1 issue 1999*

Cute black and white comic about a small boy with superpowers, who spends his nights protecting Earth, on this occasion, from a rogue moon whose planet has left him for Stella, a binary star. This comic has a lovely child-like quality, and it's a shame there was only one issue. Escapist fun.~DB

KIEF LLAMA

Fantagraphics: *6 issues ('Xeno-Tech') 1988-1989*
Oni Press: *One-shot ('Gas War') 1999*

Human woman Keif Llama is a low-level government operative at some unspecified time in the future when humanity has mingled with hundreds of alien races. That aspect accrues Matt Howarth some credit for imagination, as his species slime, ooze, float and stomp off the page. His plots are heavily science based, often requiring explanation clogging a story, and they're at the expense of developing Llama beyond a vehicle for the stories. Every issue can be read individually and at least one is worth sampling if you're at all interested in science-fiction.~FP

KILGORE

Renegade: *4 issues 1987*

The idea of taking Sgt Bilko, planting him in World War II, restoring his hair and adding a Ronald Colman-style moustache is a pointless one, and Kilgore never develops enough character to progress from it. The concept is so obviously appropriated, and it falls way short of the material that inspired it, although there's a commendable variety of stories within the setting. Kilgore as army wheeler-dealer works best in 2's Hollywood sequences, although the best issue is 4, heavily Bogart-influenced and less dependent on Kilgore's character.~WJ

KILLER

Eclipse: *One-shot 1985*

Collecting some of Tim Truman's pre-*Grimjack* work, *Killer* contains two stories produced for gaming magazines and one collaboration with the legendary Gardner Fox. The latter is a red-blooded sword-and-sorcery adventure with monsters and beautiful women in distress. For Truman completists only.~NF

KILLER FLY

Slave Labor: *3 issue miniseries 1995*

A dwarf clown in an unknown and, one suspects, unknowable circus falls in love with the violent knife-thrower's wife and tries to save her from her husband by spiriting her away, with the help of a mild-seeming boy who, when angered, turns into a giant fly. However, this unlikely trio soon discover that the freedom offered by escaping from a world in which they're reduced to ciphers is transient. It sounds preposterous, but this story has more in common with David Lynch at his strangest (and indeed Moebius' partner in crime Jodorowsky) than many comics one could name. Chris Butler writes with a fierce intensity and rare understanding of human nature. Artist Chris Hogg matches him frame for frame with bold, twisted graphics. An excellent combination: Angela Carter meets José Muñoz.~FJ
Recommended: 1-3

KILLER PRINCESSES

Oni Press: *2 issues + 2001 to date*

Faith, Hope and Charity live in a sorority on campus, whilst also being lethal assassins. They're tricked into a trap whilst a mysterious opponent invades their house looking for the location of the Sorority's island headquarters. This is an odd mix of spies and comedy from writer Gail Simone, as our dumb, pampered heroines actually appear to be too stupid to live. Lea Hernandez' sketchy artwork is occasionally ill defined, but otherwise meets the pace and tone of the script. Billed as a three issue miniseries, the final issue has yet to be published.~NF

KILLING STROKE

Eternity: *4 issue miniseries 1991*

Mediocre collection of short horror tales from British creators, although the surreal and inspired 'Floppity Bunny's Hellish Nightmare Visions' by Molly Eyre and D'Israeli (3) is worth seeking out.~WW

KILLPOWER, The Early Years

Marvel UK: *4 issue miniseries 1993*

The none-too-smart musclebound hitman and Genetix rumble back and forth through past and future, encountering Pharaoh Rama Tut, the Punisher and a mutant-populated wasteland. Pointless stuff.~WJ

KILLRAVEN

Marvel: *One-shot 2001, 6 issue miniseries 2002-2003*

In the one-shot Joseph Michael Linsner delivers a homage, turning in one of those quiet solo interlude stories that occasionally ran in Killraven's *Amazing Adventures* series, with Killraven awakening a girl from suspended animation. It's drawn in Linsner's usual stilted, but lush style, lacking much other than close-ups and figures. The miniseries is that strangest of beasts, a re-telling. Writer/artist Alan Davis has taken the original characters and some of the original story and re-modelled them into a new take on the tale of futuristic gladiator Killraven, his band of freemen and their battle against invading Martians. Davis and inker Mark Farmer have fashioned an accomplished and fearsomely polished superhero strip, but in the process some of the original's subtlety and intensity has been lost. Original writer Don McGregor may have been somewhat verbose, but his *Killraven* had an inventiveness and humanity that Davis' less sophisticated superheroics simply cannot match. So ultimately this must rank as a disappointment.~DAR

KILLRAZOR

Image: *1 issue 1995*

Martial art expert, Razor leaves his mystical sect of assassins. Well, the others can't have that, can they? Certainly not, so off they go to kill him. Unfortunately for them they don't count on protruding and expandable blades emerging from Razor's arms. Naturally he sees off all his ex-buddies, aided and abetted by his new anvil-shaped chum and beautiful girlfriend with large tits. What more could you possibly ask for from an all-action Image title? Well a decent plot and good storytelling would be a start.~HY

KILROY IS HERE

Caliber: *One-shot (0) 1994, one-shot ('Revelations') 1995, one-shot ('The Short Stories') 1995, series one 10 issues 1995-1996, one-shot ('Daemonstorm') 1997, series two 1 issue 1998*

Kilroy appeared in assorted Caliber anthologies (collected in 'Short Stories') as an enigmatic protector of the oppressed throughout the 20th century. The first series fleshes him out as a gloomy immortal hunted by heaven and hell, and it all devolves into something rather silly by 5 (mistakenly numbered 4 on the cover). Having dealt with that, though, writer Joe Pruett turns his attention to the then recent events in Yugoslavia and produces the best Kilroy story in 6-8. Using one of humanity's more shameful moments of recent years as a backdrop could be construed as offensive, but Pruett weaves Kilroy into them in passionate fashion, never

trivialising and never insensitive. Main artists Ken Meyer Jr and Mike Perkins are also commendably restrained. Sadly, the trick isn't repeated with Phil Hester drawing Kilroy in Somalia for 10. 'Daemonstorm' ties into the series of the same name, which runs through other Caliber titles. Perkins is on form, but the comic is tosh. Pruett starts the second series intriguingly with Kilroy experiencing a breakdown, but it was never concluded.~WJ
Recommended: 6-8

KIMBER Prince of the Feylons

Antarctic: *2 issues 1992*

So taken was Gregory Lane with the lead character of a strip shown by Japanese artist Mitsuda Hirishito during a school visit, that years later he asked to produce American stories starring Kimber. He's an elf-cat hybrid with a destiny earning him powerful enemies from the future. Lane's art is very promising without being quite the finished article, and his story blends elements of *Star Wars* with elf fantasy for an okay read if you like that sort of thing. Planned as eight issues, only two appeared.~FP

KIN

Image: *6 issue miniseries 2000**

A wounded Neanderthal, Bob, is found by Alaskan park ranger, Elsbeth Leaky, ensnaring her in the intrigues of a secret government agency hunting for the advanced technology that Bob's people have developed through the ages. Bob and Elsbeth are aided by a rogue agent, Trey, whilst her father sets off on his own mission to locate his now officially missing daughter. Creator, Gary Frank, throws lots of familiar elements into this James Bond-like action adventure, but it's tautly scripted and drawn and won't disappoint fans of the genre.~NF

THE KINDRED

Image/WildStorm: *4 issue miniseries 1994*

Back in the days when Team 7 was a story still waiting to be told, this miniseries reunited three of the surviving members (Lynch, Grifter and Backlash) and was produced by Jim Lee, Brandon Choi, Brett Booth and Sean Ruffner – a WildStorm hall of fame roll-call. Jack Lynch and Alicia Turner are kidnapped by a mysterious group calling themselves The Kindred and Backlash is recruited to rescue them, with Grifter tagging along for the ride. The trail leads to Caballito, an island populated by evolved sentient animals, The Kindred, who were created as a result of test trials for the Gen-factor, the source of Team 7's powers. The creatures want revenge for the way they have been treated, and the team are left to fight their way free. Not as good as the real *Team 7* stories that followed, but it was, at the time, a welcome taster and a competent action tale.~JC

KING LEONARDO and His Short Subjects

Dell: *3 One-shots 1961-1962*
Gold Key: *4 issues 1962-1963*

Based on a TV cartoon that ran between 1960 and 1962, invented by Mandrake artist Fred Fredericks, the Dell one-shots have no number and are issues of their ongoing *Four Color* series. Leonardo is a lion who is also the amiable monarch of the cartoon kingdom of Bongo Congo. He and his aide, a skunk named Odie Cologne, have their hands full with Biggie Rat's constant plots to dethrone Leo and replace him with his rather dim brother Itchy. Charming and witty, it's truly a cartoon strip among cartoon strips.~SW

THE KING OF PERSIA

Accordian Press: *One-shot 1996*

Bizarre fairy tale book by Walt Holcombe. The King of Persia (the most un-regal being imaginable) falls in love, but his true love falls ill. To cure her he must obtain an emerald from a secret land and so on. Holcombe's cartooning is delightful and expressive and there's a joy in the incongruous whimsical elements he includes in his panels. Overall, though, the seemingly stream-of-consciousness nature of the story renders it too quirky.~WJ

KING ZOMBIE

Caliber: *2 issues 1998*

A continuation of the *Deadworld* stories, wherein a mysterious calamity kills most of the world's population only to resurrect them as mindless flesh-eating zombies. King Zombie is a rarity in that he has retained his intellect and is well on the way to becoming the master of the world, if he can only stamp out all the magicians and living human resistance units. Tom Sniegoski and Jacen Burrows flounder in an uncomfortable and unwieldy meshing of science fiction and supernatural thriller, which substitutes gore for plot and action for character.~WW

THE KINGDOM

DC: *2 issue miniseries 1999*

Mark Waid's sequel to the dark future universe introduced in *Kingdom Come* is most notable for the introduction of 'Hypertime' – DC's latest excuse to explain away the lingering continuity screw-ups left over from *Crisis on Infinite Earths*. Simply put, time works in such a way that any number of alternative timelines can exist simultaneously, enabling anything to happen anywhere, whether a logical sequence of events preceded it or not. In other words, it's a hack's dream excuse. Pre-Crisis, nothing ever needed to be this complicated. Never mind though because *The Kingdom* is entertaining enough, with competent pencils from Mike Zeck. The two issues do stand alone, although they bookend a series of one-shot spin-offs focussing on individual characters affected by the events: Kid Flash, Nightstar, Offspring, Planet Krypton and Son of the Bat. All are worth a look; *Offspring*, with art by Frank Quitely, is the best of the bunch.~JC

KINGDOM COME

DC: *4 issue miniseries 1996**

Approximately twenty years into the future of the DC Universe, the world is a much bleaker place. Superman has turned his back on the human race to live in seclusion, and most of his generation of heroes followed his example and retired. But the new generation of 'heroes' is an ever-increasing threat to the survival of the world. Largely deprived of opposition, the surviving villains having retired or fled, they spend their days in violent conflict with each other, heedless of the harm done to civilians. When one such incident causes a nuclear accident that wipes out the state of Kansas, Wonder Woman forces Superman to emerge from retirement and lead the older heroes against their own rebellious offspring. This is not a simple battle of the generations, though; Wonder Woman has her own agenda, of which Superman is unaware, and Batman may get caught in the crossfire between them. Astonishingly, this fully painted series lived up to much of the hype. Alex Ross and Mark Waid's story is complex and intriguing, although sharing many sparking points with the Squadron Supreme limited series. The reader is left guessing about characters' motives just long enough, the characterisation of the lead triumvirate is strong, and there are endless fascinating bits of side business and subplots – often expressed wordlessly in the background of panels – achieving a satisfyingly multi-layered feeling. More importantly, one feels genuine shock at some of the final conflict, and the ending doesn't seem anticlimactic, which is the major flaw of so many intended 'blockbusters'. The lavish and detailed artwork by Ross withstands the inevitable comparisons to *Marvels* with credit. *Kingdom Come* knows its limitations: it doesn't aspire to be *Watchmen* or *The Dark Knight Returns*. It's mainstream superheroics, and proud of it, but it's probably one of the finest examples of mainstream superheroics ever.~HS
Recommended: 1-4

KINGDOM OF THE WICKED

Caliber: *4 issue miniseries 1996-1997**

Quality spin on the old theme of writers becoming trapped in their own creations. Chris Grahame is a successful children's book writer who suffers from persistent headaches and eventually blackouts. He is increasingly

---

* Available in a collected edition

drawn, in his dreams, back to the fairytale city of Castrovalva, a fancy he'd created as a lonely child, but grim, bloody reality has tainted his city. He must uncover the secret of and defeat the Great Dictator to save his own life in the city and the real world. An excellent exploration of the mechanics of myth and the responsibility of creation by Ian Edginton and the always excellent D'Israeli.~WW
Recommended: 1-4

KINGS IN DISGUISE

Kitchen Sink: *6 issue miniseries 1988**

A young teenager runs away from home during the depression of the 1930s intending to find his father. What he finds instead is an education in the company of an eccentric hobo dying of tuberculosis. Freddie Bloch witnesses the desperation and intolerance of humanity, and the lengths to which those with power will go to protect what they have, however little it might be. Writer James Vance and artist Dan Burr vividly evoke an unhappy period in American history, yet Vance is knowing enough to leaven the unrelenting hardship with comic moments as the naïve Freddie grows into an adult. The collection also includes material from *Dark Horse Presents* 42.~FP
Recommended: 1-6

Robert E. Howard's KINGS OF THE NIGHT

Dark Horse: *2 issue microseries 1990*

Bran Mak Morn unites the warring British tribes against the Romans by promising they shall be led by an independent king. And guess what, the legendary King of Atlantis (presumably not named because Marvel still have the comics licence for Kull) is pulled through time. And he's just in time for the second issue's big battle. Dull, dull, dull.~WJ

KISS

Dark Horse: *4 issues* + 2002 to date*

After the pretentious tedium of *Psycho Circus* any *Kiss* comic that actually focussed on the band members was guaranteed success, and so it's proved. Here the glam-metal grandads are cast as the superheroes their make-up aspired to, once legendary, now retired and separated, as writer Joe Casey draws liberally from the group's history. Of course they must be reunited, and so they are at the end of 3. But there's a surprise about one of them in 4! It's mindless old tosh.~WJ

KISS Psycho Circus

Image: *31 issues 1997-2000*

Spawned by the mighty Todd McFarlane during a pissing competition with Gene Simmons, the most repulsive man, if mere man he truly be, in rock, this awesome comic is so true to the spirit of America and the world's most exciting showband it makes your balls hurt! In a way, it's true to say, as he would say himself, that Todd just took the band's logo and look and changed a lot. Ace, Paul and Peter were Space Ace, Star Child and Cat Man, and were changed to Celestial, Starbearer and King of Beasts. Gene gets to stay as the Demon, having won the pissing contest. The Godlike versions of the band inhabit the scarred bodies of sad clowns and other performers in the travelling circus that visits, lo, towns as small as yours or mine, taking under their wings hurt confused kids like any of us. While they look kind of demonic, they are only actually interested in punishing the truly wicked. Brian Holguin's scripts are intelligently filled with secret references to Kiss song titles and other poetry literature. Also there are good visual in-jokes such as children playing with Spawn toys. Angel Medina's eye-bulging pencils are a great tribute to Michael Golden, who even drew the first few covers himself. One of the funny things is that the whole comic is anti-drugs, but if you'd ever taken drugs you would probably think that it was a really druggy comic, full of mindblowing M. C. Escher type stuff. There is no sex until 18 when the new artist, Clayton Crain, takes over, paying great tribute to Berni Wrightson. Thereafter it is nearly all sex, or at least a lot of arses and tits, even getting on the cover by 30, and no "adults only" warning! Kewl! Except when it's really creepy and about child molestation. 1-12 were reprinted in five magazines also featuring articles and lots of ads for merchandise, but neglecting to complete the 'Destroyer' story. Don't worry, though because three trade paperbacks cover up to 19. That's mostly without sex, remember.~GK

KISS & TELL

Burbank Studios: *3 issues, 2 mini comics (1½, 2½) 1995-1996*
Sirius: *1 issue 1997*

Eclectic autobiographical comic detailing the horrors of romance and other relationships as related by Patricia Breen and a number of artists. Subjects range from the demise of *Elfquest* comics, the narrative merit of blows to the testicles, Nuclear terror and obnoxious teachers, but the real gem is the powerfully moving story of Breen's troubled school days in the Catholic educational system from 3. The only problem is the woefully substandard art, mostly perpetrated by Breen's best friend Gene McDonald. The Sirius issue expands the concept into anthology mysteries and short stories with creator Breen and various artists. 'The Pathological Pennsylvanian Python', drawn by Ethan Van Sciver, is a spooky childhood fable, as is the excellent 'Dis' of the Spiderwoman, or Harlot's Web', with art by Walter Crane. 'The Scorpion and the Raincoat' is a charming chiller by Breen and Arthur Mahlon, but the cream of the crop is 'Shell to Pay – the Portrait of a Young Turtle as an Artist' by Patty and Walter, which won the 1996 Pittsburgh 24-Hour Comic Contest. Impressive and enjoyable.~WW

KISS OF DEATH

Acme: *2 issues 1986*

Adaptations of horror stories and some original material, all drawn by John Watkiss in fine contrasting black and white. It's dark and moody stuff, though the writing is occasionally overwrought, and Gene Colan is an obvious artistic influence at times. Originally planned as three issues, a one-shot publication titled *The Last Kiss* concluded matters.~FP

KISSING CHAOS

Oni Press: *8 issue limited series 2001-2002**

This has a decent plot about the silent Angela, romantically besotted with Damien, who also knows Raevyn. All three are running away from something, in Damien's case a murder, and the story plays out to a well set-up conclusion. Unfortunately, a modicum of plot drags on far too long without the variety and characterisation to render it absorbing. Arthur Dela Cruz is a good artist, reminiscent of Sam Kieth, but renders his story largely as eight issues of talking heads, and his choice of greytoned art adds to the claustrophobic effect. The collection features one new segment, and several short pieces involving the cast gathered from anthologies, but none add anything.~FP

KISSYFUR

DC: *One-shot 1989*

This is based on what appears to have been a junior cartoon version of *Pogo*, with the saccharine title indicating the worst of 1980s animation produced when the censorship department ruled. The comic, though, deals with some unhappy topics in telling a simple story with some very nice cartooning by Liz Rathke. Any young child should enjoy this.~WJ

KITCHEN SINK/TUNDRA Graphic Novels

It's not until they're considered as a list in their entirety that one realises that, volume for volume, Kitchen Sink's graphic novels, both originated and acquisitions, matched the quality of those from any other publisher one cares to select from around the world. Furthermore, with few exceptions, most notably the inherited Skin, each of them is accessible to and suitable for anyone of adolescent age and up. The cornerstones of the line were the works of Will Eisner, who transferred the rights to DC with Kitchen Sink's demise. A pioneer in popularising the graphic novel (a term he apparently coined) in the USA with *A Contract With God*, over

* Available in a collected edition

the past twenty years he's continued to produce thought-provoking stories. There are similar themes running throughout his works, most emphatically an optimism about life, the way in which people interact in cities, and a possibly over-sentimental view of the past, but in making a reader care about basically decent human beings he's the Frank Capra of comics. Anyone starting to read Eisner with even one of his lesser works would probably be charmed and captivated. His inordinately expressive artwork shimmers with movement and characterisation, and they're fine starting points for the non-comic-reading public.

Eisner's best story is *Dropsie Avenue*, reworking an idea used to lesser effect in *The Building*, that of taking a metropolitan area and charting its progression over a century. It's as if Eisner was unsatisfied with the previous attempt and decided to correct the faults. Incorporating themes of racism and integration, human greed and urban planning, along the way it also tells some fine stories. It pushes all the right emotional buttons, and the ending ought to bring a lump to the throat of all but the most cynical. *The Building* covers very similar territory in a far less successful manner, although it's still immensely readable due to Eisner's deft characterisation. *A Life Force*, originally serialised in *Will Eisner's Quarterly*, is an even earlier work covering much the same ground, even using Dropsie Avenue as its setting. The incorporation of newspaper clippings and correspondence, and some odd storytelling sequences, render it far less satisfactory. Try other Eisner first and come back for *A Life Force*. *New York* expands the horizons of Eisner's observations beyond a neighbourhood to aspects of the city in the present day. Told largely in one- to three-page, often silent vignettes, with wry punchlines, Eisner's evocations of the minutiae of city life charm and captivate. They're not as satisfying, though, as his longer work. *City People Notebook* utilises previously unpublished research sketches, many of them produced for *New York*, and Eisner works them into short strips. There's the same bittiness, although the art is top-notch.

The Dreamer is a slim autobiographical recollection, detailing the early days of comics in the 1930s. It has an appeal beyond that to comics historians, as Eisner details his early days as a comic artist, from the struggling hopeful to the man ready to make a career jump. He's caustic in detailing the shoddy goings-on, and while the identity of many figures is transparent, there's a level of enjoyment to be had in guessing who others might be. *To the Heart of the Storm* is similarly autobiographical, but a work of far greater depth. As a young man travels to join the troops in the early days of the USA's involvement in World War II the sights he passes on the train prompt recollections of family history. Very episodic and less sentimental than many of Eisner's other works, it also confronts racism far more overtly than his other material. *Life on Another Planet* was Eisner's second attempt at a graphic novel. Originally serialised in ill-advised eccentric fashion in Eisner's *Spirit* magazine, it works far better collected. It takes as a theme the first signal from outer space, and the panic and other reactions it engenders. Lacking the subtlety of later work and decidedly trivial in places, it's a contradictory affair by also being far more knowing and darker than any of his other work, and markedly distrustful of authority and big finance.

A Contract With God was Eisner's first graphic novel, originally published in the mid-1978 by Baronet, but later part of Kitchen Sink's line. For a twenty-five year old step into the unknown it remains an affecting and powerful work, although the storytelling is occasionally clumsy and unrefined as Eisner stretches into a new format. It's a snapshot collection, remembered best for the title chapter, but the most affecting chapter is entirely uncharacteristic for Eisner, detailing the downfall of an unpopular and lonely building superintendent in a totally unsentimental fashion. *Invisible People* is a similar look at the lives of individuals, weaving very different but equally compelling stories about three undistinguished individuals faced with a crisis in their lives and the choice they make. Eisner's final Kitchen Sink graphic novel was *Family Matters*. Seemingly a deliberate exercise in answering critics who find his outlook too sentimental, it's a bleak tale of a family gathering for the first time in years, and their unsavoury pasts being stripped back in turn. Although at times an excellent character study, the against the grain relentless nastiness renders it transparently contrived, and it's an awkward piece.

Artist Michael Ploog was heavily influenced by Eisner, and his adaptation of Frank Baum's Life and *Adventures of Santa Claus* is a career peak. Richly and stunningly rendered, elves, goblins and giants have never looked so appealing. Anyone not charmed by this has no further reason to live. And the same applies to anyone who can't laugh at Harvey Kurtzman's *Jungle Book*. Originally published in the 1950s, post his editorship of *Mad*, Kurtzman turns an even more venomous pen towards TV detectives, magazine publishing, Westerns and the Southern states, where an ability to read is enough to prompt a lynching. For many it was his last sustained triumph, and his 1980s collaborations with Sarah Downs, *Betsy's Buddies*, collected from *Playboy*, are far less satisfying. Carol Lay's collection *Now Endsville* is a skewed look at life with a strong fantasy element. She has a delightful cartooning style, and the mixture of caprice and observation in the 'Story Minute' is wonderful. In twelve panels, they're short modern fairy-tales, and largely unpredictable to boot. On the extended strips, though, she's not as deft, with the quirky ideas obstructing plots, but not strong enough to compensate. The title story in particular drags long before the end, but 'Invisible City', part ecological fantasy and part whimsy, is far stronger. Lay's second collection is better. There's a larger selection of 'Story Minute' strips, and the title strip, 'Joy Ride', is excellent, hanging on the idea of fat people being able to hire the personality of others to trim their bodies. Her third, *Strip Joint*, is all 'Story Minute' strips, and equally good.

James Robinson and Phil Elliott's *Illegal Alien* is a charming story concerning a dead American gangster being possessed by an alien, who then travels to Britain to stay with relations of the body he's inhabiting. They're pleased to find him a seemingly reformed character, and he transforms their lives, most particularly that of the adolescent Dino. It's a successful evocation of 1960s Britain and exciting and suspenseful to boot. Successful period evocation also applies to Jack Jackson's *Lost Cause*. Subtitled 'The True Story of John Wesley Hardin', it's actually far wider in scope, recounting a complex feud that initiated Hardin's notoriety in mid 19th century Texas. Hardin only comes to the fore two-thirds of the way through. Jackson's research was comprehensive, but the minutae of detail crammed into the narrative (often in the form of naming bit players), and tracking a multitude of characters makes the story difficult to follow at times. As historical reference it's a series of incidents lacking a compelling plot, and while very worthy is unlikely to find a wide audience.

The Acid Bath Case, is a mannered and surreal story of people murdered in their bathtubs. The eccentric art of Kellie Strom is ill matched with Stephen Walsh's writing, which in turn strives too hard to shock seemingly just for the sake of it. Also strained is David Chelsea's *Welcome to the Zone*, a Manhattan populated by mutants going about their business for the day. Utilising an enormous cast it's part satire, part fantasy and altogether a disappointment, as is Erez Yakin's *Silent City*, a series of appallingly muddily printed black and white toned illustrations telling a preposterously simple story of state brutality. One feels every sympathy for Yakin apparently having to live through such conditions, but this dull narrative doesn't disturb or stimulate in the manner intended. A far better European graphic novel is *Armed and Dangerous*, a sleazy and sweaty 1950s crime thriller from Mezzo and Pirus drawn in an odd hybrid style that combines elements of Charles Burns and Steranko among others. Hawks of the Sea is of minor historical interest for being a very early newspaper adventure feature by Will Eisner, but had it been by anyone else it wouldn't rate a second glance, let alone a lavish hardcover reprint.

As Tundra was merged into Kitchen Sink, so were that company's graphic novels. Those bearing the Heavy Metal imprint are allocated a separate entry in this book, but more powerful than any of them was *Skin*. It's the story of a thalidomide skinhead. Brutal and offensive, writer Peter Milligan pulls no punches in a passionate script, without salving political correctness. Martin hates the world and decides to extract vengeance on the company responsible for his affliction in the only manner he knows. Artist Brendan McCarthy matches the brutality of the script, creating an escalating mood by forgoing panel borders, and Carol Swain's well-considered colouring is also vital to the atmosphere. Tundra also brought *Hugo Tate*, Nick Abadzis' comics road movie. It's an introspective look at America as Hugo accompanies a gun-toting hard man on a delivery across the USA. His growth as a person is signified by the strange method of an increasingly rendered face, but it's an engrossing and rewarding read. Bo Hampton's adaptation of the Washington Irving story *The Legend of Sleepy Hollow* is beautifully painted, but unlikely to thrill anyone today.~FP

Recommended: *A Contract With God, The Dreamer, Dropsie Avenue, Hugo Tate, Illegal Alien, Invisible People, Joy Ride, Jungle Book, The Life and Adventures of Santa Claus, Skin, Strip Joint, To the Heart of the Storm*

3 Little KITTENS

Broadsword Comics: *3 issue miniseries ('Purrr-fect Weapons') 2002*

Jaguara, Catress and Kitty Pop are the popular crime-fighters, the Kittens, funded by wealthy television star, Juliet. In this introductory series, a new anti-terrorist group, The Omega Stars, and a failed recruit to the Kittens, Latex Red and her Satanic Cheerleaders of Doom, try to compete with the Kittens for the public's attention, causing mayhem along the way. With dialogue commenting on his sacking from *Catwoman* and critics of his big-breasted women, this is a perfectly okay tale of comedy superheroes from creator, Jim Balent, but it's not going to win any awards for political correctness or characterisation.~NF

KITTY PRYDE

Marvel: *6 issue miniseries ('Kitty Pryde and Wolverine') 1984-1985, 3 issue miniseries ('Agent of S.H.I.E.L.D.') 1997-1998*

The first series prompts the thought "Whose idea was it to employ Al Milgrom as an artist?" Chris Claremont overwrites and Milgrom does what we might euphemistically call draw, as Kitty Pryde discovers her dad's involved with some evil Japanese gangsters. She presumes he's been strong-armed by the Yakuza. Setting off to deal with the matter without the X-Men's help, she's possessed by a demon ronin called Ogun or, as Wolverine puts it when he's recovered from Ogun's attempts to kill him, "by magic, or some form of psi-powers, he imprinted his psyche onto yours, created a sort of psychic clone of himself inside your skull". So now you know. Having failed to drive Ogun out on her own, she goes back to the US to enlist Professor X's help, much to Wolvie's disgust. When is it weakness to turn to your friends, and when is it wisdom? Claremont knows the answer and he's sure as hell going to make sure we do too by the end of this over-emotional nonsense. So complex had the Marvel universe become by the late 1990s that the second miniseries required a foldout cover on which to synopsise the background to the story before readers could be expected to understand it. This is perplexing because almost nothing happens. Kitty Pryde has to join S.H.I.E.L.D. because their computer system only recognises her voice due to a "glitch", and neither side is very happy about the situation. Larry Hama and Jesus Redondo do an entirely average job on a very thin idea. So scant is the plot that most of the pages are static, with occasional bursts of histrionics from unlikely characters to fill them up.~FJ

KNIGHT WATCHMAN

Caliber: *2 issues 1994-1995*
Image: *4 issue miniseries 1998**

A spin-off from *Big Bang Comics*, this is Tom King's version of Batman. Here written by Gary Carlson and Chris Ecker, the Watchman is forced out of retirement when his partner, Galahad, is injured and the villainous, Pink Flamingo appears to be gaining complete control of Midway City. Ben Torres' artwork is only just his own, owing as much as it does to Frank Miller's, more *Sin City* than *Dark Knight*, perhaps, but that might be the lack of colour. Very much a homage lacking a real sense of its own identity beyond its origins, but tough and endearing. Image 1 and 2 reprint the unfinished Caliber series with additional material.~NF

KNIGHTHAWK

Windjammer: *6 issues 1995*

Originally planned as a Continuity title, this shares all the trademarks of that company's titles: superb artwork coupled with unreadable stories. For what it's worth, Knighthawk himself is a sort of cross between Batman and the Angel, but the stories never rise above perfunctory, and the dialogue is quite appalling. This is offset, however, by the breath-taking art of Ernesto Infante (aided by Continuity founder Neal Adams), who manages to combine exquisite figurework with incredible dynamism. Interestingly, Knighthawk's alter ego is named after famed romance artist J. Scott Pike. What can it all mean...?~DAR

P. Sky Owens' KNIGHTMARE

Antarctic: *6 issues 1994-1995*

The sometimes confusing and often discursive story of top martial artist Gerrold Keyes, picked by a dying mogul to inherit his former superhero career as Knightmare. He's assisted by the daughter of his benefactor, who in turn experiences costumed adventures, and realises he has a pivotal destiny. A strange mixture of horror and comedy superheroics, there is an appeal here, particularly as Owens' art demonstrably improves issue by issue, increasingly influenced by Adam Hughes. 6 has a finish of sorts, but the promised conclusion in another title never seems to have appeared.~WJ

KNIGHTMARE

Image/Extreme: *5 issues 1995*

He was Mafia muscle, but then married and started thinking it was time to get out, at which point his boss sent a hit squad after his family. So now he's made it his life's mission to destroy the Mafia. He knows that it is a mission as insane and deluded as that of Don Quixote, his childhood hero, and in recognition of this he's based his masked costume on medieval armour and named his motorbike after DQ's horse. The Don Quixote theme is well handled by writer Robert Loren Fleming, who manages to introduce some imagination and humanity in the spaces left in Rob Liefeld's plotlines of Soviet warheads, Yakuza and demons. Still, it's a grisly, blood-spattered read, except for the scene in 3 where a hand is cut off with barely a drop spilled. Now that would have been a story: "How I made it in the Mafia despite having negative blood pressure." The artists (too numerous to name) are probably responsible for that particular stupidity, since they never display signs of intelligence elsewhere in the work.~FC

KNIGHTS OF PENDRAGON

Marvel UK: *18 issues 1990-1991*

Building on characters created by Alan Moore and Alan Davis in the ground-breaking Marvel UK comics of the early to mid-1980s, and by Roger Stern and John Byrne in *Captain America* 247-255, Dan Abnett and John Tomlinson attempted to create a very English corner of the Marvel Universe with Gary Erskine's first art. Combining the mystical threats with fairly heavy-handed environmental propaganda hindered what had the potential to be a cracker of a series. From the declaration on the inside front cover that the comic was printed on tree-friendly Scangloss paper onwards, the project was a bit too preachy to be fun and too unsophisticated to be taken as serious political comment. In short, it tried too hard to be relevant, ending up as the kind of story teenagers consider profound, but which leaves anyone else gagging.~JC

KNIGHTS OF THE DINNER TABLE

Alderac Group: *3 issues 1994-1995*
Kenzer & Co: *71 issues + (4-74) 1995 to date*

You've got to hand it to Jolly Blackburn. He found his niche and has stuck to it doggedly. The Knights of the Dinner Table are a group of five role-playing game enthusiasts, and the strips are largely conversations that occur during their game meetings. This enables Blackburn to utilise photocopies for the art, hence an admirably frequent schedule, if dull looking comic. While the strips have widespread appeal within the gaming community, they're not easily understood by anyone not of that persuasion. Occasions when the topics under discussion drop back into real life show that some of the many writers have a good grasp of the conventions of the humour strip, but this very much for the converted only. The scarce early issues now sell for over $200, but they are available three to an issue in ongoing compilations titled 'Bundle of Trouble', ten of which have been published to date, all including new material. Another compilation series of four issues to date, 'Tales from the Vault', gathers strips that originally ran in gaming magazines, primarily *Shadis, Dragon* and *Ritters*. A further series, *Knights of the Dinner Table Illustrated*, is a series of comics adapting the adventures discussed around the table in the original strips. To the non-gamer these are more interesting, and to fans there's the added bonus of seeing the series' regulars acting in character.~WJ

KNIGHTS ON BROADWAY

Broadway: *3 issues 1996*

Intended as a five-issue miniseries, this was cut off abruptly by the company's collapse. It's the story of Tamara Bryn Neil, the smartest girl in the world, who can see the future. Unfortunately, there is no future, unless she can save the world. But how does a toddler, even a brilliant one, save the world when her parents think frilly party frocks and cuddly toys are more appropriate to her than soldering irons and arc welders? This series skilfully illustrates the helplessness of a child, however gifted, in the face of parental opposition. Tam is appealing and vivid, as are her terrified and terrifying mother (whose actions, though deplorable, are understandable) and the formidable Diana Hopkins, Tam's nanny, and her only believer. Oh, there are also some perfunctory apocalyptic battle scenes, set in Tam's future and starring the Knights of the title, but they're easily skipped over.~HS

Everette Hartsoe's KNIGHTSHIFT

London Night Studios: *3 issues 1996-1997*

The Hellborne (the Morbid Angel, the Shadow Viper, Arizona and the Knightcross) travel to Hell to face Lord Anvil, and are joined in 3 by Poizon for no discernible reason. The first issue comes with a glossy cover. Rubbish.~NF

Operation: KNIGHTSTRIKE

Image/Extreme: *9 issues 1995-1996*

US supersoldiers battle evil Soviets and sadistic scientists in this lively and jingoistic Rob Liefeld creation, replete with the usual giant guns, muscles and explosions.~GK

KNOCKABOUT

Knockabout: *14 issues 1980-1987*

Knockabout began in modest fashion with an un-numbered British-style equivalent of the American underground anthology. It's long on enthusiasm, but desperately low on structure and plot, a problem affecting 1-6, all comic-sized issues. The best is 4, published as a fundraiser for one of Knockabout's sadly all-too-frequent appearances in court under the archaic provisions of Britain's Obscene Publications Act. That Knockabout won every case dIdn't appear to deter the authorities. By 4 Hunt Emerson had developed into an accomplished cartoonist, and his piece lampooning the ridiculous aspects of Britain's obscenity laws is the highlight, despite contributions from Gilbert Shelton, Robert Crumb and S. Clay Wilson. From this point Emerson's pieces throughout the run are delightful, whether dealing with the hapless Max Zillion, saxophone player extraordinaire, yet always ripped off, or Calculus Cat, he of the permafixed grin forever plagued by his television. Other notable contributors to early issues include Steve Bell, with pointed political satire, Cliff Harper, also contributing political strips, and Graham 'Pokketz' Higgins, whose excellent art was never quite matched with a decent script. Special mention must go to Mike Matthews, whose disturbing mix of sex and violence was obviously EC-influenced, but which contained material that would make even EC artists blanch. There's no 7 per se. Another court appearance necessitated the fundraising *Knockabout Trial Special* in its place. It must be the only publication in which you'll find the precise linework of Brian Bolland and the visceral stylings of Savage Pencil between the same covers. Other notable contributors include Phil Elliott and a text piece from Alan Moore, along with *Knockabout* regulars Bell, Harper, Matthews, and the inevitable Emerson. Despite good intentions it's very much a hotchpotch, although Pokketz' adaptation of a song, 'Drunken Uncle John', is a pleasant surprise.

With 8 *Knockabout* transformed into a large-sized paperback volume, each issue themed, which was probably conceived to add a needed structure to the comic without actually imposing editorial interference on the creators. Emerson continued to astound, never more so than with his contribution to 8's theme of 'Hell on Earth'. It's a Max Zillion strip in which Max signs a contract with the devil, including an astonishing four-page sequence detailing the ills of the world today in ghastly, thought-provoking clarity, yet still unmistakably in Emerson's style. There are at least two of his strips every time from 7, almost all gems. 8 contained the last of Bob Moulder's well-researched tales of historical obscurities, always interesting, but out of place among otherwise humorous content. By 10 *Knockabout* has settled into the formula for the final few volumes. Each contains some strips on the theme, a section reprinting old underground strips, part of Max's serialised *Peter Pank* (a punk version of *Peter Pan*, an odd idea that soon wears thin), and a section of non-themed comic strips. The latter category always included Emerson, along with a decent selection of Gilbert Shelton spread across all his characters, although the Freak Brothers and Fat Freddy's Cat dominated. Matthews continued to be an oddball contributor, Pete Rigg's strips hit the right humorous tone and Graham Higgins, whose art became ever better, managed some halfway decent scripts with Jack Alarum, eighteenth-century footpad, in 12 and 13.

Beyond Emerson and Shelton, the classics portion of every volume is almost always the most interesting. Kim Deitch's weirdness is in 10, there's Dave Sheridan in 11, an all too short Greg Irons spotlight in 12, Justin Green in 13, and Ted Richards' Dopin' Dan and 'The Forty Year Old Hippie' in 14. 14 also introduces the bizarre Edika, whose story of domestic strife is certainly unique. Beyond 14 *Knockabout* continued themed volumes, but issued them instead as collections. See below.~FP

Recommended: 8, 12-14

KNOCKABOUT Graphic Novels And Collections

Most Knockabout graphic novels are the work of Hunt Emerson, and rightly so. Due perhaps to an exaggerated bigfoot cartooning style he doesn't receive recognition commensurate with his talent, and should be revered as a national treasure. *The Big Book of Everything* collects Emerson's work from his earliest days in arts-collective publications to the assured and confident early-1980s strips for Knockabout (the only work anyone really needs from those issues). As well as detailing his progress over ten years, it's also hilariously funny, but later collection, *Rapid Reflexes* is even better. By the early 1980s Emerson could confidently lay down the most amazing and imaginative pages seen from a British comic artist since Ken Reid's 1960s heyday. His writing had developed to such an extent that almost every panel is a gag instead of leading up to one, although *Rapid Reflexes* also contains collaborations, and was more structured than previously. There's also a *Calculus Cat* volume and *Jazz Funnies*, collecting the downbeat strips starring Max Zillion, saxophonist. The former reworks the same theme (the pernicious influence of television – laudably produced by a man not possessing one) to good effect, but the strips are best sampled individually, as repetition dulls the effect. Max Zillion is a more individual and expressive strip, and also patchier. While some episodes are astounding, particularly that of Max loosing the demons of hell onto Earth, there's also a fair amount of meandering space-fillers.

Emerson's ability to fill a page with inventive visual gags is even more apparent in his graphic novels. *Casanova's Last Stand* is his best. From the double entendre title to the final expiration it's excellent. It's based in part on Casanova's memoirs: the great lover is recounting past exploits as he plots one final grand seduction. There's both sympathy and relish to the fore in the graphic-novel equivalent of the British seaside-postcard tradition. The version of *The Rime of the Ancient Mariner* reproduces the Coleridge poem, accompanied by Emerson's visual interpretations and asides. It's his only colour work, and the influence of *Krazy Kat* is greater here than elsewhere, but does the poem retain a contemporary appeal, even as depicted by Emerson? One suspects the choice of *Lady Chatterley's Lover* as Emerson's first graphic novel was not without a nod to the travails of his publisher, often in court on obscenity charges (and always acquitted). It's excellent, populated with an extraordinarily characterised cast and plenty of jokes, and Emerson manages to make a largely tedious novel (despite its notoriety) immensely readable. He also illustrates *Hard To Swallow*, the stand-up comedy routines of John Dowie, but it's an awkward mix, with the patter devoid of the personality live delivery offers and unsteadily fused to the art.

Outrageous *Tales From The Old Testament* was a side-swipe at Knockabout's court cases, highlighting the number of astounding, intolerant, violent and possibly obscene stories to be found in the Bible. Knockabout regulars Emerson, Rigg, and a stellar cast including Dave Gibbons (on a decidedly unsalacious Sodom and Gomorrah), Dave McKean, Kim Deitch, and combinations of Alan Moore and Hunt Emerson, and Neil Gaiman and Mike Matthews (whose scenes of carnage and degradation have to be seen to be believed) participate. Graham Higgins turns in a nice Samson, and overall it's a good chuckle, but not as amusing as the title might suggest, and in sum disappointing. *Seven Deadly Sins* is just that, each rendered as a tale, lovingly illustrated in comedic fashion. Emerson, Gaiman, Gibbons, Steve Gibson, Higgins, Matthews and Moore return, joined by Lew Stringer and Bryan Talbot for the best Knockabout collection. The pairings of creators is imaginative – each makes an effort – and there are few duff pages. Attention should be drawn to Jeremy Banks and Davy Francis' 'Anger'. Both are top cartoonists, consistently producing very funny material, and neither receives the recognition they are due. A tenuous thread connects *Seven Ages of Women*, issued to make the point that women cartoonists are marginalised, leaving talented female comic creators without a regular outlet for their work. There's no denying each of the contributors is a talented artist, but there's more to comics, and the cluttered layouts and storytelling of several are potentially off-putting when some editing might have made for a still better package. That said, on balance *Seven Ages of Women* hits the mark, with 'The Lover' by Julie Hollings, and Jackie Smith's 'Old Age', being standouts.

Knockabout's first graphic novel was Ralph Edney's *The Adventures of Lazarus Lamb*. Downbeat and uninspired, life disintegrates around Lazarus, but he still has the option of selling his soul. While a prescient treatise on what the 1980s would become to many, it's rambling and offers more laughs in throwaway asides than the main text. Finally there's *Thrrp!* Oh dear. Leo Baxendale is to British humour comics of the 1950s and 1960s what Jack Kirby was to American superhero comics of that era, having revitalised them. Sadly, Baxendale suffered similarly from exploitation, and while it's assumed that the terms of a secret out-of-court agreement granted him some restitution for characters still appearing and much merchandised, it can't have compensated for several decades of wait. He'd continued producing innovative children's strips throughout the 1960s and 1970s, his style metamorphosing all the time. By the late 1980s it had evolved to the point where Baxendale was drawing astonishing amorphous figures that almost wobbled on the page. Sadly, the writing was little more than a series of fart jokes extended over forty-eight pages. Whether he was making a point, or had lost the plot, *Thrrp!* was a decidedly unsatisfactory read. One *Fat Freddy's Cat* volume was also produced, and several *Fabulous Furry Brothers* collections, all dealt with under individual entries.~FP

KNUCKLES THE MALEVOLENT NUN

Fantagraphics: *2 issues 1991*

Knuckles graduated to her own short-lived title in 1991. Cornelius Stone and Roger Langridge's sacrilegious humour relies on surreal non-sequiturs and notes in the margins, peaking with outrageous outbursts of slapstick violence. The shorter pieces, haunting in their insanity, work best. The ongoing storyline, in which Knuckles' guardian angel (a penguin) and her pet fly attempt to rescue her from hell with the help of a hippy Jesus, strains the humour in places. If you like your fun cerebral but zany, get to know "God's hand grenade".~FJ

KOBALT

DC/Milestone: *16 issues 1994-1995*

For years, the non-powered vigilante Kobalt has terrorised the lowlife of Dakota City by maintaining a reputation as a "secret defender". Naïve young Richard Page daydreams of becoming a superhero. When Richard's dad, trying to scare him out of the idea, cashes in a favour and forces Kobalt to train Richard as an apprentice, hilarious consequences ensue. Or, at least they might have. But mostly not. Writer John Rozum never really develops Kobalt beyond the 'grim avenger' stereotype, and his current and former sidekicks, whether idealistic (Page), amorous (Clover), or twisted and homicidal (Harvest), are all more interesting than he is. Arvell Jones illustrates, competently but not in a manner to make one's pulse race with excitement. A stellar exception is issue 7, guest-illustrated by Jamal Igle, focusing on Page's adventures at high school – the same one Static attends – when a situation develops which demands the attention of both young heroes. Funny and astute, it makes you rather less appreciative of the rest of the run than you might have been. The series' end coincides with the end of both Kobalt and Page's heroic careers. They are operating out of their depth, and in an unexpectedly realistic conclusion to the book, that fact is brought brutally home to them.~HS

Recommended: 7

KOBRA

DC: *7 issues 1976-1977*

An interesting series about Siamese twins surgically separated at birth. One grew up to be a nice young man, but the other, Kobra, became leader of the evil cult that raised him back when evil cults in comics weren't a dime a dozen. Originated by Jack Kirby and carried through confidently by Martin Pasko, the plotline naturally concentrated on the brothers opposing each other. An unexpected twist actually had the good brother dying! The saga continued in *5 Star Super-Hero Spectacular*, and Kobra has been a recurring DC villain since.~HY

KONA, Monarch of Monster Isle

Dell: *21 issues 1962-1967*

Monster Isle is situated in a cavern beneath the sea bed, and contains a wide and varied form of indigenous wildlife, from giant insects to giant animals. Kona, cock of the yard, has his hands full protecting a group of adventurers from the isle's inhabitants. Giant insects and animals were the theme as further strange creatures turned up when the crew abandoned Monster Isle for the surface world. Sam Glanzman drew this bizarre series, and the oddly-written early issues are out-and-out tracts of survival philosophy for the most part. An acquired taste, with the early issues being the best.~SW

KONG

DC: *5 issues 1975-1976*

Along with DC's fantasy line came this attempt to upgrade the image of boring old caveman stories. This blond cro-magnon's strip is only noteworthy for Alfredo Alcala's nice art, the scripts never daring to rise above run of the mill.~FP

KONGA

Charlton: *23 issues 1960-1965*

Giant rampaging-ape comics. Steve Ditko adapts the 1961 movie for the first issue, in which nutty science transforms a chimp into a giant gorilla, and continues the good mindless fun until 16. Thereafter it's the appallingly lacklustre efforts of Bill Montes and Ernie Bache that see the title to cancellation.~WJ

KONNY & CZU

Antarctic: *4 issues 1995*

Konny is a floating shellfish, perhaps a winkle, whilst Czu is a neurotic caterpillar-like creature. They trade throughout known space as Harvest Ventures. The humourous and vaguely surreal adventures of these cosmic door to door salesmen are by creator Matt Howarth and collaborator D.M. Kister who bring no small amount of charm in these short stories, but the patience required to make head or tail of them sometimes outstretches the reward. The comics equivalent of celery.~SW

Edgar Rice Burroughs KORAK, Son of Tarzan

DC: *14 issues (46-59) 1972-1975*

Inherited from Gold Key, and continuing their numbering, there seemed to be a genuine pride at DC in ensuring that this licensed title showed up its ordinary predecessors (although the very early Russ Manning-created issues had been noteworthy). Editor Joe Kubert and writer Robert Kanigher deliberately differentiated *Korak* from their *Tarzan* work by adding a fantasy element to the stories, and it worked, as did Korak's 'origin' in 49. 46 has some nice Frank Thorne art, and Murphy Anderson drew a lovely Korak in 52-56, but later issues by Rudy Florese don't quite match them. The back-up strips were also well conceived and excellently executed, particularly the Carson of Venus feature by Len Wein and Mike Kaluta in 46-56. The title changed to *Tarzan Family* with 60, and Korak continued there.~HY

Recommended: 46-56

KORG, 70,000BC

Charlton: *9 issues 1975-1976*

Licensed from the Hanna-Barbera TV cartoon, this portrayal of a Neanderthal cave family dealing with the onset of an ice age features some of writer/artist Pat Boyette's best ever comics work. The subject matter really suited Boyette's rugged style, see 3's superb splash page for example. The simple language allowed for a strong functional narration that is the backbone of the series. Korg, his brother Bok, his wife Mara and their three children encounter giants, monsters and many other tribulations. They also befriend an early bowman in 2 and the beautiful Zoni in 5. Korg & Bok are lured away from their hunting in 9 and begin an adventure that takes them to ancient Atlantis. The rest of the adventure, sadly, never saw print. This is an above-average caveman comic if you like that sort of thing.~SW

KOSMIC CAT Activity Book

Image: *One-shot 1999*

The 'cute' comic relief from Deity is given an unusual spin-off, being as it's exactly what it says on the cover, and so owes more to the traditional British summer special than American comics. The puzzles and activities are hardly mind-expanding, but will probably provide a spell of peace for the comic reader with pre-pubescent siblings or children. The strips will be a little beyond their understanding, mind.~WJ

KRAZY KAT

Dell: *5 issues 1951-1952*
Gold Key: *1 issue 1964*
Eclipse/Turtle Island Foundation: *9 volumes (Krazy & Ignatz) 1988-1992*
Remco: *2 Volumes 1990-1991*
Fantagraphics: *2 volumes (Krazy & Ignatz) + 2002 to date*

Krazy is a cat of ambiguous gender in love with a mouse, Ignatz. Unfortunately, Ignatz despises Krazy and expresses this by throwing bricks at his/her head. Krazy in turn interprets this as a sign of Ignatz' love and cannot understand why Officer Pup tries to protect him/her from being hit by locking Ignatz in prison whenever he catches him with a brick. Beyond this bare bones situation lies the finest comic strip in existence. Creator George Herriman's skill with pen and word is consistently amazing. His location, Cokonino County, evokes the great American landscapes of the Grand Canyon, Monument Valley and New Mexico, yet there's a surreal element to the whole that creates a constantly shifting 'reality' where all sorts of odd things can happen. There's a large supporting cast that includes Kolin Kelly (millionaire brick merchant), Gooseberry Sprig (The Duck Duke), Mme Kwakk-Wakk, Joe Stork ("purveyor of progeny to prince and proletariat") and Gonzalo Gopher amongst others, but the basic triangle is always at the heart of each strip.

The books concentrate on reprinting the colour Sunday pages rather than the separate daily continuities, some of which can be found in *Comics Revue Magazine*. Each Eclipse volume includes a whole year's worth of strips, taking us from 1916 to 1924. The Remco volumes, subtitled 'The Komplete Kolor Krazy Kat', cover 1935 to part way through 1937. Remco decided to publish the Sunday pages in hardback editions (prompting a colour section in Eclipse's 7) but went out of business before finishing their projected seven volumes. Eclipse, too, had problems (and a rival publisher didn't help them, given that the colour Sundays, which they hadn't reached in continuity, had the greatest commercial potential) and didn't complete their projected series either. Fantagraphics have picked up where Eclipse left off with each volume covering two years of the strip (1925-1926 and 1927-1928 so far).

The Dell comics were only based on the newspaper strip. The storylines and artwork owe more to *Bugs Bunny* or *Tom and Jerry* than to Herriman, with the original situation only really referenced through the bricks that Ignatz seems obsessed with (insisting that Krazy paint bricks rather than flowers in 2) and that Krazy only sometimes seems to take pleasure in. Dell continued the strip with several issues in the *Four Color* series and the Gold Key issue is a reprint of Dell material.

Herriman's Krazy Kat is a constant reminder that comics as a medium can have literary value. His poetry and visionary graphics represent a peak of creativity which, while it has been rivalled, has never been surpassed.~NF

Recommended: Eclipse 1-9, Remco 1-2, Fantagraphics 1-2

KREY

Gauntlet Comics: *2 issues 1992*

The text of *Ivanhoe* and Robert E. Howard's *Kull* are plundered to tell the tale of a human raised by post-Apocalyptic mutants. He becomes their mightily thewed champion in the barbaric and oppressive human kingdoms. Good looking but vapid sword and sandals fare. Heavy metal mavens only.~WW

KRUSTY Comics

Bongo: *3 issues 1995*

Uncharacteristic lapse into mediocrity from Bongo's *Simpsons*-related line. Krusty is Springfield's surly celebrity

TV clown, always on the lookout for a fast buck. In this instance there's the opportunity to build a theme park as cheaply as possible on a nuclear waste dump, with predictable consequences. The plot is thin, the jokes are threadbare and the eccentric layouts dreadful. The title's good, though. Maybe The Levellers can use it.~FP

THE KRYPTON CHRONICLES

DC: *3 issue miniseries 1981*

This explored the history of Krypton, using Superman's ancestors as a focal point. Luckily they were all achievers in their chosen fields. Strangely though, the ancestors were dealt with in reverse chronological order, with the first of the El family appearing last in the series. Perhaps a bit confusing, but a must for Superman buffs.~HY

KULL and the Barbarians

Marvel: *3 issues 1975*

Short-lived black and white magazine, launched on the strength of *Savage Sword of Conan*'s popularity, featuring various characters created by Robert E. Howard. There's Atlantean warrior King Kull, Conan's sometimes paramour Red Sonja, and obsessive Puritan Solomon Kane. Few of the stories, some written by Roy Thomas, others by Doug Moench, often working from Thomas' plots, shine. 1 is a disappointing black and white reprint of *Kull the Conqueror* 1 and is probably the most polished piece on offer. Otherwise the art, by the likes of Pablo Marcos, looks rushed. Howard Chaykin's work on Red Sonja is loose and spirited, but looks as though it was intended for colour. Better material featuring these characters appeared in *Savage Sword* itself.~FJ

KULL the Conqueror

Marvel: *29 issues 1971-1978, 2 issue microseries 1982-1983, series two 10 issues 1983-1985*

Kull's the best Robert E. Howard hero after Conan, and God knows every Howard hero or heroine's had their own comic at some point. Set in a pre-Cataclysmic age, Kull's a proto-Conan, driven from his barbarian tribe for an act of weakness. The story starts when he seizes the throne of decadent Valusia in a bloody coup. Unlike Conan, Kull has to stay at home and worry about affairs of state. The main difference, though, is that Kull wears a vest. The first series, written chiefly by Gerry Conway, does little to differentiate between the characters. Kull's always going off to rid his people of some menace, and giant worms, octopodes, were-creatures and evil sorcerers loom large. If you've read all your *Conan*s until they're falling to pieces, this is the next logical title, with some tasty, clean art from John and Marie Severin in issues 2-10. The microseries is really two specials, one by Alan Zelenetz and John Buscema, the other by Doug Moench and John Bolton. Both writers are determined to make use of Kull's regal position. Zelenetz has him activate a curse while digging the foundations of a new civic centre (his choice of words, not mine), while Moench involves him in a politically expedient marriage and a gang of werewolves. John Bolton adds a delicacy to the art rarely seen since Barry Windsor-Smith's début on *Conan*.

Zelenetz obviously won the toss and gets to write the second series, which attracted richer artistic pickings, including Charles Vess, Bolton and Bill Sienkiewicz. He concentrates on political plots, develops stories around supporting characters, and has Kull spend as much time pondering the uneasy allegiance of his adopted subjects as he does hacking into eldritch monsters. Declining public interest in hefty men in fur boxer shorts killed the title after ten issues.~FJ

Richard Dragon, KUNG FU FIGHTER

DC: *18 issues 1975-1977*

Denny O'Neil's Richard Dragon creation was published far too late to make a good impression with early-1970s martial-arts fans. While the series never attained black-belt status, it did get off to a reasonable start with fairly decent stories and art (Jim Starlin 2, Jack Kirby 3, Wally Wood 4-8), but rapidly declined into mediocrity with O'Neil and regular artist Ric Estrada possibly at their worst. Supporting characters included the stereotyped black fighter, Bronze Tiger, who was later redeemed in the excellent *Suicide Squad* , and a female sword-swinging expert Lady Shiva – and she certainly did. Richard Dragon later became a major player in O'Neil's *Question* series.~HY

KURTZMAN KOMIX

Kitchen Sink: *One-shot 1976*

Harvey Kurtzman is one of comics' great stylists, but his genius was expressed in dribs and drabs in late-1940s throwaway comics before it was recognised at EC. This title collects assorted shorts from that period, all drawn in the inimitable Kurtzman gag style. Pot-Shot Pete is an inept sheriff, Sheldon is a one-page feature about a plain nasty tyke. *Hey Look!* experiments with the comics format in often surreal fashion. The *Hey Look!* paperback collects all this material and plenty more besides and is heartily recommended.~FP

Recommended

LA COSA NOSTROID

Fireman Press: *9 issue limited series 1996-1998*

Spin-off from *Scud the Disposable Assassin*, this series documents the rise and rise of mafia boss, Tony Tastey, and his attempt to kill all his enemies. It's also the story of Joe Cortese and his girlfriend, Alice, who ends up as Tony's wife. A black, violent comedy full of corruption and giant transforming robots, but it's not half as clever, funny or visually attractive as it needs to be.~NF

LA PACIFICA

Paradox Press: *3 issue miniseries 1995*

A pocket-sized-book mystery novel in three parts. *La Pacifica* motel is the site of a seemingly unprovoked mass shooting by a Vietnam vet. The only survivor of the massacre is co-owner Don Cooper, and once recovered he finds himself inexplicably compelled to investigate the circumstances of the vet's breakdown. The only lead is a woman, who moved to Las Vegas following the massacre. Shortly thereafter events repeat themselves, and she's again involved before moving on. Joel Rose and Amos Poe write a good imitation Hitchcock movie concerning a gradual obsession, including enough well-placed asides to divert the attention. Turkish-born artist Tayyar Ozkan complements a fine script with an astoundingly convincing evocation of the USA, both rural and urban. A very satisfying read.~FP

Recommended: 1-3

LA PERDIDA

Fantagraphics: *2 issues + 2001 to date*

Jessica Abel uses her experiences of living in Mexico to construct a story of Carla, a naïve American arriving in Mexico City. Translated, the title means "loss", although other than money paid for this, so far the relevance is not apparent. Neither is the meaning of the prologue in 1, which suggests dramatic moments ahead. The sooner the better, actually, just as one hopes the cast aren't based on Abel's own acquaintances as they're portrayed as arseholes to a man. At over forty pages an issue there's a lot of arseholes, and a lot of extraneous detail for a story that needs to get a bloody move on. The art is also problematical, with almost unwavering three-quarter figure viewpoint layouts and lots of superfluous lines and dark pages. Instead of disguising the deficiencies in figurework Abel is fully aware of, it draws attention to them, and she'd be far better off working in a less detailed style. There is the sense of striving for something, but a major payoff is required in short order to relieve the tedium.~FP

THE LAB

Astonish: *One-shot 2001*

Possibly the best completely computer-created comic to date. Not that the computer wrote it. That was the work of Scott Christian Sava, and he concocted a gag-packed tale about a trainee in a product-testing environment unlikely to pass the safety certificate. The art serves the story, rather than being the point of it, and it's stylish and funny, although one of the leads very much resembles Nick Park's Grommit. Get it sooner rather than later because the inevitability is that in five years it'll look hopelessly primitive.~WJ

LAB RATS

DC: *8 issues 2002-2003*

Six teenagers are taking part in an experimental programme. Essentially they're expendable guinea pigs when it comes to a military virtual reality machine (1), a Wonderland full of genetically engineered creatures out of fairy tales (2-3), a time machine that leads to a meeting with Superman (4-6) and a trip through hyperspace (7-8). John Byrne gives the traditional kid group a twist by crossing *Challengers of the Unknown* with *Suicide Squad*, but fails to make any of his characters interesting (admittedly not easy for the two killed within the first two storylines). The standard of drawing is still high, but the concept is unconvincing.~NF

LABMAN

Image: *1 issue 1996*

Based on Rudy Coby's TV series in which he plays the crime-fighting magician Labman. This tells the origin of Labman, including his discovery of four-legged chickens while he's held captive by shapely villainess The Hourglass. Drawn by Andy Suriano like a stylised cartoon, the strips are poorly paced and lack the wit they so desperately strive for. A proposed series never materialised.~NF

LABOR FORCE

Blackthorne: *4 issue miniseries 1986-1987*

Released at the height of the black and white comic glut, this execrable title was shoddily written by Greg Swan (who has the cheek to call himself "a methodical, careful creative talent" in a first-issue text piece), and crudely drawn by future Malibu Ultraverse penciller David Ammerman. Labor Force are a superhero team who operate as a business venture. They have a marketing consultant, and an accountant who watches the team's budget. Rather than use this promising premise as the springboard for a timely satire on 1980s money culture, Swan and Ammerman rush straight into a series of moronic superhero adventures that would be more at home in an amateur fanzine than in a supposedly professional comic.~AL

Hellblazer Special LADY CONSTANTINE

DC/Vertigo: *4 issue miniseries 2003*

This is set just before the French Revolution and features John's ancestor, Johanna Constantine, first introduced in Sandman. She seeks to regain the title her parents were stripped of as the Secret Service of King George III hires her to "acquire" a mystic box that can unmake the world. The task is complicated not just by rival governments seeking to possess it, but also by the deadly schemes of the cosmically suicidal, immortal witch, Lady Blacked and her deadly homunculi. It's a cracking old-fashioned, supernatural adventure romp from Andy Dinggle and Goran Sudzuka that also features the 18th Century Swamp Thing.

LADY CRIME

AC: *One-shot 1992*

A misleading title given that only one of the three stories here originally featured Lady Crime. Her 1940s series appeared in *Kerry Drake Comics*, where she steered impressionable people into criminal situations, as a result of which they would inevitably pay a terrible price. 'Murder for Pennies' here is from 8, 1948. 'The Aristocrat of Crime' (from *Down With Crime*) and 'Underground to Oblivion' (featuring Hitler) both have Lady Crime figures added to panels to provide narration. The excuse is a way of grouping several old Bob Powell strips together, but apart from that and curiosity about pre-code crime comics, the strips have dated badly.~NF

LADY DEATH

Chaos!: *3 issue miniseries 1994*, 4 issue miniseries ('Between Heaven and Hell') 1995* 4 issue miniseries ('The Odyssey') 1996*, 6 issue miniseries ('The Crucible') 1996-1997*, one-shot ('Death Becomes Her') 1997, one-shot ('Dragon Wars') 1998, one-shot ('Retribution') 1998, 16 issues 1998-1999, one-shot (Lady Death/Vampirella) 1999, 4 issue miniseries ('The Rapture') 1999-2000*, 3 issue miniseries ('Judgment War') 2000, one-shot ('vs Purgatori') 2000, 3 issue miniseries ('Dark Millennium') 2000, one-shot ('Untold Tales') 2000, 4 issue miniseries ('Tribulation') 2000, one-shot ('Love Bites') 2001, one-shot ('River of Fear') 2001, 4 issue miniseries ('Alive') 2001, one-shot (Lady Death/Bad Kitty) 2001, one-shot ('Mischief Might) 2001, one-shot (Lady Death/Chastity) 2001, 4 issue miniseries ('Last Rites') 2001-2002, one-shot ('Heartbreaker') 2002, one-shot (Lady Death/Jade) 2002, one-shot (Lady Death/Bedlam) 2002, 4 issue miniseries ('The Gauntlet') 2002, 2 issue microseries ('The Goddess Returns') 2002, one-shot ('Reimagined') 2002, 3 issues ('Dark Alliance') 2002*

For most of its existence a more witless and moronic comic it would be difficult to find. Débuting as Evil Ernie's object of veneration in his series, Lady Death is a pallid personification of the netherworld replete in ludicrous bra, stockings and panties, thus resembling an underwear catalogue model, not a single-minded demoness wanting to eradicate all life on Earth. The first miniseries, later referred to as 'The Reckoning' details how an innocent 15th-century teen is transformed into Lady Death. It sets the tone for the remainder, full of pitchfork-wielding villagers, burnings at the stake, and ludicrous dialogue bringing to mind the typical Hammer horror film. That's to rate this drivel too highly, though. Creators Brian Pulido and Steven Hughes deem any but the most basic story superfluous, provided there's plenty of posing and tottering about in fetish gear. The plots for the second, third and fourth series run as follows: Lady Death, seemingly invincible at the start, is brought to near breaking point before summoning the last vestiges of her strength to grasp victory from despair.

The ongoing series began in the same wretched manner, with David Quinn writing from 5, and the end of 'Judgment War' leaves Lady Death in charge of Hell. Beyond that it's business as usual with little plot, and no possible means of commercial exploitation unexploited, with team-ups, pin-up comics and merchandise galore, not forgetting those premium priced editions to really milk the suckers. 'Alive' is a quantum improvement. It has decent art from Ivan Reis, still tailored towards underwear and pin-up shots, and Lady Death is restored to Earth, but as a 21st century adult. From 'Last Rites' on John Ostrander writes the miniseries, and if not sparkling, coupled with Reis' art the comics at least attain a veneer of professionalism. For those really into Chaos! characters, Ostrander teams most in 'Dark Alliance', but the final chapters were not published as Chaos! folded.~FP

LADY DEMON

Chaos!: *3 issue miniseries 2000*

Grimly substandard tale as yet another Chaos! supernatural she-demon becomes human. Lady Demon inhabits a mortal woman, is involved with Covert Ops and the Mafia and then has to battle her own burgeoning humanity. Utter rubbish.~WW

Neil Gaiman's LADY JUSTICE

Tekno: *11 issues 1995-1996*
Big Entertainment: *9 issues 1996*

The spirit of Justice empowers young women who've been wronged by men (usually with some sort of crime involved) and, while now blindfolded, they exact bloody revenge for these wrongs. In each storyline a new woman becomes Lady Justice. The best thing about this series is the covers, all but the last by Daniel Brereton, who also supplies the final storyline 'Woman About Town' (6-8), the best of the series. What's gone before is rather simplistic and uninvolving and though Brereton really tries to make something of it, by now it's way too late.~NF

LADY PENDRAGON

Maximum Press: *1 issue 1996*
Image: *4 issue miniseries (1-3, 0) 1998-1999, one-shot 1999, 10 issues 1999-2000, one-shot (Merlin) 2000, 2 issue microseries 2000*

A germ of a decent story hides in this mesh of sixth century battles and modern day ramifications. In the miniseries it's buried within clumsy expository pontification, exploitative semi-nude poses and poor pacing. In the years following Arthur's death Guinevere has inherited Excalibur, and in the present day electrical technology has been supplanted by magic, the chaos wiping out much of humanity at a stroke, and simultaneously awakening mythical beasts and deities. Luckily Merlin has returned to tutor Jennifer Drake, and there are enough theories beloved of *X-Files* fans to shore up plots. The ongoing series introduces a priestess from a 23rd century matriarchal colony on Mars, and Matt Hawkins' writing has marginally improved, although artist John Stinsman still loves his pin-up pages. Every issue has a plethora of variant covers, collected in the Gallery Edition, the 1999 one-shot reprints the Maximum Press issue, the 2000 one-shot focuses on Merlin, the microseries is a poor *More Than Mortal* crossover, and the third issue of the ongoing series debuts Alley Cat.~FP

LADY RAWHIDE

Topps: *1 Special 1995, 5 issue miniseries 1995-1996*, 5 issues 1996-1997*
Image: *5 issues 1999**

An offshoot of *Zorro*, this scantily-clad woman rides around adventuring in a costume that, in real life in the 1800s, would have caused her to be arrested on sight. Mayhew and Palmiotti's artwork is pleasant, and Don McGregor's prose, despite the total lack of any artistic credibility in this project, is as purple as ever. Particularly amusing are his lengthy rationalisations in the text pages as to why he's working on this rubbish in the first place. The miniseries was sufficiently successful to provoke an ongoing series, with art, initially, by the Esteban Maroto studios. Sigh. Weren't most of the readers old enough to purchase real pornography if they needed it? The interest soon wore off, and the 'ongoing' series fizzled out after being forced to take the ignominious step down from colour to black and white. The special reprinted the character's early appearances as a guest-star in *Zorro*, and the Image series reprinted the Topps 'ongoing' series.~HS

LADY SUPREME

Image/Extreme: *2 issues 1996*

Having tempted Terry Moore to write superheroes on the strength of his supposed understanding of female characters, Liefeld lets him loose on *Lady Supreme*. As far as these things go it's an average dopey superhero strip in which Lady Supreme learns that her mother is Glory. They have a good old mother/daughter chat and then do a bit of fighting. Next time Liefeld wants someone who particularly understands women he should remember that about 50% of the world's population is better qualified than Terry Moore. Prematurely cancelled, more Lady Supreme appeared in *Asylum* 10.~NF

LADYTRON

WildStorm: *One-shot 2000*

Ladytron is Maxine Manchester, a member of the Wildcats. This effectively serves as her origin, explaining her life before she joined the team, as her maker, Dr Khaz, sends her to retrieve Stanley, another of his experiments in techno-organics. It's ugly, hateful and senseless.~NF

LAFF-A-LYMPICS

Marvel: *13 issues 1978-1979*

In the late 7190s Marvel tried to build a children's line based on the cartoons of the Hanna-Barbera Studios. This was one of the longest running titles, but that's probably because it featured so many cartoon characters rather than because it was any good. The basic premise is to team up lots of familiar characters and have them compete against each other. Scooby Doo, Yogi Bear and Mumbley are the team captains and given that Mumbley's team includes Dread Baron and the Creepleys you know which team's going to cheat but never win. Mark Evanier does his best with the premise but it's tough going.~NF

LAFFIN' GAS

Blackthorne: *12 issues 1986-1987*

Taking a different theme or target each issue, a regular bunch of cartoonists turn in short stories. Beginning in decidedly lacklustre fashion, the quality curve is upward throughout. Best of the bunch is 10, the anti-censorship issue.~FP

LANCE BARNES: POST NUKE DICK

Marvel/Epic: *4 issue miniseries 1993*

A variation on the hard-boiled -detective theme sets Lance Barnes in a post-nuclear world, the twist being that he set off the missile that began World War III. Accompanied by his one-legged companion Peg (geddit?), Barnes wanders across the USA encountering the comic remains of humanity. Writer Stefan Petrucha turns in consistently witty dialogue, matched by artist Barry Crain's visual whimsy. The fourth issue, satirising state administration and confronting Barnes, is the best sample.~WJ

The LAND

Caliber: *1 issue 1999*

Adequate fantasy tale of two enemies washed ashore on the mysterious island called The Land, who must put aside their differences to defeat the forces of an evil magician. Donald Marquez creates this spin-off from *The Realm*.~WW

LAND OF NOD

Black Eye: *One-shot ('Treasury') 1994, 3 issues 1996-1997*

Dark Horse: *4 issue miniseries 1998, One-shot ('Rockabye Book') 1999*

'Treasury' collects all Land of Nod stories from Jay Stephens' previous publications including *Sin Comics*, and also has some new material. The series then introduces Space Ape Number 8, Jetcat and Tutenstein in successive issues, expanding their stories in the Dark Horse series. Melanie McCay is superhero Jetcat in whose world 'The Land of Nod' is a children's cartoon, as is 'Space Ape Number Eight' (an automatically better cartoon according to Melanie's friend Tod, because it's "broadcast live from dimension seventy-one in the year twenty-twenty-seven"). Space Ape and Jetcat are stranded together in his dimension before falling in love, with the final issue seeing the rescue of Space Ape by the Space Ape Brigade, the excavation of the renegade Space Ape Thirteen and the near capture of Tutenstein by Creepy Finkley Crawdad.

Jay Stephens' delightful series works on a number of levels, whether it be parody of science fiction and horror strips, lighted-hearted superheroics or dark children's fairytales. His art is normally clean with thick black linework but the Tutenstein chapters use more of a charcoal effect. The 'Rockabye Book' collects the main storyline from all seven issues.~NF

Recommended: Black Eye 1-3, Dark Horse 1-4

LAND OF O

Top Shelf: *One-shot 2002*

At first there's some thought that these deeply revolting and profoundly disturbing stories are some kind of allegory about childhood troubles, but as the parade of despair continues, any deeper levels dissipate. Some will be attracted by Michael Stack's sordid world of casual cruelty and bleak sense of humour, but most will be repulsed.~FP

LASER ERASER AND PRESSBUTTON

Eclipse: *6 issues 1985-1986*

Following Eclipse's reprints of the Laser Eraser adventures from *Warrior*, this series features new stories of pan-galactic assassination, all written by Steve Moore under the pseudonym Pedro Henry. Many stories revolve around space-opera clichés such as a mind-parasite invading the Laser Eraser's mind and forcing her to land on the planet, where it's trapped, or the telepathic assassination target who switches Pressbutton's circuits to keep him in a state of constant orgasm, finally defeated with the help of Zirk, a sexually obsessed telepathic blob that floats around on a flying platform. The scripts are sharp but rather dated. Towards the end of the series Moore started to work on the lead characters, inserting sexual jealousy into what had previously been portrayed as a light-hearted relationship. Although Steve Dillon is associated with the strip he only drew the first issue. David Lloyd looks uncomfortable on the second, while Jerry Paris and Garry Leach (who did the covers for 1, 2 and 6) run riot on the alien parasite story in 3. Jim Baikie's 'Twilight World', reprinted from *Warrior*, appears as back-up in 1-4, and a Cam Kennedy-illustrated tale about Laser Eraser's mum fills up the last two.~FJ

LASSIE

Dell: *62 issues 1950-1962*

Gold Key: *8 issues (63-70) 1963 (63-66), 1966-1967 (67-69), 1969 (70)*

As a rule, fans don't usually go for comics about dogs and, since *Lassie* has more than a few doggish elements to it, few have added this to their 'wants' list. But they are wrong! Admittedly, early issues are drab affairs, but afterwards Lassie contains some of the most handsome art ever to grace a comic. For its first few years, the comic centred on trouble-prone newly-weds, Rocky and Gerry, travelling the globe in search of natural disasters from which Lassie could extricate them in the nick of time. From 39 on, the fickle dog attaches itself to young Timmy and family for a series of smaller scale domestic scrapes, based on MGM's TV show. After a terrific Jerry Robinson-drawn sojourn in Africa (60-62), Lassie dumps the kid and becomes queen of the outdoors with forest ranger Corey Stuart. The scripts are all professional enough but there is little to quicken the pulse. However, in addition to Robinson, artists Matt Baker (20-22), Ralph Mayo (23-29, 32), Bob Forgione (30, 31, 33-44), Bob Fujitani (45-59), Warren Tufts (63-66) and Dan Spiegle (67-70) produced uniformly gorgeous drawings. Quite how an unassuming title like *Lassie* inspired such artistry is one of comics' great mysteries, but from 20 on, art lovers cannot go wrong.~DAR

The LAST AMERICAN

Marvel/Epic: *4 issue miniseries 1990-1991*

The stunning, almost cubist art of Mike McMahon instantly characterises this story of Ulysses S. Pilgrim, put into suspended animation as nuclear war ravages the globe in 1999, and revived twenty years later. Accompanied by three robots, Able, Baker and Charlie, Pilgrim sets out on his quest to discover if anyone else has survived global warfare and if so, how he can contact them. That being the mission, there's little point in a first-issue resolution, resulting in a very bleak series as Pilgrim trundles through a countrywide wasteland in his army vehicle.

Wagner and Grant's writing was unlike anything they attempted before, being resolutely downbeat, with few humorous touches, one being Charlie's speech-patterns, which stem from over-indulgence in television broadcasts. It contrasts well with Pilgrim's stiff formality and mood swings. Having made a leap into new territory, Wagner and Grant throw the doors open wide, particularly on the fantasy musical sequence in 2, in which a skeletal Uncle Sam leads his fellow skeletons on a song-and-dance tour through devastated New York. Musicals in comics is a trick Wagner and Grant have attempted before with less success, but here it's played to perfection, with McMahon's choreography outstanding. It's tragic, then, that somehow the pages have been printed in the wrong order. McMahon's art throughout almost looks as if he's carved his characters rather than painted them, and the

resolutely dark and gloomy palette he uses to indicate the perpetual fall-out cloud covering the USA is masterful. It speaks volumes for the talent of all three that isolation has never looked so splendid.~FP
Recommended: 1-4

LAST DANGEROUS CHRISTMAS

Aeon: *one-shot 1997*

Produced as a benefit for abused and neglected children, this anthology has a high standard of artwork and an interesting mix of Christmas stories, covering topics as diverse as elves, cinema, science-fiction and street gangs. Creators include Kaja Foglio, Sarah E. Byam, Shepherd Hendrix and David Lee Ingersoll while Matt Howarth provides a typically malevolent story of Those Annoying Post Bros. The most interesting strip, however, is by David Lasky with his critical and cultural analysis of the film *It's A Wonderful Life*.~NF

LAST GASP Comix & Stories

Last Gasp: *5 issues 1994-1997*

Most of the most tedious staples of the underground, such as deformity, wanton or perverted sex, confessions, psychedelic whimsy, pious political belly-aching, and gibberish, are on show in these amateurish anthologies. It's all been done better before elsewhere. There are exceptions, thankfully. Danny Hellman is a brilliantly slick artist wasted on the porn comedy here and Mats Stromberg's 'Edgar Wanker' in 3 and Sam Henderson's 'Enema Jack From Hackensack' in 5 raise a laugh.~GK

The LAST GENERATION

Black Tie Studio: *5 issues 1986-1989*

Ambitious fantasy tale of a disparate band of post-apocalyptic adventurers including a talking Bear and Wolf both from cultures similar to North American Plains Indians, a winged human girl and a mysterious, amnesiac cyborg who gather together to solve the mystery of what actually happened to Earth. Bill Bryer, Mitch Faust and David Porch start well and improve, but the finite series was never completed, which is a pity.~WW

The LAST ONE

DC/Vertigo: *6 issue miniseries 1993-1994*

An enigmatic person purporting to be an ancient sorcerer roams the streets of the city, selecting certain of the homeless and the hopeless, and trying to awaken them to the possibilities still open to them. A strangely compelling series, much less woolly than J.M. DeMatteis' usual fare. Yes, there are enigmas here, but you get the impression they're due to planning, rather than incompetent writing, and Dan Sweetman's illustrations have a pleasing luminous quality.~HS

Tomorrow Man & Knight Hunter LAST RITES

Antarctic: *6 issues 1994-1995*

Amatuerish superhero story that in the days before black and white independent comics wouldn't have even qualified as decent portfolio samples. There's neither the writing or artistic talent here, so it's just as well the plot is also sub-par.~WJ

LAST SHOT

Image: *One-shot (Last Shot First Draw) 2001, 4 issues 2001-2002*

Revolver bounty-hunts in order to pay off the expense of having guns built into his hands, and roams a desolate land not unlike the American West in a meat wagon driven by his sappy buddy Corbit. In the one-shot Rev wins a gunfight by shooting his bullet-dodging opponent with a concealed gun. Kinda goes against the basic principles of a gunfight. In the main series a girl called L3N stows away on the wagon. Rev reluctantly decides to act as her bodyguard on the way to Nolem – for his own reasons. This guarantees a gunfight every issue.

Long Vo's artwork is well-realised with the colouring providing solidity, background detail and mood just where it should, but the script is just functional. The assembled creators presume to call this a "medieval punk western". What they mean is they did no period research, dodged drawing any horses and made the guns and other hardware as jazzy as they pleased (ie: made them up). This video game mentality doesn't apply well to static pages, but the comic is undeniably exciting if you don't bother to think too hard.~SW

Magna-Man The LAST SUPERHERO

Comics Interview: *3 issue miniseries 1988*

Anne Vetter is ordered to complete a thesis on Magna-Man by the Executive Council of Earth, which is trying to find a reason to banish him as it's also conspiring with the invasion forces of the alien V'ihruss. Dwight Jon Zimmerman's plot that superheroes were created solely to protect against these aliens, but have all been disgraced and eliminated except for the first, Magna-Man, is somewhat illogical in concept, but well-thought out otherwise and cleanly drawn by Willie Peppers and Don Hillsman.~NF

LAUGH IN THE DARK

Last Gasp: *1 issue 1971*

Largely uninspired underground anthology in which the contributors fail to improve on the horror clichés they are satirising, although S. Clay Wilson is in familiar offensive territory. The best work by a country mile is Justin Green's ponderings on how the film *Them* affected his life, and those who've acquired the taste for Kim Deitch should like his contribution.~WJ

LAUNDRYLAND

Fantagraphics: *4 issue miniseries 1990-1992*

The L.A.W. Living Assault Weapons

DC: *6 issue miniseries 1999-2000*

To great acclaim, penciller Dick Giordano once edited the cast united here while writer (and inker) Bob Layton first came to prominence publishing *Charlton Portfolio* about them. This should have been a dream assignment, but it's dreary and disappointing. Giordano's pages are uncharacteristically cluttered, and Layton's plot is forced by unlikely motivation as each character must face a past mistake. As for the premise of uniting the 1960s Charlton heroes, Captain Atom and Peacemaker are all but makeweights, Nightshade is unaccountably transformed, Thunderbolt is not invited to the party, while Blue Beetle and the Question are decently handled. Although not cover featured, Sarge Steel plays a large part, and the best aspect of the story is the return of an enigmatic Judomaster, rarely seen since the 1960s.~FP

LAWDOG

Marvel/Epic: *10 issues 1993-1994, one-shot (Lawdog Vs Grimrod) 1994*

Woefully derivative and OTT tale from Chuck Dixon and Flint Henry of a resurrected pacifist (a combination of *Dirty Harry*, Alan Alda and *Judge Dredd*) compelled to patrol the highways between dimensions slaughtering anyone/thing that is where it shouldn't be. Along the way he picks up a blonde bimbo whom he neglects to kill, loses her, meets homicidal psychopath Jugger Grimrod from *Alien Legion*, and brings down the extra dimensional organisation that controls him. Anyone caught in the wrong universe gets a brainful of hot lead, which is an apt recommendation for anyone caught reading this rubbish.~WW

LAZARUS CHURCHYARD

Tundra: *1 issue 1992*
Image: *1 volume ('The Final Cut') 2001*

Warren Ellis' grizzled cyberpunk hero was given very few outings. Planned as the first issue of a miniseries, 1 collects six short stories produced for British adult anthology *Blast!*, but offers no new material. The Image collection includes material in the Tundra comic, but also pulls together appearances from elsewhere. The heavily painted art by D'Israeli is worth a look.~FJ

LAZARUS 5

DC: *5 issue miniseries 2000*

Stylish spin on the paranormal detective genre set on a parallel world where supernatural outbreaks and disasters are combated by a mysterious group of heroes called the Inquisitors, whose point team are five agents who've been brought back from the dead. Dan Jolley and Dusty Abell weave an engrossing tale that successfully balances suspense and action.~WW

LCD Lowest Common Denominator

Fogel Comix/LCD: *1 issue 2000*

In these days of 'ugly' animation on kids TV, Vertigo and Max comics peppered with sex and swearing, and Robert Crumb collected in hardback books, and sold throughout the free world, it's comforting to find people who'll go that extra distance to ensure offence. It was Kieron Dwyer who self-published minicomics under this title, but this also features Hilary Barta, and Johnny Ryan. Outside an Ivan Brunetti comic you won't anything this jaw-droppingly scatalogical.~FP

THE LEAGUE OF EXTRAORDINARY GENTLEMEN

ABC: *6 issue miniseries 1999*, 4 issues + 2002 to date*

Why are all sequential art periodicals not of this standard? Mr Alan Moore in arguably his best endeavour since *Watchmen* offers us adventures occurring in the late 19th century. Five unlikely adventurers, Mr Allan Quatermain, Captain Nemo, Mr Hawley Griffen, Dr Henry Jekyll and Edward Hyde and additionally Miss Mina Murray are recruited by the enigmatic Mr Campion Bond under orders from the mysterious 'M' to retrieve the purloined floating metal, cavorite from the clutches of an evil-doer. Some of those mentioned will indeed sound familiar to the readers of lowbrow fiction. Miss Murray was once Mrs Harker and never removes her scarf, while Mr Griffen is only infrequently visible. In a masterful stroke of genius Mr Moore has insinuated literary characters of past into an intricate plot of dastardly intrigue. The series is also cluttered with a multitude of supporting characters, notorious and famed as well as obscure. The fate of that pure American girl, Polyanna is practically beyond comprehension. Those of a dilatory persuasion may idle away hours researching such characters. Those of higher literary sensibilities may just enjoy the presentation. Credit for the success must also be apportioned to Mr Moore's colleague, the magnificent Mr Kevin O'Neill, a veritable master of the comic arts. His unique style verges on the grotesque, and is the perfect accompaniment to a tale that requires detail with a dash of villainy and humour. The unsung hero hereabouts is surely Mr Benedict DiMagmaliw whose appropriately selected hues complement Mr O'Neill's illustrations to perfection. After saving East London from devastation in the first adventure story, our heroes return for a second challenge to save London from Martians! Will they succeed in defeating these vile aliens (and we don't mean Americans here), when one of their number turns to treason, the traitorous swine! The second diversion is, as yet, incomplete, but its predecessor is gathered in both softcover and hardcover editions. A message for Messrs Moore and O'Neill: Bravo, gentlemen, bravo!~HY

Recommended: Series one 1-6, series two 1-4

LEATHER AND LACE

Aircel: *25 issues, 1989-1991*

At a time when his *Ripper* comic was being lambasted for racism, the loathsome Barry Blair's other 'creative' input was full of unpleasant overtones of paedophilia. Most of the characters, although supposedly adults, resembled pre-pubescent children, usually clad – as the title suggests – in bondage gear and erotic underwear. Issues were sealed in plastic bags, and Blair also produced tamer versions of each issue for newsstand distribution. Guess which version sold best... ~JC

Tales from the LEATHER NUN

Last Gasp: *One-shot 1973*

A great title, that this underground anthology almost inevitably doesn't quite do justice to. Still, it does contain several morally reprehensible tales by the likes of Crumb, Spain and Jaxon, and a very nicely drawn lead story by the under-rated Dave Sheridan.~DAR

LEATHER TALES

Antipodes Publishing: *3 issues 2000-2001, one Volume 2001*

Killer Kara is trying to retire, and Chastity is an 'owned' woman, trying to escape her abusive past. On the run, the two become targets for the mob, crooked policemen and Kara's old employers, who may or may not want her back alive. Within its genre setting, this is ambitious storytelling, concerned as much with the women's love for each other and the danger in what they're doing as with the action-packed gun-play. Creator, Steve Malley's artwork is unsophisticated, though it improves throughout, but the characters are interestingly delineated and the whole makes for an enjoyable read. The series ended prematurely but is completed in the single volume.~NF

LEATHERBOY

Eros: *3 issue miniseries 1994*

Hardcore porn about a gay superhero who somehow manages to be less well drawn, less interesting and less erotic than artist / writer Craig Maynard's slice of life strips.~HS

LEAVE IT TO CHANCE

Image/Homage: *11 issues 1996-1998*
Homage: *1 issue (12) 1999*
Image: *1 issue (13) 2002*

Chance Falconer is the daughter of the world's greatest magic user, and heir apparent to his power and secrets. The trouble is, her dad doesn't want to know, because it's too dangerous for a girl. While the loss of her mother, and his own human appearance, in a previous adventure goes some way to excusing Papa Falconer, young Chance is naturally unenthused by this Neanderthal attitude and goes adventuring on her own initiative. She's soon embroiled with dragons, shamans, goblins and spectres of the night, all standard urban furnishings of her city, as well as the more usual kidnappers and corrupt cops. Old World magic in a big city environment, with humour, charm and wit, *Leave it to Chance* is an engaging tour de force from James Robinson, lovingly illustrated by Paul Smith. It could have been that breakthrough hit which appealed to both genders and all generations, but for one thing. The comic never comes out! After an initially regular schedule, it slipped later and later and finally ground to a stop in 1998. Issue 12 did dribble out in 1999, much to everyone's surprise, and was not very rapidly followed by an extra-length 13 in the last days of 2002. 13 resolved all dangling storylines and brought things to a resolution, while still leaving openings for future adventures, but no further issues have been solicited for publication. Despite various repackagings of the existing issues in paperbacks and hardcovers, in an attempt to keep her before the public, it looks like the adventures of Chance Falconer may have finally ground to a halt. A very great shame.~HS

Recommended: 1-13

LEFT-FIELD FUNNIES

Apex Novelties: *1 issue 1972*

Cartoonist Bobby London's style is taken straight from Segar's *Popeye*, but he applies it to distinctly hippy style stories of sexual politics, dope and revolution in his Merton strips, occupying half the issue. They're all very dated these days, but the art's great and if you've ever wondered about the sex lives of *Popeye*'s cast this is the nearest you'll get. Fellow contributors Gary Hallgren, Gary King, Willy Murphy and Ted Richards (with a short Dopin' Dan strip) have a knockabout agenda for their material, and it stands up far better, particularly Hallgren's contribution, which is passably Cliff Sterrett in places. The highlight of the issue, though, is Shary Flenniken's delightful 'Trots and Bonnie'. Again influenced by older cartoonists, in this case largely Wilhelm Busch, it's a simple, disjointed, quirky piece. Never mind the stories: scan the art, and you should be delighted.~WJ

---

* Available in a collected edition

LEGACY

Antarctic: *6 issues 1999-2001**

Fred Perry churns out a run-of-the mill mystic adventure of modern kids who inherit the powers and prowess of dead heroes in an eternal struggle to defeat an extradimensional demon invader. For manga devotees and Gameboy owners only.~WW

LEGEND LORE: Tales from the Realm

Arrow: *2 issue microseries 1988*
Caliber: *8 issues 1995-1996, 4 issue miniseries ('Realm Wars') 1996, 4 issue miniseries ('Wrath of the Dragon') 1996-1997*

In *The Realm,* four kids from Earth are transported to a Tolkien-esque world. In *Legend Lore* the non-human characters take centre stage as the Realms of Azoth and Drohm find themselves moving ever -closer to war. The story, and the art by Guy Davis are delivered with a light touch, which make it enjoyable enough. At Caliber the heroes are re-united to combat a wave of war madness that swiftly draws the kingdoms of Drohm and Carahill closer to Armageddon. Although visually quite strong, the deftness of touch and light approach have been sacrificed to the testosterone-soaked 1990s. For die-hard fantasy fans only. In the miniseries Silverfawn, Dominic and company fight a losing battle as Lady Falla's war madness consumes the entire Realm, and that Realm is The Realm of the Dull and Clichéd.~WW

LEGEND OF LARIAN

Lion Publishing: *2 volumes ('The Shadows Edge', 'The Cutting Edge') 1992*

Intrigue and power-politics in the mystical land of Larian as Madlin, a bounty hunting Man/Elf halfbreed becomes involved with a scheme to place a blind beggar girl on the throne. Beautifully painted graphic novels from Jeff Anderson, but the stilted, heavily evangelical scripts from Terry Murray are a chore to read.~WW

THE LEGEND OF MOTHER SARAH

Dark Horse: *8 issue limited series 1995*, 7 issue limited series ('City of the Children') 1996, 9 issue limited series ('City of the Angels') 1996-1997*

Written by Katsuhiro Otomo, and exquisitely drawn by Takumi Nagayasu, the first series is among the best Manga yet to be translated into English. Humanity deserted a ruined planet for life in satellites, but some have returned to brave harsh conditions and military rule. Sarah has been separated from her three children, and wanders the desolate planet from isolated community to isolated community searching for them. It's very much in the tradition of the Japanese ronin stories or a Clint Eastwood Western, a simple story stylishly told, with the stranger in town setting events in motion that change everyone's lives. It surpasses Otomo's best-known work, *Akira*, by virtue of its meticulous planning and lack of padding. It has to be started with 1 for full effect, though, as the mood and pace are excellently considered. That Otomo and Nagayasu have the confidence to begin the conclusion in 7 and continue it for a further twenty-five pages is astounding. Nagayasu effortlessly apes Otomo's style, possibly because as a former assistant he contributed heavily to that style. There's the same delicacy of line and effective layouts, and the occasional misproportioned figure is largely lost. In it's collected version this story is retitled 'Tunnel Town'.

'City of the Children' concerns a town ruled by teenagers. Living by points of Communist ideology, they also hold a belief that anyone over forty is partially responsible for the barren state of the planet, and therefore should be made to work off a debt. This takes the form of unearthing an underground radioactive waste dump. As previously, Sarah's arrival sparks changes, and she's once again forced to fight for her life. The familiar structure, less original plot and greater reliance on a series of conflicts dilutes the effect if one has read the first series, and an insight into Sarah's current situation in 2 doesn't compensate. 'City of the Angels', though is far better, despite the familiar structure and sees Sarah reunited with a daughter after a decade, during which she's fallen under the thrall of a former brothel keeper turned head nun, Mother Teres. The action takes place in a frontline town overseen by a sadistic commander, with the stresses between military necessity, religious mania and virtue leading to a stunning finale.~WJ

Recommended: Series one 1-8, City of the Angels 1-9

LEGEND OF THE SAGE

Chaos!: *3 issue miniseries 2001*

Brian Augustyn and Romano Molenaar tell the tale of a lady librarian chosen by supernatural forces to defend the Earth from invading sorcerous forces. You've seen it, you've done it and you've very likely already thrown away the t-shirt.~WW

LEGENDS

DC: *6 issue miniseries 1986-1987**

Having discovered with *Crisis on Infinite Earths* that a series involving all their characters and tying into numerous titles was a sales success, DC quickly concocted a follow-up. It nominally explored the idea of what their characters meant to the world around them, but the need to focus on a large cast results in unsatisfactorily small sequences with each character, and resulting events are depicted in shorthand fashion, thus ensuring the underlying ideas never gel. The constant commentary from Darkseid and the Phantom Stranger is irritating and the method of bringing people to their senses is straight from cliché-land. On the positive side, John Byrne's art is never less than professional, but it's scant compensation, and the series was used to launch *Suicide Squad*, and new *Justice League* and *Flash* titles.~FP

LEGENDS OF CAMELOT

Caliber: *6 issues 1997*

A series of themed single issues ('Excalibur', 'Merlin', 'Quest For Honor', 'The Enchanted Lady', 'Sir Balin' and 'The Dolorous Stroke') that seeks to strip away the mythic nature of the Arthurian legend. This is achieved by treating the hero as a lost Celtic ruler from the dark ages rather than as a pre-destined Heavenly Warrior. Different teams handle each issue with mixed results as the strictures of "keeping it real" end up being largely ignored. For jaded Arthurians only.~WW

LEGENDS of the DC Universe

DC: *41 issues, 2 80-Page Giants, 1 Special 1998-2001*

Very much the missed opportunity. Reasoning that out of continuity Batman stories, largely set early in his career, had proved an artistic and commercial success, why not apply the same principle to other DC characters? Superman in 1-3 by James Robinson, Val Semeiks and Paul Neary sets the tone from the off. Not that it's bad; in fact it's among the better stories here, presenting the previously unrevealed origin of the villain Ultra-Humanite, but offers nothing not available in the regular Superman titles. By and large 'average' is the watchword here. Stepping above that line, Kevin Nowlan's inking contributes to two good early efforts over Dave Taylor (6) and Terry Dodson pencils. Both are written by Kelly Puckett, who effectively conveys Robin's awe in first meeting Superman (6), and difficult moments in Batgirl's early career (10-11) and they prove a simple story well told can better any amount of bombast. Unless, of course, that bombast is provided by Steve Rude performing his best Jack Kirby imitation for a double-sized Mark Evanier story starring Jimmy Olsen in 14. There's another Kirby homage from Jose Ladronn in 22-23, set in a world created from re-runs of late night horror TV. In 7-9 Greg Land illustrates Denny O'Neil's revisionist version of Green Arrow developing a conscience during a puzzlingly veiled Vietnam war and first meeting with Green Lantern. It's stretched over three issues, and is, well, average. So are 26-27 with Aquaman as Steve Englehart writes a sidetrack into his classic Joker-fish tale from *Detective* 475, and perhaps fittingly 28 and 29, the final comics Gil Kane pencilled, are the first teaming of the characters for which he's best known, Green Lantern and the Atom. Steven Grant's plot contains a good surprise, but is otherwise ordinary, featuring a tiresome villain Grant also uses in GL stories occupying 19-20 and 37-38. There's an overlong dull prelude to the Hal Jordan Spectre series in 33-36, and anyone who remembers the 1960s Atom series fondly will probably enjoy the final two issues.

Both 80-page Giants are decent comics, putting most of the regular run to shame. The highlight of the first is a Peter David story about the Titanic starring the Spectre, with Steve Ditko pencils swamped by Kevin Nowlan inks. It also has Dave Gibbons drawing the 1960s Doom Patrol, a good Chronos framing sequence by John Francis Moore and Paul Guinan, and Marv Wolfman and George Pérez reuniting on the Teen Titans. The second has Art Adams drawing The Challengers of the Unknown, a good Legion of Super-Heroes story by Paul Levitz and Stuart Immonen, and D. Curtis Johnson and Phil Winslade on Wonder Woman. The best here, though, is a story of someone taunting Darkseid by Walt Simonson and Klaus Janson. Don't look at the contents page until after you've read it for the best enjoyment. Wolfman revisits an earlier triumph in the special, providing an insert chapter of Crisis on Infinite Earths, dealt with in the entry for that title.~WJ

Judge Dredd: LEGENDS OF THE LAW

DC: *13 issues 1994-1995*

DC's new Dredd material upped the page count from seven to twenty-two, but didn't add any more plot. Regular Dredd writers John Wagner and Alan Grant repeat their all-singing all-dancing villain in 1-4, and not unexpectedly manage the best mixture of humour and action. The best actual story, though, is written by John Byrne with art from Tommy Lee Edwards and Gary Martin in 8-10. You'll figure out where the plot is going long before the end, but at least there is a plot, and an interesting idea at that. With the failure of the Dredd movie this and its companion title were dropped with all due despatch.~FP

L.E.G.I.O.N.

DC: *70 issues, 5 Annuals 1989-1994*

The acronym stands for Licensed Extra Governmental Interstellar Operatives Network, an organisation launched by the son of Superman's enemy Brainiac, the green-skinned Vril Dox. As with the 30th-century Legion of Super-Heroes, with which this is only superficially connected, he gathers 20th-century residents of assorted planets who've developed superpowers to cope with conditions on their worlds. There's a shapeshifting Durlan, Larissa Mallor, able to project areas of darkness, and as this is a title written by Keith Giffen and Alan Grant it's not long until intergalactic wildman Lobo turns up. Their sense of humour comes through early with the leader of a drug ring named Kanis Biz.

Dox is a well-conceived character. His ambition is to set up an interplanetary police force, and he will stop at little to follow his aim through, feeling the end justifies the means. He's a brutal commander, often in conflict with his operatives and everyone else, a good example being 2. He manages to free his homeworld from the grip of the ruling computer tyrants, and in doing so nearly trashes the entire planet, an irrelevancy to him as the people are now free.

Dox is also strong-willed enough to control Lobo, by foul means if not fair, and they make a demonic duo. From the early days this is a good action-adventure series, possibly over-violent, but with a lot of black humour, and well illustrated by Barry Kitson. The abrasive relationships between the cast also make for interesting reading, with the writers still able to spring surprises even when characters seem familiar. The transformation of Stealth is an interesting case with an unpredictable outcome, resulting in Dox almost dying in 7. In 9 the mysterious Durlan disappears, to be replaced by a female with amnesia. She's actually the 30th-century's Phantom Girl, now named Phase.

From 13 Alan Grant is the sole writer, and in 16 he introduces the superstrong Lar Gand, later to step into his own series as Valor, and returns Captain Comet, one of DC's 1950s space heroes. With telepathic powers he was considered a man of the future, and left to explore space. The basic decency of this pair is thrown into the turbulent mix, with Lobo being a particular cause for concern. There's a death in 19, and 23 reveals the fate of the displaced Durlan, drawn by guest artist Richard Piers Rayner. In 28 Stealth gives birth to her son, who'll play an important part in the series for several reasons. Captain Marvel and Lobo go head-to-head in 31, and in a smooth transition from 40 Kitson starts writing the title as well. Alan Grant returns for 51, in which Lobo is stuck on a remote asteroid along with team-mate Telepath and a prisoner. To pass the time they recount their pasts, which makes for humorous and gruesome reading.

From 52 Mark Waid scripts from Kitson's plots, working well with him, particularly in 59 and 60, where they spotlight Phase's homeworld. Waid flies solo on the black-humoured 56, featuring a villain very similar to Bouncing Boy of the Legion of Super-Heroes. Arnie Jorgensen is the penciller from 49, and his dynamic artwork doesn't quite match Kitson's storytelling abilities. Tom Peyer (calling himself 'Tennessee') writes from 61, and his primary plot concerns Stealth's son Lyrl, who's developed advanced intelligence for a baby. Lyrl has an agenda of his own, involving taking over L.E.G.I.O.N., manipulating events to ensure his succession. The series thereafter continues as *R.E.B.E.L.S.* The annual that stands out is the fifth, with a number of alternative versions of the team. There's a 007 takeoff for Lobo, and a two-pager by Tom Peyer and old Batman artist Dick Sprang. Anyone who doesn't have a chuckle at it has lost their sense of humour. *L.E.G.I.O.N.* was well plotted, richly characterised and nicely illustrated throughout its run, but never gained the attention it deserved.~HY

Recommended: 4-6, 12, 13, 23, 26, 51, 56, 66, Annual 5

THE LEGION

DC: *13 issues + 2001 to date*

Following the events of *Legion Lost*, the displaced members of the Legion of Super-Heroes return to the 31st century to discover much has changed in their absence. 1-8 are in effect one long story with a familiar DC villain implementing plans for accelerated evolution, and enough seeds for following events are planted to see the Legion through the next year at the current rate of progress. Writers Dan Abnett and Andy Lanning are dab hands at characterising the large cast, and their plots engage, although are dragged out a little too long. Olivier Coipel's pencils remain problematical, with poor figures and, at times, incomprehensible storytelling. He's obviously talented, so you wish he'd concentrate on mastering the basics before experimenting. Overall, though, this is a decent stab at some very popular characters.~FP

LEGION LOST

DC: *12 issues 2000-2001*

Following the events of the 'Legion of the Damned' in *Legionnaires* and *Legion of Super-Heroes*, several Legionnaires are stranded on the far side of the galaxy, with no way home.

Yes, it's Legion: Voyager, as our plucky half-a-team gather their resources, encounter strange new life-forms, and go through traumatic changes, all of which seem pretty familiar. After all, it's a predicament other Legionnaires found themselves in twice in the 1960s, and got themselves out of in one issue each time, leaving space for a back-up story and Super-Turtle! However, it is curiously satisfying to those for whom the post-*Zero Hour* 'Twinkie Legion' rapidly palled. Writers Dan Abnett and Andy Lanning have an insight into the essential personalities of our heroes, which grants them considerable indulgence while putting the team through some pretty shocking events. Not all our protagonists leave the series alive, or unscarred, and the main antagonist's identity remains a hot-button topic with fans even now. It's a great shame that main artist Olivier Coipel had to learn on the job, as his muddy etiolated figure work initially does the series no favours. While he adapts rapidly, his storytelling remains occasionally oblique, but his craftsmanship matures tremendously by the title's end. So, not original, then, but bloody well done, and kick-starting the *Legion* into a viable property again rather than the niche cult it had been for several years.~HS

LEGION OF MONSTERS

Marvel: *One-shot 1975*

This black and white title was conceived to fill the gap after the mass cancellation of Marvel's horror-magazine line. Consequently it features the likes of Frankenstein and the Manphibian (from *Monsters Unleashed*), and a deliciously gruesome Gerry Conway short 'The Flies', drawn with relish by Paul Kirchner and Ralph Reese. The highlight, however, was another chapter of Roy Thomas and Dick Giordano's *Dracula* adaptation, continued from the pages of *Dracula Lives*, unsurprisingly. It remained sadly unfinished. A nice package.~DAR

Recommended

LEGION OF STUPID HEROES

Alternate Concepts: *4 issues, 1 Special 1997-1998*

Unbelievably limp superhero parody. How limp is it? The local Sub-Mariner analogue is very fat. He's called Tubs-Mariner. That's the single best joke in the entire series. The Special, Legion of Stupid Knights, has exactly the same characters, and even worse jokes, set in mediaeval times. Primary artist Chas Gillen might have an engaging style, if he was working on something – anything – other than this.~HS.

The LEGION OF SUBSTITUTE HEROES

DC: *One-shot 1985*

In the convoluted Legion Of Super-Heroes history a number of folk who'd been rejected for membership in the first team banded together to form The Legion of Substitute Heroes. They featured such luminaries as Stone Boy, who could turn into a statue, Infectious Lass, able to infect people with diseases, and Color Kid, able to change colours, and here to change gender as well. Unbelievably, there was a time when these characters were taken seriously, but thankfully not here. Then regular *Legion* creators Paul Levitz and Keith Giffen highlight the ridiculous aspects of this motley crew, producing a good few giggles along the way, the humour accentuated by Giffen drawing in the style used for the parent title.~WJ

LEGION OF SUPER-HEROES

DC: *Series one 4 issues 1973, series two 55 issues (259-313), 3 Annuals 1980-1984, series three 63 issues, 4 Annuals 1984-1989, series four 125 issues, 7 Annuals, 2 Secret Files 1989-2000*

Introduced as one-shot characters for Superboy in *Adventure Comics* 247, something about a team of 30th-century teenage superheroes appealed to the readership, who demanded their return – frequently. They progressed to their own strip in Adventure, and the first Legion series reprinted four mid-1960s adventures to judge their commercial viability. It worked, as later that year *Superboy* became *Superboy and the Legion of Super-Heroes.* Seven years later they booted the boy of steel out of his comic entirely, and the second run continues the numbering of that title, with 259's cover having Superboy flying off bidding a fond farewell to the Legion. He was the lucky one being able to escape from this dreadful comic. Writer Gerry Conway turned out inane sub-1960s-style plots involving evil space circuses and escaped genies, and artwise things deteriorated when Jimmy Janes replaced a below-par Joe Staton from 263. Roy Thomas' writing from 277 was only slightly better, concentrating on developing a character only previously ever seen as a statue. The one bright spot in this run is one of the most beautifully illustrated *Legion* comics ever. Former artist James Sherman returned for 262 and inking his pencils produced a gorgeous result that even made the Conway story bearable. Thankfully it was all change with 284, as writer Paul Levitz returned with new penciller Pat Broderick. From the very ends of the cosmos you could hear champagne bottles popping. Levitz again provided decent plots with excellent characterisation. He knew the personalities of the entire cast and how they interacted. Broderick, while never a very fluid artist, was far more dramatic than his immediate predecessors, but it was the back-ups, illustrated by Keith Giffen, that attracted more attention. When he graduated to the lead stories with 287 a new era for the Legion arrived. Giffen developed great designs and imagery that suited a futuristic series, and he and Levitz created an epic with 'The Great Darkness Saga' (290-294*), with a 20th-century villain plaguing the future. Throughout the action Levitz fleshed out the various Legionnaires beautifully, putting their powers to good use.

300 was a special occasion, a giant-sized epic featuring art from past and present Legion artists including Curt Swan, Dave Cockrum and James Sherman. The future of the Legion, established in *Adventure* 354, had obstructed the progress of various characters, and in 300 it was finally laid to rest. 305 was another notable issue, concluding a long-running plot involving one Legionnaire being an impostor. The 'Prophet and Omen' story in 307-310 with its backdrop of impending doom disappoints, but Giffen uses the opportunity to evolve his art still further with the aid of inker Larry Mahlstedt. All annuals from this period are also notable. The first introduced new characters, the second featured a Legion wedding illustrated by Dave Gibbons, while the third, in 1984, featured the birth of someone who would eventually prompt dire consequences for the Legion.

With 314 *Tales of the Legion of Super-Heroes* continued the numbering, reprinting the stories from the Legion's next series from 325 to 364. The new series was printed on high-quality paper, enabling readers to opt for the pricier new version or wait for a year and get the story at the standard price. The arrangement lasted over three years. This series began in exciting fashion with an all-action affair featuring the Legion's evil counterpart, The Legion of Super-Villains, and ending with the death of a Legionnaire in 5. Steve Lightle pencils from 3 and while not as abstract as Giffen, he is an excellent storyteller. 7-8 feature a crossover with *DC Presents* 80 starring Superman, while 11-12 have Legion founders, Cosmic Boy, Saturn Girl and Lightning Lad, deciding to leave. This paves the way for new characters in 14, including the first ever non-humanoids and the mysteriously masked Sensor Girl, who is apparently an old character. There was much speculation as to her identity, and the truth was eventually revealed in a storyline featuring a new-look Fatal Five (one of the Legion's most deadliest adversaries) ending in 26. Meanwhile the able Greg LaRoque pencils from 15, while 22 drops hints of a possible lesbian relationship between two of the cast.

31 features an untold tale starring some of the dead Legionnaires, and Levitz pulls off another epic in 32-35, where villain Universo once more uses his brainwashing abilities to gain power. He imprisons the four Legionnaires he considers threaten him the most, and the story of how they escape and win the day is a real treat. Perhaps Levitz's greatest inspiration was in resolving the continuity problems engendered by the necessary removal of Superboy. In 1986's relaunched *Superman*'s continuity he'd never been Superboy, and in 37-38 it's established that the Legion's Superboy existed in a parallel universe. The Legion's 30th anniversary in 45 is a spotlight on the life and times of Lightning Lad, and Levitz hits gold again when he begins 'Conspiracy' in 46. A number of Legionnaires conspire, against Legion code, to confront and destroy recurring threat, the Time Trapper. This comes to a head in 50, drawn by Keith Giffen. He'd not lost his touch, marking his return by redesigning all the Legionnaires in 54. Fatal Five villainess, the Emerald Empress is the cause of a magnificent battle in 57-58, and 59 offers another untold tale of some dead Legionnaires, while 'Magic Wars' in 60-63 ends the series on a high note. Science is failing, with magic becoming a dominant force, and although they're reunited by the end of 63, the Legionnaires don't know what's in store for them. The annual was the second, in which Curt Swan returns to pencil a story revealing the strange connection between married Legionnaires Saturn Girl and Lightning Lad, and Validus,

brutal monster member of the Fatal Five. Throughout the series Levitz proved a master plotter, juggling various storylines and utilising every character perfectly.

The fourth series jumped five years for a dramatic new look instituted by Keith Giffen, who was joined by two new writers, Tom and Mary Bierbaum. A lot happened during the five years, and the pieces are gradually revealed. The Legion disbanded, Earth's government fell under the control of hostile aliens, some Legionnaires went missing, some presumably died, some fought each other, and some old-time fans were outraged. The classic Legion of young colourful characters was gone, replaced by adults in a turbulent, unsettled world. It may not have been to everyone's liking, but it demanded attention as an extremely well paced, and well plotted saga. The first few issues slowly introduce the old cast as the Legion begins to regroup, and in 4-5 the Legion's history is rewritten (the latter being an outstanding issue), with new characters now major players in old Legion adventures. This series was grittier than ever before, but not without great humourous moments, typified by the reintroduction of the largely neglected Matter-Eater Lad in 11. His ability to eat anything was previously taken too seriously, but here the absurdity of the character is explored in a witty but respectful fashion. 12 has the Legion back in full force, but there are still mysteries about the title, not least what's happened to some of the previous cast. More gradually return, along with more information as to what occurred during the five years. 20 certainly offers new insights, but 21-24 should be avoided: Al Gordon's 'Quiet Darkness' story isn't known as "Quiet Dullness" in fan circles without good reason. Matters improve in 25 as the Legion of the 1960s *Adventure Comics* days are reintroduced! These young Legionnaires become a resistance force against Earthgov, even enlisting the aid of their old adversary, Universo. Jason Pearson is now pencilling, but it's Colleen Doran and Curt Swan who illustrate the landmark 31 in which the female lover of Element Lad reverts back to a man! Surely a first, this question of sexuality is carefully handled. The war with the Dominators comes to a close with 35, and something unique happens to the Earth in 38. This is Giffen's swansong, as thereafter the Bierbaums write and there's a new penciller Stuart Immonen, although it's guest-penciller Chris Sprouse who redesigns the youthful Legionnaires in 42 before they move into their own title. The Bierbaums meanwhile lead the adult Legion into epic battle with old foe Mordru in 43-48, featuring lots of dead DC characters. They end their run in great form on 50, and are replaced by the series colourist, Tom McCraw, who tries, but was outclassed by his predecessors. His best effort re-runs an old plot of the Legion being outlawed.

60 instigated another change, this time ending an era while crossing into both *Legionnaires* and *Valor*, while 61 tied in with *Zero Hour*. The next issue, numbered 0, was back to basics, with the Legion now only existing as youngsters. The formation started again from scratch with the three founding members, Cosmic Boy, Saturn Girl and Livewire (the former Lightning Lad). Experienced writer Mark Waid arrived to assist McCraw, and the combination worked, producing entertaining tales, helped from 62 by artist Lee Moder. Tom Peyer joined the writing team with 70, and while there's a feel of re-running history repeating, alterations lessen the predictability. One Legionnaire even comes back as a snake! This incarnation can be categorised as 'fun', but its bright appearance concealed gruesome interludes such as a planet's entire population being murdered in 71. The new Superboy makes an appearance as his title crosses over with 74, and stories regularly run into *Legionnaires* during this period. A big change comes with 85, as a number of Legionnaires are thrust back through time to the 20th century, permitting interaction with guest-stars including the Metal Men, Deadman and Impulse.

This, however, went on too long with forgettable stories ignoring a key concept of the Legion being many characters, which disappears by splitting them, effectively, into two teams. After the first Legion wedding in this new continuity, the Legion are reunited in 100, featuring contributions from Paul Levitz, Alan Davis and Walt Simonson to name a few. Unfortunately bringing back everyone to the 30th century didn't help the quality. Peyer and McCraw introduced annoying new characters and artists Jason Armstrong and Scott Kolins were miscast.

The Dark Circle storyline in 106-108 (crossing into *Legionnaires*) isn't without merit, but a new low is reached with 114 with the introduction of the Bizarro Legion. At least writers Dan Abnett and Andy Lanning end the series on a high. Along with artist Olivier Coipel whose unique style needs getting used to, they provide a grim'n'gritty Legion of the Damned tale in 122-123 (again crossing over with *Legionnaires*). 125 ends the series on a cliffhanger leading into the *Legion Lost* series. Of the seven annuals, the best are 1 and 3, revealing secrets about the old Legion.~HY

Recommended: Series two 262, 289-294, 298, 300-305, Annual 1, series three 1-5, 7-9, 24-26, 32-35, 45, 50, 57-63, series four 1-7, 10, 20, 24-26, 31, 45-46, 59-61, Annuals 1, 3

Tales of THE LEGION OF SUPER-HEROES

DC: *37 issues (314-350), 2 Annuals (4-5) 1984-1987*

This continued the numbering of the second *Legion of Super-Heroes* title. The Legion moved into a new series printed on high-quality paper, and those stories were printed a year later in this cheaper title, starting with 326. Before that there were twelve new issues to complement the main series. Most stories were written by co-plotters Paul Levitz and Keith Giffen (with occasional assist from Mindy Newell), with some really nice art by Terry Shoemaker and Karl Kesel in 314-319. They emphasised the teenaged look of the characters, and Dan Jurgens carried on the pencilling admirably from 320. The opportunity was used to highlight a few characters in most issues, though not always successfully, as 321-323 show. Regular Legion adversaries the Dark Circle were featured in 314-315 and again to end the series in 324-325.~HY

THE LEGION OF THE NIGHT

Marvel: *2 issues 1991*

Fin Fang Foom. A depraved religious cult. Steve Gerber, Whilce Portacio and Scott Williams. Demons, sex and a modern-day witch. All sounds rather exciting, doesn't it? Sadly, it isn't. It's a formulaic old horror plot padded out to ninety-six pages with some mystical mumbo-jumbo.~FP

LEGION SCIENCE POLICE

DC: *4 issue miniseries 1998*

Peculiar spin-off from the *Legion of Super-Heroes*, in which a team of 30th Century Police Officers are given experimental 'power rings' that make them into super-beings complete with the associated angst and head-trips. By David Michelinie and Paul Ryan, it's coherent and competent – more so than the *Legion* books were at the time – but the whole thing has an air of "so what?" about it.~HS

LEGION WORLDS

DC: *6 issue miniseries 2001*

Bridging the gap between *Legion Lost* and a new ongoing title, regular writers Dan Abnett and Andy Lanning present a series of single-issue tales that fill in what occupied the rest of the Legion while their team-mates were lost in space. Achieving a near-perfect balance between fond reverence for continuity and the courage to make changes, D'n'A deliver a series of touching and entertaining vignettes that build up a valuable picture of the diverse galaxy in which their heroes live. The series also gives individual, and often B-list, members of the huge regular cast a rare chance to monopolise the spotlight.~JC

Recommended: 2

LEGIONNAIRES

DC: *83 issues (0, 1-81, 1,000,000), 3 Annuals 1993-2000*

1-19 chronicle the adventures of a bunch of super powered futuristic teenagers who may be the clones of the thirty-something members of the Legion of Super-Heroes, or may not. They protect New Earth, a collection of domed cities linked in space, which is all that remains of our planet in the 30th century after aeons of ecological abuse. The first several issues written by Tom and Mary Bierbaum and exquisitely illustrated by Chris Sprouse are a bouncy, fun read; entertaining adventures of neophyte superheroes. Sadly, after fill-in art by Adam Hughes (7) and Colleen Doran (8) the schedules continued to slip, and Sprouse was forced to give up the title. From 20, reference must be made to *Zero Hour*, DC's time-warping 1994 crossover series. It was deemed that *Legionnaires* and its parent title *Legion of Super-Heroes* required readers to have too much prior knowledge of previous continuity, therefore putting off potential new readers. So, with 0 (Oct 1994), everything was labelled 'never happened', and 20 up crossed over and alternated with issues of *Legion of Super-Heroes*, both titles detailing the ongoing saga of empowered teenagers in spandex patrolling the galaxy. Falling uneasily between two stools, the competent but unchallenging 'Legion Lite', as it came to be unfortunately known, failed to appeal to large numbers of new readers, and continued to alienate the old. Reluctant to cancel a long-running second-tier property, DC continued to turn out the series to an underwhelmed audience. From 41, *Legionnaires* and *LSH* split into separate storylines, with the half of the team in *LSH* becoming stranded in the 20th Century (as it was then) and interacting with DC's present-day superstars. This pulled up the sales on *LSH* sharply, and had a slight knock-on effect on *Legionnaires*, but when the teams were reunited in their correct time frame interest flagged again in both titles. Another relaunch seemed called for, and with 79-80 came the 'Legion of the Damned' (crossing over with *LSH* 122-123), in which the Legion's world suddenly became a much darker place. Earth is conquered by the Blight, an all-consuming menace, and only a few survivors hide amidst the ruins of Metropolis, hunted by their former comrades and allies. New writers Dan Abnett and Andy Lanning with neophyte illustrator Olivier Coipel gave the series a maturity it lacked for too long, crystallising the idealism and determination that has been at the heart of the Legion concept during its strongest periods.

While the new creators were feeling their way at this stage, the contrast between the 'Archie Legion' and the team of committed adventurers is marked. The events of 'the follow-up Widening Rifts' (81, *LSH* 124-125) lead directly into the *Legion Lost* series.~HS

Recommended: 1-7

LEGIONNAIRES 3

DC: *4 issue miniseries 1986*

The founding members of The Legion of Super-Heroes, retired from active service, face their greatest challenges from the Time Trapper and their own unresolved issues about their lives. Some logical flaws – if these folks are retired from heroics why are they still wearing their action costumes? – but a better than average *LSH* miniseries.~HS

LEGS

Image: *One-shot 1999*

An easygoing rites of passage fable from Sam Kieth. A car mechanic's son explores the ghost town that appears when a local lake is drained. There he discovers a bizarre synthesis of dinosaur, mole and supercharged engine parts that he christens Legs. The creature runs as fast as a rocket and the kid learns a valuable lesson about the immature driver's hunger for speed. A cyberpunk bedtime story chock-full of quirky charm.~SW

LEMME OUTA HERE!

Print Mint: *One-shot 1978*

Anthology in which a top line-up of underground cartoonists post recollections of their childhood. Despite the presence of Justin Green, Kim Deitch and Robert Crumb, it's Bill Griffith who steals the show, asking 'Is There Life After Levittown?' It's a resonant recollection of childhood mischief and adolescent alienation. Crumb's two-pager is charming, and Aline Kominsky's pages are, as always, a curious mixture of compulsive text and off-putting art. Her story of a holiday camp is curiously spliced with what seems to be an entirely different eight-pager about early dating experiences. Patchy, but certainly worth a look for the better material.~WJ

Legend of LEMNEAR

CPM: *18 issues 1998-1999*

Lemnear and her childhood companion, Mesh, discover they're Champions of Light, destined to oppose the Dark, in this run of the mill fantasy adventure. Varohl has been absorbing the evil of the world in preparation for a showdown with Lemnear who must fight her way to him through his generals and army of monsters. Kinji Yoshimoto does try hard to keep the script fresh and unpredictable, whilst artist, Satoshi Urushihara uses a lot of zip-a-tone to complement his sharp, fluid pencils. The one thing that can actually be guaranteed, however, is that Lemnear and the other female characters will lose their clothes at every opportunity.~NF

LEMON CUSTARD

Caliber: *1 issue 1997*

Tart comments from Mark Badger on why the experience of working for mainstream comics has curdled, aided by caprice from Steven DeStefano and Gerard Jones. Very self-indulgent, but nicely drawn.~WJ

THE LEMON KIDS

Alternative Comics: *1 issue 1999*

The twin Lemon Kids are contracted to a candy company for corporate advertising. The company abuses them by making them participate in professional wrestling, or fill out the director's tax returns. Steve Weissman's stories present a world where tricycle racing is a major spectator sport, and he exaggerates the fears and cruelty of childhood from an adult perspective. There are funny moments, and any of Weissman's work is worth seeing, but overall he'seen better elsewhere.~FP

LENORE

Slave Labor: *9 issues + 1998-2000 (1-8), 2002 (9) to date*

Lenore is a cute little dead girl whose presence is normally life threatening, sometimes due to maliciousness on her part, sometimes due to an indefinable inability not to kill things. Supporting characters (usually dead, if they're in more than one issue), include Ragamuffin, eternal vampire scourge and Mr Gosh, a persistent suitor, who doesn't understand that being repeatedly killed is a rejection. After Death arrived to take Lenore back to Hell in 8, the title was on hiatus for a couple of years, but more issues are now promised. Roman Dirge's creation is very black and often very funny indeed. His twisted, misshapen figures, with their huge, round-eyed heads on small, thin bodies, seem unreal and yet are precisely drawn, adding to the strangeness of the reading experience. 1-8 have been collected in 'Noogies!' and 'Wedgies!'~NF

Recommended: 1-9

LENSMAN

Eternity: *6 issue miniseries 1990*, 5 issue miniseries ('Galactic Patrol') 1990*, 7 issue limited series ('War of the Galaxies') 1990-1991**

This title starts as an adaptation of the Japanese animated movie before progressing to adaptations of the succeeding (and contradictory) Japanese TV series, all the while attempting to bridge the vast chasm between the source material and its origins, the *Lensman* novels of E.E. Doc Smith. All the potential reader needs to know about the plot is that it's space warfare, although there's a sourcebook in a collectors edition version of the initial miniseries first issue. The entirety is enjoyable in a dopey untaxing fashion, and there's some nice art from Tim Eldred when he's not rushed. 'War of the Galaxies' is, in effect three separate stories occupying 1-3, 4-5, and 6-7.~WJ

LEOPOLD & BRINK

Faultline: *3 issues 1997-1998*

Definitely the oddity, *Leopold & Brink* encompasses two seemingly unconnected narrative strands. A female monkey accompanied by an intriguingly designed robotic assistant has the capacity for time travel. Entirely separately and in the present day a genetic scientist's government funding is withdrawn, and she finds solace within her supportive community. Christopher Fink's art appeals in an expressive and sketchy manner, while the whimsy of his characters masks philosophical intent. It's also backed up with informative features on one of the many cultural and historical references included. This won't be to all tastes, but that it's incomplete shouldn't restrict enjoyment of what there is, and a series of graphic novels is planned.~FP

LES LIAISONS DELICIEUSES

Eros: *6 issue miniseries 1990-1991*

A pair of beautiful women in a strange great house welcome a series of lovers, often dressed in masks and costumes. At the end of each encounter the lovers are killed, either by their successors or by the women. Gender is obscured by satin and brocade, new amours take the guise of the men they have just killed. Richard Forg builds an indulgent, sensual world of black and white images without using words, paying particular attention to body language and facial expression, but clearly drawing at speed. The dashed-off quality of the drawings gives a feeling of tumultuous passion, even if the odd panel is clumsy. He's been looking at Manara, that's for sure, but brings an edge of roughness, and more than a hint of danger, to the scenarios.~FJ

Recommended: 1, 3

LETHAL

Image: *1 issue 1996*

Lethal is an armoured, G-stringed, sword-wielding bad girl who has been banished to a future where there is no violence, and it's driving her crazy. Her solution is to steal a time machine and return to her normal, deadly world. The comic was cancelled after 1, with half of the next instalment appearing in *Asylum* 11 but it never actually concluded, which comes as no surprise because it's awful.~WW

LETHARGIC LAD

Crusade: *3 issue miniseries 1996, 1 issue (Lethargic Lad Adventures) 1997*

Destination Entertainment: *14 issues 1997-1998*

Lethargic Comics International: *9 issues + 1998 to date*

Parody comic that initially combined juvenile art with ancient jokes to poke good natured (at least one assumes it's good natured) fun at classic comic moments. Practice and the sheer volume of issues eventually resulted in better-drawn pages, but creator Greg Hyland's obvious love and knowledge of comics just doesn't translate into funny gags. Long running back-up strip "Him" (as in "oh no, its...") by Steve Remen, however, telling the misadventures of a generic Adam West-boy scout style heroic crusader and his sometime boy sidekick, is a little gem, and the run from issues 1-14 can be found in a collection called *Him*.~WW

LET'S HIT THE ROAD

Fantagraphics: *One-shot 1998*

Rich Tommaso tells an autobiographical tale of a road trip that takes him through adolescence and out the other side of friendship in a story that doesn't say very much, but does it awfully well. Noteworthy eye candy.~WW

LEVEL X

Caliber: *2 issues 1997*

A group of dream research patients are trapped in an ever-changing dreamscape when the computer controlling the experiment begins to achieve its own sentience. It's an engaging treatment of an old plot.~WW

The Book of LEVIATHAN

The Overlook Press: *1 volume 2000*

Leviathan (Levi) is the faceless baby son of Naomi and Aesop Klug. He has a sister, Rebecca, a cat, Cat, and a rabbit doll. Though his 'real' speech hasn't passed "dep", which, loosely translated, can be taken to mean anything, Levi's conversations with Cat are the basis for this erudite fantasy. This collection of Peter Blegvad's Independent on Sunday newspaper strip is a sampling only, but displays the scope of the strip. Amongst the longer adventures are an eight-part search for Levi's parents, a six-part trip to Hell and a four-part story about a father who sold his son to the devil. Blegvad uses Levi's innocence and ignorance to question everything, using philosophical, scientific and literary texts as the starting point for his elaborate word plays. Language and learning are the major themes, but it's not dry and unreadable, because Blegvad ensures there's plenty to raise a smile, and his often detailed cartooning is full of added visual surprises.~NF

Recommended

LEX LUTHOR

DC: *One-shot (The Unauthorised Biography) 1989, 4 issue miniseries (Superman's Nemesis) 1999, one-shot (Lex 2000) 2000*

The 1989 one-shot written by James Hudnall is what it says on the cover, with Luthor probed by an alcoholic journalist and Clark Kent accused of murder. It's a decent, if predictable tale well drawn by Eduardo Barreto. The miniseries has an oddly 1960s feel about it, and concentrates on Luthor as assailed businessman, facing sabotage and an implacable rival, but it all rather disintegrates once the revelations come. In 2000 DC had Luthor elected President of their version of the USA, and the one-shot that year gathers reaction from assorted people. It's strictly peripheral stuff, largely written by Jeph Loeb. The best segment is two pages buried at the back detailing a conversation between Lana Lang and Superman.~WJ

The LIBERATOR

Malibu: *6 issues 1987-1988*

An unnecessarily complicatedly told liberal tale of World War II supersoldiers growing old. One gets cancer and loses his wife to another, they criticise covert US involvement in Central America, blah, blah... It's crudely drawn and barely edited.~GK

LIBERTY MEADOWS

Insight Studios: *26 issues, 1 Special ('Wedding Album') 1998-2002*

Image: *3 issues + (27-29) 2002 to date*

This collects Frank Cho's beautiful and notorious newspaper strip, often for the first time in uncensored form. It centres on über dweeb Frank's unrequited love for the voluptuous Brandy, and on the all too human creatures in the *Liberty Meadows* animal sanctuary. Cho manages the hard task of marrying the funny animal art of Walt Kelly with the pinup brilliance of Adam Hughes, and each issue is a treat for the eyes. Cho has a masterful gift for pacing and is undeniably one of the most gifted cartoonists of his generation, although his bawdy, scatalogical sense of humour made him the scourge of newspaper editors. The all-new 'Wedding Album' is a major disappointment, albeit a pretty one, but the move to Image coincides with a new landscape format comic.~DAR

THE LIBERTY PROJECT

Recommended

LIFE IN HELL

Deborah Kaplan & Associates: *2 Volumes 1984-1985*
Pantheon Books/Virgin Books: *2 Volumes 1988-1989*
Harper Perennial: *2 Volumes 1991-1992*

Matt Groening once earned a crust actually drawing the material to which his name was appended, and very funny it is too. *Life in Hell* was a weekly square strip syndicated to less mainstream newspapers in the USA, and Groening used it to ruminate on the pitfalls of life and relationships via his alter-ego the set-upon one eared rabbit Binky. He occasionally took potshots at American culture, and occasionally threw-in fake ads for bizarre products or franchises, the latter always with fez-adorned gay couple Akbar and Jeff as proprietors. The first two collections *Love is Hell* and *Work is Hell* were originally published in packaged vinyl album size, before being reissued by Pantheon (in the USA) and Virgin (in the UK) with extra pages in the smaller format adopted for the remainder of the series. By the time of the strips collected in the Harper books, *The Road to Hell* and *How to go to Hell*, Groening's mind was increasingly on *The Simpsons*. More and more strips were reliant on a single illustration photocopied and repeated or marginally altered from panel to panel, and the humour evaporated altogether at times. If you enjoy The Simpsons, you should really find these books.~FP
Recommended: *Akbar & Jeff's Guide to Life, Childhood is Hell, Love is Hell, Work is Hell*

LIFE IS CHEAP

Dee Vee: *One-shot 1998*

Artist Tony Single and writer Marcus Moore sit around and talk about death and attitudes thereto. It's charmingly handled with each throwing a few barbs at the other, and making salient and amusing points. The whole is nicely offset by a back-up strip detailing a waitress' trip through other snippets of conversation to serve the pair. All in all, a success.~WJ

THE LIFE OF CHRIST

Marvel: *1 issue 1993*

Marvel present a radical origin of a new superhero by starting with his birth. The guy's name is Jesus, and my guess is that the angels who keep turning up give him superpowers, and the guy John, who's born a few months before, will be his arch-enemy. We'll never really know, though, because this was cancelled after one issue.~FP

LIFE OF POPE JOHN PAUL II

Marvel: *One-shot 1983*

Reputedly one of Marvel's best-selling comics ever, one wonders where the idea of doing a Popeography came from. Probably the same source that suggested *The Life of Christ*, published the same year, perplexingly in February, rather than at Christmas. Short on action, unless you get all excited about Papal Bulls.~FJ

LIFE QUEST

Caliber: *6 issues 1997-1999*

Christian parable set at the end of Earth's history as an isolated farmer uses his young daughter and their four mutant farmhands to smuggle seeds of hope to a beleaguered and enslaved populace preparing for the coming of the messianic and mysterious Seed King. A familiar tale, gently told and beautifully illustrated by Matt Vander Pol.~WW

LIFE,THE UNIVERSE AND EVERYTHING

DC: *3 issue miniseries 1996*

Sequel to *Restaurant at the End of the Universe*, as Neil Vokes replaces Steve Leialoha on pencils. Adapts the pre-penultimate, third book of the *Hitch-Hiker's* trilogy in an unevenly edited form that contains many passages which simply seemed like a good idea at the time.~APS

LIFE UNDER SANCTIONS

Fantagraphics: *One-shot 1994*

It's doubtful anybody outside the area really understands the reasons for the conflict that tore Yugoslavia apart. Here Serbian cartoonist Aleksandar Zograf tries to make sense of what occurred on a day-to-day basis, and the world's reactions to it, eventually evoking a memorable image of a land without Mickey or Donald as Disney uphold the international embargo.~WJ
Recommended

LIGHT

Print Mint: *One-shot 1971*

The loosest of visual narratives ties together this collection of art from Greg Irons. The theme is 'War is Hell', and the collection of psychedelic and gory (often simultaneously) images makes the point emphatically. Irons was an accomplished draughtsman and his expressive, fluid line is enhanced here by a dazzling use of colour. Those interested in a story better look elsewhere, but for art fans this is a wonderful collection. And Nixon, Agnew and Reagan appear for good measure. Of course.~DAR

THE LIGHT AND DARKNESS WAR

A Vietnam veteran experiences flashbacks and hallucinations, causing him grave concern, especially when it transpires they may not be hallucinations, but trips into another dimension, where Leonardo DaVinci and other dead geniuses rally forces for the ultimate battle. Imaginatively and lovingly put together, with stylised but meticulously crafted art by Cam Kennedy.~HS

LIKEWISE

Slave Labor: *1 issue + 2002 to date*

Following from *Awkward, Definition* and *Potential*, which cover her life from ninth to eleventh grade, *Likewise* is Ariel Schrag's account of her senior year at High School, and at three-hundred and seventy-eight pages is due to be published over eight issues. 1 covers her break-up with girlfriend, Mabel, and a long discussion with friends about 'It', not quite smart or intelligent, but somehow a defining personality trait. Schrag's stream of consciousness narrative owes much to James Joyce, but, with her natural dialogue, is engrossing. Her artwork can seem crude, but every gesture and emotion is measured, drawing the reader into the events.~NF

LI'L ABNER

Kitchen Sink: *27 volumes 1988-1998*

Newspaper readers first met Abner Yokum and had their first glimpses of his Kentucky home of Dogpatch on August the 22nd 1934. A simple country boy from the backwoods, Abner was anything but little. There was no shortage of female attention either – especially not in a community where once a year the woman could propose marriage to the menfolk with no hope of refusal. Sadie Hawkins Day, first seen in 3, is just one of the many inventions creator Al Capp introduced into his daily strip over the years. The women of Dogpatch fell into three handy categories: married, just plum ugly or ravishingly beautiful and available. Abner gets courted Sadie Hawkins style by his girlfriend Daisy Mae. As the strip matured the humour gained more political content, making any collection a social document of sorts. 12 is the volume containing Basil

Wolverton's famous Lena the Hyena, winner of Capp's contest to create the ugliest woman, and 18 sees Abner and Daisy Mae finally marry. Various famous characters joined the cast over the years – Hairless Joe and his Red Indian pal Lonesome Polecat in 1939, ripe-smelling bombshell Moonbeam McSwine in 1941, the Shmoos in 1948 as well as Abner and Daisy Mae's miracle baby Mystrious Yokum born in 1953.

A year later Capp was employing Frank Frazetta to actually draw the strips, and in his debut volume, 20, he's even in the strip as Frankie, as Capp parodies the film *The Wild One*. Frazetta drew until volume 27, covering 1957 Lou Fine was among others who would later draw the strip. The collections are printed landscape format so that two dailies can run on each page. After a monster 234 pages covering 1934 and 1935 in 1, each volume runs between 160 and 184 pages and covers approximately one year of dailies to 1961. Ultimately the humour is dated by many satirical undertones and attitudes that have passed their sell-by dates, but Capp's work remains a great example of stripcraft. The most consistently entertaining period is probably the 1940s although the politics become far more overt in the 1950s and 1960s.~SW

LILI

Image: *1 issue (0) 1999*

Brian Michael Bendis is prominently named on the cover, but he only scripted this story of the biblical Lilith returning to Earth to cause an epidemic among women. It's a slight story leaving that "so what?" feeling as the characters are not well enough drawn to make you care.~FP

LILITH

Antarctic: *4 issues (0-3) 1998*

As if the world didn't have enough manga style warrior-bimbo stuff. Ben Dunn's Lilith is the daughter of a demon and an angel and thus has leathery wings (when Dunn remembers to draw them), but she has no other distinguishing characteristics, and you'll save a heap of braincells if you leave this one on the shelf.~FC

LINCOLN-16

Scarwood Productions: *2 issues 1997*

Artistically, creator Geof Isherwood is in prime Barry Windsor-Smith mode, and his densely plotted science fiction fantasy defies a brief precis. It's imaginative stuff, though, and presents a whole spectrum of captivating characters and concepts. In fact, dare one say "Kirby"? That it only lasted two issues makes Lincoln-16 no more than a curiousity, but as brave failures go it's near the top of the list.~WJ

LINDA CARTER, Student Nurse

Marvel: *9 issues 1961-1963*

An attempt at taking the 'fluffy girlie' comic style of *Millie the Model* and applying it to a more workaday environment. *Linda Carter*, drawn in a semi-realistic style by Al Hartley, didn't know whether to be soap or comedy, and failed to be either, though the stories now have a camp nostalgic charm. Hey, any comic featuring paper dolls emblazoned 'Let's Dress The Boys!' can't be all bad... ~HS

LIONHEART

Awesome: *2 issues 1999*

Ian Churchill and Jeph Loeb concoct a moribund tale of sexy archaeologist Karen Quinn possessed by a biblical force that first afflicted Adam and Eve when they were evicted from Eden. A thinly veiled excuse for semi-nude women to posture, punch absurdly proportioned men, and pout. Awful.~WW

LISA COMICS

Bongo: *1 issue 1995*

An awkward attempt at presenting a teaching aid with *The Simpsons* cast, as Lisa Simpson is spirited away to an adventure in Wordland. A rare Bongo comics failure.~FP

LITTLE GLOOMY

Slave Labor: *6 issues* †, *1 Special 1999 to date*

Pretty tale of a cute little girl and the cute monsters and devils who all fancy her, set in the town of Spooksville. Drawn in a broad animated style, it's a sharp blend of soap opera and b-movie madness, as seen through the eyes of a Goth burn-out. Vying with the romantic shenanigans are such icons of the fantastic as invisible men, intractable mysteries and even Gloomy's evil doppelganger. Great art and scripting, but fright fans should be warned that it's more about the dating scene than the twilight zone.~WW

The Adventures of THE LITTLE GREEN DINOSAUR

Last Gasp: *2 issues 1972-1973*

Unaware of the publication dates the assumption would be this was yet another home-produced title hitching the slipstream of *Teenage Mutant Ninja Turtles* success. That it's a 1972 underground comic owing more to Carl Barks than Robert Crumb is surprising. The little green dinosaur is a curmudgeonly soul occupying a world of walking, talking and scheming mice and rats, and smarter than all of them. There are concessions to the form of underground comics by way of sex and nudity, but they're forced and break-up the story. A pioneering oddity, but no more.~FP

LITTLE GREY MAN

Crazyfish Comics: *One-shot 1996*

Clint Eastwood, Chow-Yun Fat and Toshiro Mifune, the Cinematic Triad, have been brought to life as government assassins. After slaughtering his race (but letting him live), little grey man sets off on a mission to understand what happened, with help from El Mariachi, an armoured robot turtle and others. Scott Morse's "nonsensical tale of unexplained phenomena for lovers of cinema" is just that, rendered with his heavy blacks, but neither interesting nor funny.~NF

LITTLE ITALY

Fantagraphics: *One-shot 1991*

This is one of Eddie Campbell's most charming collections, gathering together a number of scribbled strips produced during a series of visits to Australia to spend time with his prospective wife and her family. The two 'Pajama Girl' stories, reprinted from *Taboo*, sit a little uneasily against the observational pieces. At the heart of the book is 'Little Italy' itself, a cleverly constructed piece about Catholicism and mysticism where the author muses on tradition in families and how it really relates to religious belief, studded with gems of observational humour. Even better is 'This Happened Yesterday', in which the narrator's doctor tries to demonstrate, using his hands and mouth, how an infection got into the narrator's penis – a great piece of bigfoot cartooning. It's collected as part of *Alec: Three Piece Suit*.~FJ
Recommended

LITTLE LIT

Raw Junior/Harper Collins: 2 *Volumes + 2000 to date*

Conceived by editors Art Spiegelman and Francoise Mouly as being in the tradition of old hardback anthologies for children, these are stunning volumes, although fearless acceptance of the Charles Burns puzzle page in 1 and the visions of Kim Deitch in 2 might be asking a little much of children. In addition to amazing strips from the likes of Dan Clowes, Lorenzo Mattotti, David Mazzucchelli, and Joost Swarte in 1 and Jacques Loustal and Lewis Trondheim in 2, these are packed with games and puzzles. Chris Ware typically goes that extra obsessive mile for 1's endpaper 'Fairy Tale Road Rage' game, and in 2, subtitled 'Strange Stories For Strange Kids', Kaz's endpapers are fake instructional bubblegum cards teaching how to draw cartoons. The editorial vision is international and extends to involving creators better known for animation, newspaper strips (Jules Feiffer, Posy Simmonds in 2) and children's book illustration such as Martin Handford (of *Where's Wally/Waldo?* fame, 2), David Macaulay (1), Barbara McClintock (1) and Maurice Sendak (2). There's also

---

* Available in a collected edition

the timeless charm of Walt Kelly (1) and Crockett Johnson (2). Children be damned! These are too good for them.~WJ
Recommended: 1-2

Disney's THE LITTLE MERMAID

Marvel: *12 issues 1994-1995*

Trina Robbins and Mary Wilshire are among the big names (which include Marty Pasko and Peter David) to produce an engaging selection of one-off and complete yarns of Ariel, Flounder, Sebastian and all the undersea characters in a series set just before the movie starts. It's a winning blend of adventure, magic, charm and skullduggery from an impressive cast of undersea baddies that's a good read for kids of all ages.~WW

LITTLE MISTER MAN

Slave Labor: *3 issue miniseries 1995-1996*

Very much in touch with his inner child, James Kochalka's stories will leave most commenting "so what?", but there are some who highly regard his stream of consciousness plots, discursive style and mythologising of mundane events. Here we have a child of uncertain origin, his robot, and his bizarrely behaved foster-parents. A case could be made for this being tragic allegory, but it's unlikely. It starts slowly, goes nowhere, and ends arbitrarily. For the converted only.~WJ

LITTLE MONSTERS

Now: *6 issue miniseries 1990*

Absolutely awful spin-off from a very forgettable movie wherein Maurice the Monster takes young Brian and his school chums for another scary adventure in the magical land under the bed. The real horrors are the script and art on this lame rubbish.~WW

The Complete LITTLE NEMO IN SLUMBERLAND

Fantagraphics/Titan: *6 volumes 1989-1991*

As the name suggests, this series of hard-backed collections reprints the complete run of Winsor McCay's masterful *Little Nemo in Slumberland*, which ran in the colour sections of Sunday newspapers from 1905 to 1911 (vols 1-4), and *Little Nemo in the Land of Wonderful Dreams*. The latter is the same strip in all but name, continued for William Randolph Hearst from 1912-1915 (vols 5-6). The strip was revived again in 1924, these pages remaining unreprinted.

Little Nemo is widely considered one of the all-time classic newspaper strips. It deals with the surreal dreams of a small boy, the fantasy worlds to which those dreams take him, and the bizarre creatures he meets there. While the 'plot' advances little over the strip's entire run, the strength is in McCay's wonderful artwork. His fantastic cityscapes and innovative use of colour, impressive as they are today, were decades ahead of their time in the first decade of the century, when sequential art was still in its infancy. These volumes, complete with historical notes on McCay's career, are unbelievably beautiful – even after April 1911, when full colour is abandoned in favour of less sophisticated tints. Although it's difficult to single out any strips from the others when the overall quality remains so consistently high, the Christmas strips of December 1905 (vol 1), the storm-tossed houses of October 1908 (vol 3) and the airships battles of January 1909 (vol 3) stand out. It is a desperate shame that cinema animation and political cartooning eventually seduced McCay away from Little Nemo.

Although some of the depictions in the strip could be pulled up by today's standards of political correctness, the only real criticism which can be levelled against the run is that if you've read one Little Nemo you've really read them all, although you certainly haven't seen them all. At times the constant punchline becomes a familiar friend as the reader knows, as does Nemo himself, that whatever predicament he finds himself in he'll have escaped from by the coming morning when he wakes up. The popularity of the character over eighty years since his last appearance, and more than sixty since McCay's death, is a fitting testament to the quality of the work. If you only ever buy one complete collection of newspaper strips, make it this one.~JC
Recommended: 1-6

LITTLE ORPHAN ANNIE

Fantagraphics: *5 volumes 1992-1996*

Harold Gray wrote and drew his newspaper strip *Little Orphan Annie* from 1924 until his death in 1968. Fantagraphics collected only a fraction of this immense saga, concentrating on Gray's work from the 1930s, often held to be the cartoon's prime period. Gray's work boasted a unique combination of sentimental melodrama and robust free market politics. The fiesty Annie and her faithful mutt Sandy would be put through all kinds of woe before they inevitably trounced the forces of wickedness. An early 1930s storyline, collected in volume three of this reprint series, has Annie desperately searching for the missing Sandy. No less a reader than Henry Ford personally wrote to Gray requesting a happy resolution. This kind of audience involvement was a result of Gray's meticulous narrative structuring. Almost without exception, each daily strip corresponded to a single day in Annie's life. Over the course of a week's action, readers might come to feel they were following an especially exciting diary, even if Annie and her cohorts didn't actually grow any older over forty years.

Gray's clean, functional artwork contrasted the safe autumnal heartlands of suburbia with the danger and darkness of an anti-American underworld. Annie's notoriously empty eyeballs became Gray's stylistic signature, blank slates upon which readers could inscribe their own dreams and aspirations. Gray's moral universe was a brutally simple one: capitalism (good), communism (bad), organised labour (bad), plucky self-determination (good), welfare (bad), and so on. In volume four Daddy Warbucks, the ultimate 'self-reliant individualist', cracks the heads of a few union troublemakers, before taking on corrupts cops, lawyers and cynical do-gooders like J. Preston Slime. To counterbalance this strain of social realism, Gray also introduced supernatural motifs to his strip: volume 5 marks the first appearance of the Indian mystic Punjab.

Little Orphan Annie inspired films, a radio serial, numerous merchandising spin-offs and a hit musical. Although the strip is dutifully hailed as an American classic, one gets the feeling Gray's work is little read these days. While deeply felt, it's hectoring tone, stately pacing and simplistic moralising soon become wearisome, and it's easy to understand why Annie's eternally cheerful demeanour partly inspired Harvey Kurtzman to create the raunchy satire *Little Annie Fanny*.~AL

LITTLE RED HOT

Image: *3 issue miniseries 1999*, 3 issue miniseries ('Bound') 2001*

The bare bones of the first story concern a female assassin named Chane accepting a contract to locate God for a guilt-ridden millionaire. Chane happens to be the devil's spouse, and events are set against a brewing political crisis caused by the impending reversion of the Panama Canal to Panama. Faith, love and redemption play their part. Originality is sadly an all too rare commodity in comics, but Dawn Brown supplies a new concoction. Her art, strongly influenced by Frank Miller, falls short in terms of background and variety of viewpoints, but the readability of her story carries it. That talent, however can't compensate for the addition of Brown's colouring for 'Bound'. At best it's poor, at worst hideous, and it's always distracting. 'Bound' also has a weaker plot, with a predictable twist, so overall it's disappointing.~FP
Recommended: 1-3

LITTLE RONZO IN SLUMBERLAND

Slave Labor: *One-shot 1987*

Heartfelt, but heavy-handed condemnation of the American right's policies via Ronald Reagan's dreams. Jim Bricker's cartooning is good, but it shouldn't really take twenty-two pages to deliver a very unfocussed rant.~WJ

LITTLE SCROWLIE

Chi Comics: *4 issues + 1999 to date*

It's not often a style of art can be genuinely claimed as being unique to comics, but Jennifer Feinberg's managed it with a simple art nouveau style drawing heavily on Klimt's design. Her pupil-less faces are nonetheless expressive in illustrating a story that begins by shoving elements of *101 Dalmations* into what's largely a loving ridicule of goth culture. It's sustained over three issues, but by 4 any plot has been thrown out of the window. Little Scrowlie, by the way, is the resident cat in a flat shared by two vacuous goth girls and largely incidental to anything. This won't have a broad appeal, but it's worth anyone's time to look at the art.~FP

LITTLE SHOP OF HORRORS

DC: *One-shot 1987*

An adaptation of the musical film about mild-mannered florist Seymour, and the way his life changes when he discovers a strange, alien plant with an insatiable appetite for... But that would be telling. The adaptation is competent enough, but without the songs and the musical razzmatazz, the weakness of the story becomes very apparent.~FC

LITTLE WHITE MOUSE

Caliber: *4 issue miniseries 1997-1998*, 3 issue miniseries 1998-1999*, 1 issue 2000*

Blue Line Pro: *4 issue miniseries ('Entropy Dreaming') 2001, one-shot ('Retro-Mix') 2002, 4 issue miniseries ('Open Space') 2002-2003*

Loo is a young woman, stranded on a remote mining satellite after the destruction of the ship taking her to a new school. Unable to summon assistance because the satellite computers will not acknowledge her existence, Loo is forced to survive as best she can. Helping her to overcome her loneliness are two robots, Boris and Dieter who are responsible for maintaining the satellite crew's skeletons like any other piece of inert machinery. Adding to the mystery of the satellite crew's deaths is Pascal who may or may not be a ghost and can only be seen by Loo. Loo's also trying to transfer her dead sister's consciousness into a suitable container and has a surprising meeting with some pirates. In the second miniseries, Loo's brother, Xi and friend, Jake Armani start their own search for Loo. In the third (which starts by reprinting the final Caliber issue), with the satellite shutting down, Loo tries to find a way off before the loss of atmosphere. The 'Retro-Mix' issue contains three short stories giving some background information on the characters of Loo, Jake and Pascal. 'Open Space' begins with Loo's first human contact after escaping from the satellite, though has no immediate explanation for a failure to try to contact her family. With a well developed premise and setting, compelling characters and clean artwork that improves with each series, Paul Sizer has created an entertaining and engaging story.~NF

Recommended: first miniseries 1-4, second miniseries 1-3, 'Entropy Dreaming'

LIVINGSTONE MOUNTAIN

Adventure: *4 issues 1991*

There's a living stone mountain where dragons and all kinds of unimaginatively designed humanoid creatures consort. *Fish Police* creator Steve Moncuse had a very good idea for a comic, but it wasn't this dull fantasy nonsense.~WJ

LIZ & BETH

Eros: *4 issue miniseries 1991*, 6 issue miniseries 1992*, 4 issue miniseries 1992**

If you have fond memories of the *George and Lynne* newspaper strip, *Liz & Beth* is the porn comic for you, horny housewives in their scanties stories that go a little bit further. In series one Beth takes her married friend to a masked ball where they both are rogered a lot. Liz reminisces about being spanked by her auntie, then delivers a skirt to a difficult customer from her dress shop and gets rogered... well, you get the idea. By series three we've had Lady Chatterley-style gardeners, mature lesbians, cheeky yokels and pvc freaks, and when they're at a loose end the insatiable twosome turn on each other. Artist/writer Georges Levis gives everything a 1970s feel, although most stories are from the 1980s. Very 'vanilla' by some standards but extremely well done if your fantasies run no further than girl on girl action, the odd spanking and maybe a corset or two for good measure.~FJ

LLOYD LLEWELYN

Fantagraphics: *6 issues 1986-1987*, one-shot 1988*

Before he created the rich and varied sources of amusement in *Eightball*, Dan Clowes was hung up creating the adventures of Lloyd Llewelyn, beatnik detective and coolest cat in town, whose stories came "from the weird side of unusual". Many of the Clowes trademarks are there, including strange characters, mad science and retro-1950s symbolism, but the stories never attain the absurd but genuinely thrilling intensity of his later mysteries. Style over content, and all that. Clowes' drawing at this stage lacks the clarity and assurance of his later work. Thin-line inking gives a mechanical look to the pages, which is further accentuated by the use of a single light grey tone for shadows, and although there's a lack of background detail many of the panels look too cluttered. The first six issues are magazine format, and the one-shot is traditional comic size.~FJ

LOBO

DC: *65 issues (0-64), 4 annuals 1993-1999*

Introduced in *Omega Men* 3, Lobo is the biggest, meanest bastich in the galaxy, a cigar-chomping, bounty-hunting, mercenary powerhouse able to go head-to-head with the DC Universe big guns. Wherever he goes, violence follows, with dismemberment and death portrayed in exaggerated cartoon fashion. Lobo's very much a one-note joke, albeit one that stands repetition. Writer Alan Grant created many suitably ridiculous supporting characters and possesses a deft touch with comic dialogue, while artists Val Semeiks and John Dell (to 18) were adaptable enough to know when to play it straight and when over-the-top slapstick violence was required. Most issues give little plot, but quite a few good jokes strung together, acknowledged by Grant in 36's pastiche. Anyone enjoying one issue should go on looking. Start with 10's religious satire, featuring a good telling of the classic healing-the-sick joke, Lobo's birthday party in 25 or, for an atypical sample, start with the baby Lobo in issue 0 as a full origin is told. From 19 different artists abound, some better than others, with Carl Critchlow consistently good, presumably why he draws roughly four out of every five issues between 31 and 54. His replacement Greg Luzniak is less consistent. Coupled with Grant seemingly running short of ideas or losing interest aware of imminent cancellation, issues from 57 are the weakest of the run.~FP

LOBO Miniseries and one-shots

DC: *4 issue miniseries 1990-1991*, one-shot ('Paramilitary Christmas Special')1991, 4 issue miniseries ('Lobo's Back') 1992*, one-shot ('Blazing Chain of Love')1992, 4 issue miniseries ('Infanticide') 1992-1993, one-shot ('Portrait of a Victim') 1993, 4 issue miniseries ('UnAmerican Gladiators') 1993, one-shot ('Convention Special') 1993, one-shot ('Lobocop') 1994, 4 issue miniseries ('A Contract on Gawd') 1994, One-shot ('In the Chair') 1994, one-shot ('The Brave and the Bald') 1995, one-shot ('Bounty Hunting For Fun and Profit') 1995, one-shot ('Big Babe Spring Break Special') 1995, one-shot ('I Quit') 1995, one-shot ('Lobo Goes to Hollywood') 1996, 4 issue miniseries ('Death and Taxes') 1996, one-shot ('Fragtastic Voyage') 1997*

In general the quality of the regular title is far higher than the one-shots and miniseries, which suffer from a paucity of plot and few supporting characters able to play off Lobo's one-string personality. The best *Lobo* remains the first miniseries, in which Lobo is reacquainted with his school teacher. It says everything about the character while he's still fresh in four mindless mayhem-filled issues written by Keith Giffen and Alan Grant, and drawn by Simon Bisley. *Lobo's Back* explains Lobo's immunity to death, but, a good joke with the covers of the first issue apart, the formula is already becoming stale, and

Bisley jumps ship with 3. The patchy 'Infanticide' is Giffen's swansong, and he also draws the series as Lobo's many children come looking for him. The regular title's main art team of Val Semeiks and John Dell début on 'Portrait of a Victim', while the 'Convention Special' has a high quota of funny digs at the comics industry, and is excellently drawn by Kevin O'Neill, taking labelled visual gags to new heights. 'UnAmerican Gladiators' is the best miniseries since the first – Wacky Races gone mad. Lobo participates in a televised celebration of violent excess, pitched against the survivors of the neglected *Outcasts*. John Wagner co-writes and Cam Kennedy's inventive visual gags, fused to a ridiculous cast, hilarious script and silly situations, make for a great read. 'A Contract on Gawd' has its moments, but is stretched thin over four issues. Martin Emond's art on the teaming with Deadman in 'The Brave and the Bald', and on 'Lobo in the Chair', is magnificently excessive, as is Carlos Ezquerra's for 'I Quit'. As ever, story content is slim, but not as slim as 'Fragtastic Voyage' in which a shrunken Lobo not only has to combat bodily defences but the ugly art of Hermann Mejia. Caveat emptor.~FP

Recommended: *Lobo* 1-4, 'UnAmerican Gladiators' 1-4

THE LOCH

Penny Farthing: *3 volumes 1998-1999*

Marlaine Maddux produces a fable for all ages following the life of Nessandra, a young plesiosaur, the last of her kind, who befriends the other dwellers who live below the waters of a small Scottish lake. She grows from a vulnerable youngster to compete for the role of leader of the loch population. Charming fantasy illustrated by Courtney Huddleston, Johnny Beware and Chris Chuckry.~WW

Record of LODOSS WAR

CPM Manga: *22 issue limited series ('The Grey Witch') 1998-2000*, 8 issue limited series ('Lady of Pharis') 1999, 7 issue limited series ('Deedlit's Tale') 1999-2000, 16 issues + ('Chronicles of the Heroic Knight') 2001 to date*

Long-running Japanese fantasy serial that owes a huge debt to *Lord of the Rings*, set on the magical island of Lodoss, where Gods of Evil have been entombed, and where they naturally break out every so often. Whenever that happens, or simply whenever a wizard, King or demon gets too uppity, heroes arise, band together and eventually get it all sorted. Lodoss, where humans, dwarves, elves, knights goblins and ogres all dwell acts as a backdrop for author Ryo Mizuno and a variety of artists to tell old fashioned adventure tales. The first of them was 'The Grey Witch', introducing the young knight Parn, Etoh the priest, Ghim the Dwarf, Deedlit the (female) Elf, Slayn the magician and Woodchuck the thief. An invasion of Lodoss from the dark island of Marmo is set against a historic legend of seven heroes who defeated the Gods of Evil when they last broke free. One of those heroes, Beld, is now the Emperor of the invading army and employs the powers of The Grey Witch to conquer the land he lost his soul to save. Yoshihiko Ochi draws it well enough but it still a very pedestrian tale. 'The Lady of Pharis' recounts that earlier battle from the viewpoint of Flaus, a young girl who is leader of the warrior priests of Pharis, God of Light. Following the Grey Witch, much of the drama is diminished, but the European-style art of Akihiro Yamada makes a pleasant change from the standard manga fare. Next up for translation was the remorselessly coy 'Deedlit's Tale' wherein the mysterious Elf of the Forest of Never Return, is finally reunited with Parn. Setsuko Yoneyama handles the visual paraphernalia competently enough, but how much "will they – won't they" nonsense can even a rabid fantasist stand? Moving into the realms of a generational novel, 'Chronicles of the Heroic Knight' details how apprentice knight Spark has to gather a new band of heroes when the Crystal Ball of Spirit is stolen by Dark Elves for Vagnado, Sorceror of Marmo. Can the neophyte warrior-band thwart the plans of the evil magician and save the endangered Kingdoms of Lodoss? Set some years after the 'Grey Witch' some of the cast are still around, and Masato Natsumoto draws the same old story efficiently, but you really have to love this stuff to enjoy it being rehashed over and over again.~WW

LOGAN'S RUN

Marvel: *7 issues 1976-1977*

Written from the movie shooting script by Gerry Conway (1) and David Kraft (2-5), it includes scenes that didn't make the film, adding something to the experience for fans. The artwork, by George Pérez and Klaus Janson, however, is merely competent without being exciting. John Warner and Tom Sutton start their epilogue to the film in 6 and 7 as the displaced citizens try to make a new life in the damaged city. The story was left unfinished with the series' cancellation. Apart from the Paul Gulacy cover, 6 also offers the bonus of a short strip by Scott Edelman and Mike Zeck featuring The Destroyer and Thanos.~NF

LOGAN'S RUN

Adventure: *6 issue miniseries 1990-1991*

Adapting from the novel rather than the film means scenes of rumpy-pumpy are intact, but that's the only reason to search this out in preference to the Marvel adaptation. The prolific Barry Blair is responsible, and his elfin figures detract from the story, but this was successful enough to prompt a follow-up adapting the novel's sequel *Logan's World*.~FP

LOGJAM

Old Head Press: *5 issues + (0-4) 1997 to date*

A very apt title considering the problem Philip Szostek has getting to the nub of his story. In the zero issue a long conversation between a priest and a teacher raises many questions and offers not a single answer. Thereafter another teacher awkwardly introduces himself to a precocious pupil, and discovers the boy's parents to be extremely intelligent. In the town there would appear to be some antipathy to formal education. This being the extent of the plot over four issues, most would consider long diversions into table tennis (3) or a song (seven pages in 4) wilfully frustrating. Szostek's cartooning is deceptively simple and quite wonderful, but his writing leaves a lot to be desired.~WJ

Superman's Girlfriend LOIS LANE

DC: *137 issues 1958-1974, 2 issue microseries 1990, one-shot ('Girlfrenzy!') 1998*

The cover to issue 1 has Lois riding a broomstick, dressed in rags, for a story called 'The Witch of Metropolis'. One could easily change the 'witch' to 'bitch', because she was the ultimate girlfriend from hell. Lois had débuted twenty years previously in the first Superman story in *Action Comics* 1, where she was introduced as a glamorous reporter who more or less took an instant dislike to Clark Kent, while lusting over Superman. In *Superman* 17, she began to suspect that they might be the same person. Her snooping around the topic, and her character in general, proved popular enough for her to become the first of the Superman cast to have her own strip, 'Lois Lane, Girl Reporter', which ran in *Superman* 28-42. It took another fifteen years, though, before she had her own title, introduced after try-outs in *Showcase* 9 and 10. 1-79 present stories on a few regular themes. Throughout the 1940s and early 1950s Lois' character in Superman was as a gutsy reporter and a bit of a glamour girl. In the late 1950s and 1960s her adventures were more romantic in nature, with assorted plans to win Superman's hand in marriage, to which end she would go to almost any lengths. She's also portrayed as a snoop and spoiled brat, with her selfishness always at the forefront. She did, though, seem quite innocent and unaware of her bad traits. The terms 'implausible' and 'unrealistic' come to mind when considering Lois' adventures until the late 1960s, though they all made sense within the Superman mythos of the time. Lois' main aim in life was to marry Superman, but his affections sometimes swayed towards red-headed Lana Lang, his childhood sweetheart, now a TV reporter. Many a story showed Lois and Lana confronting each other, rivals for Superman's attentions, and the super-cad just led them on. An example is 50, in which Lois goes back in time (something she managed as often as consuming hot dinners) to prevent Superboy kissing Lana and starting their romance. Lana was usually presented as a nicer person and a better dresser, with a flashier job, although the rivalry with

Lois did get to her. Not that she was entirely innocent of plotting schemes to deal with Lois either, banishing her into the Phantom Zone in 33. In 21, one of many stories where the two gained superpowers, at least for an issue, there was a battle between Super Lois and Super Lana. Another time-travel story occurs in 37, in which Lois goes back to meet Leonardo Da Vinci. Guess who actually posed for the Mona Lisa? And here's Lucretia Borgia, looking incredibly familiar, with red hair. Lana lookalikes in the past was another common theme. In 59, though, Lois rather oversteps the mark by not only going back into Krypton's past before it explodes, but initiating a fling with Superman's father Jor-El. The woman had no morals. This wasn't the first time she'd had her head turned, having courted Aquaman (as a mermaid) in 12, Astounding Man in 18, Titan Man in 79. What a hussy! Some romances were hoaxes, one being 'The Irresistible Lois Lane' in 29, when she's caught smooching Aquaman (again), Batman and Green Arrow. Her intentions were good however, as she was merely passing on some Red Kryptonite in her lipstick, enabling the heroes to neutralise a Green Kryptonite rock poisoning Superman at the time. They certainly don't write elaborate plots like that anymore! Lois did actually marry Superman a few times, or so it seemed. For a really classic 1960s-style Lois Lane story you can do no better than 15, which features the 'Superman Family of Steel'. For once it wasn't a hoax, imaginary story or dream as Superman and Lois tie the knot, except they're doubles! So what would happen if Superman and Lois did marry? This was tried and tested many times in 'imaginary stories', the first of which was in 19. She was also shown to have married Lex Luthor on occasions (34, 46). A classic Superman marriage story is 'The Three Wives of Superman' in 51, in which he marries Lois, Lana and former mermaid sweetheart Lori Lemaris, and they all die!

As well as attempting to marry Superman and discover his identity, travelling in time and following her career as a reporter, she was also a volunteer nurse (43), she ran a fan club (50), and it's a little-known fact that she once ran for the Senate (63-64). Before leaving Lois' golden era there are two other issues of note. 70 features the début of the new-look Catwoman, and 73 offers an infamous kinky cover with Superman bound to a bench by Kryptonite handcuffs while Lois is whipping a puppet of him. Almost every issue to 79 was drawn by Kurt Schaffenberger, semi-humorous yet realistic style suited the mood to perfection, and you couldn't have asked for a better storyteller. The writers remain uncredited, but it's known that editor Mort Weisinger had a heavy hand in the plotting. The consistency of the issues is such that it's difficult to recommend any issue above the others, so prospective readers are directed to the giant-size issues that reprinted many a classic, 68, 77, 86, 95, 104, and 113. Before starting, put all disbelief to one side. A nice comfy armchair and a cup of cocoa also add to the ambience.

There came a time, though, when the comic had to progress: the first hint was 79's Neal Adams cover, and in 1968, 80 presented a new-look Lois Lane. The cover said it all, with Lois ripping out the 'girlfriend' part of the logo and throwing it to the floor as the cover proclaimed, "At last, the impossible come true! It's splitsville for Lois and Superman!" Lois is fed up with Superman and decides the time has come for a change. She gets a brand new wardrobe, including some sophisticated mini-skirt numbers, some sizzling bikinis, and a few "Sun and fun sport outfits". Things were never the same. Schaffenberger's art didn't suit the new, more plausible style of story, and from 82 Irv Novick took over, but seemed no more at home. There was the occasional glimpse of the new Lois DC were trying to project, such as when she joins a motorcycle gang in 83, but on the whole it was never entirely successful. The Lois and Lana rivalry came to a head in 99-100, with Lois on trial for the murder of Lana. A change that was more than cosmetic came with 105, when we're introduced to regular supporting character and back-up strip, 'Rose and The Thorn'. It was a dramatic story, written by Robert Kanigher, about a young woman called Rose Forrest, who at night, unknown to her, takes on a different personality as the vigilante Thorn. As if to freeze her in the early 1970s, as illustrated by Ross Andru and Mike Esposito, she wore a lime-green bikini outfit and green thigh-length boots. Despite discussion of sexist costumes being low on the agenda, this was the era of relevance in comics, and as a reporter Lois was better placed than some characters to participate. 106 has a story, perhaps now a bit dated, but well-intentioned at the time, in which Lois changes her skin colour for a day, experiencing the problems faced by African-Americans in the ghettos. The theme of racism and bigotry is taken up by Kanigher again in 110, when Lois becomes foster-mother to an orphaned Native American baby. By this time the arrogant snooper of the 1960s was gone, and Lois was thinking about things. Editor E. Nelson Bridwell ensured that Lois Lane reflected the changes in the other *Superman* titles of the early 1970s, with *The Daily Planet* taken over by a TV company run by Morgan Edge who was operating for the evil galactic conqueror Darkseid. Edge was also running Intergang, a powerful criminal organisation, and from 111 there's a succession of excellent stories by Kanigher and artist Werner Roth. The Rose and The Thorn back-up strip is now being beautifully illustrated by Gray Morrow. Lois also became involved in a fight against another criminal gang, The 100, also being fought by The Thorn, and they would occasionally team-up. 119-120 spotlighted problems faced by Lucy Lane, Lois' sister, who apparently dies. 121 is one of the best-ever Lois Lane issues, as a grief-stricken Lois decides to change her life by becoming a freelance reporter writing about serious social problems. 112-123 are all fifty-two-page issues worth looking at not only for the decent Lois and The Rose and The Thorn strips, but for the reprints, including some 1940s stories in 115, 120 and 122, all minor classics.

With the reversion to a standard-size comic there was also a reversion to the old themes, which just didn't work in the 1970s, and this series merged with Jimmy Olsen and Supergirl in Superman Family. Lois continued as a solo feature and as a primary supporting character in the Superman titles. The microseries from Mindy Newell and Gray Morrow used Lois to focus on the serious subject of missing and abused children. It was maturely written and gorgeously drawn, and involved Lois' relationship with her estranged sister Lucy (not dead after all), and with Lana, who is integral to the plot, and certainly not in trivial fashion. There are more plus points for the fact that Superman is nowhere in sight. Missing children is also a theme of the one-shot (part of the *Girlfrenzy!* series), where Lois dons tight outfit and kicks ass. Despite a contrived plot it's a gutsy tale by Barbara Kesel, Amanda Conner and Jimmy Palmiotti. Their version of Lois certainly demanded more attention.~HY

Recommended: 15, 29, 33, 51, 110, 118-121, microseries 1-2

LOLITA

Eurotica: *4 volumes + 1998 to date*

Belore draws in a large, crude, but effective style and he certainly knows his anatomy, chronicling the adventures of his large-breasted heroine and her equally well-endowed friends... not to mention all their many fantasies. Very much a crowd pleaser, with a bit of something for the average guy, pretty much an endless string of shagging and diddling without much pretence of a plot.~FJ

Police Action featuring LOMAX N.Y.P.D

Atlas: *3 issues 1975*

A feeble attempt to produce a detective comic emulating the TV police series prevalent at the time. Lead feature Lomax is a non-starter, and even worse is back-up 'Luke Malone – Manhunter', drawn by Mike Ploog, who seemed to have required something to keep his feet occupied while using his hands to draw *Man-Thing*.~FP

Vertigo Pop! LONDON

DC/Vertigo: *4 issue miniseries 2003*

The second of Vertigo's music based series concerns 1960s rock star Rocky Lamont, musically redundant and pining for the better times. Screening a film he made aged thirty for himself at sixty, he discovers there is a way he can reclaim his youth. Philip Bond's seedy illustrations are great, and while this is Peter Milligan not trying too hard, it's still a sharply observed domestic comedy with plenty of funny moments.~WJ

THE LONE GUNMEN

Dark Horse: *One-shot 2001*

Spun-off from *X-Files* into their own TV series, these conspiracy theorists and paranormal investigators were quickly cancelled. This is a serviceable story with appeal to the already converted from TV writer Jane Espenson and pleasant, if static, art with consistently good likenesses from Paul Lee. Extra points for use of a photo cover clearly showing two actors standing on boxes to appear taller.~WJ

THE LONE RANGER

Pure Imagination: *One-shot 1993*

He wears a mask, rides a horse named Silver, has a pal called Tonto and goes around shooting people; what else could you ask for in a comic called *The Lone Ranger*? As a very big plus, this collection of Cary Bates' rarely seen newspaper strip features almost fifty pages of prime Russ Heath artwork. So what are you waiting for? Hi-Yo Silver awaaaay!~DAR

THE LONE RANGER AND TONTO

Topps: *4 issue miniseries 1994*

After reinventing *Jonah Hex* for the 1990s, Joe R. Lansdale and Tim Truman took on *The Lone Ranger and Tonto* – a pair that hadn't even made it past the 1960s. It's not bad, with an origin of sorts worked into a good character piece about the relationship between the pair. But the plot, about an alien, mummified by the Aztecs and accidentally awakened by train robbers, is a weak reflection of Lansdale's roots as a horror writer. Having said that, Truman's artwork has a pleasing openness and there's a lot for Western fans to enjoy.~NF

LONE WOLF AND CUB

First: *45 issues 1987-1991*
Dark Horse: *28 volumes 2000-2002*

Itto Ogami is the official executioner of the Shogunate, with a loving wife and child, until he falls foul of the political ambitions of the Yagyu clan and is accused of plotting to overthrow the Shogun. His wife is killed and he's ordered to commit ritual suicide, but instead decides to seek revenge as an outlaw assassin. He offers his small son Daigoro the choice of sword or ball. When the sword is picked he embarks on the road to hell, taking his son with him. The pair travel together, Diagoro in a baby carriage, living off the land and by their wits, occasionally earning money as assassins. Kazuo Koike and Goseki Kojima's comic first appeared in Japan in 1970 and has enjoyed huge success, being made into films, plays and a television series. There are twenty-eight volumes (roughly 9,000 pages) of the strip in the original language, reprinted in order by Dark Horse, but selectively by First, which had around sixty story pages an issue in comic-sized format.

Cited as an influence on the visual style of some of America's film-makers, *Lone Wolf And Cub* is notable in the comics world for inspiring Frank Miller (most obviously on *Ronin*), who provided introductions and covers for the first twelve First issues. After Miller, Bill Sienkiewicz (13-24), Matt Wagner (25-36), Mike Ploog (37-44) and Ray Lago (45) drew the covers. Miller and Sienkiewicz covers are re-used by Dark Horse (1-18), followed by new artwork from Wagner. Ogami's 'origin' is presented in several tales (6, 13), and Diagoro's separation from his father on several occasions provides the impetus for the story (11, 33-39). Throughout, bushido, the warrior's code of honour, determines how the characters must react, even to the point where a messenger's job is more important than the life of a child (45). Stories are saved from repetitiveness by the presence of Diagoro, and by Koike's masterly story-telling, pitting Ogami against various members of the Yagyu clan (15, 16, 32, 43), the Kurokuwashu ninja (3, 26), yakuza and, of course, the elements themselves.

Visually the series is amazing, mostly pen-and-ink work with the occasional wash effect, constantly graceful and vital. Small actions can take pages and there's always time to create atmosphere and setting. There's an expressionistic feel to the drawings, which goes hand-in-hand with the storytelling. This is a violent and uncompromising work that nevertheless goes beneath the surface to the heart of the characters and the social mores of the age in which it's set. Not for the faint-hearted, but essential reading for anyone who loves the medium.

The First series offers the benefit of artwork printed at a larger size, as the Dark Horse volumes are in the Japanese format, smaller than paperbacks, and are therefore still worth looking out for, even if only as a way of sampling the series.~NF

Recommended: Dark Horse 1-28

LONE WOLF 2100

Dark Horse: *5 issues + 2002 to date*

Here's a surprise. Updating the concept of the Ronin with a child wandering his world to the future is valid, but deliberately tying it into what's considered one of the greatest Japanese comics ever is, frankly, bizarre. It invites comparisons in which even better creators are going to be considered second-best, and Mike Kennedy and Francisco Ruiz Velasco are hardly considered among the first rank. Let's put that to rest. It's nowhere near as good as *Lone Wolf and Cub*, and certainly lacks its subtlety. The surprise is, Velasco's horrible colouring apart, that it works. Kennedy has plenty of good ideas, and the mood of the original is maintained. This lone wolf is an escaped synthetic life-form programmed to protect itself at all costs, accompanied by the infant daughter of the man who reprogrammed him. Adventure fans could do far worse than investigate. 1-4 are collected.~WJ

LONELY NIGHTS COMICS

Last Gasp: *One-shot 1986*

Dori Seda offers a mixture of autobiographical strips largely concerning her dog, with whom everyone assumes she has an unnatural relationship, and some further pieces on sex. They're all perceptive, delightfully drawn and very funny, with the only mistake in the whole comic being the ill-advised *Weirdo* style photostrip.~WJ

Recommended

THE LONELY WAR OF WILLI SCHULTZ

ACG: *1 issue 1998*

Collecting the feature from late 1960s issues of *Fightin' Army*. Willy Schulz is a German-American GI who spends most of the war separated from any unit, wandering from one sticky situation to another. Writer Willi Franz was barely out of his teens when he wrote this series for Charlton. Sam Glanzman's years of experience in war comics lends the pages a measure of authenticity, but this is, nevertheless, bashed-out stuff.~SW

LONER

Fleetway/Quality: *7 issue limited series 1990-1991*

A big brute with a gun lands on a hostile planet and stumbles from one precarious situation to the next. Originally serialised in five-page instalments in a British weekly comic, the remit was obviously to end each segment on a cliffhanger, so *Loner* is plotted with no more than the following episode in mind, and as such doesn't make for a compelling read. 1-3 have some good David Pugh art, but standards decline thereafter.~FP

LONG HOT SUMMER

DC/Milestone: *3 issue miniseries 1995*

Try to work your way past the positively bizarre, off-putting and almost unreadable logo incorporating a city aflame. Once inside there's a worthwhile story about urban development and renewal, and the consequences of trampling wholesale over the wishes of the residents. Better still, despite this tying into all other Milestone titles for three months, it's easily read and understood on its own. Until the final, and least effective issue, the regular Milestone superpowered characters play their part largely outside these pages, and there's a decent attempt made to portray them as seen by the ordinary humans in Dakota.~FP

THE LONGBOW HUNTERS

DC: *3 issue miniseries 1987**

Chiefly remembered today for writer/artist Mike Grell's somewhat prurient inclusion of a long sequence in which Black Canary gets strung up, whipped and abused, The Longbow Hunters was one of the jumpers on the 'grim'n'gritty' bandwagon in the wake of *The Dark Knight Returns*. Green Arrow becomes involved in some CIA jiggery-pokery, trading his usual collection of special-effect arrows for the more usual metal-tipped, deadly sort as Oliver Queen gets ready to face up to more 'realistic' dangers in the modern world. There's his usual "I'm getting too old for this" worries followed by "I want to be a dad". Some critics have read into this an unpleasantly patriarchal agenda whereby the Black Canary, as soon as she's refused to have his child, spends the rest of the story getting abducted, beaten and generally abused. Although that's stretching it somewhat, there's a nasty, voyeuristic feel about this aspect of the book, which is otherwise eminently forgettable.~FJ

LONGSHOT

Marvel: *6 issue miniseries 1985-1986*, one-shot 1998*

One moment you're in Dimension A being chased by monsters and with no idea who you are, then some sparkly lights and you're in Dimension B being chased by monsters...etc. All that's apparent is that your luck is miraculously good (providing your motives are pure), and the name Longshot arises and you use it. After a while, you discover that Dimension B is called Earth. Writer Ann Nocenti says she created Longshot to be an innocent – a "clean slate" – and a truly feel-good hero. It could easily have been feeble and saccharine, but instead, it's a delight: such imagination, such pace, and so strange. The writing peaks around Issues 2 and 3, then becomes fractionally more predictable (though still above approved safety limits), but Arthur Adams' artwork becomes steadily more assured and intricate with each issue. Wonderful.

The original miniseries was wonderful, anyway. The 1998 abomination by DeMatteis and Zulli plunges headfirst into every pitfall that Nocenti and Adams avoided so deftly, and may leave you scared to pick up any comic for a good four months.~FC

Recommended: 1-6

LOOSE CANNON

DC: *4 issue miniseries 1995*

Superman supporting character Loose Cannon is DC's version of the Hulk, big, brutish and ever more powerful the angrier he becomes. That he's a policeman in his civilian guise isn't enough to deflect the other similarities. There's disturbingly little in the way of a cogent plot, merely testosterone unlimited as Loose Cannon and Eradicator square off.~WJ

LOOSE TEETH

Fantagraphics: *3 issues 1991-1992*

Hilarious anthology from Scott Musgrove and Brian Sendelbach, either in collaboration or separately. Three strips occupy most of the comic. 'Fruitheads' has large-eyed fruit-headed characters committing or suffering acts of extraordinary violence. This juxtaposition of children's cartoons and uncharacteristic behaviour has a longer shelf life than you might expect, as do the scrawled cartoon stories and diary entries of Billy Mathers (age 7), who responds to the world with typical childish cruelty. The other regular feature is 'Fat Dog Mendoza', who would later graduate to a TV cartoon. Shaped like a curling stone and with a voracious appetite, Fat Dog is a surreal blend of matter-of-fact reportage and seemingly stream-of-consciousness ramblings. Visually he lends himself to hilarious images, such as when he becomes Pope, and he can also be found in a Dark Horse one-shot. At least one laugh a page is guaranteed, and how many comics can you say that about?~FP

Recommended: 1-3

LORD PUMPKIN/NECROMANTRA

Malibu: *4 issue miniseries 1995*

The first three issues of this comic tell two stories, Lord Pumpkin's return to his kingdom after striking a deal with Loki and Necromantra's acquisition of power and influence in the same kingdom whilst Pumpkin is away. The final issue brings the storylines together for a rather unsatisfactory conclusion. Both characters are rather repulsive, which makes the story hard to enjoy and the outcome unexciting, but the fresh artwork by Gabriel Gecko (1-4), Kyle Hotz (1,2) and Jeff Lafferty partly compensates. The series is a spin-off from the Ultraverse's 'Godwheel Saga', Lord Pumpkin being a malevolent vegetable while Necromantra is Thanasi, the betrayer of Archimage, now, like Mantra, in a woman's body.~NF

LORDS OF MISRULE

Tundra: *One-shot 1993*

Dark Horse: *6 issue miniseries 1997**

Callow is a Lake District village where Kieron Wallace is sent by his editor to meet Yolanda Marchant, creator of the best-selling Wyrdfane books. Once there the eerie atmosphere of the village begins to unlock Wallace's buried secrets with grim and overwhelming finality. An entertaining horror tale from Dan Abnett and John Tomlinson chillingly rendered by Gary Erskine. Peter Snejbjerg illustrates the miniseries, in which there are more bad things happening in Callow. When the editor of *Eldritch Express* is murdered, her boyfriend and ex-boyfriend take a trip to Callow in search of some answers. The usual crop of haunted hitchhikers, weirdoes and jolly dead people serve to bring these rivals a little closer, but when Jack, a native of the eerie hamlet, is accused of murder he finds that the influence of Callow is no easy thing to escape. It's another well produced terror tale, with appropriate art from Peter Snejbjerg.~WW

LORDS OF THE ULTRA-REALM

DC: *6 issues 1986, 1 Special 1987*

Fantasy, owing much to Edgar Rice Burroughs, telling the story of Michael Savage, a tortured Vietnam veteran who is mystically transferred to the Ultra-Realm, a reality embodying all of the Earth's fears and hopes, ruled by Seven Princes of Light and Seven Princes of Darkness. Doug Moench's script doesn't really have anything to say, and Pat Broderick's florid but rather flat artwork, though distinctive, is only occasionally engaging.~NF

LORELEI

Starwarp Concepts: *6 issues (0-5) 1993-1994*

Power: *1 issue 1996*

Starwarp Concepts: *Series two 1 issue + 2002 to date*

This is a lot better than you'd expect from the badly drawn covers of large-breasted women with their arses hanging out. Not that they're absent inside, just largely better dressed. The central plot concerns a succubus who feeds on the life force of others to keep herself alive, and a photographer on the verge of national fame who's physically sick from the stresses of life. She's about to appear on a TV show, one of the producers of which is prone to murdering women. It's all decently paced and written by Steve Roman in a horror movie style with impending doom around the corner, and the art of David Matthews improves by the issue. With the plot unfinished, it was surprising to see Lorelei return six years later in a sixty-four page comic that reprints 0 and 1, preceded by a new story very much in the 1970s *Vampirella* style. Steve Geiger's art is better than Matthews', but the homage story lacks the style and intrigue of the previous series.~WJ

LORI LOVECRAFT

Caliber: *One-shot ('My Favorite Redhead') 1997, one-shot ('The Dark Lady') 1997, one-shot ('Repression') 1998, one-shot ('The Big Comeback') 1999*

AV Publications: *1 volume 2000, 2 issue microseries ('Into the Past') 2002*

Lorelei Lovecraft is a struggling actress until she and co-star Allen Roberts are targeted as sacrifices by their director. He's been studying The Necronomicon, but not closely enough and Lorelei survives and decides to study the book herself. As she becomes more conversant with magic, she is involved in more supernatural adventures, all the while trying for her big break in the movies. Created and drawn by Mike Vosburg (Pete Ventrella co-writes from 'The Dark Lady') this is a fun, if not exactly politically correct, horror-comedy (as an actress, Lori might expect to be naked some of the time, after all). It manages to retain a light-hearted charm, despite the horror trappings and it's easily the best artwork Vosburg's produced, with plentiful use of zippatone and shadow. 'The Dark Lady' includes a reprint of 'Linda' Lovecraft's appearance from *Star*Reach* 3. The AV Publications volume collects the Caliber issues and adds a new story tidying up plotlines. With 'Into The Past', Vosburg and Ventrella, have Lori settled as an actress and dating Allen, while dealing with a sinister society of sorcerers called The Cabal in Hollywood and on a self-help retreat.~NF

Recommended: AV Publications volume

THE LOST

Caliber: *2 issues 1996*
Chaos!: *3 issues 1997-1998*

The creepy aspects of *Peter Pan* are accentuated in this updating of story elements to the late 20th century. Peter is a hypnotic rent boy, who abducts his Wendy, while the permanently four year old Michael encounters a deranged Captain Hook. The combined talents of Marc Andreyko, Galen Showman and Jay Geldhof are responsible, with Mark Ricketts contributing flashback sequences. This was never completed in either incarnation, but the vision is disturbing enough to merit pulling out of the bargain boxes.~FP

LOST ANGEL

Caliber: *One-shot 1991*

The first chapter having seen print in the *Roulette* anthology, Kevin VanHook was able to conclude his female private eye story here. He's caught between two stools, wanting to play it straight, but realising some pandering to the comic fan audience by way of alluring pin-ups might be commercially prudent. It's a shame, as they're nothing to do with an otherwise good thriller. Van Hook's art, though, is spartan and static, although not lacking talent.~WJ

LOST CONTINENT

Eclipse: *6 issue miniseries 1990-1991*

Set in the mid-fifties, this is the story of the search for a lost Arctic nation. Hazekura, an archaeologist, and Hinata, a reporter, are opposed by a mysterious secret society that seeks the lost land for its own evil purposes. Thrills, spills, dinosaurs and sorcery add up to a fast-paced romp. This traditional adventure series in the manner of Burroughs or Haggard is written and drawn by Akihiro Yamada in a style that is an intriguing mix of Japanese and Western influences.~NF

LOST GIRLS

Kitchen Sink: *2 issues 1995-1996*

Begun in the pages of *Taboo, Lost Girls* is Alan Moore and Melinda Gebbie's attempt to produce an intelligent, grown-up comic about sex which doesn't fudge the issue and appeals equally to both sexes. It's unrepentantly pornographic, with a segment of story followed by a balancing segment of sex, but ultimately comes over as cold and over-stylised, despite Gebbie's intensely coloured, Art Nouveau-influenced artwork. Her attention to detail over clothes, shoes and surfaces will engage some female readers, although others will find the artwork garish. Almost too clever for its own good – as erotica, anyway – it re-examines three female archetypes from children's fiction: Pale, opium-addicted Alice from *Alice in Wonderland*, repressed Wendy from *Peter Pan*, and giggling good-time girl Dorothy from *The Wizard of Oz*. The three women meet in a luxurious hotel and, as they get to know each other, tell erotic versions of their famous stories. It's due for revival from Top Shelp in 2003.~FJ

LOST IN SPACE

Gold Key: *23 issues (37-59) 1973-1977 (37-54), 1981-1982 (55-59)*

Formerly titled *Space Family Robinson, Lost in Space* appeared large on the cover from 15 when a TV show began using a remarkably similar concept to the comic. The title switched when the idea was revived with 37. Buffeted through time and space, the Robinson family encounter a variety of aliens, almost invariably biped humanoids in predictable hokey old plots. This is largely dull, unimaginative material, although reasonably drawn by Dan Spiegle. The 1980s issues are reprints.~FP

LOST IN SPACE

Innovation: *18 issues 1991-1994, 2 issue microseries ('Project Robinson') 1993, one-shot ('Strangers Among Strangers') 1993*

Leaving Earth in 1997 to colonise a planet in the Alpha Centauri system, Doctor John Robinson, his wife Maureen, their children Judy, Penny and Will and Major Don West voyaged in suspended animation. The weight of saboteur Doctor Zachary Smith knocks their craft, the Jupiter 2, off course. The family adopt Smith as Will and Penny's tutor whilst Major West pilots them through uncharted space where the crew and their robot encounter many forms of alien life. The comic's continuity is set seven years into their voyage showing Penny and Will as teenagers. Happening between 12 and 13, 'Project Robinson' focuses on Maureen's early career in 1 and future husband John's in 2. A new story arc, planned as twelve issues, starts in 13 with the crew scattered throughout time and space by the vengeful J'ahl. Unfortunately this was never finished. 'Strangers Among Strangers' reprints 2-3 along with questionnaire interviews with seven of the original cast members.

A prime mover in this series is scripter and "alpha control" Bill Mumy, who was the child actor who played Will Robinson in the TV show, and grew up to front cult band Barnes & Barnes. Mumy and artist Michael Dutkewicz produced 3, 4, 9 and 13-18, while Matt Thompson draws 2, 8 and 12 as well as writing 1 and 8. The earlier stories are unlikely fluff that function as excuses for a rag-tag parade of artists to draw cheesecake shots of the female cast members. Outside the promise of 13-18 the series is completely feeble.~SW

LOST IN SPACE

Dark Horse: *3 issue miniseries 1998**

Competent continuation of the movie that sees the criminal stowaway Dr. Smith, held in the brig as the Jupiter 2 blindly gropes its way back to familiar space. The deadly saboteur manages to get his hands on alien technology that not only gives him great power over the heroic Robinson Family but gives a monstrous creature the chance to take over the spaceship for its own vengeful purposes. Faithful if uninspired nonsense that will please the movie fans if few others.~WW

THE LOST ONES

Image: *1 issue 2000*

One of many projects initiated and then almost immediately dumped by Image in 2000. Ken Penders turned out a captivating first chapter about a woman able to control electrons on the run from government agents, her origin somehow tying into the dropping of the first atomic bomb. While working for Archie Comics Penders has developed a clear and open style, and cancellation was a great shame.~FP

LOST PLANET

Eclipse: *6 issue miniseries 1987-1989*

Earthman Tyler Flynn is transported to an exotic other-worldly locale where he encounters, among others, a woman and her chimpanzee, dinosaurs, a talking raven and Ambrose Bierce. This well-illustrated superior fantasy is obviously a labour of love from creator Bo Hampton, and the back-up stories give an added insight into the world and characters he's created. If fantasy comics usually make you barf take a look anyway. You might be pleasantly surprised.~WJ

---

* Available in a collected edition

LOST STORIES

Creative Frontiers: *6 issues 1997-1998*

I. M. Lost is dragged down a well by two gnomes, Grimloch and Fitzpatrick, into the world of all lost things, where he comes to believe that his task is to find his missing father. Gilcrest, the Leader of Lost Souls tries to kill him for his body, but he escapes with the help of cloud creature,

Strat, and unfreezes Kylie, a captive. In the meantime, his body is discovered and his funeral arranged. Written by John Riley and with artwork from Garrett Berner, this is an intriguing fantasy with simple, yet effective artwork. Unfortunately, it remains unfinished.~NF

THE LOST WORLD: Jurassic Park II

Topps: *4 issue miniseries 1997*

Competent adaptation of the movie sequel wherein world-weary palaeontologist Ian McCulloch tries and fails to stop a bunch of smug know-it-alls from bringing live dinosaurs back to America. Don McGregor scripts and Jeff Butler draws, but it's still just another big lizard comic.~WW

Sergio Aragonés LOUDER THAN WORDS

Dark Horse: *6 issue miniseries 1997**

This is an excellent collection of wordless gag-pages. Sergio Aragonés works very much in the European style of cartoon gags, and here he's allowed more space than in the margins of Mad to set up and then execute his jokes. The result is excellent, although a rapid read, and a subsequent series of similar material was published as *Actions Speak*.~NF

LOUIS

Metaphrog: *1 volume ('Red Letter Day') 2000, 1 volume ('Lying to Clive') 2001, 1 volume ('The Clown's Last Words') 2002*

In the town of Hamlet, Louis lives and works alone in his house except for companion/pet, FC (for "Formulaic Companion"), a bird-like creature confined to a cage. Unlike the other inhabitants, who eat their regulated rations and occupy their spare time with entertainment centres, Louis daydreams about the mountains. His neighbours, Clean and Jerk Quidnunc, who have convinced him that he has an aunt, and to whom he therefore writes painstakingly about his life, also spy upon him at the behest of the postman. In the first volume, Louis has to rescue FC from his neighbours and attempts to reach the mountains. In the second volume, Louis is arrested and sent to the Bee Farm where he meets Clive, a bee who's trying to fly, the sinister, Weevil, who tries to eat FC and Chief Executive Officer, Clammy, who attempts to brainwash Clive. The third volume sees Louis back in Hamlet, missing his friend Clive and facing weekly cheese interrogations by the Cheeseman Information Agency, which wants to know what he knows about the underground. Louis is diverted, however, by trying to design a new game for a competition associated with a mandatory Fun Day.

The central character of this fantastic, surreal, allegorical series appears to be completely innocent and naïve, oddly ignorant of his surroundings and role in life. Exploring elements of societal control through surveillance, narcotics and authoritarianism, John Chalmers and Sandra Marrs, who work together as Metaphrog, have produced a multi-layered comic that's enigmatic, disturbing, unfathomable and yet, finally, unforgettable. Though quite why *Louis* is described as primarily for children, is itself disquieting.~NF

Recommended: 'Red Letter Day', 'Lying to Clive', 'The Clown's Last Words'

LOUIS RIEL

Drawn And Quarterly: *7 issues + 1999 to date*

This is Chester Brown's biography of controversial Canadian figure, Louis Riel, considering the case for his being a hero or a villain. It begins in 1869 with the sale of Rupert's Land to the Canadian government by the Hudson's Bay Company. Riel was champion of the Métis, people with both Indian and settler blood, most of whom spoke French. Brown dramatises the story from different sources, offering comparisons and corrections (e.g. where he's ignored the facts for dramatic purposes) in notes at the end of each issue, with the intention for the story to be completed in ten issues. Keeping strictly to a six-panel grid per page for his storytelling, Brown's approach is deliberate, but affecting, drawing the reader in to the sparse landscape and the political, social and military machinations of his characters.~NF

LOVE & ROCKETS

Fantagraphics: *Series one 50 issues 1982-1996*, series two 6 issues +, 2001 to date*

Love & Rockets (sometimes with ampersand, sometimes spelled out) was one of the earliest alternative comics written by and for young people. The Hernandez Brothers (Jaime, Gilbert and Mario, although he later faded away) began by writing a range of science-fiction and comic-inspired tales. Within a couple of issues they'd settled down to major storylines, and although they would experiment with different stories from time to time, Jaime's Mechanics universe, and Gilbert's tales of a small Mexican town called Palomar (beginning in 5 with 'Heartbreak Soup'), would be the narratives that held the magazine together.

Jaime is perceived as the lighter-weight writer of the two, although perceptive readers will soon note he takes greater risks both in structuring his stories and in forcing the reader to make leaps of understanding between them. What begins in the first few issues as the funny story of punk mechanic Maggie, her crush on her new boss Rand Race and her possible lesbian relationship with her best friend, Hopey, complete with dinosaurs and robots (collected as the Mechanics miniseries), quickly turns into a harrowing examination of modern values. Nonetheless, the early tales, in which Maggie and her friend Penny Century imagine themselves superheroines, play with the conventions of comics in a revealing way.

The first real sign that Jaime is getting to grips with weightier matters comes in '100 Rooms', a brilliantly paced thriller set in a huge mansion that Maggie and Hopey are staying at, in which Maggie is 'kidnapped' and becomes enamoured of a man who may be no more than a simple vagrant but hints at being on the run. Jaime creates an electric atmosphere throughout the 'inside' scenes, where Maggie and her abductor hide from view, contrasting that with the open, sunny poolside frolics of her friends. For the first time her loyalty to Hopey comes into question, as do her motives for suddenly transferring her affections and her eroticism of violence – buy the comic, as the collection has some extra bits inserted which destroy the excellent, albeit obviously unconscious pacing. In all eventualities it turns out to be Hopey who abandons her to go on tour with her band. Slices of on-the-road life, like 'Crickets' in 20, bring humour back to the series before Jaime starts a number of tragic story-lines. Maggie, fat and working in a burger bar, faces up to the death of an old friend, the boy she never quite got off with, in the brilliant 'Vida Loca' (21-23). Audaciously, Jaime announces the event that will end the gang-war story, by subtitling it 'The Death of Speedy Ortiz', allowing the mood of bittersweet regret to carry the tale.

Things are even less cheerful from then on. Jaime orchestrates a huge cast of characters over twenty-eight more issues, putting each into the spotlight in turn. The plot swoops around examining a younger generation via Hopey's pretty younger brother Joey and his friends, but always returns to Maggie. One of the best later stories, 'Chester Square', in issue 40, amazes the reader by digging still deeper into this character we've been reading about for forty issues as Maggie, abandoned in a neighbourhood she hasn't visited for years, is mistaken for a whore. Jaime draws in a wonderful, sexy *Archie* style, with hints of Kirby and Toth to sharpen it up. He has a great eye for spotting blacks and dramatic composition, not to mention slapstick effects, and even in the last issues, when Maggie has been through relationships and rejections, she can still have a screaming fit that involves steam coming out of her nostrils and goggling eyes. Jaime should be remembered for his ability to put ennui on paper. He studies the limitations of life over and over, using his 'Chester Square' series of stories to go over significant events in the previous forty issues once again.

Gilbert (or Beto) is a comics version of Gabriel Garcia Marquez, a magic realist who mingles symbolic acts with everyday dramas in the small Mexican town of Palomar. After several science-fiction stories, including the ambitious 'BEM' (2), Gilbert settled into producing long story arcs, rather than series of short tales like his brother, which start with the arrival of the huge-breasted Luba in the small town, and end with her departure several decades later after an earthquake has destroyed it, serial killers have run amok, and many of her children, all by different fathers, have left home. He explores both the history of the town and Luba's past, again creating a large cast, all of whom will have important roles to play as the stories unfold. He is particularly good, given the number of years the story sweeps over, at confounding your expectations for his characters. He brings perspective to his stories with 'An American in Palomar' (13-14), in which a photographer is delighted to discover such a run-down, backward place and intends to take portraits for a coffee-table 'exposé' of the poor peasants. He surfaces again at the end of the symbolic serial-killer story 'Human Diastrophism' (21-26), which begins with the residents of Palomar joining together to bludgeon a plague of monkeys and ends up with the illiterate Tonantzin, always portrayed as a sexy airhead, immolating herself on television, watched by the photographer. The liberal nonsense he spouts as he ignores his girlfriend being genuinely moved by the scene is one of Gilbert's finest moments.

Although of significance in understanding Luba's character, the long story arc 'Poison River' (29-40), which deals with her life before she sought refuge in Palomar, is probably Beto's least successful work. It has a deliberately chaotic structure, in which Luba's reactions to a hasty marriage to a gangster, and being taken from a quiet life into the glitz and danger of a big-city underworld, are echoed in the storytelling. The reader meets dozens of characters, eavesdrops on incomprehensible conversations between her husband and his operatives, and watches her get hooked on drink and drugs, with all the distortions they cause. It's just too much, panels packed onto the page to get through a huge amount of narrative. The graphic novel, with fifty extra pages, may be even longer but it allows the story some room to breathe.

Generally, though, there is a much greater sense of control and intention in Gilbert's plotting, which is why you can't really avoid reading 'Poison River'. Few stories are insignificant, even delightful shorts like 'The Whispering Tree', in which one of Luba's daughters convinces her sister that a tree's branches rubbing together are the voice of a bruja, or witch. Some of his most touching stories centre around the children of Palomar and their untimely, not to say peculiar ends, and he has a particular gift for drawing gangly-limbed, huge-headed kids. Gilbert is a much more workmanlike artist than his brother, less crowd-pleasing, except in his fondness for women with big hooters. He pushes the story along with the art, using expression and pose to tell half of it, inking freely with a brush and drawing barren landscapes and children with great freedom and beauty.

Love and Rockets contains two of the best dramas you'll find in comics to date. The main stories complement each other perfectly. Both are semi-fantasies that, understandably, have drawn a lot of female readers, attracted by the high number of strong female leads. The Hernandez Brothers share the ability to make you care about their characters deeply and to handle big issues with a personalised touch that gives them impact.

The British collected editions of *Love and Rockets* (from Titan and Penguin) differ in content from their American counterparts, often confusingly using the same titles. They split the work of Gilbert and Jaime into separate editions more than the Fantagraphics editions. Many also include additional material, some of which is published in magazine form as the *Love & Rockets Bonanza*, alongside stories prepared for other publications.

The revival is disappointing, with fewer, comic-sized pages, and a lot of them given over to what appears to be makeweight material. Jaime begins a new Maggie series in which his favourite character, older and a bit more self-aware, is horrified to discover she's no longer cool, while Beto turns back the clock in 'Julio's Day' to chronicle the birth and upbringing of a little boy in a Mexican village. Often grim and brutal, it's the meatiest thing here. The third major series is by Mario and Beto, and concerns the adventures of crash victims and expats in a pirate-riddled, little known sector of the South American jungle. 'Me for the Unknown' represents a strange change of pace, being action heavy and character light, and reads as though it were written some years ago. In between short episodes of these three stories there are a variety of shorts, gag strips and experiments, reminiscent of some of the material in the last three or four magazine issues.~FJ

Recommended: 2-26, 37, 40, 48, 50

LOVE DIARY

Charlton: *102 issues 1958-1976*

Maudlin and patronising 'find a man and keep him' trash that presumes to focus on the middle class aspirations of unloved women. The anthology format revolves around the secret thoughts of the heroines involved as related in extracts from the diaries that all lonely women keep. Appalling and insulting, even in the context of its times, unrelentingly badly written, and with the notable exception of artist Angelo Torres in 6, badly drawn.~WW

LOVE IN TIGHTS

Slave Labor: *6 issues 1998-1999*

Superhero romance anthology featuring new characters and a crop of established independent creations in a selection of stories dedicated in equal parts to love and its loss. Among a veritable welter of contributions there are relatively few standouts. Strips such as Dork Tower by John Kovalic (1 and 6), Rob Hanes by Randy Reynaldo (2), Astounding Space Adventures by Steve Conley (2), John Gallagher's BuzzBoy (3) a short from Lea Hernandez in 4 and Andi Watson's 'Family Ties' and others in issues 3-6 keep the publication from being a complete waste of ink. Confusingly, although part of the regular run, some issues are cover-labeled specials. All in all, though, despite the impressive line-up, the stories are mediocre at best and one or two are just plain bad. Art lovers only and the truly forgiving only.~WW

LOVE LETTERS in the Hand

Eros: *3 issue miniseries 1991-1992*

A positive rarity this, a story in which the sex is essential, and furthermore there's a story to be told. David Hodson contrived a simple but beguiling plot involving the maximum amount of sex, with the assorted couplings occurring in a small 1960s Australian town. A drifter named Stan arrives to bury himself away from trouble, but becomes embroiled in a relationship, the outcome of which is inevitable. There's a wry sense of humour involved, as evinced by 1's postcard pastiche depicting who's fucking whom, and by the daft 'Surferman' strip in 2, but it's the finely paced, almost film noir aspects that see the story through.~WJ

LOVE STORIES

DC: *7 issues (147-153) 1972 -1973*

A retitling of the long running *Heart Throbs* for its final few issues. The 'mod' new name didn't help much.~HS

The Sandman Presents: LOVE STREET

DC/Vertigo: *3 issue miniseries 1999*

Unknown to most of the revellers at an occult garden party in 1968, deep in the dungeon below their feet Morpheus, the Lord of Dream had been trapped in a magic bottle by the wizard Roderick Burgess since 1916. Young runaway John Constantine and a group of fellow magic groupies experienced a terrifying happening that day. Now thirty years later the surviving participants are reunited to solve the mysterious events, before a marauding mystic force destroys them all. A hippy, trippy, but not so zippy thriller from Peter Hogan, Michael Zulli and Vince Locke.~WW

LOVE SUCKS

Ace: *One-shot 1996, 5 issues, 1 Special 1996-1998*

Three guys, three different personalities, three different rates of success with women. There's not quite the necessary hook or depth to give *Love Sucks* a widespread appeal, but Kevin Santiago's Tarantinoesque dialogue for Eddie and sympathetic portrayal of the virginal Patrick should have an appeal to those looking beyond superheroes. Jay Juch's uncluttered art improves issue by issue, so don't be put off by the less than compelling covers. The colour special switches genders to focus on Wendy, last seen in the one-shot, but it's the weakest issue.~FP

LOVELY PRUDENCE

All the Rage: *2 issues 1995-1996*
Modern: *2 issues, 1 Special ('Christmas Bitterness') 1997*

The skull-faced Prudence is a young girl, whose adventures are a vehicle for creator, Maze's indignant rants against society, particularly brand names and the celebrity of murderers. A trip to the shopping mall reveals that Cthulhu is actually Winona Ryder's deformed sister. A slumber party involves the origin of Cashewna, the ghost of John Wayne Gacy and Prudence's rejection of an alien's romantic overtures. The first issue of the second series continues the slumber party story from the first series and also features TV parodies. In the special, Prudence visits Santa Claus and cooks his reindeer. There's nothing new here, though the title's lack of political correctness may be attractive to some. The artwork's distorted and ugly, but Kurt Marquart has a cleaner style in the second 2.~NF

LOVESICK FOOL

Shady Comics: *3 issues + 2001 to date*

Dominic Polcino can draw, but for most of the time employs such a dashed-off and unappealing style that anyone investigating these comics is likely to replace them in short order. They detail and analyse various failed relationships and bachelor frustrations, and elements of 2 apart, they're the same as everyone else's. The lack of a fresh approach and the ugly cartooning earns a thumbs down.~WJ

LOWLIFE

Caliber: *2 issues 1991**
Aeon: *3 issues (3-5) 1993-1996**

Lowlife's lead character Tommy is a whining and self-pitying introspective preferring to pontificate about life than to participate in one. Unfortunately, after a first issue of admitted autobiographical material, one suspects Ed Brubaker is merely applying a thin veneer of fiction over further autobiographical sequences. Most will read *Lowlife* wanting to reach into the comic and throttle Tommy, screaming "Wake up and smell the coffee". Brubaker's art, though, is very simple, open and appealing, and at his best (3's story of ripping off the shop he works in) he can engage. If you're a selfish wastepail borrow this comic and see your lifestyle justified and vindicated. Top Shelf publish a complete collection.~FP

LUBA

Fantagraphics: *6 issues + 1998 to date*

Gilbert ('Beto') Hernandez continues the long-running saga of his Latin American Earth Mother Luba and her extended family in this worthy follow-up to *Love and Rockets*. Bravely making few concessions to potential new readers, Hernandez weaves his complex narrative through a series of short, funny/sad, sometimes sexually explicit, vignettes.

The story begins when Luba leaves her hometown of Palomar for America. She fears that her past political affiliations have come back to her haunt her, and that the only way to end the threat to her loved ones lies in America. From this set-up, Hernandez gets lots of juice out of the contrasts between the 'old country' and the lurid strangeness of modern urban cities, and the series gets more hallucinatory as it progresses. Freed from the shadow of brother Jamie's peerless drawing, Beto's own artwork has never looked more impressive – clear, simple, but highly effective in conveying differences of mood, character and location. This is a tough read, requiring concentration and patience, but a rewarding one.~AL

Recommended: 1-6

LUBA's COMICS AND STORIES

Fantagraphics: *3 issues + 2000 to date*

Having moved on to other projects within *Love and Rockets*, Gilbert Hernandez here presents characters connected with his Palomar stories, mostly members of Luba's extended family. Her equally well-endowed half-sisters Fritzi and Petra feature in all issues, while 2 concentrates on Pipo now a successful business woman. What's first apparent is the seemingly gratuitous sex. In fact, it's largely through the sex, its forms and its consequences that Hernandez explores the characters in quite brutal fashion. The older Ofelia in 3 regrets her more submissive past, as she writes a book about it while helping raise a new generation of children. There are occasional very nice character touches, such as Luba in 3 remembering stopping drawing as a child, and Ofelia recalling the circumstances, but this is the weakest issue.~WJ

Recommended: 2

LUCIFER

Trident: *3 issue miniseries 1990*

This miniseries from writer Eddie Campbell and artists Phill Elliott (1) and Paul Grist (2-3) just about sustains its whimsical tone over three thinly plotted issues. Lucifer is a wicked young man who enters hell through a monstrous wart extracted from a man's nose. After bumping off the devil Lucifer becomes the new ruler of the underworld, and sets about creating hell on Earth. Grist's smooth artwork particularly complements Campbell's soup of bad puns (like that one), absurdist humour and mild-mannered satire.~AL

LUCIFER

DC/Vertigo: *3 issue miniseries 1999*, 32 issues +, one-shot ('Nirvana') 2000 to date*

This continues the incarnation of Lucifer introduced in *Sandman*, written throughout by Mike Carey. Bored with his duties as ruler of Hell, Lucifer resigned and conveniently moved to America where he runs a nightclub. The miniseries is painted by Scott Hampton with his usual panache, painlessly mixing drawn and fully painted images. Lucifer Morningstar's club manager Beatrice and his bodyguard-cum-assistant Mazikeen are reintroduced, and Lucifer finds it necessary to take one Rachel Bengai to Hell, which proves harder than he expected.

The regular series advances in story arcs and one-offs, with Chris Weston drawing the first in 1-3, involving a stage magician and his assistant Jill Presto. 'Born With the Dead' in 4 introduces little Elaine Belloc who is still pals with her dead friend Mona. 5 introduces the series' main artist, the drab Peter Gross usually inked by Ryan Kelly, on a story running to 8 portraying the beginnings of a revolt in Lucifer's old realm. 'Children and Monsters' runs from 10-13 with a prelude in 9 where we hear more from Elaine as minions of Hell come to Earth to confront Lucifer. 9 is the first of many fill-ins entirely drawn by Dean Ormston (14, 17, 20, 24), who was less successful working from Warren Pleece's layouts in 4. 14-16 offer more detail on Mazikeen and her ancestor Lilith, Adam's first wife, and the last of the stunning covers provided by Duncan Fegredo. There's more intrigue in 17-19, and 'Paradiso' in 21-23 returns to the legend of Lilith and her tribe, the Lilim, whose army are successfully attacking Lucifer.

Jill Presto finds herself called back into service in 24, preceding 'Purgatorio' in 25-27 which guest stars cute goth Death, as Mazikeen leads the Lilim against a gravely wounded Lucifer. A run of good Mariah Huehner covers also starts here. Ormston is excellent on 28, which features 'fallen' cherubs (demons) Spera and Gaudium and is a merciful break from the ongoing war plotline, but 'Inferno' in 29-32 features the culmination of the Lilim's attack; a duel between Lord Arux and Lucifer amid more court intrigue.

Mike Carey overwrites throughout, but is a good tactical plotter. Unfortunately skipping his unwieldy expository dialogue balloon continuity means losing the thread completely. The jumping around of visual styles from Ormston's simplified forms to Gross's homogenised ones doesn't do the title any favours in terms of recognition, and there's also the limitation of pencillers working from seemingly overcomplete scripts. Overall, despite acclaim and stories being rushed into collections, *Lucifer* is very ponderous and often a bore.~SW

* Available in a collected edition

LUCIFER'S HAMMER

Innovation: *2 issues 1993*

Planned as six issues, this painted science fiction story about a massive comet due decimate Earth never made it. Perhaps the comet struck early. It's decently done, but you don't have to pine for the conclusion, since as it was adapted from a novel by Larry Niven and Jerry Pournelle you can save yourself a lot of trouble just reading that instead.~FP

LUCKY LUKE

Hodder and Stoughton: *8 volumes 1972-1982*
Ravette: *1 volume 1991*
Glo'Worm: *7 volumes 1998-2000*

This highly popular comedy Western strip first appeared as a one-off in the 1946 French anthology *Almanach De Spirou*, written and drawn by Belgian cartoonist Maurice de Bevère, aka Morris. Born in 1923, Morris had previously shared an animation studio with two other giants of the Franco-Belgian comics scene – André Franquin, creator of accident-prone office boy Gaston Lagaffe and the exotic animal strip *The Marsupilami*, and Joseph Gillain (aka Jijé), influential artist on the *Jerry Spring* Western adventure and a mentor to modern-day master Jean 'Moebius' Giraud. When *Lucky Luke* proved to be an immediate hit he graduated to his own weekly strip in Spirou, and from there to a series of bestselling collections, animated feature films, TV programmes, and numerous spin-offs and tie-ins. Lucky Luke is a laconic, do-gooding drifter, "a poor lonesome cowboy a long way from home" who can "shoot faster than his own shadow". He was always accompanied by his faithful but cynical horse Jolly Jumper. Luke's adventures were meticulously researched historical farces that showcased Morris's clear linework and gift for character comedy. Like other European creators Morris was captivated by the sense of freedom, optimism and newness that America, and the American Wild West, represented. In 1948 Morris joined Franquin and Gillain for a six-year sojourn in North America, incorporating his experiences and insights into the new Luke stories that continued to appear in France. Morris also met the French writer René Goscinny in New York, where Goscinny had been exchanging ideas with Harvey Kurtzman. Morris returned to Belgium in 1954, and began collaborating with Goscinny on a run of exquisite Luke stories – 'The Stage Coach', 'Western Circus', 'Curing The Daltons', 'Dalton City', 'The Tenderfoot' and 'Apache Canyon' amongst the best of them. Like Goscinny's other famous creation Asterix, Lucky Luke became a vehicle for the writer's satiric imagination, with Goscinny poking gentle fun at the conventions and clichés of numerous Western movies, while thankfully avoiding Asterix's torturous punning. The strip's supporting characters grew, with the introduction of psychotic bandits The Daltons and dumb dog Ran-Tan-Plan, appearing alongside such historical figures as Judge Roy Bean, Calamity Jane and Jesse James.

After Goscinny's death, Morris has continued to produce occasional Lucky Luke adventures with the assistance of writers like Fauche and Leturgie. In 1983 Luke's ubiquitous cigarette was abandoned in favour of a more health-conscious blade of grass, although some covers on the 1970s English editions of *Lucky Luke* already have the offending snout clumsily removed. These translations, by Frederick W. Nolan, are witty and concise, were briefly brought back into print by Glo'Worm, who added a long unseen volume, 'Ma Dalton'. In England Ravette also published a single, post-Goscinny story in 1991, 'The Dalton Brothers Memory Game', which showed that Morris' style had barely altered since the 1940s. Translated into twenty-three different languages and still one of the most instantly recognisable characters in European comics, *Lucky Luke* remains perennially under-appreciated by English-speaking comic fans.~AL

Recommended: *Apache Canyon, Curing the Daltons, The Dalton Brothers Memory Game, Dalton City, The Dashing White Cowboy, Jesse James, Ma Dalton, The Stage Coach, The Tenderfoot, Western Circus*

LUFTWAFFE 1946

Antarctic: *4 issue miniseries 1996*, 18 issues, 1 Annual 1997-1999**

This is the second part of Ted Nomura's 'Families of Altered Wars' cycle, begun in *Tigers of Terra*. His determination in this strip to see things from the Nazis' point of view is apparently justified by the exclusion of authentic swastika decals from some plastic model kits. The incomprehensible alternative history plot is just an excuse to include ever more incredible aircraft, which, with excellent computer toning by Ben Dunn, are drawn very well, and a load of funny looking nubiles in various uniforms, who are not. Sample expository dialogue: "We knew the day would come when they'd introduce the high-flying B-29's after we drove the B-17's, B-24's, and Lancasters out of the skies!" It's really only for fetishists of one kind or another. The annual is a laugh though, containing Nomura's juvenilia, some of which you could sell to certain hipsters if you put Gary Panter's name on it.~GK

LUGER

Eclipse: *3 issue miniseries 1986-1987*

One of Bruce Jones' ongoing attempts to bring old-fashioned pulp adventures to an unwitting (and, one suspects, often unwilling) public. Luger is a big-game hunter with an insane sister who gets involved in a search for a missing heiress. Good, risqué fun on the whole, with atmospheric art by Bo Hampton and Tom Yeates.~NF

LUM

Viz: *8 issues limited series 1989-1990*, 8 issue limited series (return of Lum) 1994-1995*, 9 issue limited series (Return of Part 2) 1995-1996*, 11 issue limited series (Return of Part 3) 1996-1997*, 11 issue limited series (Return of Part 4)1997-1998**

Young Ataru Moroboshi has a face shadowed by misfortune, or so says an ancient (and greedy) Buddhist monk called Cherry, who accidentally pushes him into a river while trying to stop him committing suicide. Ataru has had a bust-up with his girlfriend Shinobu, but he's hardly suicidal. However from that moment forward Ataru's life is dogged by misfortune. Returning home he finds he's been chosen by space demons to fight their champion Lum for mastery of the earth – by playing tag. In the course of winning the contest, which occupies the early issues, Ataru accidentally asks her to marry him. The rest of the series recounts his attempts to convince Lum he doesn't love her and Shinobu that he does, a classic Rumiko Takahashi love triangle which is soon complicated by the arrival of various other suitors for the hands of all three of them.

Takahashi's plotting is playful, as Ataru's home is overrun by demons (part 3), his mother falls in love with Lum's sexy fiancé, Rei, who has a habit of turning into a huge monster when riled (part 6), Lum kidnaps him to attend a cosmic war with the good gods, which he loses for her side (part 8), and Lum accidentally sends him twelve years into the future, to his own school reunion, when trying to create a short-cut to the school building (part 11). But best of all is part 16, Disco Inferno. Cherry's beautiful niece Sakura asks Ataru to go dancing with her, where they're confronted by Tsubame Ozuno, her magician lover, who's been studying black magic in the west. Ozuno's first attempt to conjure Satan results in Ataru turning into Santa, but soon it's a stand-off between Rei in monster form and the lord of darkness, much to the puzzlement of the assembled groovers. Takahashi's art is simple and straightforward. Her storytelling's very direct, but she has the talent of portraying emotion in small details, as well as

creating broad, slapstick sequences. *Lum*'s not quite as manic as *Ranma½*, but it's very much in the same, pleasantly confusing vein.~FJ

LUNATIC FRINGE

Innovation: *2 issues 1989*

A disparate group of working stiff misfit superheroes are brought together by a granny to combat some decidedly odd menaces. A light, fun, read with a good joke per page ratio. Further Lunatic Fringe can be found in *Overture!*~FP

LUNATIK

Marvel: *3 issue miniseries 1995-1996*

There was previously no Marvel Universe equivalent to DC's Lobo. Now there is. Originality not at a premium, then.~WJ

LURID

IDW: *2 issues + 2002 to date*

The day to day life and stresses of running a California strip club, with various points of view expressed in telling the story. It's so far well written and drawn by the team of Paul Lee and Adam Huntley, and the art will delight anyone wanting to see nude women in a style not too far removed from Terry Moore.~WJ

LUST FOR LIFE

Slave Labor: *4 issues 1997-1998*

Jeff Levine invites you into his life with a collection of comic vignettes and illustrated text pieces ranging from the humdrum to the surreal. Reminiscent of Harvey Pekar, and competent enough, but lacking any real edge.~WW
Recommended: 2

LUST OF THE NAZI WEASEL WOMEN

Fantagraphics: *5 issues 1990-1991*

Entertaining adventure series that pits a burned-out alcoholic pilot who tells tall tales of fighting The Dragon Queen and Leonard, The Easter Bunny (no, really, but it's a good story), against Hitler, who's currently got the body of a parrot, and his Weasel women. Mitch Manzer doesn't always manage to pace his jokes but the bigfoot art style is pleasing on the eye.~NF

The Adventures of LUTHER ARKWRIGHT

Valkyrie: *10 issue limited series 1987-1989*
Dark Horse: *9 issue limited series 1990-1991**

In one version of reality, the (English) Civil War is still being fought in the 1980s. The agency that keeps track of a myriad different probable realities has dispatched a psychically gifted agent to assassinate the parliamentary leader, a hypocrite descending into madness, and thus bring time back into line with the future, putting a stop to cataclysmic events in other realities. That agent is Luther Arkwright, dashing adventurer, sensual lover, deadly assassin.

Based around the universes suggested in Michael Moorcock's *Jerry Cornelius* tetralogy, Bryan Talbot has woven a complex religious and political story that takes us from the painful awakening of Arkwright's mental powers in another dimension through to his god-like transcendence at the end of the tale. The art is packed with imagery, shot through with British mythology and informed by a comprehensive knowledge of world religion. That it is also drawn in Talbot's detailed, elaborately structured style is a bonus. Early issues show too much dependence on design tricks, leading to a stiffness in the action, but later ones put Talbot's theatrical sense of page layout to good effect, using chequerboards of panels to flicker between two simultaneous scenes, or slowing down the moment of assassination to half a dozen pages, each panel only fractionally different to the rest. Some readers may find it all a bit too much to assimilate, with information packed into every drawing and innumerable 'reports' on other realities threading like ticker-tape between the panels. It's a work that repays repeated reading, a love story, an allegory, a philosophical treatise: make of it what you will.

The story runs in 1-9, with Valkyrie's issue 10 (*ARKeology*) being a series of essays, sketches and notes. Dark Horse republished the comic on much better quality paper than the Valkyrie, but the quality of printing is poor. Go for either the limited-premium hardback or graphic novel reprints.~FJ

LUX & ALBY Sign On & Save the Universe.

Acme: *9 issues 1992-1993**

Lux the Poet & Alby Starvation, protagonists of novels by Martin Millar, are brought to comics by him and illustrator Simon Fraser. Living in a Brixton squat, airhead Lux and paranoid Alby are fair game for any strange character who comes along. Their house alone has a belligerent student of the I-Ching who wants to force his way into Nirvana, a cult who worship the goddess Ishtar (who handily becomes a major player in the series), a philosophical plant, a contented hamster, and visiting drug addicts. Throw in a drunken handmaiden sent on a holy quest to become the best kisser in the universe, a paraplegic bicycle thief and sundry fairies, and you have a fascinating and rewarding read. It's shot through with eccentric humour and unusual parallels, as the battle for Nirvana is compared with the struggle for chairmanship of a housing co-operative. Fraser's art is charming, though he seems rushed towards the end of the series. Six years after the original publication the series was collected by Slab O'Concrete.~HS
Recommended: 1-9

LYCANTHROPE LEO

Viz: *7 issues 1994**

On his seventeenth birthday, Leo Takizawa's father tells him of his lycanthropic heritage and about the Hunters who will be trying to kill him. As the story progresses, Leo finds other members of the Blood Tribe of the Beast (even at school) and other shape-changers from tribes including the buffalo and lion. Promisingly written by Kengo Kaji with dynamic, highly rendered artwork from Kenji Okamura, these seven issues are barely enough to get you started, given the scope of the script. As such it's frustrating that the remainder has yet to appear.~NF

LYNCH

Image/WildStorm: *One-shot 1997*

Jack Lynch is the Team 7 member currently mentoring Gen^{13}. This is an adventure in the Indiana Jones mold set thirty years prior to that, written by Shon Bury and drawn by Trevor Scott. Lynch finds himself opposing nazi treasure hunters and super-villain Helmut in the Amazon jungle. It adds a little to the WildStorm mythos but is otherwise throwaway.~NF

LYNCH MOB

Chaos!: *4 issue miniseries 1994*

An attempt to imitate the big-muscled superhero brutes seen in Rob Liefeld's Image comics of the time, which is so easy even mediocre writer Brian Pulido can pull it off. Were it from someone other than him satire might be suspected, although stretched thin over four issues, but at Chaos! subtlety is for wimps. Perhaps in some bizarre attempt to trademark names dozens of super-powered characters are created, labeled, and disposed of within five panels. Atrocious stuff.~FP

M

Eclipse: *4 issue miniseries 1990-1991*

John J. Muth's atmospheric painted adaptation of the Fritz Lang film, based on the screenplay by Lang and Thea Von Harbou, co-writer (also with Lang) of *Metropolis*. Put under pressure by the police, Berlin's underworld criminals begin their own search for a child-murderer. When he's captured they decide to put him on trial themselves. The painted artwork attempts to bring a photo realism to the title, but sadly detracts from the story.~NF

M.A.C.H. I Secret Weapon

Fleetway/Quality: *9 issues 1991*

When British weekly *2000AD* launched in 1977 with four new series, Judge Dredd took off, and this third-rate Six Million Dollar Man was gone within the year. Over a dozen creators worked on the series, none of them with an ounce of inspiration, and why anyone thought Americans would buy this fifteen years later is a mystery.~WJ

THE MACHINE

Dark Horse: *4 issues 1994-1995*

Having débuted in *Comics Greatest World* and hogged a fair part of early *Barb Wire* issues, The Machine stepped into his own title still hunted by the CIA. A fusion of flesh and machinery, Avram Roman can tap into any computer, has an outstanding regenerative capacity and is stronger than your average bear. It's a concept with great scope and well worked for the title's short life.~WJ

MACHINE MAN

Marvel: *19 issues 1978 (1-9), 1979-1981 (10-19), 4 issue miniseries 1984-1985*, 2 issue microseries 1994*

Debuting in *2001: A Space Odyssey* of all places, Machine Man was one of Jack Kirby's more successful 1970s creations: a thinking robot able to elongate his limbs searching for a place among humanity that rejects him. It's not an original theme, and while the art's still powerful, particularly the covers, it's not Kirby's finest work. The contrast between Kirby and Steve Ditko from 10 is a chasm, but Ditko's art also works. The stories integrating Machine Man fully into the Marvel continuity, though, are functional at best. Where Machine Man thrives is the miniseries. Tom DeFalco, who'd written the final few issues of the previous series, achieves a quantum leap in plotting, but it's the stunning art by Barry Windsor-Smith over Herb Trimpe's breakdowns that ensures this incarnation is memorable. Smith also colours the series, and his sympathetic and muted tones are essential to the evocation of a depressing future. By 2020 Machine Man has been dismantled, while his most persistent enemy owns an influential robotics corporation whose tentacles extend everywhere. Discarded by computer error, the restored Machine Man leads an uprising against the company founded on technology stolen from him. Ten years on, these issues were reprinted as two issues of *Machine Man 2020*. He was later relaunched in *X-51*.~FP
Recommended: Miniseries 1-4

MACK THE KNIFE

Caliber: *One-shot 1990*

The creators are going for that Warner Brothers cartoon effect with the exaggerated violence and talking animals, with Mack being a smooth shark. While there's a few good gags and some manic illustration, it doesn't quite come off.~WJ

MACKENZIE QUEEN

Matrix: *5 issues 1983-1984**

Mackenzie Queen lives happily in a castle. Day-to-day subsistence is not too bad, thanks mainly to his isolated location, but also because of those powers of total wish fulfilment at his command. Then those bothersome agents of the Brotherhood show up and volunteer him to help repel the Ice Men, who are giving a spot of trouble. Oh, they're also about to invade Earth. Luckily, he's assisted by his interplanetary Volkswagen Beetle and Ududu, a sort of personification of the devil: "Have any meat? I like it drippy... What's this? – Cornflakes – This isn't meat! No... but they drip."' It's by Bernie Mireault. It's in black and white. It's underground. It's sparse. It's crude. It's vulgar. It's very, very funny.~APS

MACROSS

Comico: *36 issues, 1984-1989*

The original *Macross* was a Japanese animated series featuring 'mecha' – planes and other equipment that transformed into robots. The comic started as an adaptation of that Japanese series (1), but then the *Robotech TV* series was created as an English-language adaptation of *Macross* and two other Japanese mecha series and the comic had a change of title to *Robotech: the Macross Saga*, and also of style. The story centres around the Macross battle fortress. This was built by unknown aliens and crashed on Earth in 1998. Humans put a lot of effort into mending it, and it repays them by powering up its automatic defence systems when it senses that its old enemy (the Zentraedi) are in range, and then blasting half of the Zentraedi fleet out of the sky. This means that the Zentraedi immediately wage war on Earth, and the humans make no attempt to explain but simply launch the Macross and pursue the battle out in space. This launch drags most of the surrounding city along with the ship, so the stories can feature a lot of domestic urban detail (beauty contests and teenage recording stars, mostly) mixed in with the heroic teenage fighter-pilots. This plot doubtless seems really clever and cool when you're about ten, and as entertainment for children goes, it's well crafted (apart from 1, which had ghastly artwork), though one hopes that any girl-child who picks it up already has enough self-confidence to shrug off the relentless undermining that's inflicted on the female characters. However, if your tenth birthday is but a dim memory and you're not in the advanced stages of manga addiction, you can safely give this one a miss.~FC

MACROSS II

Viz: *10 issues 1992-1993*

Tsuguo Okazaki and Sukehiro Tomita produced a Japanese comics adaptation of the video series *Macross II*, and this title is an English translation of that comic. The story takes place eighty years after the first *Macross* story, and Earth has been successfully keeping the enemy Zentraedi at bay with recordings of pop songs. However, the enemy's own singers have how arrived and in this story one of them is captured by a shallow young journalist and brought to Earth, causing changes in the singer, the journalist and the war. This isn't a humour series, though it's hard to describe without making it sound like a joke. The pop-song defence was inherited from the first series, where it went almost unnoticed among all the other idiocies designed for the ten-year-old brain. Transplanted to a comic for adults, though, it looks very strange, and that does seem to be much of the point of the story: redesigning the enemy's culture so that their reaction to the pop songs makes sense. The redesign works well, and the comic has a much more alien feel than the first series. Other changes: there's far less emphasis on the transforming machines, and far more on character development (though the characters still struggle to get to two dimensions), and the artwork is much more varied and dramatic. No change, though, in the action sequences, which are almost impossible to follow. Read an issue or two for the atmosphere, but don't expect much of the narrative.~FC

MAD

EC: *424 issues + 1952 to date*

Mad is an institution. It's the longest running non-superhero comic in the USA, and if sagging a little around the waist after fifty years it's had a traceable influence on American culture over several generations. *Mad*'s origin is shrouded in contradictory accounts. What's certain, though, is whoever originally suggested a humour comic, the initial success can be ascribed to the individual vision of Harvey Kurtzman. Stories of his in early issues of *Weird Science* pointed the way, and he stamped his style and personality on *Mad*, writing almost everything and laying out each strip for the artists. How it might have been under other auspices is demonstrated by *Panic*. Released by EC in the wake of *Mad*'s success, it was "the only official *Mad* imitation", and while good, it lacks the offbeat inspiration that characterised the best of the early *Mad*. Whatever it became, though, *Mad* was hardly a guaranteed success when launched.

The first issue entirely parodied other EC titles, and although tame in comparison with what was to follow comics had never seen anything like the frenetic and irreverent gag packed strips. As on all EC material, the art was superb. Jack Davis, and Wally Wood proved as adept at comedy as other genres, and John Severin's restrained approach provided contrast in 1-10. It was Will Elder, though, who really established *Mad*'s early look. His other EC work was stiff, but *Mad* was obviously a liberation. His pages seeped over the top slapstick from every panel, each stuffed with a wealth of verbal and visual asides. Everything Elder produced for *Mad* was hysterical, but for his peak see 'Shermlock Shomes' in 7.

2 ran a Tarzan pastiche (an idea repeated to funnier effect in 5), a theme continued in 3 with parodies of then top TV shows *Dragnet* and *The Lone Ranger*, thus initiating a *Mad* staple. Both were reprised and the best of other early wickedly accurate lampoons were Wood's 'Superduperman' (4) and Elder's *King Kong* (6). Other *Mad* standbys followed. Skewed versions of literary classics were introduced (via swipes at *Classics Illustrated*) with *Treasure Island* in 7, and 5's *Casey at the Bat* initiated a succession of wacky poetry interpretations. The best were Jack Davis' fantastically grubby 'The Face Upon the Floor' in 10 and Elder's manic version of *The Raven* in 9. That issue was a landmark, also introducing contemporary movie parody with a version of *High Noon*, and broadening the targets with a glance at Bop culture. Successive issues cast the net ever wider, with the Elder drawn look at restaurants in 16 stunning. From 11's Wolverton mock-up of *Life*, the covers forsook comic convention for ever more offbeat designs, with Kurtzman having the courage by 23 just to print the word 'think' along with the title. It was particularly apt for an issue containing a *Pogo* pastiche savaging the appalling Senator Joe McCarthy. Perhaps the cover innovations sparked interior artistic leaps, or maybe it was the glut of imitative publications that rapidly appeared, named and pilloried in 17. 12's Wood drawn explanation of 3-D comics is a masterpiece, with pages ripping, characters falling through panels, and daringly concluding with a blank page. That issue also has a Bernie Krigstein contribution, pastiching *From Here To Eternity*.

Comparison features, a *Mad* regular to this day, began in 13 contrasting the book and sanitised movie version of the same story, and while retaining straightforward parodies, less reliance on traditional comic format became the order of the day. Faked pages from a generic newspaper in 16 are used to satirise the furore over comic content, 19 contained unsolveable puzzle pages, there are parody ads in 21 and 22 is almost entirely a stunning photographic collage strip purporting to present the life of Will Elder. More standard strips worth noting in these later comic issues are Elder's Disney character parody in 19, Elder and Krigstein's masterful strip and reality pastiche of 'Bringing Up Father' in 17, an otherwise sub-par issue. An often stolen cover line ran "Humour in a Jugular Vein", and while taken for the wit it was, it's very apt, with Kurtzman's indignation at the placid acceptance of mediocrity informing his often barbarous swipes, such as the Jack Davis drawn pop at cheap TV in 15. The penultimate cementing of *Mad*'s status was the transformation from comic to magazine with 24 to appease Kurtzman's ambition, simultaneously avoiding the strictures of the new Comics Code Authority. While necessitating the removal of interior colour, the change permitted less reliance on strips, and more text and illustration in common with other magazines, and the employment of known humourists including Stan Freberg, but more regularly Ernie Kovacs and Bob and Ray. To all intents and purposes what Kurtzman left with 28 is the template for all succeeding issues, although despite the sophisticated design, innovation and crumbling of comic tradition these magazine issues lack the cohesive nature and manic spark of the final dozen or so comics. Those comics have a legacy far beyond their undeniable quality, with almost all the leading lights of the 1960s underground comics citing them as a primary influence, and plenty of artists beyond comics posting similar acknowledgements. Kurtzman's succeeding projects would not be as successful either creatively or financially.

The historical tendency to canonise the Kurtzman issues, unfairly belittles his versatile and under-rated successor Al Feldstein by comparison. Although not a maverick, passed a successful formula, Feldstein knew how to run with it and tweak it, and it was he who increased sales until they matched reputation. His first problem was replacing four major contributors. Although in 29-31, Davis and Elder joined Kurtzman on the ill-fated *Trump!*, and Al Jaffee, who'd arrived in 24 departed with them. Years later Davis and Jaffee would return as mainstays. Within four issues Feldstein had gathered George Woodbridge and Joe Orlando, the double-jointed slack-jawed figures of Don Martin, the incredibly adaptable Bob Clarke, and the incomparable Mort Drucker, allegedly hired when the result of a baseball game went the right way. All would remain for decades. Of the other contributors most associated with *Mad*, Antonio Prohias produced the wordless 'Spy vs Spy' continuously from 60 until his retirement in 1990, Jack Rickard's almost photographically accurate caricatures were first seen in 64, Sergio Aragonés debuted in 76 and Dave Berg arrived in 1959, although the feature for which he's best known 'The Lighter Side of...' was introduced in 66 in 1961. The observational nature of the latter was part of Feldstein's deliberate attempt to increase sales by incorporating more general humour, and over his first three years as editor he replaced the expensive satirists with lesser known but equally effective writers. That the likes of Dick DeBartolo, Stan Hart, Frank Jacobs, Tom Koch, Arnie Kogen and Larry Siegel remain relatively anonymous after decades of contributions is puzzling. Also noteworthy was Kelly Freas, cover artist between 1958 and 1962, whose interior contributions were a succession of finely painted ad parodies.

Feldstein's major editorial impact came with the introduction of cover mascot Alfred E. Neuman. A lookalike of the shrugging gap-toothed goon with the immortal tagline "What me worry?" was noted by Kurtzman, who appropriated the image for the first *Mad* paperback collection, taking the name from a radio show's running gag. It was Feldstein, though, who ran with the idea, instituting Neuman on the covers. Norman Mingo painted the first Neuman cover on 30, then 31-37. He returned in 1962, continuing to paint Neuman covers until his death in 1980. The cover to 31 has Neuman incorporated into Mount Rushmore, and his fame eclipsed some of the presidents thereon while cementing *Mad* as a universal cultural touchstone. For all the consistency, though, the success of *Mad* can be equally attributed to being in the right place at the right time. As teenagers emerged into post-war prosperity they latched onto an anti-establishment pomposity-pricking magazine in increasing numbers, with sales peaking at over 2 million copies per issue in the early 1970s. By this time artists Angelo Torres and Paul Coker had joined 'the usual gang of idiots'.

Over his first few years as editor Feldstein gradually transformed satire into parody and diminished the slapstick aspects of *Mad*, resulting in humour based more on caricature and dialogue. From that point until recently *Mad* evolved very little, but high editorial standards were always maintained despite losses such as the defection of Don Martin to rival *Cracked* (where Severin was already a mainstay) over the issue of work ownership in the late 1980s. Political commentary was increased during the Nixon years, and the cover gags were phased out in the 1970s, when the commercial decision was made to cover feature the film and TV satires within. Those take-offs generally rely on pointing out the absurdities and plot lapses, and excellent caricatures, most often from Drucker, Davis or Torres, but can be very predictable. Occasionally, though, they offer something more, a prime example being Larry Siegel's scathing indignation at the comedy of *Hogan's Heroes* stemming from the P.O.W. camp setting leading to an outrageous conclusion in 108.

When Feldstein retired in 1985, he bequeathed the editorial desk to Nick Meglin, an assistant editor since 1956, thus ensuring continuity. The success of *Mad* applied a familiarity to the content, though. It's had a vast cultural influence and sustained its position via inertia, in the process having less relevance for each succeeding generation. There's little difference in essence between the shredding of Bonanza (73) in 1962 and Six Feet Under (418) forty years later. Since the late 1950s the first few issues anyone sampled of *Mad* would probably be the funniest comics they'd read, but the repetition and recycling of material to a formula, no matter how well executed, offers diminishing returns. By the late 1990s the retirement of many long-term contributors permitted a slightly fresher outlook from newcomers. Peter Kuper now draws 'Spy vs Spy' as if born to it, and other semi-regulars include Kyle Baker, Shary Flenniken, Drew Friedman, Amanda Conner, Bill Wray, and Rick Geary, whose style fits surprisingly well. More latterly there has been a greater willingness to probe subjects previously off limits. One can't imagine the Drew Friedman illustrated 'Suicide Etiquette' (383) or the recurring 'Celebrity Cause of Death Betting Odds' (from 358) before the late 1990s, and there is sometimes more overt social commentary such as Sergio Aragonés tackling racism (356). 368 was a landmark, returning colour to Mad's interiors for the first time in over forty years for a spoof of *Entertainment Weekly*. It led indirectly, however to 403 when *Mad* reverted to full colour throughout, the extra cost being subsidised by taking advertising for the first time. Previous editorial policy had always held successful satire required total freedom. Cosy familiarity doesn't.

The sheer volume and variety of *Mad* specials and reprint collections makes a comprehensive listing beyond this publication. Ballantine Books began a line of paperback collections with *The Mad Reader* in 1954 (excising 17's Joe McCarthy satire from the second edition on), and later Signet maintained a publication schedule into the 1980s. 1-23 are best sampled through a reprint set of four lavish oversize hardbound collections published by Russ Cochran in the mid-1980s, with DC latterly republishing the early issues in their hardback Archives series. *Mad About The Fifties*, *Mad About The Sixties* and *Mad About The Seventies* are comprehensive samplings of those decades' output, and recommended to any casual reader. *Mad About The Movies* is a decent collection of film parodies, mostly drawn by Mort Drucker, but the completist can't do better than Broderbund's seven CD-Rom set. They incorporate every issue to 376 (minus a few pieces that ran into copyright problems) in affordable format along with the give-away records, filmed interviews and other ephemera.~FP

MAD-DOG

Marvel: *6 issues 1993*

The 1990s *Bob* TV show cast Bob Newhart as a comic artist given the opportunity to revive his homely 1960s character Mad-Dog, provided it was given a grim and gritty reworking more in keeping with the name. *Mad-Dog* is a flip comic offering both versions. Ty Templeton's humorous take on the naïvety of 1960s comics, with the original Mad-Dog, is more successful than the updated version, which isn't far enough removed from the ultra-violent 1990s superheroes it parodies.~FP

MAD DOGS

Eclipse: *3 issue miniseries 1992*

Violent thriller in which the cops are as reckless as the gangsters, hence the title. Excellent Victor Toppi artwork promotes this above average.~FP

MAD HOUSE

Red Circle: *3 issues (95-97) 1974-1975*
Archie: *33 issues (98-130) 1975-1982.*

This was previously *Mad House Glads* (and *Mad House Ma-Ad* before that), and featured vaguely horror-themed gags in the Archie style, but for 95-97 the comic was revamped under editor Gray Morrow. Typically for a Red Circle comic, the art is terrific with a wide range of styles on show here, from the likes of Vincente Alcazar, Doug Wildey, Gray Morrow and Frank Thorne, and the numbered short stories are well crafted, if rather tame and wordy. The short-lived 'mature' Red Circle period was followed by a return to the more usual Archie material, albeit with a science fiction bent for the rest of its run.~DAR

MAD PECK STUDIOS

Dolphin/Doubleday: *1 volume 1987*

This is quite the novelty item. Operating as a record reviewer for a local paper, and simultaneously running an art studio in the 1960s, John Peck adopted the alias The Mad Peck combined the two and began doing cartoon strip music reviews. To comment on the music he appropriated the then out of print Black Cat, changing her name to Masked Marvel, supplying her with a small supporting cast including all-purpose musicologist Dr Oldie, and Frogman Jack, son of a 1950s TV star. Television references abound, with plentiful guest appearances from the stars of 1950s shows, particularly *Sgt Bilko*. The Mad Peck eventually made it to *Creem*, then *Spin* with his strip, but it ended in the early 1980s after Marvel of all people sent a lawyer's cease and desist letter claiming Masked Marvel infringed their copyright on Ms Marvel! Thereafter Mad Peck concentrated on TV cartoons, some of which are also represented. The strips are drawn in the cramped style of 1940s comics, and to take the most from them some knowledge of the music is necessary, but music fans should love the earlier material with its suggestions for compilation tapes.~WJ

MAD RACCOONS

Mu Press: *7 issues 1991-1997**

Cathy Hill's *Mad Raccoons* was an annually published anthropomorphic series that managed the difficult task of staying this side of cute, but retaining good old-fashioned charm. Virgil is constantly frustrated, ever ready to fall into a tantrum, Uncle Erf has a personality disorder that makes him act at times like his own son, his own wife or his own dog, Orly and Poppyseed are youngsters, while Cousin Lemur is a wandering minstrel. The strips are generally light-hearted explorations of the raccoons' world, but alongside them there are features on Raccoons in Literature or The Philosophy of Raccoons. The black and white cartooning is simple but visually inventive, with an acknowledged debt to such greats as Walt Kelly, Carl Barks and George Herriman.~NF

MAD SCIENCE

Slave Labor: *2 issues 2001*

Jon "Beans" Hastings dabbles with the comedic potential of the mad scientist sub-genre. In Santa Cruz in 1989 the manic Dr Mondo has a spare brain in a jar and a batch of captive aliens in his cellar, when the infamous Loma Prieta earthquake enables them all to escape. Suddenly it's now and a bunch of Scooby Gang knock-off college kids are drawn into a world of weirdness when one of their classmates becomes aware that he is the missing organ-under-glass and the evil doctor finally moves to regain his property. Lackadaisical blend of Travelogue for Santa Cruz and B-Movie pastiche. Unsatisfying.~WW

MADAME XANADU

DC: *One-shot 1981*

Much was expected from the *Detective* dream team supreme of Steve Englehart and Marshall Rogers in the first comic to be sold only through direct-market outlets and thus free from Comics Code restrictions. Englehart offers up those subjects he likes best: the Tarot, drugs and demonology in a lead feature that might have held water had it been published in flower-power days. Ironically, it takes backstage to J. M. DeMatteis and Brian Bolland's poignant seven-page science-fiction back-up.~APS

MADMAN

Tundra: *3 issue miniseries 1992*, 3 issue miniseries (Madman Adventures) 1992-1993**

Dark Horse: *20 issues (Madman Comics) 1994-2000, 2 issue microseries (Madman Jam) 1998*

Infused with the spirit of 1950s science-fiction films, Madman is also a partial return to the innocent superheroes of yesteryear. Writer and artist Mike Allred convincingly presents a world of benign and eccentric inventors creating strange robots, touching and friendly relationships, and although starring a costumed lead, there are no super villains and this is no traditional superhero series.

The first squarebound Tundra series is grey, black and white, and Allred has yet to refine the elements of his strip. There's a dark tone throughout with some resolutely unpleasant (and later uncharacteristic) scenes, but Allred's art is already polished, and it's a fine B-movie style plot. The socially dysfunctional Frank (Madman – although he's never referred to as such, it's just a catchy title) is full and present in costume, and the story establishes the main cast, some of whom were introduced in Allred's previous series, *Grafik Musik.* From many others it would stand alone as excellent, but for Madman it's more a prelude. The recent Oni Press collection adds colour. The second Tundra series is pretty much the finished article, featuring a more mature Frank, a much lighter tone and Laura Allred's vibrant colours providing the final step to an entirely charismatic package.

The continuing series is a success from the off. In the first few issues there's a plethora of bug-eyed monsters, inventive robots and aliens. Hellboy is in 5, and The Big Guy assists Frank (or vice versa) in 6 and 7. The early issues are fun all the way, and anyone who's going to like *Madman* will be instantly drawn to them. 9 is a tale, pretty much complete in one issue, of Madman shrunk to minute stature having to make his way home; this is a good representative sample. Such is the Madman's popularity and visual appeal that there are also two series of bubblegum cards (without the bubblegum), offering interpretations of the character from some of the greatest artists around. Allred used some illustrations as back-cover pin-ups, but they're entirely worth a separate purchase, perhaps as four issues of *Madman Picture Exhibition* (2002).

A thirty month hiatus separated 11 and 12, punctuated by the perfunctory *Madman Jam*, which is neither Allred or Bernie Mireault at their best, but led to Mireault's Dr Robot back-up strips in 12-16 where they outshone by miles a strangely disjointed and padded lead feature. 17-20 are presented as a four issue miniseries subtitled 'The G-Men From Hell', although given series numbering inside the covers. It was a return both to form and to plots Allred left dangling a decade previously in *Grafik Musik.* Madman's participation is minimal, as the dead G-Men continue their quest for redemption after escaping from hell.~WJ

MAEL'S RAGE

Ominous: *1 issue 1994*

Artist Bart Sears strikes out on his own and rapidly proves he can turn out plotless big-bicep nonsense with the worst of them.~FP

The MAGDALENA

Image: *3 issue miniseries 2000*, one-shot 2001*

There is a lineage of warrior-nuns descended from the daughter of Mary Magdalene and Jesus of Nazareth. Each generation has a champion named The Magdalena and pseudo-history records her working in secret for the Vatican. The present day Magdalena uncovers a coven of christian vampires and finds her loyalties split between the church and these vampyri, leading to a confrontation with The Garduna, the Inquisition's implacable soldiers. The one-shot (issue ½) introduces a horned angel who possesses the legendary spear of destiny. Don't forget that Magdalena is a babe in shiny black skintight gear and she's stacked. Joes Benitez and Wems' artwork, complimented by the incredibly polished colouring of Tyson Wengler (1) and Jonathan Smith (2-3), is exemplary. Unfortunately the writing alternates between banks of exposition and ejaculations of surprise, often during combat. Preposterous, jewel-encrusted nonsense.~SW

MAGE

Comico: *15 issues 1984-1986**

Image: *15 issues 1997-1999**

Reading the first series of *Mage* can be very refreshing if you like fantasies, but are fed up with soft-centred fairies and hobbits. If you don't, you'll probably find it twee. Mage is a quirky updating of Arthurian myth, fast-paced and engaging (if you can stomach whimsical touches like calling the hero Kevin Matchstick). It's unsophisticated but well-structured and full of likeable characters, from Mirth, the teasing wizard, to Sean, the morose ghost. It has all the appeal of films like *Highlander*, but takes itself less seriously, with the characters periodically aware of how silly they sometimes appear. Matt Wagner has a direct approach to storytelling. His hints are very heavy, and most of the time he has one of his characters explain anything that might be confusing to another. His art's bold too, with lots of black backgrounds and bold brush-strokes. Sam Kieth played to this when he took over inks with 4, but added his own finesse. Wagner's art improves throughout. In 1 his action scenes are jerky, but by 5 the comic's become a breathless read. Kieth's inks are dazzling, but the effect is undermined by the garish application of colour. From 6 there's a regular Grendel back-up, later collected, and indeed Mage features as back-up in some issues of *Grendel.*

The second series is very much more of the same, an action-packed fifteen issue single story in which Kevin confronts his own mounting arrogance as 'The Pendragon'. He joins a whole bunch of heroic avatars (Hercules as a redneck, The Monkey King as a po-faced Chinese waiter) to fight an impending menace. There's a real feeling of "been there, done that, bought the commemorative hero statue for way too much money" about the second outing. Perhaps it's simply that like sweets a handful are nice, but too many are sickening.~FJ

Recommended: Series one 5-8

MAGGIE and HOPEY

Fantagraphics: *One-shot 1997*

A colour comic filling the gap between creator Jaime Hernandez' Whoa Nellie miniseries and his ongoing *Penny Century* title. Maggie and Hopey from Jaime's *Love and*

Rockets stories feature in seventeen pages set against the backdrop of a swimming pool party gradually going sour. Interspersed between chapters are three short strips starring the diminutive Mini Rivero, Cheeta Torpeda the robot girl superhero and L'il Ray. A delightful read with important developments pertaining to later stories, particularly regarding Negra, H.R. Costigan's daughter. The Li'l Ray story is Jaime in his Dennis The Menace mode and also features Li'l Maggie and Isabel too... 'nuff said!~SW
Recommended

MAGGIE THE CAT

Image: *3 issues 1996*

Arguably Mike Grell's best character, cat-burglar Maggie gets a chance at her own title on the strength of the general interest in 'bad girls' as female leads. Grell's scripting has never been particularly focused and his artwork on this title is looser than ever. Originally a light-hearted sparring partner for Grell's pseudo-Willie Garvin, Jon Sable, for this series Maggie is thrust into a world of spies and international intrigue which doesn't particularly suit her character or her abilities.~NF

Calling John Force MAGIC AGENT

ACG: *3 issues 1962*

Force was a sort of one-man *X-Files*, investigating supernatural threats with a few tricks up his sleeve to stop them. There are three short stories each issue, but the occasionally inventive plots of Richard E. Hughes are dulled by the art of Pete Costanza and, particularly, Paul Reinman. Force later settled into occasional appearances in ACG mystery title *Unknown Worlds*.~WJ

THE MAGIC FLUTE

Eclipse: *3 issue miniseries 1990*

Mozart's Magic Flute is a perennially popular opera, conveying tragedy, farce and romance; here the spectacle is rendered in exquisite fashion with an extraordinary delicacy by P. Craig Russell. He is, however, ploughing a lonely and eccentric furrow in adapting operas to comics. While they have the capacity for pomp and pageantry bestowed by an unlimited budget, the missing sound and fury renders them an unsuitable receptacle for opera, and with little to clothe bare-bones plots one is left with a hollow item of great beauty.~FP

MAGIC PICKLE

Oni Press: *4 issue miniseries 2002**

Eccentric and surreal martial arts/superhero spoof telling the story of Jo Jo Wigman, a little girl whose life is forever changed when Weapon Kosher, the legendary Magic Pickle bursts through the floor of her bedroom! Can she solve the riddle of the Pickles' connection to the Brotherhood of Evil Produce? Is she subject to Dill Justice? Can she possibly get a date with that cute Danny Johnson? A wacky, acquired taste from Scott Morse.~WW

Father Crowe MAGIC PRIEST

Antarctic: *2 issues 1998*

Yet another series with *Warrior Nun* connections, but one of the better ones. Father Crowe is a priest with sorcerous abilities selected to investigate a murder. Having witnessed the murder of his parents as a child, Crowe experiences flashbacks, and also uncovers some disturbing evidence. The diary style narrative occasionally drifts too far into exposition, but the Crowe is likeable and Neil Googe's art is very promising so it's a shame the series never finished.~WJ

MAGIC: THE GATHERING

Armada: *4 issue miniseries ('Shadow Mage') 1995*, 2 issue microseries ('Arabian Nights') 1995, One-shot ('Homelands') 1996, 2 issue microseries ('Legend of Jedit Ojanen') 1996, 2 issue microseries ('Shandalar') 1996*

These are comics based on the collectable card game that took the world by storm. Although better produced than the similar role-playing-game comics that preceded them by half a decade, they remain pedestrian sword-and-sorcery material.~HS

MAGIC THE GATHERING

Dark Horse: *4 issue miniseries 1998*

Mike Grell and Pop Mhan knock out by the numbers fantasy based on characters from the role-playing card game. Dull.~DB

MAGIC WHISTLE

Alternative Comics: *7 issues + 1998 to date*

Britain has been blessed with the high quality toilet reading provided by *Viz Comic* for years, mining every scatalogical theme in fabulous fashion. Oddly, there's been very little similar material for the American market. Step forward Sam Henderson, with his gag cartoon strips, drawn in quick sketchy and simple style with Peter Bagge and J. R. Williams obvious touchstones. It's nowhere near as good as *Viz*, but after a few beers the misfortunes of a naked guy who constantly gets stuck in his cat-flap, Dirty Danny and assorted obscene versions of 1970s TV shows can be quite funny. Largely brief, six panel gags, anything extending over a page reads like collisions of short strips. There's also a book titled *The Magic Whistle Blows*, reprinting strips from the self-published minicomics that preceded this. Keep it by the bog.~FP

Mio Odagi's MAGICAL MATES

Antarctic: *6 issues 1996*

Three high school girls use charms and tarot readings to win their fights. Perhaps it's down to the cultural differences in expectations from a story, but even accounting for the fantasy elements, there's little logic underpinning these stories. If you can accept things happen for the convenience of the plot, you might enjoy these adventures of a sort of Japanese Powerpuff Girls. They're obviously intended for young girls, which makes the back cover adverts on some issues totally inappropriate. Despite the series being planned as first eight, then nine issues, there's no evidence of any beyond 6 being published.~FP

MAGICAL TWILIGHT

A.D.Vision/Graphic Visions: *3 issues 1995*

This collection of hardcore short stories is based on an anime series and focuses on themes of erotic fantasy – Yayoi grows a penis and tries it out on her girlfriend, Asami (1), an apprentice witch haunts a young man's dreams (unfinished in 3). The sometimes intricate artwork can be eye-catching, but the overall quality is patchy.~NF

MAGIK

Marvel: *4 issue miniseries 1983-1984*

In *Uncanny X-Men* 160, seven-year-old Illyana Rasputin is transported to the magical realm of Limbo, ruled by the demon Belasco. She returns to Earth in a second, twice the age she should be, with fantastic powers. This Chris Claremont written series fills in the story of what happened in the seven years she spent in Limbo, with liberal sprinklings of alternate-world versions of familiar characters and all the trademark Claremont angst.~JC

MAGNETO

Marvel: *One-shot 1994, 4 issue miniseries 1996-1997*

The début one-shot was an embossed cover reprint of two Claremont/Bolton back-ups from *Classic X-Men* with a framing sequence and a pin-up gallery. The second attempt to give one of Marvel's potentially most interesting characters his own title was not as prettily drawn and nowhere near as well written. An amnesiac Magneto, now reformed and calling himself Joseph, meets his former followers the Acolytes once again, and Peter Milligan proves once again that while he can be a talented writer, he and the Marvel mainstream just don't mix.~JC

The Mighty MAGNOR

Malibu: *6 issue miniseries 1993-1994*

Sergio Aragonés attempts to recreate the success of his *Groo the Wanderer* with this tale of an amnesiac spaceman who ends up in the hands of two struggling comic artists. Seizing

* Available in a collected edition

the opportunity, they set him up as a real-life superhero, claiming ownership and responsibility, at least until the lawsuits for property damage start coming in! Hilarious stuff.~HS

Recommended: 1-6

MAGNUS/NEXUS

Valiant/Dark Horse: *2 issue microseries 1993*

Prettily drawn by Steve Rude, but otherwise fairly inconsequential team-up between the two characters. Written by regular Nexus scribe Mike Baron, the story deals with Arkon, an alien who arrives on Magnus's planet and goes about curing the population of all ills. Predictably, all is not what it seems and Nexus soon turns up to save the day.~JC

MAGNUS, ROBOT FIGHTER

Gold Key: *46 issues 1963-1977*

Wanting a science-fiction strip of the type that would be too costly for television, Gold Key editor Chase Craig came up with the idea of someone who fought robots, a concept then modified by Russ Manning when the project was assigned to him. Raised from the cradle by all-wise robot 1A, Magnus combats renegade robots in an otherwise idyllic 40th century. Manning plotted and drew the first twenty-one issues (with Mike Royer assisting towards the end of his tenure), and never put a foot wrong. His fluid, controlled artwork enabled him to switch from action scenes to everyday moments with naturalistic ease. His characters were clean and heroic, his villains had a distinctive silent-film quality, and his robots, though seemingly fragile, were well designed, but Manning's plots were really only showcases for the action and the art. 22 reprints the first issue, after which Paul Norris handled the strip until 28. With the exception of the substandard 42 and 44 the remaining issues are all reprint. Valiant issued a further series of reprints with four issues of *Vintage Magnus, Robot Fighter* to accompany their revival of the character. The back-up strip 'Aliens', also by Manning, ran in 1-22, and early strips were reprinted as a one-shot.~SW

MAGNUS ROBOT FIGHTER

Valiant: *65 issues (0-64) 1 Yearbook 1991-1996*

Following his departure from Marvel, Jim Shooter turned his talents to revamping the 1960s Dell/Gold Key heroes. Magnus was the first, and using a blend of strong scripting and understated artwork, was soon setting the comics industry afire. Shooter wisely chose to incorporate the continuity of the Gold Key era, keeping older fans interested whilst he gave the series a 1990s spin. Magnus' guardian, a "Free-will" robot designated A-1, has realised humanity is becoming weak and indolent, easy prey for less enlightened Free-wills let alone a danger to themselves. Magnus has been defending and inspiring humanity for a brief period as the series opens and 1-4 relates how he comes to terms with his prejudices against robots who can think for themselves and his bias for humans who won't. He abandons the spoiled upper echelons of humanity and becomes a member of the Gophs (a human underclass) who live as savages at the bases of the mile high skyscrapers of the 41st century. 4-8 form a flip comic to introduce Rai, the Guardian of Japan and set the pace for a string of well-paced action thrillers that establish the landscape and characters prior to Valiant's big inter-company crossover Unity (14-15). This in turn leads into seemingly unconnected tales, illustrated by Steve Ditko and Ralph Reese, which lay the threads for a major story arc. 21-37 written by John Ostrander tell of the conquest of Earth by alien Malev robots and the guerrilla war for survival that ensues.

Although perhaps overlong, it's one of the few times that this sort of epic actually succeeds, but the follow up is pitiful. With the war over, the story restarts nearly twenty years later, with Magnus as world president, and his teenaged son goofing around, getting into fights and embarrassing dad. Its as heavy-handed and clichéd as its immediate predecessor was gutsy and entertaining. Convoluted plots from a variety of writers including Keith Giffen, involving alien invasions, body snatching Free-wills, Magnus senior lost in time and the Malevs' return, bog down in their own complexity and its no surprise or loss when the comic is cancelled. It just goes to show how important a good editor really is.~WW

Recommended: 1-10, 17-19, 21-37

MAGNUS, ROBOT FIGHTER

Acclaim: *18 issues 1997-1998*

The most recent retooling has Russ Magnus, a cynical world-weary zealot, travel to the present from the year 4000 to prevent society becoming dependent upon technology and dying from couch potatoism. His robotic mentor 'Good Shepherd', a kind of mechanical bishop, has trained Magnus from infancy to fight mechanised society from self-serving desires. When robots conquered mankind by coddling them, they created a religion whereby meat is a sacrament and the only meat left is Homo Sapiens. Magnus has been bred as a rebel because free range meat tastes better. From this peculiar beginning, Tom Peyer and Mike McKone craft average action-adventure with very few high points as most issues use the 'find the future tech, smash the future tech' plot. A storyline deriving from Good Shepherd giving Albania 40th Century technology and making them the pre-eminent superpower had potential, sadly curtailed by Acclaim's premature demise.~WW

The MAGUS

Caliber: *2 issues 1998*

Spin-off from St Germaine, and relating the story of the immortal father of major mystic player Lilith and arch-enemy/father-in-law of St Germaine. Nonsensical eldritch soap opera, impossible to follow without a route map and a scorecard.~WW

MAI THE PSYCHIC GIRL

Eclipse: *28 issues 1987-1988**

Mai is a Japanese schoolgirl who has inherited powerful psychic abilities from her dead mother, abilities the Wisdom Alliance, bent on world domination, want to train and harness. In order to escape them Mai must leave behind her ordinary life, her school-friends and her father, and take a journey, both physical and spiritual, to learn how to best use her inheritance. Kazuya Kudo's script blends the everyday, the mystical and the futuristic effortlessly. Mai is perfectly portrayed on the cusp of adolescence, feisty but needing guidance, alternately exulting and horrified by her powers, laughing with her school-friends over a crush but knowing, simultaneously, that her mind has huge destructive potential. Kudo keeps the comic full of surprises, bursts of humour interspersing epic mental battles and people being injured and killed when you're sure they're too intrinsic to the plot, and too likeable, to deserve such a fate. Ryoichi Ikegami matches these abrupt changes in his artwork. Full of splash pages for confrontations, he also has plenty of time for slapstick sequences and tender scenes. His art is a little more cartoony than usual, particularly in the humour scenes, but it's a lot more realistic than the traditional wide-eyed look he's chasing in his depictions of Mai. Titan reprinted the series in four very handsome Japanese-format graphic novels.~FJ

MAISON IKKOKU

Viz: *7 issue limited series ('Part One') 1993*, 6 issue miniseries ('Part Two') 1994*, 6 issue miniseries ('Part Three') 1994*, 10 issue limited series ('Part Four') 1995*, 9 issue limited series ('Part Five') 1995-1996*, 11 issue limited series ('Part Six') 1996-1997*, 13 issue limited series ('Part Seven') 1997-1998*, 8 issue limited series ('Part Eight') 1998-1999*, 10 issue limited series ('Part Nine') 1999-2000**

The new manager of a small boarding house called Maison Ikkoku, Kyoko Otonashi is a young widow. Her tenants are an odd bunch and include Yusaku Godai, a student drop-out, Yotsuya, a mysterious young man who spends most of his time scrounging off the rest of the tenants, Akemi, a young woman who works at a local bar, and Mrs Ichinose and her son, who has shown no sign yet of the madness that seems to afflict the rest of the household. From this, Rumiko Takahashi has created a romantic soap opera in which the tenants are comic foils for the nearly on, mostly off relationship between Godai and Kyoko. Constant misunderstandings dog their lives and each is pursued by other suitors to prolong the suspense.

'Part One' sets the scene and introduces Mitaka, tennis coach and all-round good guy who becomes Godai's rival for Kyoko, and Kozue, a young girl student who starts to go out with Godai (when he decides that he does need an education after all) and can't understand why he won't take advantage of her. 'Part Two' continues the will-they-or-won't-they nature of the relationship, as Kyoko's parents try to persuade her to give up her job and move back with them. Godai meets Kozue's very friendly parents, making it all the more difficult for him to tell her he doesn't want to go out with her any more. 'Part Three' begins with a loss, but is mainly about Godai's misfortunes when he shares an apartment with a masseuse and her Yakuza boyfriend. The rest of the series settles into a pattern of sorts. A drunken kiss from Akemi for both Godai and Kyoko causes complications. Mitaka and Kozue unknowingly create the wrong impression when Kozue asks for his advice about Godai. Then there's an impromptu costume party when Kyoko tries on her old school uniform and Godai's grandmother arrives to create some inspired interference. After Grandma's return to her home in 'Part Five', Godai breaks a leg trying to rescue Kyoko from the roof and there follows a series of misadventures in the hospital that eventually includes even Mitaka. 'Part Six' introduces a new resident. Nozomu is a rich troublemaker who's there by accident, but decides to stay to be close to Kyoko. Meanwhile, Godai lands a job as a trainee teacher at Kyoko's old school and finds himself the object of affection for Yagami, one of the students, much to his consternation.

In 'Part Seven', Godai works part time in a strip club, Yagami manoeuvres him into becoming her personal tutor and Mitaka is set up for an arranged marriage with dog-loving Asuna. 'Part Eight' piles on the misunderstandings with Godai playing father to the children of a stripper, a night's hotel reservation and a drunken encounter between Godai and Mitaka. Things look better at the start of 'Part Nine' as Mitaka and Asuna seem to accept their fates, but there are further complications.

Takahashi's artwork is simple, but effective, especially in the expression of emotion. The storytelling, building to an affecting finale, is fast-paced and full of slapstick, but capable of drawing back for quieter, more intense scenes that mostly avoid seeming too manipulative.

Whether you'll enjoy the series depends on your tolerance for being teased and for the largely unsympathetic nature of Godai. Everyone treats him like a doormat, but his ineffectiveness and indecision generally mean he deserves such treatment. As the series progresses, Godai does mature, even as his mishandling of situations seems to escalate, and as he does so, his chances with Kyoko improve. If you enjoy one part of the series, you'll enjoy all of it.~NF

MALCOLM X The Angriest Man In America

London Publishing: *One-shot 1992*

Worthy but dull effort to bring the teachings of Malcolm X to a comic-reading audience. The problem lies with the illustrations, which add nothing to the text, and an unimaginative talking-heads format studiously applied throughout. You're better off buying a book.~FP

MALICE IN WONDERLAND

Eros: *1 issue 1993*

A reprint of two deeply misogynistic porno strips by noted illustrator/dirty old man/bon viveur Wally Wood. The title story is, of course, a Lewis Carroll/Disney parody that has our buxom, naked heroine adrift in a creepy Wonderland full of horny anthro-animals, while 'Flasher Gordon meets Women's Lib' includes a great many 'hilarious' rape gags. As a dispiriting insight into Wood's boringly conventional sexual imagination this is not without 'interest', but as a piece of erotica, or even a piece of comic art, it's nothing more than tossed-off rubbish, in every sense.~AL

MAN

Nicotat: *1 issue 1989*

Pastiche of the ultra-violent comic characters populating comics in the 1980s, positing that the deadliest creature on Earth is Man. Inside an ultra-brute proceeds to demolish an entire town. It's a joke stretched too far, unlike the two-page back-up, in which Gerard Jones redialogues an old war story to far funnier effect.~WJ

THE MAN

Print Mint: *One-shot 1972*

Completed in 1966 while in college, this collects one of Vaughn Bodé's earliest works. It details several days in the life of a caveman, in which he simply hunts, eats and eventually finds a companion, a lizard. Taking this simple premise Bodé uses it as a means to ask some very profound questions about our relationship with the planet and life itself. Both touching and insightful, this is quite possibly the first existential comic.~DAR

Recommended

Randy O'Donnell Is THE M@N

Image: *3 issues 2001*

A teenage boy is transported via a magical object to another world where he has superpowers and spends his time saving the day, yet at home he can't get a date or the respect of his peers. Tom DeFalco's script is competent, as are Ron Lim's pencils, but don't waste your time looking for original ideas, because there aren't any.~DB

MAN AGAINST TIME

Image: *6 issue miniseries 1996*

An intriguing, dream-like story starring Law, a mysterious hooded figure who creates and destroys timelines at whim so he can have 1940s pilots in space and 19th-century Arizona lawmen fighting ancient Romans. Perhaps he will stop world war erupting in the Balkans a fourth time. The art by Gino DeCicco is the only clear thing in it.~GK

MAN-BAT

DC: *2 issues 1976, 3 issue miniseries 1995*, 3 issue miniseries 1995-1996*

Drinking a serum that transforms him into a mixture of man and bat, Kirk Langstrom débuted in *Detective* 400. He proved popular enough to merit regular appearances in Batman titles, but not to sustain his own series beyond two wildly different stories, almost unconnected beyond the title character. Back-ups in *Batman Family, Detective,* further guest shots and a one-shot reprint of his Neal Adams-illustrated appearances in *Detective* 400 and 402 were the order of the day until 1995. Featuring sumptuously painted art from John Bolton and a slim plot well paced and dialogued by Jamie Delano, the 1995 miniseries is a good read with a conservation subtext. Delano enjoys gently ridiculing Batman by giving him an investigative visit to a whorehouse and a speeding ticket, and the Man-Bat has a previously unseen agenda. The next miniseries has Man-Bat back in Gotham and is very ordinary.~WJ

MAN-EATING COW

NEC: *10 issues 1992-1993**

Wisely realising the one-note joke of the silent title character, the series concentrates as much on the stupid superheroes populating the city, most prominently the wonderfully conceived Crime Cannibal, who eats malefactors. Presented with the po-faced sincerity of the Airplane movies – the police department includes an undercover clown squad – this is a different type of humour from its progenitor, *The Tick.* The best sampler is 6, where cattle mutilations and UFOs plague the middle-American town of Dullsville, "where scientists find more creative household uses for isotopes". The final two issues form part of a longer story with the concluding issues of *Paul The Samurai**.~WJ

The Saga of the MAN ELF

Trident: *5 issues 1989-1990*

The title may sound cutesy but Guy Lawley's Michael Moorcock-inspired near-future fantasy has a very hard edge indeed, as well as enough in-jokes and references to satisfy the biggest Moorcock fan. Using the cast of the *Jerry Cornelius* tetralogy (and handling them better than most writers who've had a go at adding to the *Cornelius* canon over the years), Lawley crafts a semi-absurdist political adventure somewhere between *Luther Arkwright* and *V for Vendetta* (very English in its frame of reference, including the humour). The first two issues are beautifully illustrated by Steve Whitaker, the comic world's answer to Harold Brodsky: those in the know revere his abilities although he's hardly published a thing. *Man Elf* is drawn in an open and European style, which late-substitute artist Richard Weston tried his best to assimilate for the final three issues; unfortunately his take on it looks blocky and clumsy.~FJ

Recommended: 1-2

The Uncanny MAN-FROG

Mad Dog: *2 issues 1987*

The idea of setting a comic in a circus freak show is just so apt you wonder why no one's done it before. Perhaps considering a comic named after a single character would be more attention-grabbing, the team of John Wooley and Terry Tidwell title their series after just one member of their eccentric cast. Sadly short-lived at just two issues, this is an engaging mixture of drama and humour.~WJ

MAN FROM ATLANTIS

Marvel: *7 issues 1978*

A survivor of Atlantis aids an undersea research organisation, encountering assorted villains and anomalies. Creators Bill Mantlo and Frank Robbins seem uninspired by the mundane TV show on which this is based, and cancellation of both show and comic was swift.~FP

The MAN from U.N.C.L.E.

Millennium: *2 issue microseries 1993*

Prosaic and unmemorable affair of Kuryakin and Solo turning out for U.N.C.L.E. to combat a latent T.H.R.U.S.H. menace, years after their active service retirement. The opening line sets the standard for the story: "April 31st".~APS

THE MAN IN BLACK

Harvey: *4 issues 1957-1958*
Lorne-Harvey: *1 issue 1990*

Mr Twilight, The Man In Black, variously Fate, Luck or Death, presents short tales, some 'true', that illustrate how fate can move in mysterious ways. An eagle mascot saves a life in the American Civil War; an outlaw kills a messenger who carried a peace offering on the eve of the battle of Little Big Horn and thus ends up on the battlefield himself. The Weaver ("she who weaves the patterns of life") or Time are his opponents in these tales, urging on the worst possible conclusion, always above the action but trying to influence it. An odd idea, but always strikingly illustrated by the great Bob Powell. The 1990 issue reprints various stories from the first three issues.~NF

Solar, MAN OF THE ATOM

Acclaim: *One-shot 1997*

Frank and Helena Seleski are intellectual twins with a single obsession, a compulsion to seek the origin of creation and "walk in the footsteps of God". Frank is a reserved particle physicist and Helena an expressive theological researcher. A quantum experiment during one of Frank's university classes brings him face to face with Solar, who might be God, and knows for a fact that the universe will end within eighteen months. Helena confirms this through other means. Warren Ellis and Darick Robertson produce a tense introduction to a series of one-shots and specials that detail the countdown to Armageddon. See also *Solar: Revelations, Solar: Hell on Earth, Eternal Warriors* and *Darque Passages.*~WW

MAN OF WAR

Eclipse: *3 issue miniseries 1987-1988*

A centuries-old fight between aliens is finally resolved in the 1980s. Wafer-thin, muddled story that's nothing more than an exercise in page-filling from creator Bruce Jones.~WJ

MAN OF WAR

Malibu: *8 issues 1993-1994*

Malibu's flag-clad patriot steps out from *The Protectors* to progress from one punch-'em-up to the next with very little plot over eight issues. Bryan Lee and Mike Miller's art in early issues is so appalling it needs to be seen to be believed.~FP

MAN-THING

Marvel: *Series one 22 issues, 5 Giant-Size 1974-1975, series two 11 issues 1979-1981, series three 8 issues 1997-1998*

Continuing from *Fear*, Steve Gerber expanded his horizons to experiment with weirder and more outrageous ideas. As it's impossible to characterise Man-Thing himself, Gerber's successful line of attack was to infuse personality and depth into the supporting characters and then examine how Man-Thing reacted to their actions and, specifically, emotions. The virtual absence of superheroes and villains enhanced the whole run, and its suitability for stories of all genres was a great asset. Many issues failed but this was an acceptable by-product of the book's empirical nature. The series declined slightly after half-time, particularly as artistic instability set in and the talents of Val Mayerik and Mike Ploog were lost. Giant-Size 4 and 5 are usually remembered for the first two Howard the Duck solo stories. This does no justice to Giant-Size 4. Words are inadequate to describe the magnificent Man-Thing lead story, Steve Gerber's personal favourite issue. The Man-Thing is drawn towards a funeral, feeding off the strong emotions and recriminations, and the story goes on to relate the circumstances of death.

---

* Available in a collected edition

The 1979 revival was mostly crafted by Chris Claremont, who never came to terms with the concept. His approach was much as Gerber's in the first series, but failed to match the bizarre mood. Whereas Man-Thing was an integral part of Gerber's scripts, Claremont's gave the impression that the swamp-dweller was dispensable. Issue 10 is the most impressive, thanks to a guest-starring role by John Kowalski from *War is Hell.* The third series is part of Marvel's disastrous 1997 Strange Tales horror imprint. J. M. DeMatteis concocts an interminable continued saga of the collapse of the nexus of realities – the Florida swamp where Man-Thing dwells. Renowned for his indulgence of pretentiousness, he pulls out all the stops, providing the reader with no tether to any form of solid ground. Some of Liam Sharp's art in early issues is rich, dark and earthy, but he's sucked into the writer's monomania as the abstract and surreal take control and storytelling dwindles to non-existence. Mercilessly, the tale is left unfinished and continues in *Strange Tales* (third series).~APS

Recommended: Series one 2-6, 11, 16-18, Giant-Size 2-4

MANDRAKE

King: *10 issues 1966-1967*

A classic old comics character is ill-served in this 1960s revival, notable only for four pages of early Jeff Jones art in 8 and a reprinted Alex Raymond strip in 10.~FP

MANGA SHI

Crusade: *One-shot ('Shiseiji') 1996, 3 issue miniseries ('Manga Shi 2000') 1997*

Billy Tucci's martial arts heroine is transplanted into the world of high adventure, high-tech and speed-lines as the creator pays tribute to his influences. All the manga trademarks are in evidence: Killer robots, jet fighters and futuristic societies that settle arguments with blades, and it's all done in fun. The plots are hideously derivative, but that could actually be the point. Fun for the fans.~WW

MANGA EX

Antarctic: *6 issues 2001-2002*

High quality manga style anthology that continues the publishers' twin commitments to popularising all things Japanese, and to giving new talent a break by adapting the tradition of lots of short serialised stories in each big issue. Regular features include the excellent spy/action thriller *Twilight X* by Joe Wight, Armary by David Hutchison and Hiro-San, 'Clare's Stupid Life' by Kyle A. Carrozza and many others. Solid, unpretentious fun.~WW

MANGAZINE

Antarctic: *Volume I 5 issues 1985-1986, Volume II 44 issues 1989-1997, Volume III 36 issues + 1999 to date*

Long-lived and often impressive fan created publication that has always been at the forefront of the invasion of Japanese popular culture into the American comics marketplace. The first incarnation launched on the back of the mid-1980s black and white comics explosion, and is pretty poor fare. This despite the first appearances of Ben Dunn's Tiger-X (1) and Mighty Tiny (3), which would both see marked improvement and well-received solo series in years to come. The remaining slots were packed with enthusiastic but unremarkable features.

Volume II was a much larger and more ambitious package, eventually becoming more media magazine than comic and concentrating to a much greater extent on things Japanese. It kicks off as an eighty page giant reprinting the first issue of volume I, but with new material such as the excellent 'Messerschmitt' by Dunn, which Ted Nomura would eventually evolve into Luftwaffe 1946. The practice of running less than professional material from relative newcomers gave many a rare chance to learn on the job. Beneficiaries include Fred Perry Jr. (*Gold-Digger* 11-14) and Joe Wight's *Twilight-X* (8-9). They were accompanied by translated Manga such as *Astroboy* (15), *Godzilla* (16), *Macross II* (17) and a host of other Japanese favorites including *Sailor Moon, City Hunter, Project A-Ko,* and *Captain Harlock.* Gradually though the many features pushed out the comics, many of which were now being published by other companies.

Volume III saw the most ambitious step yet as the title expanded to an average of 256 pages, featuring Antarctic's own, now well-established properties such as *Tigers of the Luftwaffe, Warrior Nun Areala, Ninja High School* and *Gold Digger.* This was both as new and represented material playing alongside new material such as Kouta Hirano's 'Hellsing 'or Les Major's 'Forevermore'. Always a treat for Manga fans but perhaps an acquired taste for the general populace.~WW

MANGLE TANGLE TALES

Innovation: *1 issue 1990*

Scott Rockwell's homage to George Carlson's 1940s *Jingle Jangle Tales,* which is largely forgotten today, but unjustly so according to Harlan Ellison's enthusiastic introduction. That Innovation chose to cover feature his name while relegating the creator credits inside indicates their belief in the comic's potential. Rockwell writes imaginative nonsense stories, well illustrated by several artists, J.T. Casey being the best of them, but it's a form of humour considered passé today, Ellison's championing notwithstanding.~FP

MANHUNT

Print Mint: *1 issue 1973*

Cartoonists Co-Op: *1 issue (2) 1974*

An interesting but only partially successful comic about relationships, produced by a mixture of male and female cartoonists. The most talented cartoonists were certainly Gary Hallgren, Ted Richards and Bobby London, but their material here is disappointingly trite. More interesting by far was Aline Kominsky's crudely drawn 'Fat Came Between Us' in 1 and 'I was a Teenage Intellekshul!', a presumably autobiographical piece by the great Lee Marrs in 2. Quite a lot of the material was clearly designed to be shocking – Leslie Cabarga's 'Child Molester' in 2, for instance – but what once seemed far gone can leave a contemporary audience rather unsettled.~DAR

MANHUNTER

DC: *24 issues 1988-1990*

No relation to the previous Manhunters (for which see Detective), Mark Shaw was introduced in *First Issue Special* 5 as a wannabe superhero manipulated by alien masters. Everything came to a head in the *Millennium* series, leaving Shaw independent, with a mask full of gimmicks but with his identity public knowledge. 2 is a rare occurrence, mostly occupied by a genuinely suspenseful and inventive fight sequence, but the diluted reprise that concludes the series is disappointing. There's minimal continuity between 4 and 18 (although 14 is a chapter of the 'Janus Directive' crossover) and all are decent superhero comics. Those who prefer final resolutions to the happy ending closing the series should check *Eclipso* 13.~WJ

Recommended: 2, 4

MANHUNTER

DC: *13 issues (0-12) 1994-1995*

With the name once again up for grabs, DC unleashed this musician bonded with an eldritch entity called The Huntsman. A difficult-to-follow origin story occupies 0-3, and it turns out to be a mixture of selling one's soul to the devil and your basic revenge plot. In 4 the villain says "You're supposed be something new. Show me something different", and that really sums up the series. The stylised art and non-linear storytelling are mere trickery disguising the banal, clichéd and obvious. Steven Grant and Vince Giarrano managed far better with *Badlands*.~FP

MANTRA

Malibu: *Series one 24 issues, 1 Giant-Size 1993-1995, series two 7 issues 1995-1996, one-shot (Mantra:Infinity) 1995, 2 issue microseries ('Spear of Destiny') 1995*

Woefully cheesy tale of reincarnating mystic warrior Lukasz, who is betrayed and permanently slaughtered. Our hero finds himself subject to a final contingency plan and wakes up in the body of a really stacked woman named Eden Kane. Not only must he cope with all those feminine problems, bring up two kids on his/her own, learn magic (because girls can't fight), but must also cope with being hit on by every hero in his particular universe, as well as a couple of others. Apart from losing her clothes with disturbing regularity, it's pretty standard superhero fare from Mike Barr and, initially Terry Dodson, although he is soon replaced by a legion of less able pencillers, as Eden/Lukasz fights wizards, robots, monsters and other heroes. An intriguing subplot, poorly handled, occurs when Lukasz, who has always fancied Eden's (his) body meets her soul, and they become lovers. It culminates in him having a male body to inhabit whilst she gets her own back (13-19), but otherwise it's what you'd expect of an older guy writing for adolescent boys. 22 features the Marvel villain Loki, in an editorial effort to bring the universes closer together, from the period Marvel bought out Malibu.

The second series, following on the heels of the Infinity/Black September crossover details the adventures of a younger, cuter, perkier Mantra, but the stories are no better, and as the original returned (5) the series was shelved. Generally a sad waste of some very talented people, although coy comic nudity has never been short of afficionados.~WW

MANYA

Vagabond Press: *One-shot ('3½ Hours and 5 Cups of Coffee') 1995, one-shot ('Poetry, Prose and Mosquitoes') 1996, one-shot ('Falling') 1996, one-shot ('Marie') 1997, one-shot ('In The Meantime…') 1998, one-shot ('Map to the Moon') 2001*

Manya is named after the lead (and only regular) character, who acts as voice for the feelings and opinions of author Jen Benka. This is a delightful series, a joy of which is not knowing from issue to issue what the comic will be about. It includes imaginary conversations with Marie Curie ('Marie'), the emotions released by a friend dying ('Falling'), the perils of driving a lonely highway alone ('Map to the Moon'), or plain rants ('Poetry, Prose…'). Every topic is well handled with some of Benka's more poetic work reminiscent of contributors to Australia's *Fox Comics*. Kris Dresen's naturalistic cartooning is joyful and expressive, bringing real character to Manya, and when pages of random phrases are so absorbing to look at due to her pictures ('In the Meantime…') the depth of her talent is revealed. The first and two most recent one-shots are assorted shorter strips.

This is a difficult series to assemble. In addition to relative scarcity, issues aren't identified by an escalating numerical sequence, but by individual titles, only featured on the inside front cover. The production curve is ever-upward, though.~FP

Recommended: 'Marie', 'Map to the Moon'

MARA OF THE CELTS

Aircel: *4 issues 1990-1992**

Rip Off: *1 issue 1993*

Eros: *9 issuse ('Feltic Shamaness')*

Most people don't care if porn makes sense or has a good story, but this really is one of the most stupid erotic tales ever produced. Mara lives on another planet but hops from one dimension to another whenever it looks like anything remotely interesting might happen to her on her quest for revenge against the slaver who's kidnapped her sister. Dennis Cramer's scripting is very poor: most captions tell you exactly what's happening in the pictures, and the story relies far too heavily on deus ex machina rescues. Nil for storytelling effort. Cramer draws in a stilted style mixed from equal parts Aubrey Beardsley and Vaughn Bodé. His ability to draw facial expressions is particularly poor. Mara's always vogueing with her tits stuck out, and despite being set up as a positive figure of a woman she's rather offensively passive in the final analysis. Not the best choice for a quiet evening in, sorry to say. For those who disagree, though, there's the Eros paper doll cut-out special where different artists costume Mara.~FJ

MARC HEMPEL'S NAKED BRAIN

Insight Studios: *3 issue miniseries 2002*

Marc Hempel is both one of comics' great stylists and great humourists, and fully knows he's under-appreciated for both. The bulk of *Naked Brain* is a series of one-page gags, sometimes strips, less often a single panel, informed by and infected with a dour cynicism that will seem too bleak to many. The cartoons possess the rare ability to expose the nub of a situation in a few pen strokes, though, and while Hempel doesn't always operate in the same social comment territory, comparisons with Jules Feiffer are not misplaced. The one-pagers are backed-up by short Tug & Buster strips. While excellent in their own title, they here lack breathing space and are vehicles for gags that could have been applied to anyone. There are also sketchbook pages, and discussions on humour (in 2). While some of the material ranks among Hempel's best, and therefore the best funny comics, there's too much filler surrounding it, so tread carefully.~FP

THE MARCH HARE

Lodestone: *1 issue 1986*

A black comedy about Milo, a professional hitman who inherits a pooka spirit that resembles a rabbit when he's hired to kill his brother. The pooka appears to have driven Milo's brother Harry to suicide, but this is never verified. The Pooka's magical powers help tidy up after numerous hits and have given Milo's dog Buick human intelligence. Plotted and drawn By Keith Giffen in his best "I stole it all from Jose Muñoz" style and nicely scripted by Robert Loren Fleming, the idea is to hear Bugs Bunny when the pooka speaks. Memorable but strictly back-up material.~SW

MARCO POLO

Charlton: *One-shot 1962*

ACG: *One-shot 1998*

This adapts a movie offering a somewhat fanciful interpretation of Marco Polo's thirteenth century adventures in the Orient, but is graced by some excellent Sam Glanzman artwork. Detailed and descriptive in classic adventure strip style, it almost convinces you Marco Polo really was a suave lover and two-fisted buccaneer who led revolutions. Lacking the horrible Charlton colouring, the ACG reprint is actually the better product, and certainly the cheaper.~WJ

MARIONETTE GENERATION

Viz: *3 volumes + 2001 to date*

Izumi Morino is a cartoonist and Good Girl artist finally breaking into the business. Kinoko is a high school student and his assistant, but aspires to move in and run his life. His old girlfriends are bad enough, but one day she catches him in bed with a rag doll that he has named Lunch. The truly weird thing, however, is that the doll is alive and seems to have superpowers. A bizarre triangle quickly ensues with the doll and the schoolgirl competing for the affections of the hapless artist. Kinoko and her school art club then band together to discover the secrets of the living doll as other animated toys, such as a Santa Dog Doll, begin to appear in an already overcrowded set-up. Laborious slapstick storytelling with an inappropriately dramatic art style from creator Haruhiko Mikimoto make for a tedious read that was first serialised for Western readers in the anthology *Animerica Extra*.~WW

---

* Available in a collected edition

THE MARK

Dark Horse: *6 issues 1987-1988, 4 issue miniseries 1994*

The potentially interesting idea of a man branded 'genetically impure' waging a war against a fascist state, Lutzania, is strangled at birth by a change of either writer or artist every issue. The succeeding stories in *Mayhem* were better, and the story continues in *Dark Horse Comics* 14-15 before the miniseries, which is much improved. Here the Mark travels to the USA to kill the deposed Lutzanian dictator.~FP

MARMALADE BOY

Tokyopop: *5 issue miniseries 2001-2002, 4 volumes + 2002 to date*

Miki Koishikawa's parents surprise her by divorcing, only to swap partners with a similar couple they met on a cruise. Both families move in together, along with the other couple's son Yuu, but to make matters worse for Miki, she seems to be the only one unhappy it. Despite complaints to her best friends, Meiko and Ginta, Miki seems to be coming around to the idea, while growing closer to Yuu, whose teasing of her, whilst appearing charming to everyone else, is why she claims he reminds her of marmalade, sweet on the outside, bitter and twisted inside. The romantic entanglements are complicated by the appearance of Arimi, Yuu's previous girlfriend, and Ginta's declaration of love for Miki, after apparently rejecting her in the past.

Volume 1 reprints the miniseries, and 2 heats up the romantic rivalry as it spills over onto the tennis courts and Arimi creates confusion by playing up to Ginta. The fact that Yuu and Miki are living in the same house is the source of gossip in 3, though Meiko takes some of the attention away from Miki with her own scandalous relationship. Miki and Yuu seem to be happy in 4, until Yuu's attentions to a new, male, schoolmate, cause more jealousy and confusion.

Wataru Yoshizumi's teen romance plays with more serious topics than some, touching on alternative lifestyles and the possibility of love between relatives, but at the heart of it all is a charming, deftly produced soap opera, that's easy on the eye, where characters grow up and move on, and nothing is ever simple where love is concerned.~NF

THE MARQUIS

Caliber: *One-shot ('Les Preludes') 1997*

Oni Press: *5 issue miniseries ('Danse Macabre') 2000-2001*, 2 issue microseries ('Hell's Courtesan') 2002*

The Marquis is Vol de Galle, a masked man on a mission to send demons back to the Hell from which they've escaped. Guy Davis sets his story in 18th century France, but it's a bleak, perpetually wintry, alternate version of our world, in which the religious Ministry of Inquisition works to maintain order through fear of God. In 'Danse Macabre', Davis has Vol convinced alternately that he's on a righteous mission after suffering doubt about his work as inquisitor and that he's simply insane to see demons where everyone else sees innocent humans. The collection of 'Danse Macabre' also reprints 'Les Preludes' and explains how Davis came to redo that episode for the miniseries. In 'Hell's Courtesan', something else is hunting demons besides Vol, who's becoming increasingly detached from humanity, while de General continues to try to catch the 'beast' that the Ministry insists is behind the murders afflicting the city. Lovingly depicted by Davis with his usual scratchy realism, these atmospheric horror stories challenge the nature of faith whilst overtly condemning the hypocrisies of the Inquisition.~NF

Recommended: 'Danse Macabre' 1-5

MARRIED WITH CHILDREN

Now: *Series one 7 issues, 1 Special, 1990-1991, series two 12 issues 1991-1992, 3 issue miniseries ('Kelly Bundy') 1992, 3 issue miniseries ('2099') 1993, 4 issue miniseries ('Quantum Quartet') 1993, 1 Annual 1994, 3 issue miniseries ('Kelly Goes to College') 1994*

Fleetingly popular series adapting the unaccountably well received sitcom featuring the loathsome Bundy family, a kind of live-action *Simpsons* without the redeeming features. The two regular titles were reasonably faithful, if sub-professional, variations on the TV formula. With the miniseries, Now started using desperate gimmicks: the 'Kelly Bundy' series had photocovers featuring Christina Applegate, the actress whose interpretation of Kelly was more of a doodle than a portrait. The 'Quantum Quartet' series recast the Bundys as Fantastic Four parodies, and the '2099' effort tapped in to one of Marvel's less inspired hypefests. All told, it was a welcome release when these things finally stopped being excreted by Now.~HS.

MARS

First: *12 issues 1984-1985*

Mark Wheatley and Marc Hempel's metaphysical science-fantasy series ponders such abstract ideas as the nature of reality, the power of memory and the lure of dreaming. It's told in a mysterious and often metaphorical manner; some readers may well find the series simply pretentious or bafflingly obscure. However, those unfazed by the unconventional should appreciate *Mars'* pleasingly thought-provoking, mysteriously seductive qualities.

The first issue briskly introduces heroine Morgana Trace, a paraplegic able to walk in zero gravity, courtesy of a computer mindlink process invented by her late scientist father. Selected for a mission to Mars, Morgana and a crew of six are forced to hibernate for 10,000 years after all contact is lost with Earth. Finally awakening on the red planet, Morgana is immediately lured into a series of surreal and often disturbing adventures. Mars is not the bleak landscape of fact, but a lush Garden of Eden populated by fawns, alien predators, strange gods and, in issue four, the artists Van Gogh, Gauguin and Norman Rockwell!

As the series progresses Wheatley and Hempel dispense with even the pretence of linear narrative and the comic acquires a dreamlike quality, so that Mars becomes a state of mind, or perhaps even a nightmare dreamt by the dying Morgana. Underneath the simple, cartoonish artwork lurks something dark and disturbing. Wheatley and Hempel seem obsessed with decay, destruction and betrayal, themes also explored in their subsequent DC miniseries, the equally fine *Breathtaker*.~AL

Recommended: 1-12

MARS ATTACKS

Topps: *Series one 5 issues 1994, series two 7 issues, 1 Special 1995-1996*

Robust, often perversely hilarious gross-out spin-off from the popular 1950s bubblegum cards, released in anticipation of a movie deal. Charlie Adlard's art on the miniseries is much more fun than the needlessly sedate *X-Files* gig he moved on to, and the dark, twisted humour makes this very entertaining reading.~HS

MARS ATTACKS HIGH SCHOOL

Topps: *2 issue microseries 1997*

What would have been issues 8 and 9 of the regular series were eventually released as a separate black and white series. *Mars Attacks* fans will find more of the same, and for others there's some decent art from Claude St Aubin. For the unconverted the best part of the issue will be writer Dwight Jon Zimmerman's editorial structured around *Oprah* style revelations.~FP

MARS ATTACKS THE IMAGE UNIVERSE

Image: *4 issue miniseries 1996-1997*

Useless cash-in inspired by the useless Tim Burton flick. The usual bunch of misproportioned Image clowns stop evil

Martians from taking over the world. And that's it. There's a starring role for Bill Clinton, and Bill Sienkiewicz 'inks' the whole thing with his spare foot. Does not have any bearing on Image 'continuity', you'll be relieved to hear.~AL

MARS ATTACKS THE SAVAGE DRAGON

Topps: *4 issue miniseries 1996-1997*

Tapping into the Dragon's unknown origins, those rascally l'il Martians convince him he's a mutated Martian dispatched to Earth as a spy. So when they attack the Image earth (see *Mars Attacks the Image Universe*) the Dragon is returned to Mars for debriefing and causes all kinds of chaos. This is the same type of tongue in cheek romp common to both parent titles, so readers of those titles are likely to enjoy this as well.~FP

M.A.R.S. PATROL

Gold Key: *10 issues 1965-1969*

The first two issues were titled *Total War* "featuring the fighting four of M.A.R.S. Patrol". Lt Cy Adams, Sgt Joe Striker, Cpl Russ Stacy and Sgt Ken Hiro are military specialists for the Marine Attack and Rescue Service, and the strip is 1960s military paranoia with a twist. The Earth is invaded by alien troops, and it's the job of Adams and his men to thwart the attempt of the aliens to take over. The twist? The men from M.A.R.S. vs the men from Mars. 1-3 are written and superbly drawn by Wally Wood, with a further seven issues by Dan Spiegle following. The series would have been validated by some kind of conclusion, but, as it is, the first issues have better continuity than the later ones.~SW

Recommended: 1-3

MARSHAL LAW

Marvel/Epic: *6 issue miniseries 1987-1989*, one-shot ('Takes Manhattan') 1990*

Apocalypse: *One-shot ('Kingdom of the Blind') 1990*

Dark Horse: *One-shot ('Super Babylon') 1992, 2 issue microseries ('Cape Fear') 1993*

The vigilante, Marshal Law, sees himself as standing alone against the decay caused in the city of San Futuro by the corrupt élitist superheroes. Some, the most powerful and popular, he tolerates publicly, derailing their schemes covertly. Others, he kills. The first series, a story of politics, power-games and serial murder, is a compelling read, dark, twisted and shot through with bleak humour. Pat Mills' mordant scripting and Kev O'Neill's disturbing art are on top form. The 'Takes Manhattan' one-shot is a parody crossbreed of the Marvel Universe with *One Flew Over the Cuckoo's Nest*, and while readable, lacks bite. 'Kingdom of the Blind', on the other hand, has all the bite you can hope for, a savage yet perversely amusing tale of vivisection and vengeance. From there, the strip went into a run in the British comic Toxic, and emerged into 'Super Babylon', a superbly vicious attack on 1940s superheroic ideals and their relationship to the realities of war. This material is collected as 'Blood, Sweat and Fears' . After that, the Marshal started to look a bit tired. 'Cape Fear', though containing amusing sideswipes at both the 1960s incarnation of The Legion of Super-Heroes and the plethora of current *X-Men* titles, was just a succession of nasty gags, with everybody seemingly going through the motions.~HS

Recommended: Epic 1-6, 'Kingdom of the Blind', 'Super Babylon'

MARTHA WASHINGTON

Dark Horse: *5 issue miniseries ('Goes To War') 1994-1995*, one-shot ('Happy Birthday') 1995, one-shot ('Stranded In Space') 1996*

Frank Miller and Dave Gibbons' war story from *Give Me Liberty* returns with more instalments from the career of Martha Washington, a poor black girl whose courage, ingenuity and fighting spirit take her from strength to strength in an army whose integrity isn't a patch on her own. It's 2014 and the USA is split into several states. Martha's lover, family and psychic friend have been killed in the nuking of Chicago, although she'll later discover some surprises on that score.

Frank Miller tells his stories using magazine covers, newspaper snippets and other print media, as well as cartoon strip, guiding his Everywoman heroine through a maze of global threats and personal attacks to emerge, mentally and physically scarred, but always alive, at the end. Dave Gibbons' lushly detailed art is admirably suited to the chases and battles that make up a large part of the story. 'Stranded In Space' is a weak one-shot with a lead story in which Martha, investigating a strange hole in space that leads to other probabilities, sees a vision of what her polluted future earth could look like. In the back-up tale, the spoofy 'Attack of the Flesh Eating Monsters', Martha and her co-pilot are picked up by a group of flesh-eating aliens, only to find they aren't what they seem.~FJ

MARTIAN MANHUNTER

DC: *3 issue miniseries ('American Secrets') 1992, 4 issue miniseries 1994, Special 1996, 38 issues (0-36, 1,000,000), 2 Annuals 1998-2001*

Débuting in *Detective* 225, and running there for years, there's a case for Martian Manhunter being the start of the 1950s superhero revival. Despite this and being a founder member of all Justice League incarnations, he's always been a second-stringer. The problem was that he's a near-omnipotent alien with a fatal weakness (fire), and DC already have a far more popular near-omnipotent alien with a fatal weakness. Gerard Jones circumvents this for the first series by concentrating on the Manhunter's assumed identity: John Jones, Denver police officer. It's set soon after his arrival on Earth and the plot is a checklist of the 1950s in hindsight. Payola, quiz fixing, UFO scares, a pink Cadillac, *Mad* magazine, the fear of Communism, the new suburbs, Elvis Presley (or as near as his estate's lawyers will permit) and *Leave it to Beaver* are all thrown into the mix for a dark and atmospheric story lifted further by Eduardo Barreto's art. The succeeding series is dull stuff, as suppressed memories rise to the surface and, yawn, the Manhunter must confront his true identity. A spiritual quest also starts the poor 1996 Special, which soon degenerates into fights, but the 1997 *JLA* Annual has a good Martian Manhunter solo story, as does the 1989 *Secret Origins* 35.

The 1998 series begins with a disappointing issue 0 followed by a poorer 1,000,000 (which does reveal the final fate of Darkseid), but thereafter John Ostrander and Tom Mandrake hit the form that made their *Spectre* so intriguing. They establish that the Martian J'onn J'onzz maintains multiple identities, acting as a global protector, and for the first time since his introduction the parameters of his metamorphic and telepathic abilities are explored, finally differentiating him from Superman. Ostrander dips into various aspects of Manhunter's past, seamlessly integrating what might be seen as anomalous, makes sense of his previously capricious name, and Mandrake's moody pencils (until 33) maintain the essentially sombre character. He's given a new arch enemy in 0, used to good effect in 6-9, and Cameron Chase, late of her own title, provides fine occasional support. The beauty and appeal of the series, though, rests strongly with Ostrander, who possesses a rare ability to take any genre and have the Manhunter not only work within it, but seem at home. Furthermore, his scripts are always thought provoking, to the point where even a largely substandard teaming with the JSA in 18-19 still contains some worthwhile characterisation and a fine pay-off. 'Revelations' (20-24) begins with a gem as it explores the early interactions J'onn experienced with his superheroic counterparts, but thereafter even the Spectre in 23 disappoints. Renegade Martians recur to good effect in 25-27, after which John Jones is split from J'onn J'onzz in 29-31. It begins well, but other than setting up an excellent treatment of Jack Kirby's Apokolips characters in 33-35 it disappoints. The final issue is a trawl through the Manhunter's more recent history as the supporting cast is under threat. If the series had to end, this was an apt finale.~FP

Recommended: Miniseries one 1-3, ongoing series 3, 6, 7, 17, 20, 25-27, 29, 33-36

MARTIN MYSTERY

Dark Horse: *6 issue miniseries 1999*

Long before *X-Files*, Martin Mystery and his companions, fiancée Diana and caveman Java, travelled the world investigating mysteries, always doomed to lose the proof of their fantastic findings. Recurring villains include the Men in Black, whose sole purpose appears to be to ensure that all such proof is destroyed, and one-eyed, one-armed, Orloff, a man with a serious grudge against Martin. These paperback books are reprinted from the original Italian Bonelli comics. Martin locates Atlantis (1), uncovers the secrets of Excalibur (2-3), witnesses an invasion from the dimension of dreams (4), finds Egyptian relics in South America (5) and meets the secret society at the heart of the mystery of Rennes-Le-Chateau (6). The scripts are full of Alfredo Castelli's research, complemented by the simple (Toth-like) artwork of Giancarlo Alessandrini. Somewhat overwrought, these are still exciting adventures.~NF

MARVEL ADVENTURE

Marvel: *6 issues 1975-1976*

If you want *Daredevil* 22-27 edited by a few pages per issue to fit the lower 1970s page-count this is the title for you.~FP

MARVEL ADVENTURES

Marvel: *18 issues 1997-1998*

Marvel's *Spider-Man* and *X-Men* cartoon tie-in titles were supplanted by this all-encompassing series, although both regularly turn up (teamed in 5). Series writer Ralph Macchio presents simplified versions of Marvel's heroes, fusing familiar events with new stories. While obviously aimed at younger children than the main Marvel line, it's functional material that never grabs the imagination, ably pencilled by Andy Kuhn for the most part. 12's encounter between the Fantastic Four and the malevolent Frightful Four makes a decent sample, being about as good as the title gets.~FP

MARVEL BOY

Marvel: *6 issue miniseries 2000-2001**

In another radical reinvention of a venerable character, Grant Morrison rescued Marvel's obscure 1950s superhero Marvel Boy for the new millennium. This reinvention meant grafting Captain Marvel's origin (Kree warrior comes to earth, much confusion and japery follows) onto the Marvel Boy character. Over the ensuing six issues, there's lots of action, mostly involving fights with a character called Midas (who inexplicably wears Iron Man's old 1960s armour) and the odd touch of romance, but there is an aching chasm at the heart of the comic. What Morrison's concoction lacks is (ironically) humanity. The whole exercise is uninspired and cold, and, despite J.G. Jones' impressive art, the title is a major disappointment.~DAR

MARVEL CHILLERS

Marvel: *7 issues 1975-1976*

1-2 starred Modred the Mystic, an apprentice of Merlin revived from suspended animation. He would have been better left there. Previously Cat by name, Tigra prowled 3-7 after her feline transformation in *Giant-Size Creatures* 1. Tigra, Red Wolf and the sleepy outback setting collided inelegantly with robots and the Super Skrull. The only positive spark arose from her attempts to reconcile her human and feline personae. Three writers and four pencillers in five issues rarely bodes well. This series proved the point.~APS

MARVEL CLASSICS COMICS

Marvel: *36 issues 1976-1978*

The majority of these forty-eight-page literary adaptations are reprinted from the sixty black and white Pendulum Illustrated Classics produced by Filipino artists between 1973 and 1978. Artwork from the likes of Nestor Redondo on *Dr Jekyll and Mr Hyde* (1) and Dracula (9), Alex Niño on *The Time Machine, Moby Dick, The Three Musketeers, War of the Worlds* and *The Invisible Man* in 2, 8, 12, 14 and 25, and Rudy Nebres' *Treasure Island* in 15 accompanied undistinguished scripts. Only nine titles were originated by Marvel, all with equally lifeless writing. Most noteworthy for their artwork are John Buscema's *Count of Monte Cristo* (17), Gil Kane's *Master of the World* and *She* (21 and 24), Alfredo Alcala's *Robin Hood* (34), Frank Bolle's surprisingly faithful *Alice In Wonderland* (35) and some of Mike Golden's earliest professional work in *The Pit and the Pendulum* (28). It's hard to recommend any of these condensed classics and one has the feeling that the addition of colour may not have done the highly detailed Filipino artwork any favours.~SW

MARVEL COLLECTORS' ITEM CLASSICS

Marvel: *22 issues 1965-1969*

This double-size title reprints runs of *Doctor Strange, Fantastic Four, Hulk* and *Iron Man*, almost from the beginnings of their own strips. The title changed to *Marvel's Greatest Comics* with 23.~APS

MARVEL COMICS PRESENTS

Marvel: *175 issues 1988-1995*

Bi-weekly anthology featuring a rotating headliner, generally an *X-Men* related character, and a number of back-up serials. 1-10 feature Wolverine by Chris Claremont and John Buscema in a tale introducing the Island of Madripoor and Logan's third identity, Patch. Man-Thing by Steve Gerber and Tom Sutton and Master of Kung-Fu by Doug Moench and Tom Grindberg both help the title off to a strong start. Ann Nocenti, Rick Leonardi and P. Craig Russell's Colossus runs from 10-17* followed by a Cyclops eight-parter (18-25)*, then Havok and finally, Excalibur star before Wolverine settles into the lead slot in 38 (usually in a team-up) until 143-146 when all four stories tie-in to the 'Siege of Darkness' storyline that ran through the Midnight Sons group (all the supernatural titles, including *Ghost Rider* and *Doctor Strange*).

From that time *Marvel Comics Presents* was more actively involved in contemporary continuity, presumably in an effort to cross-promote flagging titles, often supplementing events in the Marvel Universe such as the 'Hands of the Mandarin' crossover (*Iron Man, Force Works* and *War Machine*) with side-bar stories. Wolverine appeared briefly again in 149-153 before moving on, leaving the starring role to Ghost Rider/Vengeance; a more or less permanent addition since 90, when the comic switched to a flip book/double cover format. Vengeance stayed the only regular feature until the title's demise, with stories of diminishing quality.

Sadly for such a wealth of material, there are very few stories of any lasting note. Some of the Wolverine/Typhoid Mary issues (109-116 and 149-150) are well rendered by Steve Lightle, but Nocenti's scripts wallow in self-indulgence. Even the much heralded and long awaited 'Panther's Quest', a twenty-five part sequel to 'Panther's Rage', one of Marvel's most lauded hits of the 1970s, falls far short of the standard expected from Gene Colan and Don McGregor. Apart from the occasional well-crafted short story, such as a beautifully drawn though insubstantial Ant-Man short by Sandy Plunkett in 131, there is an unrelenting amount of second rate tosh, and other than the groundbreaking Weapon X storyline by Barry Windsor Smith in issues 72-84*, nothing of note or of worth was produced.~WW

Recommended: 1-10, 72-84

MARVEL DOUBLE FEATURE

Marvel: *21 issues 1973-1977*

Reprints the Captain America and Iron Man stories from the latter twenty-odd issues of *Tales of Suspense*.~APS

MARVEL FANFARE

Marvel: *Series one 60 issues 1982-1991, series two 6 issues 1996-1997*

In 1982 Marvel were taking their first steps to producing titles for exclusive distribution to comic fans through comics shops, sidestepping the traditional news-stand market altogether. They reasoned fans would pay more for stories

* Available in a collected edition

on better-quality paper written and drawn by their favourite creators, hence *Marvel Fanfare*. The opening story in 1-4* exemplifies the ideal, featuring a teaming of Spider-Man, perennially Marvel's most popular character, and the X-Men (then selling very strongly in comic shops, but not so well outside) with Ka-Zar, written by Chris Claremont, started by the highly regarded Michael Golden (1, 2), and completed by recently departed *X-Men* artist Dave Cockrum (3) and the then little-known, but very talented Paul Smith (4). However, beyond a certain point (around halfway), and with the comic-shop market established as an outlet for high-volume sales, *Marvel Fanfare* rather slipped into becoming a try-out title or a home for previously commissioned but unpublished stories, although the editorials kept denying that it was an 'inventory' title.

Apart from the opening story, there really was very little strong material, and only a handful of issues that are worth tracking down. 7 has an unusually downbeat Daredevil story about a missing guide dog, from generally unsung writer Bill Mantlo and artist George Freeman, and 15's 'That Night...' is a clever and amusing Fantastic Four story from Barry Windsor-Smith, with the Thing prominent. 27 has Marc Hempel's take on Spider-Man coping with boredom, and 40 features the haunting 'Chiaroscuro' by Ann Nocenti and Dave Mazzucchelli, tying into the Mephisto limited series. Of lesser interest are Gil Kane's adaptation of *The Jungle Book* in 8-10, Charles Vess' story about a lost poet inadvertently gathering material (13), and a Captain Universe story (25) in which a bullied schoolkid acquires the powers just long enough to see him through a bad day. There's also a John Byrne Hulk story in 29 in which every page is a splash page, a Dr Strange story by Walt Simonson and Dave Gibbons in 41 and the all-pin-up issue 45. Elsewhere there is a small amount of material that might be of interest to completists: more Charles Vess in 6 and his Warriors Three story in 34-37, with some nice rose bushes but little plot, Colleen Doran's music-based story and portfolio in 38, and a Power Pack tale in 55. In general, don't get your hopes up.

The draw of the second series is presumably meant to be the price, which is very low at 99 cents. It's still not worth it, though. There's a Hulk/Wolverine story (2-3) that is just about readable, but Pop Mhan's cutesy style of artwork is distractingly inappropriate. Fans of Longshot's innocent charm might be tempted by 4 and 5, but should resist the temptation with all their might.~FC

Recommended: Series one 7, 15, 27, 40

MARVEL FEATURE

Marvel: *Series one 12 issues 1971-1973, series two 7 issues 1975-1976*

The first series is a showcase comic. 1-3 feature the first appearances of the Defenders (Doctor Strange, Hulk, Sub-Mariner), by Roy Thomas and Ross Andru, before the team moved to its own title. 1 includes a significant back-up strip in which Doctor Strange returns to his role as a sorcerer after having renounced the mystic arts in *Incredible Hulk* 126. 4-10 spotlight Ant Man in a strange solo run by Mike Friedrich. Hank Pym retrospectively narrates the whole series, in contrast to conventional story-telling, but the ludicrous concepts, plot and dialogue insult the intelligence of a seven-year-old. 11-12 are the first Thing team-up stories, an immediate prequel to *Marvel Two-In-One*. Both drawn by Jim Starlin, 12 spins off from the Thanos war story line in Captain Marvel 25-33.

The second series was won by Red Sonja after a popular introduction as a supporting character in *Conan the Barbarian*. As a young girl, she was transformed into a warrior by a goddess after her home and family had been pillaged and slain and she herself raped. The goddess imposed a condition: that she could love no man unless he had first defeated her in fair combat. Written by Bruce Jones and drawn by Frank Thorne, the series suffers from uninspired plotting and cartoonish artwork, although the odd nice human touch surfaces sporadically. Red Sonja continues in her own title.~APS

Recommended: Series one 2

MARVEL FRONTIER COMICS SPECIAL

Marvel UK: *One-shot 1994*

Sampler comic for Marvel UK's Vertigoesque Frontier line, which by the time of publication had packed up and died. There is a disappointing epilogue for *Children of the Voyager*, an appalling hacked out *Bloodseed* strip, wisely uncredited, and snapshots featuring characters from *Dances With Demons*, and *Immortalis*. Most intriguing are prologues for two never seen again series. 'Troubling Deaf Heaven' is a whimsical tale of reincarnation excellently drawn by D'Israeli, but, slim though it may be, David Hine's Evil Eye is the star turn, introducing a gloomy psychic detective.~FP

MARVEL Graphic Novels

Any graphic novel featuring characters with their own series is dealt with in that series' entry. Considering superhero volumes first, *The Aladdin Effect* starts well enough, with a Wyoming town enveloped by an impenetrable force field and the consequent reactions of the inhabitants. She-Hulk may not be able to batter a hole in the force field, but she could throw a bus through the holes in the plot, and there are even bigger contrivances as four superheroines are plucked from their outside lives to help. *Revenge of the Living Monolith* and *Emperor Doom* both concentrate on familiar villains. Dr Doom actually succeeds in taking over the world in the latter. It's a clever plot poorly executed, which ranks it higher than the former, but it relies on a particularly daft ending.

Taking *Thor* supporting characters Fandral, Hogun and Volstagg on a quest, *The Raven Banner* has the benefit of Charles Vess art, but a merely functional plot. The Mike Mignola-illustrated teaming of Dr Doom and Dr Strange is also excellently drawn, but every time the plot becomes interesting another bunch of demons are thrown in as Doom investigates the mystical side of his nature. Even less commendable is *Blood Truce*, a comic-sized teaming of Captain America and Nick Fury, which passed muster as an annual, but not a $6 one-shot. *Rick Mason, The Agent* isn't superpowered, but his adversaries are. Supervillains occupy a small South American country, transforming it into a drug-supplying haven, and Mason is sent to sort them out. James Hudnall and John Ridgway supply a decent suspenseful spy thriller concentrating on character, with Mason a heroic-fiction tough guy archetype. *Absalom Daak, Dalek Killer*, is a gung-ho testosterone-propelled brute. Emanating from the British *Doctor Who Magazine*, he takes a violent pride in his work. More in the mode of a traditional British annual with other features and text pages in addition to the lead, Daak is most notable these days for the Steve Dillon art.

Actors Billy Mumy and Miguel Ferrer write *The Dreamwalker*, modeled on the 1930s pulp heroes, and woven into a world of gangsters and government agency revenge. It's a readable page-turner that rather falls to pieces at the end, although Gray Morrow's art throughout is excellent. More effectively redolent with the seamy pulp atmosphere of the 1930s is *Nightraven*: 'House of Cards'. It's available in both book and traditional comic size, and the titular hero is a lurking background figure as the focus is on gangster Soldier Jack, gradually being drawn into a situation beyond his control. Jamie Delano populates the story with a fine sleazy supporting cast and David Lloyd's moody art evocatively portrays the bygone era.

A frequent problem is that Marvel's graphic novels are technically proficient, yet fail to engage emotionally, with Sam Glanzman's *A Sailor's Story* foremost among them. It's two beautifully drawn volumes of Glanzman's navy experiences during World War II, with some fine moments, but overall too bitty and prolonged to captivate. *Hearts and Minds* is similarly reality-based, this time a tragic Vietnam war story drawn by the worthy Russ Heath, yet strangely uninvolving. There's nothing wrong, either, with *Greenberg the Vampire*, previously seen in *Bizarre Adventures*. The idea of a Jewish vampire has a novelty, but beyond that there's nothing to make it an essential purchase, with J.M. DeMatteis treading familiar territory regarding families and writing, and functional art from Mark Badger.

---

* Available in a collected edition

Super Boxers from Ron Wilson is a step down. Among the first Marvel graphic novels to stray from established characters, there's an action movie predictability about this boxing tale in a corporate-controlled future. Stale from the off, it wheezes towards a predictable conclusion in the manner of a consumptive asthmatic. Far better is *Arena*, written and drawn by Bruce Jones. It's a simple combination of time-gates in the Ozarks with hillbillies looking for a wife, and a mother / daughter relationship in need of some repair. *Heartburst* blends science fiction and Aboriginal myth with some New-Age sentiments, to concoct a story of one man against the world, persecution and spiritual enlightenment. Rick Veitch writes and draws, and sometimes loses his way, but it's largely very readable. *Ax* is bizarre fantasy, entirely the work of Ernie Colón, down to the lettering. Science-fiction elements are merged into a muddy, vaguely moralising, script through which the title character wanders, seemingly impervious to harm. The art's great, though, vibrantly coloured and illustrative. *Marada the She-Wolf* collects the warrior woman's first appearance in *Epic Illustrated* 10-12, now with a fine palette enriching John Bolton's excellent art. Chris Claremont's plot of Marada bewitched and stripped of her character makes for a decent fantasy story, and it's followed by a tale detailing a glitch on the journey home.~FP

Recommended: *Marada the She-Wolf, Night Raven*

MARVEL HOLIDAY SPECIAL

Marvel: *4 issues 1991-1993, 1996*

Anthology featuring various Marvel characters in stories set around the winter solstice. Those in the 1991 issue are mostly indistinguishable in their mixture of sentimentality and violence, but the 1992 issue has some gems. There's a wordless Wolverine story that says a lot about the vividness of childhood imagination, then a hilarious Doc Samson story in which he's supposed to be telling the story of Chanukah to a class at a Hebrew school, but is forced to make some drastic revisions, and finally a Daredevil story written by Ann Nocenti. It follows the thoughts of a toy lamb that Daredevil has just bought as a present, but Nocenti keeps the story the correct side of cute throughout, and that's a real achievement. The 1993/1994 issue isn't up to this standard, though it's worth a look for two strips: a Nick Fury story by Howard Chaykin which is ultimately sentimental but has a compulsive rhythm to it, and a Ghost Rider story written by Ann Nocenti, which has a nice idea about a timid office worker getting a chance at revenge, but is let down by the ending. The 1996 issue has rotten stories involving Spider-Man, Kitty Pryde, the Silver Surfer, and the Rawhide Kid, and a marginally readable one involving the X-Men.~FC

Recommended: 1992

MARVEL KNIGHTS

Marvel: *Series one 15 issues 2000-2001, series two 6 issues 2002*

A composite team comprising everyone whose solo comics appeared under the Marvel Knights imprint might not have been the soundest editorial decision, but Chuck Dixon's reliable talent for edgy urban adventure ensured this ticked along nicely, ably aided by Ed Barreto's pleasing pencils. Something failed to fire the readers' enthusiasm, however. Perhaps with all its heroes moonlighting from elsewhere, Dixon lacked the freedom to develop events, and disparities in the personalities and modus operandi often seemed artificially strained. It was never realistic that anything other than an editorial decision was keeping this team together. Marvel Knights nonetheless produced some intriguing subplots. A mismatched cast allowed Dixon to explore concepts such as where vigilantes should draw the line via disagreements between Daredevil and the Punisher (2), Moon Knight's attempts to buy himself (and Luke Cage) into the team's favours (6, 11) and the bizarre ying/yang partnership of femme fatale Black Widow and innocent savant Dagger. 15 brings this ill-considered but often entertaining series to an all too obviously abrupt halt as the heroes decide it just isn't working and agree to go their separate ways. Truth mirroring fiction and all that…

The reboot tried to address what might previously have gone wrong by paring down the team, theoretically giving more focus. Take away the personality clashes, however, and new scripter John Figueroa was left with a gritty urban setting in which a few characters united to do nothing they didn't do in their own titles. Hardly surprisingly, it didn't last.~JC

MARVEL MYSTERY Comics

Timely/Marvel: *92 issues 1939-1949*

The title that launched the careers of the Human Torch and the Sub-Mariner, and thus the entire Marvel Universe, this series is unquestionably significant. Historic. Nay, even iconic. It's not actually very good, though. You see, in the early 1940s, Timely, the antediluvian ancestor of Marvel, was the Poverty Row production company, employing mostly folks who jumped ship as soon as they got a more lucrative gig, or those who couldn't get work anywhere else. This did improve by 1944 or so, but apart from the ornate and insanely convoluted Alex Schomburg covers, most of these early *Marvel Mysterys* are rough, thrown-together ragbag comics, with a crude vitality but very little artistic merit. In addition to the Human Torch (1-92) and the Sub-Mariner (1-91), *Marvel Mystery* featured Captain America (80-92) and a host of lesser strips. Among the most popular was Ka-Zar (1-27), a blond Tarzan later recreated for 1960's Marvel, and The Angel (1-23). Inspired by Leslie Charteris' Saint, this costumed but non-powered detective's sedate adventures were unaccountably popular with the Marvel staff, to the extent that he was given several early covers. The Vision (13-48) was a supernatural being who entered and exited the Earthly plane in bursts of smoke; this low-rent Spectre was best known for being created by Joe Simon and Jack Kirby, who drew his early adventures. The Patriot (21-74), crusading reporter Jeff Mace, filled the Captain America-type slot until it dawned on *Marvel Mystery*'s editors that they could just as easily import the real thing. Miss America (49-85) was teenager Madeleine Joyce, caught in an electrical experiment and emerging with superstrength, flight, X-ray vision and the wisdom of the ages. As you do. None of these powers helped her failing eyesight (must be the strain of the X-ray vision), and by 1946 she was proudly the first four-eyed superheroine. The Blonde Phantom (84-91), alias Louise Grant, mousy secretary, let down her hair, doffed her glasses, and slipped into a thigh-slit, bare-bellied, low-cut red silk evening dress to fight crime. Surely, by the time she got all dolled up, most emergencies would be either over or beyond control? So, historically significant, funky, nostalgic – and most issues beyond 50 were even consistently competent, but, unless you've a real taste for the cruder or stranger side of superheroics, not worth the hugely inflated prices generally demanded. For a sample, though, Marvel reprinted 1 as paperback in 1999.~HS

MARVEL PREMIERE

Marvel: *61 issues 1972-1981*

Although designed as a try-out series featuring new lead characters every few issues, Doctor Strange (3-14) and Iron Fist (15-25) shanghaied the title until both were promoted to their own books. 1-2 witness the transformation of supporting character 'Him' into Adam Warlock. 3 contains a lovely, surreal Stan Lee story with exquisite Barry Smith art, but Gardner Fox follows with a horribly convoluted plotline that was mercifully laid to rest by Steve Englehart. He and Frank Brunner then produced a highly original time-travel story in 12-14. 15 introduced Iron Fist as Daniel Rand, a youth who entered the mystic city of K'un Lun and was taught oriental fighting skills by the race of immortals who dwelt there. The continuing storyline narrating his origin suffers from a suicidal maximum-three-issues-per-writer syndrome. 25 sports early John Byrne artwork.

From 26, the try-out concept genuinely took over, with no character holding centre stage for more than four issues.

Marvel Premiere was designed to feature brand-new concepts whilst its sister title, *Marvel Spotlight*, showcased established characters. In practice, the difference was hard to distinguish. 31 features Bill Mantlo and Keith Giffen's Woodgod, a marvellously original treatment of the Frankenstein theme told in an ingenious, unorthodox first-person narrative by the hybrid creature. Howard Chaykin's space mercenary, Monark Starstalker, delivers competent action adventure in 32, whilst Roy Thomas' 3-D Man in 35-37 has one of the most ludicrous origins and costumes in any comic book. Doug Moench and Mike Ploog deliver the second Weirdworld appearance (following *Marvel Super Action* 1) in 38; a warm elven fantasy tale told with charm and a certain degree of tongue in cheek. However, Moench's Seeker 3000! science-fiction strip in 41 is immature and scientifically inaccurate.

Don McGregor's portrayal of Paladin, the *Daredevil* supporting character, in 43 is muddled and self-indulgent. Whilst Bill Mantlo and Keith Giffen's Jack of Hearts in 44 makes the grade, it is seriously at odds with the character's treatment in the later miniseries. Alarmingly, Dave Kraft chooses a sword-and-sorcery setting to tie up the loose ends of the Man-Wolf story so rudely interrupted by the cancellation of *Creatures on the Loose* three years earlier. Amazingly, he pulls off a blinder, laced with restrained humour, John Jameson's reluctant acceptance of promotion to godhood and George Pérez's usual gorgeous pencils. Scott Lang's début as the new Ant-Man in 47-48 is acceptable superheroics and a wild contrast to Alice Cooper's début in 50, which Alice co-plotted. 51-53 tie up the Black Panther loose ends from the cancellation of *Jungle Action*. 54 sports a new Western hero, Caleb Hammer, as Peter Gillis presents a fine, melancholy tale and Gene Day's five-star pencils serve up a dead ringer for Clint Eastwood. 57-60 reprint British Marvel *Dr Who* strips by Dave Gibbons, and the title bows out with Doug Moench and Tom Sutton's outstanding Starlord science-fiction story. Much food for thought is provided by the vastly different interpretations of the same events experienced by Starlord and the sentient planet he visits.~APS

MARVEL PRESENTS

Marvel: *12 issues 1975-1977*

Best to ignore the Bloodstone strip occupying the first two issues. Suffice it to say he went on to better things in the rear of *Rampaging Hulk*. The Guardians of the Galaxy took up residency with issue 3, continuing their story from *Defenders* 26-29. Steve Gerber wrote fun space opera with engaging characters, illustrated by Al Milgrom seeming like he cared for once, with their best issue being Gerber's satire on 1970s New York in 5. Roger Stern becomes writer with 10, but lacks Gerber's light touch, and although not bad, his issues suffer in comparison. Beware the reprint in 8.~FP

Recommended: 3-7

MARVEL PREVIEW

Marvel: *24 issues 1975-1980*

Another Marvel try-out comic, in this case a black and white magazine whose contents were sometimes inspired and occasionally bizarre. The first feature was the Erich Von Daniken-inspired 'Man Gods From Beyond The Stars', a spacemen and cavemen epic by Doug Moench and the brilliant Alex Niño. Contrary to expectations it effortlessly transcended its rather ludicrous premise, as did its EC tribute back-up, 'Good Lord', wherein a group of spacefarers meet God... and kill him! 2's headliner, The Punisher, was overshadowed by a lovely Howard Chaykin 'Dominic Fortune' short, while 3's 'Blade' strip (a refugee from Vampire Tales) was well drawn by Tony DeZuniga among others. With 4 the title discovered its only real success in Steve Englehart and Steve Gan's Starlord, a (for its time) downbeat space-opera strip. The next instalment, in 11, featured the crowd-pleasing line-up of Chris Claremont, John Byrne and Terry Austin and a far more conventional superhero slant. Subsequent appearances were less bombastic and boasted nice art from Carmine Infantino (14-15) and a young Bill Sienkiewicz (18).

Sienkiewicz reappeared for the superhero strip Moon Knight (in 21), which followed another colour comics transplant, Thor (10), though neither gained much from the format change. More successful were the natural inhabitants of the magazine format, the horror issues, with none more so than 7's Claremont-scripted Satana with the superbly atmospheric art of Vincente Alcazar. 'The Legion of Monsters' in 8 boasted Gene Colan and Mike Ploog artwork and an epic tale of Morbius, the living vampire, while 12 – 'The Haunt of Horror' – starred Dracula, Lilith (with a typically strong Steve Gerber script) and a terrific Mike Kaluta short. The most impressive collection, however, was 16's 'Masters of Terror', with three Colan strips, the best of which was another Gerber Lilith story, the cutting dissection of 1970s mores 'Death by Disco'.

Many of the remaining issues were decent, but uninspired reads. Sherlock Holmes headlined 5 and 6, 9's Man-God was an adaptation of Philip Wylie's 1930s novel *Gladiator*, Blackmark in 17 was a below-par Gil Kane, and Kull in 19 and Merlin in 22 were equally undistinguished. 20 and 23 were both titled 'Bizarre Adventures', with the first all reprint and the second a collection of stories by an all-star cast (including Frank Miller, Gene Colan and John Buscema) that proved surprisingly unsatisfactory. *Preview*'s final story, the science-fiction Paradox strip, mixed sex and drugs and was considered quite daring for the day, though contemporary audiences may well wonder what the fuss was about. Undoubtedly the comic's strangest hour, though, was 13's 'UFO Connection', a heady brew of alien abductions, time- shifting and pyramid power from David Anthony Kraft and Herb Trimpe (great aliens, Herb!). From 25 the comic was retitled *Bizarre Adventures*.~DAR

MARVEL SAGA

Marvel: *25 issues 1985-1987*

Retells the significant events of the Marvel Universe to early 1966, concluding with the origins of Galactus and the Silver Surfer. Researcher Peter Sanderson writes new framing text around cut and pasted panels from comics of yesteryear. All events are presented in order of internal chronology, including those not revealed until many years later, thus creating heaven for continuity freaks. Full source and creator credits contribute to a professional product. A fine, shortcut revision guide for boning up on early Marvel history.~APS

MARVEL SPECTACULAR

Marvel: *19 issues 1973-1975*

Reprints *Thor* stories sequentially commencing with *Thor* 128.~APS

MARVEL SPOTLIGHT

Marvel: *Series one 31 issues 1971-1977, series two 11 issues 1979-1981*

The companion title to *Marvel Premiere* was also a showcase for new strips, albeit initially with a pronounced horror bent. The exception was 1's Red Wolf feature, an unremarkable Western by Gardner Fox, Syd Shores and Wally Wood, but popular enough to spawn its own series. More successful was 'Werewolf By Night' in 2-4, blessed with gorgeous art from Mike Ploog; typically for Marvel monster features it took a rather superheroic approach to the age-old concept. The giant-sized 2 also featured a lovely Bill Everett Venus reprint from the 1950s. The talented Ploog was on hand again for Ghost Rider, which ran in 5-11 before inexplicably going on to become Marvel's longest-running horror title. Clearly any series about a stunt cyclist selling his soul to the Devil was never going to have much intellectual depth, but Gary Friedrich's scripts were vigorously fun, and Ploog's visualisation of the fiery-skulled motorcyclist had an undeniable, if kitsch, resonance. Friedrich's next creation was even more bizarre, none other than the Son of Satan. How on Earth did Marvel ever get away with it? And again, its lengthy run (12-24) spawned its own series. With Hulk artist Herb Trimpe on pencils, as inappropriate a choice as its possible to imagine, the strip revelled in scenes of the suffering denizens of Hell and innumerable very muscular demons. Oh, and Satan looked peculiarly like the Human Torch! Creative successors Steve Gerber and Jim Mooney calmed things down a bit before Gerber and Gene Colan gave the strip its only brief sense of direction with a very powerful exorcism two-parter in 18 and 19. The strip's final creative team, Chris Claremont and Sal Buscema, did little, and the next few issues, with Sinbad (25), The Scarecrow (26), Sub-Mariner (27) and Moon-Knight (28-29), proved equally unexciting. The last few issues of Spotlight's first run were a mixed bag. The Warriors Three from the pages of *Thor* in 30 had nice John Buscema artwork, 31's Nick Fury story by Jim Starlin and Howard Chaykin saw neither at their best, and 33 continued Deathlok from *Astonishing Tales*. All failed to catch the public imagination. Only 32's Spider-Woman went on to bigger things, though this first appearance was perfunctory.

The second series was like much of Marvel's early 1980s material, humdrum in the extreme – with two notable exceptions. 1-4 printed left-overs from the recently cancelled *Captain Marvel* to no great effect, though 8's Captain Marvel tale at least boasted some nice early Frank Miller art. Steve Ditko's efforts on Dragonlord in 5 and Captain Universe (9-11) remain unforgivable exercises in abject hackery that he should be suitably embarrassed about. On the other hand, Doug Moench and Tom Sutton's Starlord in 6 and 7 was well crafted and quite touching space operatics of the highest order.~DAR
Recommended: Series one 2-4, 18, 19

MARVEL SUPER ACTION

Marvel: *One shot 1976, 38 issues 1977-1981*

The black and white magazine one-shot leads off with a decent Archie Goodwin Punisher story, the follow-up to his origin in *Marvel Preview* 2. Back-up tales are the Huntress (who later became Mockingbird), Dominic Fortune by Howard Chaykin and the incongruously placed first appearance of Weirdworld by Doug Moench and Mike Ploog.

The second incarnation reprints Captain America stories starting with 100. 12 and 13 reprint the first two Steranko issues (110, 111) with pages cut. Issues 14 on reprint *Avengers* 55-77, continuing from where the deceased *Marvel Triple Action* left off. From 27 most issues also carry back-up Hulk stories previously seen only in British comics.~APS

MARVEL SUPER-HEROES

Marvel: *One-shot 1966, series one 95 issues (12-106) 1967-1982, series two 15 issues, 1 Special 1990-1993*

The 1966 one-shot reprints 1940s Sub-Mariner and Human Torch stories alongside *Daredevil* 1, and the title was resurrected to replace *Fantasy Masterpieces* a year later. The policy of reprinting 1940s material was continued, backing up one new feature per issue until 20. There's the Black Knight in 17, Medusa in 15 and Dr Doom in 20, but the introduction of the Guardians of the Galaxy in 18 by Arnold Drake and Gene Colan is as good as it gets, although 12-13 are notable for Captain Marvel's first appearances. Thereafter it's reprints all the way, with *Uncanny X-Men* 1-8 and *Daredevil* 2-7 featuring in 21-27, then *Hulk* reprints running sequentially until *Hulk* 157. The second series revived the giant-sized format to feature at least three stories each issue, encompassing a variety of Marvel characters right down to third-stringers like Sabra and Spitfire (well treated in 4, which also has an Alan Davis Black Knight strip) along with the top of the line mainstays. There's a fair selection of irredeemable rubbish, but while never remarkable, it's not the total disaster one might assume given the prevailing standards at early 1990s Marvel. Freed from the constraints of continuity, crossovers, guest appearances and tie-ins, many of the stories display a spirit absent elsewhere in the line. The inventory material also featured isn't quite as good, although Ms Marvel fans will want to pick up 10 and 11, featuring what would have been the 24th and 25th issues of her title. 3 contains a story prepared for *Captain Marvel*'s late 1970s run.~WJ

MARVEL SUPER SPECIAL

Marvel: *41 issues 1977-1986*

Don't look for the title *Marvel Super Special* on the cover, as it was an umbrella title under which numerous features appeared. Much trumpeted high production values led to high expectations, but most issues are little more than magazine-size comics. It launched with a coup, the first comics story featuring inordinately successful glam rock band Kiss. With their greasepaint personae Kiss were heavily comics-influenced, and the creative team of Steve Gerber, pencillers Al Weiss, John and Sal Buscema and Rich Buckler (one for each member of the band) and inker Al Milgrom produced a largely enjoyable slice of nonsense about Kiss fighting Marvel villain Dr Doom. The series incorporated song titles throughout and Kiss as superheroes. In keeping with the band's over-the-top persona, each member donated a vial of blood to be added to the red printing ink. The comic's success was such that a quick reprise was prompted in 5, but by lesser talents.

Warriors of the Shadow Realm is a fantasy series occupying 11-13, where, again, much was made of the comic's production in the editorial pages, presumably to deflect attention from the dull content. The space opera of *Battlestar Galactica* (8) and *The Empire Strikes Back* (16) works well, and Conan fans might want to find 2 and 9, the latter with a decently drawn Red Sonja strip by Howard Chaykin. George Pérez draws the story of the Beatles well enough in 4, and 7 may feature an adaptation of *Sgt Pepper's Lonely Hearts Club Band*, but was withdrawn from US and British publication when the film proved an all-time turkey. It was allegedly published in Japan, and listed as such in several price guides: do you actually know anyone who's seen a copy?

From 14 it's film adaptations all the way, with highlights difficult to locate. Few of those working on these adaptations made much effort, although Gray Morrow's *Sheena* in 34 is, at least, a visual treat. Walt Simonson and John Buscema turn in an acceptable *Raiders of the Lost Ark* for 18, and Bill Sienkiewicz draws *Dune* for 36. Perhaps fittingly, the series closed with an adaptation of *Howard the Duck*, another all-time turkey, but the only other comic in which Kiss appeared until the 1990s.~FP

MARVEL TALES

Marvel: *291 issues 1964-1994*

Marvel's longest-running reprint title deals almost exclusively with Spider-Man. The first two double-size issues are titled *Marvel Tales Annual* and reprint the origins of most of the early Marvel superheroes. 3-33 are also oversize, as *Amazing Spider-Man* reprints are backed up by Thor and Human Torch in 3-27 (from the beginnings of their runs) and miscellaneous features, most notably 1950s Marvel Boy stories in 13-16. From 34, Spider-Man assumed the solo feature until 136, which reprints *Amazing Spider-Man* 159. 131-133 reprint the British *Captain Britain* 1-2, not previously published in the US, and 134-137 feature Doctor Strange's first four appearances from *Strange Tales*.

With 137, *Marvel Tales* rewound its reprints to *Amazing Fantasy* 15 and re-presented all the early issues of *Amazing Spider-Man* until 190 (reprinting *Amazing Spider-Man* 50). These are laudably free of edited pages, but suffer from the smudged production typical of Marvel's early 1980s output. *Spider-Man Digest* continues reprints of *Amazing Spider-Man* from 51 onwards. *Marvel Tales* then went hot, reprinting random issues featuring *Spider-Man* stories guest-starring popular characters, namely the John Byrne *Marvel Team-Up* issues to 208, Punisher to 222, X-Men to 244 and then scattered Morbius, Ghost Rider, Hobgoblin and Black Costume appearances until its finale.

A handful of new back-up stories, paradoxically rarely featuring Spider-Man, have filled out occasional issues: Angel in 30, concluding his story-line from *Ka-Zar* 3, Hawkeye and Two Gun Kid in 100, Spider-Man and Thing in 198, X-Men and Sunstroke in 262 and Woodgod in 263. Owing to their minute page-count (5-10 pages), all are inconsequential aside from the Woodgod tale, which serves as an eloquent epilogue to his origin in *Marvel Premiere* 31.~APS

MARVEL TEAM-UP

Marvel: *Series one 150 issues, 7 Annuals 1972-1985, series two 11 issues 1997-1998*

After DC teamed Batman with other superheroes in *The Brave and the Bold*, a Spider-Man team-up title appeared in 1972. Early issues are only noteworthy for some fine Gil Kane art, particularly in 4's X-Men guest-shot. Laughably, 1-24 are now available in the cheap format *Essential* series. You'd have to be demented. Writers Len Wein and Gerry Conway show little interest, bottoming out with Conway's all-time stinker in 28 as Manhattan Island is towed back into place by Hercules, having been held for ransom in the Atlantic. Between 21 and 32 Spider-Man had every third issue off, with the Human Torch filling in. It was probably a similar contractual deal to that of talk-show hosts. In 41-44 Bill Mantlo and Sal Buscema turn out an interesting tale involving the Scarlet Witch, Dr Doom and the Salem Witch Trials, but it was merely a blip among the mediocrity, as was Daredevil's appearance in 56.

With 57 Chris Claremont became writer, joining regular penciller John Byrne, who'd already drawn 53-55, and *Marvel Team-Up* became interesting. More offbeat guest stars like Yellowjacket and the Wasp (59, 60), Captain Britain (65, 66), and even the cast of *Saturday Night Live* (74) became the order of the day, and it seemed the creators cared about more than meeting a deadline. Highpoints are the conclusion to the Iron Fist series in 63-64, the unusual appearance of Red Sonja in 79 and, artistically, Thor and Havok in 69-70. The two parters were reprinted along with 75's Power Man story in a 1998 one-shot titled *Giant-Sized Spider-Man*. A plot involving the Black Widow, Nick Fury and Shang-Chi (82-85), is notable for the art of Sal Buscema inked by Steve Leialoha, and 86's Guardians of the Galaxy appearance is also worth a look. Byrne had already gone when Claremont left with 89's Nightcrawler story. From 90 an assortment of creators sent the title spiralling back into a panache-free zone, brightened only by Claremont returning in the company of Frank Miller to team Spider-Man with the Fantastic Four and introduce New Mutant, Karma, in 100.

Appointing regular pencillers Herb Trimpe (106-118) and Kerry Gammill (119-133) along with writer J.M. DeMatteis (111-133) doesn't lift the title – with one glorious exception. In 119 there's no supervillain and Gargoyle and Spider-Man spend little time in each other's company, but each is involved in a situation pertaining to old age, resulting in a very touching story. DeMatteis appears to have been resolving some questions regarding his relationship with his parents during his time on *MTU*, as the gulf between parent and offspring is a recurring theme, even in 131's deliberately ridiculous Frog Man story. From that point the only issue worth mentioning is the silliness of 137, in which Spider-Man's aged Aunt May and Franklin Richards team to save Earth from the planet-devouring Galactus. By 1985 a team-up title was no longer required as guest appearances were commonplace at Marvel, while crossovers were about to become the norm rather than the exception, and *Marvel Team-Up* departed with a whimper.

It was revived in all but name as *Spider-Man Team-Up* in 1996, then restored in 1997 with Spider-Man teaming in 1-5 and 7 and Namor teaming in 8-11. They shared 6. Tom Peyer writes all issues, Glenn Herdling joining him for those featuring Namor, with Pat Oliffe and Josh Hood pencilling most. Hood does a decent job, but everyone else falls well below par for a run offering scant entertainment value.~FP

MARVEL: THE LOST GENERATION

Marvel: *12 issue limited series (12-1) 2000-2001*

The Marvel heroic universe began in 1961, with the debut of the Fantastic Four, yet Marvel continuity places them as being around about a decade. They were preceded by the 1940s heroes, and the abortive 1950's revival of *Captain America*, the *Human Torch*, and the *Sub-Mariner*. This left the Marvel Universe, from circa 1955 to an eternal 'ten years ago', without superheroic protectors - until John Byrne and Roger Stern came up with the 'continuity implant', to fill the spaces.

Investigating the alien Skrulls via incomplete records, late 22nd Century researcher Dr. Cassandra Locke travels to earlier points in Earth's history, from the 1950s to the 1970s, seeking evidence of previous Skrull attempts to control or invade Earth. Along the way, she encounters a number of key figures in Marvel history – Dr. Strange, Nick Fury, the Sub-Mariner – as well as an entire generation of heroes, primarily those organised as the team 'The First Line', whose operations were mostly covert, and who have been forgotten by posterity. Sadly, Cassandra, is never more than a cypher. She stumbles into situations she doesn't understand and utters warnings, thanks to her knowledge of the future, that, like the predictions of her mythological namesake, are seldom believed. And that's about it.

Byrne and Stern's continuity-implant heroes, however, are varied and largely appealing. Due to the pacing and structure of the series, the majority remain "costume X whose power is Y", but several are given enough layers to intrigue, and quite a bit of imagination is brought to filling in gaps in Marvel's history without becoming plodding about it. Seriously flawed, but still interesting and eminently readable. The title was originally released as a 12-1 'countdown', but works much better when read in conventional order from 1.~HS

MARVEL TRIPLE ACTION

Marvel: *47 issues 1972-1979*

Where the triple action came from no-one knows. 1-4 reprint Kirby *Fantastic Four* issues, and from 5 it's *Avengers* reprints all the way, encompassing the final Lee and Kirby period, through Thomas and Heck to John Buscema's earliest days on the comic. Fewer pages in the 1970s comics meant that all stories are edited by at least a page, some none too sympathetically.~FP

MARVEL TWO-IN-ONE

Marvel: *100 issues, 7 Annuals 1974-1983*

This team-up title stars the Thing and a different superhero guest every issue. Such titles are difficult to write well. The traditional formula has the co-stars battling each other before collaborating against the villain, and *Marvel Two-In-One* has more than its fair share of these potboilers. Steve Gerber started on a sound footing for its first nine issues, although most stories are heavily tied to other titles he was writing contemporaneously. His depiction of the Thing's artful sense of humour provided a refreshing change from the continuous wisecracking machine often portrayed. The title's nadir swiftly followed, with most issues in the teens hitting absolute rock bottom.

Sporadic signs of promise surfaced in issues 42-43 and 50-51 before Mark Gruenwald and Ralph Macchio taught all other scripters a lesson on how to write team-up titles. Their run in 53-58 and 60-74 seamlessly melds rotating guest stars into multi-issue story-lines, punctuated with such delightful one-off stories as the touchingly humorous Impossible Man tale in 60. The 'Project Pegasus' saga serves as the crux of their run, fostering several meaty sub-plots, all of which are resolved by the end of their tenure, a rare event in more modern times. Regrettably, the output fades towards average over their final few issues. The visual side is spoilt by the presence of too many artists in the twenty-one issues, although work by Byrne, Pérez, Day and Bingham is of high quality. Tom DeFalco failed to heed their lesson. 75 onwards churn out mediocrity at best. His only issue worthy of mention is 86, in which Sandman goes straight. Annual 2 by Jim Starlin chronicles the final chapter in the Warlock/Thanos feud that began in Warlock's first series. Although not the best issue of that run, this fine story depicts one of Thanos and Warlock's many deaths. All the other annuals are forgettable.~APS

Recommended: 6-7, 10, 51, 53-58, 60-67, Annual 2

MARVEL UNIVERSE

Marvel: *7 issues 1998*

Roger Stern becomes Marvel's official biographer in this series dedicated to untold stories of the continuity prior to the events of *Fantastic Four* 1. 1-3 star the Invaders, and

explain how Hydra/Baron Strucker came by such advanced technology, all beautifully rendered by Steve Epting and Al Williamson, whilst the remainder concern Ulysses Bloodstone and Dr Druid in a tribute to the monsters that plagued the pre-superhero world. Wonderful, old fashioned, fun.~WW
Recommended: 1-3

MARVEL VALENTINE SPECIAL

Marvel: *One-shot, 1997*

A pleasing and imaginative look at the romantic lives of Marvel's heroes. Spider-Man and Mary Jane star in a *Pygmalion* homage, Daredevil and Karen Page try to help a victim of spousal abuse, and Absorbing Man and Titania (Marvel's 'Married... With Criminal Records' couple) have problems when 'Sorby's attempt to get a Valentine's Day present for the little woman goes wrong. All three stories are well-written and drawn, self-contained and accessible to new readers, a rare treat. The icing on the cake is a delicious farce starring Venus, Goddess of Love, in her first solo for 45 years, as she finds several of Marvel's old teen-comedy stars working at a dating agency, and fights off The Blind Date From Outer Space! Writer Frank Strom and artist Dan DeCarlo do a fine job on this tribute to Marvel's funny girls. There's also a Cyclops and Phoenix story set in the dismal Askani's World continuity, confusing and muddily drawn, but hey, there's a coffee cream in every box of chocolates.~HS
Recommended

MARVEL'S GREATEST COMICS

Marvel: *74 issues (23-96) 1969-1981*

Carrying on directly from *Marvel Collectors' Item Classics*, issues 23-34 are double-size and continue reprints of Doctor Strange, Fantastic Four and Iron Man. Also included are Captain America's early stories from *Tales of Suspense*. From 35 on, the book shrank to a thirty-two-page *Fantastic Four* reprint title. 116 is the last issue reprinted before cancellation.~APS

MARVELS

Marvel: *5 issue limited series (1-4, 0) 1994**

This groundbreaking series by Kurt Busiek and Alex Ross retells early events in the Marvel Universe through the eyes of news photo-journalist Phil Sheldon. Like his ordinary fellow-men, he has to come to terms with the appearance of superbeings and the effects they have on day- to-day life. Through him, his family, colleagues and strangers he meets, we see mankind's fear, insecurity, helplessness and prejudice laid bare by these awesome Marvels whose conflicts wreak millions of dollars of property damage with apparent disdain for the misery heaped upon affected innocents. Every piece of superheroic action is sourced from an existing Marvel comic. Each issue focuses on a major event from a different period in Sheldon's life. These events and real-time publication dates are: 1 – the first appearance of the original Human Torch (1939), 2 – anti-mutant hysteria (1965), 3 – the coming of Galactus and the Silver Surfer (1966) and 4 – the death of Gwen Stacy (1973).

Ross's painted artwork is magnificent. Realism and lavish attention to detail underlie every panel, particularly exemplified by 1's late 1930s period setting – the cars, the dress styles, everybody smokes. Backgrounds are meticulous. Spot the Beatles at Reed and Sue's wedding in 2 and Pete Townshend in 4. Busiek's script is low-key and understated. A young J. Jonah Jameson makes a guest appearance in 1, yet his name is never mentioned. Issue 2 is the strongest. Sheldon is involuntarily swept up in a frenzied wave of anti-mutant hysteria and subsequently has to reassess his stance when he meets a defenceless, innocent mutant child face to face. Later, Sheldon writes a book titled 'Marvels' which contains many of his news photos.

Issue 0 was published some four months after the regular series and is not essential. It contains short text pieces describing how the project came to be, an eleven-page prototype story with a more detailed origin of the Golden Age Human Torch, and pin-ups and character sketches by Ross during development.

Marvels' success can be gauged by the spin-offs and reprints it has generated. 1-4 were reprinted individually during 1996. All five issues have been collected in softcover, hardcover and limited-edition variants. The softcover boasts the same cover as Sheldon's fictional book, provides further details of the project's design stages and, for complete fanatics, lists the source of every recaptured event right down to issue and page number. Spin-offs *Ruins* and *Tales of the Marvels* were published during succeeding years and maintain the same theme. Busiek has since adopted a similar approach with unfamiliar superheroes in *Astro City*. Marvels cannot be recommended too highly, although unfamiliarity with the early, retold stories does slightly lessen its appreciation. It is an adult comic in the true meaning of the word, with neither an ounce of exposed flesh nor exposed innards in sight.~APS

MARVELS

Marvel: *6 One-shots (Captain America, Daredevil, Fantastic Four, Spider-Man, Thor, X-Men), one-shot (The History of Marvels Comics) 2000*

It's long been established that the heroes who inhabit the Marvel universe have comics issued about them. These purport to be some of those comics, produced by creators who adapt the exploits of the heroes from interviews, press releases, news items, and naturally, sheer imagination. Ranging from the silly *Captain America* "written and drawn" by Rick Jones and Steve Rogers to the eccentric *Daredevil* (an actual escaped demon) by Tony Isabella and Eddie Newell, to the just plain dumb blood-drinking mutant *Spider-Man* (Paul Grist and Kyle Hotz) it's easy to see why the comics industry is having such a hard time prospering. Of special note, though, is *X-Men* by Mark Millar and Sean Phillips. Stylistically and thematically it could be considered a test run for the *Ultimate X-Men* . *The History of Marvels Comics* is a promotional sidebar publication to support them. Ultimate Marvelites only.~WW

MARVILLE

Marvel: *3 issues + 2002 to date*

Marvel Comics president Bill Jemas and artist Mark Bright produce a so-so parody full of comics industry in-jokes, wherein Ted and Jane send their son Al back 3000 years to the Marvel Universe of today. He thinks he has superpowers and becomes a witless and unwitting success despite only wanting to get into the pants of a girl who can't stand him. Although there's the odd nice touch to augment the good artwork, this is way too cynical and not nearly as sharp as it thinks it is.~WW

MASK

DC: *4 issue miniseries 1985-1986, 9 issues 1987*

One third of the cartoon series and toy triumvirate, *Mask* is pretty simple car and vehicle related adventures scripted, seemingly in his sleep, by Michael Fleisher. What makes this of passing interest is the classic *Superman* art team of Curt Swan and Kurt Schaffenberger still on good form.~FP

The MASK

0 features reprints from The Mask's earlier appearances in *Mayhem*. The actual miniseries reintroduces the character to the world as Stanley Ipkis, an ineffectual nerd, all his inhibitions released whenever he puts on an ancient tribal mask he has acquired. John Arcudi and Doug Mahnke produce a series of set-ups and deliveries that approximate quite nicely one continuous story, but eventually the protagonist is an annoying, unsympathetic and unfunny one-trick pony. The ongoing series moves the concept on as Arcudi and Mahnke and their successors use the 'miniseries within a series' format (cover numbered as miniseries) to tell tales of The Mask as it possesses different people. 1-5* (*The Mask Strikes Back*) sees a succession of drop-out kids where

The Mask more or less fulfils their individual suppressed desires. 6-9* ('The Hunt for Green October') has Evan Dorkin and Peter Gross explore what happens as news of the power of The Mask spreads to the underworld and crypto-Nazis, Ninjas and Mafioso all try to possess it. Competent but unremarkable. The madness goes mobile in 11-14* ('World Tour') before settling down for some down home lunacy in 15-18* ('Southern Comfort'). The series then went dormant until the release of the manic one-shot, a jam issue featuring the likes of Sergio Aragonés, Mike Mignola and others, leading to another miniseries by Bob Fingerman, but generally the character remains a foil, useful for playing against other characters, or in intercompany cross-overs, dependent on milieu and antagonists, not his own qualities, to hold the attention.~WW

Adventures of the MASK

Dark Horse: *12 issues 1996*

So-so cartoon adaptation as this general audience version carries on from the Saturday morning kids show. It tells watered down, less manic tales of the Stanley Ipkis character and his misadventures whenever possessed by an ancient mask that releases his pent-up hostilities in the form of a shape-changing, reality-altering psychopath. Consistently average.~WW

The MASK Graphic Novels

Dark Horse: *The Night Before ChristMask 1994, The Mask Summer Vacation 1995, The Mask in School Spirits 1995*

Three wacky and genuinely bizarre specials from sporadic genius Rick Geary released as seasonal fillips to tie in with the US vacation schedule. Although probably not considered canonical by hardcore fans, and targeting a general rather than comics audience, they most closely approach the spirit of anarchy and lunacy that seems to be the basis of the character.~WW

Recommended: *The Night Before ChristMask*

THE MASKED MAN

Eclipse: *9 issues 1984-1985*

As a child, Dick Carstairs saw his mother shot dead, so now he runs a detective agency and sometimes he rolls his sleeves up to his armpits, puts a mask on, and hits people. He débuted in *Eclipse Monthly* as an obvious homage to Will Eisner's *Spirit*; there are refreshing aspects, in that Carstairs is desperately puppy-like and gormless, and the mask never stops anyone recognising him. The stories by B. C. Boyer are feeble and ponderous, and his artwork stiff, at best. The final issue, though, is unintentionally hilarious. You would have to be lost to all finer feelings not to laugh out loud at the death scene.~FC

Masayuki Fujihara's MASKED WARRIOR X

Antarctic: *4 issues 1996*

This translated Japanese series only lasted four issues of a planned six, probably because it's commonplace manga in which every point of interest is ruthlessly curtailed in favour of lengthy combat sequences punctuated by slapstick gags. Protecting society where cybernetically implanted athletes commit crimes, Dan is the invincible Kendo Warrior. Raised from birth to his position, his armour has fused to him, and regenerates from his own body, the more interesting implications of this remaining unexplored. The title comes from his kendo mask and his habit of slicing his conquests with an X across their torso in Zorro fashion.~FP

J.N. Williamson's MASQUES

Innovation: *2 issues 1992*

Adapting short stories from the series of horror anthology books, means that there's a Stephen King story in 2, but, as with most of the content, it's nothing the horror devotee won't have come across before. Adding illustrations dims the power of imagination, which is what makes most horror work in the first place. The best story is the longest, 'Nightcrawlers' in 1. It's the classic formula of the stranger wandering into the remote outpost in stormy weather and proceeding to reveal the truth. Not coincidentally, it's also the only story of the run produced in pen and ink, with Ted Naifeh drawing his template from the Steve Bissette and John Totleben pairing on *Swamp Thing*.~WJ

MASTER DARQUE

Acclaim: *One-shot 1997*

Alexandre Darque is devilishly handsome, a sorcerer, fashion photographer and manipulator. Prior to this he popped up in various Acclaim titles, a mystery man with a personal agenda. Even here he is almost a secondary character as we meet Brixton Sound, a photography student desperately seeking a cure for the cancer killing his mother. Darque offers him a job and a solution that results in a whistlestop tour of the Acclaim universe as Sound retrieves three tokens from DeadSide (Shadowman), The (Eternal Warriors) Palazzo and the Lost Land of Galyanna (Turok). He is drawn deeper into Darque's world of magic, glamour and debauchery, with unrelenting predictability, and no real resolutions. A typical introductory issue although Leonardo Manco's art elevates a standard 'Mature Readers' script from Christina Z. His story continues in *Darque Passages*.~WW

MASTER OF KUNG-FU

Marvel: *109 issues (17-125), 1 Annual, 4 Giant-Size 1974-1983, one-shot 1991*

Max: *6 issue miniseries 2002-2003*

The potential for disaster was immense. Not only was the comic to tie-in with a 1970s fad, the lead was the son of oriental pulp-novel villain Fu Manchu. Given the inauspicious conception, it's astounding that this survives as a highspot of 1970s Marvel output. The title continues the numbering from *Special Marvel Edition*, which saw the début of Shang-Chi, Master of Kung-Fu. The original creators departed rapidly, and replacement writer Doug Moench overcomes a faltering start to infuse the comic with a lyrical blend of philosophy, a well conceived and fleshed-out supporting cast, and action that's questioned and justified in situ. For large portions of the run Moench is accompanied by excellent artists. It's Paul Gulacy (most issues between 25 and 50) who's the best remembered, but Mike Zeck inked by Bruce Patterson then Gene Day (67-101) is good, and given the chance to pencil, Gene Day (102-120) is the pick of the bunch. He can't quite match Gulacy's dynamism, but compensates with subtlety and decorative layouts.

The comic takes off once Moench and Gulacy dispense with all-out butt-kicking kung-fu action and opt for spy thriller as the apt genre for the cast. Shang-Chi is a man raised to be a living weapon in his father's service, but discovers Fu Manchu's true intentions in early issues. He adopts Denis Nayland-Smith, also inherited from the Sax Rohmer Fu Manchu novels and head of the British government anti-terrorist branch, as a surrogate mentor. Smith's right-hand man, Black Jack Tarr, and agents Leiko Wu and Clive Reston (dropping claims of Sherlock Holmes and James Bond among his ancestry), round out the main cast for the entire run. Shang-Chi is a consistently reluctant combatant but constantly finds circumstances lead him down that path.

The best issues of the title came relatively early into the run, with a tragic love affair in Hong Kong providing the background for 38-39, and an epic battle against Fu Manchu narrated in turn by involved cast members in 44-50. That's not to say, however, that later issues are substandard. Almost the entire run attains a level of quality rarely seen today, and if some of the philosophising seems dated, and the martial arts villains contrived, there's always something to compensate. Moench and Day left the title with 120, and that it was cancelled a mere five issues later speaks volumes.

An ill-advised return by Moench, initially serialised in *Marvel Comics Presents*, was issued as a one-shot in 1991, and he followed that with the *Moon Knight Special* in 1992, with Shang-Chi taking an equal part. Shang-Chi later appears in *Journey into Mystery* 514-516. Collectively they seemed to prove the adage "you can't go home again", but the Max miniseries is a creditable reuniting of Moench and Gulacy. The name of Fu Manchu was obviously off-limits this time, so Moench just has Saint Germain playing the same role. It feels like a new actor being wheeled in to play James Bond. Moench provides a few surprises, though, and some jokes, not least a snipe at what passes for a covert action squad at Image. The passing of time is acknowledged, with Wu and Reston now married and Shang-Chi is dragged out of isolation for a suitably nefarious threat. Gulacy's art is looser, but his faces sloppier. Overall, if not a return to peak form, it outshines expectations.~FP

Recommended: 29-31, 33, 34, 38-40, 42-51, 71, 76-80, 83-89, 96-98, 100, 109-111, 114-118, 120

MASTERS OF TERROR

Marvel: *2 issues 1975*

A black and white reprint magazine that drew its material from the likes of *Supernatural Thrillers* and *Journey into Mystery*. Of the two, the first issue is better, with strips by Gil Kane, Frank Brunner and Esteban Maroto, although either is a nice introduction to Marvel's horror titles.~DAR

MASTERS OF THE UNIVERSE

Image: *2 issues + 2002 to date*

The reviving of every 1980s toy-related comic has finally trickled down to this. Despite the dynamic art of an enthusiast rather than some hack knocking it out during their morning dump, this is the same old rubbish you read twenty years ago. Except you're not seven years old any more.~FP

MATT CHAMPION

Metro: *2 issues 1987*

The world of wrestling in the 1930s is the theme of Ernie Colón's series, but don't let that put you off. The central character has evolved into a powerful wrestler by means of illegal injections administered by his chemist father, and the story deals with the corrupt nature of wrestling in general, though not without a sense of humour. Matt is a kindly soul who rebels against the crooked promoters, and when dealing with gangsters it's as well the injections have also made him bulletproof. If you're looking for something different, this may be for you. Sadly it was never completed.~HY

MATTER BABY

Antarctic: *1 Annual 1997*

Despite being called an annual, this bears the page count of the traditional comic, but the mis-labelling is either in keeping with the editorial oversight that only supplies credits in the indicia's minute type or the wacky content. It's to be regretted that writer John Marshall and artist Steve Willhite aren't highlighted for an early example of the post-ironic character now prevalent in TV cartoons. Matter Baby is a superhero baby fighting the likes of Disco Concrete Man, and warring amoeba within a drop of water in these funny short pieces. Go on, treat yourself to a laugh.~WJ

MAUS

Pantheon/Penguin: *2 volumes 1986, 1991*

Art Spiegelman covered quite a few bases in shunting comics forward another level. On the face of it he was an unlikely candidate. Certainly a man who cared about his artwork, this was often to the detriment of any narrative or popular appeal. *Raw* magazine, which he co-produced and edited, presented strips almost wilfully teetering on the fine line that separates the King's new clothes from works of genius, yet – at odds with much of the other content – it was here that he began *Maus*. It's a work that replays the horrors and fear accompanying Nazi occupation during World War II, and eventually the death camps that resulted from their ethnic cleansing programmes. Instead of selecting a straightforward portrayal, Spiegelman elects to depict the Jews as mice, and the Nazis as cats, following the metaphor through with other, often inexplicable, depictions (Poles as pigs?). Given the sensitivity of the topic, it demands a serious approach, and Spiegelman never flinches from portraying events as they're told to him, political correctness be damned. These sequences alone, the topic they cover and the story they tell would mark *Maus* as a landmark.

But there's another level. Spiegelman is conveying the experiences of his father Vladek, a death-camp survivor, who's relating the story in segments at his son's prompting. Father and son have had a fractious relationship over the years. While *Maus* is the story of Vladek's experiences in the 1940s, it's also the story of a then twenty-something and now thirty-something art attempting to reconcile and make sense of the contradictory emotions he has regarding his father, and come to an understanding of what shaped the man he knows. It's this extra level that elevates the entire project, with each chapter of horror sandwiched by sequences with art and Vladek. Maus is an extraordinarily honest work: implicit in its presentation is art's admission of badgering his father for his own ends, although there's no way he could have foreseen the critical and financial success his father's story would bring. For all the introspection and worthiness, Spiegelman always sticks with a simple, accessible narrative. There have been few comics as intensely involving as *Maus*, and none as harrowing. It's widely acknowledged as a masterpiece; the only shame is that in ten years since the publication of the first volume few works have come anywhere close to equalling it.~FP

Recommended: 1, 2

MAVERICK

Marvel: *One-shot 1997, 12 issues 1997-1998*

Maverick is a pal of Wolverine and Sabretooth, from the days when they were known collectively as Team-X. He's a mutant (naturally) and mercenary for hire (because all the charity mercenaries work for DC) with a high-tech arsenal. The series deals primarily with his relationship with Sabretooth and that Maverick is dying of the Legacy virus (a type of AIDS for the genetically-enhanced). There's an intriguing supporting cast, including Elena Ivanova, an ex-KGB psi-spy whose mother was killed by Sabretooth, and Brian Johnson, a boy also dying of the virus, who provides an occasional moment of genuine warmth in what is otherwise just another mutant cash-in shoot 'em up.~WW

Wolff & Byrd's Secretary MAVIS

Exhibit A: *4 issues + 1998 to date*

Mavis is secretary to Batton Lash's supernatural lawyers, Alanna Wolff and Jeff Byrd, who appear in *Supernatural Law*. In 1, after her boyfriend Toby has proposed marriage, Mavis must cope with her family's pressure to accept and a ghostly bride rooming a local graveyard. A delinquent teenage vampire's deposition threatens her peace of mind in 2, coinciding with the reappearance of one of her own teenage crushes. These themes return in 3, when Mavis is split into three people, each with a different motivation for her future. With fewer legal trappings, this is about Mavis' own reactions to the creatures that come through the law firm's doors as well as giving more space to her life outside the office. Otherwise, this is no major departure from Lash's main series.~NF

MAX & LILY

Vagabond Press: *One-shot 1999*

Max (female) and Lily (male) start as the eccentric vehicles for creator Kris Dresen to explore various political and social topics of the day via one-page strips, presumably originally produced for another publication. As polemic, they make their point in an inoffensive fashion, although Max and Lily are almost squashed by word balloons, and are very nicely drawn. They're still very nicely drawn when the emphasis shifts to character based humour, but it's not sharp enough or different enough to make compelling reading.~WJ

MAXIMAGE

Image/Extreme: *7 issues 1995-1996*

There has, apparently, always been a mystical entity known as the Maximage. This time the Ancient, recently released from incarceration by aliens, selects Lori Sanders, a street urchin, to do the job. Knowing nothing about her new powers, Lori has to confront the aliens in the 'Extreme Destroyer' multi-title crossover (issue 2) and then gets involved in the battle between Glory, Angela and Celestine (4). Pretty much what you'd expect of a Rob Liefeld character, but with scripts by Bill Messner-Loebs (from 2) the title's at least better written than most Extreme offerings.~NF

MAXIMORTAL.

Tundra: *7 issue limited series 1992-1993**

Continuing Rick Veitch's deconstruction of the superheroic genre, *Maximortal* tells of an alien creature who is used as the ultimate weapon, but turns the tables on his abusers. It's also the story of two naïve young cartoonists who lose the rights to their character 'True-Man' when they sign a contract without looking at the small print. It's also seemingly about several other things, but frankly, it just doesn't tell any of the stories very well at all. The segments involving Spiegal and Schumacher, the cartoonists ripped off by Sidney Wallace, are the strongest, but whenever the action moves away from them it becomes incoherent and metaphysical. And it's got another of those irritating The-End-Is-The-Beginning cop-out conclusions. After the power and drive of *Brat Pack*, this woolly meandering is simply annoying, not meaningful.~HS

MAXIMUM FORCE

Atomeka: *1 issue + 2002 to date*

Simon Bisley knocks out exaggerated mayhem from a Dave Elliott script. Fans of Lobo dive in, everyone else stay clear.~FP

MAXIMUM SECURITY

Marvel: *One-shot ('Dangerous Planet') 2000, one-shot ('Ego The Living Planet'), 3 issue miniseries 2000-2001,*

Alien powers have decided that as the human race is basically full of thugs, it won't matter if they dump all their criminals here as well, making Earth a kind of intergalactic Australia. This miniseries, which bookends crossovers into many of the corresponding months' Marvel titles, could have been a lot of fun. Instead, Kurt Busiek and Jerry Ordway manage to drag it down to absolute tedium, while none of the tie-in issues really get behind the concept; the respective heroes usually brushing off a few alien muggers in a few panels before getting back to their own inevitably more interesting subplots. About the only worthwhile part of the project was that it gave Marvel the excuse to publish the one-shot reprinting three early appearances of the celestial body who played a pivotal role in the crossover. The trio of stories, which all originally appeared in late 1960s issues of Thor by Stan Lee, Jack Kirby and Vince Colletta are, much better entertainment.~JC

Joe Sinardi's MAXWELL MOUSE FOLLIES

Renegade: *6 issues 1986*

If there's an artform entirely inappropriate for treatment in comics it's song and dance, yet Renegade belly flopped two such titles into the shops (the other being *Neil the Horse*). This has a mouse society in 1930s New York flourishing as a scaled-down version of the real thing, but every time the plot starts to spark, a musical number grinds it to a halt.~FP

THE MAXX

Image: *35 issues 1993-1998*

Story and art by Sam Kieth, with dialogue by Bill Messner-Loebs (most issues) and Alan Moore (21). The Maxx is a masked purple guy with large claws and huge feet, who lives in a dumpster in an alley, and all he knows about himself is that he's a superhero. His only friend is Julie. She was assaulted while in college, and though she would say it was no big deal, she dropped out of college and became a freelance social worker, which (her friends point out) gives her feelings of power and superiority. One of her friends is Sarah, an unhappy teenager, and her main enemy is Mr. Gone, a serial rapist and murderer. It sounds grim, and it is, but it's also funny and surprising and constructive. *The Maxx* is a course of psychological therapy, sometimes conducted through metaphor, sometimes through direct confrontation, and since the people involved are interesting and the metaphors imaginative and illuminating, this makes for an absorbing read. The therapy aspect is emphasised by the letter column, which frequently seems like a deliberate extension of the main story.

The 35 issues can be divided (approximately) into four story arcs. The first, 1-11, collected over two volumes, introduces the main characters and metaphors and answers a lot of questions about the ties between Julie and Maxx. It answers them in its own good time, though, and you will have great fun trying to figure out what is going on. The second arc, in 12-20, concentrates more on Sarah and Mr. Gone, but ends with further revelations about Julie and Maxx. The third arc, from 21-29, moves forward ten years and is mostly about Sarah and Mr. Gone; this is still interesting, but in comparison with the planning and foreshadowing that were put into Julie's story, it feels rather tacked on. The fourth arc, from 30-35, tells the stories of new or peripheral characters, all part of the process of closing down the storyline and moving the characters on to different universes.~FC

Recommended: 1-20, 30-35

Friends of MAXX

Image: *3 issues 1996-1997*

This is a development of *The Maxx*, with Sam Kieth plying the same themes of insecurity, dependence, the search for guidance and for an escape from unproductive habits. The Maxx appears on the covers of 1 and 2, but the only real connection between the titles is their appeal to the same readership. Unlike *The Maxx*, there are no fantastical aspects, and the double-length issues make for a more demanding read, though a rewarding one. 1 ('Dude Japan') tells the story of a couple, and depicts very well the histories and expectations that each brings to their stormy relationship; this is life, people, and it's not pretty. 2-3 ('Broadminded') are about young Ira, and his journey home from prison in the company of Charley, his uncle. Ira doesn't say much about his time in prison, but it's clear that it has left him very uncertain about what it means to 'be a man', and he considers this issue from many angles during the course of the story.~FC

Recommended: 1

MAYHEM

Dark Horse: *4 issues 1989*

Anthology title featuring strips from two cancelled titles and the first version of the Mask in his current madcap form. An attempt to blackmail the Archon in The Mark goes wrong, and the Mecha crew locate more giant robots in the only dull strip.~WJ

THE MAZE

Metaphrog: *2 issue microseries 1997*

Obscure yet gritty tale of Xia, working as a waitress on the Greek Holiday Isle of Krissos, her tragic involvement with a liar who says he loves her, and the gentle, friendly folk who are so nice to visitors and tourists, yet so casually barbaric to their own poor. Property developers, bent cops and demented ex-girlfriends provide more authentic villainy than your average fantasy comic and the modern overtones of Greek Tragedy play well in the bold, line artwork. A very readable alternative from Metaphrog.~WW

MAZE AGENCY

Comico: *7 issues 1988-1989**

Innovation: *16 issues (8-23), 1 **Annual**, 1 **Special** 1989-1991*

Caliber: *3 issues 1997*

Each issue of *Maze Agency* features a mystery to be solved in the classic whodunnit manner. Private detective Jennifer Mays and her partner Gabriel Webb, true-crime writer and amateur sleuth, sort through the clues and red herrings in this cleverly-crafted series, written by Mike W. Barr. As the series progresses we learn more about the lead characters and their developing relationship, leavening the Ellery Queen-style pat detection with romance. The whole is as light-hearted as a series dealing with murder could be.

Maze Agency introduced artist Adam Hughes to an appreciative public. He drew 1-12, and thereafter there seemed to be a new artist on every issue, so while the scripts remained consistently good, the title lacked visual appeal. It also suffered from being published by the relatively obscure Innovation. The 1990 annual has a terrific cover and homage to *The Spirit* by Mike Ploog; a special includes stories drawn by Joe Staton, the Pander brothers and Alan Davis. The Caliber series saw the introduction of regular artist Gene Gonzales (in black and white) but otherwise no change.~NF

Recommended: 1-5, 8, 9, 12

'MAZING MAN

DC: *12 issues 1986, 3 Specials 1987, 1988, 1990*

'Mazing Man is an impossibly genial little guy who believes he's a superhero and wanders his Queens neighbourhood in home-made regalia performing good deeds like unclogging drains and keeping a watchful eye on the local infants. The other residents of 'Mazing Man's block make for a fine supporting cast. The series resembles nothing as much as a superior sitcom, rich in whimsy, sensitivity and observation, and able to elicit laughter and sympathy while bringing a glow to the heart. Stephen DeStefano's cartooning is excellent, and Bob Rozakis more than atones for all the drek he wrote in the 1970s. Every issue is a gem. A delightful series.~FP

Recommended: 1-12, Specials 1-3

M.D.

EC: *5 issues 1955**

Gemstone: *5 issues 1999-2000**

Another peculiar choice of title from EC, but the intentions are plain from the first page of issue 1, which has a ghastly Graham Ingels-drawn screaming caveman heralding a story about the practice of medicine through the ages. It's well researched and beautifully illustrated by the likes of Reed Crandall, George Evans, Ingels and Joe Orlando; the contents veer between domestic dramas and medical emergencies in the fashion of TV medical shows since day one. They are, though, far too reliant on authenticity at the cost of tension. Three pages of meticulously detailed operations don't carry the same tension they would on television. 3 is the most diverting issue, with an Ingels story of a hillbilly community coming as an antidote to the antiseptic tone, and an unusually moralistic examination of now discredited electroshock therapy. The Gemstone issues are facsimiles, and are collected as a bound set, which comes far cheaper than the luxurious hardbound black and white reprint volume.~FP

M.D.GEIST

CPM: *3 issue miniseries 1995*

The uncharismatic Geist is a genetically engineered soldier with 'supernatural' fighting abilities. Imprisoned unconscious in a satellite, he returns to a different Earth, but is soon back to busting heads and being surly. Unusually for US comic versions of Japanese videos, Koichi Ohata the creator of our animated 'hero', contributes to the title, the remainder being drawn by Tim Eldred. It's deliberately unpleasant with heavy doses of sex and gruesome violence. This makes it stand out from all the other future Earth scenarios to be found in translated manga, but is hardly any recommendation.~FP

MEAN MACHINE: Travels With Muh Shrink

Fleetway: *One-shot 1993*

Reprinting the weird and wonderful strip from 2000AD starring Mean Angel, the psychotic cyborg with the metal head whose berserker rages are controlled by a dial on his forehead. Here he's cured of all social defects and becomes a useful member of society, for about thirty seconds. The painted art by Richard Dolan is vibrant and funny, and John Wagner reaches a peak of dramatic lunacy, with the writing evoking laughter and tears by turn.~WW

Recommended

MEANWHILE...

Crow Comics: *1 issue 1997*

Soaring Penguin: *3 issues (2-4) 1998-2001*

Edited by John Anderson, this anthology is dedicated to presenting the work of British creators, and the mix of small press, independent and unknowns is refreshing, but means that the overall quality is very uneven. In addition, the use of older material (Eddie Campbell in 1, John McCrea in 3) alongside the new is unexplained. Of particular note are Ralph Horsley's accomplished, wordless western (1), Andy Brown's script about one man taking on the guilt of a whole town (2), David Hitchcock's pirate love story (2), Rachael House's feminist rant about fanboys (2), a biographical tale from Hunt Emerson (2), David Hailwood's comedy zombies (3 and 4), and Roger Langridge's Doctor Sputnik versus Bobzilla (4). 4 is a squarebound special that previews Hitchcock's 'Whitechapel Freak' and also contains a Gary Spencer Millidge Strangehaven tale. An Italian strip by Grateata, Mark Stafford's one-page gag strips and Howard Stangroom's anthropomorphic 'Rent Boys' can't entirely overcome the feeling that a hundred pages was really pushing it.~NF

MEASLES

Fantagraphics: *8 issues 1998-2001*

This unusual quarterly anthology brought together many of the biggest names in alternative and underground publishing to produce a title suitable "for all ages", specifically 6 and up. On show is work by, among others, Peter Bagge, Sam Henderson, all three Hernandez brothers, Joost Swarte, Lewis Trondheim, Steven 'Ribs' Weissman and Jim Woodring. An admirable if somewhat bizarre proposition, their hearts seem to be mostly in the right place, but some of the subject matter is unlikely to convince the Bible belt that comics are really good wholesome fun for all the family. Still, if a teenager raised on Bagge's Girlie Girl and Beto Herandez' streetwise social observation is what you're aiming for, what better way to start them off? Jaime Hernandez' superhero spoof 'Los Supersonics' is the pick of the bunch.~JC

MEAT CAKE

Iconographix: *1 issue 1992*

Fantagraphics: *13 issues (0-12) + 1993 to date*

Thematically, Dame D'arcy is the comics equivalent of Nick Cave. Her weird tales of obsession, love, death and murder are set in a surreal twilight world where talking shrimp and malevolent mermaids are the norm. There's a knowing, painterly (specifically Pre-Raphaelite) approach to the way panels are presented and an overall Gothic atmosphere. A description of the recurring characters provides the best introduction to the nature of the strips. Strega Pez communicates by means of words on a bar of candy that she projects from a wound in her throat. There are Hindrance and Perfidia, Siamese twins and Scampi the Selfish Shellfish who is kept on a leash by Friend the Girl. Effluvia's the mermaid and Richard Dirt is actually a female whose doppelganger turns up to help play a practical joke on the sex-pest Wax Wolf (6). Each issue there's almost always a strip or reference to a "filly" and horses generally are a common sight. Apart from her own characters, the series includes some illustrated ballads and songs and an absurd Alan Moore story (9). 'Planet Blue' is a continuing story of pirates and wasp women (10-11), but otherwise the last few stories seem patchy, even as the artwork improves. 0 reprints the Iconographix issue. The artwork fills the pages, panels have embroidered borders and words get everywhere. The density of the pages can be initially intimidating but once past this, the highly stylised artwork is impressive and very effective.~NF

Recommended: 3-9

MEATHAUS

Meathaus Press: *6 issues + 2000 to date*

Experimental anthology with a large percentage of fine-lined cartoonists, which has grown in size and confidence – the latest two issues both having over one hundred pages. The best of the contributors to every issue are Chris McDonnell (chunky comedy), Jay Sacher (odd, urban tales in wash), Theo Edmands (wonkily drawn games with language and anthropomorphics) and Stephen Q. Halker (a.k.a. Stardog, dreamlike fantasies). Stephen Gilpin (1, 3-5) offers comedies about imagination, James Jean (1-3, 5, 6) tales of music, art and childhood and Zachary Baldus (4-5) an animation style romance. More straightforward fun is provided by Earl Holloway's wild ducks (2), Mu Dafaka's 'The Evolution of Chinese People' (5) and Joe Simko's 'Vomit' (4). Initially strips are limited to between two and four pages, but, in 5 and 6, there are also some slightly longer stories. This has meant that the reader has plenty of variety, and visually, at least, this series is always interesting, without being irritatingly 'arty'.~NF

MECH DESTROYER

Unfortunately, a stereotypical hothead, Reese Bennet, accidentally becomes connected to the XR5000 during testing and his military inexperience puts everyone at risk. Robert Chong's script doesn't offer anything new to this scenario, but Jae Kim's striking mix of manga and realistic artwork compensates.~NF

MECHA

Dark Horse: *6 issues 1987-1989*

In as much as it offered insights into the occupants, this is a better-than-average giant-robot comic, although that's not saying much, and Harrison Fong's artwork is excellent. Mecha continues in *Mayhem*, and bears no relation to the character of the same name introduced during *Comics Greatest World*.~WJ

MECHAMEN

Antarctic: *One-shot 1990*

This mix of Japanese giant robots and Godzilla reads like an introduction to a series as it ends with a growing number of giant cyborg Mechamen battling a thousand different monsters with names like Igwaro, Gorugon, Meteora and Zettog. There's no time for characterisation or logic in what is just an enthusiastic series of battles.~NF

THE MECHANIC

Image: *One-Shot 1998*

A caveman, a dinosaur and a hippy chick are transported to 3742, where they are genetically enhanced by the evil Doctor Medula and his hapless assistant, the Mechanic. The garish painted artwork by Joe Chiodo is cartoonish enough to suggest that this is meant to be a light-hearted sci-fi romp, but it's difficult to find many laughs in Jonathan Peterson's plodding script. The comic was issued under two different covers, neither of them especially attractive.~AL

MECHANICAL MAN BLUES

Radio: *3 issue miniseries 1999*

Practically incomprehensible story about a subjugated society who revive a mechanical man to aid their fight for freedom. The impossibly proportioned woman in 1 seems to have no nipples, poor dear. There's far better manga and titillation, so don't bother with this.~FP

MECHANICS

Fantagraphics: *3 issue miniseries 1985*

Fantagraphics' first attempt to bring the Hernandez Brothers to the attention of a wider audience. This reprint of Jaime's first sustained story, about Maggie the pro-solar mechanic on assignment with Rand Race, the boss she's infatuated with, in a far country where dinosaurs and robots share the same landscape, loses a great deal of impact by being coloured. Paul Rivoche did the crisp, sensual artwork few favours by smearing dark watercolours over it, detracting from the postcard-home format of the strip. Jaime's writing is feeling its way, but manages to both make you laugh and worry about his characters' fates.~FJ

MECHANOIDS

Caliber: *5 issue miniseries 1990*

A competent science-fiction adventure from Gary Reed and Mark Winfrey based on the Palladium Games role-playing package. The Mechanoids are bio-mechanical slaughter machines that have returned after an absence of two hundred years to wreak more havoc on the known universe. The usual crew of stalwarts: craggy, bluff captain, sexy scientist and curvy psychic, aided by a spaceship full of expendables is determined to put a stop to it all.~WW

MECHTHINGS

Renegade: *4 issues 1987-1988*

By the 41st Century, the entire world has become totally automated. Unemployable writer Bertram Baum must work at a Reclamation Centre – a junkyard to us – where he is befriended by Ahab, a loud-mouthed, slovenly robot. He also meets the Wild Robots with whom he accidentally foils the evil plans of a super-intelligent Moose to conquer the world with a Giant Robot Death Mouse. This series is actually even worse than it sounds.~WW

MEDABOTS: A Boy and His 'Bot!!

Viz: *5 issues + 2002 to date*

Medabots are robot kits with interchangeable parts that their owners use to stage ro-battles. Winners get the undamaged parts of the defeated. Like most manga, the point for Ikki Tenryou – the obligatory little kid protagonist – is to become the best and win all the bits there are. Shoddy duplication of the *Pokemon* fad, and just like it, adults haven't a hope in heck of understanding. You have been warned.~WW

MEDAL OF HONOR

Dark Horse: *1 Special 1994, 4 issues 1994-1995*

The series recounts the individual exploits of the people who've won the USA's highest military award, the Congressional Medal of Honor. Reducing the actions of extraordinarily brave people to a succession of dialogued panels has to be deftly handled to avoid cliché, and sometimes Doug Murray's scripts don't cope. That said, every issue contains at least one excellent tale, with the most poignant being those of Richard Bong (1) and the lost battalion (4). It was advertised as a 5 issue miniseries, but the fifth issue was never published.~FP

Recommended: 1, 3, 4

MEDIA STARR

Innovation: *3 issues 1989*

A creditable attempt at relaunching a romantic soap opera comic, with the twist of making the lead a female kick-boxer very much in the public eye. The writing just about works, although the targets are obvious, but the lack of professional polish to the art is a constant distraction.~WJ

MEEF

Print Mint: *2 issues 1972-1973*

More of Fred Schrier's extraordinary art coupled with his discursive ramblings about escaping beyond mundane reality. The strips are best experienced after copious ingestion of mind-expanding substances, presumably reflecting the conditions under which they were created. Even then don't expect a lot of sense. Schrier's regular co-conspirator Dave Sheridan is also on hand for the first issue with material in a very similar vein.~FP

MEGA-DRAGON AND TIGER

Image: *5 issues 1999**

In 2015 cruel President Bates rules an Earth where only one percent of the population survived a devastating meteor shower, living under his protective domes. Brain power is prized above all, and anyone not meeting standards is exiled. Two childhood friends develop opposing ideologies and warrior skills, and these issues are a prelude to the main action never seen in the USA. Tony Wong is the Stan Lee and Jack Kirby of Hong Kong rolled into one. His comics dominate the home market, and his is the only name credited apart from James Hudnall's English script, although others worked on the title. As with Kirby, ideas and action take priority, and forcing them in sometimes means storytelling sacrifices, but it provides for widescreen entertainment. The mixture of line art, computer colouring effects and assorted painting is odd, but martial arts movie fans should find plenty to enjoy here. The Comics One collection is the first volume of a proposed continuation.~FP

* Available in a collected edition

Cryptic Writings of MEGADETH

Chaos!: *4 issues 1997**

The lyrics of Megadeth songs adapted into comics. Given the puerile sixth form loner poetry of the source material, no-one not already a fan of the ban is going to venture in. Unbelievably, though, where something can be interpreted literally with lots of red ink, that's exactly the chosen route. Wretched.~WJ

MEGAHURTZ

Image: *3 issues 1997*

Any series that bills itself as "cutting-edge sci-fi" beneath the title is just begging for a kicking. No cliché is left unturned – bacterial warfare, cybernetics, virtual reality – in this perfectly pedestrian tale of a cyborg run amuck.~HS

MEGALITH

Continuity: *Series one 9 issues 1989-1992, series two 8 issues (0-7) 1993-1994*

The first run of Megalith differed from other Continuity titles by dint of its resolutely urban setting, concentrating on smaller issues like gang warfare, gun control and kidnap. Unfortunately, Peter Stone and Neal Adams' bombastic writing style totally scuppers every chance at credibility. Artistically Mark Texeira (1-3), Trevor Von Eeden (4, 5), Mike Netzer (6, 7), Dave Hoover (8) and Sal Velluto (9) acquit themselves well enough, with Texeira's fully painted job on 3 particularly noteworthy. 0-3 of the second series are portions of the 'Deathwatch 2000' story-line, of which we're still awaiting the concluding part, and 4-7 part of 'The Rise of Magic'. Far more significant is the work of Ernesto Infante, an artist as talented as he is shamefully unknown. Incoherent as the story is, issues 0, 1 and 3-6 are worth buying for his art alone.~DAR

Marvel Super-Heroes MEGAZINE

Marvel: *6 issues 1995*

The best of Marvel's 1980s output collected in a value-for-money package. In each issue there's Frank Miller *Daredevil* (159-164), John Byrne's *Fantastic Four* (232-237) and Hulk (314-319), and *Iron Man* by Michelinie and Layton (115-120). If you've not read the originals, this is worth a shot.~WJ

MEGATON MAN

Kitchen Sink: *10 issues 1984-1986, 3 issue miniseries ('The Return of') 1988, one-shot ('Meets the Uncategorizable X+ Thems') 1989*
Fiasco: *One-shot ('vs. Forbidden Frankenstein'), one-shot (0) 1996*
Image: *2 issue microseries ('Hardcopy') 1999, one-shot ('Bombshell') 1999*

Don Simpson's satirical and parodic *Megaton Man* is well sustained over ten issues, though the contents start to become what they're commenting on before too long, however funny they might be. Trent Phloog is secretly Megaton Man and meets the Megatropolis Quartet, who're soon down a member when the See-Thru Girl is liberated along with Trent's reporter partner Pamela Jointly (who used to fall off skyscrapers). The search for the Cosmic Cue Ball takes up most of what passes for plot, but the stories are none the less fun for all that. 6-10 contain the first episodes of Simpson's 'Border Worlds'. A less heavily rendered and more naturalistic style makes this a turning point in Simpson's artistic growth. It progressed to its own title after continuing in The Return of Megaton Man, in which, trying to retire, Megaton Man is reactivated by the government only to find himself thoroughly merchandised. In the meantime the See-Thru Girl is pregnant and her ex-boyfriend, Rex Rigid, has revived the Golden Age Megaton Man with a view to getting revenge on the current version. Tighter scripting and a plot help make this more consistent and entertaining than the previous series.

The Kitchen Sink one-shot introduces Ms Megaton Man (supposedly the result of a sexually transmittable mega-serum) during a battle against god of war Mars in the Collision of All Conceivable Comic Book Universes at Once Wars. 'Forbidden Frankenstein' is a meeting between Simpson's *Bizarre Heroes* characters and those from his Eros series, though they're played as 'straight' super characters. 0 is a sort of synopsis of everything that's gone before, and part of the continuing *Bizarre Heroes* storyline, which gets more and more complex and less like a parody the longer it continues. On the other hand, the ridiculous nature of the strip doesn't preclude a desire to see where on earth Simpson will take the series next. After 0 (also numbered as *Bizarre Heroes* 17), Simpson continued his series on the Internet. Ninety strips from 1996-1997 are printed in 'Hardcopy' with a few new pages in 2, which also features a guest appearance by Wolff and Byrd. The 'Bombshell' issue is new material, but the series then returns to cyberspace, though some strips are printed as backups in *Savage Dragon*.~NF

MEGAZZAR DUDE

Slave Labor: *One-shot 1991*

Spinning off from Andy Garcia's *Oblivion City*, this features a day in the life of that Metropolis' epileptic and hyperactive superhero. He endures a TV interview, a rival super hero's attempt to steal his job, a comic store signing, an assault by the villainous 'Toilet Duo' and the crazed attack of a mother who thinks he knocked up her daughter. Recommended

MEKANIX

Marvel: *6 issue miniseries 2002-2003*

Former X-Man Kitty Pryde is at college in Chicago, a city where anti-mutant sentiment runs high. Then there's the additional problem of the new mutating Sentinels paying a visit. Yes, Chris Claremont gets to run through anti-mutant hysteria as a plot yet again, although dealing with it in microcosm is effective. The major problem with the series is Celia Calle's hideous covers, which surely dissuaded many a prospective reader. That's a shame, because pencil artist Juan Bobillo makes a few mistakes, but has a broadly appealing style.~WJ

MELODY

Kitchen Sink: *10 issues 1988-1994*

The autobiographical stories of Sylvie Rancourt, and how she became a nude dancer under the name Melody. Initially from a small French Canadian rural community and living with her wastepail boyfriend Nick, Melody encounters hostility from all around for pursuing a sexually hedonistic lifestyle. Moving to Montreal, she finds it harder to make ends meet, and Nick's contribution is to suggest she takes a job in a strip bar. Sexual content is high, but as drawn by Jacques Boivin astonishingly unarousing and antiseptic for a comic salaciously cover-blurbed "The true story of a nude dancer". That being the apparent reason for publication, and characters other than Melody and Nick being largely ciphers, it makes for dull comics.~FP

Havok and Wolverine: MELTDOWN

Marvel/Epic: *4 issue miniseries 1988-1989**

Confused attempt to blend political intrigue with superheroics as the eponymous mutants, fall victim to a plan by insidious Soviets to recreate their previous success at

Chernobyl by sabotaging an Indian power plant. After 'killing' Wolverine with bubonic plague bullets, the Russians trick Havok into 'uncovering' the scheme, intending to use his powers to absorb the radioactive energy and redirect it into the mutant Meltdown. Grossly overwritten by Walter and Louise Simonson with muddled and inappropriate painted art by Jon J. Muth and Kent Williams, this takes nearly 200 pages to tell a twenty page plot, substituting ludicrous chase movie clichés and gratuitous violence for story content. For absolute die-hard fans only.~WW

MELTING POT

Kitchen Sink: *4 issues 1993-1994**

A harsh and brutal planet is populated with the worst specimens of assorted alien races. Daily survival is the best most can hope for, and the biggest and baddest rules the roost. Eric Talbot and Simon Bisley provide Corbenesque art over Kevin Eastman's script, but story content is slim.~WJ

MELVIN MONSTER

Dell: *10 issues 1965-1967*

In the town of Monsterville, Melvin, green-skinned and with a pointed head, lives with his Mummy (bandaged) and Baddy. In the garden, home to Cleopatra, a crocodile that tries to eat Melvin each issue, Baddy constructs various entertainments for Melvin, including a slide (into thorny bushes), a swimming pool (inhabited by a very large, and hungry, fish) and a sandbox (quicksand, that is). Melvin isn't quite the monster his parents want him to be; each issue he tries to enrol at Miss McGargoyle's school, but she's not ready to start accepting pupils after a lifetime's perfect record of non-attendance and does all she can to discourage him, including hiding the school building itself. Melvin also has difficulty with flowers (he's not supposed to like them, but builds himself a garden on the roof) and his best friend, the young witch, Little Horror, from whom he just about manages to hide his real feelings. With effortless cartooning, John Stanley has created some timeless tales that speak of alienation in a humorous manner without being preachy, and tell their jokes with perfect timing.~NF

MEMORIES

Marvel/Epic: *One-shot 1992*

One-shot publishing Otomo's first major story, a lyrical science-fiction thriller in which a crew investigating a derelict ship in the shape of a rose discover that it's filled with physical recreations of its dead mistress' memories, kept alive by the ship's computer. Simply drawn, but well plotted.~FJ

MEMORY MAN

Emergency Stop Press: *1 issue 1995, 5 issues 1995-1996*

Paul Rainey's downbeat, lugubrious story of the thirteen year old masked defender of Victoria City is one of the undiscovered gems of the short lived 1990's 'indie Brit' comics publishing flurry. Stephen Gore has access to all his ancestral memories, enabling him to do anything they could do, and possibly anything in the history of the human species. But you don't need to know that. What you do need to be told about is the skilful characterisation; Stephen, his family, school friends and enemies are all convincing characters you can empathise with. Their own eccentricities, longings and frustrations are laid bare, and it's shockingly appealing. The art, let's be truthful, is crude, and will deter many casual browsers. It's oddly appropriate, though, to the adventures of a superhero who shops at Netto and has to go home from patrol on the No. 7 bus. Very soon, you get used to it, and when a technically more accomplished artist helps out with part of 5, you balk at the 'improvement'. A unique take on the teen superhero story, and a genuine sardonic pleasure. The first issue 1 was a tryout, and successful enough for a rapid second issue 1.~HS

Recommended: 1, 1-5

MEN IN BLACK

Eternity: *3 issue miniseries 1990*, 3 issue miniseries 1991*

Three tales of the ultra-secret government agency dedicated to keeping us safe and ignorant. Lowell Cunningham's scripts are competent but any chance of tension is ruined by the pitiful artwork of Sandy Carruthers. Unlike the film, which is loosely based on issue 2 but played strictly for laughs, the stories are intended to be horror/action adventures with the two agents, dealing with drug cults, aliens and demons from Ouija boards. Cunningham and Carruthers return with another set of mysteries for the darkly sartorial non-Government non-agents in the second series. Seen it. Done it. Bought the tee-shirt.~WW

MEN IN BLACK: The Movie

Marvel: *One-shot 1997, one-shot ('Retribution') 1997*

So-so adaptation of the blockbuster movie. What was the point? Surely not just the money? 'Retribution' is yet another quick cash-in, this time spinning directly off from the movie adaptation and with that bimbo rather than Tommy Lee Jones sitting next to Will Smith.~WW

Golden Age MEN OF MYSTERY

AC: *36 issues + 1996 to date, one-shot ('Spotlight Special – The Nedor Heroes') 2001*

Reprints of 1940s material concentrating on superheroes and costumed crimefighters, but finding room occasionally for horror, science-fiction and westerns. Although a few people may still be able to enjoy the scripts taken at face value, most readers will perceive them ironically and take momentary fun from silly names and concepts: Golden Lad the battlin' junior antique dealer, Mr Scarlet and Pinky, a Batman and Robin rip-off, Dynamic Man Versus the Tangerine Terror (which given the rather straightforward plotting of the period could very well have been Earth menaced by giant citrus fruits) and The Fighting Yank against Chilli Con Carnage, the Mexican Commie bandit princess! They really don't make them like that anymore, and therein lies a lot of the charm. The other reason to pick these up is the artwork. There's something of note in each reprint but quality is often mixed and the last few issues show signs of severe barrel scraping. Editor Bill Black produces various themed issues with essays accompanying the strips (10 – at the movies, 12 – Quality Comics, 15 – Simon & Kirby, 19 – Space, 21 – Fawcett, 25 – Green (as in Lantern, Llama ,Mask), 33 – Patriotism inc The Eagle, The Dart and Ms Victory, 34 – Halloween). However be warned that in some there's more essay than reprint, and no Green Lantern in the Green special, no Captain Marvel in the Fawcett issue.

Particular high points are rough and ready Sekowsky Captain Flash strips in 1, 2, 4, 5, 8, 13, 22, 24, a bunch of good stuff from Will Eisner, Lou Fine, Jack Cole and C.C. Beck in 12, extremely loose and impressionistic art on Golden Lad by Mort Meskin in 3, Krigstein in 19 (which also has a colour section), Steve Ditko Mysterious Traveler stories in 31 and 34, and a gorgeous Reed Crandall pen and ink strip in issue 27. Black has the sense to recognise that even though its Foreign Legion theme is outside his remit it's a gem that needs to be treasured.~FJ

* Available in a collected edition

Penthouse MEN'S ADVENTURE COMIX

Penthouse International: *4 issues 1995*
General Media Communications: *3 issues (5-7) 1995-1996*

Encouraged by the success of *Penthouse Comix*, editor, George Caragonne, decided to launch this magazine as a return of the pulp adventure strip, but, naturally, adding a more sexual flavour, with all stories written by himself and Tom Thornton. Strips include Miss Adventure (1, 3-6) and Hericane (1-2, 4, 7), both superheroines spun off from strips in *Penthouse Comix*, drawn by the Marshall Rogers-like, Cary Polkovitz and Kevin Maguire respectively. 'Actions Figures' is more naked superheroines, by Jason Pearson (1-2, 4, 7) and Maguire (3), and there's western parody 'Slim & Nun' by Dan Barry (1-2, 4-6), 'Pirate Hearts' (2-3, 6-7) by Russ Heath, 'LA-X', by Les Edwards, which parodies TV shows like *Baywatch* (2) and *The X-Files* (4), and the *X-Files* derived 'Salem', by Doug Gregory (1, 4). With Caragonne's suicide, Dave Elliott became editor, and a few new strips and writers were introduced. Barry continued 'Slim & Nun', here and, later in *Penthouse Comix*, Jan Strnad and Heath completed 'Pirate Hearts', and Miss Adventure was left dangling by Keith Giffen. Buzz Dixon and Gray Morrow introduced 'Bill Shakespeare's Black Rogue' (5-7), and from a plot by Caragonne, Mike Collins and Alan Davis presented the science fiction 'Kraken's Wake' (7). On the whole, this was a fun, well presented series, full of varied, humorous, sexy tales.~NF

MEPHISTO

Marvel: *4 issue miniseries 1987*

The Marvel Universe's Satan-lite works his way through four superteams, the Fantastic Four, X-Factor, the Avengers and the X-Men, trading up souls. It's a pitifully laboured analogy to comic collecting, including "Mystic Mylar" bags in which to store his acquisitions.~HS

Mark Hazzard: MERC

Marvel: *12 issues, 1 Annual 1986-1987*

No, Mark Hazzard is not an expensive German car, he's a mercenary. The comic is eager to convince you he's also a modern-day saint: all those emerging alive from an encounter with Mr Hazzard thereafter give high priority to sitting around and telling each other how Mark changed their lives and saved their souls. It's all completely objectionable, and yet...there's always enough happening in each issue to make you pick up the next one. It's at its best with Peter David's writing (1-4), when there are fleeting moments of ambivalence, but once Doug Murray takes over from 5, it's full speed ahead for canonisation.~FC

MERCEDES

Angus: *15 issues 1995-1997**

Elements of these stories about a fearless psychic able to read the past by contacts with objects from it are very good indeed, not least the largely unsympathetic and surly title character. Mike Friedland's writing can veer into preaching at the drop of a hat, but these are three well constructed tales about the unsavoury aspects of humanity coupled with supernatural threats, occupying 1-4, 5-10, and 11-15. The art is more problematical. Although having the basis of a nice style, Grant Fuhst's misproportioned figures are all the more glaring in a conversation heavy comic and he doesn't help himself by rarely bothering with backgrounds to distract attention. His painted covers are his best work, imaginative and experimental, but as such more likely to repel than attract in the world of comics.~FP

The MERCENARY

Norma: *3 volumes 1984*
NBM: *Series one 3 volumes 1986, series two 8 volumes + 1988 to date*

Vicente Segrelles' long running and popular fantasy series doesn't fare well in its numerous English language incarnations. Although appearing all over Europe in serial magazine form or compilation albums and initially being well received in the pages of *Heavy Metal*, the actual volumes are ponderous and confusing. The original (Norma) volumes were English language run-ons, sloppily translated, of the Spanish editions with almost illegible lettering that floundered despite the worldwide fantasy boom. They were acquired by NBM, relettered, repackaged and re-released. Two years later they did it all over again, combining early volumes into bigger, longer adventures and having yet another shot at rescripting and relettering the fully painted artwork. Thus ' The Cult of the Sacred Fire' is combined with 'The Formula' and 'The Trials' now also encompasses 'The Sacrifice'. The continuing volumes are titled 'The Fortress', 'The Black Globe', 'The Voyage', 'Year 1000: The End of the World', 'Lost Civilisation', and 'Giants'. Although the illustration is lush and lavish - if perhaps somewhat static – the plots are bland to the point of tedium. They involve a soldier of fortune roaming a more or less mediaeval world on the back of a furry, flying bat-dragon, having adventures ranging from the metaphysical ('Cult of the Sacred Fire') to outright science fiction ('Year 1000: The End of the World'). There is never a sense of drama, threat to the central character or even the various clients or bystanders he encounters. Fantasy art lovers will swoon, but it feels like a waste of all those letterers' time.~WW

MERCHANTS OF DEATH

Eclipse: *4 issues 1988*

Magazine dedicated to adventure strips from Europe and America. Each issue features a colour episode of 'Soldier Of Fortune' by Grassi and Breccia. The stories are hard-hitting but not particularly outstanding, featuring a taciturn mercenary hero, and the awful colouring does not improve matters, but the pared-down artwork survives it. Less exciting is 'Ransom', an adventure story set in Europe, written by Kurt Busiek with art by Rick Howell and the young and rather rough Dan Brereton. You can see the bones of Brereton's style, but overall the art is rather chunky and clumsy. Ransom's a secret-agent type hired by a mysterious Rumanian to steal back a family heirloom. At least, that's what he's told. Rounding out the issues are shorter pieces written by Trillo and illustrated, in a fine line style, by José Luis Salinas, set during the American Civil War; and there's a French Foreign Legion strip, also by them.~FJ

MERIDIAN

CrossGen: *30 issues + 2000 to date*

Fantasy adventure spliced with social economics and political intrigue. The central story concentrates on privileged teenage Sephie, pitted against her Cadadorian Uncle Ilahn commanding the forces that occupy Meridian. Both fiefdoms are among several sky cities floating above a scorched planet, each sustained by specific trades. The backstory to the family conflict is revealed in *CrossGen Chronicles* 3, while the scenario is complicated by both Sephie and Ilahn having been bestowed with a prominent sigil endowing them with abilities they discover as the series progresses. It's seemingly CrossGen policy to keep the pot perpetually simmering, so writer Barbara Kesel provides few resolutions as she cranks up the pressure on Sephie for the first two dozen issues. This is not as frustrating as might be assumed. There is a wide cast, although some seem thus far to have little purpose, and elements of most issues are highly enjoyable. Sephie's visits to assorted societies are diverting and there are also some unexpected twists (7 has a shocker). Artistically the comic does initially suffer from the removal of first penciller Joshua Middleton's open art nouveau influenced style after 6. While not bad, replacement Steve McNiven's more traditional comic approach lacks the previous finesse to begin with, although he develops tremendously as the series progresses.

Just as repetition becomes a problem, things start building to a climax prompted by the well-conceived and horrifying events in 19. By this time one of the First has been dabbling, and 20 has a guest appearance from *Sigil*'s Samandahl Rey. Issues leading to a resolution to many of the main threads in 25 are very well worked, but the resolution brings its own problems, which predominate thereafter. As *Meridian* presents continuing chapters of a larger story, recommending any individual issue over another is problematical, although almost all should appeal to fantasy fans looking for a title with a strong leading lady. The title has a greater appeal to women than most comics, and perhaps the best place to start is with one of the collections through which all but the most recent issues are available.~WJ

Recommended: 23-26

MERLIN

Adventure: *6 issue miniseries 1990-1991*

A well-researched retelling of the early life of Merlin by R.A. Jones, hampered by lacklustre art. The series follows Merlin from his reconception to his first love and the eventual sacrifice he makes to gain his magical abilites.~WW

MERMAID

Viz: *Mermaid's Forest 4 issues 1994*, Mermaid's Scar 4 issues 1994*, Mermaid's Promise 4 issues 1994*, Mermaid's Dream 3 issues 1994-1995*, Mermaid's Gaze 4 issues 1995*, Mermaid's Mask 3 issues 1995**

Very dark and disturbing stories from Rumiko Takahashi, better known for her lighter material. Partaking of the flesh of a mermaid renders one both immortal and immune to harm. This is discovered the difficult way by Yuta, who's been around for centuries. Unfortunately it only works for a few, and a horrible demise awaits the failures, although there's no shortage of those willing to try. The mermaids aren't necessarily the glamorous and friendly sirens of myth either: they're altogether more unfriendly and vicious, particularly when it's apparent that their flesh is at stake.

Mermaid's Forest continues from material published in the manga magazine *Animerica* (incorporated in the collection) with Yuta having rescued Mana, a fellow-immortal raised in isolation by mermaids to become one of them. Separated from Mana, Yuta finds her again captured by two sisters, one of whom is also immortal, but at a price. The story delves deep into murky motivations, and ought to surprise with its conclusions. Unfortunately, with minimal changes, that's also the plot of *Mermaid's Promise*, and the impact is very much diminished by repetition. The intervening series, though, is another shocker, playing off the innocence of youth against the horrific consequences of consuming Mermaid's flesh. It's padded towards the end, with 3's *Home Alone* sequence jarring, but there's just enough momentum to see the story through.

Mermaid's Dream is two individual stories, with the better of them being 'The Ash Princess' in 2 and 3. It's a powerful and spooky tale of life, legend and trickery, and the best of the *Mermaid* canon. By the time of *Mermaid's Gaze* one begins to wonder just how many people aren't familiar with mermaids and their legend, as Yuta and Mana unerringly home in on those that are everywhere they visit. Containing the requisite mixture of threat and horror, it's functional, but familiarity dilutes the idea. *Mermaid's Mask*, though, is a partial return to form. Lacking the complexity of previous tales, and relying once again on childhood innocence as a counterpoint to grim events, it incorporates a resonant and gruesome streak of horror.

If there's a theme to *Mermaid* it's that immortality comes at a price, and those who lust after it rarely attain it in the form they desire. It also strays far from the whimsy and adventure so associated with Japanese comics, yet for all her individuality in approach, Takahashi is distressingly traditional when it comes to presenting role-models. The female Mana is always the abducted victim and the male Yuta her rescuer. Takahashi's delicate artwork is far removed from the cartoon exaggeration of Ranma$^{1/2}$, and if on occasion there's a little too much wide-eyed innocence it all serves to contrast the horror of the stories. Largely underrated, *Mermaid* is well worth anyone's time, and is particularly recommended to people not usually very keen on Japanese material. *The Mermaid's Scar* collection also takes in *Dream* and *Promise*, and *Gaze* additionally collects Mask.~WJ

Recommended: Mermaid's Forest 1-4, Mermaid's Scar 1, 2, Mermaid's Dream 2, 3

MERMAID

Alternative Comics: *One-shot 1998*

There's no middle ground regarding James Kochalka's work. His fans lap up the charming naivety, the molasses-like pace at which his stories unfold and general mood established. Everyone else shouts "King's new clothes", citing the general lack of plot or point and that even at an overly generous three panels to a page there's plenty of wasted space.~FP

MERTON OF THE MOVEMENT

Cocoanut Comics: *1 issue 1971*

Bobby London would later draw, and famously be sacked from, the *Popeye* newspaper strip, and turns out two one-pagers in the style E.C. Segar. For the title strip, though, he's aping George Herriman for a discursive romp about the hapless Merton, always overtaken by fate. London also provides an autobiographical strip detailing early career run-ins with counterculture magazines and their expectations of cartoonists. The issue is rounded out by Shary Flenniken's Trots and Bonnie, Ted Richards' Dopin' Dan, and Pollyanna Pals by Gary Hallgren, who delivers a very good Cliff Sterrett impersonation. Nice art, but not compulsive reading.~FP

THE MESSENGER

Image: *One-Shot 2000*

X-Files-flavoured hokum about a tortured, mind-reading vigilante who uses his powers to bump off unrepentant criminal scumbags. The first half originally appeared in *Action Planet Comics*, and Jerry Ordway undermines the appeal of his own traditional drawing style with some cloth-eared dialogue and ham-fisted plotting.~AL

META 4

First: *3 issues 1991*

Altogether lacklustre attempt at incorporating Fortean topics into comics. Stefan Petrucha would go on to write far better material along the same lines for *X-Files*, while artist Ian Gibson obviously couldn't give a toss.~WJ

The METABARONS

Humanoids: *17 issues 2000-2002, one-shot ('Alpha/Omega') 2002*

In the Metabunker, invincible fortress and sanctuary of the Metabaron, robots, Tonto and Lothar, discuss the tragic history of the Castakas family, which has resulted in the current baron being unnamed. Alexandro Jodorowsky here supplies background on the character that first appeared in his and Moebius' *Incal*. With characteristic invention, Jodorowsky tells a complex science fiction saga that spans generations, exploring the lives and loves of the various Metabarons, as well as various cosmic upheavals and genetic advances. These ensure regular changes in the universe and even in the nature of his characters. Juan Gimenez' artwork captures the scale, loneliness and grandeur of Jodorowsky's script, though the storytelling can seem detached. 'Alpha/Omega' contains several short stories, including the origin of the Metabarons' tattoo and some pages left out of 1 for continuity reasons (both by Gimenez). There is also a story, drawn by Moebius, from the original version of the *Incal* and a preview of forthcoming adventures of the current Metabaron by Jodorowsky and Travis Charest. There are three collections reprinting 1-14.~NF

METACOPS

Monster: *3 issue miniseries 1991*

Historical characters like The Queen of Sheba, Jimi Hendrix and Albert Einstein didn't die, they were recruited into a time-travelling police force. Humorously re-creating and distorting the past, *Metacops* is just a bit of fun with history. Unfortunately it's rather wordy (courtesy of Link Yaco) and the artwork (by John Heebink) is both fussy and unappealing.~NF

METAL GUARDIAN FAUST

Viz: *8 issue limited series 1997**

Little girl Rushiha is just learning to cope after the loss of her father, Saburoh, when she is attacked by killer robots and saved by another robot, Mr Faust, who appoints himself bodyguard to her and her widowed mother, Mitsuko. But as the attacks escalate, Mitsuko begins to suspect that Faust is much more than it seems. Intriguing if predictable manga from Tetsuo Ueyama.~WW

METAL HURLANT

Humanoids: *3 issues + 2002 to date*

When introduced in France in 1975 Humanoids' *Metal Hurlant* changed the face of European comics with stunning art breaking away from the ligne claire style in mode for decades. The ripples reached across the Atlantic when *Heavy Metal* appeared, supplementing strips licensed from France with similarly well illustrated material from homegrown creators. While not quite as influential, the irony is that the imitator has so far outlasted the original by fifteen years. Humanoids Publishing survived if their flagship did not, and we now have a new international publication. It follows the *Heavy Metal* template, and although comic-sized, is more lavishly produced. Encouragingly, while to date there's nothing astonishing, the art is excellent and the "Where's the story?" syndrome is so far avoided, mixing writers best known for American work (Kurt Busiek, Geoff Johns) with European artists. The primary writer is Jodorowsky, equally capable of mystical rubbish and banal throwaways, yet with a prodigious imagination exemplified by 'Megalex', serialised in parsimonious chunks each issue. It's the story of an anomaly in a well-conceived controlled society, illustrated by Fred Beltran, who makes far better use of computer elements than anything previously seen in the USA for a spectacular visual treat. Contrasting the illustrative art, every issue also presents the lovely, simple cartooning of Pierre Wazem. Unfortunately he doesn't have much to say, unlike Jean-Pierre Dionnet, a founder of the magazine, whose endearing ramblings on popular culture run from 3. So far, a case of watch this space.~FP

METAL MEN

DC: *56 issues 1963-1970 (1-41), 1973 (42-44), 1976-1978 (45-56), 4 issue miniseries 1993-1994*

One of DC's most endearing creations, the Metal Men were introduced via four try-out strips in *Showcase* 37-40, before being granted their own series. Government scientist, pipe-smoking and orange-checked-jacket-wearing Dr Will Magnus manufactures a bunch of robots each with the ability to mimic the chemical properties of the metal they were constructed from. All were also implanted with a "responsometer", enabling them to have human characteristics to complement their respective metals. Gold, the dependable leader of the gang, can stretch himself for miles, the hot-tempered Mercury can melt himself at room temperature and the female Platinum, nick-named Tina, proves tough and resilient. The stocky and dense Lead always acts as a good barrier, especially against radiation, while Iron is the strong-man of the team, and the flexible and stuttering Tin the weak spot.

Creator Robert Kanigher worked in perfect harmony with artists Ross Andru and Mike Espisito to produce some wonderful light-hearted tales. Most Metal Men adventures dealt with other robotic adversaries: there were robot amazons, spider-robots, robot dinosaurs, etc., and then there were foes made from plastic: Plastic Perils, The Gas Gang (belch), not forgetting the giant chemical creature, Chemo. And we mustn't forget the other elemental robotic creations – Barium, Zirconium, Sodium, Osmium, Gallium, Iridium and the like. Who says comics aren't educational? Chemistry lessons in school would've been a lot more fun if *Metal Men* had been part of the curriculum!

The adversaries played their part, but the core of the series was the interaction between the group, all of whom were disturbingly human. Platinum was in love with Doc Magnus, while poor Tin often felt out of things, so even invented his own stuttering girl-friend, Nameless, who shared some of his abilities. On the downside, the formula plots, charming as they were, ensured a predictability. This slowly began to change with 29, when the creative team of Otto Binder and Gil Kane arrived. Things took a further step up when Mike Sekowsky took over the art with 33, and Kanigher returned to write. In an obvious attempt at stopping declining sales *Metal Men* was given a new direction. Sekowsky continued the plot when he also became writer with 37, his first act being to put the Metal Men on trial and have them destroyed. During this time Doc Magnus was in a coma, and the team are rescued by the mysterious Mister Conan in 37, a billionaire who wants to use his wealth to combat chaos around the world. In order for the Metal Men to act successfully and covertly they're given human disguises. Gold becomes Guy Giden, a philanthropist and Wall Street genius; Platinum becomes Tina Platt, a beautiful model; Lead and Tin become Ledby Hand and Tinker, a singing sensation; Mercury becomes the red-haired, red-bearded, temperamental artist and sculptor, Mercurio; and Iron becomes successful construction engineer Jon 'Iron' Mann. Don't you just love Sekowsky's sense of humour? Oddly, though, there was nothing humorous about this group. *Metal Men* was now played straight, and it worked. The issues concluding the first run came to a head with Doc Magnus coming out of his coma, but with a decidedly different personality. He's now a would-be despot, constructing robots to take over the world, which forces his original creations into conflict with him. Sadly, this interesting plot was never concluded, as the axe fell.

The title returned in 1973 featuring reprints to see if the group had any pulling power. Apparently not, but they were revived in *The Brave and the Bold* 103 in their original robot bodies, and would return a number of times to team with Batman before their title picked up again with new stories from 45. Writers Steve Gerber and Gerry Conway kicked off proceedings with the excellent stylised art of Walt Simonson, and Doc Magnus regains his sanity. Slightly wackier stories emerge from the mind of Martin Pasko (52's 'Dr Strangelove and the Brain Children' is a good example), but artist Joe Staton fails to impress as much as Simonson, despite his cartoony style. Conway returns for the last three issues and once more tries to humanise the team, but it proves a failure.

Besides the occasional guest appearance not a lot was heard from the Metal Men until the 1993s miniseries. Without giving the plot away, let's just say the Metal Men were far more than they seemed to be, as were their alleged 'responsometer'-granted personalities. Mike Carlin's plot added considerable depth to the Metal Men's origins and characters. Artists Dan Jurgens and Brett Breeding held their end up, and the miniseries was the most enjoyable run since the Mike Sekowsky stories.~HY

Recommended: 6, 10, 13, 21, 31-33, 37-41, 45-47, miniseries 1-4

METAMORPHO, The Element Man

DC: *17 issues 1965-1968, 4 issue miniseries 1993*

After trying out in *The Brave and the Bold* 57-58, Metamorpho moved into his own title, a fine, light-hearted, inventive and somewhat tongue-in-cheek series written by Bob Haney and originally drawn by Ramona Fradon. An ancient artefact changed Rex Mason into Metamorpho, a striking but freakish-looking character able to transform his body into any element or structure. Along with some adversaries of decidedly bizarre appearance, the series featured a great supporting cast. Sapphire Stagg was Metamorpho's naïve, poor-little-rich girlfriend; Simon Stagg her wealthy, scheming father who tried to use Metamorpho for his own purposes; Java a stone-age man restored to life by Stagg and also in love with Sapphire; and there was Metamorpho's female counterpart and other 'romantic' interest, the beautiful green-haired Urania, the Element Girl. This entertaining series was unfortunately cancelled halfway through a story. Metamorpho popped up some years later as a back-up in *Action Comics* (413-418) and World's Finest (218-220) and was a regular in *Batman and the Outsiders* and later *Justice League Europe*, but it wasn't until 1993 that he was given another title. Scripter Mark Waid continued the saga well, though he concentrated on the darker elements (no pun intended) of the turbulent relationships between the major characters, with plenty of surprises. Alas, no Element Girl. Her final fate was revealed in *Sandman* 20.~HY

Norm Breyfogle's METAPHYSIQUE

Eclipse: *2 issues 1992*
Bravura: *6 issues 1995*

The Eclipse issues prove that Norm Breyfogle can turn out nicely drawn *House of Mystery*- style stories with the best of them. The Bravura series is an entirely different kettle of fish. A group of people continually plagued by deeply disturbing nightmares are to participate in a project exploring their dreams, only all is not what it seems. The story plays with the mystique of dreaming, uniting the experience with virtual reality, setting up an interesting scenario amid a plethora of contrived buzzwords, with the mysterious vanished superhero Metaphysique apparently at the centre. Sadly, though, Breyfogle cops out and we're left with an interesting, but fatally flawed, superhero title.~WJ

METEOR MAN

Marvel: *One-shot, 6 issues 1993-1994*

Feeble follow-up to Robert Townsend's movie, transforming Meteor Man into a typical angst-ridden, self-doubting, Marvel-style superhero. The preceding one-shot is a dashed-off movie adaptation.~FP

METROPOL

Marvel/Epic: *Series one 12 issues 1991-1992, series two 3 issues 1992*

Although some readers may find Ted McKeever's religious allegory *Metropol* perplexing, take heart from the fact that it is considerably less obtuse than his previous series *Transit* and *Eddy Current*. Characters from *Eddy Current* turn up throughout *Metropol*, and Transit's storyline is concluded there. McKeever depicts the transformation of a grim, ugly city whose inhabitants have lost faith in themselves into a primeval battleground for angels and devils. As a plague rips through the populace some individuals find themselves reborn as angels, and others as devils. Unfortunately there are 80,000 demons, and only five angels to protect the remaining humans. McKeever writes, pencils, inks and colours all issues (except for the Eddy Current back-up strip in 9-11, drawn by Mike Mignola), allowing him very close control of the look of the book. His style here is more blocky and powerful than earlier, very confidently inked with flowing, heavy lines. His colouring is excellent; flat colours slightly dulled with black are used to suggest an environment that is dirty at the edges.

In the second series, titled *Metropol AD*, a year and a half has passed since the demons overran the city, one of the angels has given birth (!) and the few surviving humans are planning to try to break through the wall which was erected around the city in the first days of the plague to contain the contagion. Also, the angels are beginning to show dangerous signs of human weakness. *Metropol* is an extraordinary piece of symbolic writing in which Milton meets Kafka, built up from short, seemingly unrelated incidents, dream fragments and visions.~FJ

METROPOLIS S.C.U.

DC: *4 issue miniseries 1994-1995*

An intelligent and entertaining use of supporting characters from *Superman*. Lois Lane joins the Special Crimes Unit, the team that deals with Metropolis' supercriminals, to investigate the death of an officer. Maggie Sawyer, commander of the S.C.U., is having increasing trouble separating her personal and professional lives, a situation exacerbated by the fact that her girlfriend Tobie, also a journalist, is jealous of Lane's access to the S.C.U. Throw in Maggie's ex-husband and a crazed eco-hermit and you've got a thoroughly readable miniseries, courtesy of Cindy Goff and artist Pete Krause.~HS

Recommended: 1-4

MEZZ: Galactic Tour 2494

Dark Horse: *One-shot 1994*

This spin-off from *Nexus* features the most popular band in that universe as they gig around the galaxy and discover that there has never in all of space and time been a fair and honest manager. Legally swindled out of their own names and appearances, they strike back by becoming the support band for their replacements. Mayhem and carnage abound, but it's by no means the best work from writer Mike Baron, and artist Mike Vosburg is workman like but lacks the polished whimsy of Steve Rude. For dedicated fans only.~WW

MIAMI MICE

Rip-Off: *4 issues 1986-1987*

If you're busting a gut laughing at the idea of a rodent-infested TV parody this is the comic for you. And if you're a *Cerebus* completist you'll have to pick up the fourth issue.~WJ

The New Crime Files of MICHAEL MAUSER, Private Eye

Apple: *1 issue 1992*

From the pages of *E-Man* comes Michael Mauser, a rat-faced private detective with a mauser gun. This was the first full-length story after he'd appeared as back-up in Charlton's *Vengeance Squad* and made guest appearances in E-Man. Scripted and drawn by co-creators Nicola Cuti and Joe Staton, this one-shot, in the tradition of Mike Hammer, concerns Mauser's attempt to find a serial killer who may or may not be himself. Staton's art looks great in black and white.~NF

MICHAEL MOORCOCK'S MULTIVERSE

DC/Helix: *12 issues 1997-1998**

As long ago as 1962 noted English author Michael Moorcock came up with the idea for the Multiverse as "a quasi-infinite series of worlds, each a fraction different from the next". This series, containing three different, but quasi-related serials, marks the concept's first extended outing in comic form. The lead strip, 'Moonbeams and Roses', features characters adapted by Moorcock from his 'Second Ether' trilogy of novels, published a few years prior to the comic, and is exquisitely drawn by the ever-modern Walt Simonson. Unfortunately it's also written in such a baffling, clever-clever style that the task of extracting any kind of sense or meaning from the narrative could well prove impossible for readers not already well-schooled in the author's obscure 'universe'. There's a lot of wearisome sci-fi argot, interdimensional tomfoolery and weird cosmic barges, anyway. 'Metatemporal Detective', is a much more straightforward Victorian detective pastiche, badly let down on this occasion by Mark Reeve's crude artwork. The third and final strip gives us a new, slightly dull adventure involving Moorcock's most famous fantasy character, the albino warrior Elric, rendered on this occasion by the ever-reliable John Ridgway. In the final issue, the storylines are to some extent intertwined and resolved in a full length tale by Moorcock and Simonson, who turn up themselves for a gratuitously postmodern cameo appearance. This air of self-congratulatory insiderdom and faux-hipsterness rather infects the whole comic. This makes it difficult to share an opinion in the letter column of 9, that Multiverse "...may turn out to be the best comic series ever published in the mainstream, perhaps anywhere", although such a quote does perhaps indicate the polarity of opinion on this particular title.~AL

---

* Available in a collected edition

MICKEY AND DONALD

Gladstone: *18 issues 1988-1990*

As you would expect from a Gladstone title, Carl Barks is represented in each issue, mostly by stories reprinted from *Walt Disney's Comics and Stories*, though he also illustrates Mickey Mouse in 17. With the *Mickey Mouse* title reprinting Floyd Gottfredson's *Mickey Mouse* newspaper strip, this title offered an outlet for later Mouse artists, Bill Wright (1, 5, 9-11, 15), Jack Bradbury (2, 3, 11, 13, 14), Romano Scarpa (6-8) and Paul Murry (1, 12, 17). Of these, Scarpa's 'The Blot's Double Mystery' is an excellent Phantom Blot story. Gottfredson is also represented with 'The Man of Tomorrow' (3, 4), 'The Santa Claus Bandit' (13) and 'The House of Mystery' (18), as well as by various one- and two-page gag strips. William Van Horn (2, 9, 17), Daan Jippes (2, 5) and Don Rosa (1, 17) contribute good examples of their work but they are really quite slight strips.~NF

Recommended: 3, 4, 6-8, 13, 17, 18

MICKEY MANTLE

Magnum: *2 issues 1991-1992*

A decent biography of the Mick's early years in 1, with 2 devoted to the 1951 World Series and the 1952 season. The real treat, though, is the charming sight of Joe Sinnott's pencils, rarely seen since, well, Mantle retired in the early 1960s. Equally good back-up strips focus on lesser known major league players, inked by Sinnott and pencilled by Joe Orsak, and for a snigger don't miss the publisher's gushing first issue introduction. This is of possibly restricted interest to fans of Sinnott and baseball, but wholeheartedly recommended to them.~FP

MICKEY MOUSE ADVENTURES

Disney: *18 issues 1990-1991*

This is well-produced material that will entertain young children, but it only once takes that leap up into the best Disney material. The exception is 10, with Bill Wright's adaptation of a Floyd Gottfredson story 'The Sky Adventure', reprinted from *Mickey Mouse* 105. A coloured version of the original later appears in *Walt Disney's Comics and Stories* 583. For the sake of space Wright makes a few changes, but the sense of wonder and danger shines through Gottfredson's plot about a genius scientist and the attempts to possess his inventions. It's also the exception to the general formula of two or three adventures per issue. From the better-known names involved, there's good art from Stephen De Stefano in 1, 2, 7-9, and 11, the latter mistakenly credited to Mike Royer, who pencils 12-14, a John Byrne cover on 8, stories from Michael Gilbert in 1-4, and Marv Wolfman in many issues between 5 and 14. 16 has rare latter-day art from John Costanza, better known for his lettering, on a story written by Kurt Busiek. Overall, though, unexceptional.~WJ

MICKEY RAT

LA Comics: *1 issue 1971*
Kitchen Sink: *1 issue (2) 1972*
Last Gasp: *2 issues (3-4) 1980-1982*

Mickey Rat was Robert Armstrong's amoral, beer-swilling antihero whose adventures comprised the bulk of the issues. The first two are entertaining enough, though lacking in focus, but by 3 Armstrong had matured into a fine satirist and the writing is much sharper. Mickey Rat's exploits are utterly reprehensible, but thoroughly compelling at the same time, never more so than when shared with the Couch Potatoes. This TV-addicted group of losers proved popular enough for their own feature in 4, and *The Official Couch Potato Handbook* was published in 1983. Another back-up strip, the jazz-based Dizzy Ratstein, never quite comes to life, but overall the last two issues make fine reading.~DAR

Recommended: 3, 4

M.I.C.R.A.

Comics Interview: *6 issues 1986-1987*

The acronymically titled Mind Controlled Remote Automaton is experimental technology used by a woman paralysed in a terrorist attack. It's initially designed merely as a form of mobility for her, but she's gradually applied as a weapon, and manipulated by army officers keen to learn the technology. Manga-influenced long before it was common in the USA, M.I.C.R.A. was a decent blend of mystery, action and soap opera, that started well and improved. The premature cancellation was a shame.~FP

MICROBOTS

Gold Key: *1 issue 1971*

Jeff Micron emerges from cryogenic freezing to a new world, accompanied by miniature indestructible working robots allegedly designed by his father. This being the days before video and toy tie-ins, they actually look like they were designed by a three-year-old with building bricks. Dull.~FP

MICRONAUTS

Marvel: *Series one 59 issues, 2 Annuals 1979-1984, series two ('The New Voyages') 20 issues 1984-1986*

The Micronauts were a curious set of toys to give to small children, including as they did human/animal hybrids, a race of insectivoid hominids and all sorts of other strange figures. And those were just the good guys. In a superpowered take on Land of the Giants a group of royal rebels from various planets in the Microverse escape into our huge universe and then discover they're trapped. Back on their own plane the evil Baron Karza takes over planet after planet, filling them with his evil bodybanks, where he grows hideous, mutated dog soldiers.

For a comic based around a set of toys, *The Micronauts* wasn't bad. Possibly inspired by the art of the then unknown Michael Golden, his drawing heavily influenced by Berni Wrightson, on the first dozen issues, Bill Mantlo turned in the finest scripts of his career, quickly establishing the scenario and putting in plenty of excitement. The characters are visually striking but their characterisation remained vague and shifted to suit the plot. Bug, the insectivoid member of the team, has a speech impediment in place of a character, and most of the others aren't much better. Later inclusions to the line included Devil, a big red hairy alien, and in the second series Hunter, a big knobbly alien. Things would no doubt have been better if most of the villains weren't lumpen plastic things created by toy designers rather than writers. Since the bodybanks could turn out all sorts of mutations, ludicrous villains that matched each hero were the constant order of the day. And for some reason, instead of swapping and fighting menaces not specifically grown to neutralise their power, the Micronauts duly took them on in order.

The origin of the Microverse is revealed in 35 as being the creation of a race of various aliens who'd banded together to seek sanctuary, and in the process of creating the microscopic universe had also imprisoned the demons then ruling Earth. Once the team are back there the series builds to an epic climax as the Micronauts' leader, Commander Rann, attains god-like powers along with his arch-enemy, but rejects them. Rann is a rather pompous philosopher, who tends to spend a lot of the series deep in thought, in trances, or floating around in space capsules doing cosmic things. At one point he even joins spirits with Dr Strange to become Captain Universe! Mantlo has great fun with the fact that he never seems to notice his mate, Princess Marionette (those names, huh?), being seduced left right and centre by his friends.

'The New Voyages' carried on where the first series left off. One suspects Marvel were hoping to refresh the book's audience by offering a new first issue, but the plots are very similar, with the war still raging, and the Micronauts continually having problems staying in their universe. Peter Gillis' scripts are not particularly inspired. He has the Micronauts irradiated inside a giant insect, visiting their various home planets – to find their friends too busy fighting local wars to help in the coming struggle – and trying to come to terms with the mysterious Scion. He pops up out of nowhere, claims their leadership and appears to be willing to die to get them back through the space-wall into the Microverse. Kelley Jones' art was undeveloped, although by comparison to some of the later 'creators' let loose on the first run he's a definite improvement. There were artists of note in the first series (Howard Chaykin from 13-18 and a hurried Gil Kane), but there was also the likes of Danny Bulanadi to come to terms with.

The *Micronauts Special Edition* simply reprinted 1-12 of the original series.~FJ

Recommended: Series one 1-12

MICRONAUTS

Image: *4 issues + 2002 to date*

Puzzling relaunch of the toy tie-in title. While Acroyear and Karza are present and correct in their opposing roles, and Biotron is around, it's otherwise largely a new bunch of characters with the focus on Earthman Ryan Archer. He's transported to the Microverse, where his skin pigment mysteriously changes from pink to brown, and he rapidly learns how things are. The strangest aspect so far is that what made the Micronauts unique, their status as minuscule warriors on Earth, has so far been ignored, making this just another space fantasy.~WJ

MIDDLE CLASS FANTASIES

Cartoonists Co-Op: *1 issue 1973*
Keith Green: *1 issue (2) 1976*

The cover illustrations display Jerry Lane's clean art style, which masks a quirky mind very much rooted in the past. The exception is his 'Frogman' strip in both issues, which would have been very much at home in early 1980s issues of *Heavy Metal* with the silent frogman of the title floating through the air and the issues. 1 also has a long Marx Brothers homage and a bizarre George Reeves story, while the meat of 2 is provided by a prom night story set in the 1960s and a funny animal western. Lane's strips' reliance on cultural touchstones should provide an appeal beyond a lot of underground titles, but be warned the come hither title hardly reflects the content.~FP

MIDNIGHT EYE

Viz: *6 issues 1991-1992**

Set in the technologically advanced future so ubiquitous in Japanese comics, the Midnight Eye is Gokü, whose right eye has been replaced with a device permitting him to interface with any computer in the world. A Japanese take on the hard-boiled detective, with stories named after the featured female lead, it's a well drawn title, but ultimately unmemorable.~FP

MIDNIGHT MASS

DC/Vertigo: *8 issue limited series 2002-2003*

Adam and Julia Kadmon are celebrity paranormal investigators. A clash with monster Magellan goes badly, leading to their hiring an assistant, Jenny (1-3). An artefact collector, Harmon, diverts the Kadmons with the Four Sisters while he tries to loot the vault in their house (4-6) and Jenny's own mysterious link to the supernatural is revealed (7-8). Writer, John Rozum, concentrates on the emotions of his characters. There's the obvious affection between Adam and Julia as well as their bickering over the divisions of labour, and the experiences of Jenny in a strange, new environment, but little sense of anything happening in eight issues. Jesus Saiz' artwork can be quite stylish despite the occasional lack of detail and inconsistency in his normally realistic approach.~NF

MIDNIGHT MEN

Marvel/Epic: *4 issue miniseries 1993*

Very familiar territory indeed for creator Howard Chaykin as his square-jawed, fallible hero Barnett Pasternack discovers he's inherited a role as the latest of a long line of protectors of Hollywood throughout the century. There's also a nutter on the loose slicing out thyroid glands, and tied in with a rich businessman. It's sharply observed, well plotted, tautly dialogued with added quirky bits and somewhat sketchily illustrated, but one gets the impression Chaykin can knock this stuff out in his sleep by now. It's about time he changed his tune, and it's about time the rest of the comics industry caught up.~WJ

MIDNIGHT MYSTERY

ACG: *7 issues 1961*

This is a science-fiction and supernatural themed anthology. None of the stories are exactly strong, but they have more humour than most of their kind. The best is 'Spacemen against the Supernatural' (2), featuring a man with no grasp of science who makes inventions by bolting things together any old how, and doesn't realise that they only work because of the magic charm he inherited from his uncle. His shining self-confidence is nicely handled. And there's 'Clem Never Does Anything Big' (6), which pits a Kentucky hillbilly against an alien invasion. Don't devote any time to finding them, but skim through them if they come your way.~FC

MIDNIGHT NATION

Image/Top Cow/Joe's Comics: *12 issue limited series 2000-2002*

"I'm your guide. Until they find you. Until they kill you. Or until you turn. Which is when I'll kill you." These words are spoken by the enigmatic Laurel to Homicide Detective David Gray after he awakens from an attack by a strange, inhuman creature. He has entered a twilight world. Everything looks much the same, at least at first, but he can neither communicate with most people, nor touch most objects. He has crossed the threshold to the place in between; the repository of the dispossessed, the homeless, the abandoned, the lost, coexisting with, but invisible to, the everyday world. Gray's fate, however, is worse than theirs as his soul has been stolen, and the only way to retrieve it is to walk across the country, from Los Angeles to New York, to reclaim it. If he fails, or if he doesn't get there in time, he becomes one of the inhuman, sadistic creatures that attacked him, and who continue to pursue and harass himself and Laurel on their journey. J. Michael Straczynski's plot contains few actual surprises, but the journey is an absorbing and compelling one, not only because of Laurel and Gray's burgeoning relationship, but because of the individuals they encounter along the way. Straczynski's deft touch with dialogue generates empathy for the characters, and Gary Frank's illustrations present the protagonists as attractive (but not implausibly so) people who are materially affected by their ordeal. A satisfactory and thought-provoking read.~HS.

Recommended: 1-12

MIDNIGHT PANTHER

CPM: *12 issue limited series 1997-1998, 5 issue miniseries ('School Daze') 1998, 5 issue miniseries ('Feudal Fantasy') 1998-1999, One-shot ('Breaking up is Hard to Do') 1999*

Kei, Lou and Sonya are the Pussycats, a popular idol group, but also shape-shifting assassins. The first series establishes their backgrounds, explains the attempt to kill King Bad, Lou's brother, and introduces their travelling companions, Father Adam (also known as Sid) and a demon panther, Kei's lover. In 'School Daze', they're hired to rid an all-girls school of a dream demon that gives the students horny fantasies, by Reika, who happens to kill any man she finds on the grounds. 'Feudal Fantasy' sees the Pussycats betrayed after accepting an assignment to kill on behalf of a magistrate. When several are jailed, the others must rescue them. The one-shot features a dragon, but is really about establishing that all the girls have boyfriends. Yu Asagiri's comedy adventure has a romantic heart, quickly moving away from the less moral aspects of their profession, but taking every opportunity to expose the flesh of her nubile characters. The artwork is accomplished, but the whole just never really seizes the reader's attention.~NF

---

* Available in a collected edition

MIDNIGHT SONS Unlimited

Marvel: *9 issues 1993-1994*

Midnight Sons was the collective name applied to Marvel's supernatural and horror characters in the early 1990s, and this oversized title featured all of them either teamed or in individual stories with framing sequences. Despite the use of some popular creators, the content hardly rises above bland, and only 7 possesses any spark, featuring the return of Brother Voodoo in a touching tale. 9's story of the Blazing Skull provides welcome relief from the unrelenting grim earnestness to most of the material, which is rarely leavened by any humour. Should you care, the crossover 'Siege of Darkness' story concludes in 4.~WJ

MIDNIGHT SURFER

Quality: *One-shot 1986*

Very sympathetic re-jigging permitted a Cam Kennedy story drawn for a different page-size and spread over several short episodes to be presented in a single American-sized comic in seamless fashion. Although nominally a Judge Dredd story, writer John Wagner, as ever, is more interested in the supporting characters and their escapades, and Chopper is the star of the show. He's a participant in the illegal sky-surfing world championship which is occurring in Dredd's Mega-City One, and as well as completing a difficult course he must evade the Judges attempting to bring him down. There's very little plot, but this is strangely poetic for a Judge Dredd story, and Wagner was to return to the theme several times afterwards.~FP

MIDNIGHT TALES

Charlton: *18 issues 1972-1976*

One of Charlton's innumerable horror titles, this was as anaemic as its companions, although occasionally enlivened by some nice art. Each cover and much of the contents were provided by notorious Wally Wood imitator Wayne Howard, though Tom Sutton and Joe Staton were usually also present. The most notable artist to contribute was Don Newton, whose art in 11-14 is quite gorgeous.~DAR

Milton Knight's MIDNITE The Rebel Skunk

Blackthorne: *2 issues 1986-1987*

Milton Knight brings the madcap world of 1920s animation to comics with his stories of a female skunk protector of the good. Knight's art leaps off the page, and in 2 he draws a testosterone factory of a superhero, but once you've got past how stunning the art is, there's very little else to his tales of the glamorous sex-bomb skunk.~WJ

MIGHTY BOMB

Antarctic: *1 issue 1997*

Thoroughly likeable superhero pastiche in the manner of old Hanna-Barbera cartoons. The Mighty Bomb is a third generation superhero prone to winning his battles the simple old-fashioned way: by throwing grenades at his enemies. In between he has to listen to lectures from his grandfather, World War II's Blue Bomber, and cope with his daily job as a dustman. It's silly and it's fun.~FP

THE MIGHTY BOMBSHELLS

Antarctic: *2 issues 1993*

Manga superheroics as the men of superhero team The Vanguards are enslaved by the alien Queen, Xeblezweita Sondum, and it's left to a group of female heroes from around the world (Red Dragon, Fireball, Blitzkrieg, Cherry Blossom, Dynamite Girl and Ms Liberty), to save the day. Yujin Ishikawa's artwork is similar to that of John Byrne, and he writes with some humour, but there's not enough here to establish any rapport with the characters.~NF

MIGHTY CARTOON HEROES

Karl Art: *1 issue (0) 1996*

The daft anthropomorphic antics of 1970s Hanna-Barbera cartoons are a major influence here, although labelling the strips 'Cartoon Heroes' when they've not been animated is deceitful. There was no expense spared from having Jack Davis and Al Jaffee provide cover illustrations, to the lush paper stock. Unfortunately it was all wasted on comics squarely aimed at the junior end of the market, and therefore better priced at below a dollar than $2.95. The content is also odd, with a long prequel to the Space Bananas squeezing Chameleon Kat into a few pages and restricting the cover featured Aquahounds to a page of sketches. An interesting failure.~FP

MIGHTY COMICS PRESENTS

Mighty Comics: *11 issues (40-50) 1966-1967*

Archie's attempts to emulate Marvel moved into high gear as they cancelled *Fly-Man*, but continued the numbering with a changed title to feature revivals of a whole host of obscure 1940s superheroes. Back came the Black Hood, The Fox, The Shield, Steel Sterling, The Web and several more, each of them with a personality interchangeable with the others, being fast-mouthed crime-fighting athletes. The appalling art (take a bow, Paul Reinman), ludicrously contrived plots and camp dialogue make for a chucklesome read at the comics rather than with them, and the only strip displaying a modicum of genuine humour is the Web (in 40, 43, 45, 46 and 50). The camp superheroics are present in full quantity, but the scenes of the superhero returning home to be henpecked by his wife and having to dodge the mailman on his way out to fight crime have an acceptable slapstick quality. Overall the run isn't quite as preposterous as the Mighty Comics' stab at the Mighty Crusaders, but there's plenty of cheap laughs to be had.~WJ

THE MIGHTY CRUSADERS

Mighty Comics: *7 issues 1965-1966*

The Mighty Crusaders was an unashamed attempt to cash in on the twin successes of Marvel's superheroes and the Adam West Batman. Superman creator Jerry Siegel gathered together Archie Comics' superheroes Fly Man, Fly Girl, The Shield, The Black Hood and The Comet for this bizarre version of a superteam comic. Siegel and 'artist' Paul Reinman may well have been sending up Stan Lee's bickering, neurotic loser heroes, but their attempts to be swinging and camp are pitifully middle-aged and ungroovy. Not that this stops *The Mighty Crusaders* from being a wonderfully dopey piece of 1960s kitsch. Who could resist lines of dialogue like these deep musings from troubled superspook Mr Justice in 5: "Ah, yes... There is so very much I know...an overvoid awareness of the infinitum intermingling of timelessness, everlastingness and grandeur parellsected by diabalkarm trogs culminating in a terrible awareness"! Outta sight, Daddy-o! Although 3's villain has a great silly name – The Deathless Smiler – 5 is probably the 'best' of the series. It features a ludicrous parade of "guest appearances" from such heroes and villains as D.E.M.O.N. ("the code-name of the international terror organization which furthers Destruction, Extortion, Murder, Oppression and Nefariousness"), The Fox, The Web and Captain Flag, aka The Ultra-Men, The Agents of A.U.N.T.I.E. ("Amalgamated Universal Network To Inhibit Evil"), The Spider, The Terrific Three (Steel Sterling, The Jaguar, the aforementioned Mr Justice) and chief baddie The Nameless One, all in nineteen dense pages. Forget about the final issue, in which the Crusaders are displaced from their title by the witless Steel Sterling, but otherwise *The Mighty Crusaders* is about as 'authentic' as *The Monkees*, and nearly as much fun.~AL

Recommended: 5

The MIGHTY CRUSADERS

Red Circle: *5 issues 1983-1984*
Archie: *8 issues (6-13) 1984-1985*

After the camp triumph of the 1960s incarnation there's an immense disappointment when beginning to read this series. Oh yes, there are daft plots and daft characters, particularly The Brain Emperor (a guy with a transparent dome covering an otherwise exposed brain), but this is an attempt to play the characters straight from creators not able to transcend mediocrity. Bizarrely, though, instead of forgetting the previous series entirely, there are attempts made to reconcile the continuity of a twenty-year-old, universally ridiculed comic. Fans of the 1960s material shouldn't despair, though, because in the final issues Rich Margopoulos tries his level best to write a 1980s equivalent. You are referred to 12's splash page featuring the Crusaders' building-block flying train, and 13's lump of red-rock villain. The dialogue is gloriously pompous and expository, and only the competent, although far from exciting, art of Dick Ayers and Chic Stone prevents a total lapse.~WJ

THE MIGHTY HEROES

Marvel/Paramount: *One-shot 1998*

The return of the 1960s cartoon series in comic form, presumably to test the waters. It's well produced and true to the inept superheroes and pastiche nature of the original material, but hardly compelling to anyone over the age of 12.~FP

The MIGHTY HERCULES

Gold Key: *2 issues 1963*

This curious, angular Hercules starred in a kids' TV cartoon, and the stories reflect the juvenile origins.~FP

MIGHTY MARVEL WESTERN

Marvel: *46 issues 1968-1976*

Weedy Marvel Western more like, as there's little in this collection of reprints, culled from 1950s and 1960s titles, to set the heart racing. There's a longish Rawhide Kid story in every issue, and shorter Two Gun Kid (every issue), Kid Colt (1-24) and Matt Slade (25 on) back-ups. Perhaps of interest, though is 44, featuring what Gil Kane considered his favourite of the covers he drew for Marvel.~FP

THE MIGHTY MITES

Eternity: *1 issue 1986*

There was nothing wrong with the idea, as Marvel would later appropriate it for their *X-Babies* specials, and the artwork is appealing enough, if lacking in background. No, the problem is the writing. This X-Men parody goes for the obvious joke every time, most honing in on the prolix tendencies and soul searching of the source material as it then was. More issues were planned, but none were forthcoming.~FP

MIGHTY MORPHIN POWER RANGERS

Hamilton: *6 issue miniseries 1994-1995*, 4 issues 1995, 3 issues (Saga) 1995*

It was a pedestrian TV show, and it produced pedestrian comics, although Gray Morrow drew the first issue and a strip in 6. The first miniseries and ongoing issues are slightly better by virtue of being self-contained, but if you want the origin and other bits of background information, they're to be found in the sketchy and never completed Saga.~WJ

MIGHTY MOUSE

Marvel: *10 issues 1990-1991*

Tongue-in-cheek comics parody series using the award winning TV show produced by Ralph Bakshi as a vehicle to poke fun at comic book trends. Utilising Mighty Mouse as an Everyman character, writers Michael Gallagher and Glenn Herdling are effective and humorous critics, and the art of Ernie Colón and Milton Knight is a sharp mix of cartooning and dramatic drawing. Of special note are the *Crisis on Infinite Earths* (4-5) and Todd McFarlane *Spider-Man* (6) parodies. A good read for collectors with a sense of fun.~WW

MIGHTY SAMSON

Gold Key: *31 issues 1964-1970 (1-21), 1973-1976 (22-31)*
Whitman: *1 issue (32) 1982*

Post-holocaust adventure with Samson and his companions Mindor and Sharmaine. The resemblance to the later *Hercules Unbound* from DC is too strong not to be mentioned, although the quality of this title is considerably lower. Early issues are drawn by Frank Thorne, but thereafter Jack Sparling hacks out one issue after another. The 1970s issues are reprints, as is the 1982 Whitman comic.~SW

MIGHTY TINY

Antarctic: *5 issue miniseries 1990**

These days best known for his manga-esque stories, it's surprising to see Ben Dunn trying his hand at furry animal science-fiction and pulling it off. Set after mankind has died out and rodents have evolved to sentience, there's a leering Victorian melodrama style-villain with military aspirations and only young Gunther and young Stuart and Ms Tiny stand in the way of his plans for military domination. A decent enough read for kids as well.~FP

MIGRAINE BOY

Slave Labor: *2 issues 2000*

Pages and pages and pages of humourless cartoons stretched out beyond bearing. The average six panels break down as silent meeting, call, response, "witty" retort, pause and violence. Even a potentially funny idea like one-panel gag cartoons for Christians lacks any humour, although those at least prove the primitive art elsewhere is just a style. Redeeming feature? It only lasted two issues.~WJ

Mickey Spillane's MIKE DANGER

Tekno: *11 issues 1995-1996*
Big Entertainment: *10 issues 1996*

Before he came up with Mike Hammer, Spillane outlined a cartoon series, which Tekno saw fit to dig up, with Max Allan Collins in charge of the scripts. Tough guy P.I. Mike Danger wakes up in the future, where he's told he's been in suspended animation. And people start trying to kill him. Obviously all is not what it seems, you say to yourself, and by the end of the series you discover you were right. In this synthetic, carefully controlled world Danger's the only 'real' man around and women start falling all over him. Eduardo Barreto, who provides most of the early artwork, plasters the strip with Betty Page lookalikes and deals with the action in a workmanlike fashion. Unfortunately there's not a lot of it – several pages of explanation followed by an attempt to kill Danger is the usual form. When Peter Grau takes over with 7 the art turns slippery but simultaneously wooden. Disappointing overall.~FJ

MIKE MIST MINUTE MYSTERIES

Eclipse: *1 issue 1986*

A collection of single-page puzzlers by Max Allen Collins and Terry Beatty, where the idea is to guess who did it before reading the final panel, upside down. Fine as a back-up in Collins and Beatty's *Ms Tree*, slight and sometimes unconvincing here.~NF

MIKE REGAN

Hard Boiled: *1 issue 1991*

Lovingly crafted but sadly over-ambitious pastiche of 1930s two-fisted action and spicy adventure tales as tough guy Mike Regan sets out to foil the evil plans of the Iron Lotus and her insidious Tiger Claw Tong.~WW

MILK!

Radio Comix: *31 issues +, 3 Specials 1997 to date*

This erotic anthology aims to offer a variety of strips, whether in terms of sexual content (comedy, softcore and hardcore), or the art styles accepted, although initially contributions are primarily manga or 'Ameri-manga'. On the whole, anthropomorphic strips are left to companion title, *Genus*, however. The best of the regular contributors are Richard Moore (9-10, 13, 16, 19, 21, 30), and Daria McGrain with Sara M. Williams (6, 12-13, 16, all reprinted in Special 2), but also of note are Locke (24-25), Gary McCluskey (15, 17), Fred Perry (2, 5, 11, and subject of Special 3), Nozomu Tamaki (3) and Paul Way (5, 8). Other interesting, but less consistent regulars include Alejandro Gutierrez Franco, Nureruru (subject of Special 1), and Kjartan Arnorsson. Most issues are good fun (especially those with Moore strips), but the overall quality of the title has been slipping in the last year.~NF

---

* Available in a collected edition

MILK & CHEESE

Slave Labor: *7 issues 1991-1997*

Pity creator Evan Dorkin, the poor lad probably has a huge psychiatrist's bill. Anyone with his madcap, zany, sick and violent sense of humour, needs some help. Yes, Milk and Cheese are a "carton of hate" and a "wedge of hate" and they don't need any excuse to beat you up – in fact, expect it! They are dairy products gone bad and society is to blame. How true. Dorkin is having a right old time satirising all that is good and bad about Americana, within one and two page rants. While there's an element of overload, rationing is advised because some may find the repetition is a bit monotonous, but it's worth the effort to receive Dorkin's, *ahem*, subtle message. The satire extends to the cover numbering, with issues being labelled 'second number one', 'first number two' and '666', but confusion can be avoided by picking up the nice *Fun With Milk and Cheese* collection. Read it slowly over a period of time otherwise you might be tempted to turn into a vegan (look it up, it's got nothing to do with *Star Trek*).~HY

Recommended: *Fun With Milk and Cheese*

MILLENNIUM

DC: *8 issue limited series 1987*

Yes, it certainly read like it. This was a long haul. The premise for DC's 1987 company-wide crossover was the emergence of a three-billion-year-old android cult, the Manhunters. Originally created as a force for good by the Guardians of the Universe, they turned bad and had now returned etc., etc. An interesting facet was that a few long-standing DC characters turned out to be androids, or human acolytes serving the Manhunters. In order to defeat them ten humans had to be advanced and... oh, it's too tedious to bear repetition. If you like to see dozens of DC heroes drawn by Joe Staton in every panel this is the series for you, but both he and writer Steve Englehart had seen better days.~HY

MILLENNIUM FEVER

DC/Vertigo: *4 issue miniseries 1995-1996*

Millennium Fever starts off as a comic about the everyday worries and joys of a young student's life. Of mixed parentage, his mother's going off the deep end after the death of her baby and his father's turned into a brick wall. He wishes either of his grandmothers were alive to advise him, and worries that he'll never lose his virginity. Eventually he answers a personal ad and meets the perfect partner. Until, that is, she turns out to be an embodiment of the soul of the universe, or something like that.

Nick Abadzis' script scores highly for authentic street language and emotional honesty, but loses points for getting wrapped up in ecological mysticism towards the end. His propositions are no odder than a common-or-garden *Sandman* story, but by being so convincing in the early pages he leaves the reader unprepared for the weird shit. The story uses long chunks of narrative to progress and comment on the behaviour of the characters, rather than dialogue, which makes it text-heavy in parts. Duncan Fegredo draws modern people in a modern style and by this stage has learnt to control some of the scribbly excesses of his early work. He suits the tone of the story well, able to draw cosmic encounters as well as London street scenes with conviction. Pity he wasn't left to do a bit more of the work.~FJ

MILLIE THE MODEL

Marvel: *207 issues, 10 Annuals 1945-1973*

The misadventures of daffy blonde model Millie Collins, her photographer boy-friend Flicker Holbrook, her red-haired rival Chili Seven, and their friends delighted generations of comic-reading girls (and more than a few furtive boys) for generations. Switching styles between cartoon comedy and semi-realistic soap as tastes changed, Mil lasted through the desert years of the 1950s with minimal alteration. Her boyfriend's name was changed to Clicker when it was pointed out that the second two letters of 'FLICKER' might run together on the printing press to unfortunate effect, and her rival Chili's surname was changed to Storm for no reason at all. Our heroine remained serenely untroubled, dispensing wisecracks and fashion tips in her own comic and the companion titles *A Date With Millie* (7 issues 1956-1957 and another 7 issues 1959-1960), *Life With Millie* (13 issues, 1960-1962), *Mad About Millie* (17 issues, 1969-1970, 1 Annual, 1971), and *Modelling With Millie* (33 issues 1963-1967). Unlike Patsy Walker, Millie was never mixed into the Marvel Universe proper, only sticking her head into guest-shots in *Defenders* and *She-Hulk*. It's become fashionable to belittle frivolous 'girls' comics' like *Millie* and *Patsy*, but without the dollars they brought in, Marvel wouldn't have survived until the 1960s to usher in the "Marvel Age of Comics", so all you little mutant zombies better show some respect, you hear?~HS

MIND PROBE

Rip-Off: *1 issue 1995*

Did Rip-Off ever publish a shoddier comic than this? Unlikely. In attempting to create a gloomy atmosphere, artist Luis Ramirez, whose story of a CIA undercover operation occupies over half the issue, appears to have airbrushed in dark gray tones with white highlights. A fair enough experiment, but when it returned from the printers with pages so dark as to render the story incomprehensible the publishers, for once, lived up to their name and issued the comic anyway. The content is otherwise enthusiastic and not quite professional daft horror.~WJ

MINDGAME GALLERY

Mindgame Press: *1 issue 1990*

Disappointing anthology of short stories from a normally high calibre cast of creators including Steve Bissette, Rick Veitch, and Bernie Mireault rounded off with some of Joe Matt's poorer one-pagers. More of a curiosity than a keepsake.~WW

Witchblade/Aliens/The Darkness/Predator MINDHUNTER

Dark Horse/Image/Top Cow: *3 issue miniseries 2000-2001*, 2 issue microseries (Overkill) 2000-2001*

The first multi-franchise all-action effort has sub-sitcom dialogue and unfeasible tits and ass plus bondage, and is bad even of its kind, right down to the colours. The 'villain comes back from the future to stop time and space or does he?' routine is pretty tired. Most entertaining caption is "The buggers' sucking hive!" *Overkill* is not as badly drawn, but almost as confusingly incomprehensible. 2 is based on the 'joke' of male anal penetration. As bad as a comic can be without being funny.~GK

MINIMUM WAGE

Fantagraphics: *One-shot (Book One) 1995, 10 issues 1996-1999**

Bob Fingerman works a fair amount of autobiographical experience into his stories of Rob Hoffman, struggling New York cartoonist specialising in obsessing over trivia, and being a damning silent critic of humanity's foibles (as all good cartoonists should be). Many of the tribulations depicted are seemingly common to half of New York, but the level of charm and wit, and occasional sequences of gut-busting hilarity, ensure that otherwise mundane events are promoted beyond their status. Despite the attractive, clean cartooning style, the grime and sleaziness of some characters still oozes off the page, which is a remarkable achievement. Densely written to the standard of a quality sit-com, this differs from similar material in that it's largely an upbeat title. Rob is relatively content with his lot and has an attractive partner, and much of the humour stems from the misfortunes of others. By the end of the run, though, publication frequency imploded and issues began to feature a shorter lead strip backed-up by strips from other cartoonists. While not bad, they were presumably not what readers wanted. The introductory one-shot is excellent, but expensive, so sampling is best begun with the stand-alone issues of the regular series. 1-5 are collected as Book Two and 1-10 are later collected as *Beg the Question*.~FP

Recommended: One-shot, 1-6, 8, 10

MINISTRY OF SPACE

Image: *2 issues + 2001 to date*

Warren Ellis creates a scenario in which the Nazi rocket scientists defected to Britain instead of America, thus putting the UK at the forefront of the post-war space race. Set in a world that belongs to *Boy's Own* adventure strips of the 1950s, the series could have been a serious take on what might have been; in-joke laden nostalgia for the weekly adventure strips that once graced our newsagents' shelves; or light-hearted, Ealing comedy style farce. Unfortunately, it's none of the above. Bogged down by pointless sneering at chinless wonder airmen stereotypes who never really existed anyway, Ellis tries too hard to be clever and ends up simply being tedious with plots and dialogue that are overdone rather than funny. It's really no loss then that issue 3 is yet to appear, despite Ellis' assurances that artist Chris Weston (whose beautiful artwork is wasted on this drivel) has the script and will deliver the final chapter.~JC

THE MINX

DC/Vertigo: *8 issues 1998-1999*

Anna Schwartz lives in a world much like our own. Except, that is, for the influence of a test astronaut monkey who has contacted God in space. Many people, including Anna, are now receiving mental communiqués from the ape who has been asked to compile a progress report on Humanity. Mrs Schwartz then chooses a family funeral to reveal that she's concealed the identity of Anna's father from the family. Donning her dad's punk jacket, Anna begins to take on the rebellious aspects of a powerful alter ego named The Minx. Along the way Anna, her friends and family encounter zealot hermaphrodite Sex Death and adversary Angus McAnguish, an incredibly vain President and eventually The Monkey himself. There follows a textbook open/non ending to the series. Writer Peter Milligan takes a commonplace of comics, the alter ego, and sidesteps the bore of a skintight costume, powers, or an origin. Sean Phillips' unexaggerated verité style is, for once, thoroughly suited to the story, even if it is marred by inept colouring throughout. If you like your comics cerebral then this is definitely worth seeking out.~SW

MIRACLE GIRLS

Tokyopop: *19 issues 2000-2002**

Mika and Toni Morgan are identical twins trying to lead separate lives. They attend different schools, have different friends and seemingly don't get on. However they share a secret that increasingly draws them together – incredible psychic powers that keep getting them into trouble. Nami Akimoto's shojo (girl's story) adventure is generally a rambling, fluffy, tension free-affair, but as more people discover their secret (boyfriends, teachers, Mad Scientists) and try to exploit them, the girls lives become progressively more complex. Engaging but lightweight.~WW

The MIRACLE SQUAD

Upshot: *4 issues 1986-1987*

Apple: *4 issue miniseries ('Blood and Dust') 1989*

Set in late 1930s Hollywood, this is a fast-paced adventure strip based around Miracle Studios. The first series introduces Sandra Castle searching for her twin sister and involving the studio and its boss, Mark Barron, in a takeover battle with gangster Sweets O'Hanlon. 'Blood and Dust' sees the studio trying to make a film about the poverty of dustbowl America and encountering Ku Klux Klan-type prejudice. Briskly written by John Wooley, who knows his period, and cleanly drawn by Terry Tidwell, there's humanity in the stories but it lacks a little sophistication.~NF

MIRACLEMAN

Eclipse (with Quality, 1-6): *24 issues 1985-1993*

Starting out life in the 1950s as a blatant Captain Marvel rip-off, Mick Anglo's *Marvelman* was the recipient of an Alan Moore overhaul in the enormously influential British anthology comic *Warrior*. The story was reprinted by Eclipse under the title Miracleman to stave off threats of legal action from *Marvel Comics*.

In Moore's hands, the innocent 1950s hero grew up into an unsuccessful and insecure freelance reporter whose memory of his powers existed only in dreams. When reawakened, Mike Moran's alter ego makes the mistake of contacting his former sidekick, who has used his own abilities to build up an incredibly powerful multinational corporation. Things go from bad to worse. Kid Miracleman is an unbalanced sadist with the powers of a god, and the steps taken to stop him send Moran down an irreversible path that leads to him assuming absolute control of Earth. Along the way, startling revelations about his origin further destroy the cosy world he thought he knew, and the more he embraces the god-like side of his nature the further removed from reality (and his own humanity) he becomes. Miracleman may be a benign dictator, but neither the reader nor the character are allowed to forget that he has chosen to place himself above the mortals. When Moore brings his story to a conclusion in 16, the Miracleman he leaves not only knows what he has gained, but is all too painfully aware of what he has lost. Sadly, the artwork doesn't always live up to the consistency of Moore's writing. Early episodes, drawn by Gary Leach and later Alan Davis for reproduction in black and white, do not always take colour well. There are some ugly issues by Chuck Beckum when the reprint material runs out, and it is not until John Totleben comes on board with 11 that the title re-acquires a consistent look.

Despite a rocky publishing history (the first sixteen issues are spread over more than four years), the critical acclaim and high standards ensured the title's survival and cemented Moore's reputation in the American market. It is perhaps regrettable that Eclipse chose to continue the series after Moore's departure. Neil Gaiman and Mark Buckingham did an admirable job, presenting a series of vignettes (17-22) exploring what the world Miracleman has remade in his own image is like for those who have to live in it, not all of whom necessarily want him as their god. But the central character is noticeably absent, and there is a feeling that even they have admitted that Moore's act is impossible to follow, although their obvious love for the character carries them through.

From 23, Gaiman and Buckingham begin continued stories, once again focusing on the title character, now more god-like, omnipotent and self-absorbed than ever. Production problems continue to be the book's main fault and, by 1993, the numbering had progressed only as far as 24. It says something about Miracleman's history that his readership is prepared to wait for 25 onwards, and still believes they will come. In the meantime all issues to 22 are collected over four volumes.~JC

Recommended: 1-16

MIRACLEMAN FAMILY

Eclipse: *2 issues 1988*

Reprints of Mick Anglo stories from the 1950s, heavily influenced by the golden age *Captain Marvel* comics that inspired the characters.~JC

MIRROR WALKER

Now: *2 issue microseries 1989*

An interesting experiment that falls some way short of its aim. Cartoon figures are laid onto photographed backgrounds for a comic fantasy. The contrast is jarring, and Marv Wolfman's story lacks the charm and effort to enable a reader to be drawn into it and ignore the anomalies.~FP

MIRRORWORLD:RAIN

Big Entertainment: *2 issue microseries (1-0) 1997*

Genetically modified humans are sent on a one way trip to an other-dimensional planet known as Mirrorworld. It's an interesting scenario, but of little relevance to the bulk of the tale, which is, despite the few otherworldly trappings, a Western. Rain is an Amazonian style warrior occupying a decent, but hardly compelling, story competently illustrated by Fred Harper. It all seems rather pointless unless there's a major fan base for writer *"New York Times* Best-Selling Author" Tad Williams. To confuse collectors, the zero issue actually follows the first.~WJ

* Available in a collected edition

MISERY

Image/Top Cow: *one-shot 1995*

Fresh from an abortion, crushed by her father's hatred and deserted by her married lover, Lydia O'Rourke is emotionally unstable. When the villainous Cyberdata corporation decides to terminate her father's employment (along with his factory and himself), she is completely unprepared for a manifestation of latent psychic powers. Written and pencilled by Brandon Peterson, this is a literate, character-driven thriller that outlines the origin of the *Cyberforce* villainess, Misery.~NF

Recommended

THE MISHKIN FILE

Fantagraphics: *One Shot 1993*

The retired director of a mental institution tells the story of Ted Mishkin: a brilliant animator and creator of the mischievous cat Waldo. During the 1930s whilst recovering from a nervous breakdown he commenced a series of murals where the products of a disturbed imagination melded with suppressed desires and facts. What we're presented with is an unsolved whodunnit, an incidental result of Dr Reinman's account of Mishkin's life. Author Kim Deitch's distinctive, puppet-like style and that of the murals doesn't vary. The tableaux are carefully presented, showing their disturbing details as the Doctor's "real world" narration raises our suspicions. A masterful complement to 'The Ship That Never Came In' from *Pictopia* 2 and 'The Boulevard of Broken Dreams' from *Raw* (volume 2, number 3).~SW

MR A

Comic Art Publishers: *1 issue 1973*
Bruce Hershenson: *1 issue (2) 1974*

Mr A was the venue through which Steve Ditko expounded his views on life, society and politics. Mr A himself most closely resembled Ditko's Charlton character The Question, but that strip was at least hemmed in by thoughts of commerciality. These strips, many of them reprinted from fanzines, make no such concession. Ditko's philosophy was a form of right-wing absolutism, or, as Mr A says in 1, "A is A. A thing is what it is. No man can have it both ways. Only through black and white principles can man distinguish between good and evil." And so on. And on. And on. And on. To anyone not sharing Ditko's views, which, let's face it, is most of us, this is all completely mad. At the same time, though, it makes compulsive reading and Ditko's art is absolutely top-notch throughout. The second issue is actually number 4 in 'The Ditko Series', 2 and 3 being *The Avenging World* and *Wha...?*~DAR

MR. BEAT

Moordam Comics: *One-shot ('Adventures') 1997, one-shot ('Two-Fisted Atomic Action Super Special') 1997, one-shot ('House of Burning Jazz Love') 1998, one-shot ('Superstar') 1998, one-shot ('Babes and Bongos Annual') 1998, one-shot ('Elite Mr. Beat') 1998, one-shot ('Existential Cool 0') 1998*
Comics Library International: *3 Volumes (The Complete Mr. Beat) 2000-2001*

Chris Yambar's Mr. Beat is "God's 'agent of cool' in times of crisis on other worlds and in other dimensions", working from his coffee shop, the House of Burning Jazz Love. This after dying before his time, when he was accidentally dropped into the sea in a barrel of cement. The first part of an Elfquest team-up appears in 'Adventures', while the 'Two-Fisted Atomic Action Super Special' features Levi Krause's Levi's World and Roswell by Bill Morrison. 'House of Burning Jazz Love' contains the first part of a Mr. Beat/Levi's World/Cray Baby crossover, completed in Levi's World and World's Funnest. Mr. Beat's origin is covered in 'Superstar', which also has the first part of a Patty Cake crossover as the pair face an alien invasion – continued in the 'Babes and Bongos Annual'. That has a Spy Girls backup by Kevin Thomas, which is continued in Certified Cool. 'Elite Mr. Beat' reprinted 'Adventures' together with the *Elfquest* part of the crossover (Volume 2, 9). 'Existential Cool 0' is a flip book with Art Baltazar's Gyro-Man 0, and Blindwolf Comics released a 'Mr. Beat/Cray Baby/Weirdsville Post Halloween Leftover Monster Thanksgiving Special'. The third volume of 'The Complete Mr. Beat' contains a CD of live beatnik music, including the 'Mr. Beat Theme' and 'Dangerous Coffee'. Mr. Beat is caffeine-fuelled commentary on art (Lichtenstein, Warhol), comics, death and Jesus, with support from poet, Bambino Boy and Dippy the Biscotti Dog. It's all quite raw, but the overall effect is one of someone having fun with cartoons.~NF

MISTER BLANK

Amaze Ink: *15 issue limited series (0-14) 1997-2000**

You know you're onto a winner when Christopher Hicks has the nous to name his hero Sam Smith after a great beer. This is a stylish and well-designed work, starting each issue with the concluding page from the previous time on the inside cover plus a synopsis. Sam is an office worker who confronts two prowlers when working late. Tackling them upends his life, yet he proves remarkably adept at avoiding death while learning a lot about the company he's employed by and more besides. There are clones, robots, nutty scientists, a mime able to distort reality and other oddities, and by halfway through there's an amazement at how Hicks manages to up the ante each issue. This continues until the end, by which time mythological elements, giant robots and biblical legends have also been incorporated. Hicks is a fine stylist who brings a manga sensibility to his art, making for breathtaking action sequences. This does also ensure a quick read, and while occasionally there is the feeling that the story is running away from him, it isn't. Close in spirit to *Madman* or early *Mage*, it's a relatively original adventure comic worth investigating.~FP

MR DAY AND MR NIGHT

Slave Labor: *1 issue 1993*

Previously seen as the back-up in *Paris, Man of Plaster*, this is a superhero spoof (sort of) written by Glen Dakin and drawn by Phil Elliott. Ponderous in places, but builds up to some good points about the value of scepticism.~FC

MISTER E

DC: *4 issue miniseries 1991*

How can a comic about a psychotic blind psychic, whose father scooped his eyes out with a spoon when he caught him reading a nudie mag, confronting his guilt and repression be so stultifyingly dull? That's the only mystery here.~FP

MR. FIXIT

Apple: *2 issues 1990*

As different areas of the USA slip into different time-zones it's up to the best mechanic in the country to put things right. Old-fashioned and light-hearted, competently written and drawn, there's nothing outstanding here, and as such it's only worth investigating as a bargain-box cheapie.~WJ

Neil Gaiman's MR HERO, The Newmatic Man

Tekno: *Series one 17 issues 1995-1996, series two 1 issue 1996*

Museum curator Jenny Hale discovers a Victorian steam-powered robot, Mr Hero. It has two personalities according to which of its two heads is fitted. There's the simple blue-collar protective type, and the logical and superior detective. The downside is that Mr Hero is the property of the terrible Mr Henry Phage, other-dimensional dictatorial dinosaur with influence everywhere, and, retaining only his left hand, he wants Mr Hero back. Generally a fun title with appealing pencils from Ted Slampyak.~FP

MR. MAJESTIC

WildStorm: *9 issues 1999-2000**

Given that this is WildStorm's version of *Superman*, the approach applied focuses on what that character could do freed from locked-in editorial attitude. 1, for instance, has Mr Majestic reconfiguring the solar system over two decades. You don't see that in every comic. There's a great variety in tone throughout making for an interesting title.

* Available in a collected edition

Where it will fail for some is in the shorthand storytelling of Joe Casey and Brian Holguin and that Mr Majestic's character remains a largely blank slate, even through the emotional events of 4. 2 is also a heartbreaker. Of the artists, the cartooning of Ed McGuinness, who would go on to draw *Superman*, is more pleasing than the jagged stylings of Eric Canete from 7.~WJ

MISTER MIRACLE

DC: *Series one 25 issues 1971-1974 (1-18*), 1977-1978 (19-25), one-shot 1987, series two 28 issues 1989-1991, series three 7 issues 1996*

"Mister Miracle. He cheats death! He defies man! No trap can hold him! The making of a Legend!" exclaimed the first issue's cover, while tucked away in the top corner was one of the great understatements of the comics century: "Kirby's Here". Inside we're introduced to Thaddeus Brown, an escape artist who's trying to make a comeback, and a mysterious young man Scott Free – Kirby always had a way with names – and his mysterious technology. When Brown is executed by gangsters Scott assumes the mantle of Mister Miracle, super escape artist, assisted thereafter by Oberon, short, feisty and middle-aged. It's your basic superhero story with Kirby's art magnificent, even inked by Vince Colletta, although the infinitely more sympathetic Mike Royer inks from 5, completing the dynamic flair of the series. The first issue makes little reference to the connected story Kirby was also telling about the world of Apokolips and New Genesis in the pages of *New Gods* and *Forever People*, but Scott Free was an integral part of that story.

2 steps right in with the boots on as gruesome pensioner Granny Goodness turns up. Granny heads up the Apokolips orphanage from which Scott Free has recently escaped, and since he's the first ever to do so Granny is out to punish him. 2-10 introduce an amazing gallery of Apokolips villains still used to this day. Besides Granny we have Dr Bedlam, a mind-manipulating scientist with a host of bodies, Kanto the assassin and Virman Vundarbar, a mock-Prussian military genius. Then there are Granny's élite soldiers, those Female Furies, Lashina, Stompa, Bernadeth and Mad Harriet. Into this mixture Kirby throws a thinly disguised parody of his former Marvel partner Stan Lee, here named Funky Flashman. 7 and 8 have Mister Miracle back on Apokolips and really show Kirby at his storytelling best, with great action and marvellous dialogue. 9 temporarily pauses the action for one of the best-ever superhero comics, 'Himon', relating the story of Scott Free's parentage, his Apokolips upbringing, and how he escaped with the aid of Big Barda. Once head of the Female Furies, she was introduced in 4 as Scott's love interest, the cover proclaiming "Big bonus! Big Surprise! Big Barda!", and she certainly is, especially with her megarod. After 10, with the backstory told, Mister Miracle becomes a straight superhero adventure title, but that doesn't stop the Kirby creativity, and, with the Female Furies on Earth, he just can't stop the fun. Adversaries for the next few issues included The Floating Head and, as proclaimed on 14's cover, "The weirdest villain ever seen in comics: Madame Evil Eyes", alas never seen again. Unfortunately, the marvellous Female Furies were ousted as supporting characters by the son of the original Mister Miracle, and a young kid, Shilo Norman, an irritating little runt, but the catalyst for a few good adventures. 18 returns the Apokolips crew for Scott and Barda's wedding in Kirby's (and the series) finale. These Kirby issues are reprinted (poorly) in two black and white collections and offer a cheap alternative to the originals.

Mister Miracle returned in magnificent form in 1977. It's not easy to outdo Kirby, but writer Steve Englehart and artist Marshall Rogers had a good stab. The action centred on the Apokolips villains, with Granny Goodness still holding a grudge. The stories had a grittier feel, but the team didn't last long, Englehart even being so dissatisfied with 22 he was credited under an alias. Steve Gerber and Michael Golden are in place for 24, and produce two very good issues, but were unable to prevent cancellation halfway through a story. The creators on this run had very different approaches from Kirby, but do justice to his character. A decade later a *Mister Miracle Special*, appeared written by Mark Evanier, at one time an assistant of Kirby's, and beautifully illustrated by Steve Rude and Mike Royer. Very much in Kirby style, it was an amusing story featuring Darkseid, and Funky Flashman.

The next series outlasted the previous two runs put together. Written by J.M. DeMatteis, it was intricately connected with the new Justice League, of which Mister Miracle was a core member, also written by DeMatteis. The stance here was domestic comedy of sorts, as Scott and Barda set up home in a quiet town, but there's never anyplace quiet when the inhabitants of Apokolips and New Genesis are involved. Ian Gibson illustrated 1-7, but obviously didn't enjoy it, and DeMatteis forced the humour too far for what had until now been an adventure title, taking liberties with previously noble characters, particularly the Highfather. Keith Giffen and Len Wein take the comedy even further, but in better conceived stories, and Joe Phillips' art from 8 is an improvement. Wein begins a plotline with lots of ramifications in Justice League as Mister Miracle signs a binding agreement for an interplanetary tour that runs in 13-18. Back on Earth in 19 Shilo Norman returns, less annoying than before, training to become a new Mister Miracle in 20-22. Scott and Barda want to live as a normal couple, but Barda needs to work and becomes a wrestler, turning up the amusement factor another notch. Inevitably successful given her background, Barda wins a championship and creates a new group of Female Furies, wonderful busty, colourful wrestlers. Everything comes to a head in the final issue, with Scott and Barda realising that a comfortable suburban existence isn't possible: Scott has to fulfil his New Genesis heritage. Overall there weren't too many bad issues, but neither was this Mister Miracle as originally intended.

The 1996 series from Kevin Dooley and Steve Crespo continues where the previous run left off, more or less. There's trouble in New Genesis when Scott decides perhaps he doesn't want to become a god after all, preferring to live up to his name rather than have his destiny plotted out for him. Along the way there's a trip to the land of the dead and marital problems for Scott and Big Barda. She leaves for Wonder Woman's Paradise Island, while Scott joins Oberon's Miracle Workers, a charitable organisation assisting people in need. The series was prematurely cancelled, but the plotlines continued in the *New Gods* title.~HY

Recommended: Series one 1-10, 18-21, *Mister Miracle Special*, series two 13-18

Doc Stearn... MR MONSTER

Eclipse: *10 issues 1985-1987*
Dark Horse: *8 issue limited series 1988-1991**
Tundra: *3 issue miniseries ('Attacks!') 1992*
Caliber: *3 issue miniseries ('Presents Crack-A-Boom!') 1997*
Image: *One-shot ('vs Gorzilla') 1998*
TwoMorrows: *One-shot ('His Books of Forbidden Knowledge Volume Zero') 2001*

Michael T. Gilbert's Mr Monster is in large part a revival of a 1940s Doc Stearne, Mr Monster who appeared in *Super Duper Comics*. Mr Monster is played for laughs as a gung-ho superhero who shoots first, and kills all known monsters. His beautiful assistant, Kelly, sometimes has to stop him killing his own patients in this quest to rid the world of evil creatures. Artistically you might be forgiven for thinking Gilbert the president of the Will Eisner Appreciation Society. His work is a little more ornate than Eisner's, but he gets a lot of help from his friends. Bill Messner-Loebs draws 1, and several others chip in as the series progresses (Keith Giffen in 6, Don Simpson in 6 and 10, Mark Pacella in 7, 8 and 10, Bill Wray in 8, Gerald Forton in 9 and Batton Lash in 9 also – a delightful *Wolff and Byrd* crossover). Gilbert writes most scripts, but he's not afraid to hand over the typewriter to the likes of Alan Moore (3), and often co-scripts stories. It's all good, outrageous fun. 10 is in 6-D (because it's twice as good as ordinary 3-D), 3 has a Basil Wolverton reprint, 4 reprints a Jerry Grandenetti Dr Drew story and 6 contains a reprint of Steve Ditko's first comic work from 1954.

Anyone who'd read the Eclipse series was not well prepared for Mr Monster's return at Dark Horse. In place of the humour, 'Origins' is two hundred highly serious pages delving into the legacy of Mr Monster. There's always been a monster fighter in the family, but Mr Monster's dad was seduced into renouncing his monster-slaughtering crusade by a vampiress who couldn't have children. Or that was the theory, anyway. Entirely Gilbert's own work, 'Origins' sees his artwork move away from pure Eisner into P. Craig Russell territory, more ornate, but still dark. It's an ambitious saga, not entirely without humour, but a far cry from the gruesome hilarity of the first series. The two known Mr Monster tales from the 1940s are reprinted in 1 and 2, with another Dr Drew tale by Grandenetti filling out 6.

---

* Available in a collected edition

The Tundra issues return to the boisterous antics of the Eclipse series, with the emphasis on space monsters. Collaborations are back too. Dave Gibbons contributes to 1, Sam Kieth does 2, and Simon Bisley and Dave Dorman both work on 3, among many others. A Kelly solo story, drawn by Tom Buss, was a prelude to her own miniseries from Image. Artistically Gilbert himself shows signs of continued development, although his writing disappoints after the darker 'Origins' storyline. The Caliber series is an anthology of horror strips with a lead Mr Monster story from Gilbert. Bob Supina's 'Monster Boy' crops up more than necessary, but is a good foil for Gilbert's own L'il Doc! (2-3), and Wolff and Byrd reappear in 2. Much better, and funnier, is the Image issue by Gilbert and Ken Bruzenak, in which Mr Monster travels to Japan to take on Gorzilla. The TwoMorrows volume collects the Mr Monster strips from *Dark Horse Presents*, the Caliber miniseries and *A-1*, but also includes an unpublished team-up with Trencher by Gilbert and Giffen from the abortive *Blackball Comics*. An earlier 'Books of Forbidden Knowledge' collection reprinted strips from 1984-1986, including his first appearance in *Vanguard Illustrated*.~NF

Recommended: Eclipse 3, 4, 6, Dark Horse 1-8

MR MONSTER Specials and One-Shots

Although not numbered as such on their covers, everything in this entry is identified as an issue of *Mr Monster Super Duper Special* in its indicia. All were published by Eclipse in 1986 and 1987. The name of Mr Monster is procured from an obscure 1940s hero, and many of these specials hark back to the past, with Mr Monster introducing reprints of horror, crime and science-fiction stories. The 3-D 'Hi-Octane' special reprints the first 3-D horror story, by Joe Kubert, dating from 1953, plus Bob Powell's 'The Blind, the Doomed...and the Dead!' from 1952. The other is full of classic tales by George Evans, Jerry Grandenetti and Basil Wolverton. *Mr Monster's True Crime* 1 and 2 concentrate on the work of Jack Cole. His true-crime tales are thrilling and entertaining but most certainly prove that 'crime does not pay'. Hi-Voltage Super Science features Bob Powell's Vic Torry and his Flying Saucer (originally a Fawcett one-shot from 1950 and less dumb than it sounds), while *Hi-Shock Schlock* 1 and 2 contain stories "too weird or silly to fit anywhere else", including Flatman (1), Dick Briefer's 'Frankenstein and the Mummies' (1), Norman Nodel's Toni Gay (and her friend Butch Dykeman. No, this is for real) and Frank Thomas' 'The Eye Sees', a 1940s tale about a floating eye. The final special is Weird Tales of the Future, all Basil Wolverton reprints from the series of the same name from 1952-1953, including such classics as 'The Brain Bats of Venus' and 'Nightmare World'. Quite apart from the appeal to *Mr Monster* completists, these comics reprint classic stories and are well worth looking for.~NF

Will Eisner Presents: MR. MYSTIC

Eclipse: *1 issue 1990*

Eclipse tried hard to reintroduce past classics to a new readership through a number of reprint series. The reprints of Mr Mystic, created as a back-up to the *Spirit* newspaper sections in June 1940, did not generate a huge demand for further issues but then the company were running into trouble by this time. This issue reprints the first five Mr. Mystic stories, distinguished by the artwork of Bob Powell who would also later be the strip's writer. Mr. Mystic is described as "all-powerful" by the Himalayan monks who give the-man-known-only-as-Ken his powers. These appear to mean that anything he wants he need only wish for, but since he never seems to be able to defeat the bad guys too easily, there must be some limitations he keeps to himself. Due to the dated scripts and youthful artwork, this is really only an interesting artefact for Powell fans and comics historians.~NF

MR NATURAL

San Francisco: *2 issues 1970-1971*
Kitchen Sink: *1 issue (3) 1977*

By the time Robert Crumb's legendary Mr Natural graduated to his own title he was already an underground veteran. Whilst the first issue is credible enough, full of Natural's obdurate homilies, by the second Crumb was beginning to grow disenchanted with the hippie movement. Much of the comic pokes fun at cults and movements in a rather jaded way, although 'Mr Natural Does the Dishes' is almost worth the price of admission on its own. After a gap of six years 3 collected the complete run of the character's weekly strip in *The Village Voice*. Coming so many years after his heyday, the character had inevitably become an anachronism, but for all that Crumb invested it with a vigour and intelligence lacking in the earlier comics. To top it all off the art is absolutely terrific. Mr Natural was revived in the early 1990s in the pages of *Hup*.~DAR

Recommended: 3

MR NIGHTMARE'S WONDERFUL WORLD

Moonstone: *7 issues, 1 Special 1995-1997*

Since Neil Gaiman's *Sandman* the flip side of a keeper of nightmare has been an obvious idea, but picked up by no-one else until the introduction of Mr Nightmare. He's a billiard ball headed flip side to Sandman in both senses of the term. Consistently eye catching covers are a trademark and Dave Ulanski's cartooning is great, but his stories too quirky and prolonged to sustain interest. The special features art by Ron Frenz among others, but is inessential, so try the self-contained 7 before deciding whether or not to investigate further.~FP

MR T. AND THE T FORCE

Now: *14 issues 1993-1994*

You may have thought (hoped, even) that the ex-wrestler festooned with gold chains who delighted many very small children in *The A-Team* years ago would not warrant his own comic book in the 1990s, especially one co-written and drawn by Neal Adams and his studio. You reckoned without the power of Saturday-morning cartoons, which extended Mr T's shelf life. Yo, Suckas! as the man with the bog-brush hairstyle would put it.~FJ

MR TRIANGLEHEAD

Caliber: *1 issue 1992*

Pretentious rubbish from J. Calafiore ostensibly returning God to the ghetto to check up on humanity. Portentous captions and scratchy art accompany seemingly pointless vignettes, and the best part of the issue is the gimmick studies of a horse's head decaying page by page outside the panel borders. It may have all pulled together given time, but this is all that remains.~WJ

MISTER X

Vortex: *Series one 14 issues 1984-1988, series two 12 issues 1989-1990, one-shot 1990*
Caliber: *4 issues 1996*

Dean Motter's brainchild, *Mister X* is a confounding, slowly-paced series, where style is often as important as content. The mysterious central character, a bald, mirror-shaded junkie who never goes to sleep, returns to Radiant City because he believes he has created an environment which twists its inhabitants. The city's underworld is controlled by Mr Zamora, a crooked businessman who seems unreasonably interested in the anarchic architect. 1-4* are by the Hernandez Brothers, with stunning covers by Paul Rivoche on the first three. Gilbert and Jaime give us a 1950s vision of the future, with finned flying cars, benevolent servant robots and slick suits. After this the title was beset by difficulties throughout the first series, as artist after artist joined and then left suddenly, although Motter's scripting provided continuity. The story is as twisted as the architecture, and as we meet more and more characters claiming to know who Mister X is and who he once was, the 'save the city' plot is soon subsumed by the mystery of his identity. Although this never becomes clear, some light is shed on his motivations by Pete Milligan and Brett Ewins' bizarre one-shot, 'Mister Insect X' Mister X substitutes the sound of insects for the noises he associates with his most traumatic experience in the dreams he creates with a dream machine he's building, and while this isn't much plot for a special, Milligan works it very well.

The third series is written by Deborah Marks in a manner guaranteed to confuse even those familiar with the series, as Mister X investigates the strange phenomenon of people becoming transparent and then disappearing completely. The artwork by Gene Gonzales is clean and simple, but isn't as stylish as it wants to be. Basically, it lacks atmosphere and tries to make up for it in mystery.~FJ

Recommended: Series one 1-4

MISTY

Star: *6 issues 1986*

Young Misty Collins struggles through the trials of a high-school student and teen model's life, although in the last department she has an advantage: her aunt is the world famous Millie the Model! Produced by writer/artist Trina Robbins for Marvel's short-lived line of children's comics, Misty's adventures are lightweight, but affable.~HS

MOBFIRE

DC/Vertigo: *6 issue miniseries 1994-1995*

A Mafia-style London Godfather dies leaving his empire in son Jack Keller's hands. Jack's guilt feelings and desire to dissolve the Mob are complicated by his inheritance of right-hand magician Bocor, whose loyalty to the son is somewhat cooler than it was to the father. The gritty, sardonic, jet-black story by British creators Gary Ushaw and Warren Pleece makes no concessions to its native audience. How many American readers appreciated the crossed hammers and WHUFC graffiti on issue 2's cover? This British version of *Reservoir Dogs* takes a turn for the perpendicular half way through when the mystical elements kick into gear; these sit ill with the gangland setting. Pleece's artwork is ugly, yet still fails to match the script's mood. Has its moments. 18 certificate.~APS

MOBILE POLICE PATLABOR

Viz: *6 issue miniseries 1997*, 6 issue miniseries ('Part 2') 1997-1998**

A pedestrian story of a near future world where crime is so out of control that the constabulary are forced to wear great big metal suits, normally used in the construction industry, just to keep up. Not exactly a waste of space, but this has been done so often that you can't help being bored. For die-hard manga tech-freaks only.~WW

MOBILE SUIT GUNDAM WING

Viz: *4 issue miniseries ('Ground Zero') 2000*, 4 issue miniseries ('Blind Target') 2000*, 8 issue limited series ('Episode Zero') 2001**

Mixx Manga/TokyoPop: *12 issue limited series 2000-2001**

Tokyopop: *5 issue miniseries ('Battlefield of Pacifists') 2002*, 4 issue miniseries ('Endless Waltz') 2002**

The forty-nine episode Japanese animation series on which this title is based chronicled a war between the oppressive Earth Allied Forces and five space colonies revolting against their rule. The major asset the rebels have is five giant battesuits, known as Gundams, piloted by pre-pubescent boys (although often drawn in strangely feminine fashion). The 12 issue Tokyopop series is set squarely within this period, but the problem is that combat between giant battlesuits provides spectacular animation, but dull comics. Thankfully series creators Hajime Yatate and Yoshiyuki Tomino allowed for the boys to become rounded characters, but that's diminished by poorly dialogued translation. It's still a rollicking good adventure, but don't set your expectations high. Each issue also features a number of strange four panel comedy gags about the cast.

The Viz series are better, the first two set in a period after the conclusion of the original series and before its sequel 'Endless Waltz', using concepts established there. At this point, with peace having broken out all over, there is the question of whether or not there is a need for warriors and battlesuits. These are very much character based plots, with the suits hardly seen, and the cast are certainly eccentric enough to sustain interest, although act way beyond their supposed ages. 'Episode Zero' is a series of well-constructed segments revealing the backgrounds of the main characters.

'Battlefield Pacifists' is an alternative extrapolation of events between animated series and video. It's touted as more legitimate than the Viz efforts by virtue of being written by Katsuhiko Chiba, who contributed to the TV series, but whether it's better or not depends on what you want from the comic. It's possibly more in tune with the animation, but the plot is just more of the same on a smaller scale, as is 'Endless Waltz', which features another rebellion.~WJ

Tales Mutated for the MOD

Kitchen Sink: *1 issue 1981*

Terry Beatty edits an old-fashioned underground anthology, either writing or drawing most strips himself, and proving adept at aping other styles. There are also early Bob Burden strips, and the comic is rounded out by Bill Griffith and Zippy the Pinhead. Chuckles rather than belly laughs are on offer, but there's plenty worse out there.~FP

MODERN LOVE

EC: *8 issues 1949-1950*

Supposedly based on real-life experiences, this now offers a glimpse at the social attitudes of post-war USA, with EC there to stab at the small minded and hypocritical. The highlight is 7's 'They Wouldn't Let Me Love Him', foreshadowing later EC tales. No-one wants a doctor to treat them as he's married to a Mexican girl, so she reluctantly leaves to preserve his career. 'Too Busy For Love' in 5 and 6's 'Career Girl' offer the prevailing view that women can't handle a job and have time for romance or raise a family. 'Flame In My Heart' (8) even has the heroine offer to resign as hubby doesn't believe in working wives. Prejudice and snobbery are raised in 3's 'Our Families Clashed', where the parents of our lovers disapprove of the relationship as he's from a farming family and she from mining stock. Elsewhere sex had to be subtly implied. 5's 'Shame' lets a handsome hunk have his way with our young heroine then dump her! The swine. But the boy next door who's loved her years, marries her, and so rescues her from shame. 'Bad girls' had their day as well in 'Dime-A-Dance Hostess!' (1) and 'I Was A B-girl! in 4. Both spotlight young women entertaining men at night clubs. Say no more. The series ended with a parody of romance comics, but it isn't as funny as 'Love Must Be Earned' in 3. Here our young hunk spanks our heroine as she nearly runs him down, with the spanking panel the most badly drawn in the whole series! On the whole, the stories are carefully crafted, the better ones usually by EC mainstay and cover artist, Al Feldstein, who was the creative lynchpin. Other notable artists included Johnny Craig (working with Feldstein as F. C. Aljon), Graham Ingels, before he became 'ghastly', and early Wally Wood, usually working with Harry Harrison. Harrison was a decent solo artist himself, and Bill Fraccio completed the regular team. For the gist of a typical story here's a caption: "For a moment... that seemed like an hour... we did not speak! His kiss was still warm on my lips... his eyes holding mine! I swallowed hard..." *Ahem*.~HY

MODESTY BLAISE

DC: *One-shot 1994*

Surely a must for all Modesty Blaise fans, written by creator Peter O'Donnell and illustrated by Dick Giordano. It's the usual espionage adventure associated with the "sexy...seductive... deadly..." (so the back cover blurb tells us) crime boss. Modesty is lured out of retirement to rescue her old chum Willie Garvin. Naturally she does so with ease, and in return for their help, she in turn must help the British secret service on one of their missions. And that's when all the fun and action start. Fans of Dick Giordano's art won't want to miss this. His style is spot-on for the genre and very reminiscent of the wonderful Diana Prince, *Wonder Woman* stories he illustrated in the early 1970s.~HY

Recommended

MOEBIUS COMICS

Caliber: *6 issues 1996-1998*

If you think Moebius is one of the greatest artists comics have yet produced you'll be interested in this collection of intriguing odds and sods. If you're not so sure, go and read some of his masterpieces. Highlights include the follow-up to 'The Man From Ciguri' (itself the follow-up to the seminal 'Airtight Garage of Jerry Cornelius'), a labyrinthine, confounding tale that you have to let wash over you rather than try to understand. Plus there's old *Arzach* roughs, pencilled and inked by an interesting variety of artists, including Bill Stout in 1 and Steve Leialoha in 5. Less promising is the serialisation of the storyboards for 'Internal Transfer', a proposed animated science-fiction film expounding the philosophy of French parapsychologist and New Age guru Jean-Paul Appel-Guéry, whose ideas have influenced Moebius' work since the 1980s. In general, credos that are best put over as science-fiction epics are probably laughable, but make your own mind up. The series stopped publication with 6, promising to return when Moebius had done enough work to fill more issues, leaving the serials unfinished.~FJ

MOEBIUS Graphic Novels

Marvel/Epic: *12 volumes 1987-1995*
Dark Horse: *1 volume (0) 1992*
Graphitti: *1 volume 1991*

The career of French artist Jean Giraud neatly divides into two halves. As Gir he is the artist of the phenomenally successful Western series *Lieutenant Blueberry*, and as Moebius he is a more experimental science-fiction artist. Books 1, 5, 7 and 9 of the Epic series comprise the lengthy 'Gardens of Aedena' serial and all too potently illustrate Moebius' principal failing: he may well be a superb artist, but his stories all too frequently succumb to unfocused meanderings and unreconstructed neo-hippy waffling.

Luckily Epic's other albums are far better. *Arzach* (volume 2) contains some of his most breath-taking artwork and rather more incisive writing. Its eponymous pterodactyl-riding hero is also one of comics' most potent icons. *The Airtight Garage* (3), later reprinted as a miniseries by Epic, might well meander, but it's exquisitely drawn, while *The Long Tomorrow*'s (4) lead strip benefits from a terrific Dan O'Bannon script and an unusually dystopian feel. *Pharagonesia* (6) mops up the remaining science-fiction strips drawn by Moebius in the 1970s, and is generally a less essential purchase than its predecessors, though the short 'Rock City' tale is particularly good. By contrast, 8's *Mississippi River* is a Western written by *Blueberry* scribe Jean Michel Charlier, and although the art is rather rushed, the story is top-notch.

Elsewhere Dark Horse's *Horny Goof* (0) collects Moebius' more risqué material, while Graphitti's *Early Moebius*, numbered ½, effectively mops up the leftovers. Both are for completists only, although that's not to say there's nothing of interest. Of wider appeal are the three Epic volumes not comprising part of the numbered series, *Chaos*, *Metallic Memories* and *Fusion*. These are lavish collections of his art that are never less than amazing. Whatever his shortcomings as a writer, Moebius has always possessed an extraordinary technical ability, and one of the most unfettered imaginations in the business. For those uninterested in his writing these collections are the best place to appreciate his art.~DAR

Recommended: 2-4, 8, *Chaos*, *Metallic Memories*, *Fusion*

THE MOJO ACTION COMPANION UNIT

Exclaim Brand: *1 issue 1997*

Frightful old rubbish. The art is functional in sub-early Crumb style, but the strips have nothing to say and take a long time not to say it. At the risk of sounding like your parents, this is best read (if at all) under the influence of the mind-expanding substances with which it may well have been created.~FP

A MOMENT OF FREEDOM

Tome Press: *One-shot 1997*

Philip and Michel are devoted cousins who use the church to advance themselves only to drift apart as their vocations take them in different directions. Philip scales the Ecclesiastical ranks as Michel becomes an experienced Templar warrior. They are reunited when they independently uncover a church conspiracy to murder the Pope, leading the Templar to his own Crusade in a vainglorious attempt to tear down the corrupt Catholic system and replace it with God's real Religion. Ambitious, if pompous and heavy-handed historical thriller from writer/artist Michael Larson.~WJ

A MOMENT OF SILENCE

Marvel: *One-shot 2002*

Of all the comics so far prompted by the events of September 11th 2001, this is, surprisingly, the best. Tying in with Marvel's otherwise largely disappointing "Nuff Said" month, when all their comics told stories without dialogue, this offers dignified emotional snippets that never descend into saccharine sentimentality or chest-beating. Creators on hand include Mark Bagley, Brian Michael Bendis, Igor Kordey, Joe Quesada, John Romita Jr and Kevin Smith, and you'd have to be an extremely callous individual not to be affected by their work.~FP

Recommended

MOM'S HOMEMADE COMICS

Kitchen Sink: *3 issues 1969-1971*

Of historical interest as the first Kitchen Sink comic, 1 was a solo outing by Denis Kitchen, but a very tepid affair indeed. 2 featured a couple of nondescript non-Kitchen strips, so 3 remains the most interesting of the run. By then Kitchen had developed into a fine cartoonist and his fellow-contributors had grown to include Skip Williamson, Pete Poplaski and the underrated Jim Mitchell. Sadly, the writing was uniformly poor, making this one for completists only.~DAR

MONA

Kitchen Sink: *1 issue 1999*

A last gasp for Kitchen Sink, this Robert Boyd-edited anthology was published knowing that a second issue was unlikely. The main (though not compelling) reason for buying it is the reprinting of two mid-1970s Harvey Kurtzman humour strips from the French magazine, *L'Echo des Savanes* ('Dracula' and 'Women!'). Fans of Lorenzo Mattotti may also enjoy 'The Thinker's Secret', a pen-and-ink study of dream images. Of the rest, Tom Hart's Hutch Owens and 'King Bee' by J. Bradley Johnson are offbeat satires while Matthew Guest's 'I Sold My Soul to Satan' could be anything. Disappointing.~NF

THE MONARCHY

WildStorm: *12 issues 2001-2002*

This was developed from *The Authority*, issue 21 of which introduced the concept. Unfortunately, whereas that comic contained gritty storylines, larger than life characters and a wry sense of pitch black humour, *The Monarchy* was dull, convoluted and incredibly pretentious. The unnecessarily complicated storyline features black-ops, alien invasion, demons, otherworldly artefacts and such like, but Doselle Young's writing is so hackneyed and the characters so stereotypical that there's no concern about what happens. The only worthwhile thing is John McCrea's pencilling, but sadly even that suffers from garish colouring. The first six issues were collected, but this is one to avoid.~JC

MONEY TALKS

Slave Labor: *5 issues 1996-1997*

Dallas and *Dynasty* on acid is a fair description of this power-play masterpiece by Shane Simmons. The series is illustrated by a collage of talking heads from various international paper currency, hence the title! Ingenious or crude? Definitely the former. The story centres on the building of a railway in a midwest town and its effect on the various rich town-folk. Simmons' dialogue is witty and acid-sharp, and his triumph is in creating wonderful rounded characters with expressionless images. Resistance is futile: you will laugh.~HY

Recommended: 1-5

MONGREL

Northstar: *1 issue 1994*

Available in two editions, we have the usual Northstar topic of gratuitously violent slash and bash horror, this time with were-dogs on the loose with a grudge against each other. What makes the comic worth mentioning, though, is the expressive fine-lined artwork of Andrew Kudelka. Here is the work of a considerable talent in the making, and the making was obviously outside comics. Some guides list further issues, but we have been unable to verify their existence.~FP

MONICA'S STORY

Alternative Comics: *One-shot 1999*

Sly and ironic adaptation of the Monica Lewinsky scandal that plagued the latter years of the administration of US president Bill Clinton. Jon Lewis and James Kochalka, taking the Starr Report to the US House of Representatives as the starting point, produce a spot-on shaft of satire that hits all the harder for its deceptive use of simplistic, ingenuous cartooning and children's story-book style. A hoot for the newswatchers in the audience.~WW

MONKEY JANK

Fantagraphics: *One-Shot 2000*

This well-crafted smut fest, by Bob Fingerman, reprints and re-jigs short gag strips that first appeared in the sticky pages of *Penthouse Comix*, along with some brand new material. In a post-apocalyptic wasteland, horny riot grrls Monkey Jank and Cleeva Dejoon search, always in 'vein', for a non-mutated male member that will help relieve their sexual frustration. Readers may feel equally frustrated by the fact that Fingerman recycles exactly the same plot in every strip, while his pun-strewn dialogue will either amuse or irritate. If lines like "Face it, you're just a quippy chippy with a trenchant penchant for prong" don't float your boat, this probably isn't the comic for you.~AL

MONKEY WRENCH

Iconografix: *1 issue 1992*

A latter day underground anthology edited by Ed Brubaker and Josh Petrin. There's a general philosophical world-weariness to the varied contents of this comic. Star turns include cover artist Lloyd Dangle's Detroit Punkography memoir, J.E. Fullerton's masterful cautionary story The 'Hand Of Glory' and Jason Lutes' disturbing silent strip 'Suck'.~SW

MONKEYMAN AND O'BRIEN

Dark Horse: *One-shot 1996, 3 issue miniseries 1996**

A laboratory accident creates a dimensional rift that pulls through a giant intelligent ape, and has the side-effect of transforming Ann O'Brien into an Amazon. The ape is called Tiberius, and, once he's learned to speak English, he and Ann concentrate on finding the means to send him home. Unfortunately, other matters keep cropping up, including an invasion of Earth by frog-like creatures and a humanoid shrew and his army of animals. It's all light fun stuff very nicely drawn by Art Adams, with heavy references to old Marvel monster comics. The one-shot collects the original stories from *Hellboy*, and the odd couple also appeared in *Dark Horse Presents* 80 and 118-119. It's the best talking-monkey-and-female-partner comic since *Angel and the Ape*.~FP

MONKEYSUIT

Monkeysuit Press: *3 volumes 1999-2001*

Published by creators with experience in the animation field, the first volume of this excellent anthology features Michael Foran's 'Rover', the wordless, enigmatic adventures of an alien that takes Polaroids, wandering an oddly populated landscape. Ben Edlund offers a story from a series of Profiles in Tenacity, 'She Married a Bogeyman'. Pat Giles' 'The Big Problem with Marshall', begins with a tale of urban paranoia as a squirrel leads to Marshall's arrest, when he leaves his brother in his apartment to wait for an exterminator. Chris McCulloch's Secret Santa, dressed in black, brings seasonal cheer to prisoners of war, while Prentis Rollins presents a realistically drawn story about an old man, his grandson and some neo-nazis. The time-travelling caveman, Kamikaze Joe, is humanity's last hope of preventing disaster in Miguel Martinez-Joffre's Peter Bagge-style tale, and Rex Steele appears in a nazi-smashing, pulp adventure by Bill Presing, drawn in a very elegant, animation style. Willy Hartland's Delmar Doody is a weird pseudo-autobiography, and Jonathan Royce's 'Keef & Bruno' is whimsical surrealism.

The second volume (a.k.a. *The Bride of Monkeysuit*), presents further episodes of the strips by Foran, Presing, Martinez-Joffre, Giles and Royce and new short stories by Rollins and McCulloch. New contributors include Mo Willems, Heather Heath, Fariba Adams, and R. Sikoryak, who takes on Voltaire in 'Candiggy'. Of note, however, are Miriam Katin's reminiscences on the aftermath of war and those who do not return and Enrico Casarosa's 'Mia 1931', an anthropomorphic battle of the sexes in biplanes, and a homage to the work of Hiyao Miyazaki. *Viva La Monkeysuit* continues the strips by Giles, Presing, Martinez-Joffre, Katin, Casarosa (terrific), Heath and Adams, with new material from Foran, Rollins, Willems and McCulloch. This volume contains a greater percentage of new contributors, and though none are poor, the overall quality is not as high. Andrei Poteryaylo's 'The Adventures of Captain Pure and his Cat Chernoslir (Black Plum)' is angry, but does have beautiful lines, and Amanda Saah Baehr's 'Dad, I'm Not Gay' does raise a laugh.

All of the strips by the recurring cartoonists are worth a look, with the best of artwork coming from Foran, Presing, Royce and Casarosa, and though not perfect, it's hard to imagine a better anthology, with as varied a line up, than the first volume.~NF

Recommended: Volume 1

MONNGA

Daikaiju Enterprises: *3 issues 1995*

This grew from editor J.D. Lees' *Godzilla* fanzine and his desire to produce an American version of Japanese weekly manga publications, each as thick as a telephone directory. These clock in at a minimum eighty pages each, offering plenty of room for several stories. Sadly, though, despite breathing space, there's little depth of plot, although giant monster fans should be satisfied. The best story overall is 'Titanic Omega', with Lees proving he's got that manga style down pat mixing monsters, high school and a mystery, while artist Hikari Takeda is adaptable and inventive within a sketchy style.~WJ

MONOLITH

Last Gasp: *1 issue 1972*

Larrys Welz and Sutherland exercise their joint obsessions of naked women, dope, and fantasy for a series of slim stories and under-developed artwork. There is a vague anti-pollution and anti-war subtext, but the whole amounts to no more than a curiosity from the man who now devotes his time to *Cherry Poptart*. She appears in a two page space fantasy in all but name, here called Trina Tron.~FP

---

* Available in a collected edition

MONOLITH

Comico: *4 issue miniseries 1991-1992*

Daft plot, bad art and gratuitous gore make for a poor solo outing for the Elementals' Monolith, the 14-year-old able to transform into a three-ton stone giant.~WJ

Butler & Hogg's MONSTER

Slave Labor: *One-shot 1997*

'Vampire Love' is an unconvincing light-hearted tale set in a 19th century country house. It involves a little girl in a stuffy family, some weird sisters, a twerpish Belgian detective, and a huge were-hog with a big penis. It's weak stuff.~GK

MONSTER BOY

Monster: *1 issue 1991*
Slave Labor: *3 issues 1997-1998*

Grotesquely deformed, with one eye the size of a football, Bob Supina's Monster Boy has been a minicomics staple for over a decade. The strips are well drawn and funny without ever being compulsive, much in the manner of the TV show you'll watch if you're in the house, but won't set the video for if you're not. All comics feature Honko, extraordinarily surly clown pre-dating *The Simpson*'s Krusty, and the Slave Labor issues also have The Beer Bears, alcoholic cuddly toys.~WJ

MONSTER CLUB

Apcomics: *1 issue + 2002 to date*

Were Jamie Hewlett dead this would be the work of his reincarnation. As he's not, it's pretty shameless plagiarism of his style, right down to the almost non-existent plot, with a few thick lined manga touches thrown in. Kit Wallis has some talent, and he should be finding his own voice.~FP

MONSTER FIGHTERS inc.

Image: *One-shot 1999, one-shot ('The Ghosts of Christmas') 1999, one-shot ('The Black Book') 2000*

Five super-powered teenagers hire themselves out as monster fighters (once they've stopped quarrelling amongst themselves). Over the three issues, they face a comic fan's drawing brought to life, experience a variation on Dickens' 'A Christmas Carol' and try to protect a mystic bible from vampires, nazis, a gargoyle and a dragon, with help from a Mountie and some nuns. Writer, J. Torres offers something a little different from so many other superhero teams, but it's largely only glimpsed in these issues. The manga-style artwork is very muddy in the first, but Francis Manapul's artwork on the second two issues is cleaner and brighter.~NF

MONSTER FRAT HOUSE

Eternity: *One-shot 1989*

Heard the one about the manipulative werewolf, the put-upon vampire and the descendent of Frankenstein sharing a college room? No? Well this is the comic for you, particularly if you're also keen on seeing groups of college jocks get what many feel they deserve. There's the feeling of the creators having overdosed on 1970s Hanna-Barbera cartoons, and like them while this is no classic it'll provide a few laughs if pulled from the bargain box.~FP

MONSTER HUNTERS

Charlton: *18 issues 1975-1978*

Though there are exceptions, these horror stories are no better than average. Presented by Colonel Whiteshroud when the editors can be bothered, the hunters chase (or at least as often are chased by) a mix of traditional monsters and Lovecraftian elder gods. For fans there's decent artwork by Tom Sutton (2, 3, 8), Steve Ditko (2, 6, 8, 10) and Mike Zeck (4-7, 9) with all three occasionally writing as well. From 12, the series became reprint-only with the best issue being the all-Ditko 14. 9 is of most interest, with a full-length strip by Nick Cuti and Mike Zeck featuring a dark mansion and a mystery concerning the identity of a werewolf.~NF

Graham Nolan's MONSTER ISLAND

Compass Comics: *1 issue 1998*

A pair of pilots crash-land on a hidden island populated by monsters. Their relationship develops as they attempt to broach a solution to a conflict between two groups of them. The lead characters are appealing, and it's charmingly drawn by Graham Nolan, reliving the b-movies he watched on TV during his childhood. Wearing his influences on his sleeve however means there's nothing most readers haven't seen before, like as not several times.~WJ

MONSTER LOVE

Discovery: *One-shot 1993*

Part of Discovery's line of simple comics with 'good' messages for children, the one here being that everyone can have a loving relationship, no matter what they look like. It's recommended for ages 10 and up, but is probably more suitable for the under 10s and, anyway, they'd all be better off with Raymond Briggs's *Fungus the Bogeyman*.~GK

MONSTER MASSACRE

Atomeka: *One-shot 1993*
Blackball: *One-shot 1993*

The Atomeka anthology is stories pastiching 1950s and 1960s monster/superhero comics, with added 1990s gore and violence, from some of the industry's most noteworthy creators. Sadly, art by Dave Gibbons, Kev O'Neill and Simon Bisley can't compensate for awful scripts, although 'The Lords of Misrule'; short by John Tomlinson and Peter Snejbjerg is a little gem. The Blackball edition is a scaled-down and slapdash sequel featuring John Pain by Kev O'Neill, the truly awful Dagglok by Dave Elliott, Anthony Williams and Robin Smith, an unfathomable *Melting Pot* short from Kevin Eastman and Simon Bisley and a tedious cyberpunk heist story from James O'Barr and John Bergin. Big name rubbish.~WW

MONSTER MENACE

Marvel: *4 issue miniseries 1993-1994*

The brainchild of reprint editor Mort Todd, this anthology reprinted Stan Lee 'stinger' mystery stories from the early 1960s. Fans of Kirby, Ditko, Heck and Ayers could enjoy new drawings done by some of the surviving artists. Todd's imaginative packaging emphasised the kitsch appeal of pre-Marvel monster stories in the 1990s, including tongue-in-cheek covers by the likes of Kyle Baker to go with the title's over-the-top name.~SW

MONSTER POSSE

Adventure: *3 issue miniseries 1992*

Isn't it amusing that outside the major publishers it's always the most amateurish and inept creators who insist on their name being cover featured. Step forward Greg Boone, writer of overwrought rhyming captions and dialogue, and sketchy artist, whose loveable little tykes pray before a mission and see off nasty space monsters and a cowboy on his robo-steed. The bizarre decision to utilise rhyming dialogue throughout coupled with the strange morality puts one in mind of Edward Gorey, to whom the reader is directed to see rhyming stories about monsters turned out with talent.~FP

MONSTER WORLD

WildStorm: *4 issue miniseries 2001*

Five seven-year olds, in suspended animation during a twenty year space flight, are unexpectedly (and possibly deliberately), forced to crash-land on a strange world that shouldn't exist, populated by all of the monsters of human nightmares. Separated in the landing, the children must fight their way across the planet to be re-united, but do gain some allies along the way. Scott Lobdell's script is witty and captures the youthful heroism of the characters, whose

minds have matured faster than their bodies whilst in hibernation. Carlos Meglia's big-foot, anime-influenced artwork is splendid, full of depth and detail.~NF
Recommended: 1-4

Mike Manley's MONSTERMAN

Image: *1 issue 1997*

Monsterman walks the Earth afflicted by a curse that transformed him into a giant monster. It's adequately written and adequately drawn by Mike Manley, but deserves no more investigation. The treat of this comic is the back-up strip 'The Messenger' about a rogue psychic, with an intriguing script and some superb Jerry Ordway art. But then has he ever drawn a bad page? Both characters previously appeared in *Action Planet Comics*, and solicited further issues never appeared.~FP

THE MONSTERMEN

Dark Horse: *1 issue 1999*

Writer and artist Gary Gianni appears to have spent so long on his overworked inking style that he didn't have time to fashion a coherent or satisfying storyline for this turgid tale of demons, mystic skulls and the Himalayan Yeti. Readers previously unfamiliar with lead characters St. George and Benedict will still be none the wiser by the end of this meandering mess, which tries, but fails, to recreate the gothic ambience of such supernatural pulp thrillers as The Shadow and Doc Savage. The comic also features a slight but entertaining Hellboy back-up by Mike Mignola, which, in comparison to the lead feature, is a model of wit and clarity.~AL

Dark Horse MONSTERS

Dark Horse: *One-shot 1997*

A special that celebrates no-nonsense, no-plot monster mayhem, reprinting four stories from *Dark Horse Presents* 33 and 47. Other than Tim Truman, the strips are the work of relative newcomers and unknowns, and none of it is particularly inspiring.~WW

MONSTERS FROM OUTER SPACE

Adventure: *3 issue miniseries 1992-1993*

Will Jacobs and Gerard Jones dredge up memories of every piece of late night sci-fi silliness they've seen, then throw in some fine comic dialogue and extrapolation for a very amusing piece of nonsense. Naïve young lad Tommy is exploited by the capricious hero Space Fargo, a man with a secret, as the pair try to expel the aliens who conquered the Earth decades previously. Artist Gary Yap is not yet the finished article, but conveys the comedy well enough. This is the writers' second try at the plot, having first attempted with a very obscure title called *Tommy and The Monsters*, re-jigged for the first issue.~WJ

MONSTERS, INC.

Dark Horse: *One-shot 2001*

James P. ('Sulley') Sullivan is shaggy and blue and has a friend and assistant, Mike, who's pretty much all eye. Sulley's job is to leap out of the closets of children, capturing their screams to power the city of Monstropolis. Things start to go wrong for Sulley when a child enters Monstropolis (thinking he's a 'kitty') causing mayhem and thrusting Sulley into the midst of a plot by his rival to use a terrible machine to suck the screams out of children. This adaptation largely follows the animated film's look and humour, but compressing the action and so adversely affecting the pacing and sense in places. The comic's not bad, but can't compete with the film.~NF

MONSTERS ON THE PROWL

Marvel: *22 issues (9-30) 1971-1974*

The numbering continued from *Chamber of Darkness*, as the title slowly phased out new contributions to become another of Marvel's myriad 1970s titles reprinting their 1950s and early 1960s mystery shorts. What differentiated *Monsters*, though, was that the stories were slightly longer than the usual five-page shorts. And, of course, they had such magnificent titles as 'I Defied Godmdullah, The Living Mummy' (in 12 if you really want to know). The last vestiges of the new material were unremarkable shorts in 9-15, the latter being Steve Englehart's first published comics, and 11 being drawn by Ralph Reese. 16 has a Kull The Conqueror story, and thereafter it's reprints all the way, with Ditko and Kirby in most issues.~FP

MONSTERS UNLEASHED

Marvel: *11 issues, 1 Annual 1973-1975*

These are large-format, seventy-four-page horror comics, heavily dominated by werewolf stories. Only a few stories really stand out. The very best have artwork by Ralph Reese: 'Skulls in the Stars' in 1 (written by Roy Thomas) and 'The Roaches' in 2 (written by Gerry Conway). 'The Strange Children' in 6 (uncredited) puts an unsettling twist on the Pied Piper story, and 'Beauty's Vengeance' is a well-told tale about inner value versus outer glamour – it's a shame that the artwork has the two women looking almost identical (or is that the point?), but the story still works.~FC
Recommended: 1, 2

A MOON, A GIRL... ROMANCE

EC: *4 issues (9-12) 1949-1950**

The numbering is continued from that of EC's superheroine Moon Girl and the title changed to Weird Fantasy with 13. As one might expect from EC, even their romance titles courted controversy during their brief runs. Attempted suicide in 'I was Jilted and Had no Desire to Live' and a public spanking at the end of 'I was a Flirt' was accompanied by Moon Girl's last appearance in 9's 'I was a Heart Pirate'. The age taboo of 'I Thought I Loved My Boss' in 10 and the toyboy behaviour of a feckless ski instructor in 'Hearts Along the Ski Trail' in 11 continued the catalogue of touchy, well-observed subjects. Two jail-themed stories 'Prison Widow', about a woman being tempted whilst waiting for her convicted husband, and 'Not Worthy of Love', about an ex-con girl's lack of self-esteem, in 12 sat with the classic hospital drama 'Blind to My Real Love'. In terms of writing these are fairly decent romance scripts, which is to say they're wordy, sentimental and moralistic. Entertaining subject-matter and solid artwork make this a cut above the romance fare of the post-war period. Harry Harrison writes and lays-out for Wally Wood and there are surprisingly good stories by Graham Ingels in each issue, as well as work by Al Feldstein, Walter T.Johnson and others. The entire run is reproduced in a boxed set alongside Saddle Romances and Modern Love.~SW

MOON KNIGHT

Marvel: *Series one 38 issues 1980-1984, 6 issue miniseries ('The Fist of Khonshu') 1985, series two ('Marc Spector...') 60 issues, 1 Special 1989-1994, one-shot ('Divided We Fall') 1992, 4 issue miniseries 1998, 4 issue miniseries 1999*

Introduced in *Werewolf By Night* 32, to all intents and purposes Moon Knight was Batman in white. More Werewolf appearances led to numerous guest spots and a solo tryout in *Marvel Spotlight* 28-29 before a back-up slot was allocated in *Hulk Magazine*. Writer Doug Moench, who'd created Moon Knight, was teamed with artist Bill Sienkiewicz, then still very much the Neal Adams imitator, for stories reprinted as *Moon Knight Special Edition* 1-3. Another solo in *Marvel Preview* 21 prefaced series one, the best run, keeping Moon Knight detached from the Marvel Universe, and usually from costumed foes. 1-12 are okay and 14 and 15 a false glorious dawn, but stay well away from the extremely pedestrian 16-21. The series begins to peak with 22, by which time Sienkiewicz is inking his own pencils and developing into an artist of singular stature with a recognisable individual style complementing his always bold layouts. By this point there's an undercurrent of emotional tension, combined with startling plays on tired themes. Try 'Stained Glass Scarlet' in 14, 15's 'Ruling the World From His Basement' or 'Hit It' in 26 for very different stories, each imparting the feel of the series. Even after Sienkiewicz the artwork is class, with Bo Hampton on 34 and 36-38 and Kevin Nowlan making an excellent début in 31-32, but Moench's departure with 33 hurts.

---

* Available in a collected edition

In the miniseries Alan Zelenetz reinforces Moon Knight's ties to the Egyptian Moon God Khonshu, a theme introduced towards the end of the first run, and reduces what was once a vibrant title to the mundane. The second ongoing series has Chuck Dixon, Sal Velluto and Mark Farmer (later Tom Palmer) conveniently forgetting the Egyptian mythology and returning Moon Knight to the streets. There's an emphasis on the costume and guest stars, and the introduction of a Robin figure is a definite mistake, but rectified in gruesome fashion. In 15-18 Moon Knight is tried for a crime committed when he was a mercenary, and those enjoying it will probably like any issue before 25. While Dixon turns out a good adventure yarn, characterisation's not his forte, so J.M. DeMatteis is a welcome change. 'Scarlet Redemption' in 26-30 closes the entwined destinies of Scarlet and Moon Knight in poetic fashion for the best story of the run, helped along by sympathetic art from Ron Garney and Tom Palmer. A sprightly one-shot return from Dixon in 34 paves the way for new writer Terry Kavanagh, under whom Moon Knight receives a new supporting cast and is transformed into a gimmick-laden, heavily armoured fighter. Maybe Kavanagh wanted to write *Robocop*, but missed out. That apart, his tenure features novel concepts, some of which work while others stink up the house (Frenchie's unknown past in 50, for instance: if his was an important, guarded bloodline would he really have been a mercenary?). Of the more workable concepts, 42 showcases alternate Moon Knights and 46 features a quest for a possible successor. Unfortunately, it's Knights Templar and demons galore that come to dominate, although Stephen Platt's distinctive art in 55-57 and 60 goes some way to compensating. The best Moon-Knight of this period, though, is Bruce Jones reprising *The Manchurian Candidate* in 'Divided We Fall.

Moench returns for the 1992 special, which is of greater interest to *Master of Kung-Fu* readers, and for the later Mark Texeira drawn miniseries. Both are seriously flawed but also partial returns to form, the 1998 series being well padded even if it does include all Moon-Knight's better known foes. The 1999 series weaves together numerous Fortean topics with alleged CIA experiments and conspiracy theories to dull effect.~WJ

Recommended: Series one 14, 15, 24-26, 31-33

MOONDOG

Print Mint: *4 issues 1969-1979*

A collection of tales of a post-cataclysmic world where few machines still work and humanity has adopted a variety of social structures to survive. The Moondog of the title and lead strips is a blind shaman on a quest for the mythical Western Lands. Along the way he undergoes various mystical experiences. George Metzger's idealistic hippie philosophy provides an individual viewpoint, but ultimately the scant compensation doesn't reward struggling through the awkward writing and art.~FP

MOONFIGHTING

Harrier: *1 issue 1988*

Beyond a brief admiration for their vocal dexterity, impressionists are rarely very funny. Their sources generally have better material and are better at putting it over. And so it is with homage comics. Exhibit A: this *Moonlighting* tribute set on the moon (get it?) in the 2080s with charmless drunken idiot Bruce Gillis and "Cybil". It's just like the real thing except feeble.~FP

MOONSHADOW

Marvel/Epic: *12 issue limited series 1985-1987**

DC/Vertigo: *12 issue limited series 1994-1995*, one-shot ('Farewell Moonshadow') 1997*

Dire piece of whimsy, mistakenly hailed as a work of genius by out-of-date Goths and mawkish fops everywhere. John J. Muth illustrates, rather than draws a comic, but this is unsurprising given the meandering nature of J.M. DeMatteis's script, which lends itself to paneless pictures and floating word balloons. The series' coda, 'Farewell Moonshadow', is more a story book, with full-page illustrations against pages of text. The tale's all about the wonder of childhood and escaping harmful reality through your own fantasy world until you reach your personal nirvana, and is shot through with references and endless quotes. Like so many others, DeMatteis had been impressed by Alan Moore's technique of enriching a regular comic story with the cultural baggage of western civilization via a medley of quotations. Unfortunately he can't tell the difference between an apposite phrase that replaces dialogue and a meaningless repetition of the narrative in someone else's words. Not that his own are up to much. Is '"Sometimes," Moonshadow replied, "I love you so deeply, I don't know where you end and I begin"' ironic, do you think? Or is it simply that in the 1990s rehashed 'Obsession for Men' commercials can aspire to high art? Probably the most pretentious twaddle ever produced in comics.~FJ

MOONTRAP

Caliber: *One-shot 1989*

Decent art from Gary Kwapisz stands out on this adaptation of a film about killer robots being discovered on the moon. It's fun in B-movie fashion, and it's not often that a screenwriter adapts his script for comics as Tex Ragsdale does here.~WJ

MORBID ANGEL

London Night: *One-shot 1995, one-shot (½) 1996, 3 issue miniseries 1997, 3 issue miniseries ('To Hell and Back') 1997*

Everette Hartsoe scripts the tale of Brandon Watts, who accidentally releases Anvil, The Devil's Disciple when he reads a spell from a magic book. He is transformed into a Morbid Angel, meaning his physique buffs up and he gets bat wings and the ability to create weapons out of thin air. He sacrifices himself and his soul to banish Anvil to Exile (sort of Hell's waiting room) where he has to stand guard to prevent demons escaping to Earth. Gives new meaning to the term God-forsaken.~WW

MORBIUS

Marvel: *32 issues 1992-1995*

Briefly the star of *Fear* in the 1970s, Morbius returns for a creatively more successful run. The series starts out as a standard slasher title, but around 5 penciller Ron Wagner seems to have read a stack of Russ Heath-drawn comics and the visuals get a great deal better. The attempts of Morbius to rid himself of 'Living Vampire' status and regain his humanity are genuinely poignant and some of the twisted individuals he encounters on the way disturbing in the extreme. Sadly the comic peters out in a slew of inferior artists and pointless crossovers towards the end.~HS

MORE THAN MORTAL

Liar Comics: *4 issues 1997-1998*, 3 issue miniseries ('Sagas') 1998*

Image: *6 issue minisries('Otherworlds') 1999-2000*

In the Liar series, reprinted two issues to a 'collected edition' by Image, 17th century Irish waif Derdre comes of age, rids herself of demons and learns of a connection to Ireland's protector. Series creator Sharon Scott delivers a story that may appeal to fantasy fans, if a little heavy on the inserted background research. Brian Holguin trawls Derdre through the realms of assorted other deities in 1-4 of the Image series, which is more enjoyable if an excuse for avoiding a plot. The joy of *More Than Mortal*, though, lies not in the story, but in the progress of penciller Steve Firchow. Beginning as a talented amateur, his sense of layout and design improves in leaps and bounds, and his absence after 4 is a loss, when it's back to the grand design as Scott returns. Unless you're completely seduced, avoid the two part teaming with *Lady Pendragon*.~WJ

MORGANA X

Sky Comics: *1 issue 1993*

A female assassin who's not a balloon-breasted bimbo is a novelty, and while two of the three stories here depend a little too much on a conveniently introduced surprise near the end, this is a decent effort with promising art from Allen Freeman. Planned to be a miniseries, this was the sole issue published.~FP

MORLOCK 2001

Atlas: *3 issues 1975*

Those looking for that elusive *Fahrenheit 451* / hideous-plant-creature crossover comic need look no further, though for less committed readers this remains a fun, if undemanding, title. 2 features mainstream comics' only *Clockwork Orange* tribute and 3 boasts the unique artistic pairing of Steve Ditko and Berni Wrightson!~DAR

MORLOCKS

Marvel: *4 issue miniseries 2002*

At Marvel, the Morlocks are the more unsightly mutants who live underground, in this case in Chicago, a city that has regular Sentinel sweeps to root them out. Each of the team here has a mission to accomplish, with which they will be aided by the others. Once everyone's had their turn they'll part. Geoff Johns creates a diverse cast, and Shawn Martinbrough suitably dark artwork, and contrasting designs. It's not top rank, but certainly achieves its aim of being a decent mutant miniseries.~FP

MORNINGSTAR SPECIAL

Comico: *One-shot 1990*

Bill Willingham combines his love of superheroes and fantasy for a whimsical tale of revenge and ineptitude. Morningstar, the fire portion of The Elementals, is adjusting to life with her new husband who is the Merlin of legend, inhabiting a magical kingdom. Accompanied by the assassin Fantasia, Morningstar takes a tour of her husband's world in a slapstick adventure eschewing the predictable superhero trappings. Willingham's decorative art compensates for frequently defective figurework, but fans of his work in general will probably enjoy this.~FP

MORPHOS The Shapechanger

Dark Horse: *One-shot 1996*

Geneticist, Kyra, stumbles across the resting place of Merlin and is given a strand of hair with which to create an advanced human, who will save the world by being a brother to all creatures. The first of a proposed four issue series, both creators, Burne Hogarth and Harry Hurwitz, died before its completion, though the detailed plot for the remaining issues is included here. There's an urgency and delirium to the storytelling, which relies heavily on often unnecessary exposition, but Hogarth's almost psychedelic artwork is radiant.~NF

Terry Pratchett: MORT A Discworld Big Comic

Victor Gollancz: *One-shot 1994*

Mort is chosen by Death to be his apprentice and marry his adopted daughter. When Death is encouraged to take some time off, he leaves Mort to act in his place. So when Mort saves rather than takes the life of a princess, the scene is set for something to go horribly wrong as 'what should be' meets 'what is'. Adapted by Terry Pratchett from his own novel, this is a surprisingly melancholic comedy, though there's a lot of character and humour in Graham Higgins' artwork. On the whole it manages to avoid mawkishness and if the style of humour is new to the reader, may even elicit some laughs.~NF

MORT The Dead Teenager

Marvel: *4 issues 1993-1994*

Teenage life as seen by wrinkly Larry Hama and possibly not so wrinkly Gary Hallgren. Mort cops it in true teenage fashion playing chicken in his dad's car, but is returned to haunt family and friends. No classic, but some amusing moments. The best issues are the first, featuring Teen Death, and the last, in which Mort sees how his life would have turned out had he not died.~WJ

MORTAL KOMBAT

Malibu: *7 issue limited series (0-6) ('Blood and Thunder') 1994, 3 issue miniseries ('Goro, Prince of Pain') 1994, 2 issue microseries ('Tournament Edition') 1994-1995, 2 issue microseries ('U.S. Special Forces') 1995, 3 issue miniseries ('Rayden/Kano') 1995, 6 issue miniseries ('Battlewave') 1995, one-shot ('Kung Lao') 1995, One-shot ('Baraka') 1995, one-shot ('Kitana and Mileena') 1995*

Taking the characters from the favourite videogame punch-'em-up and attempting to give them life and motivation was never a promising idea likely to produce top literature or art, but it didn't have to be quite this dreadful. 'Blood and Thunder' 1 sets up a good vs evil scenario from a martial arts tournament, and from that point more characters are introduced in more series, and they fight. Appalling throughout, with no single redeeming feature.~FP

MORTAL SOULS

Avatar: *3 issue miniseries 2002**

Eric Sharpe's a detective hunting a woman who appears to be killing at random, but repeatedly. When he catches her and kills her, however, she passes on the ability to see the Qelipoth, the soulless but still walking dead. Steven Grant mixes genres (there's a bit of police procedural, detective, thriller and horror), but loses it trying for a comedy payoff. Phil Xavier's artwork, however, is moody, realistic and detailed with only occasional lapses.~NF

MORTY THE DOG

Starhead: *1 issue 1989*

Underground style comic strips from cartoonist Steve Willis featuring a surly, foul-mouthed talking mutt. Pedestrian stuff reprinted from Willis' self-published mini-comics, it's self indulgent and drearily unfunny.~WW

MOSAIC

Sirius: *5 issues 1999**

The story of Mosaic, a $6,000,000 patchwork man who is the most notorious mercenary in Hell City. It's a world populated by gangs, whores, hitmen, reanimated corpses, beasts, pimps and christians. Kyle Hotz' anally-rendered dance of texture and shadow evokes the preponderance of leather, tattoos, chains, stubble, ever-present cigarettes and perpetual bloodshed admirably. Moe finds himself protecting a customer and many of his prostitute friends from a person he murdered four years previously. Truly gothic with a hint of mysogyny.~SW

Green Lantern MOSAIC

DC: *18 issues 1992-1993*

Gruesomely ugly covers can hardly have been an inducement to buy the adventures of the third string Green Lantern, John Stewart, and neither can an almost impenetrable first issue. Furthermore Gerard Jones' writing is so florid you'd swear he was having an obscure joke, except it's a tiresome one after eighteen issues. A world is colonised by settlements abducted along with their environment in *Green Lantern* series two 14-17, and John Stewart is appointed to oversee this experiment in co-operation. The premise offers scope for novelty, political and social commentary and other items of interest, and Jones expended a considerable amount of effort on background, creating 40 new alien races complete with functions and social structures. Unfortunately his odd style of storytelling combined with Cully Hamner's plain unappealing pencils and the deliberately unsympathetic character accorded Stewart allowed little to flourish. Occasionally a stronger idea pushes through the mud, such as 4's story of inquisitive children, and 17's tour of the resident communities has some nice moments, but overall *Mosaic* is promise unfulfilled.~WJ

---

* Available in a collected edition

MOSTLY WANTED

WildStorm: *4 issue miniseries 2000*

Well, should you be missing the anorexic space-nun issue of *Penthouse Catfights* or not be able to get hold of any version of *The Hitchhiker's Guide to the Galaxy* or Red Dwarf, this might substitute. Contains some bondage, much obscenity, weak humour, a bit of *Thelma and Louise,* and, courtesy of Scott Lobdell, the worst transcription of Scottish since Moira McTaggart from Muir Isle: all the linguistic sophistication of Little Plum the Native American boy in *The Beano.*~GK

MOTHER SUPERION

Antarctic: *One-shot 1997*

A *Warrior Nun Areala* spin-off by Patrick Kelly, rich in the usual shotguns, demons, and split-skirt habits, but crudely illustrated with an unprecedented idiosyncratic colour sense. What Antarctic spent on paint, they could have saved by just vomiting on the thing, without greatly affecting the results.~GK

MOTHER'S OATS

Rip-Off: *3 issues 1969-1977*

A major drawback to some underground titles is the proselytising about mind-expanding substances by illustrations purporting to represent the experience of tripping. To a contemporary reader they just make f or bad comics. Of the two major contributors, Dave Sheridan started well and developed into an excellent cartoonist, best appreciated in more restrained mode in the 1977 issue. Fred Schrier is an even better artist, decorative and ornate, but his material is very much mired in the times it was created. Look, but don't read.~FP

MOTORHEAD

Dark Horse: *One-shot 1993, 1 Special 1994, 6 issues 1995-1996*

Introduced as part of the *Comics Greatest World* series, Motorhead saves the day in the Steel Harbour section, and his 1994 special is more a Steel Harbour special, featuring Wolf Pack and serving as an introduction to the *Barb Wire* series. Frank Fletcher is empowered by an alien presence in his head calling itself The Motor, and although Motorhead appears virtually all-powerful it comes with a price of constant cerebral chatter. For the series The Motor is personified as a sort of mental Joker, Fletcher is given an old-fashioned carnival as a supporting cast and there are regular glimpses into his past. Kudos to Dan Chichester, Karl Waller and Timothy Bradstreet for attempting something different, but the series is as irritating as it is innovative.~WJ

MOTORMOUTH

Marvel UK: *12 issues 1992-1993*

Foul-mouthed street urchin Harley Davis finds a new pair of sneakers with dimension-hopping capability. Yep, it's those wacky Mys-Tech evil scientists looking for test subjects again, with their loopiest scheme yet! Nicknamed 'Motormouth' for no particular reason, Harley rapidly acquires sonic powers as a result of Mys-Tech interference, and a sidekick looms in the form of lovable homicidal maniac Killpower, who shares cover billing from 5. Art by Gary Frank, in 1-4, doesn't save this ill-advised attempt at a superheroic Tank Girl from meandering to an early end.~HS

M.REX

Image/Avalon: *One-shot ('Special Preview Issue') 1999, 2 issues 1999*

Comedy adventure set in the near future when sentient machines choose the occasion of a charity cruise to declare war on humanity, targeting actress, Mia Moore and animal benefactor, Simon Babbage as the first casualties. Fortunately, White Knight and Six, of clandestine group, Providence, are on hand with their trained monkeys, but it takes young thief, Rex, to save the day using his newfound power to create and control machinery. The preview issue has background stories and information. Duncan Rouleau's anime-influenced artwork is bright and attractive, but writer Joe Kelly's cleverness is too often at odds with clear storytelling. Perhaps needless to say, this being an Image comic, but the story remains unfinished.~NF

MS FORTUNE

Image: *1 issue 1998*

In a rare instance of the comic market refusing to be suckered by a title blatantly pandering to adolescent hormones, *Ms Fortune* was drastically under-ordered, and further issues were never published. Breasts are globular and few nipples are left unaroused by Chris Marrinan, as his martial arts expert heroine resigns from her covert agency, but just can't avoid monsters, demons and former Nazis. It's intended as pastiche, but is so sleazy that you imagine Marrinan retreating to the corner of the studio with a towel after finishing each page.~FP

MS. MARVEL

Marvel: *23 issues 1977-1979*

Another of Marvel's attempts at a liberated superhero. Carol Danvers was a love interest in the late 1960s Captain Marvel series. In 1977 a near-fatal attack led to her dying wishes being fed into a nearby "Psyche-Magnitron". She became a female copy of Captain Marvel... but with bare legs and midriff. Hence the sobriquet 'Ms.', presumably. Now with super strength and flight, she also possessed a precognitive "7th Sense", possibly intended as a magnified women's intuition. The numerous similarities between this and DC's Supergirl (same surname, male counterpart, cheesecake costume, and penciller Jim Mooney) are hard to ignore. Scripter Gerry Conway should take most of the blame for the utterly unreadable early issues. Fortunately, he was relieved by Chris Claremont with 3, who gave Carol a family, a past and a supporting cast, and allowed her to come to terms with her Kree superpowers in 13. The subsequent build-up to 19's climactic meeting with Captain Marvel and the Kree Supremor displayed all of Claremont's skill as a weaver of subplots and characterisation. He also introduced many characters of later significance to his *X-Men,* which indeed also featured Carol herself, who eventually became The Starjammers' Binary before reverting to Warbird in *Avengers.* Villainesses Deathbird and Mystique (then known as Raven Darkholme) débuted in 9 and 16 respectively. Numerous guest appearances include The Avengers in 18 and Vance Astro in 23. Dave Cockrum stepped in with a spectacular redesign of the character in 20, but it was too late. What would have been 24 and 25, originally drawn in 1979, featured appearances by Sabretooth and Rogue and surfaced in *Marvel Superheroes* 10 and 11 in 1992.~SW

Recommended: 19-21

MS MYSTIC

Pacific: *2 issues 1982-1984*

Continuity: *Series one 9 issues 1987-1992, series two 3 issues 1993*

It's hard to believe that at one point comics fans 'in the know' thought that Neal Adams' *Ms Mystic* (announced years before it actually surfaced) would the be future of ground-breaking comics. Instead it was a load of New Age nonsense vaguely articulated by a superheroine who, despite coming to save the world, seemed to do nothing, exciting or otherwise. Neal Adams' Continuity Comics reprinted the Pacific issues before offering seven more tiresome instalments of her adventures. The second series was a 'Deathwatch 2000' crossover which looks like it was knocked out in a hurry, with more "Continuity Studios" than Neal Adams input.~FJ

MS TREE

Eclipse: *9 issues 1983-1984*
Aardvark-Vanaheim: *9 issues (10-18) 1984-1985*
Renegade: *32 issues, 3 Specials (19-50) 1985-1989*
DC: *10 issues 1990-1993*

Crime novelist Max Allen Collins is responsible for this hard-boiled detective strip, very much patterned after Mike Hammer but with a much greater emphasis on detection and mystery (as you might expect given the detective's name). Michael Tree's husband is a detective who's killed by the mob, specifically the Muerta family, and throughout the series her vendetta against them is a constant factor that provokes trouble with the law on several occasions. It culminates in an arrangement of sorts when Ms Tree's adopted son falls in love with Dominique Muerta's daughter and the two team up to rescue their kidnapped children. This running theme of vengeance helps maintain momentum in the strip, but doesn't distract from other, non-Mob- related cases that are often picked out as having a particular resonance at the time (crimes against children are a special bug-bear), and Collins regularly has to question Ms Tree's readiness to exact her own, lethal justice, even having her committed at one stage. Overall, an impressive series that's willing to tackle many different aspects of crime and punishment, always in an unsentimental but not detached manner. Terry Beatty's artwork is rather stiff and unexpressive but works well in context.

Mike Mist is also a detective, again by Collins and Beatty, whose back-up strip involves short mysteries which you're invited to solve before the final (upside down) panel reveals all. From 36, Johnny Dynamite was added for financial reasons. Unfortunately, Pete Morisi's tough detective, reprinted from the Charlton series, has dated rather badly. There are also three specials, *1950's 3-D Crime* (1987), primarily Johnny Dynamite in 3-D, *Rock & Roll Summer Special* (1986) and *Ms Tree 3-D* (1985), both of which feature Mist and Tree together. They're all worth reading, though none stand out as being exceptional.

At DC the title changed to *Ms Tree Quarterly*, giving Collins and Beatty the time and space to produce single (but not completely unconnected) stories for each issue. Leaving aside most of the Mob connections, Ms Tree is still involved in murder mysteries but there's also a haunted house, Ms Tree's pregnancy and her subsequent fight to keep the child from its grandfather (4-10). 'Midnight' was revived as a back-up, written by Ed Gorman, but it's hardly compulsive reading. 1-3 include illustrated text stories: Batman by Denny O'Neil and Mike Grell in 1 and The Butcher by Mike Baron and Shea Anton Pensa (2-3). 6 is probably a good place to start and is less reliant on knowledge of Ms Tree's past.~NF

MUKTUK WOLFSBREATH: Hard-Boiled Shaman

DC/Vertigo: *3 issue miniseries 1998*

Written by Terry LaBan with artwork by Steve Parkhouse, and based on the ideas in LaBan's short stories in *Cud* 1 and 7. Muktuk is a hard-boiled detective who is also a Siberian shaman, and his cases involve fighting demons and entering trances to descend to the Lower World for negotiations with the Great Mother. At eight pages a piece in *Cud*, this was exciting, mind-expanding stuff, but it founders as a miniseries. There are few ideas that were not in the original stories, and the pacing is too slow to make it work as a pastiche of the hard-boiled style.~FC

John Jakes' MULKON EMPIRE

Tekno: *6 issues 1995*

Industrial sabotage and dynastic manoeuvring in outer space. As with other Tekno series the name in large print on the cover, Mr. Jakes, is present only as a figurehead. Kate Worley, who sadly evinces none of the charm and wit characteristic of her *Omaha* work on this lumpy, ponderous object, does the actual writing. John Watkiss' fine pencils are slaughtered by Alex Niño's gloppy inking.~HS

The MUMMY

Monster Comics: *4 issue miniseries 1991*

Scott Beaderstadt produces a loving, if not particularly entertaining homage, to the Boris Karloff/Universal Pictures Mummy movies, full of brooding monochrome, trenchant stares, monomania and reincarnation. For bandage boosters only.~WW

MUNDEN'S BAR

First: *2 issues 1988 & 1991*

Annuals spun off from the popular back-up in First's *Grimjack*. 1 features a Fish Police crossover by Steve Moncuse, plus some nice art by Steve Rude and Brian Bolland, while the second has both Omaha and Teenage Mutant Ninja Turtle stories.~FJ

THE MUNSTERS

TV Comics: *2 issues 1997*

Plots and dialogue are so faithful to the TV show, you can almost hear the canned laughter as the pages turn. The cartoony art also suits, and as the TV show's been cancelled for thirty years this is the nearest you'll come to new episodes.~FP

MURCIÉLAGA SHE-BAT

Heroic: *3 issues 1993*
Studio G: *3 issue miniseries 2001, 1 issue + 2002 to date*

Heroic Comics 1 contains reprints from *Robo-Warriors*, in which Murciélaga is introduced as one of the Reiki Warriors, a team of young fighters recruited by Sifu, an ancient Asian teacher fighting the drug dealers of Baboso. Murciélaga, real name Mega, has super-hearing and martial arts skills, and uses them to fight injustice in her local community. The miniseries is a bilingual flipbook, with English language strips on one side and Spanish language strips on the other. 1 recaps her origin after she's fought an arsonist, and introduces her friend, Soliloquy Jones. The Spanish story concerns three witches, the Tribruxa (printed in English in 3). The English strip in 2 is a reprint of a fight against Gams (she has very good legs), while the Spanish strip reprints the English one from 1. The English strip in 3 is the Spanish one from 1, while the Spanish strip is the English story from 2. Sifu returns in the new series. Creator, Dærick Gröss Sr (stylistically mixing Will Eisner and Marshall Rogers) is responsible for most of the writing and artwork.~NF

MURDER

Renegade: *3 issues 1986*

Actually a continuation of Robin Snyder's *Revolver, Murder* is a showcase for some of Steve Ditko's early to mid-1980s short, EC-style stories and Rich Margopoulos' adaptations of Poe's 'Eleanora', 'Ligeia' and 'Morella' (mainly text with illustrations by Dan Day). Single-page strips by Henry Boltinoff seem out of place but are good for a bit of nostalgia, while Alex Toth's two-pagers on the nature of drawing in 1 and 2 are slight but gorgeous. 3's 'I Wonder Who's Squeezing Her Now' by Wally Wood, Nick Cuti and Ernie Colón turns the predictable shock ending on its head and is the highlight of the series, even if it is reprinted from 1984.~NF

MURDER BY CROWQUILL

Amazing Montage Press: *1 volume 1999*

This huge black and white anthology of mostly short strips on a loose mystery theme, was issued in hopeful aid of the Comic Book Legal Defence Fund. It's a very smelly potpourri, including tales of noir crime, jokey media-created serial killers and their fans, paranoid fantasies about government agencies, EC homage horror, tedious would-be clever stuff about the 200 year old Sherlock Holmes, a silly Batton Lash updating of Hamlet with psychic lawyers, and some sentimental whimsy, mostly pretty amateurishly drawn. Inevitably there are a couple of standouts: A nasty four-pager about a dog, a cat, and a baby by Joe Lansdale and Tim Truman, and Jesse Reklaw's wry 'Spaced Out', which treats analogues of the Scooby Doo crew as if they were real 1970s kids and has authentic vintage underground flavour, even beyond the sex and drugs.~GK

MURDER CAN BE FUN

Slave Labor: *12 issues 1996-1999*

Hit or miss comic strip adaptations of articles from John Marr's fanzine of the same name, devoted to the weird and scandalous demise. Themes include Disasters (1), Dead Celebrities (2, 5), Post Office Workers (3), Bizarre Murders (4), Zoo Deaths (6), American History (7), Cheerleaders from Hell (8), Sex and Death (9), Sports (10), Holidays and Seasonal Slaughter (11) and Theme Park Disasters (12). Poorly rendered gutter flavours and not to every one's taste but with the saving grace of some cool artwork from the likes of Andi Watson (3, 7, 8, 10, 11), Johnen Vasquez (2), Zander Cannon (2) and Evan Dorkin (1, 7, 8).~WW

MURDER ME DEAD

El Capitan: *9 issue limited series 2001**

As the title indicates, we're deep in hardboiled territory here. Writer and artist David Lapham has fashioned a story of greed, lust and revenge that allows him to play with just about every crime genre convention going – cocktail bars, hitmen, mobsters, crooks, sleazy private investigators, drop dead gorgeous femme fatales, suicide, guns and so on. Things start promisingly enough. The dialogue is sharp and snappy, the ambience straight out of Nicholas Ray's 1950 film noir masterpiece 'In a Lonely Place', the drawing a pleasing combination of the realistic and the cartoonish. Unfortunately as the series progresses the plot grows ever more ludicrous and shapeless, and the artwork noticeably deteriorates when Lapham begins to needlessly pad out his unsatisfying denouement with extended silent sequences. Because it lacks the carefully finessed structures of the best crime stories, *Murder Me Dead* ends up being little more than an accomplished piece of genre pastiche, rather than the real, raw thing.~AL

The MUTANT BOOK OF THE DEAD

Starhead: *1 issue 1994*

Absolutely demented stuff from Mack White about the community of Chester County, Texas. It's populated by the mutant offspring from generations of inbreeding, resulting in horned women, pencil-neck geeks, and a brute with a smaller speaking head on each shoulder. White's stories rip right into the hypocrisy of rural communities, and stand a good chance of offending most people somewhere along the way. Excellent.~FP

Recommended

MUTANT CHRONICLES

Acclaim: *4 issue miniseries 1996**

The role-playing game of luckless humans against mutated demons comes to comics. Some slapdash Simon Bisley covers hide better Alex Horley art within, but it's hack and slash all the way. If you want imaginative monsters and no plot, give it try by all means.~WJ

MUTANT EARTH

Image: *4 issue miniseries 2002-2003*

An incredibly dull fantasy, with overly muscled characters in one fight scene after another after aliens invade Earth and mutate humans. The strip appearing as a flip-book is about cat beings in charge of Paradise, and is marginally better drawn, but more incoherent.~NF

MUTANT, TEXAS

Oni Press: *4 issue miniseries 2002-2003**

In this spin-off from *Jingle Belle*, Ida Red lives in Mystic, Texas, a place where arcane properties, in conjunction with a comet and nuclear power plant, have created a town of mutants (animal and vegetable). Owner of the plant, Sherman Rusk, now a huge rattlesnake and full of hatred for his condition and the town, conspires with Sheriff Brunt, equally disgruntled, to kidnap and sell off the inhabitants as freaks. When Ida's electrical powers manifest themselves, she sets out to solve the mystery of the missing townspeople. Paul Dini's scripts are funny, but compassionate and the basis for a stirring adventure, while J. Bone's artwork is cartoony, in a heavily-rendered, visually inventive style.~NF

MUTANT X

Marvel: *32 issues, 3 Annuals 1998-2001*

Just when you think the last thing Marvel needs is another X-title, *Mutant X* comes along to prove there's an exception to every rule. Blasted onto an alternate Earth by an explosion that should have killed him, Alex (Havok) Summers finds himself swapped with his counterpart in that dimension, the leader of a darker, slightly warped group of mutants called The Six. Of course, The Six have no way of knowing that this isn't 'their' Alex, and he soon cottons on that his best option is to pretend he is while he tries to find a way home. 1-12 form a tightly plotted and highly entertaining story arc as the readers and Alex uncover this world's secrets together; who can be trusted and who can't, the balance of power, and how all the other main characters of the Marvel Universe fit in. Its real skill is that all the alternate versions are only half a step away, and their every difference can be traced back to a single event from the 'real' continuity that diverted their destinies along a different path. As it unfolds, Alex grows fonder of the team, relishing his role as their leader, protector and perhaps, ultimately, saviour. After 12, the series flounders awhile, as if no-one expected it to last this long, but it finds its feet again around about 18 with a mutant-hatred storyline that Captain America fans shouldn't miss. Sadly, the series fell foul of the new millennium's streamlining of the X-titles, and the final issues feel rushed and anti-climatic; although the deliberately open-ended finale allows for a possible return one day. If the X-comics usually seem too much trouble, put your preconceptions aside and give this one a go. It's solid, original and surprisingly good, helped by the consistency of Howard Mackie's scripts and Andrew Pepoy's inks (over a variety of pencillers) throughout the entire run. A rare treat. ~JC

Recommended: 25

MUTANT X

Marvel: *One-shot ('Origin') 2002, one-shot ('Dangerous Decisions') 2002,*

It could be argued that no-one unfamiliar with the TV show will sample these comics, which is just as well because if that's the case you won't get much from them. 'Origin' sets out to explain the events behind the setting up of a corporate/semi-governmental project that first cracks, then reprograms the human genome. One of the scientists then rebels, sabotaging the records and setting himself up in opposition to the scheme. It's competent enough, but the underlying assumption that everyone reading it is familiar with the TV show leads to a very confusing, not to say uncomfortable read. 'Dangerous Decisions' compounds the problem with a tale of three potential recruits who are the target of both sides in some kind of power struggle, and a back-up purporting to be the untold origin of Shalimar Fox, which tells us nothing other than one day she had super-powers. Get a video before you read these.~WW

MUTANT ZONE

Aircel: *3 issue miniseries 1991-1992*

Early work from Dave Cooper, already a distinctive and accomplished cartoonist. This, however, is slim and unoriginal fare adding all kinds of amorphous tubular monsters to a *Night of the Living Dead* scenario. Still, it's not every day you come across the term 'fart-suckers' in a comic, or, indeed anywhere else.~WJ

MUTATIS

Marvel/Epic: *3 issue miniseries 1992*

On promise of a cure, an infected former police officer has to track down and kill three carriers of a deadly virus before they infect an entire city. Writers Dan Abnett and Andy Lanning write a script that sustains tension and create a well-conceived future world, and John Higgins' claustrophobically designed city completes a top-notch package.~FP

Recommended: 1-3

MUTIES

Marvel: *6 issue miniseries 2002*

Karl Bollers writes six unconnected stories about teenagers worldwide developing mutant abilities, and a variety of artists better known for work outside Marvel use widely differing styles. Charlie Adlard does a good job on 5, and some will be interested in 4's Brazilian story by Trent Kaniuga, but the best art is the traditional painting of Peter Ferguson over Salgood Sam's layouts in 1. Coincidentally, it's also the best story, with a twist in its portrayal of a persecuted loner. Sam returns in 6 with a completely different, but equally effective style for the final issue about an Irish farm boy. Editorially it may have been wise to step away from the universally bleak theme, but this is an interesting idea generally well handled.~FP

MY FRIEND DAHMER

Derfcity Comics: *One-shot 2002*

The mere title instantly prods that celebrity tittle-tattle magazine style illicit thrill button, but the comic's not about that. Cartoonist John Backderf (Derf) went to the same high school as Jeffrey Dahmer, and occasionally hung out with him in their mid-teens. His recollections of teenage eccentricity accrue a sinister weight with hindsight, but there's also some indication of the background that formed Dahmer, which makes for very uncomfortable reading. Derf's deliberately awkward style of cartooning adds to the unease. This is about as sensitive and unexploitative as you're going to get when dealing with America's most notorious serial killer, and it's still a scary read.~WJ

MY GREATEST ADVENTURE

DC: *85 issues 1955-1964*

The 1950s DC staff were experts at producing decent short adventure strips. This title offers lots of them, usually being narrated by the story's hero and with evocative titles such as 'My Cargo Was Death!', and 'I Jumped From Eight Miles Up!' Science fantasy stories are the norm from 6. How can you possibly resists stories such as 'I'm a Cop From Outer Space!' or 'I Became a Merman!'. Oh, those exclamation marks! Part of the reason for the success was that DC offered many of the best artists in that era. Nick Cardy, Mort Meskin and Rueben Moreira were regular contributors, as was Jack Kirby, filling his time before creating *Challengers of the Unknown*. Samples of his work can be found in 15-17, 20, 21, 28 and 43, while the artist's artist, Alex Toth contributes to 50, 60, 61, 81 and 85.

The popularity of the adventure anthology waned in the early 1960s, being overtaken by the re-emergence of super-heroes, a new and unusual team was introduced in 80. Originally billed as "The Legion of the Strange" in the previous issue, the renamed Doom Patrol created by writers Arnold Drake and Bob Haney with artist Bruno Premiani made an immediate impact. A wheelchair bound genius, The Chief brought together three mutilated misfits: the metal-bodied Robotman (originally called Automaton), but who still had his human brain, the high-growing and stretchable Elasti-Girl, and Negative Man whose strange energy body could do amazing feats. The comparisons with Marvel's *X-Men*, which was released three months later, are somewhat uncanny, and more coincidences would come. Drake soon became sole scripter and made the series DC's most Marvel-style super-team, shifting personalities centre-stage. Premiani may have been an unusual choice of artist, but provided a unique look while remaining within the parameters of the DC-house style. These early issues had our heroes fighting all manner of adversaries, with the immortal General Immortus being a recurring mainstay. The series proved so popular that the title was change to *Doom Patrol* from 86. These early adventures form part of the *Doom Patrol Archives* edition.~HY

MY LIFE WITH EDDIE

Chemical Brain Comics: *3 issues 1998*

Steve finds cryptic alternative rocker, Eddie Vedder (leader singer of Pearl Jam), passed out in the gutter and offers him a place to stay. Other than occasional glimpses thereafter, this is really about Steve's relationships with his friends, Sean and Dan (the latter calling at all hours of the night to try to talk Steve into going for a drink), and his neighbours, who include two young and pretty women and two permanently wrecked musicians. He also tries very hard to avoid mad Deeno, who is known to have the occasional kidnap victim tied up in his room. This is attitudinal, post-modern, politically incorrect, scatological and raw, but nowhere near as funny as it would like to be.~NF

MY LOVE

Marvel: *Series one 4 issues 1949-1950, series two 39 issues, 1 Special 1969-1976*

The first series, launched in the wake of Simon and Kirby's *Young Romance*, was routine moonlight-and-flowers fluff. The only noteworthy feature is that the model for 4's photo cover is the notorious Betty Page. The second series featured an initially strong and imaginative run of lovelorn tales from Marvel mainstays. Buscema, Colan and Heck all chipped in, and did creditable work on stories largely written by Stan Lee. Although intuitively in touch with the times in most respects, Lee's take on feminism in 10 is a total hoot. Soon, however, it became clear that the dwindling pool of romance readers didn't care whether all this effort was made or not, and the series became all-reprint from 11. The 1971 Special reprints the much sought after Jim Steranko romance story from *Our Love Story* 5.~HS

MY MONKEY'S NAME IS JENNIFER

Slave Labor: *4 issues + 2002 to date*

Kaitlin is a small girl from a wealthy family who've provided her with a chimpanzee as a playmate. The male chimpanzee, named Jennifer by Kaitlin, is less than overjoyed with his lot in life, so perpetually surly, although seems to bear the innocent Kaitlin no ill-will. Over four delightful issues the pair become involved with a mad scientist, an unusual guardian angel, and rhyming pirates. Ken Knudsen manages the rarely achieved trick of combining childhood innocence with a knowing worldview, played completely straight, so all the funnier. Jennifer's perpetual impotent rage is hilarious, and overall this is a gem.~FP

MY NAME IS CHAOS

DC: *4 issue miniseries 1992*

A reclusive scientist discovers a secret colony of genetically created superbeings, and is forced to take a moral stand. Creative reworking of *Dr Moreau* with sumptuous John Ridgway art.~HS

Bob Foster's MYRON MOOSE Funnies

Fantagraphics: *3 issues 1987*

Bob Foster is clever parody cartoonist, able to adapt his art to pastiches of almost any cartoonist you care to name. His small selection of original strips are also nicely drawn in varying styles. Beyond admiration at his adaptability, though, there's nothing memorable.~FP

MYS-TECH WARS

Marvel UK: *4 issue miniseries 1993*

This combines X-Men, the Avengers and various Marvel UK characters against the evil Mys-Tech organisation and its plot to control the world. The storyline is mindless (stuck for an idea? Send another character in to the attack) and the resolution pure technobabble, but there is some (small) entertainment value in seeing the various teams coming together, and then in monitoring the body-count. Still, you must have better things to do with your time.~FC

MYST: The Book of the Black Ships

Dark Horse: *4 issue miniseries 1997*

Lovingly rendered but vacuous tie-in to the highly successful interactive game. When heroic Altrus, last of the fabled D'ni teaches his sons Sirrus and Achenar the secrets of interdimensional travel, he doesn't realise that they've been corrupted by the Dark Cardinal of the Black Ship Fleet, which leads to his inevitable doom. Shoehorned between the first *Myst* novel and the original CD-ROM game, this merely illustrates an episode in the continuity that was considered too inconsequential to be included in either. For completists only.~WW

MYSTERIES OF UNEXPLORED WORLDS

Charlton: *48 issues 1956-1965*

One of Charlton's new wave of mystery anthologies launched as quarterlies in the late 1950s, becoming bi-monthly in 1959, and becoming *Son of Vulcan* with 49 in 1965. The usual disappointing artwork by the likes of Nicholas and Alascia, Molno, Trapani, Mastroserio dominate, illustrating scripts by the prolific Joe Gill, Ernie Hart and others. Thankfully the 1950s issues also run the occasional story drawn by Colan, Whitman, Giordano, and Reinman. There's also a plentiful supply of covers and stories drawn by Ditko in 3-12 including 4's 'Forbidden Room', which takes its lead from *The Portrait of Dorian Gray*, 8's 'Adrift in Space' and 11's Kubert-influenced caveman story 'Oggo the Thinker', which is signed 'J. Kodti'. Ditko returned in 1960 to do stories for 19, 21-23 and 26. They show his growing mastery of the short strip, particularly 23's unexpectedly romantic 'The Quiet Little Men' about a writer on the verge of a breakdown. Between 1961 and 1965 there's really nothing worth looking at, as the standards of writing and artwork diminished in the 1960s.~SW

Recommended: 6, 23

MYSTERIOUS SUSPENSE

Charlton: *1 issue 1968*

Originally intended as a series of back-ups for *Blue Beetle*, the three chapters merge seamlessly, and creator Steve Ditko makes his points about what constitutes a hero without resorting to the didacticism that sometimes characterised his later work. The compelling nature of the comic is all the more remarkable considering the amount of text-heavy talking-heads panels used. Crusading TV journalist Vic Sage is the focus rather than his costumed alter ego the Question, as he comes under fire for refusing to accept a new sponsor. Sage knows the man to be associated with a gangster, and is prepared to sacrifice his job to prove a point as all around him bay for his head. A magnificent one-shot that sees Ditko at the peak of his creative ability.~WJ

Recommended

Tales of the MYSTERIOUS TRAVELER

Charlton: *15 issues 1956-1959 (1-13), 1985 (14-15)*

There are many storytelling hosts in comics but none was ever more elegantly woven into the tales he told, or had the sheer presence of, Steve Ditko's Mysterious Traveler. Usually, the only pleasure to be derived from Charlton's 1950s mystery and science fiction anthologies comes from the stories drawn by Ditko. This title is no exception but here we have the added attraction of watching Ditko's development of the host between 2 and 11. After simply introducing early stories with an opening panel, the Traveler is gradually insinuated into skies, mists and shady backgrounds throughout the story. He walks the gutters between panels sometimes splitting the whole page vertically. Some pages have a scatter of images held together by a huge shadowy portrait. 'Above the Top Most Peak' in 5 has the Traveler in every panel! There are too many notable Ditko stories to list, but 'Inside the Crystal Globe' in 11 is noteworthy for its experimental inking style (signed J. Kodti). Charlton revived the title in 1985 for 2 reprint issues with one rather stilted new Ditko story in 15. Interestingly, some of the reprint stories are told by Dr Haunt, Ditko's other horror host from *This Magazine is Haunted*, who has been recoloured to resemble the Traveler. A collection of Ditko stories was issued.~SW

MYSTERY DATE

Lightspeed Press: *2 issue microseries 1999*

Vary Krishna has two teachers, Hexoholoi Shar, a Laeske, and A. A. Zivancevic, who's blind and has the prosthetic legs of a Laeske. Vary and Zivancevic clash, but he appears to tolerate her for the sake of Shar. When they both accompany Shar into the desert to witness his race's mating ritual, however, a new understanding is formed. Carla Speed McNeil's heavy cross-hatching on her simple, direct drawings, provide a natural setting for this brief, yet complex, psychological profile.~NF

MYSTERY IN SPACE

DC: *117 issues 1951-1966 (1-110), 1980-1981 (111-117)*

In this sister science fiction anthology to *Strange Adventures*, a third of the first fifty covers feature images of Earth from space. Many stories follow a curious brief of placing the mundane in a science-fiction setting. The best examples are 'The Interplanetary Insurance Co' stories by Sid Gerson, drawn by Carmine Infantino in 16-25 and the longer-running Space Cabby in 21, 24 and then 26-47 by Otto Binder, drawn by Gil Kane and Bernard Sachs, with Sachs drawing the last few solo. There was also a brief attempt at a space military strip set in the 30th century called Knights of the Galaxy by Bob Kanigher and artist Infantino in 1-9, but the majority of stories were unthreatening stingers. Editor Julius Schwartz was also a literary agent for many science-fiction writers, a trend present in the SF pulps since the 1940s, enabling him access to the best in the field. Throughout the 1950s there are gradual changes in the writers as Bob Kanigher, Gerson, Joe Samachson and Jack Miller give way to a predominance of John Broome and Gardner Fox, who'd been there from the beginning. Similarly regular artists like Hal Sharp, Mort Drucker, Howard Sherman, Bob Oksner, Sy Barry and John Giunta cede to Kane, Mike Sekowsky, Murphy Anderson, Infantino and Sid Greene.

Adam Strange, the character most associated with this title, bears more than passing similarity to Knights of the Galaxy's Space Commando Lyle. Explorer Adam Strange is hit by a cosmic phenomenon called a Zeta Beam that instantly transports him 25 trillion miles to the planet Ranagar. Adam always seems to arrive just as some brain-teasing menace is threatening the city-state of Rann. Saving the planet is tough on his long-distance romance with Alanna, daughter of Rann's chief scientist Sardath, as is the Zeta beam's habit of returning him to Earth just as he's in a cozy clinch with his girl. Adam's adventures continue from his tryouts in *Showcase* 17-19, running from 53 in 1959 to 102 in 1965, all stories up to 91 being written by Fox. The artwork by Infantino is some of his most elegant and inventive with sundry inkers, but the most outstanding collaborations tend to be with Murphy Anderson. Despite being the cover feature, early stories are only nine pages long, but are beautifully realised. The story with the giant who keeps Adam and Alanna as pets in a birdcage in 57 is a good example as are 'The Beast With Sizzling Blue Eyes' in 62 and the twists and turns of 'The Fadeaway Doom' in 68. Longer stories of fifteen pages and more begin with 71. The series really hits its stride in 1962 with stories like 75's 'The Planet That Came to a Standstill' (a team-up with the JLA), 76's 'Challenge of the Rival Starman' and the classic 'Shadow People of the Eclipse' in 78. Alanna gets a new dress uniform in 88. The less said about the strips after 91 the better. Writer Dave Wood, followed by Jerry Siegel, failed to capture the charm of previous episodes despite having Lee Elias to draw their efforts.

The science-fiction shorts continued until late 1963, when the feature strips were allowed to dominate. A notable shorter feature was Star Rovers, Gardner Fox's occasional strip in 66, 69, 74, 77, 80, 83 and 86 (also in *Strange Adventures* 159 and 163). Beauty queen Carol Sorensen, novelist Homer Glint and millionaire Rick Purvis are presented with mysteries, dilemmas and puzzling phenomena to deal with. Despite a tendency to compete, they usually find themselves pooling their ideas to resolve the problem. Lovingly drawn by the underrated Sid Greene, these characters were central to Howard Chaykin's revisionist Twilight in 1990. Hawkman shares 87-90. Since Adam and Alanna are on Ranagar and Hawkman is a winged policeman from the planet Thanagar, Schwartz tried this brief oil and water mix of superhero and SF in 1964. Enduring DC villains The IQ Gang debut in 87 and 90 features a team-up of the Hawks with Adam.

After Schwartz left in 1964 to nurse Batman back to health, the editing fell to Jack Schiff from 91, and his issues really disappoint. He installed Rick Starr, the Space Ranger, alongside Adam Strange. The Ranger's pedestrian adventures (continuing from *Tales of the Unexpected*) were written by Dave Wood and drawn by Phil Kelsey (succeeded by Howard Purcell), and 94 and 98 are team-ups with Adam Strange. In 100-102 we briefly meet Siegel and Kane's obscure secret agent Jan Vern. Ultra the Multi Alien is a creature divided into four quarters, each arm and leg from a different, super-powered race. Grotesque and ludicrous by turns, and resembling a lame copy of Metamorpho, Ultra's adventures were courtesy of Wood and Elias beginning in 103. He sees off the title after eight episodes.

Editor Len Wein's 1980s revival was a shadow of Schwartz's oddly stilted but charming self, with very little personality past a less-than-appropriate habit of assigning John Celardo to ink stories every issue. There are some good one-off strips from Charlie Boatner and Marshall Rogers' in 111, George Kashdan and Mike Golden in 113 and Gerry Conway and Tom Yeates' memorable 'Killing Time' in 114. Other contributors include writers Carl Wessler, Mike W. Barr, Arnold Drake and Bruce Jones and artists Joe Kubert, Brian Bolland, Infantino inked by Jerry Ordway, Steve Ditko and Don Newton. Two collections of DC's science-fiction stories have been published, one titled *Mysteries in Space* from Fireside in 1980, and DC's 1999 effort under this title. Three stories are common to both, and both capture this series' distinctive flavour with examples of nearly all of the feature strips and plenty of shorts.~SW

THE MYSTERY MAN

Slave Labor: *2 issues 1988*

These two issues intrigue and mystify, not least as to the identity of the Mystery Man of the title, who seems nowhere in sight. Stylishly drawn and inventively plotted by Scott Saavedra, sadly the story remained incomplete. This is a shame, not the least because few other comics have scenes with a cave leading to the bowels of the earth opening up behind the shower curtain.~WJ

Bob Burden's Original MYSTERYMEN COMICS

Dark Horse: *4 issues 1999*

Introduced in *Flaming Carrot* 15, and recurring in later issues, the Mysterymen were a novel idea: a bunch of blue collar crimefighters with limited resources and largely ineffective abilities. With a movie imminent Bob Burden wrote four stand-alone stories for this series, which was intended as ongoing. 3, featuring the odd Screwball, is the most similar to Flaming Carrot, with 4's all-villains issue a surprisingly dark story from the usually upbeat Burden. In 1 a team of Mysterymen hunt a monster, and 2 is the origin of Disc Man. There's a pastiche element to all of them, and seeing them well illustrated in straight superhero style by Stephen Sadowski (1-2), and Chris McLoughlin (3-4) is strange. Burden is a unique creator, and anyone's enjoyment of these will probably depend on how they respond to *Flaming Carrot*.~FP

MYSTIC

CrossGen: *30 issues + 2000 to date*

On the world of Ciress, where magic is a part of everyday life, there are seven major Guilds. At the head of each is a Guild Master, who serves as the living vessel for the spirit of the original Master. Genevieve Villard is about to become Master, when a stranger gifts her sister, Giselle (who's try to avoid magic in her life), with a sigil, and the spirit enters her instead. Giselle, however, has not just appropriated one spirit. Those of the other Guild Masters, attending the ceremony, have also been stolen, immediately putting her in conflict with them. This conflict is one of the primary plot elements thereafter, as the Guilds try to retrieve their spirits by freeing the vengeful, Animora (9-14), one of the First, and the person that the spirits originally formed the Guilds to combat. Ingra of the First also has an interest in Giselle, sending an agent, Darrow to seduce Giselle (from 4), though he eventually sides with Animora (18-20, 23-24). With the threat of Animora apparently over, Giselle is forced to approach each Guild separately to prove her worth to them and persuade the spirits to support her magic (from 25).

Initially written by Ron Marz (1-17), before being taken over by Tony Bedard, this is an engaging fantasy adventure with plenty of back story to support the major plots. It has a perfectly measured pace that doesn't rush into explanations or solutions, but still provides the reader with lots of action. The ornate artwork, firstly from Brandon Peterson (1-6, 8-11, 13-16, 18-20) and then from Fabrizio Fiorentino (17, 21-24, 26-30), only occasionally falls flat over details of features or heads, and is otherwise very attractive. The series is being reprinted in collections appearing roughly a year after the original printings.~NF

MYSTIC EDGE

Antarctic: *1 issue 1998*

Tits, arses and bondage ahoy, all in brightly coloured manga style. *Watchmen* it's not.~WJ

MYSTIC FUNNIES

Alex Wood: *One-shot 1997*

This title from Robert Crumb came out of nowhere, and his first colour comic in over thirty years as a cartoonist. The colour is handled very sensitively, and Crumb's art looks great, although otherwise this is unremarkable. This is another episode in Mr Natural's never-ending mental torture of his hapless acolyte Flakey Foont. There's all sorts of musings about identity and so on, but it's very much Crumb on autopilot however nice it may be to look at.~DAR

Adventures in the MYSTWOOD

Blackthorne: *1 issue 1986*

There's a charm, but little depth to the illustrations in this attempt at a fairy tale. A similar lack of depth ruins the story, which reads as if a child's dream.~FP

MYTH ADVENTURES

Warp: *10 issues 1984-1986*

Apple: *2 issues (11-12) 1986*

Based on the popular series of fantasy novels by Robert Asprin, this undemanding humour title might well appeal to fans of Terry Pratchett, *Red Dwarf* and other allegedly side-splitting genre comedies. 1-8 of *Myth Adventures* adapt Asprin's novel of the same name, 1-4 being magazine-sized. The story introduces sorcerer's apprentice Skeeve and his wily demon pal Aahz. Setting out to defeat evil wizard Isstvan, Aahz and Skeeve become caught in a series of tangles with dragons, unicorns, imp assassins and rapacious merchants. Writer/penciller Phil Foglio has a pleasantly cartoony style, occasionally undermined by slapdash inking and lettering from Tim Sale, but his reverence for the source material makes the strip unnecessarily drawn-out. 9-12 feature new artist Valentino, in a four-part story written by Asprin especially for the comic. The level of humour never rises much above feeble puns, vulgar slapstick and mystifying in-jokes. 11 includes a particularly obvious satire on comic-book conventions.~AL

MYTH CONCEPTIONS

Apple: *8 issues 1987-1989*

The further comic adventures of Aahz and Skeeve, a crusty demon and his bungling apprentice first seen in Myth Adventures. It's adapted from a novel by Robert Asprin; new writer and artist team Ken and Beth Mitchroney ensure that previous standards are maintained, if never exceeded.~AL

Robert E. Howard's MYTH MAKER

Cross Plains: *1 issue 1999*

Disappointingly dull adaptations, by Roy Thomas and assorted clunkists, of Howard's Poe-ish horror stories, with tormented gentlemen's storytelling club framing sequences. They're redeemed only by Richard Corben at his best, brilliantly well-suited to a tale of mindless lust and violence among cavepeople.~GK

MYTHOGRAPHY

Bardic Press: *8 issues 1996-1998*

This sixty-four page anthology, if not exactly breaching genre limitations, offers a modicum of well considered fantasy material. The downside is that it comes in small bursts from guest creators, while the regulars seem intent in perpetuating comic fantasy's poor reputation. 'Co-ordinator' Michael Cohen is the worst offender, seemingly having listed every genre cliché and worked out how to incorporate them all into his 'Empyrean Tales' strip. He's also credited for the first issue's very pleasing cover, but some mistake, surely, as the figures are in proportion for one thing. The best of the regulars is Andrew Pepoy, with short slices of well-drawn whimsy 'Simone and Ajax'. Artistic contributions of note come from Bill Willingham (1, with some poor writing in 4) and Mike Hoffman (2, 5), dinosaur sketches from Steve Bissette (2), and Trina Robbins adapting a gaelic legend in 3. Craig Taillefer isn't the finished article in 5, but his influences are the right ones, and there are good back covers from Bryan Talbot on 3 and 5, and an excellent one from Charles Vess on 2. Other contributors or characters with followings include Drew Hayes, who reworks 'The Raven' in 1, M'Oak in 2, the *Elfquest* characters on loan to Carla Speed McNeil for a vomit inducing bonding ceremony in 3, Roberta Gregory in 7-8, Steve Conley in 8 and the acquired taste of Scott Morse in most issues. The best single strip is a reworking of Hans Christian Andersen's 'The Little Match Girl' in 2 by Michael O'Connell and Jeff Curtis. Brief and disturbing, it's simplicity is a definite strength.~FP

MYTHOS:The Final Tour

DC/Vertigo: *3 issue miniseries 1997*

Adam Clay is a Rock God in waiting, playing dives with his band and dreaming of his less complicated childhood in a house full of (actual) Gods, ghosts and monsters. Then one day, a demonic record company decides that with the proper promotion, Adam could be the herald of the Apocalypse, and cause the end of Reality. Will the young wastrel save everything or just sell out, Maaan? Self-indulgent script from John Ney Rieber illustrated by a Who's Who of Vertigo 'Name' Artists with guest cameos from John Constantine and Black Orchid. Confused poseur nonsense.~WW.

S.A. King's NAKED EYE

Antarctic: *3 issues 1994-1995*

S.A. King's observations, recollections and anecdotes are drawn in a cartoon style reminiscent of a tighter Larry Gonick and generally raise a smile. Best of all are the overheard snippets of gross conversations. This is deserving of a wider audience than it probably received.~FP

The 'NAM

Marvel: *84 issues 1986-1993*

The 'Nam was conceived as an attempt to portray the Vietnam war as it was for American soldiers, progressing in real time with characters moving in and out, and little sentimentality when it came to killing the cast. In 1-11* Doug Murray and Michael Golden set the scene admirably, combining anecdote and experience, and by concentrating on a relatively small cast they're able to focus on emotion and fear as part of the larger picture. The first half-dozen issues are more action-oriented, convincingly conveying the suspense and tension of warfare, and thereafter the action is mixed with quieter moments as the characters come more to the fore. Wayne Vansant is the artist from 13 (after a fine John Severin fill-in on 12). His art's more static and less expressive, but he's none the less suited to the tone of the comic.

Once the parameters have been established the scope is broadened, and Murray's choice of occasionally referring back to Ed Marks, through whose eyes the scenario was introduced in 1, allows for different perspectives from outside Vietnam. More unusual events come to the fore, and it becomes apparent that there wasn't always an all-for-one attitude between the ground troops, with 18 depicting one way of dealing with unpopular officers. 1-20 are reprinted in black and white at two stories per issue in *The Nam Magazine*.

The major downside to *The 'Nam* is that it's one-sided, written very much from the viewpoint that the American presence in Vietnam was essential in seeing off the godless Commies, whereas hindsight tends to indicate otherwise. After 7's history lesson (an audition for Vansant) explaining why the Vietcong are fighting, there's no attempt made to suggest that, setting aside Communist ideology, the aim of freeing Vietnam from the remnants of colonialism was justifiable in its own right. Although never glorifying war, the subtext disturbs. To Murray's credit, though, he doesn't shy away from the unsavoury US tactics as in 35, and he's patently sincere in wanting to ensure his stories are as authentic as possible.

Unfortunately there was a shabby decline for this well-intentioned project during issues in the 40s. The idea of following a single troop and its changing personnel throughout the war was discarded, as the spotlight shifted to other branches of the US forces in Vietnam, and the chronological timescale was also shelved. 41's cover, prominently featured Marvel superheroes, and a story about how they might affect the war was sympathetically handled, but nonetheless an obvious attempt to attract new readers at the risk of alienating the old. Chuck Dixon's fill-in in 43 signalled the beginning of a more jingoistic stance, and from 46 Murray's more sensitive scripts are few and far between, with Dixon the most regular writer. The final straw was the Punisher in 52-53, albeit in pre-vigilante days and civilian identity, in a story based on the novel Sniper. It could have been fitted around any character, but declining sales demanded a high-profile guest star. The Punisher was to return in the inferior 67-69, although the title already had Joe Hallen, who typified the new gung-ho attitude permeating the series, and who could have been the Punisher. 'The Death of Joe Hallen' in 54-58 is the only story extending beyond three issues, yet after a promising start with Hallen's return home in 54 it becomes a standard mid-period *'Nam* effort, although with an unpredictable conclusion. It's followed in 59 and 60, though, by Dixon's best contribution, detailing what could be expected when a US serviceman was captured by the Vietcong, and returning a soldier from the early issues. 'Creep' in 66 is also a decent story, about a deadshot sniper.

70 is a revelation. Vansant began heavy use of photo reference for his art, which may have silenced the odd letter-column carper, but didn't really improve on his more natural style, and Vietnam vet Don Lomax was appointed the regular writer. Although not reverting entirely to the original premise, they return the integrity of the title, stamping their intention by reintroducing Ed Marks, now a reporter. Lomax uses him as an observer in similar fashion to the writer in Vietnam Journal, and his coping with the concept of reporter's objectivity at the cost of lives is powerfully portrayed in 72. From 71 Lomax also introduces a back-up feature looking in on the lives of former cast members. 75's examination of the My Lai massacre has an astonishingly callous conclusion encompassing the real monk who set fire to himself as a protest against the war. Neither Lomax nor Vansant are responsible, and their back-up strip is far more effective. They also provide a decent account of the 1968 Tet offensive in 79-81, but never quite match the warmth of the earlier issues. Ironically, Lomax's best story in 84 isn't illustrated by Vansant; it takes as its topic the experiences of the North Vietnamese guerrillas. It's a sympathetic and rounded conclusion to a largely decent series, and probably for the best, as the already completed stories which were originally intended to occupy 84-86 can be found in *The Punisher Invades The Nam.* It's a typical Punisher story, offering little concession to the title in which it was appearing.

Finally, mention must be made of *The 'Nam*'s covers, which were regularly attention-grabbing and memorable. Michael Golden's initial efforts set the standard, with a unique use of colour, and he continued providing occasional covers after ceasing to draw the title. Kevin Kobasic, Ron Wagner, Andy Kubert and Joe Quesada all deliver stunning illustrations, and Vansant, as he was inside, is a model of consistency and excellence.~WJ

THE NAMELESS

Image: *5 issues 1997*

Set in what appears to be a near-future Mexico where the lives of the underclass are considered worthless. Police officials offer human sacrifices to ancient Aztec gods and huge, centipede-like monsters stalk the city sewers. It's almost as if Mexico has come full circle, back to the atrocities of Tenochtitlan. Enter our (sort-of) eponymous hero, an undead Spanish soldier sacrificed 450 years before. He becomes the reluctant champion of Ellen Brazemore's children's refuge when kids start winding up as sacrifices. Joe Pruett's writing is tastefully functional while artist Phil Hester and his expert inkers McCorkindale and Parks manage a stark black and white style. The preponderance of action shots and close-ups resembles the continuity of a TV show. Perhaps the clipped dialogue, devoid of exposition, and the extremely kinetic, sharp-edged art are supposed to work in precisely this way. This isn't always the case but it looks good.~SW

THE NAMES OF MAGIC

DC/Vertigo: *5 issue miniseries 2001*

Dylan Horrocks and Richard Case continue the growing pains and path to power of Tim Hunter, destined to be Earth's mightiest magician. Following *Books of Magic* 75, Hunter, now seventeen years old, is ready to take control of his life and summons John Constantine, Dr. Occult, Mr. E and the Phantom Stranger to expedite his transition. Harried by a ravening band of Faerie Warriors and mysterious Men In Black, Tim and his newfound companions The Walker and Lotus seek to discover once and for all the secrets of his parentage before the Faerie forces kill him and render it all moot. As a spring-cleaning exercise setting-up the subsequent Hunter this is readable enough but Case's art is poor and detracts from the mood and feel Horrocks was aiming for.~WW

NAMOR

Marvel: *62 issues, 4 Annuals 1990-1995*

Despite his long history, being one of Marvel's founding characters, Namor, the Sub-Mariner, has seldom been handled consistently and with respect, but the signs looked good at first for this revamp, which was almost one of the last things writer/artist John Byrne made any visible effort on. Rather than fighting humanity in his trademark scaly Speedo, Namor dons a business suit and becomes CEO of Oracle, Inc., a corporation dedicated to challenging humanity's abuses. His cousin Namorita is a frequent and welcome co-star, and it isn't long before old flame the Invisible Girl turns up, unfortunately with her stretchable hubby in tow. Frequent references are made to Namor's World War II past, particularly his association with the Invaders, and the run also sees the revival of Iron Fist, the popular kung-fu character. With 25, Jae Lee takes over as artist, and we enter an era of style over substance, with Lee's dark, sinister, but not actually technically proficient, artwork skewing the feel. Byrne hung on until 34, and a succession of fill-in writers of no consequence, including Roy Thomas, who'd done distinguished work on the character in the past, tottered on to 44. Here Glenn Herdling became the regular writer, and things became inexplicably even worse, with protracted, pointless fight scenes and execrable art from Geof Isherwood. Occasionally there were moments of interest. A romantic reunion with the Invisible Girl (or was it really her?) took place in 50, and the claim by Llyra, former villain, paramour and murderer of Namor's love Lady Dorma (he has a chequered romantic history to say the least...) to be the mother of his son and heir spices up things towards the end of the run. With almost half the run substandard, the inevitable cancellation was a blessing for those who actually like the character.~HS

NARCOLEPSY DREAMS

Slave Labor: *2 issues 1995*

Collections of short pieces, mostly autobiographical, by Jaime Crespo. The variety and the Mexican perspective are interesting, and each issue has at least one piece with real staying power. In 1, we have the young Jaime's fantasies of being a yo-yo star, and the various stages in his return to reality, and in 2, Crespo describes being on a flight for San Francisco in October 1989 when the pilot announces that an earthquake has hit SF and the Bay Bridge has collapsed. Worth a look.~FC

NARCOLEPTIC MAN

Magnetic Ink: *One-shot 2000*

To most comic fans superhero parody is a well worked seam, so it's rare that a new one raises a smile. This does, by virtue of a preposterous hero Narcoleptic Man, who falls asleep instantly. Luckily his partner, the nubile Easy Girl is there to distract the enemy. Of course, his arch-enemy is Insomnia Man, who gathers misfits such as the Incontinental and Binge and Purge. The stories aren't the point: the jokes are good, and almost all about bodily functions, and the laughs frequent. Well done Shane Simmons, Tony Furtado and Troy Hickman.~FP

Recommended

NASH

Image/Next Entertainment: *2 issues 1999*

Pro-wrestling champion Kevin Nash's vanity project casts him as a post-apocalyptic road warrior. His adventures are set in the wastelands caused by affluent survivors having constructed exclusive city-states. For the citizens of these citadels outsiders are an inconvenience. This is brutal, miserable stuff, notably when a little boy is blown away for effect in 2.~SW

NATHAN NEVER

Dark Horse: *6 issues 1999*

The Bonelli comics empire has dominated Italian comics for the last couple of decades, and this digest-sized translation was a valiant attempt at bringing their top science fiction title to an English-speaking readership. Nathan Never himself is a special agent in the far future, and the series clearly owes a heavy debt to *Bladerunner*, but with almost one hundred pages per issue the stories have a depth that more than compensates for a lack of originality. With a wide range of artists to choose from, Dark Horse missed a trick in not reprinting anything by the excellent Claudio Castellini or Roberto De Angelis, but of the strips here those drawn by the Mike Mignola-influenced Nicola Mari are particularly inspired (1 and 6). Add in sensitive translations and you have a quality package that really should have lasted longer.~DAR

NATHANIEL DUSK, Private Investigator

DC: *4 issue miniseries 1983, 4 issue miniseries 1985*

Don McGregor and Gene Colan's *Nathanial Dusk* was a classic Chandleresque piece of noir for which McGregor put away his purple prose and bleeding heart, while DC obligingly printed the strip from Colan's extra tight (but still wonderfully fluid) pencils. The lack of black contrasts and the washed-out colour palette gives the art an emotional sensitivity that reflects McGregor's humanist approach to the genre. Colan draws great characters, while McGregor's stories, set on the cusp between the Great Depression and World War II, hammer home a 'do the right thing' message. The first series, which concerns Dusk's search for revenge when his lover is murdered, is fuelled by the character's rage, giving it a sense of inevitability. It's straightforward but well told, supported by excellent artwork, although the second series was, if anything, better drawn. Although the second story is more complex, Dusk's motivation is forced, and the eventual dénouement is rather obvious. It's unfortunate that one miniseries has the better art while the previous one had the sharper story. They're still a cracking read, however.~FJ

NATIONAL LAMPOON

National Lampoon Inc.: *One-shot ('Encyclopedia of Humor') 1973, one-shot ('Very Large Book of Comical Funnies') 1975, one-shot ('French Comics, the Kind Men Like') 1977, one-shot ('Foto Funnies') 1980*

These days, *National Lampoon* is perhaps best known as an increasingly unfunny film franchise, but way back in the mists of time it was a cutting-edge humour magazine hell-bent on breaking taboos and cocking a snook at society's mores. Editors Henry Beard and Doug Kenney put together a talented group of writers, including P.J. O'Rourke, Tony Hendra, Sean Kelly, Michael O'Donoghue and *Spinal Tap*'s Christopher Guest, to make a title that was genuinely subversive and radical (not to say occasionally tasteless!). From the outset, *National Lampoon* featured illustrations and cartoons by the likes of Arnold Roth, Joe Orlando, Gahan Wilson and Rick Meyerowitz, but in its second year it graduated to full strips. A frequent contributor was Frank Springer, whose somewhat bland approach fitted into the ironic take on life, but soon the title rejoiced in top-notch art by Gray Morrow, Ralph Reese, Warren Sattler and Russ Heath. Neal Adams was a particularly welcome contributor, and his strips (usually written by Michel Chocquette) appeared in issues 20, 22, 31, 33, 34, 54, 57, 64, 66, 70, 95 and 102, starring such luminaries as Zimmerman and the Son-o-God. 22 initiated a regular comics section, 'The Funny Pages', their own take on the Sunday funnies. Drawing principally upon the nascent underground comics movement, the line-up included such talents as Vaughn Bodé (Cheech Wizard),

Jeffrey Jones (Idyl), Shary Flenniken (Trots and Bonnie) and Bobby London (Dirty Duck), all of whom were on top of their game here. The mid-1970s were *National Lampoon*'s heyday, with the regular strips augmented by talents like M.K. Brown, Trina Robbins and Randall Enos, and by Byron Preiss' and Ralph Reese's lengthy dissection of the 'Me'-generation's mating habits, 'One Year Affair' (collected together in 1976 by Workman Books). The magazine's heyday was matched by several inventive books. *The National Lampoon Encyclopedia of Humor* is notable for a couple of gorgeous Russ Heath strips, including his notoriously sleazy 'Cowgirls at War' story. *The Very Large Book of Comical Funnies* was an all-new comics collection featuring just about every significant name of the era, which went through at least twelve printings. As the 1970s passed into the 1980s, the magazine became progressively less interesting, and its cutting edge was dulled. There were some significant later issues, including the Jan '82 (Vol.2 #42) sword and sorcery special with Berni Wrightson's scandalous take on *Bewitched*, and the Feb '84 (Vol.2 #67) all-comics issue. 'Foto Funnies' collects the fumetti strips that ran regularly in the magazine, and despite the gags, they seemed largely an excuse for the male staff to be photographed with naked women. As *National Lampoon*'s frequency was reduced to a bi-monthly and the regular features were dropped, NL floundered; it is incredible that it lasted as long as it did.~DAR
Recommended: *Very Large Book of Comical Funnies*

THE NATURAL INQUIRER

Fantagraphics: *One-shot 1989*

R. L. Crabb's reports of legendary creatures like Bigfoot, the Cactus Cat, the Dingbat, the Rocky Mountain Stream Shark and, of course, the Jackalope, his specialist subject. Humorous drawings accompany a brief description, and occasional story of each creature, though there's little narrative overall. Fun and informative.~NF

THE NATURAL SELECTION

Karl Stevens: *3 issues 1998*

An examination of humanity in microcosm when it's announced an asteroid is due to strike Earth within weeks. Planned as twelve issues, one can only presume the premature disappearance is down to Karl Stevens' insistence on revealing as little of the story he has within the early issues, as there's a definite promise to the art.~FP

NATURE BOY

Charlton: *3 issues (3-5) 1956-1957*

In a shameless *Captain Marvel* rip-off, an orphaned waif is given powers over the forces of nature by a pantheon of nature gods, and drawn by John Buscema. 3 features a reprint of a 1940s Blue Beetle story, and 5 introduces our hero's distaff equivalent, Nature Girl, in a vignette. Inoffensive, but generic, with early work by a fledgling Dick Giordano.~HS

NATURE OF THE BEAST

Caliber: *2 issues 1991*

Snippets of captioned dialogue accompanied by vague illustrations are somehow published as a story. What there is of it is wooly nonsense about Earth in the future populated by thinking and walking animals as nature is disrupted. Rubbish.~WJ

Roberta Gregory's NAUGHTY BITS

Fantagraphics: *36 issues + 1991 to date*

Despite the salacious title, those seeking titillating material will be sorely disappointed. Come for a scathing and hilarious dissection of the seething underbelly comprising office life, the tensions within families, or relationships for the contemporary late-thirty-something woman, and you'll be more than satisfied. Gregory's central character is Bitchy Bitch, who begins as a barely repressed manic mass of outrage and resentment prone to fearsome vocal outbursts and tantrums. As the series progresses, though, she becomes a more fully rounded person, particularly through glimpses into her past. As the inquiring and uncertain teenage Midge she has a plastic mother impregnated with the values of the 1950s, and a brutal father (6-8, 15-17). Breaking free of their values is an important growth stage. The Naughty Bits supporting cast is small, but defined in wonderfully irritating fashion, as they too progress from plot-convenient stereotypes into more rounded characters. The fundamentalist Christian Marcie, spotlighted in 24-26, and 30-31 is particularly well characterised, attempting to live correctly within her narrowly drawn perimeters, yet a very troubled individual. The contented New Age Sylvia has a solo in 20, and an early quick shag, the exquisitely named Toadman, is also a memorable creation (1, 5). Bitchy's lesbian counterpart occasionally supplants her (21, 23 – with her other shorts gathered in the *Bitchy Butch* collection) and 27 is Gregory's well considered take on how women were treated in the dark ages. 4's 'Unhappy Holidays' is a good representative issue, contrasting a childhood Christmas visit to the molesting Uncle Stanley with an adult family Christmas twenty years on.

There is explicitly depicted sex, including 1's infamous Bobbitting, but Gregory's renditions, in one sense simple, in another more realistic than the perfect bodies found in sex comics, are far from erotic, their inclusion acknowledging sex as a part of regular people's lives. She also takes far more trouble with her editorial pages than most, including endearing introductory or postscript strips talking directly to the reader. As a possible solution to falling sales from 28 this broadens into longer autobiographical strips (cat lovers tune in) that have a diminished charm as illustrated diary extracts, but little substance. From this point the Bitchy strips are shorter and sometimes one long rant, and biographical material drops squarely into the 'worthy but dull' compartment. It should be mentioned that there's always been a small feel of 'anthology' about *Naughty Bits* due to Gregory's admirable generosity in turning over a few pages to other cartoonists most issues. Robert Triptow's strips extrapolating on the futures of people pictured in a 1937 high school yearbook he found (27, 28) stand out, and there's a good Patty Leidy strip in 36.

Through Bitchy Bitch's aggressive character *Naughty Bits* has engendered accusations of being man-hating, which is a ludicrous assertion. Although versions of many of the planet's prime male slimeballs are depicted, Gregory's is an equal-opportunity caustic wit, and her portrayals of females are no more flattering. Furthermore, she inserts vast doses of common sense into all the subjects she tackles. Anyone with a strong anti-abortion stance should read 8, and her issue dealing with people's reactions to a lesbian in the workplace (14) is a treat. All issues to 20 are now available in collections.~FP

NAUSICAA of the Valley of Wind

Viz: *Part One 7 issues 1988-1989*, Part Two 4 issues 1989*, Part Three 3 issues 1992-1993*, Part Four 5 issues 1994*, Part Five 8 issues 1995-1996**

In the far future, humanity struggles to survive in a harsh, unforgiving environment. Some still try to use ancient technologies but those close to the Sea of Corruption, a forest of fungi and mould inhabited by enormous insects, the Ohmu, and poisonous to people, have grown used to the dangers of nature and show in their lives their respect for its power. *Nausicaa* tells the story of a war between the Torumekian and Dorok empires, of one side's unleashing of a biotechnical weapon that threatens to overwhelm everything, of a crypt wherein lie the secrets of the past, and of a plan to repopulate the Earth after its cleansing by the Sea of Corruption. Most of all, however, it's about Nausicaa herself, chief of the tribe of the Valley of Wind, conscripted into the war but increasingly associated with The Blue Clad One, the messiah who will save the world. Nausicaa is a warrior but more than anything else she is at peace with nature and she alone can communicate with the insects of the forest.

The first part introduces Nausicaa to the war between the Doroks and the Torumekians. She meets the Torumekian Princess Kushana, commanding forces that have been sent to confront the Doroks but which are no match for the miasma that has been spreading from the forest. Kushana's other worry is the plotting against her of her brothers and her father, the Emperor. As Nausicaa defies Kushana's orders in order to help those ruined by the warfare or the miasma, she finds herself falling into the role of The Blue Clad One.

---

* Available in a collected edition

In Part Two, after being an unwilling participant in pitched battle, Nausicaa leaves Kushana's army and heads off on her own. One of the ancient God-Warriors has been unearthed but is in stasis, and the Dorok scientists have been experimenting dangerously with the spores from the forest, creating a mutant mould they can't control. Kushana is forced into a marriage pact with Namulith, true Dorok Emperor, in Part Three, in which Nausicaa discovers that the Ohmu are sacrificing themselves in order to destroy the mould. In Part Four, Nausicaa takes a spiritual journey on which she learns the secret of the Sea of Corruption. Returning to the outside world, she accidentally awakens the God-Warrior, which promptly mistakes her for its mother. Part Five concludes the series after confronting the plans of those who created the Sea of Corruption. Nausicaa refuses to accept that the only way forward is to recreate the past, and ultimately she denies it.

Hayao Miyazaki is modest about his comic skills, being better known in Japan for his animation, but this is quite frankly a masterpiece that deserves to be read by anyone with an interest in the medium. His humane scripting, sense of action, deftness of characterisation and storytelling and his control of the emotional highs and lows are all first rate. This is an epic story, told in epic style; to compare Miyazaki with Moebius does neither a disservice. You thought *Akira* was as good as Japanese comics got? How wrong you were.~NF

Recommended: Part One 1-7, Part Two 1-4, Part Three 1-3, Part Four 1-5, Part Five 1-8

NAVY COMBAT

Atlas: *20 issues 1955-1958*

One of Martin Goodman's numerous bi-monthly war titles. Every issue features five stories drawn from service on U.S. Navy warships, or more often in their submarines, and they're split between World War II and the Korean War. The title is also distinguished by its featured hero Torpedo Taylor, drawn for the most part by Don Heck in 1-14. These six-pagers represent an early high in Heck's career. Other stories are drawn by an admirable array of artists including Joe Maneely, Bill Everett, Gene Colan, George Woodbridge and Heck. Navy Combat is one of the sixteen titles that survived the great Atlas cutbacks in mid 1957 so 14 is dated July 1957 but 15 is dated December. The later issues have only two Torpedo Taylor appearances: 16 and in 19 where the art is by Maneely with a Heck splash page.~SW

NAZA

Dell: *9 issues 1964-1966*

The adventures of a Stone-Age warrior didn't sell back in the 1960s either. Bad stuff.~SW

NAZRAT

Imperial Comics: *4 issues 1986-1987*
Eternity: *2 issues (5-6) 1987*

Very much the surprise package. What seems to start as a funny animal sword and sorcery story broadens out into other areas and was starting to show great promise indeed at the time of its premature cancellation. The shifty Nazrat always has his eyes and ears open for an easy deal, even if crooked, and he's helped by his beefy loyal friend Kipper. When they mug the King's messenger, though, things start to go wrong. Jerry Frazee's cartooning is good, and his writing surprising. Worth picking up cheap if you ever see it.~WJ

THE NAZZ

DC: *4 issue miniseries 1990-1991**

Faintly disappointing miniseries about a sexy guru who turns out to be a power-hungry monster. Tom Veitch over-complicates his strip by hiding his central character's real agenda behind a series of smoke-screens and using a different character's viewpoint in each issue, which makes the story feel more profound than it is: power corrupts, and all that. Nonetheless, it's a very interesting read, and it makes a change to have someone musing about godliness from an Eastern rather than a Western point of view. Bryan Talbot is a sympathetic artist for this material, able to draw in a super-realistic, detailed style that avoids reminding you of superheroics (although The Nazz would probably qualify as a superhero by most people's definitions). Apparently readers deserted in droves when the 'hero' stopped looking cute and acting nice, which is a sad reflection on the state of comics today.~FJ

NBM Graphic Novels

NBM's extensive graphic novel line, increased by a large number of titles inherited from Catalan when that company closed, is now formally divided into two main areas: erotic and literature, as previewed in their *Comics Lit* magazine. In the past four or five years they have also created fantasy/horror, fairytale and humour lines, separating various generic books and seeking to add to them to provide strong leads for book buyers. The erotica appears under two imprints, the extensive Eurotica and the poorer Amerotica, both dealt with elsewhere, as is any series of NBM volumes running to three or more, and material originally serialised as comics. The Lit line features both US and European creators, and now various more populist choices have been hived off, is a sharp and interesting selection of graphic novels.

Most notable among the initial group of authors they brought to English-speaking notice was Hugo Pratt, whose *Corto Maltese* merits a separate entry. As well as keeping *Indian Summer,* Pratt's first collaboration with Milo Manara, in print, NBM also published his last work, *El Gaucho.* While it's not the best thing he's ever written, Pratt's script for this tale of rebellion and political maneuvering in South America in the early 19th century, seen through the eyes of a young seaman, is a sweeping history lesson, beautifully illustrated by Manara. He supplies even more detail than usual, creating wonderful character studies and drawing every fibre of the rigging as mighty ships set sail. They also scooped up Vittorio Giardino, whose art at first appears a little stiff and old-fashioned, due to his immense desire for verisimilitude. NBM have recently reprinted his Catalan debut, *Orient Gateway,* which introduces his detective hero Max Friedman in preparation for publishing *No Pasarán* (two volumes), a new major work, following their success with *A Jew In Communist Prague* (reviewed elsewhere). We learn something about Friedman's past in the Spanish Civil War when he returns following the break up of the international battalions in the late 1930s at the request of a friend to find her missing husband. Traveling with a journalist and photographer, he's plunged into the paranoid turmoil of a divided country allowed to fall to the Fascists because most of Europe can't bear to get into bed with the Communists, foreshadowing the events immediately preceding World War II.

Miguelanxo Prado's stories are closely comparable to the shorter stories of the Italian master of bitterness and wasted opportunities, Alberto Moravia, and like Moravia, Prado goes over the same ground again and again, adding tiny touches of characterisation, giving each story a new twist. *Streak of Chalk* and *Tangents* are both relationship-based books about mature people reflecting on their unfulfilled lives, and learning how best to hurt each other. Prado succeeds in keeping your interest in characters to whom you are not supposed to warm, using a soft pastel technique on dark backgrounds, and drawing accurately observed human mannerisms to match his subtle stories. Equally subtle in his study of relationships is Andre Juillard, whose *Blue Notebook* scooped a number of European prizes. The closely observed story centres on self-contained archivist Louise, who seems to attract obsessive boyfriends, with whom she can make no real connection. Two men, who turn out to be friends and then rivals, catch sight of her dressing in her uncurtained window, and both manipulate events to meet her. She gets an insight into her own compulsion when someone sends her the diary of her current lover, which lays out how he engineered their meeting. Juillard's next work, *After the Rain,* sees a photographer approached by a stranger, who wants to know about the identities of the people in one of his pictures, shown with a friend of his who's mysteriously disappeared. Once again questions of identity, self-identification and paranoia come to the fore, and in this case there is a very real reason for the sense of menace this creates. Unfortunately neither Prado or Juillard seem to have been popular with the US public.

Milo Manara's work, once of Catalan, was reprinted by NBM, who added two volumes to his saga centred around a character called Giuseppe Bergman, a thinly disguised portrait of the artist on a somewhat psychedelic search for meaning in his life. I is subtitled 'The Indian Adventures of Giuseppe Bergman', and most recently *To See the Stars,* has Bergman meeting a strange, elusive woman who imagines herself involved in the narratives behind a series of well-known paintings. Pensive, perplexing and lovely, as always. For some reason it's packaged as part of the Eurotica line now, presumably because all but Manara's porn is no longer in print.

A number of NBM's early books were reprinted following the appearance in *Cheval Noir* either of the work itself or of the creator. *In Search of Shirley,* by Cosey (two volumes), is a direct reprint from *Cheval Noir,* where the series was called 'Voyage To Italy', as is *The Six Voyages of Loan Sloane,* spaced-out early 1970s acid adventures from Philippe Druillet which originally appeared in *Metal Hurlant* magazine. NBM then published another book by Cosey, *Lost in the Alps,* the tale of a young English writer's search for his elder brother, who last contacted him from an Alpine resort. Although not typical of his output, Jacques Tardi's work on *Roach Killer* is outstanding, especially his use of spot red. Written by Legrand, it brings all the brooding atmosphere of a film noir to the story of a New York exterminator. Very different are the two volumes from the *Adele Blanc-Sec* series that he both wrote and drew, also taken from *Cheval Noir. Adele and the Beast* and *The Demon of the Eiffel Tower* are inventive, almost playful detective stories which subvert the forms of the genre.

After a few years without direction their Comics Lit line once again seems to be turning up gems. Nabiel Kanan's *Lost Girl* is a neat fable: a bored teenager on holiday in a caravan park somewhere in England, encounters another girl whose devil-may-care attitude represents everything she secretly longs for but is afraid to seek. Is the girl a runaway everyone's searching for? Motifs of disconnection and recognition run through the narrative, which mixes gawky teenage romance with well observed family life. Kanan's next effort, *The Birthday Riots,* also has a teenage girl at its centre, but is much more complex. The background is a London Mayoral campaign held when the government have just reformed land rights to return land to the aristocracy, and are clashing with travellers and gypsies. Told week by week in the run up to the birthday of one of the spin doctors' daughters, it's a fable of how political necessity and material gain swamps radical instincts, contrasting her political naivety and youthful openness with his trampled ideals. Both are excellent.

Labiano and Dufaux's *Dixie Road* (two volumes) is a broad and confidently drawn tale of a young girl in 1930s Louisiana discovering the truth about her family, set against a backdrop of labour struggles and migration from the southern states following crop failures. Her mother is a runaway heiress who likes mending cars, her initially absentee father a bank robber. With the law and private investigators on their heels, they set of for a socially conscious journey through the south. In the interim we had to suffer muddled, limited storytelling like that in *Shelter* and *Shelter: The Man in the Pointed Hat* by Cecil Fernando, about a grieving man and his son who take shelter in an old Indian's cabin during a hunting trip. Drawn entirely in charcoal, awkwardly in places, they begin to have visions as they wait for the Indian to die. The main barrier to enjoyment is the terrible lettering, but the story itself is slight and obvious. John Mallory had obviously fallen in love with *Cages* and *Big Numbers* before he produced *Amnesia,* a deliberately befuddling bit of self-importance about a director who enters an alternate world when he falls into a narcoleptic sleep, recounting his visions to a reporter. *Caveman* is a bit of an anomaly, a collection of very soft humour strips by Turkish cartoonist Tayyar Ozkan. They first appeared in *Heavy Metal* in 1993, and feature the adventures of a laid-back, bespectacled eight year old cave boy and his girlfriend Jade. The cartooning is competent, the jokes, as they so often are in short strips, repetitive.

Perhaps NBM's most important current creator is Lewis Trondheim, whom Fantagraphics had trouble launching on an unsuspecting US audience. Trondheim is a genius cartoonist, as seen in NBM's 2002 Christmas offering *L'il Santa,* which is plotted by collaborator Thierry Robin. It's a delightful fantasy, visually so inventive, in which Santa is forced to visit the big city to collect garbage, which he turns into children's toys, when the local supply is exhausted, leaving his impish helpers to defend his home against the Snow Dragon. Gentle and whimsical, the Euro version of Raymond Briggs *The Snowman,* is drawn in a quirky but polished cartoon style without words. Back in 1986 they had a go at Sci-Fi, putting out a story by *Barbarella* creator Jean-Claude Forest, drawn by Paul Gillon who'd go on to do *The Survivor*. *Labyrinthe* is about an Earth couple deep frozen in the present day and resuscitated 1000 years later when our civilisation has been destroyed. Instead of breeding to resurrect the human race, he promptly falls in love with an alien woman and becomes involved in an intergalactic war, in which a race of evolved rats are fighting the more humanoid inhabitants of the solar system. Gillon's art is detailed and rich but the colouring and printing are rather patchy. Another peculiarity is Dan Abnett's Arthurian fantasy *Uther, The Half Dead King*. Illustrated by Bo Hampton, it's very elegant, but the story's worn and full of portentous mutterings full of sound and fury, but not a lot else. About the best of the new science fiction is *Gipsy,* set fifty years in the future, where the creation of a transcontinental highway has had a huge effect on a world gripped by a new ice age, the breakdown of countries and impending anarchy. The story, by *Raptors* artist Enrico Marini, written by Thierry Smolderen, follows Tsagoi as he comes into possession of his truck the *Gipsy Star*. In volume 2, 'The Fires of Siberia', Tsagoi's heading for Siberia, a backwater passed by in the new global economy, with a truck full of weapons. More volumes have appeared in *Heavy Metal,* and are due for release in 2003. The choice of unusual settings and tackling of world issues makes this more than just a near future adventure, but it hardly stretches the reader. However, compared to *Gustav P.I.,* it's practically Tolstoy. Try this on for size: what if Vienna secessionist painter Gustav Klimt was a vampire paranormal investigator helping the London police out with a series of bizarre murders based around a Soho sex club? Malcolm Bourne's tarted-up police procedural is readable, but the art is lousy photo-referenced, over-dramatic nonsense. There's a similar problem with *The Fallen* by Miriam Kim and David Aaron Clark. Volume 1, 'The Pale Door', is a load of sub-Buffy shenanigans, using painted photo-referenced montages where everyone overacts. Both of these have some spark of originality, though, compared to *Sid Meier's Alpha Centauri:* 'Power of the Mind Worms'. Based on a game, it has unpleasantly slick computer artwork, garish colours and no plot worth mentioning.

NBM have always tried to bolster the reputation of the graphic novel by publishing adaptations of well-known works, with varied results. One of their earliest, Crepax's take on *Dr Jekyll and Mr Hyde,* was moribund, among his worst graphic novels, and his adaptation of *The Turn of the Screw* (Henry James) was equally perplexing, updated to the 1920s and therefore lacking the repressed sexuality of the buttoned up, Victorian original. Less is more, with James, and drawing pictures best left to the individual imagination to conjure up does the story no favours. Why no one has translated his superb *Dracula* is anyone's guess. Except it has very little sex in it. In 2002 Lorenzo Mattotti got together with scripter Jerry Kramsky to have another less rigid and more inspired go at *Dr Jekyll,* with exciting results. Slight but worthwhile is *Give it Up,* in which Peter Kuper takes on Kafka. And wins.

There are four adaptations by Will Eisner in plush hardback format. Eisner is supposed to be a god, but frankly most of them are disappointing. *Moby Dick* is short and very unsatisfying. There is so much more to Herman Melville's original than the story, and that's about all Eisner has room for. The pacing doesn't replace the rhythmic language and the images don't really conjure up the majesty and terror of the sea, nor the obsessive relationship between man and whale. It's all a bit squitty and cute. *The Last Knight* (wisely subtitled 'An Introduction to Don Quixote by Miguel de Cervantes', to stop literary types choking on their broth), is mysteriously classified by NBM as part of their fairy tale series. Picaresque it may be, a fairy tale it is not. You open it with heavy heart, wondering how one of the longest, plot-heavy novels in European literature can be crammed into thirty-two pages. Eisner turns in a broad comic sketch, which pretty much fails to do more than say 'It's important to have dreams'. Because the story of *The Princess and the Frog* is both well known and short even for a fairy tale, it fits into thirty-two pages better than most, and Eisner's sketchy cartooning looks least out of place here. Probably due to my shameful, if predictable, lack of knowledge about African history and mythology, Eisner's most recent adaptation works much better. *Sundiata* is an ancient Mali story about a crippled prince who overthrows an invading despot, and works because it's a morality tale, handed down in an oral tradition without a great deal of description, leaving the artist room to manoeuvre in how he tells it. Overall you have to question why Eisner chose to adapt such disparate stories in such a short format (and why we're being asked to pay a small fortune for what is a series of not terribly good comic books between two bits of board).

The Yellow Jar by Patrick Atangan also offers insight into a different culture's fairytales, collecting and illustrating traditional Asian stories in ukiyo-e style (i.e. without perspective, like traditional Japanese woodcuts where there is no depth and landscapes float behind figures). The result is extremely pretty and the philosophical angles of the stories refreshing. However *The Yellow Jar* pales into insignificance next to Miguelanxo Prado's pyrotechnic version of Prokofiev's children's opera, *Peter and the Wolf*. Prado's art here is essentially about mark making, as he uses chalks and different papers to suggest the texture of each animal's musical representation. Absolutely sumptuous, a visual treat for adults and children. The other star is P. Craig Russell with his *Jungle Book Stories*. Russell threw himself into the adaptations and while he's particularly at home with the great adventures (and not very concealed erotic charge) of Wagner his richly textured, sinuous vision of India is very alluring. He turns in a strangely coloured, even-lined vision of India reminiscent in composition and figure drawing of *Tarzan* dailies – surely not a coincidence. The most missable fairytale volume from a comic fan's perspective is probably the one that will appeal most to unsophisticated adults and children, the Doug Wheeler scripted *Fairy Tales of the Brothers Grimm*, illustrated by old Tolkien-dauber David Wenzel. I thought he was a fantastic artist when I was about nine, and no doubt another generation of kids will appreciate his go at the classics, but he's essentially a sugary illustrator with an old-fashioned vision. A more successful adaptation, although the project doesn't sound too promising on the surface, is Stéphane Heuet's start at Proust's *Remembrance of Things Past*. The first two volumes are lovely hardbacks, a little over-wordy, but with pleasant, clean, measured art. The comic format is peculiarly suited to moving back and forth in time elegantly, and allows enough of Proust's singular tone to come through, something film has difficulty in conveying.

Now for the less welcome efforts: *Verdilak*, by Bo Hampton and Mark Kneece, is an awful vampire tale, based on Tolstoy's *La Famille de la Vourdalak*, painted in drab and often clumsy watercolours, and featuring pompous nonsense like "The systolic rush, embarrassingly conspicuous, pounds in her ears and carries on the raging winds of the storm". It recalls the earlier *Dracula* by Jon J. Muth, more arty-farty daubing, but this time illustrations for a play script. And one can't imagine the puzzling kudos accorded Richard Corben's globular adaptation of Harlan Ellison's classic holocaust-survivor story 'One Man and His Dog' as *Vic and Blood*, following the film of the same name.

In the mid 1990s NBM began looking to homegrown talent rather than relying on European reprints for their bread and butter. Peter Kuper's *Eye of the Beholder*, an unusual, paranoid, commentary strip that originally appeared in the *New York Times*. It's sometimes funny, sometimes pointed, and four woodcut-style panels, one per page show an action reversed/informed by the full page 'punchline' drawing over the page. Kuper uses typography, cityscapes and soundscapes to enrich his work. The second collection is called *Mind's Eye*. A less serious take on alien invasion comes in animation artist Bill Plympton's storyboard-based preview of his next film, *Mutant Aliens*.

Ted Rall began as a gag artist. His *The Worst Thing I've Ever Done* is an amusing 'true life' collection of short strips very much in the vein of the *Duplex Planet* pages produced by David Greenberger and assorted artists. People tell Rall exactly what the title suggests, ranging from minor nastiness to murder. It works, but the format flags by the end. There's a similar problem with the short tales in *Classics Desecrated* by Doug Wheeler and a host of artists, which is well executed, but a tired idea where the repetitive format gets to you. Rall also had a go at autobiography in, *My War With Brian*, a mature reflection on the miseries inflicted on his annoying teenage self by the local bully. His next work, *2024*, an updated version of *1984* is extremely funny, but has a good satirical bite. Drawn in his signature thick lined style, it gives us a mad computerised society, as if eBay ran the world, full of surreal details and beautiful touches, even though it's a shock at first to see the message delivered via such broad cartooning. However it hits home powerfully. Strangely, his attempt at war reporting via cartoons is much less successful. *To Afghanistan and Back*, is described as a 'Graphic Travelogue' and forms part of a new trend in cartoon reportage. Several essays top and tail strips about Rall's experience as a war reporter when he went to find out what US propaganda wasn't telling the good people of America about the war on evil. His conclusions? Afghanistan isn't what you expect (half of the population don't pray, smoke opium, and rip him off at every turn), the Taliban and the Northern Alliance are as bad as each other, and *Anna Karenina*, his wartime reading, is very good. No surprises there, then. It has a place, but it's already preaching to the converted. Rall also edited *Attitude: The New Subversive Political Cartoonists*, which showcases the work of cartoonists working for the alternative press including Tom Tomorrow, Peter Kuper, Scott Bateman, William L. Brown, and Stephanie McMillan.

If Rall is the P. J. O'Rourke of the new comics reportage, Peter Kuper turns out to be the Bill Bryson. His *Comicstrips* chronicles a journey through Africa and Southeast Asia full of derring-do, humour and insight into local life.~FJ

NEAR MYTHS

Rip Off: *1 issue 1990*

As its title suggests, this is a collection of mythological tales, here interpreted (or reinterpreted) by Trina Robbins. Though not a major work, it retains her usual charm and economic line.~DAR

NEAR TO NOW

Fandom House: *2 issues 1987*

Anthology that's largely the work of enthusiastic amateurs, with the saddest aspect being a story by Jerry Siegel in 1 doesn't stand out. There's also a typically abstruse Matt Howarth strip in 1, and Norm Dwyer illustrating Dennis Pimple's story about cloud herders in 2 is best overall.~WJ

NEAT STUFF

Fantagraphics: *15 issues 1985-1989*

Within the first four issues of his black and white magazine *Neat Stuff*, Peter Bagge went from an underground (particularly Crumb)-influenced doodler to a master storyteller. It's a delight to watch him feeling his way and developing his characters. Early issues are more manic, centring around Girly Girl (the most fearsome small child ever created) and Chuckie Boy (an incompetent wimp), followed by The Bradleys, his enduring creation. The Bradleys are the ultimate imperfect American family, in which the members spend most of the time hating each other. The stories revolve around teenage Buddy and his viewpoint, without being blind to his many failings. By 6 Bagge was producing extraordinary comic tours-de-force like 'Mom Power', in which Buddy's long-suffering mother goes bananas, downs tools and gets pissed on the front lawn, and 'Brotherly Love', an extended chase sequence in which Buddy and his annoying little brother Butch act out *Tom and Jerry* cartoons. Each character is fully rounded; each is awful in their own special way. The Bradleys stories were reprinted as six comic sized issues in 1999.

Neat Stuff also introduced us to the delights of Junior, a hopeless loser whose dry and rather dumb commentary on the world passing by is both touching and funny, Studs Kirby, a parsimonious braggart who runs a talk radio show, and Chet and Bunny Leeway, young professionals whose guiding force is a mixture of social climbing and ennui.

Bagge's sympathy for his characters is displayed in the gut-wrenchingly embarrassing 'Studs Kirby's Big Break' in 7, where Studs, mostly out of fear, screws up his chance to impress a big city radio star by getting drunk and insulting him. All the character's insecurities and the way he compensates for them are laid out for us to realise that what we've been laughing at is weakness. Other excellent stories include the thirty-two-page Buddy story, 'Hippy House', in 9, 'You're not the Boss of Me' (Buddy's self-obsessed sister Babs throws the mother of all strops), and Girly Girl and Chuckie Boy putting the boot into political correctness in 'Summer Camp' in 13.

Neat Stuff blends the screamingly funny with warm, understanding humour that succeeds so well because it's character-driven. Bagge's manic drawing style perfectly matches the sudden outbursts, screaming fits and fights with which the stories are punctuated. Most stories are collected, but in books with a character theme rather than chronologically.~FJ

Recommended: 6, 7, 9, 11-13, 15

NECRON

Catalan: *3 Volumes 1989-1991*

It's a great pity that all that most English speaking comic readers know of Magnus (real name Roberto Raviola) is this light-hearted erotica. Originally drawn for *Metal Hurlant* in a broad, even-lined style, it features his characteristic heavy use of blacks, but lacks the detail and accuracy of his more usual drawing style. Necron is an over-sexed robot made from leftover body parts and bits of machinery by a mad female scientist, who can only get it off with corpses. Of course she could probably do a great deal to aid the human race with this technology, but instead she decides to build a walking dildo. Not wanting to violate the dead, she creates her 'undead' servant with a gigantic dong, but soon discovers that others would like to get their hands on her discoveries. The jokes aren't up to much, but the vigorous drawing style and good-natured humour (even about necrophilia) is winning.~FJ

NECROSCOPE

Malibu: *5 issue miniseries 1992-1993*, 5 issue miniseries ('Wamphryi') 1993-1994*

Caliber: *2 issues 1997-1998*

Comics adapting Brian Lumley's novels. The Necroscope of the title is Harry Keogh, able to speak with the dead and instantly learn anything from them, which is just as well because a Russian ESP operative is attempting to raise a vampire. Dying in the first series is a minimal hindrance to Keogh, who faces an older and infinitely more terrifying vampire in the second series. Martin Powell's adaptations make for good comics, with the first series superior by virtue of Daerick Gross' more appealing artwork. In the second Dave Kendall disguises a lack of basic anatomical knowledge under his painting. Powell also adapts the incomplete Caliber series involving an other-dimensional vampire world. It's decently drawn by Michael Perkins.~WJ

NECROTIC: Dead Flesh On A Living Body

After Hours Press: *One-shot 2001*

Seemingly intended as a miniseries originally, this is a well thought out modern horror story about archaeologist, Marshall VanDerGott, who, dying of cancer in 1928, is mummified by his friends and awakens in 1999, young and apparently healthy. His romance with Gwen, whom he meets at a museum, is, however, troubled by his need to re-bandage his body every forty-eight hours to renew his decaying flesh. Buddy Scalera and M. Swank write this tale of a doomed romance that descends into violence and gore, and Pat Quinn draws it. A good attempt, though not entirely convincing.~NF

NEFARISMO

Eros: *8 issue limited series 1994-1995*

A new gardener arrives at *The School For Evil*, and becomes embroiled in games of decadence and domination that can end in death. Drawn in such an unappealling manner so as to remove all eroticism from almost every form of sexual behaviour on display, the pretentious dialogue renders this unreadable as well. Unsuitable for all but the most extreme sexual submissives, who should purchase immediately and incorporate into their regime.~FP

NEGATION

CrossGen: *One-shot ('Prequel') 2001, 12 issues +, one-shot ('Lawbringer') 2001 to date*

Negation gives us a different view of the monstrous foes from *Crux*. In an opposing universe the God-Emperor Charon is supreme and total ruler. With nothing left to conquer he turns to the planes of the CrossGen universe. Being cautious though, he first has his vile minions abduct one hundred assorted denizens of said planes and test them to destruction. At least that's the plan. Amongst the squabbling pack of variously powered individuals is weak, powerless Earthling, Obregon Kaine, whose grasp of strategy and military tactics enable some of the prisoners to escape and begin a guerilla war within the Negation universe. It's competent science fiction drama from Tony Bedard and Paul Pelletier, and 'Lawbringer' gives some background on Charon.~WW

NEGATIVE BURN

Caliber: *50 issues 1993-1997*

Despite attracting material by some of the great and good, Negative Burn suffered from being too indulgent. The diversity of the stories is laudable, but too often they rely on weak humorous punchlines or are let down by amateurish artwork.

There are several main strands to the content of each issue; from 28, the page-count was increased to sixty-four pages, so there was plenty of room. There are the regular series: 'Mr Mamoulian' by Brian Bolland (all issues), dealing with park-bench philosophy; 'Classics Desecrated' by Doug Wheeler and various artists (4-18, 20, 21, 23, 24), in which literary classics are trashed (sorry, adapted) in one or two pages, and 'Alan Moore's Songbook' (9-14,16-19, 25, 26, 28, 35, 37), where his lyrics are illustrated by different artists, more or less successfully. There are also early or unpublished works by a number of better known creators, P. Craig Russell (4, 8, 30,37), David Lloyd (6), Michael Gilbert (14) and John McCrea (37, 39, 41, 42, 44).

A large proportion of the remaining material is strips from existing or upcoming Caliber titles, or examples of titles that Joe Pruett, as editor, felt deserved wider exposure. Most of the following strips are well worth investigating, either from Caliber or from other publishers. In the former category we have *Kilroy Is Here* (1, 4, 6,13, 18, 24, 47, 50), *Boneshaker* (1, 8, 50), *The Wretch* (38), *The Trigger Man* (4), *Jazz Age Chronicles* (7, 12), *Dominique* (9, 13, 25, 34), *Twilight People* (9-13), *Exit* (12, 22), *Baker Street* (25), *The Jam* (25), *Nowheresville* (33) and *The Kingdom of the Wicked* (38). In the latter, *Flaming Carrot* (1, 14, 19), *Strangers In Paradise* (13), *Suburban Nightmares* (25-27),

---

*Available in a collected edition

Trollords (21), *Replacement God* (29, 35), *Strangehaven* (24), *Very Vicki* (26), *Rob Hanes* (30, 39), *Shades of Gray* (32), *The Trespassers* (38), *Skeleton Key* (44), *Patty Cake* (45-49), *Too Much Coffee Man* (50), and *Footsoldiers* (50). There's nothing particularly wrong with this, but the short-story format doesn't always do the strips favours and it's not always obvious whether the story's been produced specifically for *Negative Burn*. Other strips that fall into the above categories, but which are less successful are *The Black Mist* (3), *The Apparition* (1, 25), *Sojourn* (5), *Kabuki* (16, 25) and *Milk & Cheese* (13).

Several creators also deserve mention. Phillip Hester's artwork constantly surprises, changing shape to suit story or genre, whether it be for short stories, like 'Boneshaker' and 'The Creep' (29, 37) or longer ones like 'The Wretch', and he can be found in many other issues. Jeff Nicholson's disquieting studies of human behaviour are very effective (15-18, 30-36), while Joe Pruett and Philip Xavier's 'Lost Paradise' (22) and Ian Carney and Dave Taylor's 'Mr Murray' are both heavily, but interestingly, Moebius-influenced. Joe Pruett and Andrew Robinson's 'Dusty Star' (28, 37) is a Western with robotic trappings, but regrettably reduces itself to a gag strip for the second episode (though it also briefly had its own title). Kevin O'Neill turns in some interesting experimental artwork in 31 and James Owen's 'Little Neil In Slumberland' neatly parodies *Cerebus* and Neil Gaiman. Darko Macan and Edvin Biukovic collaborate on a series of fine short stories, usually very blackly humorous and often war-related (41, 42, 44-48, 50). Andrew Pepoy's 'Ajax and Simone' is a well-drawn humour strip in 48 which also features Ivana Filipovic's 'This or That?', a strikingly drawn character study. Star of the show, however, is Paul Pope, whose 'Eulogy To Marx' (12) and 'Triumph Of Hunger' (13) are terrific political strips, and whose non-related short stories in 18, 20, 21 and 23-25 are worth looking out for.

The final issue was a ninety-six page spectacular that brought a welcome return for some creators, Phillip Hester, in particular, with a long 'Boneshaker' episode. Neil Gaiman (with Guy Davis) and Paul Jenkins (with Michael Gaydos) both turn up to no real purpose, but Mike Wieringo's 'April Nightmares' is fun. Finally, many issues have sketchbook pages, some of which may be of interest – Mike Kaluta (4), Jeff Smith (3), Arthur Suydam (5), P.Craig Russell (10), Tony Harris (13), David Mazzucchelli (17), Jaime Hernandez (31) and Neil Gaiman (25). There are two collections of the *Best of Negative Burn Year One* and *Year Two*, which are a good place to start for those who want to see why the title is generally well regarded, but no single issues can be wholly recommended.~NF

NEGATIVE EXPOSURE

Humanoids: *4 issue miniseries 2001**

Incompetent, but lucky reporter Varése is in Beijing during the Tianamen Square massacre, and guided to some spectacular pictures by the mysterious Madam Kokonino, who has an ulterior agenda. Unfortunately for both, Varése mucks it up. In many ways he's the antithesis of Tintin, dragged into situations rather than doggedly following them, a victim of circumstance and beneficiary of luck. With help from the mysterious Frenchman he eventually comprehends the full plot, involving a search for immortality with the background of Kokonino World, an advanced funfair with incredible robots. Thierry Smolderen's story is drawn in an expressive ligne clair style by very good artist Enrico Marini, never flashy at the expense of storytelling, and able to draw everything the story demands with aplomb. Elements of the plot are just too convenient, but overall it's a good adventure yarn.~FP

NEIL & BUZZ IN SPACE AND TIME

Fantagraphics: *1 issue 1989*

Neil is jogging in a park with Buzz, who may or may not be the Devil. Together they travel to the end of the universe and spend a day in a New Jersey amusement park. Despite the names, and Neil's reference to astronaut training, it's uncertain if this is meant to be the Neil Armstrong and Buzz Aldrin. This is an unfinished story by George Alec Effinger, realistically and richly illustrated by Henry Mayo. Possibly a subtle, ironic and very black comedy on the nature of existence. Possibly.~NF

NEIL THE HORSE Comics And Stories

Aardvark-Vanaheim: *10 issues 1983-1984*
Renegade: *5 issues (11-15) 1984-1988*

Beginning life as a syndicated newspaper strip (1975-1979), Arn Saba's eclectic creations made a brief appearance in Charlton Bullseye 2 (1981). The title is dedicated to Carl Barks and inspired by the musicals of Fred Astaire, indicating that this is a very unusual comic. Based in format on *Walt Disney's Comics and Stories*, it mixes comic strips, annotated music scores, illustrated text and paper-doll pages. Neil himself is a big-hearted omnivore with a real love of bananas; his companions are Madame Poupee, a puppet, and Soapy, a cigar-smoking, cynical cat. Saba is assisted by a number of friends who contribute stories or lyrics or paper dolls (Barb Rausch). Her Great Women of Comics dolls include the Dragon Lady, Modesty Blaise and Phantom Lady. The stories are full of *Little Nemo*-like surrealism, totally out of this world, with touches of parody and plenty of romance. This is a unique series that's a joy to read, pushing what you expect of a comic book to the limits.~NF

Recommended: 3, 11, 14

NEMESIS the Warlock

Eagle: *7 issue limited series 1984-1985**
Fleetway/Quality: *19 issues 1989-1991**

On a far-future, radiation-scarred Earth, mankind dwells underground, courtesy of the alien invasions that have devastated the surface. Transportation is provided by a fantastic system of Travel Tubes monitored by Chief of Tube Police, Torquemada. Named after, and later revealed as a reincarnation of, the 15th-century Spanish monk who tortured thousands of heretics, this righteous, evil bigot graduates to Earth ruler and later godhood as he fans xenophobia against all non-humans and drives his crusade to the stars. His nemesis is Nemesis, a bipedal equine alien who assists any alien or Earth resistance movement subjected to Torquemada's attentions. Outrageous, wacky, undisciplined and juvenile, the strip is littered with throwaway gags, both verbal and visual, such as the flying machine based on a Penny Farthing design in the Gothic Empire sequence. Fine character development unfolds leisurely; it is not until 'Purity's Story' (16-17) that Nemesis' full motives are revealed to be not quite as pure as initial appearances suggest.

The publishing history of Nemesis is convoluted. It débuted during 1980 as a few isolated shorts in the British weekly comic *2000AD*. The regular strip began as a series of serials in *2000 AD*, each serial labelled a 'Book' and comprising around twelve to fifteen consecutive issues of five-page episodes. The Eagle series reprints Books 1-3 in colour for the first time, and Fleetway/Quality reprint Books 1, 3-9. In both cases, the originals have been resized and partly redrawn to fit standard comics, much to the detriment of the artwork. The best and most accessible format is presented in Titan's *Nemesis* compilations, also designated as 'Books'. These fail to collect Book 2, which means that their numbering is out of sync with the original *Nemesis* numbering. More sporadic episodes have appeared in *2000 AD* subsequent to Book 9. Pat Mills is Script Robot on all and Kevin O'Neill co-creates and draws Books 1, 3 and 4. Indeed, some of their previous creations (most prominently *ABC Warriors*) find their way into later stories. Bryan Talbot is the other major artistic contributor (Books 4-6). Jesus Redondo (2), John Hicklenton (7, 9) and David Roach (8) complete the roll call.

Books 1, 3, 4 head the class, as later tales are burdened by the increasing political conscience that the series develops. And the kindest comment that can be attributed to Hicklenton's artwork is to describe it as an acquired taste.~APS

NEON CITY

Innovation: *1 issue 1991*

A future in which clones of 20th century celebrities live and mix with ordinary humans. Except someone's killing them. The admittedly original backdrop fails to disguise the lack of inspiration elsewhere in this cop series.~FP

NEON CYBER

Image: *8 issue limited series 1999-2000*

An offshoot from *Dark Minds*. The Shen Yang crime syndicate in Macropolis persuades the street gangs to divide the city into territories. This doesn't sit well with rival gangs. When the protagonist Neon is framed for the murder of Shen Yang boss Zeburo the Neon Dragons are forced to make a stand. This leads to deaths in 4 and 5, while Neon is with his mysterious girlfriend Asako. Adrian Tsang tightly plots some gripping stuff, but given the cast consists of criminals and murderers, it's hard to muster much sympathy for them, never mind actually like them. Lou Kang pencils efficiently with only a slight overdose of talking heads. Amoral and forgettable.~SW

NEON GENESIS EVANGELION

Viz: *Series one 6 issues 1997-1998*, series two 5 issues 1998*, series three 6 issues 1998-1999*, series four 7 issues 1999**

A superior entry in the peculiar category of Japanese comics where children are given military designations and sent to fight battles in giant robot suits. It's 2015, and a devastated Earth (meteor hit planet), is under attack from mysterious beings known as Angels. The delving into fourteen year old pilot Shinji's feelings about being a planetary saviour, and life in general, sets the series above similar material, and every succeeding chapter introduces new complications. Series 3 and 4 are available in Japanese style editions that read from back to front, more faithfully presenting the artwork.~WJ

NERVOUS REX

Blackthorne: *10 issues 1985-1987*

Rexford is a mild-mannered Tyrannosaurus Rex who would rather eat oatmeal than hunt and rend and tear. This wouldn't be a problem, except that his huge wife, Dearie, has ambitions for him. It's the old hen-pecked husband gag – with the jokes rationed to about one every two issues, so it's just a portrait of an ugly marriage in urgent need of a divorce lawyer. Once in a while, however, William Van Horn manages to keep an idea pinned down for long enough to build a story, and he has a nice way with moons and planets.~FC

Recommended: 5

NEURO JACK

Big Entertainment: *1 issue 1996*

The invading Ghomans rule the galaxy by means of a vast internet web. Neuro Jack is a human freedom fighter whose consciousness was downloaded into the web, enabling him to fight them with the stored knowledge of a thousand enslaved worlds. Mediocre computer generated comic based on concepts designed for the Microsoft Network.~WW

NEUTRO

Dell: *1 issue 1967*

Had notoriously inept film maker Ed Wood ever turned his hand to comics he'd have created *Neutro*. It's gloriously incompetent in every fashion, starting with Jack Sparling's appalling art. If the hand he's drawn on page sixteen is based on his it explains a lot. The anonymous script reads as if it's been dashed off on dictaphone by someone who's just consumed more speed than is good for them. Neutro is a giant robot, buried on Earth in component parts centuries ago by aliens for an obscure purpose. Uncovered by archaeologist John Dodge, Neutro is reconstructed, and there follows twenty-two pages of dementia, starting with speculation on Neutro's possible destructive capacities and continuing with a spectacularly badly illustrated sequence of assorted powers attempting to bring Neutro under their control. Truly an all-time turkey, and only recommended for kitsch value.~FP

Recommended

NEVADA

DC/Vertigo: *6 issue miniseries 1999**

Steve Gerber's notorious *Howard the Duck* fill-in issue (16) featured, among other delights, a Las Vegas showgirl running off with an ostrich. Some two decades later, Gerber returned to that pair of characters. Were the fans clamouring for this oddest of odd couples? Probably not, but against all the odds, it was worth the wait. Gerber is on masterful form, mixing the cosmic and the banal with his typically jaundiced eye, and artist Phil Winslade illuminates the script with astonishing detail. Any summary of the plot is, frankly, impossible; suffice it to say that minds will be blown. A further *Nevada* adventure appeared in Vertigo's *Winter's Edge* 2.~DAR

Recommended: 1-6

NEVERMEN

Dark Horse: *4 issue miniseries 2000**

The four eponymous heroes all dress in the same uniform: jackets, hats, saggy gaberdines and goggles, betraying few distinguishing marks or motives like a cadre of Phantom Stranger impersonators. The motif-like cast includes a retired cop, a bloodthirsty vigilante, a mystery woman, some strange villains and a mad professor or two, and the story has a maddeningly dreamlike quality, skipping from one slam-bang action scene to another without acquiring any plot impetus. It's like the ghost of an adventure story with little evidence (or hope!) of things ever becoming relevant. The introductory episodes in *Dark Horse Presents* 148-150 offer little enlightenment. This is lovingly drawn by Guy Davis and looks magnificent in colour, but Philip Amara's writing is deliberately oblique, so the contest in 1 to make sense of the story so far is particularly cynical. Exciting and nice to look at on the surface but annoyingly empty.~SW

NEW AMERICA

Eclipse: *4 issue miniseries 1987-1988*

A story spun-off from Eclipse's Scout, set in the early 21st century, when America is ravaged by a twelve-year civil war and partitioned into independent kingdoms as political factions fight for control. *New America* focuses on anti-heroine Rosanna Winters, general in the Southwestern Free States, as they conduct assassinations and sabotage raids to play off the political cabals. Creators John Ostrander, Kim Yale and Kwapisz depict a grippingly realistic scenario, bereft of superpowers, spandex, magic or unforeseeable technology. Character motivations are powerfully defined. It is bleak, sober, political, adult, uncompromising and devoid of humour. You cannot dance to it and it will never spawn a hit single. A classic in its field.~APS

Recommended: 1-4

NEW! COMICS

Tweedle-Yin Tweedle-Yang Productions: *1 issue 1990*

Magazine sized alleged humour anthology from a group of Vancouver cartoonists, none of which matches the wit of the publishing company name. Theresa Henry turns in a couple of good one-pagers on modern relationships, and there's some appeal to the frenetic underground style cartooning of Shaun Hayes-Holgate and the Rick Geary stylings of Ludwig Dääs. That alone, though, doesn't compensate for the remainder being amateur scribbling or entirely pointless strips.~FP

NEW FORCE

Image/Extreme: *4 issue miniseries 1996*

Filling the gap during a hiatus in the publication of *Newmen*, this was intended to stimulate interest in one of Image's longer running titles. The Newmen spend much of the series captured by one organisation or another, but by the end the team has been refreshed and retooled for continuation in *Newmen* 21. Penciller Todd Nauck showed promise, although relied on swipes.~WJ

THE NEW FRONTIER

Dark Horse: *3 issue miniseries 1992**

A dense and complex political thriller starting with the 1963 death of a beloved Marilyn Monroe figure and extrapolating from there to a 1980s in which there's an annual pageant in her honour. Such is the winner's popularity that her affiliation with a dark-horse presidential candidate boosts his ratings considerably, at which point past secrets begin to emerge. With *Suburban Nightmares, Silent Invasion* and this title, artist Michael Cherkas had a pre-*X-Files* solo franchise on the conspiracy-theory section of the comic market, but his stylised art won't be to everyone's taste. There's no really sympathetic characters and the third issue lacks breathing space, but otherwise top-notch.~FP

NEW GODS

DC: *Series one 19 issues 1971-1972 (1-11*), 1977-1978 (12-19), 6 issue miniseries 1984, Graphic Novel ('The Hunger Dogs') 1985, series two 28 issues 1989-1991, series three 15 issues, 1 Secret Files 1995-1996*

"An epic of our times", proclaims the cover of *New Gods* 1, and how true it was. The series audaciously begins with an epilogue explaining how when the old Gods died their planet split in half, one portion becoming New Genesis, the other Apokolips. This was the setting for what would be known as Jack Kirby's "Fourth World" trilogy, the most magnificent space saga ever to appear in comics. When reduced to basics, the series concerns good vs evil, and whether upbringing or genetics determines character. The population of New Genesis live in harmony with themselves, each other and their world, and largely occupy a beautiful city, floating above a lush, green, unspoiled planet. The inhabitants of Apokolips, by contrast, are ruled by the dreaded Darkseid, and the constantly churning energy pits cloud the planet with noxious fumes, blotting out most light.

The plot propelling Kirby's *New Gods* was Darkseid's quest for the Anti-Life Equation, which would give him power over the universe. Led by Highfather, visually a very biblical-style character, the Gods from New Genesis want to prevent this. Foremost among them is Orion, Darkseid's son, but raised on New Genesis. The full story of the pact behind this is told in 7, among the most powerful and moving superhero stories ever, detailing the origin of the conflict between New Genesis and Apokolips. Orion's upbringing imbues him with decent values, but his endemic ferocity has to be curbed by machine. The Anti-Life Equation is to be found on Earth, and while it serves as a setting for Orion and other New Gods we also learn more about New Genesis and Apokolips. Kirby populated the series with further memorable characters such as Orion's right-hand man Lightray, a name describing his powers and personality, Darkseid's scientific minion the sadistic Desaad, and a personification of death on skis named The Black Racer. It's Darkseid, though, who's remained his most memorable creation. Although almost a personification of evil he retains the grandeur of a ruler, and a perverse sense of justice.

New Gods was Kirby at his best. The grandeur of his designs completely convinces, and the comics are packed with magnificent imagery. The only downside is the subdued inking of Vince Colletta in 1-4. Mike Royer's arrival with 5 cemented a perfect look. Kirby's plots and characterisation were equally excellent, and although he was often criticised for unrealistic dialogue in other titles, such comments have no place regarding *New Gods*. 6's 'Glory Boat' is a delve into the depths of the human psyche, and there's more human interest in 8's 'The Deathwish of Terrible Turpin', a study of how much a human will endure. Kirby also surprises throughout, particularly with 9's revelation that New Genesis is not the paragon of integrity thus far presented. Sadly, Kirby was unable to finish his story, and Orion's claim in 11 that when he and Darkseid clash the war will finally end is a tantalising teaser. In 1984 DC reprinted Kirby's issues as a 6 issue miniseries, featuring a new conclusion in the final issue. Twelve years on Kirby's art wasn't as strong, but his plotting was as good, with an ending that defied all predictions. The saga didn't finish there, though, as Kirby then produced the graphic novel *The Hunger Dogs*. It's frankly disappointing, with Kirby's intention of killing some major characters vetoed in the face of toy-company interest, requiring extensive alteration to plot and art.

After their 1970s cancellation little was seen of the New Gods until their return in *First Issue Special* 13, leading to the restoration of a regular series, now titled *The Return of the New Gods*. Those also hoping for a return of the glory days were sorely disappointed. Gerry Conway was seemingly under instructions to go mainstream superhero and redesigned characters and concepts accordingly, introducing new cast members along the way. If one can forget Kirby it's a solid, if unspectacular superhero series, very nicely drawn by Don Newton. Ultimately, though, the characterisation is very much at odds with what had been established, the uniform dialogue patterns being particularly out of place. Again cancelled midway through a story, this time it was concluded a little sooner in *Adventure Comics* 459 and 460.

By the time of the second ongoing series the *New Gods* cast were intimately connected with the DC Universe as recurring characters. The appointment of respected TV scriptwriter Mark Evanier boded well as his credentials included a period as Kirby's assistant when the original series was conceived. Strangely, though, his work fails to impress. Part of the original appeal of *New Gods* lay in the gradual unfolding of a mystery, but Evanier lays everything out on a plate, even complicating stories with superfluous explanation. He gave the characters a greater depth, though, and his best story is 7-12, in which Orion infiltrates Apokolips to search for his imprisoned mother. Evanier's scheming Desaad was also well characterised, plotting to usurp his master Darkseid throughout the series. 17 introduces Darkseid's father, an equally unsavoury character, completing three dysfunctional generations. Paris Cullins drew 1-18, and, while able to tell a story and draw a good action scene, he was incapable of imparting the grandeur of New Genesis or the squalor of Apokolips. The same applied to his successor, Rick Hoberg. The problem throughout *New Gods* is that Kirby defined his worlds and characters so well that no following creators have been able to match him, few having his imagination and scope. Jim Starlin also paints a grand picture, though, and was originally intended to produce the entire series. What remained of his plots filled 2-4. When cancellation arrives with 28, the primary thought is 'oh well, never mind.'

The bulk of the 1995 series is written by Rachel Pollack, and the usual plot of Orion and Darkseid in opposition isn't dragged out. The astonishing conclusion in 2 results in some of the Gods going mad, particularly Lightray. Here the series becomes disjointed, with the redeeming plotline being Desaad masquerading as Darkseid, and despite dramatic artwork from Luke Ross the series failed to gather pace. 9 is a noteworthy Keith Giffen-illustrated fill-in, Giffen having begun his career with nice Kirby impressions. Pollack ends her run in 12 with a big bang, leaving John Byrne a bit of a problem to tie up in the final three issues. He does so with aplomb, his interpretations of the characters being closer to Kirby's than anyone else's. He provides a well-paced plot involving the destruction of Apokolips and New Genesis, guest-starring other related Kirby characters Mister Miracle, Big Barda and the Forever People. Byrne's pencils, inked by Bob Wiacek, are clear, crisp and expansive. It seems as if Byrne is the first worthy successor to Kirby. He concludes the series with a cliffhanger resolved in *Jack Kirby's Fourth World*, but you can pick up the 'Secret Files' special which offers background information for many characters. To experience the *New Gods* saga at its best read the recommended issues and don't bother with the rest.~HY

Recommended: Series one 1-11, miniseries 6, series three 12-15

NEW GUARDIANS

DC: *12 issues 1988-1989*

Assembled during *Millennium*, this bunch of oddballs and misfits was supposed to 'bring about the next evolutionary step for mankind'. This rapidly became a moot point, as they featured the most embarrassing collection of stereotypes ever to be assembled in one team. The Chinese woman is in touch with the 'Dragonforce' of ley lines, there's a tech-obsessed

Japanese man and the streetwise black chick from 'Fascist Britain', the Aboriginal mystic who became 'one with everything', and the embarrassingly nellie South American mystic who became comics' first visible homosexual, thereby reinforcing everybody's favourite stereotype about gay men. Realising they were on a highway to doom, the creators flailed about, trying a succession of 'quick fixes'. Jet sacrificed her life heroically during an Invasion crossover and Extrano butched up his act, becoming more Dr Strange and less Carmen Miranda, but it was still all going horribly wrong. Eventually, the DC cut their losses and decided that they were instead supposed to be the protectors of the next generation of humanity, dumping the team on an island with a bunch of mutants and forgetting all about them. No bad thing, either.~HS

NEW LOVE

Fantagraphics: *6 issue miniseries 1996-1997**

Towards the end of *Love and Rockets'* run there was a feeling that Gilbert Hernandez had become chained to his ongoing characters, involved in ever more dense and complex tales. Meanwhile, the odd and imaginative short pieces Gilbert once contributed all but disappeared. Unshackled from a locked-in continuity, Gilbert's always fertile imagination fires like a scattergun, throwing out whimsical throwaways and fabulous fables, and permitting him to indulge a sense of humour lately held in check. Top item in the latter category is a one pager found in 6, 'Roy in "Serious Fucking"', which ought to bring a smile to the face of any broad-minded adult. Given Gilbert's accomplished and under-rated art these pieces would be enough for many other creators, but there's also an assortment of more thought provoking material. The glimpses into the lives of the American based cast from *Love and Rockets*, are well crafted, particularly those involving the pre-teen Venus, possessed of a precocious nature, yet still not understanding plenty of what occurs around her. 3's sordid revelations about football star Sergio and his mother Pipo are a fine example, as Venus is driven around by Sergio, who leaves her for long periods. A second story then details what Sergio was up to during these absences. The eclecticism of *New Love* is magnificent, and one hopes Gilbert doesn't desert it, but only the previously known *Love and Rockets* characters transfer to his current title *Luba*.~FP

Recommended: 1-6

NEW MAN

Image/Extreme: *4 issue miniseries 1996*

A spin-off from the 'Extreme Destroyer' crossover, New Man is trapped in the present, having been a servant of the alien Keep who chose to help the Earth's defenders against them. 2 sees him trying to recruit the Wildcats against another alien who's controlling all human minds, but by the time he's convinced Majestic to join him the crisis has been averted. Told straight by Eldon Asp but actually quite funny. The rest of the series is about starting over on a new world. The last issue is a 'Shadowhunt' crossover. Daft name, but not without promise.~NF

NEW MUTANTS

Marvel: *100 issues, 7 Annuals, 1 Graphic Novel, 1 Special 1983-1991, 3 issue miniseries 1997-1998*

Débuting in the 1983 graphic novel, *New Mutants* was one of the earliest *X-Men* spin-offs. Originally by Chris Claremont and Bob McLeod, it returned to the roots of the X-Men, bringing together the second generation of students at Xavier's School for Gifted Youngsters. A group of young mutants were learning both to use their powers and to function in a world that hated and despised them. The title also built on the New X-Men concept of a multi-racial, multi-national team boasting members from as far afield as Brazil, Scotland, Asia and Nova Roma, a throw-back colony to ancient Rome. Early issues are a light, solid read, not as angst-ridden as the X-Men and generally entertaining. An evil teen nemesis team, the Hellions, add to the fun and games. The straightforward superhero fun goes out the window with the arrival of Bill Sienkiewicz on 18, when the stories take on a darker, weirder edge. Sadly, the low-grade paper and basic printing aren't enough to do Sienkiewicz's art credit – the gorgeous covers serve to show us what we're missing – but the stories make up for it, particularly the 'Demon Bear'* issues starting with 19.

After Sienkiewicz leaves with 28, issues are mediocre and best avoided, although, if you haven't already had your fill of X-Men-related time paradoxes, the look at alternate futures around issue 50 is worth the time. The next notable period comes with the arrival of Rob Liefeld in 86, who, like him or loathe him, certainly stamped his mark on both the *New Mutants* and the entire comics industry. Liefeld instituted a much harder, more violent edge, action-packed, fast and furious, with little time for boring stuff like characterisation. Introducing Cable, the warrior from the future with the gun twice his size, the New Mutants moved further and further away from Professor X's ideals under the guidance of their new mentor. Appealing to a younger audience, and filling long-term fans with horror, Cable quickly became one of Marvel's most popular characters. 87-94 are collected. Before long, Cable had his own comic, *New Mutants* had become X-Force, and Liefeld had left to become one of the founders of Image, ushering in a new era for the comic industry.

In addition to the annuals, there's also a 1990 one-shot titled *Mutant Summer Fun*, which is, to all intents and purposes, a *New Mutants Special*. The miniseries focuses on the classic, Sienkiewicz-era line up as a game of 'Truth or Dare' sees the young heroes teleporting into the future, following a mysterious figure who hints bad things are due to happen to Illyana 'Magick' Rasputin. Appearing in a present in which she is dead, they find themselves face-to-face with their present-day counterparts, manipulated into messing with the timeline in an attempt to avert Magick's fate. Ben Raab and Bernard Chang present an enjoyable and character-driven romp, the time-twisting antics of which grate far less than you might expect from the usual convoluted X-continuity.~JC

Recommended: 18-28

NEW STATESMEN

Fleetway/Quality: *5 issue miniseries 1989-1990**

Genetic engineering enables the USA to develop super-soldiers early in the 21st century, one representing each state. The resulting political re-alignment sees England joining the USA, and by 2047 an evangelical Statesman is making a play for the Presidency and a previously discredited group is unravelling some appalling events. Despite the superhero trappings, this is more a political thriller. John Smith applies a wide range of characteristics to the cast, who are well designed by early artist Jim Baikie, drawing in his usual polished fashion. Unfortunately Smith's methods of storytelling are abstruse, requiring not so much reading between the lines as joining the dots. This was originally serialised in British comic *Crisis*, and offered early artwork from Sean Phillips (from 2) and a professional debut to Duncan Fegredo (from 3). There are moments to enjoy here, but digging them out is hard work.~FP

NEW TALENT SHOWCASE

DC: *19 issues 1984-1985*

New Talent Showcase stemmed from DC's commendable encouragement of new creators under talent co-ordinator Sal Amendola. The best overall strip is 'Class Of 2064' in 1-3, in which a school trip runs contrary to expectation. It's written with a pleasing lightness by Todd Klein, already well employed as a letterer, and illustrated by Scott Hampton, already top of the form. It's reprised in 7-8, drawn by Terry Shoemaker. A high percentage of contributors go on to better things, with Dan Day, Stephen DeStefano, Geof Isherwood, Karl Kesel, Rick Magyar, Tom Mandrake, Mindy Newell, Graham Nolan, Javier Saltares and Eric Shanower among the successful graduates, but plenty of perspiration with little inspiration is the order of the day. The title changed to *Talent Showcase* with 16.~WJ

NEW WARRIORS

Marvel: *Series one 75 issues, 4 Annuals 1990-1996, series two 10 issues 1999-2000*

Writer Fabian Nicieza and artist Mark Bagley brainstormed the first series and got away with it far longer than you'd imagine possible. The team's origin parallels, entirely coincidentally, we're sure, that of the most popular incarnation of the Teen Titans. Firestar (reformed New Mutants opponent), Namorita (shapely younger cousin of Sub-Mariner), Marvel Boy (supporting character of The Thing) and Nova and Speedball (stars of their own short-lived series) are summoned from comics limbo by a new, mysterious character with an agenda of his own. The first laugh occurs when the enigmatic individual is revealed as a skateboarding martial artist with the jolly name of Night Thrasher! Maybe it means something different in the USA. Night Thrasher's sister Silhouette also joins the cast, a plucky young thing who melts into the shadows and reappears to beat up bad guys with her crutches. Yep, a paraplegic streetfighter. The stunning idiocy of these two characters aside, it's fun in a bogus way, lots of light hearted superheroic hi-jinks, and then just when you think you've got its tone sussed it turns around and bites you. An example? In 20, Marvel Boy, Vance Astrovik, faces his abusive father one too many times, and retaliates with his telekinetic powers. Rather than the usual cliché of "Oh no! What was I thinking? I stopped myself just in time!", Vance lets Dad have it full force...and Astrovik senior dies next issue. 21 also sees the addition to the team of Rage, briefly of the Avengers until his true age was revealed, and Darkhawk, from another failed title. In 'Nothing but the Truth' (22-25) Marvel Boy is arrested, tried, and convicted for negligent homicide, and is shown as having the maturity to accept and face the consequences of his actions, dissuading the other Warriors from breaking him out. The subplot concerning Night Spanker's agenda is resolved concurrently with Marvel Boy's trial. It's tedious business and only Vance's trials, literal and otherwise, stick in the mind.

Bagley quit after 25, but Darick Robertson is a capable replacement. 28 presents yet another team member, or possibly two, as the young man and woman who share the Turbo costume and persona climb aboard. In 36, the incarcerated Vance Astro decides to change his nom de guerre to Justice, and starts seeking that commodity for his fellow prisoners, trying to change the reform system from within. In 'Time and Time Again' (43-50) the Warriors are scattered in time and space, courtesy of old Nova foe the Sphinx and a team of emergency reserves are called in to assist. During the action, Justice is thrown into the recent past of his family, and discovers why his father became an abuser. Does he try and alter the course of events, saving his mother years of misery but perhaps preventing his own birth, or let history take its course?

Shortly after, Evan Skolnick and Patrick Zircher inherit the title and do their best, but the decline was already in place. Desperate measures such as inducting the Scarlet Spider, in an attempt to tie into the 'Maximum Clonage' hoo-hah, were not well received by readers. One entertaining issue, however, was 66, 'The Speedball Revenge Squad', a light-hearted issue dealing with our bouncing buddy's inadvertent reunion with all the foes from his solo title – and Niels, the Bouncing Cat – during a visit to his hometown.

Following the 'graduation' of Firestar and Justice to the Avengers, an attempt was made to revive the Warriors. Speedball, Namorita, Nova and the surviving Turbo reunite joined by new characters Aegis (gangbanger with an enchanted breastplate) and Bolt (a 'lightning lad' with the Legacy Virus, Marvel's AIDS analogy). Scripter Jay Faerber and artists Steve Scott and Walden Wong do a capable job, but a lack of any convincing reason for the team to be, or stay, together undermines the series. Guest-stars were thrown in with random desperation to no avail, and the most interesting aspect of the second series remains the eye-searing costume redesigns inflicted upon the team. They generated so many howls of protest that the editor had to announce peevishly in the letter column that no more comments on the costumes would see print!~HS

THE NEW WAVE

Eclipse: *14 issues, 1986-1987*

Fairly uninspired superhero fare from the period when Eclipse came close to being a major player in the market. The Mindy Newell plots were mostly clichéd and never anything special, but some issues have early art from creators who were to go on to greater things, including Ty Templeton, Erik Larsen and Rob Liefeld.~JC

NEW WORLDS

Caliber: *6 issues 1996*

An anthology title. The strips weren't so much solicited for the title as thrown together because of a vague science fiction grounding. Mister X continues from the stories printed in his own title that ended in 1990, with his writer in 1 and 2, Wilbur R Webb, really X-artist emeritus Seth. The well-paced artwork of D'Israeli in 1 and 2 is replaced by the downright static, impersonal style of inker Ken Holewczynski, drawing Ian Edginton's scripts in 3-6. Other good features include the saga of Antrax, a semi human "antroid" who really goes through the philosophical mill in 1-6; Durwin S. Talon and John B. Ludwick's stylish Beyond the Fringe in 1-3; the innovative 'Twelve Fingers Hero' by Danijel Zezelj in 4; Mark Pawlik's accomplished clear-line style on his robot strip 'Kit Model 103' in 4 and 5 plus Horus' very slick 'Great Legends of Space and Rock and Roll' in 4-6.~SW

NEW YEAR'S EVIL

DC: *8 One-shots ('Body Doubles', 'Dark Nemesis', 'Darkseid', 'Gog', 'Mr Mxyzptlk', 'Prometheus', 'Rogues', 'Scarecrow') 1998*

A series of one-shots highlighting the villains of the DC Universe. 'Body Doubles' features an enjoyable romp with the 'Thelma and Louise' hot-babe assassins from *Resurrection Man*, and 'Dark Nemesis' is a pedestrian superhero story as the villainous group from *Team Titans* attempts to break out of jail. 'Darkseid' relates how the apparent destruction of the God of Evil has resulted in a civil war on Apokolips, while 'Gog' is a slight departure as Mark Waid and Jerry Ordway relate the origin and refit of a character from *Kingdom Come*, setting up his entrance into contemporary DC titles. Superman's most annoying enemy 'Mr Mxyzptlk' uses the device of a tenth-dimensional monster attacking the imp's fifth-dimensional home as an excuse to rehash some old cheap-shot spoofs of DC comics, whilst 'The Rogues' sees a gang of Flash's old foes ambling through a cheesy rip-off of *The Golden Child*. The last two titles are the cream of the crop, with 'Prometheus' from Grant Morrison and Arnie Jorgensen introducing the newest bad guy to square off against the Justice League, whilst 'Scarecrow' by Pete Milligan and Duncan Fegredo relates an offbeat tale of obsession as the master of terror switches fixations from Batman to the apparently fearless medical student Becky Albright.~WW

Recommended: 'Prometheus', 'Scarecrow'

NEW YORK: YEAR ZERO

Eclipse: *4 issue miniseries 1988*

There are initial allegories to the Vietnam war as soldier Chester Brian, used to surviving on his ingenuity, returns from war on Venus to a hostile New York. It's a place where snipers are common, and the haves spend vast amounts of money to protect themselves from the have-nots. Brian lucks into a job, but it comes with a high danger level. Uniformly poor covers by American artists probably prevented many from seeing the gorgeous and detailed interior art of Juan Zannotto. He enjoys illustrating his military hardware, and brings a real filthy quality to his street scenes. Ricardo Barreiro's script throws in dozens of decent ideas, yet they're mere diversions from a very thin, but action-packed plot. Anyone who enjoys gun-toting action heroes should sample *New York: Year Zero*. There are guns and explosions aplenty, and they're better drawn than most.~FP

NEWMEN

Image/Extreme: *21 issues 1994-1996*
Maximum Press: *2 issues (22-23) 1996-1997*

The alien nu-gene gives some people abilities beyond those of normal humans, and the aliens return from time to time to harvest the latest crop of superpowered beings as slaves. The Newmen are gathered together by the Proctor to repel the aliens when they next visit. Most of the series depends for its dynamism on the conflict within the group as they come to terms with what they are. First appearing in 'Extreme Prejudice', 1-4 were collected, 9-11 are part of the 'Extreme Sacrifice' crossover, and 20's conclusion was part of the 'Babewatch' crossover that was also the prelude to the 'Extreme Destroyer' crossover (see the pattern?). At this point the series went into hiatus while the *New Force* miniseries attempted to generate new interest in the constantly bickering X-Men clones. With 21 Chris Sprouse and Al Gordon brought a fresh, clean look, with several nods to Alex Toth, which augured well but came too late. The team guest-starred in *Judgement Day* , but have not been seen since.~NF

Stephen Sullivan and Tim Truman's NEWSTRALIA

Innovation: *5 issues 1989-1990*

Gun-runner Brin Dingo, his robot No-Nox and the humanoid combat kangaroo Boomer Blue try to aid rebels and make a profit in a future world ruled by the totalitarian science society, The Order. Despite his name on the masthead, Truman is hardly involved and the end result is bitty and unsatisfactory.~WW

NEXT MAN

Comico: *4 issues 1985*
Comic Company A: *1 issue 1993*

A Vietnam soldier preserved after a near-fatal explosion is revived twenty years later, having been genetically altered. Minimalist plotting and artwork. The Comic Company A issue was to have been Comico's fifth issue.~FP

John Byrne's NEXT MEN

Dark Horse: *31 issues (0-30) 1992-1994**

The scene for *Next Men* is set in the one-shot *2112* graphic novel, highlighting the career of one cadet, Thomas Kirkland. His apprenticeship pits him against Sathanas, who leads a large band of mutated human beings, the results of genetic experiments a century previously known as the Next Men Project. It's thought that Sathanas is destroyed at the end, but the reality is that he's journeyed back in time to the present day. That's where *Next Men* takes off, but not before some appearances in *Dark Horse Presents* 54-57, reprinted in the zero issue.

The plot concerns five youngsters with special abilities who were part of an unauthorised superproject funded by Senator Hilltop, with a mysterious ally. The youngsters escape, are separated, then reunited in an organisation run by 'Control', who gives them costumes and codenames – Sprint, Brawn, Bounce, Scanner and Hardbody. 7 has them investigating a group of Russian mutants at the behest of the Russian government. These characters are their counterparts indoctrinated with Communist ideals, and unhappy at the way the country has been developing recently. 13 starts a more character-based story inspecting relationships between the Next Men, specifically sexual tension disrupting the team, while the youngest member, Sprint, wants to learn more about his biological mother, and travels to New York to do so. There he's exploited by the head of a comic company, who sees extensive profits to be had by publishing a comic about a real superhero. The others follow, but their new-found fame leads to complications, most particularly a case of murder relating to their original escape.

From 19 Byrne begins writing four-issue story arcs, numbered as such on the covers, which also continue the regular numbering of the series. The first, 'Faith', sees the team joining an underground community of homeless people, and Mike Mignola contributes pages of Hellboy to 21. More comic characters come to life during 'Power', most pertinently the evil Dr Trogg, but also a guest shot from Concrete, manifestations created by a young woman whose latent powers have recently surfaced. 'Lies' (27-30) reveals that all is not what most believed to be the case. Overall, *Next Men* is a masterful exercise in sub-plots and subterfuge, full of twists and turns. Initial confusion will give way to understanding, as John Byrne is at his best, with excellent writing and great illustration.~HY

NEXUS

Capital: *Series one 3 issues 1981-1982, series two 6 issues 1983-1984**
First: *74 issues (7-80) 1985-1991, 4 issue miniseries ('The Next Nexus') 1989**
Dark Horse: *One-shot ('The Origin') 1992, 4 issue miniseries ('The Liberator') 1992-1993, 3 issue miniseries ('Alien Justice') 1992-1993, 4 issue miniseries ('The Wages of Sin') 1995, One-shot ('Nexus Meets Madman') 1996, 4 issue miniseries ('Executioner's Song') 1996, 3 issue miniseries ('God Con') 1997, 4 issue miniseries ('Nightmare in Blue') 1997*

The first *Nexus* series was a black and white magazine that introduced a mysterious, immensely powerful hero and the planet where he lived, Ylum. Nexus is driven by terrible dreams to kill mass murderers. In telling his new lover, Sundra Peale, the story of his life, Nexus explains that his first execution was that of his father, Theodore Hellpop, who had destroyed a whole planet before escaping with his wife to Ylum, where Horatio was born. Writer Mike Baron swiftly introduces Dave, a Thune alien, groups of political refugees led by Tyrone, and the bodiless heads used to generate fusion energy by evil slavers. Beautifully drawn by Steve Rude, from the very beginning this was an excellent foray into science-fiction territory, albeit with a costumed central character.

The second Capital series was comic-sized, in colour, and introduced Judah Maccabee, The Hammer, who has modelled his life on Nexus and happens to be Dave's son. Briefly relieved of his head by the slaver Clausius, Judah joins the regular cast. Nexus always had a humorous side (though whenever Clonezone the Hilariator started cracking jokes this mysteriously evaporated) and the guest appearance of Badger (6-8) set the tone for the comic adventures of Judah that punctuate the more serious storylines. Tortured by the executions he must undertake, Nexus tries surgery to keep himself awake, but the resultant insomnia nearly destroys him, until he answers the dream calling him to kill the President of the Web (16). He's unprepared for Judah and Sundra's intrusion and the subsequent discovery of the secret behind his powers that causes the dreams in 18 and 19.

Steve Rude needed the occasional guest penciller (including Eric Shanower and Keith Giffen) to keep up a monthly title, but with 27 he took a longer leave of absence, returning for 33. Mike Mignola, José Luis Garcia-Lopez and Rick Veitch all filled in as Baron's plots became more and more convoluted. Judah becomes bodyguard to Cohesive Web (Earth based government) ambassador Ursula, Nexus and Sundra, get back together, but Nexus' hit-list still seems never-ending, provoking all sorts of repercussions, and everyone fears him wherever he turns up because they assume he's out to assassinate someone. Paul Smith draws 37, 38, 43 and 44 to give Rude more time and Badger makes another appearance in 45-50, culminating in the death of a major character. With 51 Smith becomes the regular penciller, Nexus decides to shove his job as avenging angel, and the race for the presidency of Ylum is in full swing. Tyrone emerges as the victor, and the Merk recruits another Nexus, Stanislaus Korivitsky, as Horatio leaves for Flatlandia. This ties into the *Next Nexus* miniseries, in which an old enemy's daughters, with Nexus' powers, try to kill Horatio.

Rude returns (58-60) for the first part of the new Nexus' mission, but after his departure there is a high turnover of artists, which seriously disrupts the quality. In an effort to kick-start things Baron has the new Nexus killing innocents as well as murderers, with the Web blaming Ylum for his murderous sprees. Horatio's old powers are restored in 75, and Hugh Haynes draws the last issues of the regular series from 72, but you miss Rude's smooth, dynamic artwork. His departure seemed to de-motivate Baron too, with the humour all but disappearing from plots that seemed to drag on from issue to issue.

---

* Available in a collected edition

Nexus: 'The Origin' is a retelling of the hero's life by Baron and Rude, in preparation for the title transferring to Dark Horse. When Nexus returned it was in the hands of Stefan Petrucha and John Calimee, and, in 'The Liberator', considers what happens to the masses when someone kills their leader. Baron and Rude return for 'Alien Justice', in which Nexus must travel to the Thune homeworld in search of Dave's wife. Baron and Mike Allred co-write *Nexus Meets Madman*, with art by Rude, and it's a delightful if inconsequential episode that doesn't impinge on either of their ongoing plotlines. 'Executioner's Song' is presented as a miniseries but numbers itself as *Nexus* 89 in the indicia. It begins with the desecration of Horatio's parents' graves as Michana Loomis goes on a rampage, upset by her father's execution at his hands. Succeeding miniseries continue the numbering while presenting each story separately. 'God Con' is quite literally about a convention of divine beings held on Ylum (including Jesus, Mohammed and Buddha) with its attendant religious conflicts. In 'Nightmare in Blue' readers are given a chance to vote for the character that Nexus will execute next, from a list that includes the mother of his children.

Throughout *Nexus*, Baron tried to create a complex universe where Nexus' actions are not only important but where Nexus is part of a society in which freedoms have been hard-won and must be constantly defended. Nexus chooses Ylum as a home precisely because it is in a state of flux, a place where refugees with all sorts of different beliefs gather for refuge. The interplanetary intrigues and personal vendettas that make up most plots keep the level of adventure and excitement high, but the heart is in its rich depiction of misfits and tortured souls, from Horatio himself to Judah and even Ursula. Without Steve Rude, however, Nexus is hard to read. His inspirational artwork lifted the series way above its competitors, and no one else can make the series as resonant as he can.~NF

Recommended: 1-20, 45-50, 'The Next Nexus', 'Nexus Meets Madman', 'Alien Justice', 'Executioner's Song', 'God Con', 'Nightmare in Blue'

NFL SUPERPRO

Marvel: *One-shot 1991, 12 issues 1991-1992*

Let's quote from Marvel's blurb on each title page: "Phil Grayfield's career as a pro football player ended soon after it began due to injuries. Now, as a result of a fantastic accident, he has a new career, as a super-powered hero who uses his amazing abilities to fight crime and defend the sport he loves from those forces that would seek to corrupt it." Not a joke, not a parody, not a hint of tongue wedged in cheek. Redefines the term 'low concept'.~WJ

NICK FURY, AGENT of S.H.I.E.L.D.

Marvel: *Series one 18 issues 1968-1971, series two 47 issues 1989-1993*

Splitting *Strange Tales* into two books gave Jim Steranko the chance to write and draw full-length S.H.I.E.L.D. stories at his psychedelic best. Frankly, his plots rarely made much sense but are vindicated by the sheer style that made 1-3 and 5 seminal comic-book works. They're reprinted as two issues of *Nick Fury Agent of S.H.I.E.L.D. Special Edition*. Sadly the creators who followed attempted to mimic his work, but Steranko is inimitable.

Gary Friedrich wrote most of the succeeding first series issues, yet the run suffers from a lack of continuity: for instance, Countess Valentina and Laura Brown are unaware or unconcerned that Nick Fury dates them in alternate issues. 12-14 are the best efforts but were not enough to stave off cancellation with 15. 16-18 were published a year later as all-reprint issues of the S.H.I.E.L.D. stories in *Strange Tales* 136-144.

Not once in forty-seven issues does the second series strike the right chord. *S.H.I.E.L.D.* distinguishes itself from the staple diet of comic-book superheroes when focused on the espionage/James Bond approach. This run gorges on aliens, resurrected characters, excessively recurring villains and superpowered S.H.I.E.L.D. agents. Bob Harras' first six issues continue in the same questionable vein he initiated in *Nick Fury vs S.H.I.E.L.D.* Relief arrives in the form of D. G. Chichester, who scripts most tales to 31. It is no coincidence that the series' best run, in 20-23, 25 and 26, is accompanied by Jackson Guice on pencils. The story is another Red Skull, Baron Strucker and H.Y.D.R.A. conspiracy, but nevertheless just manages to scale the dizzy heights of mediocrity. The epilogue in 27-29, guest-starring Wolverine, disappoints as Chichester's fight dialogue exerts unreasonable demands on readers' credulity and Ernie Stiner takes over on artwork. A strip less suited to his cartoonish style is hard to imagine. Scott Lobdell's run from 32-37, 40-41 is disastrous, as all pretence of sub-plot, supporting cast and characterisation goes out the window. Gregory Wright handles the swan song (42-47) and achieves something of a resurgence, but he wields his powers of resurrection far too freely.~APS

Recommended: Series one 1-3, 5

NICK FURY vs S.H.I.E.L.D.

Marvel: *6 issue miniseries 1988**

Bookshelf-format series in which Bob Harras pens the second most controversial story in the annals of *S.H.I.E.L.D.* (see *Marvel Spotlight* 31 for the first). Half the S.H.I.E.L.D. regulars die before 1 starts, as Nick Fury discovers corruption and subterfuge within the organisation in a highly promising first two issues. But Harras loses everyone with a rationale so questionable that even Marvel decided it was necessary to 'correct' portions of the story in the second regular series and the 1994 *Fury* one-shot. Internally shattered, S.H.I.E.L.D. is disbanded at series' end and not revived until *Nick Fury, Agent of S.H.I.E.L.D.* (second series) a year later. Paul Neary's polished pencils take no part of the blame.~APS

The NIGHT

Amaze Ink: *One-shot (0) 1995*

Dan Vado and Norman Felchle contrived a title combining two then popular elements. There's the starkly contrasting shadowy black and white style artwork as used by Frank Miller in *Sin City*, and the impossibly proportioned hero with even more impossibly proportioned guns. Even better, there's a good story with a nod to the Ditko heroes of yesteryear.~FP

NIGHT FORCE

DC: *Series one 14 issues 1982-1983, series two 12 issues 1996-1997*

The mysterious Baron Winters never seems to leave his spooky old Washington townhouse with its back garden leading into history, and draws to himself people who will be able to help him deal with occult problems whether they like it or not. Marv Wolfman kicked off the series with a long story about Vanessa Van Helsing, granddaughter of the vampire-slayer, who acts as a psychic conduit and is therefore in great demand with various nefarious organisations. Unfortunately the normal world thinks she's mad. To rescue and cure her The Baron recruits Jack Gold, a washed-up journalist whose promising career was cut short by alcoholism, and Donovan Caine, a professor of parapsychology. In later stories he uses a serial killer to destroy a strange monster that's imprisoned the inhabitants of an apartment building by taking away their will to resist, and a cannibal on death row to defeat a murderous dream entity. He also has to call upon an old lover to rescue Vanessa when he sends her on a mission to exorcise the ghosts of Nazi plotters from an old house without seeing it's a trap. The second series begins with a sect of time-travelling occultists possessing young children, who start killing adults. It provides an ongoing villain for the Baron while he tries to avoid becoming the Thirteenth Man, a vessel for all the souls unclaimed by Heaven or Hell for all eternity.

Wolfman's scripts are very strong in the first series. His characters are by no means perfect - especially the Baron, a fascinating occultist always two steps ahead of the police, who consider him a charlatan. He lies and manipulates freely, and is willing to send his "force" to their deaths if necessary. The

second series suffers from ill-paced stories, which seem like sketches for longer series, with too much jammed into the pages and jumping from one incident to the next. The ending to the second series, the weakest "let's leave room for another revival" bit of plotting since *Lost In Space*, is a particular let-down. Gene Colan atmospherically illustrated the first series, using a very light inking technique and relying on colour to bring to life the monstrous acts depicted, and suggesting rather than showing most of the violence. The second starts with Brent Anderson in good form for a couple of issues and goes through a series of McKeever clones, most notably Shawn Martinbrough and Jake Love on issues 5-7. The art is a little more visceral but generally restrained enough to remain scary.~FJ
Recommended: series one 11-14

The NIGHT MAN

Malibu: *23 issues, 1 Annual 1993-1995, 4 issue miniseries 1995-1996*

Created in the same accident that created the Strangers, the Night Man's abilities took a little longer to develop, largely because he spent months in a coma. When he recovers, Johnny Domino finds that his eyes are extremely light-sensitive, and that he can tune in to the evil thoughts of those nearby. Given that he's not got much else in the way of abilities to start with, his one-man war against criminals has interesting and not always favourable repercussions. The ever-changing artists are distracting, although no-one terrible works on the title, but overall *The Night Man* is a decent if inessential superhero title. The miniseries, involving parallel dimensions and assorted mystical mumbo-jumbo, is plain dreadful.~WJ

NIGHT MUSIC

Eclipse: *3 issues 1984*

A collection of rare and early works by P. Craig Russell, whose detailed, highly illustrative style is at once realistic and fantastic. The first issue includes a science-fiction tale from 1979 and adaptations of songs by Mahler, the second has two stories about dreaming and 'Dance on a Razor's Edge', about the dreams and death of Yukio Mishima. 3 is an adaptation of Rudyard Kipling's *Jungle Book* story, 'The King's Ankus'. Though these are immature works they are not without interest and are still beautifully illustrated.~NF
Recommended: 3

NIGHT NURSE

Marvel: *4 issues 1972-1973*

This series, by Jean Thomas and artist Win Mortimer, tells the story of three young nurses. There's a plucky black girl working her way out of the ghetto (oy vey!), a spoiled débutante slumming in the working world, and a nice middle-class blonde girlie. They face the hazards of everyday life on the wards: stopping terrorists from taking over the operating theatres, being summoned to take care of elderly recluses in spooky Gothic mansions, being propositioned by hunky visiting millionaire playboys... yeah, right, that happens all the time! In the category of "So bad it's a must-have item"this series, thanks to initially limited print runs and the fact that most readers destroyed it in disgust, is now achieving some desirability as a kitsch collectors' item.~HS

NIGHT STREETS

Arrow: *5 issues 1986-1987**
Caliber: *2 volumes 1987-1988*

A well conceived and produced story about criminal life in an un-named city. It's a place protected by the Black Dahlia, a vigilante in fishnets, and has a protection racket run by a six-foot tall talking cat with a feral nature. Trouble starts when another organisation attempts to assume the role of Katt and Associates. The high story content prevents excess talking heads becoming boring and more than compensates for the shortcomings of the art, although Mark Bloodworth improves throughout. Unjustly neglected, this puts many more professional titles to shame. Caliber published two collections, and you'll need to buy the second for the conclusion.~FP
Recommended: 1-4, Book 2

The NIGHT TERRORS

Chanting Monks Studios: *1 issue 2000*

Bernie Wrightson's 'Spuds' and William Stout's 'Go Fish' are the main attractions in this horror anthology. The former's pencil-only story starts well, but lacks a decent finish, while the latter's funny, clever and creepy, if short. Publisher, Joseph M. Monks writes the final two tales but both rely so much on hiding what's really happening, through ambiguity or omission, that the conclusions seem corny rather than horrific. A promised second issue never appeared.~NF

NIGHT THRASHER

Marvel: *4 issue miniseries ('Four Control') 1992-1993, 21 issues 1993-1995*

The queue for the most ridiculous name ever bestowed on a comics character starts with Dwayne Taylor, intense poor-little-rich-boy armoured teenager who founded the New Warriors. The miniseries is a successful mix of corporate mystery and superhero action as Taylor searches for the person behind a takeover attempt on his family foundation. 1-14 of the ongoing title are bereft of any spark, with the well-intentioned but miserably executed polemic about racial division in 6 typical. Kurt Busiek becomes writer with 15, and improves the title, applying practical solutions to villainy using Taylor's wealth. The final two issues are the best of the series, with Night Thrasher at odds with his charge Rage, a 14-year-old built like the Hulk, unhappy with his lot and reacting the only way he can.~FP

NIGHT TRIBES

WildStorm: *One-shot 1999*

Dull horror nonsense as two former *Wetworks* characters find new team-mates and repel the hordes of hell. For once quality told, and Night Tribes haven't been seen since.~WJ

NIGHT WARRIORS: Darkstalkers Revenge

Viz: *6 issue miniseries 1998-1999*

Based on the computer game from Capcom, this tells the bewildering saga of a bunch of supernatural creatures that use any excuse to fight each other. Well rendered, but ultimately impenetrable.~WW

NIGHT ZERO

Fleetway/Quality: *4 issue miniseries 1989*

By the time they reached this old tosh Fleetway/Quality had dredged right through the bottom of the barrel and into the compost beneath as far as *2000AD* material was concerned. With a he-man hero and dealing with the problems of succession in the dystopian Zero City, there's a total lack of inspiration, and, violence apart, it both reads and looks as if it had been produced in the 1950s. It's distressing to consider how many trees died so that this pap could see print on two separate occasions.~WJ

Clive Barker's NIGHTBREED

Marvel/Epic: *25 issues 1990-1992*

Charged by an otherworldly entity with locating a homeland for monsters on Earth, the Nightbreed travel the remote back streets of North America searching for sanctuary, often encountering other Nightbreed who aren't prepared to follow the leader. 1-4 adapt the *Nightbreed* film, which was Barker on autopilot, and those are the best issues. A contender for Most Ridiculous Character Seen In Comics is the guy who rips out his spine to use it as a lasso in 7. Wouldn't a rope be easier? Gratuitously gory, with an almost child-like desire to shock, there's little to be recommended beyond the violence. A two-part series *Jihad* pits the *Nightbreed* cast against the Cenobites from *Hellraiser*, and is better than any regular issue, with excellent art from Paul Johnson.~WJ

NIGHTCAT

Marvel: *One-shot 1991*

This one-shot was the result of a deal struck by Marvel with one Jacqueline Tavares, a singer who thought that dressing up as a superhero would enhance her career. Oops. Using her likeness, but presumably not her actual biography, the Mighty

Marvel Monolith created a comic only Helen Keller could love, exhuming every cliché in comics to generate another feline femme fatale in a Marvel Universe already overstocked with same. The real life Ms. Tavares allegedly sued Marvel for failure to deliver the further adventures of Nightcat, as stipulated in her contract. She should have sued them for ending her career by putting her in this piece of tat in the first place.~HS

NIGHTCRAWLER

Marvel: *4 issue miniseries 1986, 4 issue miniseries 2001*

The first miniseries is written and drawn by Dave Cockrum, who has the teleporting X-Man sucked into the Well at the Center of Time, first seen in the Nightcrawler solo tale in *Bizarre Adventures* 27. The subsequent adventure owes a huge debt to Cockrum's love of the swashbuckling Barsoom yarns of Edgar Rice Burroughs, full of lusty, sword wielding maidens, pirates and floating citadels, where Nightcrawler is mistaken for an annoying Elf-thing called a Boggie. Enthusiastic, predictable and in the final analysis, very silly.

What a difference fifteen years makes, as the second bite of the cherry examines the inner strength and faith of Nightcrawler. Now a Catholic priest-in-training, he becomes embroiled with a Russian Mafia ring who smuggle and trade in economic migrants, enslaving the men and prostituting the women. Universe-saving tactics and exotic superpowers prove of little use in the sordid and uncomfortably real world powerfully depicted by writer Chris Kipiniak and artists Matthew Smith and Mark Morales. A very readable change of pace.~WW

NIGHTCRY

Creative Force Designs: *6 issues 1994-1996*

Horror anthology from Joseph M. Monks combining lacklustre short slasher fiction from newcomers with translations of remarkably tame mystery tales from Mike Deodato Jr's early days in the Brazilian comic industry. Dull and unsatisfactory.~WW

NIGHTFALL: The Black Chronicles

Homage: *3 issue miniseries 1999*

Nightfall is a secret police force set up by the Vatican to monitor demons. The comic has an attractive noir-ish feel that well outshines the actual story, which is clichéd and populated by characters that feel like they've come straight off the rack.~DB

NIGHTHAWK

Marvel: *3 issue miniseries 1998*

Millionaire playboy Kyle Richmond drinks a potion to prevent a heart condition ending his life. An unexpected side effect increases his strength and stamina at night. He initially becomes an amoral version of Batman, fighting crime for kicks before joining The Defenders and learning about actions and consequences. In this story he seems to die only to be returned to the land of the living with the impossible power to see crimes before they happen. He tangles with Daredevil and apparently kills him, followed by a hellish sequence in 2 and 3 where Kyle, weighed down by Daredevil's corpse, realises he's being manipulated. The artwork by Richard Case is clear and good at the surreal side of hell if not the horror. Jim Krueger's writing is competent enough but his plot just doesn't deliver.~SW

NIGHTMARE

Skywald: *23 issues, 1 Annual, 1 Special, 1 Yearbook 1971-1975*

The success of Warren's black and white horror line spawned many imitators, and *Nightmare* was Skywald's first attempt to cash in on the trend. The company name was derived from the surnames of its two publishers, Sol Brodsky and Israel Waldman, and it was the latter's past that set the tone for *Nightmare*'s early issues. Waldman's I.W. line issued a vast range of reprinted material from liquidated publishers, and this same pool of material filled 1-2, along with lacklustre art from the likes of Ross Andru and Syd Shores. It was occasional work by the likes of Ralph Reese, with two superbly drawn strips in 4 and 5, Doug Wildey (5, 6) and Mike Kaluta (6) that enlivened the otherwise moribund 1-6, only otherwise notable for their high gore quotient. 7 saw a significant shift in direction with an influx of Spanish and South American artists such as Ramon Torrents (7, 9) and Francisco Cueto (7, 13, 15), and the hitherto largely unknown Al Hewetson became principal writer, becoming editor with 9. He infused Nightmare with his quirky personality, which was not always a good thing, but at least it made the title distinctive. Writers (and readers) began to appear in stories, there was a big increase in bizarrely laid out editorial pages, and the art became more frenetic, with panel borders all over the place or banished, and art bleeding off the page. In many ways it anticipated 1990s comics. From 10 on artists like Ricardo Villamonte and Pablo Marcos dominated, although there are others of particular note. They include the excellent Ferran Sostres (7, 8, 12, 22) Collado (a beautiful strip in 20), Suso (14, 17) and the young John Byrne, also in 20. The later years were dominated by increasingly peculiar series, the strangest of which was the Shoggoth serial. It actually starred Hewetson and whoever was drawing the strip that issue battling horrible beasts bent on taking over the world! Readers were encouraged to remain vigilant and join the battle, but not enough did and *Nightmare* was cancelled. In addition to the regular magazine there were the 1972 annual and the 1973 winter special containing new stories, while the 1974 yearbook contained mostly well chosen reprints. Confusingly 21 was cover billed as a 1974 summer special and 23 was the 1975 winter special. Both featured old material.~DAR

Alex Niño's NIGHTMARE

Innovation: *1 issue 1989*

Of all the comics that take five minutes to read, this is at least the strangest. Psychologist Peter Alex Nemo (!) flies through a patient's nightmares dressed in superhero costume (as you do) and rescues her. This is very much Jack Kirby's *Sandman* territory, with the massive proviso that, since Alex Niño drew this, we are dealing with some genuinely visionary artwork. Future issues were planned, though quite where he could have taken the strip is hard to see. However, for fans of Niño this sole issue will certainly hit the spot.~DAR

NIGHTMARE

Marvel: *4 issue miniseries 1994-1995*

Edvard is the monarch of the Realm of Nightmare, and, as a long-time foe of Doctor Strange, feeds off human terrors. However, when he falls in love with Roxanne, star of countless horror films, he leaves his realm in order to be with her, and this causes disturbance in many quarters. The parts involving Roxanne work very well, as she emerges from her initial romantic daze and realises Edvard is less than pleasant, probably not human, and not at all good for her. The greater part of the story, though, concerns an attempted coup in the Realm and Edvard's plans to establish a base of operations on Earth. The action really doesn't make much sense, but the artwork by Joe Bennett and Mike Witherby meets the needs of the story well: plenty of Gothic extravagance and a truly frightening Edvard. It's above average, but the plotting weaknesses make for a frustrating read when it's clear that Ann Nocenti can do so much better.~FC

NIGHTMARE THEATER

Chaos!: *4 issue miniseries 1997*

Very much in the tradition of the EC horror anthologies, this is hosted by Mr Mischief and Psychotica whose own story is told during the prologue and epilogue of each issue (by Brian Pulido and Fauve). There are some noteworthy stories here, but overall there's nothing new or particularly frightening about any of them. Of interest: 'One Perfect Night' in 1 is drawn by Berni Wrightson (who also provides covers for all four issues); Flint Henry draws 'The Ballad of the Eyeball Dragster', written by David Quinn (1) and 'A Life in the Cinema' (2); 'The Monster Hunters Club' in 1 is drawn by Rick Veitch; 'Itchy Peterson: Born Lucky I Guess' is by Alan Moore and Val Semeiks (4); and 'Cut! Cut! Cut!' is by Robert Loren Fleming and Mike Hoffman (2).~NF

NIGHTMARES & Fairy Tales

Slave Labor: *3 issues + 2002 to date*

A series of horror stories, narrated by a doll, Annabelle, about her different owners. In the first (1-2), Dominique, who claims to be a vampire, demands a decision from her friend, Morgan. Scared, however, Morgan tries to avoid Dominique, until her friends start to die. In 3, a haunted nunnery consumes Dominique's newborn child. These are disturbing, and evocative gothic tales from Serena Valentino, with expressive artwork from Foo Swee Chin (hints of manga and Aubrey Beardsley) – very promising.~NF

NIGHTMARES ON ELM STREET

Innovation: *6 issues 1991-1992*

New stories for those who can't get enough of Freddy Krueger and his bloody habits. Successfully conveys the remorselessly nasty spirit of the films, but much better is the three-part *A Nightmare on Elm Street: the Beginning*, in which Freddy's early days are recounted.~WJ

NIGHTMASK

Marvel: *12 issues 1986-1987*

Using a character who lives and operates in dreams there's always the option of ethereal left-field encounters and shaded revelations, and so it is here. Directionless from the off, when the Haitian in the supporting cast suddenly becomes involved in voodoo you know the barrel is being scraped. The only surprise is why the editors let this pelt headlong into mediocrity so swiftly.~FP

NIGHT'S CHILDREN

FantaCo: *4 issue miniseries 1991, one-shot ('Foreplay') 1991, one-shot ('Double Indemnity') 1992, 4 issue miniseries ('Vampyr!') 1992-1993*

Millennium: *One-shot ('Origins') 1993, 2 issue microseries ('The Vampire') 1994, one-shot ('Liaisons') 1994, 2 issue microseries ('Red Trails West') 1994-1995, 2 issue microseries ('Ripper') 1994-1995*

In the first miniseries, Billy is picked up off the street by vampires, Klaus and Julia, and initiated into their lifestyle. Klaus is considered dangerous by other vampires, however, and his control over Billy (and Julia) is challenged when Billy falls for Samantha. 'Double Indemnity' is two separate strips about Klaus and Julia's romance and Billy's attempts to help a friend through drug withdrawal. 'Vampyr!' is Klaus' origin, set in Transylvania in 1458, enslaved by the Turkish, Fatima. Short stories in the Millennium series are a prelude to the ambitious 'Ripper', which sees Klaus in London during the murders of Jack the Ripper, who appears to be targeting the members of Klaus' former brothel. Wendy Snow-Lang's themes are based on the search for self and love, even amongst vampires. Stylistically, there's a lot of talking and she uses a lot of head-shots and close-ups, in a stiff, painterly fashion.~NF

NIGHTSIDE

Marvel: *4 issue miniseries 2001-2002*

Sydney Taine and Ape Largo are private detectives specialising in cases involving, and usually on behalf of, supernatural beings. They call the world of werewolves, vampires, wizards and witches the Nightside. The premiere story arc has them searching for mystic artifacts stolen from Japanese temples as a Yakuza invasion threatens to destabilise the uneasy pact that allows the Nightsiders to co-exist with the ordinary humans of the Dayside world. Hackneyed rubbish as Marvel tries to belatedly cash in on the success of *Buffy the Vampire Slayer*.~WW

NIGHTSTALKERS

Marvel: *18 issues 1992-1994*

On the face of it, teaming three of *Tomb of Dracula*'s supporting cast as hunters of the supernatural wasn't the brightest idea for a series, but it works. Frank Drake is Dracula's descendant, Hannibal King is a vampire who resists his craving for human blood and Blade is a single-minded vampire hunter. Given to fighting among themselves as much as with supernatural menaces, this is the best of the Midnight Sons titles, largely due to writer D.G. Chichester's gruesome imagination and facility for dialogue over the first eleven issues. 14 and 15 are Siege of Darkness chapters and 16-18 returns more characters familiar to *Tomb of Dracula* readers, and ends the series in style.~FP

NIGHTVEIL

AC: *7 issues 1984-1985, 1 Special 1988*

The sorceress member of Femforce stars in solo adventures, meant to be trippy and supernatural, but mostly lame and clichéd. The special had a rather nice Mike Kaluta cover. Two spin-off issues of *Nightveil's Cauldron of Horror* appeared in 1989 and 1990, black and white 1950's horror reprints with our heroine appearing in a framing sequence.~HS

NIGHTVISION

Tundra: *One-shot 1993*
Rebel: *4 issue miniseries 1993*
London Night: *One-shot 1996*

The night vision is Blythe's ability to instantly recognise other vampires. Alluring and deadly, she's on a quest to deal with them all. David Quinn's distinctive narrative is at times poetic, but more often tiresome, and occasionally wanders up his arse in a succession of hollow soundbites like "Fetish freaks in the Hollywood babe machine". The art is standard seductive babes for boys too young to buy a proper sex mag.~WJ

NIGHTWATCH

Marvel: *12 issues 1994-1995*

Pity poor Kevin Trench, Nightwatch. Designed as a blatant copy of Spawn, he encounters a succession of ridiculously named villains, while his supporting cast becomes ever more ill-proportioned. The short run indicates that Spawn readers obviously didn't fall for the con. After his title was cancelled it's likely that Nightwatch went into demolition, as he averaged the destruction of one building per issue.~WJ

NIGHTWING

DC: *4 issue miniseries 1995*, 74 issues +, 1 Annual, 1 80pg Giant, 1 Secret Files 1996 to date, 4 issue miniseries ('Nightwing and Huntress') 1998, one-shot ('Our Worlds at War') 2001, one-shot ('The Target') 2001*

The miniseries begins with one-time Robin Dick Grayson's resignation from the superhero business, but on receipt of a letter with information about his parents' murderer, he puts on a new costume and heads off to Kravia. Here his family, the Flying Graysons, had apparently seen something they shouldn't have during a circus tour. Written by Denny O'Neil, it's about tidying up the past and clearing the way for a new life. Initially, it reads poorly, but it does its job without fanfare.

In his own series after many years, during which a very devoted fan base had built up, Dick Grayson moves into Blüdhaven, a place in need of a superhero. It's had a corrupt government for a long time and is now home to Black Mask's large criminal organisation. Initially, Nightwing tries to work with the police force, but finds corruption endemic, and police in league with the crime boss, Roland Desmond, also known as Blockbuster. A former policeman and Blockbuster are the background villains for most of the series, occasionally coming into the spotlight as necessary. The policeman gains a new identity as Torque after his head is twisted through one-hundred-and-eightydegrees (9-11), while Blockbuster's search for a replacement heart leads to a crossover with *Birds of Prey* (45-46). There's also a wannabe hero calling himself Nitewing, who is successively beaten up, trained by Nightwing, jailed for his vigilantism and take under Torque's wing.

Apart from the villains, much of the series is about Dick Grayson's decision to live away from Gotham, with a new home and friends, as well as a new career. He works in a bar to be close to the police and then joins the police force (31) to fight the corruption from within. Romantically, his landlady and then Huntress (26-29 and 'Nightwing and Huntress') are options before he starts to spend more time with Barbara Gordon (Oracle), particularly from 58.

After a few early appearances (6, 13-15, 25), Robin and Batman have not visited much, (though Superman turns up in 30), and the separate identity has been emphasised by the relatively few crossovers with Batman stories. There have been some, though, crossovers, with Cataclysm (19-20), No Man's Land (35-39), Officer Down (53), Last Laugh (62) and the Bruce Wayne: Murderer storyline (65-69). 1-70 are written by Chuck Dixon (except 53), who's made a valiant attempt to create a distinctive role and milieu for Nightwing. His successor Devin Grayson was known as a fan of the character, but it's too early to tell what she may change. Her first storyline (71-73) has Nightwing protecting the wife of the corrupt police chief, taking him out of Blüdhaven on a comedy chase around Europe. Artistically, the series has suffered from several artists more inclined to distortion and design than to conveying narrative effectively, including Scott McDaniel (1-40) and Trevor McCarthy (60-68). Greg Land's artwork is prettier and more effective (41-46*, 48-52, 54-56), while new regular penciller, Rick Leonardi (from 71, after fill-ins on 57 and 59) is perfectly competent without being showy. Issue to 39 have been collected.

The only annual was an unconvincing tale from Grayson and Land of Nightwing marrying a woman he's trying to protect. The 'Nightwing and Huntress' miniseries is by the same team, but more interesting visually because of the inks by Bill Sienkiewicz. The two heroes team up to protect a mob informer and share a little romance along the way, despite having differing views on vigilantism. Nightwing and Oracle spend a dull issue being chased through various time periods in 'Our Worlds At War', before Dick Grayson is framed for a murder and has to become The Target to clear himself, in the one-shot of the same name.~NF

The NIMROD

Fantagraphics: *7 issues + 1998 to date*

Lewis Trondheim's autobiographical 'Approximativement' is stylistically somewhere between *American Splendor* and *Maus*, but it's much funnier than either of them. This first issue contains part one in which Trondheim-as-bird agonises over changes to his strip 'La Mouche' (The Fly) requested by a Japanese publisher. With daydream sequences, lunch with an agent and numerous anecdotes, this is a clever and knowing portrait of 'real' life. Most issues contain several shorter strips, many wordless, as in the story about a visitor who finds himself progressively wrecking the room in which he's been asked to wait (1) and 'Diablotus', which is actually the major strip in 2. Kaput & Zösky are spacemen who shoot first and ask questions later in 3, while 4 contains 'The Stroll' a McConey strip about a walk in the countryside. 'Genesis Apocalypso' in 5 is a stunning (and funny) history of mankind (explaining religion and philosophy) while 6 and 7 return to 'Approximativement'. Fantagraphics publishing Trondheim was considered something of a coup, but disappointing sales almost led to cancellation after the second issue. The title (meaningless other than as an anagram of 'Trondheim'), struggles on with one or two issues a year, but is always worth the wait.~NF

Recommended: 1-7

NINA'S ALL-TIME GREATEST...

Dark Horse: *One-shot 1992, one-shot 1994*

Nina Paley's underground style strips have 'self-publishing' written all over them. This isn't a personal mini-comic, however, and no matter how much these strips resemble the comix of the mid-1970s, there's no bite whatsoever. In fact, despite their charm and high degree of craft, their observations on cartooning and sexual politics are crass and somewhat asinine.~SW

NINE OF ONE A Window to the World

Immedium: *1 issue + 2002 to date*

Oliver Chin illustrates badly-spelled text about a group of Californian highschool kids' reactions to the September 11th terrorist attacks in the US, and their history teacher's project sending them to interview older people about their reactions and 'take' on the events. The first two "reports" fill the back of the comic and their earnestness and predictability suggest this is aimed at other children, although there's no other indication of this. The drawings are crude in a catalogue art kind of way and often look traced. All in all, heart in the right place, historical value minute.~FJ

9-11

Alternative: *1 volume ('Emergency Relief') 2002*
Dark Horse: *1 volume ('Artists Respond') 2002*
DC: *1 volume ('September 11th 2001') 2002*

The comics community responded to the planes crashing into the World Trade Centre with three anthologies, each running over two hundred pages, issued to raise funds for assorted relief charities and families of the bereaved. As with all such projects, they're very much the mixed bag, with goodwill and enthusiasm transcending content. A few highlights from each book: P. Craig Russell's poetic piece opening the Dark Horse volume, and Alan Moore's voice of reason closing it, and also Bill Stout's oddly moving 'Shoes'. Jim Harrison has an interesting viewpoint in the Alternative book, which has a good gag from Peter Kuper, an effective Will Eisner political cartoon and Jon Hastings' justification for working on. There are good Astro City and Hellblazer stories in the DC volume, also featuring Michael Moorcock's memories of London's World War II blitz. A topic common to all three volumes, but particularly apparent in the Alternative Comics one, is autobiographical contributions conveying the shock and concern felt by the creator on following events. This is largely a shared experience, with few offering unique insights, and the repetition dulls the impact. More interesting are stories of people affected personally by the fallout such as Mike Manley (Alternative) and Jim Mahfood (Dark Horse). It might have been unwise to involve superheroes as in the DC volume, but Dan Jurgens and Alan Davis, and Dwayne McDuffie and Denys Cowan do so with subtlety, the latter pair also looking beyond the tragedy for possible reasons in their Static story. Surprisingly very few creators question what might have prompted the deed, so well done Tom Hart (Alternative) and Bob Harris (Dark Horse), and Brian Pulido writes a moving testimonial to a corollary victim. Of course, criticism has no relevance here. These are three volumes of at the very least professional stories and illustrations. If you've not done so already, dip your hand in your pocket and buy at least one of them.~FP

NINE PANEL GRID-1996

James Pyman: *7 issues 1994-1997*

The title is the format for every page in this self-published comic. Each issue contains a chapter of the meandering ongoing 'Greetings From Asbury Park', the story of a couple taking a trip to Asbury Park and hanging out there. He's English, she's American and it's all very dull. It's combined with individual short observation and mood pieces in which Pyman wanders the streets of London, or details a night in the pub as seen through the eyes of a drinker. As much as anything *Nine Panel Grid* appears to be a form of storytelling discipline for Pyman, whose art progresses from issue to issue, although perhaps not as much as he might like. For someone basing his stories in the everyday world, his stiff and often incorrect figurework doesn't yet match his ambition and requires more attention.~FP

NINE VOLT

Image/Top Cow: *4 issue miniseries 1997*

When Ragnar's own race is destroyed, he travels to Earth to help defend it from the Tritons, who have already begun their invasion. Teamed with a government agent, Frank Holden and an android, Digit, the first battle comes when religious zealots, convinced the Tritons are angels, occupy the laboratory where the remains of human vivisections are housed. The miniseries really only sets the scene for the battle against the Tritons, hinting for instance at the identity of the human mind now occupying Digit. Written by Cliff Son and drawn by Anthony Chun (with lots of inkers) there isn't enough explanation to make this a completely satisfying read but there's something to be enjoyed in the mystery of Digit and her aggressive personality.~NF

1963

Image: *6 issue miniseries 1993*

It's a matter of record that having written the groundbreaking *Watchmen,* Alan Moore came to despair of the grim and downbeat superhero comics it spawned. Here he takes the opposite tack, by pretending it's 1963 (right down to fake ads and editorial pages), to produce a pastiche of early Marvel comics in all their enjoyable simplicity. What elevates this beyond affectionate parody is that while aping the early Marvel style – artists Steve Bissette, Chester Brown, Dave Gibbons, John Totleben, Jim Valentino and Rick Veitch obviously have a fine old time imitating Jack Kirby and Steve Ditko – Moore brings his own plots and characters to the party. Each issue spotlights different characters, maintaining that they're issues of an ongoing run, complete with footnotes referring back to hilariously titled non-existent comics and Marvel-style letters pages. The issues can easily be read individually, but chronologically they're titled *Mystery Incorporated, No-One Escapes the Fury, Tales of the Uncanny, Tales from Beyond, Horus Lord of Light* and *The Tomorrow Syndicate.* The best stories are those with but a superficial similarity to Marvel characters, such as the gloriously beat Tibetan-trained mystic Johnny Beyond in *Tales from Beyond.* The clash of 1960s beatspeak with New Age waffle from the 1990s provides both the funniest moments and the best story. The ongoing plot running through all issues was leading towards a giant-sized issue contrasting the 1963 heroes with the 1993 Image counterparts, to be drawn by Jim Lee. Sadly, the lazy bugger never got around to it.~WJ

1984/1994

Warren: *29 issues 1978-1983*

This magazine-format title bills itself as "illustrated adult fantasy", which here translates as "porn with a science-fiction theme" or "Hey! If I set this in the future or another planet, I can cram in any amount of rape, torture, bestiality, cannibalism and compliant robot women, and claim it's daring and progressive fantasy." This really is a foul series, reeking with hatred and resentment for women and sex – and apparently convinced that these attitudes are normal and universal. Let's take 'Little Beaver' in 26 as an example. A group of men take a pubescent girl, place a bomb inside her vagina, and send her to the enemy in the expectation that she will be raped by the commanding officer, thus triggering the bomb. And the style of the artwork (and previous 'Little Beaver' stories) leave you in no doubt that this is intended to titillate, which is deeply frightening. Presumably there are men who can read this comic without feeling ashamed to be male, but one wouldn't care to meet them. Admittedly, not all of the comic is that extreme, and many stories aren't porn at all, though they're all weak and poorly told. In the whole series, there's only one story genuinely worth reading, 'The Missionary' by Carlos Gimenez in 15, which makes a good point about the fixation on pain and suffering in certain aspects of Christianity. Are there other reasons for opening any of these issues? Well, if you must, there's artwork by Alex Niño (every issue), Richard Corben (1-8) and Frank Thorne (7-29). And let's not forget Peter Hsu, whose 'Ariel Hart' stories (22, 26) are easily the most explicit in the series, and whose frankness deserves some kind of recognition – it's not every artist who would want the world to know that he's a graduate of the Barbie Doll School of Anatomy, and has only the vaguest idea of how the female pelvic area is put together. The title is updated to *1994* with 11, but avoid.~FC

NINJA

Eternity: *11 issues 1986-1988*

You've got to hand it to Ninja's main 'creative' team, writer C. J. Henderson and penciller Kevin Farrell – they do maintain a consistent standard of shiteness throughout every issue of this wretched waste of trees. The main 'story arc', about a female Ninja who works for the Red Dog Tactical Squadron, a covert branch of the US Army, remains politically naïve and drearily formulaic from first issue to last; the artwork never ever shows any sign of becoming even vaguely competent. There's not a single reason why anybody in his or her right mind would want to collect this one – Search and Destroy!~AL

NINJA BOY

WildStorm: *6 issues 2001-2002*

Action heavy coming-of-age tale set in a fantasy feudal Japan following the career of Nakio, a young Ninja-in-Training. He's fine with all the running, kicking, jumping, magic-seeming tricks stuff, he just can't get his head around the killing people thing, silently or otherwise. It's predictable stuff, full of ghosts and magic and talking animals, and the modern eternal verities are well represented: friends and the lack of same, the hells of school, and of course vengeance and responsibility. Naka's personal arch enemy is the tyrant Amatsu Mikaboshi, killer of Nakio's brothers and someone the young Ninja should have killed but couldn't.~WW

NINJA ELITE

Adventure: *7 issues 1987-1988*

Spinning off from *The Adventurers,* and cashing in on the then current ninja phenomenon, this details the exploits of Night Wind from age ten to her becoming an agent of the Amita K'un warrior society, all set prior to her joining The Adventurers. Although well illustrated by James Fletcher, Gabriel Morrisette and Frank Reyes, it's pretty pedestrian stuff.~WW

NINJA HIGH SCHOOL

Antarctic: *4 issue miniseries 1987**

Eternity: *Series one 36 issues (5-39*, 3½, 1 Annual 1988-1993, series two ('In Color') 13 issues 1992-1993*

Antarctic: *64 issues + (0, 40-102), 2 Specials, 10 Swimsuit Specials, 14 Yearbooks, 1994 to date, 12 issue limited series (V.2) 1999-2000, one-shot (Brenner Printing Presents…) 1993, one-shot (…Talks About Sexually Transmitted Diseases) 1993*

Ben Dunn's long running parody series features a manga style and industry in-joke repertoire based on the eternal triangle, albeit with a modern slapstick twist. Jeremy Feeple is a nerdy teen at the ever-so-surreal Quagmire High School. The beautiful and deadly Ninja Princess Ichi Kun (Aka Itchy Koo) has been ordered by her grandfather Ichinohei to marry if she wishes to inherit the leadership of his Ninja Clan. Superpowered alien princess Asrial must marry an average Earthling – and there's no one on the planet more average than Jeremy – in the name of securing allies to ensure galactic peace and stability. The first Antarctic issues relate the trio's first meeting and the huge, destructive and inconclusive duel the two girls fight over the bewildered nerd. Matters are further complicated by the machinations of Rivalsan Lendo, head of the rival Ninja Corporation, who wants to marry Itchy Koo to secure his powerbase, and Jeremy's own mother who is revealed to be a deadly Ninja Warrior in her own right. Jeremy, understandably, is like a bunny in headlights through all this, helpless and hapless. Whatever the outcome, he'll have no say. Many of the wacky supporting cast, such as Jeremy's missing father Bob (the world's greatest ratcatcher), or science teacher Professor Steamhead, originally appeared in Antarctic's first publication, *Extremely Silly Comics* and that's probably the fairest description of Jeremy's life. It's even a good way to define the title's publishing history.

Originally planned as a three part miniseries, runaway success prompted Antarctic to pump out another issue, and a compilation volume containing a new story set the day after the duel, reprinted by Eternity as 3½. The demands of a successful series seemed beyond the small, fledgling company and they promptly licensed the title to Eternity who republished the issues with substantial art revisions from the perfectionist Dunn. 5 is the first new issue, and although sometime story collaborator James Hanrahan tones down the humour in places, the irrepressible nature of the series soon escapes again. Taking a lead from practically everything they've ever read, and piling on the plot-twists in the manner of a cheap soap opera, Dunn and Hanrahan go into a creative frenzy. In short order we meet time-travelling witches, a cross-dressing delivery "boy", intelligent dog super-warriors, three space twerps who will eventually become the Zetramen (in the first of many spin-off miniseries) and a bizarre back-story wherein Jeremy's Ninja problems all began as part of a mysterious debt of Giri that Ichinohei owes the departed Bob Feeple. 11 is notable as Dunn goes solo once more with a moving "origin" tale set in World War II as Jeremy learns of Grandpa Ichinohei's wartime exploits and encounter with Russian peasant Tasha, and how he adopts her daughter Anna. Jeremy's mother is also named Anna...

---

*Available in a collected edition

The series goes from strength to strength, managing to produce the illusion of progress without ever going anywhere or evolving beyond its audience. Only in the very latest days of the Eternity run does any major plot development occur, as Asrial's alien foes the Zardons attack Earth with giant monsters and kidnap the alien princess. Itchy and Jeremy stow away to rescue her. On returning to a devastated but victorious Earth, Jeremy is seduced by a demon and is trapped in Hell. Eternity also reprinted 1-13 again, this time in colour, and produced an annual which was comprised of material contributed exclusively by Japanese fans of the series.

Dunn was clearly unhappy with Eternity, and a year after their final issue he released 0, a compilation of short tales set just before the first issue, and then returned with more of the stories his audience wanted, but it wasn't quite the same. Although much improved technically, and with old friend Herb Mallette scripting, much of the juvenile enthusiasm was gone and it shows. Cheesy parodies such as "the Y- Men" (41-42) did not impress and eventually Dunn quits entirely (45) turning over the reins to John Marshall and Matt Lumsford who substitute action for charm to disastrous effect. The series staggered on for a while but was suspended with 74 so Dunn could try a different tack. The experiment with colour in *Ninja High School* Version 2, with reduced humour content and much more science fiction/superhero action was clearly satisfactory, and the regular series resumed with a putative resolution to the Jeremy/ Itchy/ Asrial triangle before heading off into pretty much the same territory as always, although with a much greater emphasis on action over humour.

Throughout its history Antarctic has championed the cause of the unpublished and wannabe creator. The Yearbooks invited submissions from fans and filled their pages with NHS related material that mostly ranged from the mediocre to the awful, but at least they gave people the chance, whilst the Brenner one-shot was a remarkably useful guidebook of tips to help creators self-publish. The STDs one-shot is filled with advice on how to avoid or if necessary treat various forms of venereal disease, coyly presented by *NHS* cast members. Twelve collections reprint all issues to 45, but Antarctic are now gathering twenty issues a time in 'Textbooks', two of which have so far seen print. For the really dedicated four volumes of 'Perfect Memory' reference all issues to 100, compile publication history, list related miniseries and reproduce design and sketchbook pages.~WW

Small Bodied NINJA HIGH SCHOOL

Antarctic: *7 issues 1992-1995*

Comedy episodes in the young lives of Asrial, Jeremy, Sammi and others, whether it be a game of giant *Monopoly* (1), a techno-fairy destroying video recorders in school (2), Sammi's delivery of chicken to new girl, Lana, which causes her father to destroy the restaurant (5-6). There's even mice from space trying to steal gems from the local museum (7).~NF

NINJAK

Valiant: *28 issues (2 x 0, 1-26), 1 Yearbook 1993-1995*

Independently wealthy Colin King maintains a dual career as the crimefighting Ninjak, concentrating his efforts on infiltrating seemingly impregnable secret organisations. As his name suggests, he's an accomplished swordsman and martial artist, and is also adept at espionage. He often works, reluctantly, under the sponsorship of Neville Allcott and the British secret service. This is all established in 1-4, written by Mark Moretti and drawn by the team of Joe Quesada and Jimmy Palmiotti, and together with the Moretti-written and drawn 0 and 00 issues, running through his background and origins, they're the best of *Ninjak*. Beyond that point it's not until 11 that a regular new writing team of Dan Abnett and Andy Lanning take over, with artist Andrew Currie joining them in 13. The trio's dry run in 7 is the best of their work here, and no sooner have they settled in than they're displaced by José Gonzales, who lasts until the final issue. Lack of any cohesive direction is a constant problem, with almost every issue changing one member of the creative team. While *Ninjak* never plummets into mediocrity, there's little inspiration beyond the early issues either. The series is abruptly cancelled mid-plot.~FP

NINJAK

Acclaim: *12 issues 1997-1998*

Kurt Busiek and Neil Vokes tell the tale of Denny Meechum, a stereotypical computer dweeb who can become the hero of his favourite game. When Denny finally beats the game (*Last Starfighter* anyone?) he also releases all the monsters and villains, magical servants of Lord Akuma, a primordial mystic defeated by the game's designer in the distant past. Said designer, a trés cool chinese monk, wrote the game to find his own successor and is surprised when a nerdy kid solves the puzzle and gets the power. But then who else would play a game called Ninjak? Woefully hackneyed plot, ineptly handled. Even the numerous guest stars (including Colin King, who was Ninjak in the Valiant incarnation of the title) barely lift the proceedings above dreadful.~WW

THE NINTH GLAND

Dark Horse: *One-shot 1997*

A short black-and-white horror story by Renée French. Two young sisters who have an obsession with surgery find a strange, calf-like creature that seems to be in distress because of a growth on its leg. They take it to the local hospital and ask the janitor to operate. He needs little persuasion, and they find some very strange things inside the growth. This is a disturbing story, not just because of the scalpels at work, but because it suggests that acts of compassion are motivated principally by voyeurism and the desire to control, and it makes its case very persuasively.~FC

N.I.O.

Acclaim: *4 issue miniseries 1998-1999*

A prototype robot warrior is activated before programming is completed in order to protect the son of a programmer, who suspected corruption at the top of the manufacturing company. An accident instils the consciousness of another programmer within the robot. Any potential is wasted, though, as three issues of fighting robots is all that follows, albeit well drawn by Joe St Pierre.~WJ

NO DUCKS!

Last Gasp: *2 issues 1978-1980*

Anthropomorphic underground that Walt certainly wouldn't approve of! Packaged, like *Commies From Mars*, by Tim Boxell, a lack of big names makes this even patchier than a normal underground, but Hunt Emerson and J. Michael Leonard offer good fun, and issue 2's Moebius parody by Steve Leialoha is well worth searching out.~NF

NO GUTS OR GLORY

Fantaco/Tundra: *One-shot 1991*

Set a challenge to produce a twenty-four page comic in twenty-four hours with no prior thought, Kevin Eastman did just that. Good for him. To then package the resulting old tosh and try to sell it at $3 a pop shows more than a little cheek.~WJ

NO HONOR

Image: *4 issue miniseries 2001*

Cat burgling art thief Russell Jordan Thomas, known as Random, is possessed by the thousand year old spirit of samurai Tannen when he steals an ancient sword. Their personalities are initially at odds, with Tannen not approving of Random's dishonourable livelihood. Britt Morrigan, a slinky ex-thief working for the NYPD, is on Random's trail and doesn't mind bending the rules, with other police portrayed as either foolish, corrupt or jobsworths throughout. In 3 Random agrees to head for Japan when things hot up for him in New York. Fiona Kai Avery plots a good story, but mounds of exposition in the dialogue ruin the pacing. Clayton Crain's storytelling can be downright obscure in places, relying on close-ups of unestablished detail, but it turns the pages nevertheless. An entertaining idea marred for want of some creative editing.~SW

NO HOPE

Slave Labor: *9 issues 1993-1995*

Jeff Levine's cartooning is basic, and his stories are often unrounded, dealing as they do with everyday incidents, but there is something curiously gripping about *No Hope*. It's well-dug ground – going to punk gigs, having a dead-end job, drinking too much, watching TV – but Levine injects moments of self-revelation into his ongoing diary of pointless youth. With 7 his style changes dramatically from increasingly smooth cartoony figures to rough, brush-rendered portraits and street scenes, relying more on observation. From this point the stories cease to centre around the same characters and the book loses cohesion, but there's some good drawing, particularly in the dialogueless strips. *The Days Go By Like Broken Records* reprints 1-6.~FJ

Recommended: 3, 8

NO JUSTICE NO PIECE

Head Press: *2 issues 1997-1998*

Rather strangely titled anthology fundraiser aiming to promote awareness of the Comic Book Legal Defence Fund, which provides for those in the comic industry having to defend themselves in court. Despite few of the contributors being very well known, the work is generally of a decent standard, often with a point to make. The best story is Mike Baron's in 2, about over-zealous protection of children.~FP

NO NEED FOR TENCHI!

Viz: *7 issue limited series ('Part One') 1996*, 7 issue limited series ('Part Two') 1996-1997*, 6 issue miniseries ('Part Three') 1997*, 6 issue miniseries ('Part Four') 1997-1998*, 5 issue miniseries ('Part Five') 1998*, 5 issue miniseries ('Part Six') 1998-1999*, 6 issue miniserie ('Part Seven') 1999*, 5 issue miniseries ('Part Eight') 1999-2000*, 6 issue miniserie ('Part Nine') 2000*, 7 issue miniserie ('Part Ten') 2000-2001*, 4 issue miniseries ('Part Eleven') 2001*, 6 issue miniserie ('Part Twelve') 2001-2002**

Picking up the story from an animated series, trouble ensues after high school student, Tenchi, inadvertently releases the demon, Ryoko from his grandfather's shrine. It just happens that Ryoko is actually a marooned space pirate. Becoming Tenchi's unwanted house guest, he teases the hapless youth whenever possible, and soon other alien women have arrived to plague him including: Ayeka, an alien princess; Sasami, her mischievous sister; and Washu, Ryoko's mad scientist "mother". 'Part One' sees Tenchi's troubles double when Ryoko look-alike, Minagi arrives on behalf of alien scientist, Yakage, who tries to steal Tenchi's powerful sword and kidnap Ayeka. In 'Part Two', Yakage challenges Tenchi to a duel to the death while Ayeka's life hangs in the balance. Then Tenchi's childhood girlfriend puts Ryoko and Ayeka through their paces to see who is most worthy of his affections in 'Part Three'. The group have some adventures in space on their way to rescue Princess Asahi's father, Takebe from rival, Tatetsuki before discovering that Yume is using mind control to try to give herself supreme power in the universe ('Part Four' to 'Part Six').

In 'Part Seven', there's an adaptation of 'Tenchi Muyo!: The Movie' in which the group travel back in time to prevent a strange fate befalling Tenchi's mother. This is followed by a series of shorter stories ('Part Eight') and then another trip into space, this time in search of a lost treasure and a meeting with an old flame of Ryoko's. 'Part Ten' features the visit of Ayeka and Sasami's mothers, a vengeful sea god, assassination attempts and monkeys. The final storyline ('Part Eleven' to 'Part Twelve') sees the friends trying to rescue Ayeka who's been kidnapped and brainwashed by Garyu into attempting to kill Tenchi. Hitoshi Otuda's ability to switch between light romance, more serious soap opera and rousing space adventure, means the series does try to offer something for everyone, and it's well drawn (though keeping mostly to Japanese manga conventions). It can be charming as well as too cute for its own good, but interested readers could do worse than try 'Part Seven' which offers a good mix of moods.~NF

NOBLE CAUSES

Image: *One-shot ('First Impressions') 2001, 4 issue miniseries 2002*, 4 issue miniseries ('Family Secrets') 2002-2003*

Taking the Fantastic Four as his starting point, Jay Faerber has twisted and crunched the idea of an extended family group of superheroes into something very appealing indeed. In the one-shot he establishes the respect and awe with which the Noble Family are held, and introduces a sense of a past that at no point becomes intrusive. This is via a plot in which younger son Race arranges a first meeting between his family and his fiancé. She's the viewpoint leading most of the first miniseries, starting with the superhero wedding in 1, and she learns that behind the public façade, the Nobles are more dysfunctional than most. Faerber's hefty application of TV soap opera techniques extends to very good endings, with 1 a total shocker. Each issue additionally runs a back-up set sometime in the past offering further insight into the lead tale. A series like this requires an artist producing big-screen artwork and strong storytelling, and Patrick Gleason fits the template perfectly, also managing inventive visual asides to boot. So, all in all, a well written and drawn comic that's the equal of most superhero titles released in the past few years.

Unfortunately, for the most part, the second miniseries is nowhere near as good. It's a slimmer plot from Faerber, but the fault lies squarely with the art of Ian Richardson, which is all style and no substance. This time Zephyr's pregnancy is the central issue, but the best portion is 3's back-up concerning the lonely childhood of bastard offspring Frost. There are a few nice pages concerning old enemies in the final issue, but let's hope future series improve.~FP

Recommended: One-shot, miniseries one 1-4

NOBLESSE OBLIGE

Rae Comic Co: *4 issues 1995, Series two 3 issues 1996*

Peter Oblige is on the run from his past and a failed heist in which several bank guards and robbers were killed. Looking for redemption, he accidentally comes between a racist cop and a gang in The Projects. Unfortunately for the story, our hero doesn't seem capable of thoughts that don't include his lost love, Mia. Confusion abounds around the possible criminality of the Police Commissioner, whether there really are a couple of superheroes in the city and whether the setting's America or the UK. Christopher Reeve's artwork is occasionally effective, but, more often than not, simply adds to the uncertainties in his script.~NF

NOBODY

Oni Press: *4 issue miniseries 1998-1999**

Writers Alex Amado and Sharon Cho's title character is the protégée of a mysterious masked mystic man. Her ability to alter her appearance helps her to outwit detectives so as to find and do battle with a serial childkiller. The mood is naturally dark, apart from some fun with a satanic rat in a pentangle, but Charlie Adlard's stiff black and white art is undistinguished.~GK

NOCTURNAL EMISSIONS

Vortex: *4 issues 1991-1993*

Cross-pollinate prime, late 1960s S. Clay Wilson and Mary Fleener at her most oblique and you still don't have an adequate handle on Fiona Smythe's work. Nocturnal Emissions is a forum for her curious mix of graffiti and underground-style stories. Two continuing series begin in 1. 'Toad in the Hole' is a sort of 'acid in wonderland' trip strip, while 'The Mannequin' chronicles the amorous misadventures of city girl Gert in Nevada. As well as some other aggressively idiosyncratic strips, a third series, 'Skin of Fate', begins in 3, which involves protagonists Pussy & Roach and a much-sought-after human tattoo-hide.~SW

THE NOCTURNALS

Bravura: *6 issue issues 1995**
Dark Horse: *One-shot ('Witching Hour') 1998**
Oni Press: *One-shot ('Troll Bridge') 2000*, 3 issue miniseries ('The Dark Forever') 2001*

The initial series was written and drawn by Daniel Brereton as part of Malibu's creator-owned Bravura line. It's a pulp-influenced tale of 'monsters' that have escaped from the corporation laboratory where they were created. Doc Horror leads a group comprising Komodo, Halloween Girl (Eve), Polychrome, Firelion, Starfish and The Gunwitch who are caught between factions fighting for control of the Mob and hunted by Mister Fane and the Corporation. 'Witching Hour' collects the story that ran in *Dark Horse Presents* 125-127, but in colour with Eve trick or-treating on Halloween. In 'Troll Bridge', a lantern transports Eve to other dimensions on her quest for treat-or-treat goodies. In black, white and orange, this has guest artwork from Joyce Chin, Art Adams, Stephen DeStefano, Kieron Dwyer, Ted Naifeh, Stan Sakai, Jay Stephens, Jill Thompson, Bruce Timm and Adam Warren, as well as appearances from Usagi Yojimbo, Jingle Belle and the Scary Godmother. The whole team is back together for 'The Dark Forever', investigating a plague of zombies and a mysterious lost city under the surface of Pacific City. Oni has also released two collections: 'Black Planet' collects the Malibu series and 'Unhallowed Eve' both 'Witching Hour' and 'Troll Bridge'. Perhaps not completely at ease with scripting initially, Brereton nevertheless has a good ear for dialogue and has created a set of strong characters. 'Troll Bridge' is a lot of fun in its own right, but the series is at its best when Brereton provides his own, atmospheric, painted artwork, and he's one of the few who can use paint well in comics.~NF

NOCTURNE

Marvel UK: *4 issue miniseries 1995*

A film-maker discovers an old costume that grants him extraordinary powers, but that seems to be taking over his mind. Very stylishly drawn by José Fonteriz, fresh from his sojourn on *XXX Women*, and written by Dan Abnett. This enjoyable sequel to the old Night Raven character was sadly a victim of one of Marvel UK's periodic cutbacks and never really received a fair chance at distribution.~HS

NOMAD

Marvel: *4 issue miniseries 1990-1991, 25 issues 1992-1994*

Possessed of a complicated background (explained in the first issue of the ongoing series), Nomad appeared periodically from *Captain America* 282 as Cap's costumed assistant. The costume has gone by the time of this well-conceived miniseries from Fabian Nicieza, James Fry and Mark McKenna, as Jack Monroe is developed into an armed vigilante with a conscience following a drug trail. Unfortunately it also lands him with an infant, leading to ludicrous scenes as Nomad dukes it out with assorted groups of ne'er-do-wells with a baby strapped to his back. The ongoing series begins well, with Nomad following the peripatetic inclinations of his namesake, but quickly becomes bogged down in crossovers and mundane plots. It takes notice of the title's cancellation for matters to improve with the 'American Dreamers' story in 22-25. Nomad is reunited with his sister to confront his past, but there's plenty who don't want him to have a future. A captivating plot and unpredictable conclusion make it a shame the title was permitted to slip.~FP

NOMAN

Tower: *2 issues 1966-1967*

In *T.H.U.N.D.E.R. Agents* 1 the aging Doctor Dunn transferred his consciousness into the body of an android. His personality can now travel to any android duplicate at will. Add to this a hooded cloak that grants its wearer invisibility and you have the versatile Noman. The scripts are unspectacular and the choice of the experienced but altogether too benign Ogden Whitney as artist seems inappropriate. 1 has stories drawn by Bob Kane and Paul Reinman, a truly unpleasant teaming, and the Giunta studio, neither faring any better than Whitney's anodyne depiction. There are also fillers starring T.H.U.N.D.E.R. Agent Lightning drawn by Mike Sekowsky in 1 and Chic Stone in 2. Both sixty-eight page issues sport Wally Wood covers more exciting than the contents. Stick to Noman's appearances in *T.H.U.N.D.E.R. Agents*.~SW

NON

Red Ink: *5 issues + 1997 to date*

Non is quite the achievement, growing from a reduced size comic to a squarebound and boxed trade paperback a step at a time, while gathering a reputation as a cutting-edge small press anthology. The problem with it, though, is that almost none of the contributors match the talent of guiding light Jordan Crane. Crane starts well, and improves throughout, his thin-lined style gloriously expressive, deflecting the nagging notion that he takes too many pages to move a story forward. Dean Haspiel contributes a shocker to 4, and Larry Stone, a contributor from 1 is a good cartoonist, but a less successful writer. The extravagant handmade packaging and consequent exorbitant price have made 5 a rare item, and the only occasion thus far where Crane is matched for talent, with contributors including Megan Kelso, Paul Pope and Steve Weissman. Strips are in black and white and yellow (or pink), and the main anthology book is accompanied by two small wordless pocket sized paperbacks, Crane's *The Last Lonely Saturday*, a moving silent strip in brown, cream and yellow about a widower, and Kurt Wolfgang's stylised *Where Hats Go*. That's at times puzzling, and ultimately the story is a labour of love lacking content beyond the excellent cartooning. Overall 5 impresses, but with the extras available separately, as reading it doesn't reward the effort of the publisher or reader.~FP

NORMALMAN

Aardvark-Vanaheim: *8 issues 1984-1985**
Renegade: *4 issues (9-12), 1 Annual 1985-1987**

Jim Valentino's first major comic series is a protracted satire on the superhero comic. Normalman has been rocketed from Arnold by his parents (only Arnold didn't blow up) to Levram, where he's the only non-superpowered person. The Ultra-Conservative takes exception to this, and Normalman finds himself relying on Sgt Fluffy, Captain Everything, Sophisticated Lady and the Countess of Monte Crisco to get him safely back to Arnold. Each issue concentrates on a particular company or genre (EC in 3, Disney in 4, team comics in 7, Cerebus in 10, American Flagg in 11, Archie in 12), and as parodies go it benefits from having a real story and not relying too much on the same sort of material every issue. It's not hilarious but it is good for a laugh. The series concluded in *Normalman 3-D Annual*, which is a rare comic making good use of 3-D.~NF

NORMALMAN – MEGATON MAN Special

Image: *One-shot 1994*

Jim Valentino and Don Simpson get together to parody the then current state of comics as Megaton Man and Captain Everything (two of the stupidest characters around) decide to join a successful comics universe and make some real money. With assistance from Larry Marder and Bob Burden, who draw their own creations (from *Tales of the Beanworld* and *Flaming Carrot*) throughout, Valentino and Simpson manage to throw pretty much everything but the kitchen sink at the issue. Unfortunately, it's only okay, because, fun as it is to see lots of cameos of characters, the targets have been hit so many times before that the script's practically one big cliché (though the Neil Gaiman section's vicious enough).~NF

NORTHERN Lightz

Northern Lightz: *7 issues + 1999 to date*

A magazine all about the joys (or otherwise) of marijuana. It's more parody – or should that be piss-take? – than satire, although the creators are not above some jabs at current social and political mores. Its closest equivalent is probably *Viz*, but, despite the near single-minded inclusion of weed in every strip, *Northern Lightz* actually offers more variety of comedy. It rewrites cultural heritage in 'Spliffy the Bush Kangaroo' (1), 'Mission Implausible' (1), 'Thunderbuds' (3), 'Adventures in Sherweed Forest' (4), 'Sir Spliffalot and the Quest for the Holy Hookah' (6) and 'Hashpuss '(7). Regular features include 'Buck Roachers' by Alan Grant and Frank Quitely (1-6), The Astounding Ganjaman by Jim Stewart (1-7), 'Spliff Wars' (1-5), Dave Alexander's Mad Mentol MacBam Brothers (1-7, survivors of *Electric Soup*), Captain Zappa by John Miller (4-7) and Cronic the Budbarian by Paul Van Linden (5-7). A one-off worth mentioning is Frank Quitely's Greens (6), in which the family are on holiday near a nuclear base. It's somewhat hit or miss, but depending on your sense of humour and tolerance (or otherwise) for drugs, this is worth a try at least.~NF

NORTHGUARD

Matrix: *5 issues 1984-1985**

Caliber: *3 issue miniseries ('The ManDes Conclusion') 1989*

Northguard was never a traditional superhero, although writer Mark Shainblum certainly got the trappings down right. What made him different was that his abilities were the creation of a benign Canadian corporation, and the well-defined supporting cast were as much a part of the comic as the lead. The Matrix series was called *New Triumph* in the indicia, although it's Northguard's name forming the largest part of the logo, and it was collected by Caliber when they issued the conclusion. By this time Gabriel Morrisette's art has developed very nicely, and there's a darker tone to the proceedings of a religious maniac intending blood and thunder. Inventive and appealing throughout, there have been many worse superhero comics, and this tops all Canadian efforts to date.~WJ

NORTHSTAR

Marvel: *4 issue miniseries 1994*

Having gone to such great pains to out Northstar as the first openly gay superhero in *Alpha Flight* 106, Marvel then seemed to change their mind about the whole issue. Their second-string mutant speedster engages in perfectly pedestrian anti-terrorist activities. Leaden.~HS

NOSFERATU

Dark Horse: *One-shot 1991*

Reprint of Phillipe Druillet's extraordinary Gothic adaptation of the Nosferatu legend, drawn in his customary, highly decorative style featuring flowing forms and pattern making. A quintessentially 1970s artist whose work is free-form and original, if sometimes frustratingly visually led, Druillet was introduced to a new audience by *Cheval Noir*.~FJ

NOSFERATU

Venus: *4 issue miniseries 1997-1998*

Holden Morris uses the character and mystique of Nosferatu to tell what he considers to be the intensely erotic tale of two sisters in 1930s England. They take up residence near an old monastery as the eerie Count Orlac prepares for his final demise: The sisters seduce each other, the Count's other female victims, and the dead guy himself whilst writing a Requiem Mass to be performed upon his eventual death. The drawing is well executed but is let down as the plot continually sacrifices content for gratuitous and exploitative sex. A waste of talent.~WW

NOSFERATU: Plague of Terror

Millennium: *4 issue miniseries 1991*

Why were people so mad-keen for *Nosferatu* comics in 1991? Millennium pitched in with this series by Mark Ellis and Rik Levins, in which the bald old ghoul is on the rampage once more, in search of attractive victims to bite. Brings nothing new to the vampire genre.~FJ

NOSFERATU: A Symphony of Shadows, A Symphony of Shudders

Tome: *2 issue microseries 1991-1992**

Dreadful and laborious adaptation of the 1922 German Expressionist film by Friedrich Wilhelm Murnau, which was in itself a theft of Bram Stoker's *Dracula*; in fact, the Stoker estate's subsequent copyright trial was the first successful defence of an intellectual property this century. Screenwriter Hendrick Galeen only changed names: Count Dracula = Graf (Count) Orlac, Transylvania = Wallachia and Whitby = Bremen. Raphael Nieves and Ken Holewczynski try their best, but the movie script is minimal, relying on spooky lighting and creative sets to work its magic, leaving the comic with no real meat to its bones.~WW

NOSFERATU 1922: Silent Screamers

Image: *One-shot 2000*

Nosferatu 1922's main purpose is to promote a new line of horror action figures, which never bodes well. So, what do we get? A retelling of the 1922 movie, sandwiched between two halves of a comeuppance tale of a nasty boy who wants to buy the Nosferatu figure. If you want to buy the toy, buy the toy. But don't bother with the comic.~DB

NOT BRAND ECCH

Marvel: *13 issues 1967-1969*

'Brand Ecch' was the tongue-in-cheek editorial manner in which Marvel referred to the product of their competitors in the mid-1960s. 1-8 caricature Marvel and occasionally DC superheroes with varying degrees of success. From 9 the page-count increases and the emphasis broadens to encompass general parody. There's pleasure to be derived from seeing the regular Marvel artists lampooning their characters, with Jack Kirby proving surprisingly adept at parodying his own Thor (3) and Fantastic Four (7) origins. Marie Severin's demonstration on how to draw the Marvel way in 13 is hilarious, but the best issue to sample is 7, also including Roy Thomas and Severin's Superman parody.~WJ

NOT QUITE DEAD

Rip Off/Knockabout: *4 issues + 1993 to date*

Gilbert Shelton's *Fabulous Furry Freak Brothers* and *Fat Freddy's Cat* strips have transcended generation gaps to become universal crowd-pleasers. Until *Not Quite Dead*, he'd been recycling his 1960s characters, and the first issue reads like the work of a man trying to create something new, but with little new to say.

Not Quite Dead are the longest dues-serving band in existence, hauling their equipment to whichever dive will provide beer, pizza and a little money. Shelton, with French cartoonist Pic contributing to the art, doesn't really hit the spot in 1, where the one-pagers are okay, but the longer strips string together a succession of punchline gags, and don't work. There's a slight improvement thereafter, but only 3 is noteworthy. Here Shelton plays a variation on the myth of Robert Johnson meeting the Devil at the crossroads. It's sustained, funny, and makes a point. All Shelton's cover paintings are magnificent.~FP

Recommended: 3

NOVA

Marvel: *Series one 25 issues 1976-1979, series two 18 issues 1994-1995, series three 7 issues 1999*

Nova was conceived as a way to return to basics, to the freshness and youthful fun of the early Spider-Man. Enter Richard Rider, who stumbles upon an alien helmet that confers on its wearer super strength, flight and sundry other superpowers. Richard is just a student, unsure about his role, lacking in confidence, and finding it hard to explain his late homework and mysterious absences while out fighting second-string villains like Diamondhead and the Sphinx, not to mention various heroes who initially mistake his intentions in the time-honoured Marvel tradition. Marv Wolfman gave Nova an (unintentionally) funny supporting cast full of comedy racial stereotyping. While establishing his own set of villains, Wolfman also had him meeting Thor (4) and Spider-Man (12, continued in *Amazing Spider-Man* 171). At one point, Nova even pops up in the Marvel offices, suggesting that they do a comic about him in one of those uncomfortable "superheroes are real, kids" scenes. However, there was too much re-working of an old formula and too few fresh ideas to make the character popular. John Buscema's by-numbers artwork didn't help, although later issues pencilled by Carmine Infantino are an improvement.

---

* Available in a collected edition

Marvel decided to have another try at a solo title following the success of *New Warriors*, in which he appeared with new powers and a new costume. It was unlikely there was a great deal of fan recognition out there so they might as well have created another character altogether. Marvel's final attempt to revive Nova was a lacklustre affair, with the hotheaded superhero making a mess of things while at college. In an effort to appeal to hardened Marvelites the run brings back most of his old foes and features numerous premiership heroes (the FF, Spider-Man, Iron Man, Captain America, The Hulk). Erik Larsen includes every cliché he can, and the art by Joe Bennett and Armando Durruthy is entirely standard.~FJ

NOVAVOLO

Jungle Boy Press: *One-shot 2000, 1 Annual 2001*

Created by Jai Nitz and Greg Kirkpatrick to showcase their writing and artwork respectively, this accomplished anthology contains a mix of old and new, though not everything works. Most of the stories are written by Nitz (except for Phil Hester's 'The Wretch') and Kirkpatrick provides the attractive pencils for a humorous view of comic conventions ('Con Sketch') and the superhero 'Raven's Blood'. Kirbor the Unwashed is a homage to Kirby's monsters. There's also a funny single page Wretch strip by Mike Worley, in the style of Henry Boltinoff. The Annual continues in this vein ('Con Sketch' and Kirbor reappear) with more of an emphasis on the comedy (after the strips there is 'The Official Handbook of the Monkey Universe').~NF

NOWHERE

Drawn & Quarterly: *5 issues 1997-2000**

Debbie Drechsler weaves a deceptively slow and evocative yarn of teenaged Lily, a girl becoming a woman in the turbulent yet idyllic 1960s. Her less than storybook family moves from the big city to the provincial town of Woodland, located on the edge of a deep, dark forest. Lily, lost and confused, slowly makes new friends and discovers the world of boys and juvenile sexual politics as she and her sisters come to terms with all the unwanted disruptions in life, changes she increasingly has no control over. How she adapts to the inexorable procession of life in an immutable environment while undergoing the social, emotional and physical changes of puberty provides an intriguing but always enthralling peek into the lost arena of adolescence, successfully using the cultural climate as both metaphor and stage. Excellent graphic biography (collected in one volume as *Summer of Love*) that every thinking comic fan should see.~WW

Recommended: 1-5

NOWHERESVILLE

Caliber: *Special 1995, 4 issue miniseries ('Death By Starlight') 1995-1996, One-shot ('The History of Cool') 1997*

Stylish it may be, but talented creator Mark Ricketts' fatal flaw is an obsession with 1950s beat. The authenticity will repel many not prepared to wade through scrupulously accurate slang, rendering much of the earlier issues hard going. It's a shame as his investigator is the classic downbeat with a narrative playing in his head, and the plots are sharp, suspenseful and intriguing. Comparisons with early Brian Michael Bendis are not misplaced, down to the static art, and Bendis contributes to 'The History Of Cool' along with Phil Hester. Issue 3 of the miniseries doubles as *Wordsmith* 7. An Image collection incorporates rejigged versions of the special and 'Death By Starlight' featuring new panels and pages along with Galen Showman's contribution to 'The History of Cool'.~WJ

Nth MAN

Marvel: *16 issues 1989-1990*

As strange a comic as Marvel has ever produced, being partly a war title, partly a superhero title, and partly a treatise on the abuse of power. John Doe and Alfie O'Meagan spent their 1960s pre-teens in an Iowa orphanage, and events shaping them are interspersed with their current situation. Doe has become the Nth Man, a CIA-sponsored ninja, and O'Meagan is a near-omnipotent being able to erase the world's nuclear arsenal with a thought (unwittingly precipitating World War III), and to manipulate time and reality. The bizarre ending is completely in keeping for Larry Hama's continuous story, often confusing, but never dull. You're best advised to start with the first issue, and there's a reprise in the Squadron Supreme graphic novel.~FP

NUKLA

Dell: *4 issues 1965-1966*

CIA spy pilot Matt Gibbs is blown to smithereens by an enemy's nuclear defences. He manages to re-assemble himself, and his U-2 spy plane, by sheer force of will. Thus was born Nukla, the atomic spy, a blatant copy of Captain Atom in a white flight suit with red trim. The uncredited stories are over-simple; if only their twenty-seven pages were put to some entertaining use. The art was provided by Dick Giordano, who pencilled the origin story in 1, Steve Ditko who pencilled 4 and Sal Trapani who drew the balance... and also inked everything, unfortunately.~SW

NURTURE THE DEVIL

Fantagraphics: *3 issues 1994*

Stories by Jeff Johnson, full of incest and sex-and-violence and humiliation and gender switching, drawn in a nightmarish woodcut style. It's distinctive and disturbing, and at its best it connects with something raw and dark and primeval. However, the main story, 'The Garden', which is continued through all three issues, is ultimately disappointing, sliding from the mythic in 1 to soap opera in 3. Avoid 3, and make up your own ending instead.~FC

NUT RUNNERS

Rip-Off: *2 issues 1991-1992*

Bizarre, meandering fantasy about escalated competition between burger and pizza franchises. From the unreadable logo through the confused story to the usually reliable Stuart Immonen being unable to differentiate the look of his cast adequately, this is missable.~FP

NUTS!

Bantam: *2 volumes 1985.*

You have to hand it to Harvey Kurtzman; even at the end of his career he still experimented with different formats and venues for his mordant attacks on popular culture. *Nuts* was a humour paperback, ironically much like the many *Mad* magazine reprints, put together by Kurtzman and Byron Preiss. Despite the fertile ground for satire in 1980s America, the humour on show here is disappointingly weak, whether from Kurtzman and frequent collaborator Sarah Downs, or from the many other contributors such as Bob Fingerman, Rick Geary and Chris Browne. The highlight in both issues was undoubtedly Ralph Reese's beautifully drawn 'ABC of Dating', but this on its own is not enough to save the project and overall it rates as a disappointment.~DAR

OBERGEIST

Image: *6 issue miniseries ('Ragnarok Highway') 2001*, one-shot ('The Empty Locket') 2002*

Redemption story of a Nazi concentration camp doctor Jürgen Steinholz who is resurrected by 'angels' to stop white supremacists in a near-future America. Dan Jolley presumably thinks what he's written is daring and edgy, with such an obviously controversial central character. His story is weak, though, struggling to fill six issues, and it's a little tasteless to do this type of thing if you don't really have anything to say. Tony Harris's pencils are attractive enough, but wasted here and on the black and white one-shot, giving Steinholz's back story.~DB

OBJECTIVE FIVE

Image: *6 issues 2000-2001*

Teenagers Lark, Alexis and DJ set out for a desert rave, but are inadvertently infected with a 'super-soldier' virus along the way. Pumped up by their new and improved DNA, the pneumatic trio agrees to work for the Center for Disease Control, a "fifth objective" in the race to create and destroy biological weaponry. No amount of plot recapping can quite do justice to the awesome mediocrity of this truly ugly tits and ass extravaganza. Luke Lizalde is one of many young artists to have fallen disastrously under the spell of Todd McFarlane, and he faithfully replicates the master's awkward figure drawing, confused storytelling and lazily cartooned faces. Fourth-billed scripter Kevin Hoffer contributes barely literate captions and cliché-ridden dialogue, but then who in their right minds reads the dialogue in these things?~AL

OBLIVION

Comico: *2 issues 1995-1996*

When the first issue's editorial is arrogant and foolish enough to claim that "two talented individuals" have created 'a stunning amalgamation of superheroics, science fiction, espionage and cold war intrigue' it's inviting contradiction. What writer Jack Herman has done is read Jim Starlin's *Dreadstar* and some Clive Barker books, and what artist Andrew Dimitt has done is to watch Clive Barker films when he should have been paying attention in his anatomy classes. Utter bollocks, and derivative bollocks at that.~FP

OBLIVION CITY

Caliber: *9 issues 1991-1993**

Andy Garcia's adventures of art-director and underground cartoonist in and around the Oblivion Café and the Greater – and weirder – metropolis of Oblivion City. Manic humour featuring Throb, roommate Wufflehead Spurt, his girlfriend Tabby who murders the Mayor every Thursday, Meggazar Dude, the world's only Epileptic Superhero and the sundry other billions who inhabit the strangest city on Earth.~WW

Recommended: 1-9

OBNOXIO THE CLOWN

Marvel: *1 issue 1983*

First seen in *Crazy* magazine, Obnoxio's refreshingly disreputable and cynical, and here we see how he fares in the X-Men's Danger Room, and then against the horrors of jury duty. Alan Kupperberg has fun in both writing and art.~FC

OCCUPATIONAL HAZARDS

CD Comics: *2 issues 2000-2001*

On meeting comic creators, Rick Beckley asked them about their strangest experience working in comics. He then passed the stories to assorted lesser-known writers and artist for adaptation in this fundraiser for The Comic Book Legal Defense Fund (www.cbldf.org). The stories range from the predictable to the distressing, with standouts being a toned down version of Jamie Delano's Swedish convention experience, and Mark Waid's script instructions in 1, and the psychotic fan sending letters in Matt Wagner's name in 2. It's inessential, but for a good cause, and you'll have a few laughs. Treat yourself.~WJ

OCTOBER YEN

Antarctic: *2 issues 1996*

Brandon Graham's artwork shows a lot of promise, but what his stories are about is really anyone's guess. They jump from one element to the next seemingly unconnected scenario making little sense in isolation or connected.~FP

ODDBALLZ

NBM: *5 issues + 2002 to date*

Well, you can't really go wrong with Lewis Trondheim, can you? 1-4 serialise two stories not previously seen in English, with two more beginning in 5. The more intriguing is a McConey story in which he's appointed the manager of a company that snoops and confronts people. Throwing up some interesting moral dilemmas and paranoia amid the usual McConey friendships and interplay, it's excellent. Perhaps the other strip prompted the title. In 'Astronauts from the Future', also crediting Manu Larcenet, precocious school kids Martina and Gilbert have problems. She believes people are being replaced by robots, and he believes aliens are replacing people. They team-up to test these hypotheses. Both stories are unpredictable, and both are drawn in Trondheim's brilliant loose style. It's a shame the colour French pages are black and white here, but collections will surely follow. New stories begun in 5 see McConey transplanted to the Wild West, and the kids starting a new adventure with the danger of a planetary invasion.~FP

Recommended: 1-5

ODDJOB

Slave Labor: *8 issues 1999-2001**

Moe investigates the bizarre and fantastic from an office in Spiral City using his library and Compass of the Odd, which points towards disruptions in the normalcy continuum. Robin is an out of work 'conceptual' clown sometimes hired to help. Moose is a bar owner and Moe's landlord. Plots include Formaldehead using a stolen cookery book to open the portal to the dimension of gummi (1), Mr Jicima, Dr Roswell and Moose battling the Amish Cyborg while Moe and Robin are in Australia solving the mystery of the exploding Echidnas (3), and the invasion of the Grumblers and the story of how Moe lost his eyes (6-7). These characters previously appeared in *Odd Adventure-Zine*, and this can be amusing, but never goes anywhere.~NF

The ODYSSEY

Avatar: *1 issue + 2002 to date*

With four short, separate, strips about Medusa, Trident, Judo Girl and Orion the Hunter, this spin-off from *10th Muse*, mixing superheroes and Greek gods, does not convince. Sean Murphy shows some style on the artwork for Judo Girl, but the first two stories are mere melodramatic posturing and the last nearly incoherent.~NF

OFFCASTES

Marvel/Epic: *3 issue miniseries 1993*

Good-looking but derivative coming-of-age science-fiction adventure with thefts – 'scuse me, homages – from Moebius' *Airtight Garage*, *Blade Runner* and *American Flagg* among others.~HS

---

* Available in a collected edition

OFFERED

Comics One: *2 volumes 2001*

Champion decathlete Yu Tachikawa is a test tube baby, but his life takes a rather strange turn when he's told he was fathered from the frozen sperm of the ancient warrior Gilgamesh. This is far from the least of the b-movie ideas sprinkled through Kazuo Koike's plot, which also starts with a woman called Yippie Payetta who's Adolf Hitler's granddaughter and a homunculus preserved in formaldehyde. They're probably deliberate indications that the story shouldn't be taken seriously, and it is a lot of fun, meandering over two four hundred page paperbacks. These incorporate detours in a nudist camp, an astounding bank robbery and some frankly bizarre and inexplicable interludes (hunt the eyeball) before the concluding search for the riches of a lost civilisation. There is the feeling that Koike is laughing at his cast, but the art of Ryoichi Ikegami, in realism mode, is excellent throughout. It must also be remarked upon that in a story with a high sexual content someone is very coy about genitalia. The penis is never rendered as anything other than white space encircled by a hand or mouth, and the pudenda is drawn as area radiating light. Whether purely for American consumption, Japanese censorship or Ikigami's own preference is unknown.~WJ

OH MY GODDESS!

Dark Horse: *6 issues miniseries ('Part I') 1994-1995*, 8 issue limited series ('Part II') 1995*, 11 issue limited series ('Part III') 1995-1996*, 8 issue limited series ('Part IV') 1996-1997*, 12 issue limited series ('Part V') 1997-1998*, 6 issue miniseries ('Part VI') 1998-1999*, 8 issue limited series ('Part VII') 1999*, 6 issue miniseries ('Part VIII') 2000*, 7 issue limited series ('Part IX') 2000-2001*, 5 issue miniseries ('Part X') 2001*, 10 issue limited series ('Part XI') 2001-2002, 9 issues (88-96) + 2002 to date*

Whimsical humour from writer/artist Kosuke Fujishima about Keiichi, an engineering student who accidentally rings the 'Goddess Help Line' instead of the local fast food joint, and gets a visit from the rather personable Belldandy, a first class goddess who grants him one boon. Since he's been having trouble getting a girlfriend, he wishes Belldandy will stay with him forever, without really thinking through the practical consequences – like his living in an all-boy dorm where women, even supernatural ones, are forbidden.

As the series develops first Belldandy's sisters, the older, slinky tease Urd and the mischievous, younger Sculd, then a cast of family and student characters are introduced, turning it into a charming oriental *Archie* with supernatural shenanigans on the side. Like the Riverdale students, they never seem to age or develop, so it's possible to jump in and enjoy the stories without worrying too much about the continuity. The parts are sometimes made up of two or three different story arcs, so working out where you are can be difficult. To make it more confusing Dark Horse screwed up the first series by printing the stories out of order, but rectified this in the collected version.

Fujishima's artwork is very pretty, more detailed and decorative than many manga artists, but his humour is weak. The story revolves around Keiichi's desire for Belldandy, which is constantly frustrated by the other women in his life – his and her sisters, and not very evil bad goddesses. There are many jokes about sexual tension, but the plots are usually slight and fluffy, and tip over into the maudlin at times. Some of the more fun tales include 'The Devil In Miss Urd' from part 6, where evil goddess Mara clones Urd and attempts to separate out her wicked and good sides, and 'Pretty In Scarlet' from part 9, in which Sculd swallows an angel's egg and gives birth to her own personal angel who's more trouble than all the baddies put together. Supplemental stories have also featured in *Super Manga Blast*.~FJ

OH MY GOTH!

Sirius: *4 issue miniseries 1998*, 3 issue miniseries ('Humans Suck!') 2000*

Voltaire is an animator and musician, whose mini-comics advertising his gigs transformed into this series. The first miniseries introduces the alien, Posche, who, tired of watching Earth from a distance and always misunderstood when he visits, decides to travel to the place most feared by humans, Hell. Instead of the real Hell, however, he ends up in a Goth club, where he meets the friendless Angel and, eventually, Count Lord Baron Maloderus, a villain. The second miniseries has more self-contained issues, full of scatological gags, including a Ray Harryhausen parody/homage in 2. The largely illustrative artwork of the first series becomes more traditional cartooning in the second, but the humour's very specialised and the characters too colourless to be interesting in their own right.~NF

OINK

Kitchen Sink: *3 issue miniseries 1995-1996, 4 issue miniseries ('Blood and Circus') 1998*

Not to be confused with the British humour comic of the same name, this *Oink* is a dour science fiction saga about a mutant pig seeking revenge on his totalitarian masters. Creator John Mueller is clearly influenced by the work of Bill Sienkiewicz, and particularly Simon Bisley, but brings nothing new to the painted comic book look. Mueller seemingly wants to say big things about religion, politics and science. The blurb on the back of 'Blood and Circus' claims it's a cross between *Mad Max* and George Orwell – you wish! – but the overriding emphasis on nihilistic gore is pretentious rather than profound. The second miniseries relocates the action to a post-apocalyptic Wild West, but is as full of cliches and ugly pictures as the first instalment.~AL

OKTANE

Dark Horse: *4 issue miniseries 1995**

Broad-based satire extrapolating on the then current condition of federal and local government administration and finance, and taking sideswipes at political correctness, rednecks and plenty of other targets along the way. It's also an action comic, with the dispossessed and downtrodden mad as hell and not going to take it no more, led by a giant black man-machine Oktane. Gerard Jones casts his net far too wide, and the convoluted pastiche elements prevent this from being a satisfactory action story either – though that isn't the aim. There are plenty of decent ideas lost in the muddle, and some very funny lines and scenes. Oktane constantly revising his background to engage the sympathies of those he's with is amusing, and Gene Ha and Andrew Pepoy's art is excellent throughout. Better *Oktane* than yet another assembly-line superhero, but overall unsatisfying, although Jones' editorial in the final issue should be required reading for all aspiring comic writers and plenty of those already employed as well.~WJ

OLYMPIANS

Marvel/Epic: *2 issue microseries 1991-1992*

One of the first in a flood of generic superhero parodies, and sadly not nearly the best, inexplicably published by Marvel's adult Epic imprint. It's the same old soap opera trials and tribulations of superhumans with powers like Gods (Gedditt?) in a futuristic and unfeeling world. There's a couple of good one-liners but nothing worth bothering about, much like the inking contribution of soon to be big time Todd McFarlane in 2.~WW

OMAC

DC: *8 issues 1974-1975, 4 issue miniseries 1991**

Yet another great concept from Jack Kirby. Menial Buddy Blank is transformed into a One Man Army Corps powered through a psychic link with a satellite, Brother Eye. Poor pacing and weak scripting dilute strong plots and artwork in the first series, after which Omac is given back-up slots in *Kamandi* 59, then *Warlord* 37-39 and 42-47. John Byrne remains true to Kirby's ideas in the second series, now in black and white, and produces an excellent tale concerning the consequences of dabbling with time. Byrne switches the emphasis with each issue, the most effective being Omac trapped without memory on Earth in the 1930s, and leading

a completely different existence. The story is finished in style, and the entirety ties in well without everything established by Kirby with altering anything, but can be understood without reference to any previous issues. A gem.~FP
Recommended: miniseries 1-4

OMAHA The Cat Dancer

Steeldragon Press: *2 issues 1984-1986**
Kitchen Sink: *19 issues (0, 3-20) 1986-1993**
Fantagraphics: *4 issues 1994-1995*

You would think that any comic that dealt intelligently and in a thought-provoking manner with gay, bi- and disabled issues, political scandal and attitudes to pornography, mental health and prostitution would be far too politically correct to be fun. You'd also think that with more plot and characters than your average episode of *Coronation Street* it wouldn't have time to fit in frequent sexual encounters between characters. And you'd think an issue packed soap-full of bonking cats, birds and dogs wouldn't be very hot. You'd be wrong on all counts. Omaha, which débuted in *Bizarre Sex* 9 (reprinted as *Omaha* 0), is produced by a well-informed, liberal couple who obviously know their way around the bedroom. Its strength lies in the emotional resonance of the characters, which carries you through various dramatic plot twists. For an exotic dancer Omaha is involved in her fair share of kidnappings, murders, secret inheritances, 'dead' parents who suddenly reappear, etc.

Kate Worley writes decidedly superior melodrama and Reed Waller draws the sexiest cat/human hybrids you'll ever see. Whatever *Omaha* lacks in depth it makes up for in honesty – infinitely more arousing than anything Eros has managed to put out, one of the few truly 'adult' sex comics around. Kitchen Sink reprints of the first two issues are also available, and they also publish two issues of *Images of Omaha*, collections of illos and short strips by other creators, published to benefit Waller while he was being treated for cancer. See also *Dope Comix* 5, and the entire series is available over a number of books..~FJ
Recommended: Series one 3-7, Series two 2, 3

OMEGA the Unknown

Marvel: *10 issues 1976-1977*

A large mute humanoid alien wearing a blue and red costume and endowed with superstrength lands in New York, and is somehow connected with a young boy whose parents are revealed as robots. This was off-the-wall stuff even for the experimental mid-1970s Marvel, but unfortunately only writers Steve Gerber and Mary Skrenes knew what was going on, and they never had a chance to finish the story. Avoid the hack fill-ins (7-8); loose ends are poorly tied up in *Defenders* 76-77.~FP

OMEGA MEN

DC: *38 issues, 2 Annuals 1983-1986*

Now gathering dust in back-issue boxes and only remembered for Lobo's début in 3, there are many worthwhile issues of *Omega Men* later in the run. Introduced in *Green Lantern* 141, the team began life in their own title as spacefaring superheroes united by a desire to free their occupied homeworlds. Led by the utterly charismaless Primus, the remainder of the crew were from Grim'n'Gritty Central Casting, with the only element of suspense coming from whether or not the serpentoid Demonia would betray the team to their enemies. Lacking direction and meandering, the comic finally took off when the creative team of Todd Klein and Shawn McManus arrived with 26. Their decision to sideline the previous heroic archetypes in favour of more interesting secondary characters and well-conceived new ones was wise, as was emphasising science-fiction elements instead of superheroics. When the familiar cast return Klein's given them a personality boost. There's also a varied selection of back-ups focusing on the planets in the Omega Men's solar system, with Steve Parkhouse's contribution in 28 a gem, and Dave Gibbons' dry run for *Watchmen* in 33 also worth a look. Unfortunately McManus' deadline problems mean there are art fill-ins aplenty after 30, with the best being the Dan Spiegle-illustrated mystery story in 32 with not one, but two good revelations. The series' conclusion is excellent, and should bring a glow to the heart of anyone who's been following the plot, but loses some effect when read cold. There's a postscript, also written by Klein, in *Teen Titans Spotlight* 15.~WJ
Recommended: 26-30, 32-34, 38

The OMEN

Chaos!: *5 issue miniseries 1998*

Moronic attempt by the typecast publishers to produce a teen superteam comic – and still do it their way. Voodoo Childe, Vex, Rip, Carcass and Oblivia are brought together by the mysterious Gallows to fight the rise of the Saviour and the Church of Divine Ascension and prevent Armageddon from breaking out in Los Angeles. Like, who would notice, dude? This stuff is bad enough from creators that actually like team books. Phil Nutman and Justiniano go through the motions and none of us care.~WW

ON A PALE HORSE

Innovation: *4 issues 1991-1993*

In life Zane was a waste of space, but when he's appointed the new incarnation of death he determines to project a more caring image. He replies to letters, comforts the dying and finds time to go on a date. The long spread of publication indicates the problems in finding people to produce the art for this adaptation of a Piers Anthony novel, with five artists credited over four issues. During this time the primary writer also bailed, and the company went bankrupt before completing the six planned issues. All in all, not much of a success.~WJ

ON THE BUS Stories from the Beaten Generation

Slave Labor: *One-shot 1994*

F. Andrew Taylor had the misfortune to make three bus trips across the USA totalling about 10,000 miles, and here details every ghastly occurrence. It's a successful comic in that it'll make anyone squirm in their comfortable armchair at some point, and offers plenty of practical advice. Diverting, yes, compelling, no.~FP

ON YOUR KNEES BOY

This collection of illustrations/scenes of women, mostly naked, on the theme of sex in the kitchen, by Molly Kiely, is briefly diverting, but not really substantial enough.~NF

THE ONE

Marvel/Epic: *6 issue miniseries 1985-1986**

A dystopic examination of the superhero as a weapon of war generously peppered with all the real and psychological fallout that would entail. This brutal meditation was done before anyone else had seriously deconstructed the long underwear genre, yet still reads well in comparison with all later attempts. Creator Rick Veitch did his elegant best to make the package reflect popular culture, with its covers done as ersatz supermarket products. There's a nightmarish look at Nazi scientists applying themselves to the Nietzschian ubermensch concept the same way they actually did with rockets and supersonic flight. We then see the US and the USSR escalate to a less than cold war using super types – and a giant rat – as weapons of mass destruction. World leaders, militia and politicians come off as grotesques and shrill caricatures. Veitch takes no prisoners in his shrugging off of the angst-ridden revenge fantasies of the impotent. Tropes that the genre established in the 1960s where all the cola cans and washing powder boxes hail from. Radical!~SW

ONE-FISTED TALES

Slave Labor: *12 issues 1990-1994*

Sadly, the funniest thing about *One-Fisted Tales*, the humorous, sexy anthology, is its title. That, and the joke brown paper cover on issue 1. The quality of the art lets it down most of all: badly-drawn, anatomically incorrect people getting it on don't get most of us hot under the collar. There's a Cherry story in 3, and 8 has a particularly pointed, if unerotic and poorly drawn, piss-take of Madonna's *Sex*. A collection harvests the best of the run.~FJ

100 BULLETS

DC/Vertigo: *40 issues + 1999 to date*

The initial storylines begin with Agent Graves, who gives people (like ex-cons) with a reason to hold a grudge, an attaché case. It holds evidence of their innocence or the real culprit, a gun, one hundred rounds of ammunition and the promise of total immunity should they choose to use them. Interspersed between these episodes, a complex plot unravels. It appears (8) that Graves and a gun-crazy associate, Lono, are the last of seven Minutemen, who worked for an organisation called The Trust, which betrayed them. The Trust believed the Minutemen were dead in Atlantic City, on the word of a Mr Shepherd, until Graves had one of his targets try to kill Megan Dietrich (4-5), a member of the Trust. 9-10 introduce Cole Burns, both a part of Graves 'game' and a member of the Minutemen, working in an ice cream truck. In 12-14 Dizzy Cordova (whose story is told in 1-3) is sent to Paris by Shepherd to meet Mr Branch, who was also a recipient of an attaché case, and who provides some more background into the Trust, Graves and Shepherd. During a gathering of the thirteen families of the Trust, including Megan, Augustus Medici and his son Benito, Mia Simone, and Daniel Peres, a distraught gambler decides that Benito has his money and Graves makes a statement (23-25). 26 offers a synopsis of the characters introduced so far, as explained by Branch to a prostitute (with pinups by guest artists including Paul Pope, Tim Bradstreet, Jordi Bernet and Frank Miller). In 28-30, Shepherd and Dizzy go looking for another hidden Minuteman on the Mexican border, while private detective, Milo Garret, finds himself caught in a web of deceit that involves a stolen painting, Lono and Megan (31-36). After this longer storyline there are several single-issue tales. Dizzy returns home in 37, while Shepherd and Graves discuss their plans. 38 sees Cole return to the girl he ran out on when his memory returned as two small-time criminals try to hold up a bar, 39 spends a day with Augustus and Benito, and 40 sees Shepherd asking Lono to choose sides. This gritty thriller, from writer, Brian Azzarello, is constantly inventive, from the basic premises of Graves' game and the underlying conflict between Graves and the Trust, to the multifaceted characters, relationships and storytelling techniques. Throughout, Azzarello is supported by the stunning drawings of Eduardo Risso, whose stylish figures and attention to detail are extraordinary. 1-36 are collected in five trade paperbacks.~NF

100 GREATEST MARVELS

Marvel: *10 issue limited series 2001*

To celebrate the 40th anniversary of *Fantastic Four* 1, which kicked off Marvel's silver age and saved the company from bankruptcy, the current powers that be decided to ask the fans to vote for their 100 favourite Marvel issues. They then printed the winners, three or four issues at a time depending on space. Essentially a collection of reprints, the project is the perfect introduction to the Marvel Universe for less experienced readers curious to explore forty years of history. As one would expect, all the classics are here – the Death of Phoenix, the Galactus Saga, the first appearances of Spider-Man, Wolverine and many other favourites. Every decade is represented, as are all the greatest creators, with recent offerings from the Ultimates line sitting side-by-side with Kirby and Ditko classics.~JC

ONE LIFE

Topps: *One-shot 1996*

As a prelude to his then forthcoming *Elric* series P. Craig Russell (a man with previous as far as Elric is concerned) adapted a Neil Gaiman short story. As always, the Russell art is sumptuous, and he copes surprisingly well with achieving authenticity in this tale of English public-school adolescence. For Gaiman's part, one suspects there are at least elements of autobiography about the tale of a precocious, bookish teenager who's picked up on Moorcock's novels at an early age and wants them to be more than fantasy. While one can see the attraction of an artist adapting how Moorcock's works affected a youthful writer, it's a slim tale, and really only for Gaiman or Russell completists.~FP

ONE MILE UP

Eclipse: *2 issues 1991-1992*

There's a manga and Robert Heinlein feel to this prematurely cancelled tale of armoured federation troopers protecting the galaxy. From the promising artwork one might have expected to see more of Shepherd Hendrix.~WJ

ONE PLUS ONE

Oni Press: *3 issues + 2002 to date*

Leonard sees people the way they'll look when they die, but that's not the way he sees David Coulson, in town looking for someone. There's a reason Coulson appears different, revealed in 1. In 2 we're introduced to callous card shark Eddie and his nice, pregnant girlfriend. Coulson's purpose is the hook of Neal Shaffer's story, which would work better as a novel. There's a lot of space here, a lot of talking heads, and a lot of revisiting the same scenes. Daniel Krall's art has a distant European mood, reminiscent in places of a thinner-lined Marti, but doesn't enliven a dull effort.~FP

ONE POUND GOSPEL

Viz: *4 issue miniseries ('Round One') 1996*, 8 issue limited series ('Round Two') 1997*, 8 issue limited series ('Round Three') 1998**

Another whimsical manga soap opera from Rumiko Takahashi. It tells of omnivorous pugilist Kosaku Hatanaka, who has two obsessions in his life: food, and the lovely but virtuous Sister Angela, a young nun who has taken it upon herself to help him overcome his sin of gluttony and strive for victory. She dismisses Hatanaka's feelings for her as a mere infatuation, secure in her faith, but as time goes by, and she steers him through numerous crises both inside the boxing ring and out, she's forced to acknowledge that her love for him may not be entirely of the spirit. Devoid of any supernatural elements (unless one counts Christianity!), this lightweight romantic farce lacks the poignancy of the author's *Maison Ikkoku*, and the frantic energy of her *Ranma½* but remains a pleasing if insubstantial read. Unfortunately, *One Pound Gospel* is one of Takahashi's 'hobby' works – stories she goes back and tinkers about with in between bigger projects – so its publication schedule is erratic, and it remains unfinished to date.~HS

ONI

Dark Horse: *3 issue miniseries 2001*

There's a little of Judge Dredd's world about this future police state, but officer Oni is an altogether more sympathetic official. Her case involves a corrupt corporation, a massive power drain, and the appearance of ghosts throughout the city. David Land writes a fast-paced action adventure, and the stylish pencils of Sunny Lee appropriate a manga style, but add traditional US storytelling. The design is also noteworthy, with simple, clunky robots a feature, but that might be down to the video game on which this is based. Fun for anyone who enjoys a good action romp.~WJ

ONI DOUBLE FEATURE

Oni Press: *13 issues 1998-1999*

Oni lured some well-regarded creators to this Bob Schreck edited anthology, and by sticking to two strips an issue with an additional one-pager, readers following particular creators could feel they had at least half a good comic. Kevin Smith and Matt Wagner initiate a reasonable start as Jay and Silent Bob drug a dog. Then the Pander brothers offer us the pirate radio high jinks of 'Secret Broadcast' (1-2), simultaneously available on CD. Paul Pope's 'Car Crash'

(2-3) is a study of self-absorption in washed-out pencil and Troy Nixey's 'Bacon' is grotesque seafood horror (3-4). Bill Sienkiewicz offers up 'A River in Egypt' (4-5) in which two detectives trying to enforce a restraining order are constantly shot off the road. Zombie Kid (5-6) by Jim Mahfood ends in unrestrained violence and mayhem. Troy Nixey returns to illustrate P. Craig Russell's adaptation of Neil Gaiman's 'Only the end of the World Again' (6-8*), a werewolf come *Twin Peaks* come H.P. Lovecraft sort of thing. 'Satchel of Weltschmerz' by Jon Lewis and Tom Hart (8-9) features toes in rebellion against the rest of the body. 'Road Trip' by Judd Winick (9-10 and reissued as a one-shot), 'Drive-By' by Steven T. Seagle and Jan Solheim (10-11) and 'The Holy Rollers' by Paul Dini and Tom Fowler (12-13) are 'real-life' dramas, but not especially good. Chynna Clugston-Major provides a homage to Buster Keaton in a one-issue Blue Monday strip (11) and Kevin Smith returns in 12 with an incomplete Bluntman and Chronic strip drawn by Mike Allred. Paul Dini's second strip in the final issue is the introduction of Jingle Belle, Santa Claus' only daughter, with artwork from Stephen DeStefano.

Of note amongst the one-pagers are 'Milk 'n' Cheese' by Evan Dorkin (1), Shannon Wheeler's Too Much Coffee Man (2), Cheetahman by Mike Allred (4), 'Double Feature' by Ed Brubaker (5), Sam & Max by Steve Purcell (10), Usagi Yojimbo by Stan Sakai (11) and 'The Harpooners' by Sergio Aragonés (12). It's difficult to give any unqualified recommendation. Smith, the Pander brothers and Mahfood have a similar, punk attitude, Blue Monday and Jingle Belle are both very entertaining explorations of teen life (though in quite different ways), and there's something of interest in most issues, but only Pope really offers comics above the ordinary. For the rest, there's humour, horror, and some challenging artwork from Sienkiewicz and Nixey.~NF

ONI PRESS Summer Vacation SUPERCOLOR Fun Special

Oni Press: *2 issues 2000-2001*

This is a useful and great looking introduction to lots of Oni writers and artists. In the first issue, some of the strips, such as those by Andi Watson and Scott Morse, look better than they read but, under a Michael Allred cover, there is also an inspired 'Big Monster Planet' by Martin Ontiveros, Paul Dini's Jingle Belle, about what Santa Claus's daughter gets up to while he is on his summer holiday, and Jim Mahfood's cute Smoke Dog in a forlorn search for Waffles. The disappointing second issue (Oni Press Color Special) is notable only for Brian Michael Bendis and Michael Avon Oeming's funny Powers strip, in which they investigate the death of Allred's Madman, and a wonderful wordless short, 'Adventure #206', about children's imaginative play, written and painted by Tom Fowler.~GK

Recommended: Supercolor Fun Special

ONIGAMI

Antarctic: *3 issue miniseries 1998*

This is a sequel to the 'Winter Jade' storyline in *Warrior Nun: Black and White* 4-6, and creator Michel Lacombe certainly throws the reader straight into the deep end in terms of what has gone before. Police Chief Masaomi Oga returns to the scene of an assassination and willingly becomes possessed by the spirit of the dead man. This is Sho Yoshida who conjured the power of some dying Oni (demons) in order to avenge the death of his parents at the hands of Yakuza boss Masaru Tomino. Part ghost story and part classic revenge thriller, there are a number of plot elements that at first seem thrown in rather haphazardly. That said, there's some promise in the storytelling and delicate, detailed pencils, although faces tend to be too static.~NF

ONSLAUGHT Epilogue

Marvel: *One-shot 1997*

The X-Men's Professor Xavier had a profund, albeit temporary, effect on the Marvel Universe in 1996, initiating Onslaught. The result sprawled across Marvel's titles, but this finale, with the Professor incarcerated in a top secret facility, is a tidy and well conceived story, no doubt setting up future events.~WJ

ONYX OVERLORD

Marvel/Epic: *4 issue miniseries 1992-1993*

A tale of Moebius' Airtight Garage, with story by Moebius but script and art by others. Two characters are trying to save the Airtight Garage from the Onyx Overlord, but their efforts are hampered by the fact that they've stumbled into an area of alternate realities, which basically means a lot of rushing around, leaping from steam trains while pterodactyls fly overhead. The artwork's attractive, particularly the colouring, but the story is weak and muddled.~FC

OPEN SEASON

Renegade: *6 issues 1986-1988*
Strawberry Jam: *1 issue (7) 1989*

Domestic comedy that begins with the unprepossessing Jim moving into a new flat at the invitation of Cliff. Jock of the Year Cliff neglected to mention this to already-in-place flatmate Robin, a woman with the ability "to piss people off with little effort at almost any time". *Open Season* is an impressively mature title, as creator Jim Bricker brings a hint of Jules Feiffer and more than a little Berke Breathed (implicitly acknowledged) to both his art and his writing. He takes on board more influences as the title progresses, and having sketched his cast exceedingly well from the off, he manoeuvres them effortlessly and mercilessly through plots that reveal different and surprising facets of each. The series was briefly adapted for the stage (although a one-shot adapting the play was solicited but never published). Also of note are back-up strips by the equally talented and largely unknown Basilio Amaro (2) and Doug Gray (7).~FP

Recommended: 2, 3, 5-7

OPEN SPACE

Kurt Busiek shepherds a squad of creators through a series of tales set in a universe where a trans-galactic travel occurs as a result of a feud between rival families. The Etchisons and the Bradys act as link protagonists for a very disparate bunch of uninspired science fiction short stories from such varied creators as Ray Lago, Tom Grummett, Paul Chadwick, Norm Breyfogle and Steve Yeowell. An issue zero was released to capitalise on the success of Alex Ross, and features his story from the never published number 5.~WW

OPERATION STORMBREAKER

Acclaim: *One-shot 1997*

Continuing the series of Acclaim's "event" one-shots offering glimpses into pivotal events in their superhero mythos, this one introduces Doctor Tomorrow prior to his limited series and bands together a group of superheroes to fight the Nazis. Mark Waid and Brian Augustyn turn in an enjoyable slugfest with crowd-pleasing knowing references to future continuity, while the art from Dougie Braithwaite and Robin Riggs is top notch.~WJ

OPERATOR 99

Comics Conspiracy: *One-shot 1999*

Gloomy and wordy comic revealing all those military/commercial interest conspiracy theories you've heard whispers of are actually true. Belle Sands finds out the truth first hand, but can she put a dent in the plans? Very much in the Image/Top Cow style, and produced to that quality, this is connected with, and uses some of the same characters as *The Exec* and *Taxman*.~WJ

OPPOSABLE THUMBS

Alternative Comics: *1 Volume 2001*

Artist Dean Haspiel enters the world of autobiographical, slice of life comics with a selection of short, introspective but ultimately unimpressive tales from his life. Lovers of the genre will approve but there's nothing special to capture the casual reader. Still, the potential is there…~WW

OPTIC NERVE

Drawn & Quarterly: *8 issues + 1995 to date*

Optic Nerve first saw light of day as increasingly lavish minicomics from the then teenaged Adrian Tomine (collected as *32 Stories*). Each Drawn & Quarterly issue occupies the ground somewhere between Jaime Hernandez, Dan Clowes and Chris Ware. Visually Tomine superficially resembles Clowes, but has an impressive grasp of storytelling and is an impressive draughtsman in his own right. While these tales of student romance, urban angst and teenage ennui have the ring of truth to them, they aren't overtly autobiographical, but are compelling, almost voyeuristic, glimpses into other peoples lives. Standouts include 'Dylan and Donovan' in 3, where two teenaged sisters try to come to terms with their divorced father on a cross-country drive, and 'Fourth of July' in 4, superbly conveying the pain and confusion of a child trying to understand the adult world around him. Tomine has continued to grow as a cartoonist and his explorations into alienation and desire, particularly 8's 'Bomb Scare', with its masterful depictions of high-school outsiders, are among the finest comics being published today.~DAR

Recommended: 1-4*, 6-8

ORB

Orb Publications/Productions: *6 issues 1975-1976*

A well-produced magazine-sized anthology, marking a milestone in Canadian comics. While the contributors generally lack that final professional polish, few are outright bad, and among the later known talents who had their first serious work printed in *Orb* are Jim Craig, Gene Day and Ken Steacy, while Peter Hsu is also represented. Day in particular improves issue by issue, as does the comic, a mixture of horror, and offbeat superhero and martial arts strips. One of Canada's earliest superheroes Northern Light runs from 2, but the overall highlight is an eight page strip drawn by the all too rarely seen Bill Payne in 6.~FP

ORBIT

Eclipse: *3 issues 1990*

Adaptations of prose fiction to comics generally result in dashed expectations. To those who know the stories the thrill of seeing them visualised is usually offset by the disappointment incurred by the necessary contractions. Those unfamiliar with the original work have very little reason for sampling, leaving only staunch fans of the artists concerned likely to be happy. So it is with *Orbit*, in which stories originally published in *Issac Asimov's Science Fiction Magazine* are realised by artists of the quality of John Bolton and Tom Yeates. Both feature in 3, along with John Estes illustrating one of Asimov's better-known stories 'The Last Question', making the best sample.~WJ

The ORDER

Marvel: *6 issue miniseries 2002*

Continuing the storyline from the finale of the second *Defenders* series, Jo Duffy joins Kurt Busiek to help explain how the original Defenders (Doctor Strange, Hulk, Sub-Mariner and Silver Surfer), decide that in order to protect the world they need to bring order to it, with themselves as leaders. The idea, apparently, being to ensure that they cannot be disturbed by world-threatening events, if there aren't any. They're clearly not in their right minds, but the rest of the world's superheroes attack them anyway with only Nighthawk, Valkyrie and Hellcat attempting to stop them by arranging for their feminine sides to be brought into play (Clea, She-Hulk, Namorita and Ardina that is). Five different pencillers attempt to make sense of this excuse for lots of fights, but nothing can redeem a series that makes such extensive use of the offensive Papa Hagg, Nighthawk's spiritual adviser.~NF

Tales of ORDINARY MADNESS

Dark Horse: *4 issue miniseries 1992*

Writer Malcolm Bourne, a psychiatrist by trade, turns in a surprisingly naïve and simplistic view of mental illness. This slice-of-life look at a young doctor's reactions to other people's mental decay, and the tragic route his empathy leads him down, could have been much more powerful, but as it is, it comes across as stolid and patronising. Fans of Michael Allred's art might be interested, but leave your expectations at the door.~HS

ORIGIN

Marvel: *6 issue miniseries 2001-2002**

For over twenty-five years Wolverine's origin has been shrouded in a mystery of fleeting, false and inconclusive clues dispensed to readers on a slow drip feed. The hype had been orchestrated to such a crescendo that Marvel were rumoured to be fearful of providing a definitive resolution lest it prove anticlimactic, but the *X-Men* movie changed everything. Realisation dawned that unless Marvel delivered the goods, Hollywood would pre-empt them. Thus in 2001 a big gun committee of Bill Jemas and Joe Quesada co-plotted with Paul Jenkins who also scripted. They did not disappoint. Beautifully measured pacing unambiguously confronts the long standing mysteries of Logan's age and whether Sabretooth is his father. The story is also outstanding in its own right, redolent of pathos, tragedy and charm. Cunning misdirection reveals surprises as early as issue 2 and the narrative closes at Logan's adolescence, with no hint of an adamantium bonded skeleton in sight, thus inviting a sequel. Andy Kubert's pencils and Richard Isanove's digital painting flow seamlessly to produce a package surpassing the high expectations.~APS

Recommended: 1-6

ORION

DC: *25 issues 2000-2002*

Too many revivals of Jack Kirby 1970s DC characters have fallen foul by treating them as part of the superhero genre. The New Gods, The Forever People and Mister Miracle were never superheroes. They were modern myths, gods above and beyond the mortal world, and it needed a creator of Kirby's stature to pull this off. The sheer sense of wonder, of power, of scope contained in the concepts is virtually impossible for creators of lesser ability (i.e. everyone) to harness, but Walt Simonson comes close in this tightly plotted solo outing for New God Orion. Simonson explores familiar themes: the eternal struggle between good and evil and whether where Orion stands or falls is determined more by his bad Apokolips genes or his good New Genesis upbringing, but few writers between him and Kirby have captured the essence of the character so well. As with Kirby at his best, there is always a sense we are witnessing something much, much greater than us at play, a tale of biblical proportions as well as allegories. No Kirby fan could possibly resist the chance to accompany Orion on his Odyssey of self-discovery, his journey to the very depths of his soul and some shocking revelations on the nature of the anti-life equation so important to the Fourth World mythos. The series' ending, which questions whether our lives should be seen as a destiny we cannot escape, is predictable, but nonetheless an intelligent use of the characters and concepts that are often seen as the purest of Kirby's visions. The closest anyone has come to a true revival of the Fourth World. 1-5 are collected.~JC

Masamune Shirow's ORION

Dark Horse: *6 issue miniseries 1992-1993**

Over-exaggerated, vomit-inducing, saccharine whimsy is blended with the manga standbys of scientific technobabble and mystically summoned demons for a story set in the Orion galaxy. Shirow's artwork is adept in both cartoon and pseudo-realistic modes, but the slapstick Japanese humour doesn't translate well, and his cutesy heroine Seska is irritating beyond belief. *Orion* is very highly regarded, and the background detail is immense, so those predisposed to Manga might consider investigating, but it won't make any new converts.~WJ

Batman: ORPHEUS Rising

DC: *5 issue miniseries 2001-2002*

Mob boss Rasputin is fighting with street gang the Deacons over territory at the same time as a series of cop shootings. Orpheus, apparently one of a group of mystery men operating near Washington D.C., arrives in Gotham to represent 'people of colour' as Chief Esterhaus makes plans to crack down on the gangs. This is a straightforward team-up between Batman and Orpheus, with all of the expected threats from the former about Gotham being his town, and little chance for Orpheus to impress as an individual character. However, it's not badly told by Alex Simmons and Danny Miki's inks over Dwayne Turner's pencils soften the angular artwork.~NF

THE OTHERS

Image: *4 issues (0-3) 1995*

There's this race of humanoids under the Earth, all descended from different kinds of animals. There's a bull, a few dinosaur types, goats, birds etc., so it's rilly cool, and the guys all look like the animals and the chicks are all, like, total babes. Forget the funny ears and see their gazongas! And you almost do a couple of times, 'cos there's not much covering their lady bumps. First the animals beat up on the humans, and then on each other, with this big fight between the wolfman and the cockroach in 3. I reckon all the creators must be fourteen 'cos it's mega.~FP

OTIS GOES HOLLYWOOD

Dark Horse: *2 issue microseries 1997*

Otis Pedblocker, mild-mannered abattoir worker, after a fleeting flirtation with the world of performance art, is snapped up by a Hollywood talent scout to make action movies, and unexpectedly reunited with his identical twin, the porno star. Fans of Bob Fingerman's skilfully malicious work on Minimum Wage and his intelligent, thought-provoking *White Like She* will be disappointed in this heavy-handed gory satire.~HS.

OUR ARMY AT WAR

DC: *301 issues 1952-1977*

As DC's flagship war title, *Our Army at War* not only outlasted its companions (in one form or another), but in Sgt Rock it also presented the genre's most important character. In keeping with their fellow DC war titles 1-80 comprised short one-off strips initially drawn by company stalwarts such as Carmine Infantino, Gil Kane, Bob Oksner and Gene Colan. EC regular Bernie Krigstein was an early contributor, with beautiful work in 8-11, 13 and 14. Gradually the company's regular war-story artists arrived, and issues from 32 on are predominantly drawn by Joe Kubert, Irv Novick, Mort Drucker, Jerry Grandenetti, Russ Heath and the team of Ross Andru and Mike Esposito. As ever, the standout artist was Drucker, who produced a substantial body of work here in 2, 7, 25, 29, 37, 41, 67, 68, 70-72, 76, 79, 82. 83, 87, 96 and 100. The principal writers were Robert Kanigher, Ed Herron, Bob Haney and Hank Chapman, assuring that pretty much every issue contained entertaining, if rarely exceptional, stories, and artistically there's barely a bad issue among them.

From 61 the title occasionally featured the adventures of Easy Company, and 81's 'Rock of Easy Company' by Haney, Andru and Esposito starred a Sgt Rocky, and gave a glimpse of what was to come. The real Sgt Rock first appeared two issues later in 'The Rock And The Wall', by the definitive team of Kanigher and Kubert. Over the next few years Rock's colourful battalion was introduced, until Easy Company consisted of Bull Dozer, Zack, Wild Man, Ice Cream Soldier, Jackie Johnson and Little Sure Shot. Rock himself was the perfect Sergeant, gruff but compassionate, possessing a keen battle sense, but ultimately vulnerable, and above all tough! The Rock stories to 96 have been collected in *Sgt Rock Archives* vol 1.

For the most part Kanigher's early stories were quite realistic, and Easy's new recruits, though never the regulars, suffered from a frighteningly high mortality rate. Occasionally, however, his quirkiness got the better of him, notably in 124, in which Rock is brainwashed into thinking he's a Nazi, and 146, which had a story narrated solely by Easy Company's guns. Kanigher's nadir (or peak, depending on one's taste for the bizarre) was in 162-163, teaming Rock with medieval Viking Prince. 158 had the creation of Rock's nemesis, the Iron Major, named for his metal hand, who would periodically reappear to great effect. Another notable tale starred Easy's only black soldier, Jackie Johnson, an ex-boxer, involved in a fight with the star Nazi sparrer. The anti-racist message was thunderously obvious, right down to the inevitable climax of Jackie having to give his injured opponent a blood transfusion, but the story was no less powerful for it.

As issues prior to 100 had revelled in a succession of fine short stories, back-ups after then were surprisingly mediocre. Notable exceptions were art jobs by Heath (104, 120), Colan (169, 173) and some glorious work by a young Neal Adams in 182, 183 and 186. More significantly, 151 introduced the world to another great Kanigher/Kubert creation, the Enemy Ace, also in 153 and 155, who went on to greater things in Showcase and Star-Spangled War. Creatively the Sgt Rock strip was largely stable throughout the 1960s. In fact from 83 to 193 Kanigher only missed one issue (86, by Haney). Artistically, Kubert produced a vast body of work, although he, at least, needed the occasional break and Novick (84, 106), Grandenetti (88, 89, 123) and Heath (108, 118) all pitched in. At one point, however, Kubert began work on the 'Green Berets' newspaper strip, which owed a lot to Sgt Rock, and Heath admirably took over for 172, 175, 178, 180-183, 185 and 187, giving a taste of what was to come.

A major turning-point came with Kubert replacing the long-serving Kanigher as editor. While essentially a realistic strip, Sgt Rock had long had its faults, typified by Easy Company's tendency to punch out the enemy on a regular basis in ever more fevered tableaux of fisticuffs. While never less than professional, Kubert's mid-1960s strips had lacked the conviction of his earlier work, and the Heath issues had rather overshadowed him. With 196's 'Stop the War, I Want to Get Off', Kubert, acting as both artist and writer, delivered the series' first significant story. Decidedly unconventional, it was a look at the horror of war through the ages, and was immeasurably enhanced by its emotionally charged art, Kubert's best on the strip so far. From that point on Sgt Rock gradually became more realistic and Kubert's art returned to its typical high quality. It didn't last, though, with editorial duties meaning that Kubert gave way to Russ Heath with 208, although occasionally filling in to great effect (217, 220, 222, 224, 228, 233, 238). Heath is undoubtedly DC's most underrated artist, and seems quite incapable of drawing badly. Consequently each issue containing his work is worthy of a place in any serious collection. His draughtsmanship, story-telling and detailed inking style made for excellent artwork on every strip, and from time to time he was capable of almost superhumanly good art jobs that surpassed even his high standards; it is these that are recommended. 208 also saw Kanigher's position as principal writer usurped by Kubert, who, along with occasional scripts by Heath, wrote most issues until 230. After returning, Kanigher delivered one of his best-ever stories, 'Head Count', in 233, clearly inspired by the My Lai massacre. To further emphasise the title's anti-war tone, from that issue each strip would end with the legend "Make war no more".

Other notable stories of this period included Heath's magnificent solo job on 'Easy's First Tiger' in 244 and a continued Iron Major story in 251-253. Kanigher and Heath also excelled themselves in an extended continuity (256-260) that had Rock stranded in the South Pacific, though 247's Joan of Arc story was a return to the gimmicky days of old. Editor Kubert ensured that the back-up strips were of a similarly high standard, with contributions from Frank Thorne (199, 227, 236, 260), Wally Wood (249), Neal Adams (240) and Alfredo Alcala (251). As always, the great Alex Toth provided some of the title's finest back-ups in 235 and 254, particularly with Bob Haney's 'Dirty Job' in 241, which powerfully described the Crucifixion through the eyes of three Roman centurions. Generally, however, the back-ups were one of several alternating series, all of which were well crafted.

Ric Estrada's 'Great Battles' series ran occasionally between 213 and 224, and Estrada later went on to become principal artist on 'Robert Kanigher's Gallery of War', which ran from 251. It alternated with Norm Maurer's rather more factual 'Medal of Honor' series, which began in 233, and Sam Glanzman's 'U.S.S. Stevens'. Glanzman was a veteran sailor who was actually stationed on the real U.S.S. Stevens throughout World War II, and his stories were palpably autobiographical, mixing his punchy writing with a Kubertesque art style. It's every bit as good as the lead strip; any episode is worth looking at, with the series running in many issues between 218 and 298. The short-lived 'Sam Glanzman's War Diary' (242, 244, 266, 269) was, if anything, even more powerful, since it consisted of actual letters, translated into short strips, written by the artist during the war.

264 was the last regular issue by Heath, and, though always readable, later issues were never again quite as essential. Heath continued to draw the occasional story (268, 271, 273, 275, 277, 279, 281), for a while alternating with George Evans and John Severin (265, 272), but after his finale the strip was passed from hand to hand. Ric Estrada in 282 was inked by Kubert, Doug Wildey in 283-285 and 287 was hampered by spectacularly bad Mike Grell inking, and eventually Kubert settled on Frank Redondo, an artist very much in his own tradition. Redondo went on to draw the strip for almost ten years (although Kubert himself drew 300). From 302 the title became *Sgt Rock,* though in all other matters it was identical.

164, 177, 190, 203-205, 216 and 242 are all 100% golden reprints, and oversize issues 229, 235-241, 243-245, 269, 275 and 280 all mix new material with classic reprints.~DAR

Recommended: 8-11, 13, 14, 83, 151, 153, 155, 160, 182, 183, 186, 196, 233-235, 240, 241, 244, 248-260, 262, 279

OUR FIGHTING FORCES

DC: *181 issues 1954-1981*

The last and least of DC's major war titles, this nonetheless featured some fine material, but a higher percentage of dross than its companions. In common with them, though, it started by running short one-off stories, often composed around a particular theme each issue, and written and drawn by the same highly talented pool of contributors as worked on the other titles. As ever, the most outstanding art of this early period was that of Mort Drucker (10, 27, 28, 32, 36, 39, 42-44, 49, 53, 55), though a special mention should be made of former EC artists Wally Wood (10) and John Severin (32, 35, 37).

Our Fighting Forces' most prolific artist in the early days was Jerry Grandenetti, so not surprisingly he was assigned to draw its first regular series, 'Gunner and Sarge'. They'd débuted in *All-American Men Of War* 67 before transferring here to run between 45 and 94. Written by Robert Kanigher, it was a fast-moving, humorous affair that had a tendency to go way over the top. From 47 the two stars were joined by Pooch, their canine sidekick, which only heightened the strip's sense of unreality. Still, if you can overcome scenes like our heroes single-handedly blowing up a submarine (underwater, of course), the feature was undemanding fun. Grandenetti at his best could create wonderfully kinetic, expressionistic and powerful art, but he had a tendency towards over-cartooning, and visually the early episodes are by far the best. Other artists included Joe Kubert (51, 52, 74), Irv Novick (67, 68) and Jack Abel (85-94), the latter's contributions being woefully poor and heralding the comic's decline.

Gunner and Sarge was finally followed by Sgt Rock's brother Larry Rock, 'The Fighting Devil Dog' (95-98), and the ill-judged Vietnam strip 'Hunter' (99-107), both by Kanigher and Novick. Novick was soon replaced by Jack Abel, who teamed with Howard Liss to create 'Hunter's Hellcats', World War II strips of the same Lieutenant Hunter. The Hellcats were a bunch of former convicts, and the strip was every bit as unappealing as the premise suggests. Its only notable episodes were courtesy of fill-in artists Russ Heath (114) and Frank Thorne (115-117). Sadly none of the strips had much merit and probably the most outstanding element of this era was the occasional appearance of a Gene Colan back-up (86, 87, 95, 100).

Matters improved with 123 and the first instalment of yet another Kanigher series, The Losers. This brought together the team of Gunner and Sarge, Johnny Cloud (from *All-American Men Of War*) and Captain Storm from his own 1960s title, all losers of one sort or another, hence the name, although cynics might suggest that their main losses were their own strips. After a first instalment drawn by Ken Barr, Ross Andru and Mike Esposito became the art team. It wasn't until John Severin took over in 132 that the series really took off. Kanigher's early stories were jokey, insubstantial affairs, with the lead characters whining on about being losers; the turning-point was 135, where the female freedom fighter Ona was introduced and Capt. Storm was (temporarily) killed off. Subsequent episodes had significantly more continuity and 135-150 make entertaining reading, not least because of Severin's beautiful art. The improved lead feature was matched by a nice variety of back-up strips, including work by veterans Russ Heath (123, 130), Frank Thorne (136) and Severin himself in 124. Younger artists also cropped up, including Bruce Jones (139), Tom Sutton (144) and the underrated Ed Davis (150), but, as ever, the best strips were drawn by the wonderful Alex Toth (134, 144). In fact 'Burma Sky' in 146, a poignant tale written by Archie Goodwin about the Flying Tigers fighter squadron, is the finest war strip DC produced. Toth's art was quite breath-taking.

From 151 to 162 the comic was written and drawn by Jack Kirby, who promptly disregarded everything that had previously occurred in taking the Losers in another direction entirely. Kirby had little interest in continuity or characterisation here, and his writing was at times simplistic, although he did bring an astonishing vitality to the strip. On Kirby's departure Kanigher once again assumed control, this time with George Evans on art, but these were strictly by-the-numbers issues, and none were exceptional in any way.~DAR

Recommended: 10, 27, 28, 32, 36, 39, 42-44, 49, 53, 55, 123, 130, 134-150

OUR LOVE STORY

Marvel: *38 issues 1969-1976*

As with its sister title *My Love,* this series started out strongly, with brand-new stories by Marvel's top-line artists. John Buscema, Gene Colan and Don Heck all appear, but it quickly became a mixture of reprints and a showplace for newcomers (Al Weiss) or old-timers making a comeback (Tarpe Mills, in a peculiarly dated story in 14). It turned all reprint from 18, relying on Marvel's vast inventory of material to fill the pages and satisfy the dwindling romance market until it closed down. A sought-after issue is 5, featuring Jim Steranko's only known work on a romance story.~HS

OUR WORLDS AT WAR

DC: *10 issues (+ 23 tie-ins), Superman: Our Worlds at War Secret Files and Origins 2000*

A monolithic saga of alien invasion. *Superman* 151-153 and 159 introduced a cosmic entity called Imperiex with an agenda to unmake the universe. When a huge flotilla of alien refugees warp into Terran space Earth's heroes realise that they're in for the fight of their lives. The action takes place in ten specials suffixed *Our Worlds at War,* but divided in three discrete sections each corresponding to that month's tie-ins. *Green Lantern, Batman, Young Justice* are all coded as 'Prelude to War'. *JLA, Nightwing, JSA* and *Wonder Woman* are 'All-Out War' chapters and *Flash, Harley Quinn* and *Worlds Finest* are designated 'Casualties of War'. *Superman* 171-173, *Adventures of Superman* 593-595, *Action Comics* 780-782, *Man* *of Steel* 114-117, *Superboy* 89-91, *Supergirl* 59-61, *Wonder Woman* 171-173 and *Young Justice* 35-36 all tie-in to the story.

It is ambitious, as these things always are, but practically all flash and dazzle with little more than posturing and gratuitous shock tactics. One notable exception is the *JSA Special* by Geoff Johns and Javier Saltares, where President Luthor reactivates the World War II All-Star Squadron, which translates as everyone who's ever been connected with the Justice Society of America, for a do-or-die mission. It's to destroy Imperiex's planet-sized supply factory. This thriller combines drama, pathos and all-out stirring, patriotic action in a manner seldom seen in today's instant gratification comic adventures. Also of note is the *Harley Quinn Special*, which concentrates on a relatively quiet subplot as Quinn escorts Jimmy Olsen, burdened with the secret of how to defeat Imperiex, through war-torn America to the safety of Metropolis. It's illustrated by a host of alternative comics talent such as Paul Grist, Paul Chadwick and Amanda Conner. Your scorecard will need a scorecard.~WW
Recommended: *JSA: Our Worlds At War*

OUT FOR BLOOD

Dark Horse: *4 issue miniseries 1999*

By the numbers tough cop and sexy student versus gangster vampires and lycanthropes, scripted by Michael Part and Stephen Grant. Black and white exposes the weakness of Gary Erskine's stiff illustration with much dodgy perspective work, which is cannily hidden behind decent colour covers by Kelley Jones in the style, right down to the signature, of Berni Wrightson.~GK

OUT OF THE VORTEX

Dark Horse: *12 issue limited series 1993-1994*

Disappointingly ponderous conclusion to *Comics Greatest World*'s introduction of a new world of superheroes. A shaggy dog story is padded over a dozen issues, and after the final issue you'll probably wonder why you bothered with any of it. If you really like the characters introduced in *Comics Greatest World*, then plenty feature here, but avoid otherwise. There's a continuation of sorts in *Dark Horse Presents* 144.~WJ

OUT OF THIS WORLD

Charlton: *16 issues 1956-1959*

One of the titles from Charlton's late 1950s push that briefly made them the biggest comic publisher In the USA. Besides the usual low quality Charlton regulars, *Out of this World* features a large number of Steve Ditko science fiction and suspense strips in 3-12 written by the likes of Ernie Hart, Joe Gill, Carl Memling and Ralph Newman. Points of interest include the atomically mutated brains in 3's 'The Supermen', 'River's Wrath' in 6, a tale of flood disaster probably written by Ditko, and 7's 'Through the Walls' where an unjustly imprisoned man leaves his body as a white ghostlike form just as Dr.Strange would do 5 years later. 'From All Our Darkrooms' in 4 and 'Journey's End' in 9 both feature plot elements re-used at Marvel in the 1960s. The best covers are invariably by Ditko too, particularly 11's space gun. 7 and 8 are 68 page issues. In 1989 Robin Snyder published a black and white, digest-sized collection of 13 Ditko stories from this comic. Any Ditko enthusiast would enjoy this collection.~SW
Recommended: 5 and the collection

OUT OF THIS WORLD

Malibu: *One-shot 1989*

The value of this publication is in reprinting two Everett Raymond Kinstler stories from the 1950s *Strange Worlds* 6 and 9, although the issue 6 strip is taken from the 1958 reprint *Strange Planets* 16. Kinstler was one of the few top notch artists of the period who didn't end up working for EC. His ornate style was influenced by the illustrations of Charles Dana Gibson and James Montgomery Flagg, and his craftsmanship shines through even on these stories hacked out by the writers. The only other item of note is very early cover artwork from Bruce Timm.~FP

OUT THERE

Cliffhanger: *15 issues + 2001 to date*

Brian Augustyn and Humberto Ramos obviously watched a few too many episodes of Buffy the Vampire Slayer, but that's not automatically a bad thing. This finely tuned and entertainingly diverting series follows the fortunes of four teenagers: prom queen, jock, geek and indie goth girl before you think any unnecessary originality might have crept in. They discover that the adults of their small American town have made a deal with demons in order to maintain law and order. Thus begins a round of demonic showdowns, general weirdness and a roadtrip across America under the guardianship of a female preacher and a mute war veteran. It's all good clean fun, although its blatant Christian undertones can be somewhat grating if you're not a believer yourself. Pray to God hard enough and you beat any demon bad guys, kids. Nothing to really dislike about it, though, and it is nicely drawn.~JC

The OUTCAST

Valiant: *One-shot 1995*

The introduction of a new character to Valiant's continuity. Former A-grade student Lenny is retarded after an accident, but, as compensation for his reduction in mental acuity, he can transform into a nine-foot superstrong creature. In addition to a nod in John Steinbeck's direction, Lenny's home town is called Valiant. It's all competently produced, and might have had a greater resonance had Valiant's entire line not been cancelled soon afterwards.~WJ

OUTCASTS

DC: *12 issue limited series 1987-1988*

When all around them were turning out grim, gritty and 'realistic' titles, the writing team of John Wagner and Alan Grant put the comedy back into comics. *Outcasts* is hilarious, packed with black humour, funny dialogue and enough good ideas to keep lesser writers in plots for years. It starts slowly as the team is formed to combat administrative corruption after the assassination of a leading political figure. Once the plot is set in motion, though, the characters take over, and it's fun, fun, fun all the way. Top moments include Al the Human Anaconda (2), trench-coated robot assassins The Satan Brothers (6, 10-12), punch-drunk former Slaughterbowl player B.D. Rickenbacker having to re-form the team with old colleagues (7), Suicide Park (9), and surely the only hero in a bucket ever. And there's plenty more where that lot came from. Artists Cam Kennedy and Steve Montano depict the ongoing lunacy in magnificent fashion, and the surviving Outcasts cross paths with the Satan Brothers again in the *Lobo* miniseries 'UnAmerican Gladiators'.~FP
Recommended: 6-12

Bruce Jones' OUTER EDGE

Innovation: *One-shot 1993*

Four short science fiction/horror stories, written and drawn by Bruce Jones. They're well drawn, in a Wrightson-esque style though 'The Secret Place' is equally reminiscent of Al Williamson in its detailed forest setting. All stories have a twist ending, whether it be a comedy comeuppance, redemption, or ironic. Only the third is really successful, in which a mute boy develops a friendship with creature that then appears to be killing his tormentors.~NF

OUTER SPACE

Charlton: *9 issues (17-25) 1958-1959*

This carries on the numbering of *This Magazine is Haunted* and in its brief run featured the usual poor quality Charlton science fiction fare, written mainly by Joe Gill. As usual the strips drawn by Steve Ditko, in 18-20, stand out.~SW

OUTLANDER

Malibu: *4 issues 1987-1988*
Eternity: *2 issues (5-6) 1988*

Surprisingly well-conceived and interestingly executed thriller concentrating on Adam Gallow, the Outlander of the title. He's been trained by The Institute to become their foremost weapon, but rejects the idea and breaks loose. As he searches for Cassandra, a powerful empath, so he's stalked by The Institute, which isn't about to give up on their prized asset so easily. If not entirely successful, writer Scott Finley is attempting a little more than the recycling of old ideas, and the same can be said for artist Brooks Hagan, whose style is seemingly European-influenced. Try 3, in which Gallow's participation is minimal, as Cassandra encounters a mad motorcyclist.~FP

OUTLANDERS

Dark Horse: *34 issues (0-33), 1 Special 1988-1991**

When the Earth is invaded by its original inhabitants, the Santovasku Empire, who believe that humans are little more than vermin polluting their Sacred Mother Planet, there's a faction within the military establishment who seem to have been expecting their return. Tetsuya, a photographer, finds himself in the company of the invading emperor's runaway daughter Kahm, and Outlanders is principally the story of their romance, set against the backdrop of the Earth's desperate defence as loyalties shift on both sides.

Truly epic in scope and vision, Johji Manabe's storytelling is pacey where it needs to be but full of humour and character that counterpoints what might otherwise be a grim tale. More space opera than hard science, it's still innovative and colourful. Issue 0 (1992) is a one-off Kahm (mis)adventure set before she arrives on Earth; the 1993 special stars Battia, Kahm's best friend. *Outlanders Epilogue* (1994) is the strip's final appearance, a moving reunion between the survivors of the war and the spirits of those who died.~NF

OUTLAW KID

Atlas: *19 issues 1954-1957*
Marvel: *30 issues 1970-1975*

Mild-mannered Lance Taylor's father has him to swear on his mother's grave that he will never stoop to violence, much to the dismay of girlfriend Belle Taylor. Lance takes to dealing with the troublemakers of Caliber City as the masked Outlaw Kid astride his horse Thunder. The stories are all five to seven pages long and as such are very one-dimensional. The feature's main artist Doug Wildey relies heavily on photo reference, which makes for a lack of dynamism, but his skills as a draughtsman still impart a great consistency to the feature. There are also numerous non-feature shorts by the likes of Al Williamson, John Severin and Joe Maneely. Marvel started a reprint title in 1970 running mostly the Wildey strips behind garish Herb Trimpe covers, but there's also a new two page story by Bill Everett in 2. In 10-16 new stories established the Kid as a misunderstood Robin Hood-style character. The lacklustre art was by Dick Ayers and Mike Friedrich did an enthusiastic, if a little clumsy, job of writing 10-12 before Gary Friedrich (no relation) took over with 13... unlucky for some. Later issues were reprints of the reprints followed by reprints of 10-12.~SW

OUTLAW NATION

DC/Vertigo: *19 issues 2000-2002*

The Johnsons are a dynasty of American misfits, ranging from killers and misanthropes to cranks and crazies. Old man Asa Johnson is an industrialist who spends his time being preserved by pin-up nurse Dolores. His son Story is the alternative good guy, an adventure writer, managing to stumble over most branches of his family except his son by the forthright Ruth 'Sweetcakes' Hoag. Young Sundance – or Sonny – McGee has married Rosa Cao-Tri who gives birth to another generation in 18. Story's half-brother is a psychopathic killer and sexual deviant known as Mister Gloves whose excesses border on the humourous. Naturally there's a policeman involved too, the aging Sheriff John Law. All the family members gradually accumulate for a climax at Old Asa's hollowed out mesa headquarters in 19.

There's a suitably organic nature to Jamie Delano's plot and the writing is very well-balanced. The opening sequence where Story is writing a distinctly purple memoir still retains some genuine passion as he remembers his Vietnamese wife "War Baby" being killed by a landmine. To begin with the artwork is by the excellent Goran Sudzuka, inked by Sebastian Camagajevac in 4-8. In 9 Goran Parlov takes on the pencils with Sudzuka inking with no loss of style or clarity. Well written, well drawn – well, what are you waiting for?~SW

OUTLAW 7

Dark Horse: *3 issue miniseries 2001-2002*

In a fantasy world a group of heroes gather to protect a young man who's destined to wield great power against the darkness that threatens the land. Many characters are introduced, one of whom doesn't survive, but the frenetic pace allows little room for characterisation though some imagination is shown in the set up. Otherwise, Logan Lubera's superheroic fantasy quest is like many another (though lead Bayman Ford is a very dull character) and only begins to examine relationships and origins. Lubera's bumpy, stylised artwork, is similar, but inferior, to Joe Madureira's.~NF

OUTLAWS

DC: *8 issues 1991-1992*

Michael Jan Friedman's intelligent script, set in a dystopian feudal society following a plague, uses elements from versions of the *Robin Hood* story but gives it a twist by making protagonists aware of the fact that they are aping the actions of a legendary hero. Unfortunately, Luke McDonnell's artwork is scratchy and unappealing. If the script aspires to Richard Carpenter's *Robin of Sherwood* the artwork's sub-Kevin Costner.~NF

The OUTSIDERS

DC: *Series one 28 issues, 1 Annual, 1 Special 1985-1988, series two 26 issues (0, 1Alpha, 1Omega, 2-24) 1993-1995*

Moribund superteam comprising old failures such as Black Lightning and Metamorpho and all new no-hopers Halo, Katana, Looker and Geo-Force that struggled to find its place after the subtraction of the prefix *Batman and...* . Replacing the Batman team-up title with a series dedicated to a new squad of 'outlaw' heroes was always an uncomfortable mix, and eventually led to the separation of leader and team. As part of a marketing experiment DC created a higher production values version called *The Outsiders*, set one year ahead of then current continuity. Mike W. Barr and Jim Aparo switched to the new title leaving Barr and Alan Davis to continue on the regular comic, retitled *Adventures of the Outsiders*. Given the arena of a presumably more sophisticated and dedicated audience, there was actually a drop in quality for the content as second rate stories were given the undeserved glamour of glossy packaging and fancy foldouts. In drab succession the robotic Nuclear Family and Duke of Oil were trashed, evil commies Bad Samaritan and Peoples Heroes were sent packing and staple villains such as Eclipso and Kobra made brief trouble for our vagabond band. The only redeeming feature for many issues was guest artists on short back-up features such as Brian Bolland (6, 18) or Jerry Ordway (10), John Byrne (11) and Steve Ditko (13). In marked contrast, the annual, with artwork by Kevin Nowlan, is a sharp, taut thriller featuring Kobra at his spooky best, making the regular issues even poorer by comparison. Reintroducing Batman in the latter days didn't help and the series was killed as part of the *Millennium* crossover event.

The second series revived the surviving heroes, supplementing them with a smattering of new characters, but the result was much the same. Splitting into two teams, necessitating a pair of first issues with some different pages in each, the heroes find themselves framed for various evil

---

* Available in a collected edition

deeds they did not do and must strive to clear themselves. Despite numerous guest shots from DC big shots, it 's as bad as it sounds. A pitiful waste of talented creators.~WW
Recommended: Annual 1

OVERTURE!

All-American: *2 issues 1990*

Last seen in their own title, the misfit Lunatic Fringe have a member abducted, and quarrel all the way to the rescue, while *Popeye* is a major influence on the Sputnik feature. The mentally challenged Blatherskite rounds out the first issue. George Broderick is a good, adaptable cartoonist on all features, and there are a reasonable amount of laughs to be had.~FP

THE OWL

Gold Key: *2 issues 1967-1968*

1940s hero in a grey costume is revived, given a camp workover and relaunched to cash in on the *Batman* craze that's sweeping the USA. Feeble stuff that falls shy of being so bad it's good.~FP

OWLHOOTS

Kitchen Sink: *2 issues 1991*

Unfinished attempt at something different by James Vance and John Garcia. Illustrated as though a series of sepia photographs, the story explores the relationship between early cinema and the Western heroes who were starting to feel out of place in an increasingly 'civilised' world and found a ready audience for their stories in Hollywood.~NF

OZ

Caliber: *21 issues (0-20), 4 Specials 1994-1997, 3 issue miniseries ('Romance in Rags') 1996, 3 issue miniseries ('Straw and Sorcery') 1997*
Arrow: *5 issue miniseries ('Dark Oz'), 1 Special 1997-1998*

A magical tome transports three adolescents and the obligatory dog to the land of Oz, several years after Dorothy's jaunt. The land is now dark and foreboding. Evil rules in the form of the Nome King. The original heroes are under his thrall. Writers Stuart Kerr and Ralph Griffith extrapolate from Frank L. Baum's concepts, introducing new, fantastic creatures and endowing them with much of the charm of the original stories. 1-15 form a tightly plotted continued story in which the new heroes trigger the revolution to restore to Oz all that is good and right, so it's a shame only 1-10 and the specials are collected. Although rather stiff at first the story does grow on you, albeit hampered by some questionable plot developments and Bill Bryan's art, which is too cluttered for a black and white production. Much care and thought has gone into this classically styled fairy tale, which is suitable for young and old kids alike. The double-sized 17 has a full-length 'Boston Bombers' back-up strip. 16 starts a new story arc in which the Earthlings go home and a liberated but weakened Oz must fend for herself against the gathering menaces of the Goblin King, Wicked Witch and Quadlings. This plotline is in need of tighter control. After premature cancellation with 20, the story continues in Arrow's *Dark Oz* miniseries. This lives up to its name as the skirmishes escalate into full blooded war. In the finale, many heroes die and *Dark Oz* 5's confrontation between the Wickedest Witch and Queen Ozma is little short of cataclysmic.

'Romance in Rags' is a tale of courage and sacrifice featuring Scarecrow and his fair lady, Scraps the Patchwork Girl, set during the time when Scarecrow was under the Nome King's thrall. Issue 1's cover shows just how good Bill Bryan's art looks in colour. 'Straw and Sorcery' features more of the same, but fails to advance the plot one single iota.

The cover month policy (there aren't any) and numeration (all the Specials are numbered 1) create a nightmare for back-issue readers. The internal chronology is: issue 0, *Scarecrow Special, Lion Special, Tinman Special, Freedom Fighters Special*, Romance in Rags miniseries 1-3, 'Straw and Sorcery' miniseries 1-3, regular issues 1-20, *Dark Oz* 1-4, *Wogglebug Special, Dark Oz* 5. All bar the regular issues and Dark Oz are second-string, unessential background reading.~APS

OZ Graphic Novels

First: *4 volumes 1986-1988*
Dark Horse: *1 volume 1992*

Eric Shanower produces some excellently drawn and decently told new stories of the Oz mythos. The characters he creates are imaginative, and interact well with the cast from the novels (rather than the film), and his plots are faithful to the mood established in them. Where Shanower is perhaps even better is invoking a lump in the throat. The best of the run is *The Enchanted Apples of Oz*, wherein the secret of Oz's magic is threatened, but Oz fans should also enjoy *The Ice King*, and *The Secret Island. The Forgotten Forest of Oz* is equally good, but concentrates more on Shanower's cast at the expense of those of Oz creator Frank Baum. When First collapsed, Shanower had almost completed *The Blue Witch of Oz*, answering the question about why there's no Good Witch of the East. It maintains his high standards.~FP
Recommended: 1-4, *The Blue Witch of Oz*

OZ SQUAD

Brave New Worlds: *Series one 1 issue 1991, series two 3 issues 1992*
Patchwork Press: *10 issues 1994-1996*
Millennium: *1 Special 1995*

In this controversial reworking of Frank Baum's Oz characters, Earth and Oz have a diplomatic relationship. The Tin Man, Lion, a manic-depressive Scarecrow and a fully grown and proactive witch Dorothy are now CIA agents. So what is it about this potentially ridiculous concept that attracted three publishers? Well, it's well drawn by the team of Andrew Murphy and Ande Parks to start with, and Terry Loh develops into a very good artist from 5. Writer Steven Ahlquist comes up with good plots, but offers too many detours from his main theme, never able to sacrifice a good idea for the sake of the story. The second Brave New Worlds issue 1 reprints the first, and Patchwork Press reprint the three Brave New Worlds issues simultaneously with continuing the series. The Millennium issue was completed before 1, and, in circumstances detailed in 6's editorial, out of continuity.~FP

THE OZ-WONDERLAND WAR

DC: *3 issue miniseries 1986*

Funny-animal superheroes Captain Carrot and his Amazing Zoo Crew find themselves caught up in a long-winded adventure featuring the characters of Frank L. Baum and Lewis Carroll. Although presumably intended for a young audience, the complicated script by E. Nelson Bridwell and Joey Cavalieri – about an evil wizard named Roquat and his attempts to enslave the entire land of Oz – seems like pretty musty stuff compared to a good computer game. Crammed full of pointless in-jokes and obsessive continuity, the series is further hampered by Carol Lay's crowded artwork, which needlessly tries to re-create the work of original book illustrators John Tenniel and W.W. Denslow.~AL

OZZY OSBOURNE

Image: *1 issue 1999*

This pre-*The Osbournes* bio-mag gives us the old dark-satanic-overlord-of-evil Ozzy rather than the now more familiar beloved-befuddled-TV-Dad Ozzy, and as such will mainly appeal to non-ironic Black Sabbath fans. Writer Paul Jenkins doesn't come close to capturing the obscenity-strewn highways and byways of the singer's actual speech, settling instead for such risible bits of narration as "I was a rotten little bugger in them days. A bit like a kidney salad – all piss and vinegar, and impossible to get yer hands on". The script does contain the odd biographical nugget – Ozzy's character-forming spell in a slaughterhouse is brought into play, for example – but mostly settles for formulaic horror tropes and weak satirical snipes at the many enemies of metal. The painted artwork, by Dean Ormston, is at the very least on a par with any horrible Molly Hatchet album cover from the late 1970s.~AL

P CITY PARADE

Horse Press: *One-shot 1997*

Another unfinished, experimental work from Paul Pope, in this case a children's story mixing his American, European and Japanese influences. The premise is that H. R. Watson, of *THB*, is helping her friend, Lottie, babysit the latter's two younger sisters. The segments presented include the arrival of guests before the whole party departs for the opera and part of the girls' favourite television show, *Gangster Strip Dragway*. In an introduction, Pope explains the relationship of this to *THB*, his ambitions for the strip and comments on the difference between manga and American comics. Visually wonderful, but frustratingly incomplete, this is still essential reading.~NF

Recommended

PABLO'S INFERNO

Abismo: *5 issue miniseries 2000-2001*

A little boy is killed and takes a journey through the afterlife. This isn't as tragic as it sounds, and Pablo's innocence and intuitive nature helps him cope with various threats as creator Rhode Montijo painlessly inserts all sorts of information about Aztec folklore and Mexican culture. His cartooning is dark, sinister and very good, and the pervading gloom is often leavened by humour. Also, for all the trappings this is very much a life-affirming story. All in all, a gem that should appeal to the same people who buy *Squee* and *Lenore*.~FP

Recommended: 1-5

PACIFIC PRESENTS

Pacific: *4 issues 1982-1984*

The first three issues of *Pacific Presents* feature one of Steve Ditko's oddest creations, the Missing Man, a superhero whose head, arms and legs are the only parts of him visible. The stories are the usual moral, overwrought dramas, beautifully drawn. The other star of this title was only in the first two issues: Dave Stevens' Rocketeer story, continued from the back-up in *Starslayer*, was intended to be in three issues but was eventually completed in a Special. A return to the action-adventure atmosphere of the 1930s, The Rocketeer looked ravishing (as did Stevens' wife, drawn to resemble Betty Page), and though hardly demanding it's full of good story-telling. The first appearance of Will Meugniot's Vanity (3) can't disguise the weakness of the material in the two final issues.~NF

Recommended: 1-2

The PACT

Image: *3 issue miniseries 1994*

Mindless violence between preposterously proportioned individuals.~FP

PAINKILLER JANE

Event: *9 issues (0-8), 1997-1999, one-shot (Painkiller Jane Darkchylde) 1998, one-shot (Painkiller Jane Hellboy) 1998*

The unlikely titular sobriquet belongs to a former policewoman murdered by the mob, then restored to life through mystical mumbo-jumbo and able to heal her body instantly. The downside is that Jane still experiences all the associated pain. It's not a gimmick that withstands any serious consideration, but otherwise writers Mark Waid and Brian Augustyn turn out a decent action comic ably illustrated by Rick Leonardi. The pick of the bunch is the zero issue released after the series, nicely drawn by Amanda Conner and Jimmy Palmiotti with Joe Quesada and Palmiotti supplying Jane's origin story. Only the most avid fans need bother with the Hellboy or Darkchylde team-ups.~WJ

PAKKINS' LAND

Tapestry: *7 issues 1997* (0-6)*

Caliber: *6 issue miniseries ('Quest for Kings') 1997-1998*, 3 issues ('Forgotten Dreams') 1998-1999**

Image: *1 issue 2000*

A remote land with sentient animals who care for a small human boy brings to mind *The Jungle Book*, but in comic terms the nearest touchstone is *Bone*. Both operate in fantasy territory, and are accessible to all ages, although there's no intentional humour located here. The twee elements sometimes monopolise, and as with much fantasy fiction the quest and interruptions are all, and those not thoroughly immersed will quickly lose interest. On the plus side Gary Shipman's art gradually loses the initial stiffness to fulfil the promise of an attractive cartoon style. Fantasy fans should investigate, but anyone else should tread carefully. Being taken on then immediately dropped by Image appears to have resulted in the series being cancelled, although for updates check http://home.att.net/~pakkins-land.~FP

PALESTINE

Fantagraphics: *9 issue limited series 1993-1995**

Palestine is almost unique, being a form of emotional comics journalism. In 1991 Joe Sacco spent two months in the Israeli-occupied areas of the West Bank (1-5) and Gaza Strip (6-9), learning about the repressive conditions the Palestinians had to live under, events rarely reported or known to the outside world. He was told of detention and deprivation without due reason, the appalling conditions in the prison camps and government-sanctioned torture, and relates it all with a passionate sense of horror. There's no lack of harrowing experiences. In 4 a Palestinian is forcibly removed from his home at night by security troops, chained to a pipe with a dried-urine-smelling sack over his head, and held without good reason for nineteen days. In 8 an old lady recalls the loss of two family members and the appalling attitude of the occupying troops: the policy of depriving already poor families of what little livelihood they have by chopping down their olive groves is a resonant image of persecution. The final issue takes some space to examine the situation from the Israeli viewpoint, but the sequence is clumsy in comparison with the remainder of the run.

Sacco's is a powerful voice in relating these stories. Fully cognisant of his own shortcomings, and of the voyeuristic-ghoul aspects of what he's doing, he has a sympathetic outsider's perspective on events, but maintains an awareness of the conflicts within Palestinian society. The short sequence in 5 concerning women wearing traditional Koran-approved dress is both informative and puzzling from the Western viewpoint, as is 6's discussion of Koran-approved methods of retribution that seem barbaric to Westerners.

The art can initially be off-putting, with Sacco's self-caricature sitting ill alongside the more naturalistic portrayal of others, but it sucks the reader in very quickly, and by later issues there's some excellent work. The depiction of the squalid Gaza refugee camp opening 6 is an exceptionally well noted (and depressing) panorama. It's harder to adjust to the blocks of handwritten lettering pasted over the art. This has the deliberate effect of adding an urgency to the text not available by more conventional placing, but it's also often a distraction, inhibiting the story it's supposed to enhance. This is, though, a minor caveat concerning an otherwise excellent title. One hopes it's had some effect beyond being fifteen minutes reading an issue.~FP

PALOOKAVILLE

Drawn & Quarterly: *16 issues + 1991 to date*

There are so many cartoonists telling tales of their everyday lives in downtown Toronto, it's a wonder you don't have to fight them off with a shitty stick the moment you walk into any retro diner. Seth stakes a very different ground to Joe Matt or Chester Brown in his quiet, driven stories. His characters are all searching for something while researching personal or local history, whether it's an obscure editorial cartoonist, the origin of postcards with giant vegetables on them, or the identity of a relative. In 4-9 he attempts to track down a forgotten cartoonist. Serialised over a long period, the story toyed with the conventions of autobiographical comics and caused considerable ill-will among those joining Seth's search when he revealed the object to be fictitious. As that's not the point of the story, it survives this revelation. He then begins to explore other aspects of longing and examination in 'Clyde Fans', in which the path of a failed fan salesman who's terrified of having to make deals and all too aware of his own inadequacies is retraced in the present day. Both tone and line are extremely cool, yet somehow charming. Seth's 1950s-influenced art style, which draws upon advertising art as well as the work of gentle humorists like Raymond Peynet, adds even more balance and distance. The strip occasionally teeters on the brink of becoming self-aware and is the epitome of what people who hate autobiographical works complain about. However, it remains clever, sharply observed, and dryly humorous. The lead strips (to 15) have been collected.~FJ

PANDEMONIUM

Chaos!: *One-shot 1998*

Killed defending Manicore, Pandemonium is resurrected in Africa as protector of the Naktu tribe, currently threatened by mercenaries working for the sorcerer, Epitaph. This is an odd, but unsatisfying, spin on the 'jungle girl' tale.~NF

PANIC

EC: *12 issues 1954-1956**

Gemstone: *12 issues 1997-1999**

The success of Harvey Kurtzman's groundbreaking satirical comic *Mad*, inspired numerous inferior imitations from rival companies. Naturally enough, *Mad* owner and publisher William M. Gaines decided to get in on the act himself, much to Kurtzman's annoyance, and so *Panic* was launched two years after *Mad* made its first appearance on American newsstands. Productive writer/artist Al Feldstein was appointed to edit the new title, while illustration duties were handled by many of the same artists who worked on *Mad*, or on EC's outstanding line of non-humour titles. Key contributors included Jack Davis, Wally Wood, Will Elder and Joe Orlando, all of them producing lively, obsessively detailed artwork that still seems remarkably fresh and inventive nearly fifty years later. Alas, the same cannot be said of the scripts, written chiefly by Feldstein and Gaines, for while they may mimic the more obvious features of Kurtzman's brand of parody, they generally lack the wit, insight and often barely disguised savagery that made the original *Mad* so different and distinctive. The range of cultural products lampooned in *Panic* is nonetheless impressive, from Tennessee Williams ('Come Back Little Street Car' in 2) to Dick Tracy ('Tick Dracy' in issue 5). A fair number of the targets, though, such as the game show satirised in 7's 'You Axed For It', are now all but lost to the mists of time. *Panic* inevitably suffers when compared to its more illustrious companion title, probably due to the difference between genius and craftmanship, but Feldstein's utterly professional approach made him the natural successor to Kurtzman as editor of *Mad*, not long after *Panic*'s cancellation. Fans of good humour drawing should at the very least sample one of the Gemstone reprint editions, with 4, bearing a terrific Basil Wolverton cover, a good representative issue.~AL

PANIC

Panic Publ (Farrell): *6 issues 1958-1959, 3 issues (Vol.2 10-12) 1965-1966*

In the wake of *Mad*'s success, the newsstands were swamped by a mini-industry of humour magazines, of which *Panic* was not the worst but by no means the best. Publisher Robert Farrell made a career of trend-jumping, and *Panic* is a *Mad* clone in every way bar quality. Artistically, there are a number of strips by Bob Powell, Jack Davis and Angelo Torres, but in general there is nothing essential here. The 1960s issues are mostly reprints. *Panic*'s enduring legacy is leaving one to wonder how the publishers could issue a *Mad* imitation under the same title as EC's "Official *Mad* Imitation" a mere two years after that title folded.~DAR

PANTHA

Harris: One-shot *('Haunted Passion') 1997, one-shot (Pantha vs Vampirella) 1997*

Rather a disappointment all round for those familiar with the were-girl as the first one-shot just reprints her origin and first adventure from the 1970s *Vampirella* 31-32, while the second is exactly the same as (and was released simultaneously with) *Vampirella vs Pantha*. A widely promoted third one-shot eventually ended up as *Vampirella* 24.~WW

PANTHEON

Lone Star Press: *12 issue limited series, 1 Special ('Ancient History') 1998-2003*

With superhero comics approaching pensionable age, it's common and not illogical to assume every ability has been utilised and every scenario played out. *Pantheon* erodes that theory in three issues. The Freedom Machine have dealt with all super-villains on their world, whereupon one of the most powerful believes it's time the group took charge of humanity, while most of the others abhor this notion. At this point the series opens. In addition to constructing an intriguing scenario, apparently the route he intended for his aborted *Elementals* series, writer Bill Willingham develops some fascinating super-powered characters. This is particularly true of his villains, who almost all have a "gosh, wow!" factor. One kills with a glance and has to be dealt with in a desert (2-3), while the more people Chaos Nation absorbs the more abilities he develops. He's not impervious, but transfers any injury to someone he's absorbed, who's then discarded, usually deceased. And his purpose in the story is merely distraction.

Willingham also plays out a real-world political scenario with duplicity high on the agenda, adding another layer to an already complex tale. Mike Leeke pencils most of 1-8, with Paul Ryan on board from 10, both inked by Bill Williams, who's also the publisher. They excel at clear storytelling, and Leeke's misproportioned gathering on the cover to 1 is not indicative of his interiors. This was plotted as a twelve issue limited series, which permits a unsentimental look at superheroes, with many mere cannon fodder irrespective of appeal. The special is slight, spotlighting a heroine involved in early issues in the manner that other characters were fleshed out in *Heroic Tales*. *Pantheon* lacks the depth or poetry of *Watchmen*, but as a cracking good superhero story there have been few other limited series to match it. All issues are still available from Lone Star, from whom your comic shop can order them for you. Anyone who enjoys their superheroes shouldn't miss this.~FP

Recommended: 1-3, 6-11

Slave Labor: *One-shot 2001*

The insect vigilante who wears enormous cybernetic pants to defend the righteous from all manner of trouser-related tomfoolery spins off from *Sugar Buzz* to find, and lose, true love while protecting the city of Gaberdine, a.k.a. "The Big Gusset". Woodrow Phoenix's art is deliciously nouveau-retro, and Ian Carney's script presents lots of amusing moments along the way, but the plot, sadly, is too thin, the humour (especially our hero's irritating verbal mannerisms) too repetitive, and, well, the pants are just too long.~HS

---

* Available in a collected edition

PAPER MUSEUM

Jungle Boy Press: *1 issue + 2002 to date*

Peculiar anthology title in which two strips by Nick Derrington resemble 1940s anthology comic material, and two written by Jai Nitz that have more depth. There's a version of *Rumpelstiltskin* drawn by Tom Fowler, while Phil Hester, Lafe Smith and Mick Gray combine for a story set in the Amazon jungle. It's all nicely produced, but none of it will ever be read more than once.~WJ

PAPER TALES

CLG Comics: *2 issues 1993-1994*

Another one of those personal zines, this produced by Seattle's Bruce Chrislip. The author has very little to say and even less flair in conveying it. Feeble.~SW

PARA TROOP

Comics Conspiracy: *6 issues 1998-1999, one-shot (0) 1999*

Doug Miers weaves a hefty dose of Fortean topics into this series of folk with paranormal abilities. So far you've seen it before, but what lifts this a step above is the engaging cast. The most powerful of them, Willow, has known everything since a childhood encounter with the alien Quim, but understands very little. Quim himself is a mysterious little fellow, and the burning Max who can only consume combustibles feels responsible for his wife's murder. There's also a violent psychotic, but he serves a purpose. 1-3 unite the cast, and their mission is revealed in 4. Unfortunately, the assorted artists aren't quite of professional standard. The only time the art matches the ambition is with David Birdsong's enticing fine-lined depictions in the one-shot, but if you can prioritise writing above art this series is worth your while.~FP

Recommended: One-shot

PARADIGM

Two Irish Guys Press: *1 issue 2002*

Image: *5 issues + 2002 to date*

Creators Matthew Cashel and Jeremy Haun cite the protracted sagas of *Sandman* and *Starman* as examples of what they hope to achieve, and they claim the premise permits any type of story. The plot to date concerns various characters' reactions to reality slippages in the city of Bogsdale. After a generous minimum of thirty story pages per issue, ambiguity still reigns, and more questions are raised every issue. Like "Why are there so many urination and toilet scenes?" There is promise: *Paradigm* is a well-crafted series to a degree, and certainly an accomplished first comic. Haun's art impresses, but is overly reliant on photo referencing. If there really is a strong enough premise it'll survive a few revelations, but after five issues the enigmatic dialogue, much of which reads smart but conveys nothing, is pasted over so much smoke. Shit or get off the pot, boys. The initial first issue is reprinted with a few new pages as the first Image issue.~WJ

Terry Moore's PARADISE, TOO!

Abstract Studio: *9 issues + 2000 to date*

This collection of Terry Moore's repeated lame attempts to create a successful syndicated newspaper strip should appeal to fans of his *Strangers in Paradise* because it includes early versions of characters from that comic. Stuff in early issues is very derivative of strips such as *Pogo* and *Bloom County*, but it is interesting to follow the artist's development. The best character is a naughty cake-eating fairy called Kixie. She should have her own comic. And someone should shoot the nauseating sad polar bear in the Wonderland strip.~GK

PARADISE X

Marvel: *3 issue miniseries (Heralds) 2001-2002, 6 issues + (0-5) 2002 to date*

The third Marvel X series kicks off in the aftermath of catastrophe with *Heralds*, billed as a prelude to *Paradise X*. Jim Krueger and Steve Pugh recount how seven envoys of X-51, the robotic Watcher, are dispatched throughout the Multiverse to warn all the Earths of an alien threat incubating at their cores. They assist in destroying them, eventually arriving on Earth X. As usual things are not going well. This time, against a grand plan to build a Heaven for all the dead beings trapped in a kind of Purgatory of self-delusion, the surviving dystopic heroes must find a solution to a new mystery, namely, why can't anyone alive on Earth X die any more? Krueger and Dougie Braithwaite reunite for the actual series to produce another good looking but confused piece of grim'n'gritty Armageddon-chic which seems to be nothing more than a dubious attempt to bring a catalogue of old Marvel has-beens and *What If?* tales into a Greater Marvel Continuity. Overblown and approaching ridiculous.~WW

PARADOX

Dark Angel: *2 issues 1994*

The star of the show here is artist David Treadaway, who at this point had a shaky grasp of anatomy, but a great sense of design to his artwork, sometimes at the expense of storytelling. Joe Phillips also contributes decent art to a story in 2, but both he and Treadaway are drawing sophomoric horror rubbish, so anyone interested in a story should stay away.~FP

PARAGON

AC: *4 issue miniseries 1993*

Paragon (originally Captain Paragon) is to AC what Superman is to DC, and in the year of AC's tenth anniversary this miniseries was intended to reintroduce and redefine his character for the 1990s. These issues can be read on their own, but the story does cross over into *FemForce* (58-60) as Paragon is manipulated into frustrating the Black Commando's vengeance on those he believes ruined his life. Bill Black's love of Golden Age superheroes is evident in all that he (and AC Comics) does, but the convoluted plot and dull artwork combine to make this one for FemForce completists only.~NF

PARALLAX: Emerald Night

DC: *One-shot 1996*

Creators Ron Marz, Mike McKone and Mark McKenna are on decent form as Hal Jordan, ex-Green Lantern and now the all-powerful Parallax takes revenge on the Superman Cyborg that destroyed Jordan's home town, Coast City. His replacement, Kyle Rayner seeks him out to help fight the Sun-Eater that's going to devour Earth. After some soul-searching and meeting his old supporting cast off he goes to do battle in *Final Night* 4.~HY

Adventure: *6 issues 1991-1992*

Based on a role-playing game that has a computer controlled world, *Paranoia* has clones of a man named King.R-THR involved in constantly shifting scenarios. Confusion is so rife, few can have made it to the final issue.~WJ

PARASYTE

Tokyopop: *12 volume limited series 1998-2002*

When teenager, Shin, discovers an alien conspiracy, an alien parasite attacks him, but failing to reach his brain, becomes stuck in his left hand. 'Lefty' and Shin are forced to co-exist and become the target for other aliens, who feed off humans and whose ability to transform their host bodies into deadly weapons makes for some dramatic and fierce battles. As the series progresses, the authorities begin to understand the nature of the invasion as mutilated bodies are discovered throughout Japan. Shin must deal with an attack on his parents (1-3), a classmate at school (4-5), and an investigation of his relationship with 'Lefty' by Tamara Rockford, whose attempts to find a way to live amongst humans by bearing a human child eventually put her at odds with the other aliens (6-9). The final battles begin with the police's use of a serial killer as a means of identifying the aliens amongst the humans.

Hitosi Iwaaki's artwork is simple, with minimal backgrounds and limited character expressions, but this doesn't detract from the strength of the storytelling and adds to the alienated atmosphere in which Shin finds himself, cut off from humanity and his own emotions, whilst the alien transformations are both imaginative and gruesome. The first four volumes include reprints of the series from the *MixxZine* and *Tokypop* anthologies.~NF

Recommended: 1-12

PARIS THE Man Of Plaster

Harrier: *6 issues 1987-1988*

Glenn Dakin and Steve Way's daft Parisian crimefighter is the lead strip, backed up with assorted superhero spoofs. It's all reasonably enjoyable, but pales in comparison to the consistently excellent 'Temptation' one-pagers in which the Devil attempts to obtain a soul by deceit, bribery or any other means.~FP

PARSIFAL

Star*Reach: One-shot 1978

Collection of the first two episodes from the *Star*Reach* series with the third and final part of Patrick Mason and P. Craig Russell's adaptation of Richard Wagner's opera. Parts one and two are recoloured here for consistency and though the paper on which the title is printed isn't very good, the muted colours provide some lovely images. On the whole, this is perhaps too much of an early work for Russell, his rendering sometimes tentative and his characters' expressions too wide-eyed or inelegant.~NF

PARTICLE DREAMS

Fantagraphics: *6 issues 1986-1987*

Vehicle for some of Matt Howarth's science-fiction strips. 'This Fear of Gods' (2-3), telling of the Galation Empress War, is part of Keif Llama's ancient history. Howarth continues with stories about Keif, a resourceful woman whose job it is to resolve conflicts with aliens, which requires her to keep all her wits about her. Howarth's straightforward, heavily crosshatched artwork perfectly suits the alien landscapes Keif frequently finds herself dumped in. Diverting if you like traditional science-fiction stories rather than fights in space.~NF

Recommended: 4, 5

PARTNERS IN PANDEMONIUM

Caliber: *2 issues 1991*

Comedy with two demons from hell arriving on Earth to cause chaos, finding a place to stay with Marty. In the second issue they learn they're not the only demons on Earth, and try finding employment. There's nothing fundamentally wrong with this buddy title, but it prompts slight grins rather than the belly laughs presumably intended.~FP

PARTS OF A HOLE

Caliber: *One-shot 1990*

Collection of short pieces by Brian Michael Bendis, none of any particular consequence, and lacking the compelling characterisation that makes his later work so fascinating.~FP

PARTS UNKNOWN

Eclipse: *4 issue miniseries 1992*, 1 issue 1993*
Image: *4 issue miniseries ('Hostile Takeover') 2000*

Remember the tongue-in-cheek camp humour film *Mars Needs Women*? Well, someone thought it would be a good idea to re-work the plot with plenty of underwear shots and extra violence. It wasn't. The second series, titled 'The Next Invasion', was left uncompleted for seven years until it acquired a different title and publisher. It seems the alien infestation wasn't dealt with first time around, so here's another go, also saturated in b-movie excess. It was preceded by a one-shot promo mag titled 'Killing Attractions'.~WJ

Siegel + Simon's PARTY Comics

Siegel & Simon: *One-shot 1980*

Very feeble self-published humour comic. It's as if two ageing hippies half-remember Robert Crumb strips, have thought "We can do that", and have gone on to prove they can't. There's the oldster making a fool of himself at a punk gig (Oh, my aching sides), the sad cartoon freak (I think they're splitting now), the 1950s sit-com parody (Nurse, nurse), and the drug tragedy as cartoon inspiration (sutures, please). The strips are all well illustrated, and in most there's a different pair of smug fuckers pulling the strings. Not worth a wank.~FP

PASSOVER

Maximum Press: *1 issue 1996*

Another appallingly un-kosher babes and blades pose-fest featuring Avengelyne. And if that's not enough you can also play "spot the knock-off" in a derivative tale of demonic possession. A dreary mess that's just not forgettable enough.~WW

THE PATH

CrossGen: *10 issues + (Prequel, 1-9) 2002 to date*

The monk, Obo-san, refuses to honour the rituals at his brother's funeral and defies Nayado's Emperor, Mitsumune, whom he believes is leading the country to destruction. Wulf and Aiko assist Obo-san to escape with the Weapon of Heaven in his possession. The Emperor wants this in order to allow him to defeat his enemies in rival Shinacea. Ryuichi, an old friend, and the Emperor's leading general, is sent after Obo-San to retrieve the weapon, at which point Shinacea invades and only Obo-San can prevent the complete destruction of Ryuichi's army.

Written by Ron Marz and drawn by Bart Sears (Walt Simonson guest pencils the story of the barbarian, Wulf, in 5), this is an atmospheric and largely successful attempt at a samurai epic. Sears' artwork looks like Tom Mandrake crossed with Frank Miller, but the colours are too dark, detracting from the storytelling.~NF

PATHWAYS TO FANTASY

Pacific Comics: *1 issue 1984*

Editor Bruce Jones rounds up an entirely predictable selection of the more sensitive members of the comics community to deliver an arty-farty first issue which, to no one's surprise, turned out to be a one-off. However, it's a lesson for all publishers, containing as it does a lot of well-respected names (Windsor-Smith, Jeff Jones, Scott Hampton, John Bolton and portfolio queen Lela Dowling – too bad she can't actually draw). On the whole, pretty, lacking stories and awfully wet.~FJ

PATRICK THE WOLF BOY

BlindWolf Studios: *One-shot 2000, one-shot ('Halloween Special') 2000, one-shot ('Christmas Special') 2000, one-shot ('Valentine's Day Special') 2001, one-shot ('Mother's Day Special') 2001, one-shot ('Summer Special') 2001, one-shot ('Next Halloween Special') 2001, one-shot ('Superhero Special') 2002, one-shot ('Sci-Fi Special') 2002, one-shot ('Another Halloween Special') 2002*

When people relate anecdotes about their children do you never seem to find them as funny as they do? Well, that feeling pervades this series, with gags that occasionally raise a slight grin somehow successful enough to run three years and two collections. Patrick is a human kid with fangs, exhibiting some wolf behaviour traits in strips rarely running to more than four pages. The repeated cover pose in different costumes works well, though. If you do like other people's stories about their children and the 'Life's Like That!' column in *Reader's Digest*, you'll love this.~FP

THE PATRIOTS

WildStorm: *10 issues 2000*

After the murder of Roxanne (Rocky) Boorman's partner, his replacement, Zach Donovan must come to her rescue when she's captured by Tomas Zorn, whose powers over the mind have already turned several operatives against the

---

* Available in a collected edition

International Operations organisation that they work for (1-4). Super spy, Nigel Harrington is introduced in 6 as Rocky and Zach travel to London to deal with some missing human biological weapons (5-8). 9-10 conclude the storyline from the *Psi-Tech* miniseries and a plot to flood the world to give mankind a fresh start. Begun by Brandon Choi and Jonathan Peterson (1-7) and completed by Peterson on his own, this is a well-written series that at least attempts to look beyond the action into the hearts of the characters and the nature of the world of espionage. Michael Ryan's storytelling adds to the experience, though his pencils seem rushed towards the end of the series.~NF

PATSY WALKER

Marvel: *125 issues 1945-1965, one-shot ('Fashion Parade') 1966*

"The Girl Who Could Be You!" reads the blurb above early issues of this title. Not without some major liposuction, babe. Anyway. Attractive, red-haired teenager lives in Centreville, USA with her long-suffering parents. Her best friend, and deadliest rival, is scheming brunette Hedy Wolfe. Her high-school sweetheart is Buzz Baxter. And... that's it, really. Amazingly, these innocuous tales of comedic romance, without either the diverse cast (!) or the overtly cartoony style of Archie, became his closest rivals for longevity, sustaining not only 125 issues of Patsy's own comic, but also starring roles for Patsy and her pals in *Patsy and Hedy* (110 issues, 1 annual 1952-1967), *A Date With Patsy* (1 issue 1957), *Girl's Life* (6 issues 1954), *Miss America Magazine* (93 issues 1944-1958), *Patsy and Her Pals* (29 issues, 1953-1957) and Hedy Wolfe (1 issue 1957). Patsy Walker was one of only two Marvel characters to be published uninterrupted from the 1940s to the 1960s (the other being Millie the Model), and, at the time of her cancellation, had appeared in more stories than any other Marvel character. Notably, in a male-dominated industry, her earliest adventures were drawn by Ruth Atkinson, with Chris Rule a major artist throughout the 1950s. One of her spin-offs, *Patsy and Hedy*, survived slightly longer than the parent title, but only thanks to the novelty of the girls finally graduating (after twenty years!) and setting out as 'Patsy & Hedy, Career Girls'. An oddity was the one-shot *Patsy Walker's Fashion Parade* of 1966, published a full year after Patsy's own comic folded. It featured not a single story, but instead page after page of pin-ups, hairdos and 'Fashions From Fans'...a sad, final collection of sweepings from the hairdresser's floor. In the early 1970s, Patsy and her husband, Buzz, were brought back from limbo as supporting-cast members in the Beast's solo strip in *Amazing Adventures*, after which she went on to become, bizarrely, the superheroine Hellcat in *Avengers* and *Defenders*.~HS

PATTY CAKE

Permanent Press: *9 issues 1994-1996, one-shot ('Prime Collection') 1997, one-shot (A Patty Cake Christmas) 1999*
Tapestry: *3 issues 1996-1997, one-shot (A Patty Cake Christmas) 1996*
Slave Labor: *One-shot 1997, 15 issues (& Friends) 1997-1999*
Amaze Ink: *7 issues + (& Friends) 2000 to date*

Patty Cake is Patricia Bakerman, seven years old and precocious. She bullies her best friend Irving who's five, and a little slow on the uptake. She's tolerated by the ten-year-old Jose and always at odds with Susie McBee. The stories consider all aspects of a small girl's life, from the delight of a summer's day to the fear of being abandoned when her mother's late to pick her up; from rivalry with Susie over a babysitter's attention to the danger of letting grown-ups become involved in your games. Along the way, Patty Cake learns lessons and teaches Irving a thing or two. She bickers with her older sister Sandy who's a bit of a rebel and she antagonises her parents, both of whom try to explain things with more or less success. Later issues cover making a mistake (10), the school play (12), Summer Camp (15), Sandy's school dance (series two 3), her friend, Phoebe's new bike (series two 5) and a visit from her Dutch grandparents that explains a lot about Sandy's behaviour (series two 10).

Scott Roberts has a tremendous feel for these characters. His understanding of childhood and his ear for dialogue seem unnervingly accurate. Alternating issue-length stories with shorter strips, Roberts keeps the title fresh, his simply drawn figures suddenly exploding in emotional contortions – the whole suffused with the enthusiasm of the very young. The 'Prime Collection' includes a selection of stories from the Permanent Press series as well as some previously unpublished material and the strips published in *Cerebus*, *Negative Burn* and *Comics Buyer's Guide*. The Permanent Press edition of *A Patty Cake Christmas* is an extended version of that from Tapestry, while two separate collections from Slave Labor reprint the Permanent Press strips from 1-3 and 4-6. The series keeps getting better as Roberts becomes more confident and bolder in his storytelling. The issue-length tale of the solar eclipse in *Patty Cake & Friends* 8 is particularly notable.~NF

Recommended: *A Patty Cake Christmas* (Permanent Press), *Patty Cake & Friends*, 1-15, series two 1-7

PAUL The Samurai

NEC: *3 issue miniseries 1990-1991*, 10 issues 1992-1994*

The ludicrously pompous Paul attempts to follow his warrior's code of honour in American society, where Japanese culture is typified by a ninja-themed sushi takeaway. Spinning off from *The Tick*, this is very much in the same mould, with preposterous characters played as relatively straight superheroes with portentous dialogue. There's plenty of neat touches from writer Clay Griffith initially (Paul conceals his sword in a baguette to avoid arrest), but midway through the ongoing series it runs out of steam. 9-10* form one long story with the final two issues of *Man-Eating Cow*, and guest-star the Tick. Sample the first two issues of the regular series featuring a strip of silly superheroes based on other Japanese stereotypes, and if you like them dive in further.~WJ

PEACEMAKER

Charlton: *5 issues 1967*

The bizarre concept of the man who loves peace so much he's willing to fight for it falls on US UN envoy Christopher Smith. Joe Gill and Pat Boyette turn out frankly dull stories, but masterpieces in comparison with the Fightin' 5 back-ups. Peacemaker began as a back-up in *Fightin'* 5 40 and 41, so presumably had a debt to repay.~FP

PEACEMAKER

DC: *4 issue miniseries 1988*

At DC there was no compunction about exploiting the inherent illogic of Peacemaker's stance as the man who loves peace so much he's willing to fight for it. Smith is portrayed as a man diving over the edge on a regular basis, tormented by the ghost of his Nazi father, yet still somehow able to function effectively as a vigilante. It's not outstanding, but there's enough action and ideas to see out four issues. He later becomes part of *Checkmate*.~FP

PEANUT BUTTER & JEREMY

Alternative Comics: *3 issues + 2000 to date*

James Kochalka's charming, if slight, tales of a talking kitten, Peanutbutter, and a crow, Jeremy, who is always trying to barter with Peanutbutter for something, but is convinced, every time, that the kitten is trying to cheat him. This creates most of the tensions within the strip, as the kitten is far too naïve to try anything of the sort.~NF

PEARL HARBOR

Antarctic: *2 issue microseries 2001*

A very detailed shorthand primer of the events leading up to Japan's attack on American forces stationed in the Pacific in 1941. In 1 Ted Nomura chronicles events from the Japanese perspective, while 2 is the US point of view. It's very well researched, and permits Nomura to indulge in his love of drawing planes and ships while being reined in to a degree by the limitations of historical accuracy. Anyone wanting the basic information could do far worse than consult these. The release of the second issue coincided with another surprise attack on the USA.~FP

THE PEASANT AND THE DEVIL

Fantagraphics: *One-shot 1998*

More mediocre comics and accompanying art-wank justification from Simon Grennan and Christopher Sperandio. This time some mates have acted out fairy tales of their own devising for the 'art' process to transform them into blurry exposures. An issue of *Ghost Rider* has more merit.~FP

PEDESTRIAN VULGARITY

Fantagraphics: One-shot 1990

Certainly living up to the title, this reprints short strips created by Dennis Worden between 1981 and 1989. Quality varies wildly, but there are plenty of laughs and it isn't always the later material that's superior.~WJ

PEDRO AND ME

Henry Holt: *Graphic Novel 2000*

In 1993 Judd Winick was a struggling cartoonist who successfully auditioned for a part in MTV's reality show *The Real World*: San Francisco. He would share a house with five others for six months, with their lives being filmed. A housemate Winick became close to was a young gay HIV-Positive Cuban born immigrant, Pedro Zamora. While to a certain extent this is Winick's autobiography, it's basically Pedro's story: how he came to live in the States, how at seventeen he tested positive for the HIV virus, about his relationships and how he became an AIDS awareness lecturer, and how through *The Real World* he was able to spread his message to millions. It's a moving account of a remarkable young man and his untimely death. Also remarkable is how Winick sheds his white middle class attitudes and prejudices to accept Pedro for what he was. It's perhaps a bit too sentimental in places where heart-strings are meant to be pulled, but Winick is trying to be sincere. He's not the greatest of illustrators, but his storytelling technique is spot on. Once you start reading, you'll be captivated. A moving and wonderful tribute to a friend.~HY

Recommended

Joe Matt's PEEP SHOW

Drawn And Quarterly: *13 issues + 1992 to date*

The one page 'Peep Show' strips were a highlight of anthology titles such as *Snarf* and *Drawn & Quarterly* in the late 1980s and early 1990s. Frankly confessional in nature, the diary-style pages of anything up to forty panels revealed Joe Matt as a parsimonious, compulsive obsessive with plenty of personal habits to make the average reader squirm, yet were all the more compelling for doing so. All the strips originally published in anthology comics are compiled in the essential *Peep Show* collection. For the regular title, Matt dropped the minute panels in favour of a more traditional format, but initially the content still examined his day-to-day life and relationships. Expanding stories over an entire issue permits more in-depth exploration of Matt's motivations for his often unsavoury behaviour, while reservations concerning the fly-on-the-wall position of the readership are dispelled by Matt's continuing compulsion to portray himself in the worst possible light. Although surely not his intention, Matt has tapped into elements of the 'new lad' persona, wanting his cake and a fair proportion of other people's as long as he doesn't have to pay for it. Of course, if not in financial terms, payment is always due, and 1-3 chronicle the disintegration of his long-term relationship. The consequent thrashing around is detailed in 4-6, collected with the previous issues as *That Poor Bastard*. There's an abrupt change of tack from 7, as Matt begins relating events that occurred when he was ten years old. It retains the car-crash-style compulsion as developing facets of Matt's character come to the fore, but is prolonged to 10 beyond a natural lifespan. 11 starts a new story very slowly, devoting the entire issue to a disagreement with a friend and a discussion of porn videos. It drags, and at one time Matt would have dealt with everything here in two pages, although two years after the preceding issues 13 is a return to form as Matt is chastised by friend and fellow cartoonist Seth. He's a good cartoonist, but the appeal of Matt's work lies strongly in his acknowledging that plenty of his habits and facets of his personality are off-putting and distressing to others, yet presenting them without shame, leaving one to wonder about further horrors he's not revealing. This is coupled with constant agonising over why people don't get on with him. Lacking the expressive art and constant seam of humour there might be nothing endearing about Matt's work, yet as it is he can be compulsive reading.~WJ

PELLEAS AND MELISANDE

Eclipse: *2 issues 1985*

Pelleas and Melisande (also known as *Night Music* 4 and 5) is adapted from the stage play by Maurice Maeterlinck, which was written in 1892. It's the story of Melisande, married to Golaud but, seemingly inevitably, drawn to Pelleas, Golaud's half-brother. As Pelleas declares his love, however, he is killed by Golaud, who has been watching the couple's growing intimacy with anger. Maeterlinck asks questions rather than offering solutions. His strongest influences are the French Symbolist poets; it is the expression of their ideas that concern him and which P. Craig Russell so carefully captures with his artwork. If the text is oblique, the story is carried by image and gesture. Russell's rich, sensitive artwork provides the emotional intensity to carry a play that is best known for Debussy's opera based on it.~NF

Recommended: 1, 2

PELLESTAR

Eternity: *2 issues 1987*

There's a decent enough story going here about Brian, on the cusp of adulthood and unsure where life's going to take him. The problem is, he's been having these dreams involving a vicious beast. When his grandfather dies Brian begins to learn the truth about what he is, and what the old stuff in the attic is, and it's quite a shock. The fantasy elements are minimal beyond the dreams, and the potential of this series was never realised, as it remained incomplete. That being the case, it's chiefly memorable for the early pencilling of Richard Case and the early inking of Doug Hazlewood and Jimmy Palmiotti. One wonders what happened to writer Peter Palmer, who definitely showed promise.~WJ

Knights Of PENDRAGON

Marvel UK: *15 issues 1992-1993*

Few traces of the ecological subtext of the previous series (for which see under 'Knights') remain by the new first issue. The Arthurian legend aspects are played up, though, with all sorts of tiresome exposition on what it means to be a Pendragon, with new abilities and members popping up all the time. On the positive side, at least Grace gets to wear something other than her sci-fi slut gear. Writers Dan Abnett and John Tomlinson have put a lot of thought into the background, but given the grand idea that the Knights are the 20th-century equivalent of the Round Table, protecting Britain in her hour of need, there's an awful lot of basic superhero punch-'em-ups. John Royle is the main penciller, starting with 3, and begins in a nice sub-Alan Davis style devolving into a ghastly lines-all-over-the place format by the end. Altogether unmemorable.~FP

PENGUIN & PENCILGUIN

Fragments West: *5 issues 1987-1998*

International Humor Advisory Council: *3 issues (6-8) 1989-1994*

At the South Pole, live Penguin and Pencilguin, distinguished by the shape of their noses – a pen or a pencil. They dream of becoming famous artists and writers, while working in the ice cream shop of their father, Dadguin. Pencilguin's children, Glenguin and Gwenguin are taught by their Auntie Arktic, Punguin is a cousin of Dadguin's and Momguin is currently on her travels around the world. Each story is a lesson about the value of reading on behalf of the Cartoonists Across America program, promoting literacy, creativity and humour. The strips themselves, in Phil Yeh's florid cartoony style, are mostly based on well known stories like 'Aladguin and 1001 Flavors' (1), but sometimes also on television shows ('The Simpsguins' 8). Usagi Yojimbo has a cameo in 1 and even cartoonists make occasional guest appearances as themselves, including Sergio Aragonés (3), Alfredo Alcala (4), and Moebius (5). There is also a Patrick Rabbit backup in 4-6. In the end, Leigh Rubin and Yeh's strips just manage to avoid being overly preachy, mostly because they're fun and funny (if you're fond of puns, at least).~NF

PENNY CENTURY

Fantagraphics: *7 issues 1997-2000*

After twenty years it's all too easy to take Jaime Hernandez for granted, but, as this magnificent title proves, he is still working at the peak of his powers. *Penny Century* charts the adventures of Hernandez' regular cast of characters from *Love and Rockets*, Maggie, Hopey, Izzie and so on with extraordinary humour, skill and insight. Hernandez is one of the true giants of the comics world and demonstrates his mastery of the form by displaying a wide range of approaches to the different strips: a light, open style for the frivolous adventures of the eponymous Penny, oppressively dark artwork for the woozy late-night cruising of Ray, and cartoony Little Archie artwork for Maggies' childhood tales. The standout strip is 2's taut 'Chiller', as good an exploitation of the paranoia of a late night drive in the dark as you'll ever come across, but each issue is a masterpiece in its own right. 1-4 are collected as *Locas In Love*.~DAR

Recommended: 1-7

PENTACLE The Sign of the Five

Eternity: *4 issue miniseries 1991*

There's some thought applied to refreshing the concept of *Warlock* 5 by *Men In Black* creator Lowell Cunningham, who also re-introduces characters from other Eternity series, most prominently Werewolf at Large. There's much ado about the power selecting recipients, including a very out of place astronaut, that predictably resolves itself in one large fight. The art of John Ross has improved since earlier outings, but still falls into the 'promising' rather than 'good' category.~FP

PENTHOUSE COMIX

Penthouse: *33 issues 1994-1998*

If anyone could set up a successful soft-porn newsstand comic you'd have thought it would be *Penthouse*. When this débuted in 1994 it looked great, very slick and shiny, and benefiting from artwork by the likes of Gary Leach, Arthur Suydam, Kevin Nowlan, Gray Morrow and Adam Hughes. Apart from Mark Beachum, whose painted artwork appears in 4-8, 11 and 12, and Arthur Suydam, whose fantasies grace 1-8 and 13, the art was tight, highly finished and realistic. The early stories were a different matter. Largely written by editor George Caragonne, they were repetitive and poorly paced takes on superheroes and space opera, featuring aged jokes and heavy-duty bondage. Caragonne persuaded some interesting artists to work with him, however, including Russ Heath and Curt Swan in 5. The high point of the early issues was 'Scion', a series about psychics in Russia drawn, with great elegance and grace, by Kevin Nowlan in a pared-down, controlled version of his earlier fine-lined style. The sex was restrained but erotic, and there was an interesting thriller plot. Unfortunately it disappeared after issue 5, unfinished.

When experienced letch Dave Elliott replaced Caragonne the title became softer and more humour-driven, and it attracted a still more glittering array of names, including Moebius and Steranko (11), Richard Corben (15-17) and John M. Burns (17). Apart from a preview of Milo Manara's *Click 3*, *Penthouse Comix* concentrated on commissioned material, but Elliott began a series of quality European reprints. These included Leroi and Gibrat's *Pinocchia* (14-16*) and Manara's 'Hidden Camera' (17 on). Essentially this is *Heavy Metal* with a higher tits-and-ass quotient, concentrating on parodies, sexy superheroes and space-bondage fantasies. It's fine for whiling away a quiet afternoon, but don't look to it for insights.~FJ

Recommended: 1-5 for the Kevin Nowlan artwork

PENTHOUSE MAX

Penthouse: *2 issues, 1 Special 1996*

After the failure of *Penthouse Comix* spin-off *Men's Adventure*, this was another go at developing a second title by concentrating on popular, established characters (or as established as any character in Penthouse Comix could be said to be) preferably ones with big knockers and nymphomaniac tendencies. The 96 Election Special was very different, a series of short skits in flip-book format, one half and cover lampooning Clinton and the other half sending up Dole. Numerous comics names contributed, including many of the *Penthouse* regulars, plus Dan Jurgens, Dick Giordano, Scott Hampton, Bill Sienkiewicz, Keith Giffen, Lovern Kindzierski, Rick Geary, Kev O'Neill and Hilary Barta.~FJ

THE PEOPLE'S COMICS

Golden Gate/Kitchen Sink: *One-shot 1972*

A one-shot by a Robert Crumb in transition. By 1972 he'd been the most fêted underground cartoonist for over five years, and was obviously feeling pigeonholed by his standing and his characters. The boorish *Fritz the Cat* was being adapted, none too successfully, for a movie, and Crumb's images and catchphrases had propelled him to a public-awareness factor way beyond most counterculture creators. It's with *The People's Comics* that he begins to turn away from the underground, leaving Fritz's tombstone at the conclusion of a vitriolic strip concerning his perception of Hollywood types. It contains the usual dose of wish-fulfilment sex, as does the remainder of the comic, but what marks this is as turning-point is Crumb producing personal material moving beyond sexual fantasy and distancing himself from his presumed associations. It's the half-hearted manner in which he does so that makes this inessential Crumb. Always portraying himself as insecure, he seems uncertain about straying too far away from the market he no longer felt in tune with. Originally published by Golden Gate Press, there have been numerous reprints over the years, the most recent being Kitchen Sink's 1995 edition.~WJ

PERAZIM

Antarctic: *1 issue 1996*

Planned as three issues, Antarctic pulled the plug on this one very quickly, probably when the art arrived. It's an attempt at Moebius with a robot, a funny animal and an explorer, but it's really not very good at all.~FP

PERRAMUS

Fantagraphics: *4 issue miniseries 1991-1992*

The late Argentinian artist Alberto Breccia began this complex political fable in 1984, towards the end of a long and distinguished comics career. Born in Uruguay in 1919, Breccia drew his first professional cartoons in 1936. By 1945 he'd joined the staff of Patoruzito, Argentina's first comic book, where he began his début feature, Jean de la Martinica. Breccia made his name with the 1956 strip *Sherlock Time*, written by the prolific Hector Oesterheld, who also scripted Breccia's most popular work, *Mort Cinder*, first published in 1964. The artist's continuing mastery of the black and white medium was now complemented by restless technical experimentation, a highly influential blend of collage, photography, painting and breath-takingly assured line-work, techniques which also help to make *Perramus* such a visual treat.

Written by Juan Sasturain, *Perramus* concerns a man without a memory searching for his real identity, in a post-Peron Argentina, haunted by the memory of those 'disappeared' (murdered) radicals who dared to oppose the 1977 military dictatorship. Oesterheld, who once produced a biography of Che Guevara with Breccia, was himself 'disappeared' in 1977, along with his four daughters. Conceived in the aftermath of the Falklands War, *Perramus* is

a complex, teasing, often obscurely allusive fantasy which features a guest appearance from Argentinian writer Jorge Luis Borges in 2. Borges was obsessed with games, riddles, enigmas; *Perramus* shares some of the same concerns. This also serves as a fine introduction to the peerless artwork of Breccia, one of the greatest of all comic artists.~AL
Recommended: 1-4

PERVERT CLUB

A.M. Works: *12 issues 1995-1998*

High School student Malcolm Davis is a teenage transvestite. This foible draws him to the attention of Calvin High's 'Spirit Club', in reality an all-female group of fetishists led by the power-crazed Julia Davner. Malcolm is invited to become the first male to join, but is he to be their willing accomplice in their stated agenda – to obliterate society's taboos – or their helpless pawn? Is their stated agenda their only goal? Can his girlfriend April handle a relationship with someone who looks better in a dress than she does? Does his sister Mallory love him only as a brother, or is there more going on? And how is he going to deal with Brad the Quarterback, who's asked 'him' out on a hot date?

The title is a misjudgement, prompting expectations of a wank comic, which this isn't. It does talk about sex frankly, but there are no explicit sexual depictions, and almost none of the 'Pervert Club' move beyond one-note ciphers. People who picked it up because of the title would have been disappointed, and the title would deter many who might find it interesting. Mostly, it's a story about alienation from one's peers, developed from an admittedly unusual viewpoint, and, while sometimes clumsily expressed, it is often oddly moving. Writer and artist Will Allison's etiolated pseudo-manga style will not be to everyone's taste, but the series has an offbeat appeal, and Allison is to be commended for his perseverance. Despite diminishing sales he persisted long enough to draw the series to a bittersweet and, given the absurd initial premise, surprisingly pragmatic resolution.~HS

PET

Eros: *One-shot 1997*

Let's face it, for those whose inclinations run that way there's precious few places where you can see a gorilla performing cunnilingus, or indeed receiving a blow job. Well look no further. The irony is that the story of the future society Tayyar Ozkan has created to justify the above sequences is far more interesting than the ape sex.~FP

PETE The P.O.'D Postal Worker

Sharkbait Press: *11 issues, 2 Specials 1997-2002*

Pete is the perfect mailman. Nothing will keep him from making his appointed deliveries. In a world where he must be on his guard even in the sorting office, lest his nervous colleagues shoot him accidentally, he's always fully armed and prepared for the worst that can be thrown at him. That includes a well-armed gang terrorising the neighbourhood, prison inmates, inhabitants of an anti-authority bunker (holding the FBI at bay), aliens in Roswell and the IRA, during an enforced vacation in England, where he's no longer welcome after that unfortunate incident with the Queen. All of this in the first five issues (conveniently collected). In later issues he faces a traitor within the postal service (6, 11), becomes the Postman on Elm Street (7-8), appears on the Jerry Ringer Show (9) and revives the Pony Express (10). The specials contain a Christmas adventure with Santa and a trip to Afghanistan to deliver a letter to Osama Bin Laden. These have their moments, but are not as consistently funny. Written by Marcus Pierce Jr (except 10), this is very black humour. Pete's inane, almost permanently fixed grin (bonhomie cut with tension), calm (in a wired way) and grim determination see him through each day. He's frighteningly intense, utterly single minded and every inch a hero to cheer for. Pete Garcia's cartoony artwork is reminiscent of a finer lined Matt Howarth, but there's something too of Keith Giffen, in the expressions.~NF
Recommended: 1-5

PETER PORKER, SPIDER-HAM

Marvel: *One-shot 1981*

Anthropomorphic humour. Allegedly. The title says it all, really.~FJ

PETRA ETCETERA

Gratuitous Bunny Comix: *3 issues + 2000 to date*

Petra is the kid sister of Jo Dribble whose adventures in time and space feature in *Tales from Sleaze Castle*. Petra's story is planted firmly in Jo's kitchen sink in Newcastle. Drink, parties, arguments, introspection and dodgy liasons are the order of the day. Terry Wiley displays considerable skill in portraying Petra's day to day interaction with Jo's student set convincingly, and Adrian Kermode's dialogue is authentic without being intrusive. Both creators manage to co-plot an entertaining everyday continuity, reminding us that this is still a comic strip with interludes and references to various styles.~SW

THE Sandman Presents: PETREFAX

DC/Vertigo: *4 issue miniseries 2000*

Fantasy adventure, set in the land of Malegrise, where most people have magical powers. Petrefax is an undertaker whose latest commission, Calcinia, has had part of her soul stolen by her fiancé, Lord Bulgus. Now, with Petrefax's help, she must prove that Bulgus killed the rightful heir to his title before her body rots completely. Mike Carey's knowing script doesn't offer many surprises, but it's entertaining, the characters have spirit and Steve Leialoha's decorative artwork is a major plus.~NF

PHAGE: SHADOW DEATH

Big Entertainment: *6 issue miniseries 1996*

Bryan Talbot writes a story featuring the dinosaur despot he drew in *Teknophage*. It's a tale of intrigue, insurrection, sex and brutality, and Talbot stays a step ahead of the reader throughout. Mr Henry Phage is being troubled by a particularly resilient and persistent assassin, while the hedonistic Lady Messalina is discovering the allure of the illicit. The pencils are by the vastly under-rated David Pugh, here provider of fine grime and debauchery, and the whole is probably the best story to emerge from the vastly over-hyped Tekno/Big product.~FP
Recommended: 1-6

THE PHANTOM

Gold Key: *17 issues 1962-1966*

In 1560 Kit Walker loses his family when he's shipwrecked by pirates in the Bay of Bengal. He's washed ashore and raised by the Bandar jungle tribe, and grows to manhood swearing vengeance against the killers of his family and all wrongdoers. He becomes the first Phantom: The Ghost Who Walks to the jungle folk of the area; a fearsome champion of justice operating from a set of caves that resemble a skull. There's a one-page summary of this origin in 1, which is reprinted in 9. The torch is passed to each generation of the Walker family giving the strip a 400 year historical stage. The current Phantom's boyhood is serialised in 5-7, including his earliest encounter with Diana, his future mate. Comparisons with *Tarzan*, *Batman* and, more recently, *Tom Strong* are not without substance. The four page 'King, Queen and Jack' backup in 2-11 is replaced by 'Track Hunter' in 12-17. There's also a short Jungle Patrol feature in 10. All issues, quarterly until 1965, have one or two *Phantom* features with earlier stories written by editor Bill Harris. The series is drawn by Bill Lignante, who unsuccessfully applied to draw the syndicated strip. One or two episodes of 'Track Hunter' have Al Micale artwork but the back-ups are usually Lignante too, so you really have to like his nondescript style to be able to bear reading this title. Many of the painted covers are by the great George Wilson including 6-11 and 14-17.~SW

THE PHANTOM

King: *11 issues (18-28) 1966-1967*

Each issue features one story about the jungle lawman, with a female Phantom from the 19th Century in 20 and 24. The lame Bill Lignante artwork continues throughout except for the syndicated strip reprint in 25. Most stories are written by editor Bill Harris with the exception of 18 by Dave Wood and 20 by Pat Fortunato. There are several short back-up features including Flash Gordon by Wally Wood in 18 and Gil Kane in 19-20; Mandrake drawn by Andre LeBlanc in 21-23 and then Brick Bradford by Paul Norris in 26-28. Numerous military fillers appear from 24 on written by Raymond Marais with art by Tim Battersby-Brent, Jeff Jones in 25 and Ric Estrada in 28. There is no issue 29.~SW

THE PHANTOM

Charlton: *45 issues (30-74) 1969-1976*

After some leftover material from King Comics, Charlton continue new adventures focusing on the present-day Phantom. Jim Aparo draws some beautiful pages in 31-34, 36-38 all scripted by Steve Skeates around the same time they were both producing their memorable *Aquaman* issues for DC. With 39 artist Pat Boyette takes over, teaming up with Joe Gill whose scripts are, sadly, dismissive at best. After complaints from the syndicate about the quality of the comic in 1975, Charlton replaced Boyette with Frank Bolle, the lifeless Don Sherwood and some very poor Spanish artists, but retained Joe Gill. If anything, this constituted a drop in quality. When it was too late to really mend things, artist Don Newton managed a stellar run with numerous writers in 67-74. We see the Phantom die and pass the torch to his son in 67, the World War II Phantom's visit to Casablanca in 71, whilst the last issue is arguably the best Bicentennial comic to be published.~SW

THE PHANTOM

DC: *4 issue miniseries 1988, 13 issues 1989-1990*

One of the many comics adaptations of Lee Falk's newspaper strip superhero, started in 1934 and still going. Being the Phantom is a family business: 400 years ago, the original Phantom saw his father murdered by pirates and vowed to dedicate his life and those of his son, grandson, etc., to revenge and justice (with priority given to pirates). Here in 1988, Kit Walker is the twenty-first of this unbroken line. The miniseries acts as an introduction to the dynasty, recounting exploits in the careers of Phantoms 1, 13 and 21. Peter David's writing is leaden and Joe Orlando's story-telling confused, with at least one serious mistake at a critical moment. A thoroughly tedious read, unleavened by humour or any genuine human contact, and full of smug, self-important lectures. The Phantom may have the worst case of a God Complex in all of superherodom: he has his Chosen People tattooed with a sign that shows they are under his protection, and he can be found saying "There are man's laws, there are God's laws, and there are the Phantom's laws." Really, there's no reason to read this comic, except as a study of twenty-one generations of mental illness – that's one hell of a persistent gene on that Y chromosome. The ongoing series by other creators is mostly one- or two- issue stories, but each is so boring, it feels about four times the length. It earns some points for continuity in preserving all of the faults of the 1988 series and resisting any urge to make improvements.~FC

THE PHANTOM

Moonstone: *3 issues + 2002 to date*

Single issue stories, featuring the modern Phantom (and his family), set in Bagalla. 'Ghost Killer' has a smuggler hire a female assassin to kill the Phantom, who's stopped one too many shipments. 'The Singh Web' features a Chinese monk, destined to end the curse of the title, and some inept archaeologists. Then the Phantom goes hunting for 'The Treasures of Bagalla', stolen from the museum by mercenaries. While they're all entertaining enough, they're hardly pushing at any boundaries.~NF

PHANTOM FORCE

Image: *2 issues 1993*
Genesis West: *9 issues (0, 3-10) 1994-1995*

A generic band of adventurers comprising martial artists, wizards and cosmic warlords charge about in a quest to save the universe. Jack Kirby's last work is shanghaied, first by Image who merely overwhelm the art, and latterly by long time collaborator Mike Thibodeaux, whose inks and even plots seem greatly at odds with what Kirby intended. A sad waste of time.~WW

PHANTOM GUARD

Image: *6 issue miniseries 1997-1998*

Don't be misled by the inexplicably off-putting covers, which conceal a densely plotted thriller set on a U.S. colonised Mars in 2020, excellently realised by artist Ryan Benjamin. Once the mystery is solved *Phantom Guard* progresses into a good action series. The Phantom Guard are law officers of a sort, but without jurisdiction in certain areas. This makes their investigation of Mars' greatest industrialist a difficult matter, particularly as he uses his own superbeings. Sean Ruffner's plot keeps the pages turning, and Benjamin, generally a decent artist anyway, hits a career peak.~WJ
Recommended: 1-6

PHANTOM LADY

Fox Features: *11 issues (13-23) 1947-1949*
Verotik: *1 issue 1994*

The 'good-girl' art of Matt Baker is what most distinguishes *The Phantom Lady*, though her adventures (against everything from thieves and murderers to werewolves) are a cut above most others of the period with their emphasis on detection and mysteries. Phantom Lady herself is Sandra Knight, senator's daughter, who puts on a skimpy costume (but manages to avoid recognition without a mask) and wields a ray of black light against her adversaries.

The Verotik issue contains reprints from 14-17 and two from *All-Top Comics*, with pin-ups by Adam Hughes.~NF

PHANTOM OF FEAR CITY

Claypool: *12 issues 1993-1994*

A supernatural romance, this twist on the Flying Dutchman legend starred Juup Van Derdecken as the eponymous spirit, cursed to wander the earth, but every seven years made flesh, briefly, to seek the love of a woman who might free him. Along the way he encounters business sharks, serial killers, opera divas and more in a blend of *Dallas* and *Dark Shadows*. Steve Englehart's script is painstaking and evocative and the artwork, initially by Matt Haley, later by Nick Choles, quite lovely.~HS
Recommended: 1-12

THE PHANTOM STRANGER

DC: *Series one 6 issues 1952-1953, series two 41 issues 1969-1976, 4 issue miniseries 1987-1988*
DC/Vertigo: *One-shot 1993*

Débuting earlier than most people realise, the first series by John Broome, Carmine Infantino and Sy Barry had the Stranger solving supernatural happenings, and exposing fakes. Although visually similar to later versions in slouch hat, black suit and cloak, he had no particular abilities other than being able to manifest like a phantom. One of these stories is reprinted in *Showcase* 80 with a new framing sequence, with three more in 1-3 of the second series, as our man, in the company of Ghostbreaker Terry Thirteen, argues the merits of the supernatural cases represented. Robert Kanigher and Neal Adams provide all new material in 4, introducing a recurring adversary in sorceress Tala. The strange combination of Mike Sekowsky and Murphy Anderson draws 5, which is monopolised by a group of youngsters resembling nothing so much as the human cast of *Scooby Doo*. Regular artist Jim Aparo arrives on 6, and writer Gerry Conway's début in 10 rids us of Tala and the annoying teenagers while retaining the skeptical Terry Thirteen back-ups, now drawn by Tony DeZuniga, and introducing a new mystical menace, Tannarak. Except for Kanigher's brief return on 12 and 13, The Stranger was now an active participant in the stories.

Len Wein becomes writer with 14, and 17 is the first appearance of Cassandra Craft, a blind telepath who cares for the Stranger after he's been mugged in the subway! Tannarak is also on hand, obsessed with attaining immortality. Wein peaked here between 18, nicely drawn by DeZuniga, and 25. 20 introduces evil mystical organisation The Dark Circle, who would recur throughout, and 22 begins the best story of the run, with Cassandra kidnapped and controlled by the Circle. To locate them, the Stranger seeks the aid of Tannarak, by now a marvellously sarcastic character. 23 starts a back-up strip 'The Spawn of Frankenstein', written by Marv Wolfman and drawn by Mike Kaluta. Both were in their prime for a marvellously produced run, which progressed to a full-length teaming with the Phantom Stranger in 26. It continued in 27-30, drawn by Bernard Baily.

Wein left with 27, and the comic declined as the Stranger reverted to small cameo appearances in mystery stories mainly illustrated by Gerry Talaoc under a huge procession of writers. Subsequent issues are notable for the Black Orchid back-up, run irregularly in 31-41. Continued from *Adventure Comics*, by Sheldon Mayer and Nestor Redondo, it maintained the mystery of this crimefighter in moody stories. In 38 the strip was drawn by Fred Carillo, now also drawing the lead feature. In an effort to increase sales, Deadman, drawn by Mike Grell, appeared in 33 and was popular enough to return for 39-41, along with Cassandra Craft.

After cancellation the Phantom Stranger popped up in guest roles in other series, including the seemingly incompatible *Justice League*. Mike Mignola and P. Craig Russell ensure that the 1987 series looks excellent, but much detail is lost in the printing. Despite a lacklustre start from writer Paul Kupperberg, it ends in spectacular fashion. The series works on two levels, as a supernatural battle and as a crime thriller, but is severely hampered by the strange dialogue inflicted on the Stranger, who sounds more like Marvel's Thor than any previous incarnation. He would next appear in the back of *Action Comics*, but that run never matched the miniseries. The Vertigo title has the Stranger trapped in a strange house and separated from his body, written by Alisa Kwitney, and illustrated by Guy Davis. It's an atmospheric and creepy story, involving all manner of strange demons and creatures in a to-hell-and-back saga.~HY

PHANTOM 2040

Marvel: *4 issue miniseries 1995*

Based on the animated cartoon. Setting this Phantom's adventures in 21st century Metropia, a vast city-state in crisis, has separated the character from its encumbering 20th century baggage. Here a young college student named Kit Walker discovers his family's legacy rather than having trained for it, and his college friends Jenna and Tranh are often caught up in his adventures. As 24th generation Phantom he's added invisibility, a bulletproof protective suit and a hoverbike to his arsenal. Kit is backed up by Guran, the wrinkled retainer of his father who's been missing since 2024, and Rebecca Madison and her influential Maximum Corp prove to be implacable enemies when The Phantom reappears after 16 years. Kit also meets the deluded Lady Phantom in 4. Scripts are by Peter Quinones with artwork by Steve Ditko inked by Bill Reinhold making a good combined effort. The undertheme of corporate crime, especially pollution, is well evoked with the Phantom's jungle coming off as an environment in need of protection.~SW

THE PHANTOM ZONE

DC: *4 issue miniseries 1982*

Before Superman's home planet Krypton exploded, The Phantom Zone was a special dimension where Kryptonian villains were imprisoned in phantom form as a humane alternative to execution. This epic miniseries, masterfully written by Steve Gerber and beautifully drawn by Gene Colan, deals with the many mysteries surrounding the Phantom Zone and its prisoners. While Superman is trapped in the zone, the escaped Kryptonian villains, all superbly characterised, cause havoc on Earth, and both the Justice League of America and Supergirl are required to stop them. Nuff said?~HY
Recommended: 1-4

PHAZE

Eclipse: *2 issues 1988*

A candidate for All-Time Stinker. The germ of a decent time-travel plot is successfully buried as writer Fred Burke attempts a complex story before he can manage a simple one. *Phaze* exhibits appalling storytelling amid a plethora of talking heads. It's a rare character that can be recognised from panel to panel, never mind from page to page, a confusion compounded by the decision to colour directly over Rafael Kayanan's pencils, then to use at least three colourists an issue so there's no consistency. Just in case someone does start to figure out what's going on, there's a succession of confusing montage pages. Eclipse wisely gave this a premature burial two issues into a planned six-issue run.~FP

PHENOMERAMA

Caliber: *1 issue 1997*

A selection of short stories by Scott Morse. They're nicely drawn, but take time to say little and a common response to most is likely to be "so?" Strangely, the most charming is the shortest, about a woman planning to attend college whose life is changed when the bus stops.~WJ

PHOENIX

Atlas: *4 issues 1975*

Much like Marvel's *Warlock* series, *Phoenix* was a futuristic superhero with strong messianic overtones. 1-3 were decently written by Jeff Rovin and well drawn by the under-rated Sal Amendola, though perhaps the comic's greatest claim to fame is featuring Carmine Infantino as one of its characters. With 4 the title changed to *Phoenix the Protector* and gained a far less impressive costume and creative team. It's worth noting 3's back-up, The Dark Avenger, wryly written by John Albano and well drawn by Pat Broderick and Terry Austin.~DAR

PHOENIX

Viz: *1 volume + 2002 to date*

The first volume, 'A Tale of the Future', is actually the second of twelve by Osamu Tezuka, originally published in Japan between 1967 and 1988, though the series remains unfinished after his death in 1989. All are linked by the presence of the mythical Firebird, guardian of the universal life force. Beginning with early civilisation, each volume jumps forward and then backward in time, moving towards a convergence in the present. 'A Tale of the Future' is the story of Space Patrolman, Masato Yamanobe's love for the beautiful alien, Tamami, a moopie, which, without a natural shape, can take on any form, even human. Moopies have been kept as pets until outlawed and exterminated as counter-productive to the control of man's desires in the harsh world of the future, where Masoto lives in one of the five, underground, Eternal Capitals. Masato's superior, Roc, tells him that he must destroy Tamami, but he can't, and instead escapes with her to the above ground outpost of Dr Saruta, who is trying to create a synthetic creature that can survive the hostile atmosphere. This is just the start of the final days of mankind and the transformation of Masato. Addressing fundamental questions about existence, with the Phoenix as a witness to countless evolutions and destructions of different life forms, Tezuka also depicts an epic love story and an alternate future, which is ultimately hopeful. Considered by some to be the pinnacle of Tezuka's career, this is one of the greatest comics ever.~NF
Recommended

PHOENIX The Untold Story

Marvel: *One-shot 1984*

In the planned ending to the 'Dark Phoenix' saga (*Uncanny X-Men* 129-137), Jean Grey was stripped of her powers and returned to her team-mates to live happily ever after. Editor-in-chief Jim Shooter objected: she had committed genocide and this amounted to little more than having her wrists slapped, so he forced Chris Claremont and John Byrne to rethink. This presents the story that would have appeared in *X-Men* 137 without Shooter's interference, and is surprisingly bland and anticlimactic next to the 'real' version. There is also an interview with Byrne, Claremont and Shooter, and scenes from the issues that would have followed. An interesting collectors' piece.~JC

THE PHOENIX RESURRECTION

Malibu: *3 issues 1996*

Previously purged in the memorable *X-Men* 137, Phoenix is an all-powerful symbiotic alien entity that bonds itself to an appropriate host. A big event was required to promote the merging of the Malibu Ultraverse into Marvel's titles following a corporate buyout, so Phoenix was revived. Trailed in the second issues of all the relaunched Ultraverse titles, this series sees Phoenix once again manifesting to fight the X-Men, Exiles and Ultraforce in the first two unnumbered issues, titled *Genesis* and *Revelation*. No obvious biblical title was available for *Aftermath*, and it's also very little to do with the remainder of the series, a pointless coda set in the future introducing Foxfire. Overall this is no better than average, and although the art is decent, the continuous switching of pencillers jars.~FP

PHOENIX SQUARE

Slave Labor: *3 issues 1997, Graphic Novel 2001*

Eccentric, picturesque concoction detailing the various transient and long-term residents of the peculiar artistic colony in Victorian Chameleon Bay on the Yorkshire Coast known as Phoenix Square. Young Troy has had a sheltered upbringing in Leeds where he was an apprentice in a Draper's shop before uprooting himself and his estranged sister Lucinda and relocating to the coast. As they establish themselves events increasingly mysterious unfold into a web of intrigue, corrupted innocence and the preternatural. The narrative uses the device of extracts from the lost diaries which is much in keeping with the over theme of pastiching gothic novels from the turn of the 19th century. Paul Barlow produces a slow moving and gracefully darkening tale. The series ends abortively but is concluded in the graphic novel. Entertaining, but not to everyone's taste.~WW

THE PHONY PAGES

Renegade: *2 issues 1986*

This spoofs famous strips and characters from throughout the history of comics. Starting with 'The Blue Kid' (mixing Gainsborough's 'Blue Boy' and Outcault's 'Yellow Kid'), there's 'Little Nimoy in Slumberland' (cue *Star Trek* gags in the style of Winsor McCay), through 'Prince Valium' to 'Brooke Shields, agent of F.U.R.Y.' As artwork, Terry Beatty's pastiches are accomplished, but the jokes just aren't funny enough.~FC

PICKLE

Tragedy Strikes: *2 issues 1992-1993*
Black Eye: *8 issues (3-10) 1994-1996*

Ostensibly the venue for writer/artist Dylan Horrocks, but closer examination allows no easy description of its contents. The title's main feature is the ongoing 'Hicksville', an American's attempt to trace the roots of comic artist Dick Burger back to a curious, comics-aware community in Hicks Bay, New Zealand. Most of the male cast of Hicksville – Sam Zabel, Tisco George, Kupe and the mysterious Augustus E – are cartoonists and are occasionally credited as the artists on features. Needless to say, the entire comic is drawn in Horrocks' economic style. The female cast includes town comics-librarian Dolan Hicks (Mrs.), who also answers letters to Pickle, and the mercurial Grace Pekapeka, tragically torn between two lovers. 'Cornucopia' in 5 recounts Grace's visit to a fictitious European country and its revered master cartoonist Emil Kopen, and is a highlight. 'Stars' in 6, 7 and 8 is a strip within the 'Hicksville' strip offering a historical sidebar on Dick Burger, but also evoking some real emotion. The guest-appearance by Stan Lee in 7's episode is hilarious. There's also an ongoing history of the European settlement of Hicks Bay by Augustus E whose pages usually crop up as ironic devices that nevertheless have their own continuity. We're additionally shown occasional glimpses of Dick Burger's American comic strips 'Captain Tomorrow' and 'Lady Night' and Emil Kopen's 'Valja Domena'. The 'Hicksville' cycle, which comes to some kind of resolution in 10, offers an extremely deft weaving of fictions within fictions. Horrocks balances the comic strip's inherent lack of realism with a fascinating web of inferred relationships and undocumented events. It's a masterpiece. 'The Last Fox Story' in 3 reprints a 104 page mini comic from 1990 that serves as an overture to all of Horrocks' 1990s work. 1, 2, 4, 5 and 6 also feature the unfinished 'Cafe Underground' a human drama set in Auckland amidst the subtle turmoil caused by Halley's Comet approaching in 1986. Individual issues can be unwelcoming but there's something insightful to be found in every story. The *Hicksville* collection reprints most, but not all of 1-10, other than 'Café Underground' and 'The Last Fox Story', and also includes extra material.~SW

Recommended: 1-10

PICTOPIA

Fantagraphics: *4 issues 1991-1992*

On the basis of the first issue one might almost think publisher and co-editor Gary Groth was running an experiment to see how far he could push his audience before a cry of 'King's new clothes' issued forth. Almost wilfully empty and insubstantial strips jostle for place with material that its creators seem to consider avant-garde, and the only notable content in seventy-two squarebound magazine-sized pages is Solano Lopez and Panosetti's harrowing strip about the Argentinian police junta. As Ambrose Bierce had it, the covers are too far apart. 2 starts with much more of the same before being redeemed by a glorious Jim Woodring 'Frank' strip, and the hefty opening chunk of Jacques Tardi's 'Griffu', which concerns a 'legal adviser' for whom a simple case becomes a complex web of property fraud and murder. Tardi's on top form interpreting Manchette's well-paced plot, and it's the highlight of the following two issues. They're also blighted by substandard filler material from known and obscure alike, although, covers apart, there's a rare chance to see Chris Ware's work in colour. It's oddly distracting and sadly disappointing. There's so much poor content, no issue can be wholeheartedly recommended, but the Tardi strip is worth anyone's time.~FP

THE PICTURE TAKER

Slave Labor: *One-shot 1998*

A short story written by Phillip Hester and drawn by Mike Worley. The protagonist is Jeff, a young parapsychology researcher, who returns to his home town to bail out one of his experimental subjects and is reminded of his high-school years as an unhappy bystander and observer. The artwork is in the style of Hanna-Barbera animation, but it's obvious by the third page that this is a serious, indeed, sombre story about alienation. This is a fine piece of short fiction, which makes particularly good use of the supernatural elements.~FC

Recommended

PIGHEAD

Skip Williamson: *One-shot 1993*

Underground Comix veteran Skip Williamson self-published this one-off collection of all new strips plus a rather self-indulgent prose piece. The artist's smooth, pop art style appears to have changed remarkably little since the 1960s, and the first strip, 'Halsted Street', is something of a neglected gem. This frank and funny look back at the author's involvement with various crooks, thugs, mobsters, cokehead girlfriends and pornographers completely overshadows the rest of the title's rather mediocre content.~AL

PIN-UP

Blasé Publishing: *3 Volumes 1998*

Dottie is girlfriend to G.I. jerk Joe, who is shipping out to the Pacific theatre to fight in 1942. The story follows their lives after their romantic split, with Dottie becoming the model for Poison Ivy, a vampy propaganda newspaper strip, while Joe is suffering a nightmare war. He finds some comfort in the Poison Ivy strips, and becomes obsessed with the character, oblivious to the fact that it's his ex-girlfriend. Dottie is a thinly-veiled Bettie Page, down to the recreation of some famous poses, and cameos by others associated with her. This is a good, multi-layered story by Yann, with excellent artwork by Berthet and colouring by Topaze, which gives the books a convincing 1940s look. The series has continued in France for a further two albums.~DB

PINEAPPLE ARMY

Viz: *10 issues 1988-1989**

A translation of the Japanese comic written by Kazuya Kudo and drawn by Naoki Urasawa. Jed Goshi has bushels of combat experience, and now he lives in New York offering combat instruction to civilians. At the beginning of each assignment he sternly tells the client that he'll teach them to fight but won't do their fighting for them – but guess what's happened by the end of the issue. The first few stories (1-3) are fairly down-to-earth, dealing with ordinary New Yorkers faced with trouble they can't face alone. These are quite fresh and imaginative, especially 1, although the logic and psychology in each is... eccentric. However, from 4 on, it's all foreign governments and guerrillas, spies and gangsters and heroic mercenaries, and we go from eccentric to boring and witless. The art is consistent and effective throughout, and particularly good at differentiating characters with just a few lines.~FC

Recommended: 1

PINHEAD

Marvel/Epic: *7 issues 1993-1994*

Spin-off from Clive Barker's *Hellraiser* series starring eponymous demon and sundry Cenobite pals'n'gals. Leaden writing and sub-professional artwork make what should be stomach-turning violence seem very dull indeed.~HS

PINHEAD/MARSHAL LAW: Law In Hell

Marvel/Epic: *2 issue microseries 1993*

Pat Mills and Kev O'Neill's vigilante takes on the villain from the *Hellraiser* movies, in a pointless crossover that just proves both characters are way past their sell-by date.~HS

PINK DUST Morphine Dreams

Kitchen Sink: *One-shot 1998*

James O'Barr's name is prominent on the cover, and he describes the contents as an exercise in self-indulgence, which should tell you all you need to know. While it's odd to see O'Barr attempting humour, this is still an issue too long.~DB

PINKY AND THE BRAIN

DC: *27 issues, 1 Special 1996-1998*

Making their TV and comic debut in *Animaniacs*, where they returned after cancellation. Pinky is the good-hearted but dumb "assistant" of The Brain, an evil genius hell-bent on conquering the world. Only two things really stand in the mastermind's way. One is, of course, Pinky. The other is the fact that they are both laboratory mice. Disappointing series of anemic stories that concentrates far too much on parodies and with watered down jokes that generally fail to match the skill or pace of the TV show. On very rare occasions, however, it does all fall into place such as in the sequel to 3's awful 'Verminator', entitled 'Verminator II' (16) or 25, the full length 'The Dark Pinky Returns', itself a follow up to the lead story lampooning Batman in the first issue. Dedicated fans only.~WW

PINT SIZED X-BABIES

Marvel: *One-shot ('Murderama') 1998*

This features the baby-sized X-Men created by Mojo, the interdimensional villain who used to rule a universe governed by the laws of television as opposed to physics or any other system that makes sense. Their enemies are the Brotherhood of Mutant Bullies and the plot involves the two teams of mutant rugrats in a rigged game show, all for the delectation of the ratings-hungry Mojo. It's a complete mess, fraudulently passed off as a fun romp.~WW

PIPSQUEAK PAPERS

Woodworks: *One-shot 1976*

Eros: *One-shot 1996*

Wally Wood drew the three episodes of his naughty fairy fantasy for his *Witzend* magazine in 1967 and 1968. The hero is homunculus Pip, who is in love with beauteous nymph Nudine. These are a delight to read although the humour is distinctly adult. The 1976 collection also includes his later strip 'Dragonella' from 1975's *Heroes Inc.* 2, which sexes up a few fairytale clichés. In the Eros reprint these strips are accompanied by three more risqué pastiches – 'Handsel and Feetsel', 'Sinner Ella' and the unforgettable 'Disenchanted Prince'.~SW

PIRACY

EC: *7 issues 1954-1955**

Gemstone: *7 issues 1997-1998*

Commonly perceived as being introduced by EC when forced to discontinue their horror and crime lines, this was actually published as a complementary title, not a replacement. Historical seagoing stories obviously appealed to artist Reed Crandall, who is on top form throughout the run, with his finest tales being the mystery of pirate Jean Lafitte in 5, and Blackbeard's encounters with the scheming Stede Bonnett in 3. Wally Wood's tale of mutiny in 1, and the work of George Evans throughout, are also excellent, while mention must be made of Bernie Krigstein's simple yet stunning cover to 6. A blazing orange sun shines down on a floating castaway, and Krigstein's bold use of colour and space are outstanding. His interior work also continues his tinkering with the approved format for comic pages, and he's given strong material, the best being 'Salvage', a superior EC-style story of revenge and retribution. Sadly, over the entire run there are a few too many of these stories along with dumb twist-in-the-tail features, and Graham Ingels is wasted on a fair proportion of them. His best is 3's 'Slave Ship', concerning a kidnapped farmer. For some reason the odd numbered issues are consistently superior to the even, but all are collected hardbound in a slipcase alongside collections of *Aces High*, *Extra!* and *Psychoanalysis*. The Gemstone issues are facsimilies, collected in two bound volumes.~WJ

PIRANHA PRESS Graphic Novels

DC's early 1990s Piranha Press imprint thrashed around with little identity beyond the cover designs, stringing together such disparate items as children's fairy tales and drug-fuelled private detectives. By and large wilfully uncommercial and seemingly unedited, the list appears to have taken the 'throw it at the wall and see what sticks' approach. The pick of the bunch is Kyle Baker's *Why I Love Saturn*, a wryly observed dissection of twenty-something values and relationships with astonishingly sharp dialogue and stunningly expressive, yet simple art. It's also screamingly funny, commendably unsentimental and just waiting to become a movie (without a word changed, please). *The Hiding Place* is also noteworthy. Sumptuously illustrated by Steve Parkhouse, Charlie Boatner's modern fairy-tale mixes a human child with mythical and extinct creatures, the last of whom gravitate towards this hidden land. Having to save the hidden world from troglodytes causing industrial pollution, Jonathan proves resourceful. If the allegories to reality are occasionally a little too marked, Parkhouse's excellent cartooning always compensates, and there's a refreshing lack of the twee factor that often scuppers similar ventures.

As for the remainder, well, it's difficult to love or cherish any of them. The work of Alec Stevens is very much an acquired taste. *Sinners* has a knowing narrative as the errors of youth are contemplated with hindsight, drawn in a delicate, heavily contrasted style, and *Hardcore* concerns a gang of skinheads and what occurs when a member wants a change of lifestyle. Stevens' art is stylised gloom, and largely inappropriate for both of his stories. *The Wasteland* is a collection of one-page cartoons from the people responsible for the illustrated fiction of *Beautiful Stories for Ugly Children.* Dave Louapre writes, and Dan Sweetman illustrates largely pithy downbeat comments on the human condition. Infuriatingly recondite references mixed with shallow observation makes for an unsatisfying and rarely funny combination. If you want to read about a delusionary psychotic who believes he's a private eye, don't bother with *The Drowned Girl,* get *The Bogie Man* instead. The former's combination of ugly art and nonsensical story is intended as a commentary on the hollow values of society, but the total lack of any wit in making the point renders it impotent. If you ignore the advice, and enjoy *The Drowned Girl,* there's plenty more thrashing at society with a balloon on a stick in Jon Hammer's following graphic novel, *Nation of Snitches. Mars on Earth* is mundane prose with illustrations. Straining to be hip and knowing, it's derivative and obvious, with not an original observation in sight.~WJ

PIRATE CORP$!

Eternity: *4 issues 1987-1988**

Slave Labor: *6 issues, 1 Special 1989-1993, one-shot ('The Bummer Trilogy') 2001*

Pirate Corp$!* began as an interstellar adventure strip with a dash of humour, and the Eternity issues follow that through. In his introduction to Slave Labor's reprinting of these issues as *Pirate Corp$!: 'The Blunder Years', creator Even Dorkin calls them 'awkward and amateurish'. He's lying. They're solidly crafted stories displaying a precocious talent and a very confident début, their only failing being that they don't match the later material. The science-fiction adventure aspects are minimised in the special which bridges the first and second series, and the Slave Labor issues concentrate more on the cast, with Dorkin's alter ego Halby more often than not centre stage. 3's trip to the supermarket or 6's trying time in police custody give a good feel of the series as a whole. The one-shot *Vroom Socko Special* reprints a story originally run in the UK's *Deadline,* featuring the unpleasant pirate-ship captain. 1-4 and the special are collected. From 6 *Pirate Corp$!* is retitled *Hectic Planet,* as belated affirmation of the change of emphasis, and *Hectic Planet* stories can be found in *Dark Horse Presents* 118-120, three good stories of failed love conveniently reprinted as 'The Bummer Trilogy'.~FP

Recommended: Series one 4, Series two 1-6, one-shot

The P.I.'s

First: *3 issue miniseries 1983-1984*

Detective title shared by Michael Mauser, seedy detective from *E-Man,* and Ms Tree. The mixture of humour and pathos essential to Mauser strips doesn't mix well with the more traditional detective fiction of *Ms Tree.*~WJ

PITT

Image: *9 issues 1993-1995*

Full Bleed: *12 issues (1/2, 10-20), one shot ('The Blood') 1995-1999, 5 issue miniseries (Pitt Crew) 1998-1999*

Created by Dale Keown immediately after his stint on *The Hulk,* Pitt is an unstoppable monster warrior who channels the aggression used against him to augment his own strength. He shares his consciousness with a benign intelligence named Jereb, and has a genetic code identical to that of Earth boy Timmy Bracken, who lives with his Gran'pa (Pitt is actually Timmy's unborn twin). The war planet that bred him consider Pitt a possession to be returned, and on Earth he's tracked by an agency of super-powered operatives. Another key member of the cast is formidable werewoman Lupé Silva, who debuts in 5. Keown plots and draws throughout, using various scripters, including Steve Gerber on 9-10, the first of which has Pitt's origins revealed to him by Jereb. By this time Jereb has also bonded with Timmy, and we learn more of Pitt's background in 11. In 15, another key issue, we learn how Pitt first encountered Jereb, and when he returns to Earth after five years it's to a newly teenaged and delinquent Tim Bracken, who meets Lupé in 17. When Pitt later advances on The White House the military are desperate enough to take World War II experiment Captain Curtis (Jacob Kurtzman) and his sidekick Buchman out of the freezer to defend their President.

Pitt Crew is reserved for tales outside the main continuity plotted by Keown, but drawn by other artists. Pitt is an unchallenging concept, but Keown uses his considerable skills to deliver the "hulk smash" payload with impact and a minimum of extraneous detail. 1-9 were reprinted in two paperbacks.~SW

The PITT

Marvel: *One-shot 1988*

This one-shot ties into the *Starbrand* and *DP7* continuities, although it's characters from *Spitfire* that play the largest part. It details an explosion that turns Pittsburgh, and several miles surrounding the city, into radioactive mutagenic goop, and the aftermath thereof. It sets up tragic repercussions for several characters, and the story continues in another one-shot *The Draft.* It's formula material throughout.~HS

PIXY JUNKET

Viz: *6 issue miniseries 1993**

A mythical woman buried for centuries emerges alive and well, causing a six issue chase between assorted parties interested in controlling her. The pay-off in 6 is interesting, but doesn't compensate for the lack of plot in the preceding five issues.~WJ

P. J. WARLOCK

Eclipse: *3 issues 1986-1987*

What few royalties this outrageously wholesale *Cheech Wizard* rip-off may have earned should have been passed to Vaughn Bodé's estate. Lame humour abounds from newspaper cartoonist Bill Schorr.~FP

PLACES THAT ARE GONE

Aeon: *2 issue microseries 1994*

A day in the life of Joe, who's unemployed, but has been unable to get started on his art for several months, although he is conceptualising. With his girlfriend demanding some progress, Joe wanders Seattle bumping into friends and acquaintances, justifying his lack of progress to each. Mark Campos pulls of the difficult trick of sustaining a talking heads comic over forty-four pages via a varied cast. Not quite satire, it depends on recognition of type and will irritate as many people as it entertains.~FP

PLAN 9 FROM OUTER SPACE Thirty Years Later

Eternity: *3 issue miniseries 1990*

The joy of the original film *Plan 9 from Outer Space* was director Ed Wood's exuberant ineptitude, revealed in the shaky sets, appalling cuts, bad acting and nonsensical plot. Thirty years later we have a comics sequel, dubiously claimed to be authorised. It's played relatively straight by writer John Wooley and artists Joe Zabel, Greg Budgett and Gary Dumm resulting in just another mundane comic.~WJ

Basil Wolverton's PLANET OF TERROR

Dark Horse: *One-shot 1987*

Black and white reprinting of some of the most bizarre science-fiction/horror stories of the 1940s and 1950s. Represented are 'Monsters on Mars', 'Devil Birds', 'Planet of Terror' and the infamous 'The End of the World', which foreshadows his later work illustrating the Bible, especially the section dealing with the Revelations of St John. Also includes a text history, and a cover by Alan Moore.~WW

Recommended

PLANET OF THE APES

Marvel: *29 issues 1974-1977*

Movie adaptations are always very tricky to handle, and with a licensed title like *Planet of the Apes* the results could have been disastrous. Luckily, writer Doug Moench was just the man for the job. In addition to adapting all five films, he successfully expanded the Apes concept with his own highly inventive spin-offs that at the time even transcended the source material.

Of the adaptations, *Planet of the Apes* (1-6) was hampered by George Tuska's totally inappropriate artwork, while *Battle for the Planet of the Apes* (23-28) was scuppered by a very unsettled creative team. On the other hand *Escape from the Planet of the Apes* (12-16), drawn by Rico Rival, was suitably poignant, while *Beneath the Planet of the Apes* (7-11) and *Conquest of the Planet of the Apes* (17-21) were both extremely successful, thanks in no small part to Alfredo Alcala's beautiful visuals. The first two adaptations were reprinted in colour as eleven issues of *Adventures on the Planet of the Apes*.

The magazine's highspot, however, was Moench's original creation 'The Chronicles of the Planet of the Apes', which was effectively a highly imaginative fantasy strip only tangentially ape-based. In Tom Sutton he had an artist of seemingly limitless imagination, and all its instalments (12, 15, 17, 24, 29) are well worth a look. Moench's other original strip, 'Terror on the Planet of the Apes' (1-4, 6, 8, 11, 13, 14, 19), also had an excellent start due to Mike Ploog's superb artwork. While these early instalments kept closely to the milieu of the first two films (and, indeed, to the TV show), the strip went horribly askew with the introduction of some very inappropriate science-fiction elements, and the post-Ploog issues (20, 23, 26-28) are simply a mess.~DAR

Recommended: 1-4, 6, 8, 11-15, 17, 24, 29

PLANET OF THE APES

Adventure: *24 issues, 1 Annual 1990-1992*

Given the concept of *Planet of the Apes*, it's a curious editorial decision to present it as episodes of *Dallas* (and occasionally *The Waltons*) with apes and the occasional bout of violence. Even stranger then that the cast are consistently bland, with only the morally questionable scientist Dr Moto evincing any strong characteristics. Starting the run with a battle for control of Ape City, 6 follows, serving as a primer to the city and its inhabitants. Thereafter it's largely soap opera all the way. The initial Kirbyesque art of Kent Burles and Barb Kaalberg succeeds in creating an individual world, but their successors, M.C. Wyman and Terry Pallot (from 12), stick closer to the look familiar from films and TV. Charles Marshall writes the entire series, and his most successful effort is the concluding storyline in 21-24. It returns the vindictive Governor Breck from the film *Conquest of the Planet of the Apes* (which was reprised from a different viewpoint in 19). It also evokes the atmosphere of the films for the first time, and sheds the complacency affecting the title by dispensing with some regular characters. Unfortunately, by this point Wyman is being inked by Peter Murphy, resulting in substandard art. Those wanting more of this version should also look for the *Ape City* and *Urshak's Folly* miniseries, and a teaming with the characters from *Alien Nation* in *Ape Nation*, while 1-4 are collected.~FP

PLANET OF THE APES

Dark Horse: *3 issue miniseries 2001*, 6 issues 2001-2002**

The miniseries, subtitled 'The Human War', is a good representation of the flavour of the franchise, heavy on the allegory and super-violent, but the rest is tedious and sexist, abounding with clichés, solecisms, and a rotten mystery ghost-robot-ape. It's tough to keep track of which ape is which, and the effort is not repaid, plus: the super covers are mostly photorealistic but inside it's the old "I wonder if we should make it a little bit more manga-ey" art.~GK

PLANET OF VAMPIRES

Atlas: *3 issues 1975*

A team of astronauts return from a ten-year mission to discover there have been some changes back home. Humanity now consists of a small group of technologically advanced vampires, and the scavenging majority living in ruins. As a variation on *Planet of the Apes* it's dull stuff, not at all redeemed by dashed-off Russ Heath art in the third issue.~FP

PLANET TERRY

Star: *9 issues 1985-1986*

When Harvey stopped publishing Marvel employed their staff for the Star line, a blatant attempt to develop characters for young children that could be licensed for the lucrative TV and toy market. They were almost all awful, the contrived nature of the project resulting in the vomit-inducing likes of *Strawberry Shortcake*. The one concept to transcend the creation-by-committee origin was *Planet Terry*. Make no mistake, it's still a strip intended for the very young, but, as written by Dave Manak, from the title pun on down there's a charm and innocence that works. In no small part this is due to the simple and excellent art of Warren Kremer. Terry is searching the universe for his parents, accompanied by surrogates in the form of the alien Omnus and a decidedly female robot. If you have to investigate the Star line this is the title to find, and any issue will do as a sample.~FP

PLANET 29

Caliber: *2 issues 1991*

Kevin Atkinson has enough interesting ideas and characters to sustain a whole line of titles, but forces so many into his story that there's little room remaining for a coherent plot. His art is a still developing almost *Mad*-type parody style, and this series was curtailed after two issues of a proposed four.~WJ

PLANETARY

WildStorm: *15 issues, one-shot (Planetary/Authority:'Ruling The World') 1999-2001, one-shot (Planetary/JLA: 'Terra Oculta') 2002*

It's difficult to describe or review *Planetary* in a way that does it justice without giving away its almighty twist. The more you know about the comic medium's history the more you'll get from this incredibly multi-layered opus in which Warren Ellis and John Cassaday reach the zenith of WildStorm's mission to drag mainstream comics out of the ghetto and into the 21st century. Imagine Grant Morrison's *Doom Patrol* raised on *2000AD*, slipped a tab of acid and asked to create a *Challengers of the Unknown* for the new millennium and you might have an idea of the heights this series reaches.

On 1's cover, the eponymous group of heroes are referred to once, and once only, as "Archaeologists of the Impossible". Don't forget that, nor dismiss any of the apparent in-jokes or homages as anything less than another stitch in a very rich tapestry. And remember that mainstream comics haven't always been dominated by superheroes. The adventure starts with operative Jakita Wagner approaching Elijah Snow and offering him a job with Planetary, a mysterious organisation funded by the even more mysterious Fourth Man. Snow is 100 years old but, like many WildStorm characters, doesn't appear to age. Neither does Doc Brass, a 1940s hero whom they free from fifty years of guarding a terrible discovery on the nature of reality. After that, each issue is a self-contained story as Planetary investigate and save things that have been forgotten or lost, the absence of which makes the world a less interesting place. Except there is so much more bubbling only just under the surface. "The universe is unreal" states Hark in issue 1, "A multitude of possible alternatives, none of them quite real, all of them contributing towards the actual reality." Blink and you might miss the truth of what this series is really about.

Recommending individual issues is difficult; the bigger picture is greater than the sum of its parts, and while you can dip in and out, this isn't where the real joy of *Planetary* lies. If you haven't got the twist by 6, this issue – Planetary's first encounter with their ongoing nemeses The Four – smacks you in the face with it. Ellis uses 7 to get his own back on DC for his departure from *Hellblazer*. From then on, *Planetary* continue to excavate the "Secret History of the World" as Snow tries to piece together missing pieces of his memory. Figure out for yourself exactly what it is that needs to be remembered and, once, you have, go back and read the series again so that you can pick up all the pieces of the jigsaw you missed the first time round.

Whether the series was intended to finish with 15 is unclear. You can read a definite end into it, but publication simply became more and more sporadic until the comic didn't come out again. Nonetheless, 15, and in particular its final panel, works nicely as a tie-up. Perhaps the easiest way to describe *Planetary* is as *1963*'s evil twin, but perhaps it's really the other way round. 1-12 are available in two collections.

For 'Ruling the World' artist Phil Jimenez joins Warren Ellis, the regular scribe of both titles, as he pens a crossover in which the two teams never actually meet. Entertaining enough but, like most crossovers for the sake of it, ultimately pointless. Planetary/JLA asks "What If Planetary were Bruce Wayne, Clark Kent and Diana Prince?" They wouldn't be as interesting as the real *Planetary*, or the *JLA*, is the simple answer. This ill-thought out cash in makes absolutely no sense whatsoever unless you've read and figured out the entire run of Planetary, and if you have, it's still pointless. Best not to bother. ~JC

PLASMER

Marvel UK: *4 issues 1993-1994*

Evil scientist attempts to give herself superpowers, but the experiment goes awry, generating a separate, powerful being embodying her darkest secret...her conscience! Probably the worst art ever in an allegedly professional comic from Pascual Ferry, but wacky, irreverent scripting by Glenn Dakin makes this a fun read.~HS

PLASTIC FORKS

Marvel/Epic: *5 issue miniseries 1990**

In this short and simple story Ted McKeever asks some very big questions. Like: "What is humanity?" The plastic fork of the title is a metaphor for a society so throwaway that it's losing a grip on what makes us human. All this within an adventure story about the not very heroic or sympathetic Henry Apt, who, like Dr Frankenstein, realises his mistake in dabbling with nature too late. He tries to make a device that allows a single person to create and fertilise their own eggs. His mad partner grafts it onto Henry's groin when he's attacked by the lab animals he's been experimenting on and he's suddenly transformed from God-like doctor to victim of science. Issue 1 kicks off with a load of nonsensical technobabble, which doesn't matter because it's all symbolic anyway. Bear with it. After this slow start the pace of the series builds inexorably to a crushing climax. McKeever's painted art for the series is bright, lush and expressionistic, making bold use of splash pages and half-page frames to tell his fable. An excellent – and deceptively simple – series.~FJ

PLASTIC LITTLE

CPM: *5 issue miniseries 1997**

Based on a Japanese cartoon show, this translated manga by Satoshi Urushihara features the further adventures of the Petshop Hunter Spaceship Cha Cha Maru, and her crew as they rescue animals from the atmosphere of a gas giant planet. One suspects poor or savage editing as none of it makes much sense, and story pages seem to have been sacrificed for repeated scenes of the heroine taking her top off or having a shower. For only the lonely.~WW

PLASTIC MAN

DC: *20 issues 1966-1968 (1-10), 1976-1977 (11-20), 4 issue miniseries 1989, special 1999*

Jack Cole's *Plastic Man* is one of the standout comic strips of the 1940s. Small-time crook Eel O'Brian escapes in the wrong direction after a robbery, standing under a tipped acid vat, stumbling through a swamp and awakening in a monastery able to stretch or mould his body into any shape or form. Instantly repenting, he decides to use the ability for good. That was the origin from *Police Comics* 1. Cole wasn't interested in straight superheroics. His *Plastic Man* was a well plotted gag vehicle from the off, and his penchant for slapstick was astounding, matching the best cartoon shorts. Accompanied by rotund, inept helper Woozy Winks, a man who couldn't be harmed in any fashion, Plastic Man's career was further complicated by maintaining his O'Brian persona to ingratiate himself with the underworld for information. A decent selection of Cole's *Plastic Man* is reprinted in *DC Special* 15, and there are also three bootleg comics reprinting Cole's *Plastic Man* issued by a company called Super, who'd acquired the original printing plates. Those who can afford it, though, should go for the four hardcover *Plastic Man Archives* volumes reprinting *Police Comics* 1-49.

Cole's *Plastic Man* set the standard for all humorous superheroes to follow, and DC's 1960s revival just wasn't up to scratch. A try-out of sorts had been planted in *House of Mystery* 160, and the series followed. Win Mortimer's stiff art was unsuitable, and the scripts concentrated on TV, film and comics parody, shoehorning Plastic Man into uncharted territory. DC might as well have created a new character for all the relation this had to the original. There were some surprisingly successful team-ups with Batman in *The Brave and the Bold*, all the more astonishing for Plastic Man being played straight in 95, and the idea working. The 1970s continuation was far better. While the scripts were generally weak, Ramona Fradon successfully recreated the visual gags and cartoon style. Sample any one for the art. Also of an acceptable standard was an early 1980s run in *Adventure Comics*.

The 1980s miniseries was excellent and controversial. While sticking largely to Cole's vision, with some brilliant cartooning from Hilary Barta, it attempted to rationalise Plastic Man as part of DC's ongoing continuity. That being the case, though, it was clear Plastic Man's wacky, distorted world couldn't be the same one that Superman and Batman occupied. Or could it? Sadly, it could, and while one should be thankful that the contrived explanation leaves Plastic Man and his world intact, it seemed pointless. It did allow for some nice 'reality check' pages from Kevin Nowlan, and, the continuity apart, Phil Foglio writes a great *Plastic Man*. Starting with a revised origin, it's manic gag-filled heaven from beginning to end, and one suspects Cole would have been pleased with the results. One might have thought he'd also be happy at the idea of a Ty Templeton written special, but while gag-packed and never bad, it just doesn't quite gel either.~FP

Recommended: Miniseries 1-4

PLASTIC SODA

Didactic Chocolate Press: *4 issues 1996*

There's a certain stubborn persistence to be admired about anyone who can put out so many issues of an anthology where almost all the contributors lack any talent for comics whatsoever. It's also odd in the face of the intelligent essays about various topics in 1. Don't be fooled by the intriguing covers, there are no comics of interest to be found inside.~WJ

PLASTRON CAFÉ

Mirage: *5 issues 1993*

Sooner or later every publisher seems compelled to issue an anthology. Mirage's seems a little more eclectic than many. Primarily science-fiction-based, it resurrects some good, defunct series as well as previewing new titles. In the former category are Anthony Smith and Eric Vincent's 'Alien Fire' (reprinted in *Alien Fire*: 'Pass In Thunder') and Tom Stazer's 'Spaced', both short-lived series from the mid-1980s, which

* Available in a collected edition

appear in 3 and 4. Best of the new material, 'North by Downeast' is a spin-off from *Teenage Mutant Ninja Turtles* featuring space lobsters, written by Kevin Eastman and drawn by Rick Veitch (1-5). Previews include A.C. Farley's 'Bioneers' (4,5) and 'Xenotech' by Michael Dooney, both of which are promising.~NF

PLATINUM GRIT

Dead Numbat: *10 issues 1994-1998*

Where to start? Perhaps, if such a thing is conceivable without reading the comics, that this is a combination of *Tank Girl* and 1950s British film comedies. The alluring and appallingly behaved Nils works in the Platinum Grit café, as does Jeremy, who's on the verge of inheriting a Scottish castle. All that stands in his way is the homicidal Dougal. Thereafter there's a lunatic detective, abduction by aliens and assorted other madness, all incorporated in impressively logical fashion. Doug Bayne and Danny Murphy's scripts move from extreme slapstick violence to fantasy, underpinned by a great sense of humour and a dash of the surreal. The jokes are good and the cast are extremely confidently defined, particularly Nils. The excellent lively cartooning of Trudy Cooper, who also contributes to plots, is instantly likeable and the greatest shame is that *Platinum Grit* has been little seen outside its original Australian publication. A sample for overseas is numbered '1 & 2', and combines those issues. Anyone looking for a good laugh from their comics has no excuse for not logging onto www.platinumgrit.com where all issues are being made available online. Slowly. "We're easily distracted", the creators claim. Even better, a never published 11 can be found, which is just as well considering Jeremy's predicament at the end of 10.~FP

PLAY-GROUNDS

Fantagraphics: *One-shot 1991*

Two interesting and well-drawn black and white stories by Peter Rees. The first is a slightly scary *Toy Story* affair; the second deals with the history of murder and death in a small town. Mature without being pretentious, so what adult comics should be.~DB

Recommended

PLEASANTLY DISTURBED

La Comédie Illustrée: *2 issues 1996-1997*

A French production translated into English, 1 details that awkward dinner at which a young man introduces his fiancée to his family. Sharply observational writing from Christopher and almost cubist freehand cartooning from Jean-Philippe Peyraud make for an appealing dish. Adding that final touch of elegance, recipes for each course consumed are included as text pages. It's fine stuff, as are 2's stories of the unwelcome visitor, and how an old flame causes marital tensions.~WJ

Recommended: 1-2

PLEEBUS

Orchard Books: *4 volumes 1996-1998*

Rising Trout Press: *4 volumes 2001*

Four sixty-two page pocket sized paperbacks by Nick Abadzis about a plucky boy and girl who are visited, in 1, *The Amazing Mr. Pleebus*, from the mysterious planet Pleebus by the gentle white shape-changing horticulturalist Mr. Pleebus, whose only utterances are his own name or slight variations on it. The sweet cartooning easily conveys the joys of unembittered imagination. The invasion of the children's school in 2, *The Freaky Beastie of Hill Road School*, by Subeelp the Anti-Pleebus, is particularly thrilling. 3, *The Magic Skateboard*, suffers slightly from the relatively late appearance of Mr. Pleebus but the skateboard, Mr Frog, and Eric The Lighthouse are all good characters. 4 is *Voyage to Planet Zoon*, which is oddly reminiscent of the Death Star from *Star Wars*, though inhabited not by Imperial goons but by a naughty little alien. These are smashing fun for kids, but only miserable bleeders of any age wouldn't enjoy them, and they'd enjoy them better in the Rising Trout editions, which are larger and printed on better paper.~GK

PLOP!

DC: *24 issues 1973-1976*

Plop! was subtitled "The magazine of weird humour", and on the whole lived up to it in wonderful fashion, mixing single-panel gags with amusing, macabre tales by some top talents. 1-19 featured unique covers either by Basil Wolverton or Wally Wood. Inside you could find the art of Berni Wrightson in 1 and 5, Nick Cardy in 4, Mike Sekowsky in 6, George Evans in 1, Murphy Anderson in 5, Frank Robbins in 4 and 17, Ramona Fradon in 8, Alex Toth in 11, Steve Ditko in 16 and Wally Wood in 4. Mainstays were Lee Marrs and David Manak, while the most prolific regular scripter was Steve Skeates, who worked wonderfully with Sergio Aragonés, the comic's real star. He contributed to every issue and usually drew the amusing framing sequences staring Cain, Abel and Eve, hosts of DC's more realistic mystery titles. The earlier issues are the funnier, appeal diminishing as *Plop!* became giant-sized from 21, with strip-gag covers. Nevertheless *Plop!* remains a milestone in DC humour publishing.~HY

POE

Cheese Comics: *6 issues 1996-1997**

Sirius: *24 issues, 1 Special 1997-2000*

After the death of his wife Lenore, Edgar Allan Poe meets an angel, Israfel, who tells him to follow the raven in order to defeat twelve demons and be reunited with her. Gaining a cat, Pluto, some magical trinkets from a witch, the companionship of Dr Patrick Ravenwood and Finster Habersham, and a recurring foe in Mad Meg Mayflower, Poe faces the first demon in New York before the end of the Cheese Comics run. 1-6 of the Sirius series begin with Mama Zagroot's Mid-Nite Carnival, before Poe faces the second demon in the House of Usher. Poe visits the small town of Dover in 8-12 and faces the third demon. 14 Introduces Charles Auguste Dupin, who joins the group in search of a killer leading to the conclusion of the first third of the story in 18. 19-24 has Poe facing danger on a balloon journey over the Atlantic as well as a backup story, drawn by Rick Geary, featuring Mad Meg, a demon in a bottle, the Lords of Brass (from Cheese Comics 4-5), The Silent Order and revelations about the true relationship between Poe and Meg. In the 1998 Colour Special Mad Meg and Poe come to an understanding, before continuing Poe's quest together. Jason Asala has incorporated Poe's life and works into his strip (in themes, story titles and characters) in an interesting and entertaining manner, but only Mad Meg really stands out as a developed supporting character. The artwork improves throughout the series, from a less extreme Ted McKeever, in heavy greyscale, to a less blocky style, with more realistic features.~NF

POGO

Fantagraphics: *11 Volumes 1992-2000*

Pogo is regarded among the all time great newspaper strips, yet more than any of its fellows, it is an acquired taste today. Set in the Okefenokee swamp, Pogo resides among a startling selection of eccentric creatures, loosely based on stereotypical human perception of their personalities, but parading their idiosyncrasies. Pogo the possum is an innocent among the knowing, which include the crafty Albert, an alligator not averse to the threat of brutality, the perpetually grumpy Porkypine, fraudulent scientist Howland Owl, and the turtle Churchy Lafemme. The latter's name indicates the type of humour to be found in the early years of Pogo. Walt Kelly moved the 'funny animal' genre a few steps ahead of its Disney influenced predecessors, most obviously drawing on music hall comedy. From the earliest days of the strip in 1948 Kelly proves a master of the vaudeville gag as his cast acted their way through his increasingly offbeat scenarios, most based on misunderstandings or misheard words. In one instance, though, he's not above appropriating Abbott and Costello's 'Who's on First' routine, and variations are not uncommon.

Kelly's CV included stints as a Disney animator and comic artist for Dell, where a prototype Pogo first appeared in *Animal Comics*. This background assured his cast was illustrated with a charm and panache learned from experience, and probably for Kelly's occasional and impressive use of visual puns. It meant that *Pogo* was an accomplished strip from the start. Satirical elements were a later addition, certain repeated jokes evolved over time, and recurring characters were added at a phenomenal rate, but almost all the fundamentals that saw the strip through 25 years of syndication were present from the beginning. Among Kelly's innovations was the courage, or instinct, to incorporate pure whimsy, sometimes eschewing a conventional gag altogether. He also instituted typefaces as a guide to character, initiated in 1950 during his first, muted, spell of political commentary with the gothic script used for the pompous Deacon Mushrat (4). The fast wordplay, puns and slapstick that constitute much of volumes 1-7, although masterfully constructed, are facets of humour not currently in vogue, and as such the reader's own liking for the style will determine their reaction to *Pogo*. Read en masse, as never originally intended, the style can become repetitive and the earlier volumes, while technically sound, have a limited entertainment value.

It's for political satire, though, that Pogo is best remembered, and although trial runs are reprinted in 4, 6 and 7 it's not until the strips in 8, from 1952, that Kelly decided to broaden the feature's focus. Small morality plays had been presented from the off, but Kelly's ire at the continuing anti-Communist witch hunts instituted and fanned by Senator Joe McCarthy, propelled Pogo's transformation. Many strips expose the hollow nature of McCarthy's rantings, and the 1952 elections were held amid widespread national paranoia, permitting Kelly to indulge in memorable wry observation. This really comes to the fore in 10, with McCarthy at the peak of his influence in 1953. Kelly satirises a misguided senator as the short-sighted Mole MacCarony, known as the world's leading bird brain, whose persecution of birds and their habits isn't in the least hindered by his constantly misidentifying them. Kelly then introduces a McCarthy caricature in the sinister and brutal Simple J. Malarky, as for over three months he savagely makes his point in strips reprinted in 10. Beyond the passion, the strength of this sequence is that it can still be read as innocent tomfoolery. Thereafter, for the most part, the strip returned to the vaudeville knockabouts.

These volumes each present approximately six months worth of strips, reprinting *Pogo* to 1954 with 11. They suffer from variable reproduction, with the early volumes in particular containing a few strips so poorly reprinted that significant artistic detail is lost, although this is a minor complaint when set against the availability of long out of print material. Mention must also be made of R.C. Harvey's informed introductions placing the strips in a wider context and pointing out references, for the most part beyond the knowledge of today's reader.~FP

POINT BLANK

WildStorm: *5 issue miniseries 2002-2003*

Cole Cash (Grifter) has to play detective to find out who shot fellow Team 7 member, John Lynch. He asks the Midnighter for information, which points to the involvement of ex-WildC.A.T.S. member, Tao as well as of Marc Slayton (Backlash). Ed Brubaker's hardboiled dialogue underscores this mystery, examining the continuing relationships of Team 7, but it's Colin Wilson's excellent, European-style artwork that makes this a treat.~NF

Professor Challenger:The POISON BELT

Tome: *One-shot 1997*

Adapted from the story by Sir Arthur Conan Doyle by Donald Marquez, whose art resembles that of Paul Gulacy or Bernie Wrightson in places. There's not a lot of action, but the growing atmosphere of dread is deftly handled as Challenger claims that a belt of air-borne poison is assaulting the Earth and gathers a small group of fellow adventurers at this house to find a solution or await their fate.~NF

POISON ELVES

Mulehide: *13 issues (8-20) 1993-1994*

Sirius: 70 issues +, 1 Special 1995 to date, 4 issue miniseries ('Lusipher & Lirilith') 2001, 3 issue miniseries ('Parintachin') 2001

The Mulehide issues continue numbering from *I, Lusiphur*, and also continue at magazine size to 15. There's a gradual progression in both the writing and drawing abilities of creator Drew Hayes for the first dozen or so issues, after which he has progressed to poor, but develops no further. Hayes very much bases his title on *Cerebus*. Similar page layouts and graphic elements recur, the pacing is similar, the deliberately ridiculous recurring character in early issues, Purple Marauder, behaves in similar fashion to the *Cerebus* loony and Hayes also has a story of several hundred issues to tell, broken into distinct story arcs. Sadly, he's not the storyteller, artist or satirist that Dave Sim is, so his perseverance is exemplary. The change from self-publishing to Sirius enables Hayes to take stock, and the title is stronger for it. Lusiphur joins a rogues-and-assassins clearing house in 2, broadening the supporting cast. The perpetually surly Lusiphur is largely one-dimensional, but the issues offering insight into his unsociable behaviour are among the best, particularly the harrowing recollections as he's confronted by his inner self while unconscious in 8. Otherwise *Poison Elves* is a curious blend. Some issues are little but fights (3, 15, 31), while others are more interesting pub conversations (11), and every now and then Hayes will throw in a completely contradictory element to shock (1, 35). Then there's the ability to ridicule his usually po-faced cast, such as the carnival issue 66. Countering this is the frequent inclusion of pages of text, often characterising a superfluous character, which do nothing to advance the story. Legitimate literary device, or waste of space, you decide.

From 30 the altogether more reasonable, but no less deadly, elf Jace has become a regular fixture, although he's been around since the early days. 38 and 39 end the story begun in 1, with some revelations about Lusipher, and the pair then begin travelling eventually stumbling into a quest on behalf of the elves council. Beefing up the cast from this point is the insecure, yet immensely potent, Wisp. Recovering from a life-threatening illness, detailed in 70, Hayes has placed *Poison Elves* on hiatus, although intends to continue when able.

The first miniseries details the relationship between Lusipher and the love of his life Lirilith, hinted at in the main title, but never explored in depth. It's a touching story in places, and puts the parent title to shame by having an artist, Jason Alexander, who can not only draw, but draw well. If you're tempted by *Poison Elves*, it doesn't get better than this. 'Parintachin' deals with the demon inhabiting Lusipher's cranium, who falls in love. It's drawn by the Fillbach brothers. Don't bother. The most interesting aspect of the title overall is the editorial page, which charts Hayes' progression from perpetual adolescent party animal to something approaching social responsibility via a string of failed relationships. Best noted as an acquired taste, *Poison Elves* maintains an passionate and vocal fanbase who vastly overrate the title.~FP

POKÉMON

Viz: *4 issue miniseries ('Electric Tale of Pikachu') 1998-1999*, 4 issue miniseries ('Pikachu Shocks Back') 1999*, 4 issue miniseries ('Electric Pikachu Boogaloo') 1999*, 4 issue miniseries ('Surf's Up Pikachu') 1999-2000*, 6 issue miniseries (Pokemon Adventures Part 1) 1999-2000*, 6 issue miniseries (Pokemon Adventures Part 2) 2000*, 7 issue limited series (Pokemon Adventures Part 3) 2000-2001*, 4 issue miniseries (Pokemon Adventures Part 4) 2001*, 5 issue miniseries (Pokemon Adventures Part 5) 2001*, 4 issue miniseries (Pokemon Adventures Part 6) 2001-2002*, 5 issue miniseries (Pokemon Adventures Part 7) 2002**

* Available in a collected edition

one-shot ('Revalation Lugla') 2000, one-shot ('Pikachu's Rescue Adventure') 2000, 3 issue miniseries ('The Power of One') 2000*

Magical POKÉMON Journey Magazine

Viz: *4 issue miniseries ('Part I') 2000, 4 issue miniseries ('Part II') 2000, 4 issue miniseries ('Part III') 2000, 4 issue miniseries ('Part IV'), 2000-2001, 4 issue miniseries ('Part V') 2001*

Toshiro Ono gets the credit and/or blame for the absolute torrent of comics material that followed in the wake of the *Pokémon* craze. In the future Pokémon (that's pocket monsters to you – and the young, cute, unevolved form of them, at that) are everywhere and young humans are actively encouraged to take a year out from their studies to capture, train and compete with the ones they have. Ash Ketchum is the boy who could be you, dedicated, decent and honest, and he just wants to be the best Pokémon trainer in the world. His special favourite is the yellow electrical mouse-monster Pikachu, and together with all the other Pokémon they've acquired together they wander the green and pleasant land (since most of the future looks like Kew Gardens) dueling other trainers and capturing more beasties. In 'The Electric Tale of Pikachu' they head to the mountains in search of Professor Oak, the world's top Pokémon expert and compiler of the Pokédex reference computer, the bible of the sport/philosophy/religion, capturing a Clefairy Pokémon on the way. This pretty much sets the scene for all following adventures: wander about, meet and be embarrassed by a girl, beat another Pokémon trainer. Usually that means the dastardly duo Team Rocket and their talking Pokémon cat (see 'Electric Pikachu Boogaloo') as they vie to gather more little monsters and slowly advance to the rank of Pokémon Master. It's formula comics production of the most basic kind, with one adventure indistinguishable from the next. The only variations are which new monsters are on show, or what new trick they've learned, such as 'Pikachu Shocks Back', which takes four issues to decide which Pokémon is the fastest in the Pokémon Derby.

As the movies were released the element of saccharine sweetness masquerading as an ecological message became much more obvious, even as traditional villain figures are brought in to move the stories towards a more westernised children's adventure model – at least for the various adaptations. Mewtwo is a cloned super-Pokémon who wants all the other pocket monsters for his own experiments, and the evil Pokémon collector in the second movie almost destroys the planet because he only hordes and does not use the Pokémon he captures. However the changes are not reflected in the regular "magazine" (in effect a comic with lots of puzzles and feature pages as well as strips) appearances, which kept to the simple, uncomplicated basics. Competently cynical, highly professional and totally unfathomable to any one over the age of seven.~WW

POLICE ACADEMY

Marvel: *9 issues 1989-1990*

Based on the Saturday morning cartoon rather than the movie series, this comic is a dismal effort with lacklustre scripts that even the excellent artwork of Howie Post can't make readable.~WW

POLLY AND HER PALS

Eternity: *5 issue miniseries 1990-1991*
Kitchen Sink: *2 volumes 1990-1991*

Cliff Sterrett's *Polly and her Pals* newspaper strip ran for over forty years, was consistently inventive and innovative, and remains a highspot in comics. At his peak Sterrett successfully combined straightforward gag humour with almost surreal illustration and sure sense of graphic design. The title is a misnomer, as the strip soon moved away from the glamourous Polly to concentrate on her father Pa Perkins, and his constant search for a quiet life in a house populated by an endless stream of Polly's suitors, dopey relatives, misbehaving pets and his dominant wife. Pa's a natural enemy of any mechanical contrivance and can be relied upon to fall asleep at the most inopportune moments, but has his wits about him and is generally more than a match for any situation. Commendably Eternity used a landscape format to reprint the black and white daily strips from 1927. The eccentric backgrounds and design are present, and while monochrome and the four panel structure limit Sterrett, in 1 at worst these are very good gag strips, and sometimes there are truly stunning elements. Early in 1927, though, Sterrett decided to step away from family comedy to produce a continuing adventure strip with the same cast. Editorial ineptitude means the contents of issues 2 and 3 are transposed, and while the strip is well drawn, the settings restrict the design, and Sterrett played far better with gags than adventure. It's on the colour Sunday pages that Sterrett's graphic innovation and whimsy is displayed to best effect, though, and the Kitchen Sink volumes collect those from 1926 to 1929. By this stage Sterrett had been drawing the strip for over fourteen years, and was combining elements of surrealism and cubism with straightforward narrative. The combination of first-class slapstick humour and strikingly designed artwork, the like of which wasn't seen again until the underground comics of the 1960s, makes for a neglected masterpiece, and it's tragic that sales apparently only warranted two collections.~WJ

Recommended: Eternity 1, Kitchen Sink vols 1 and 2

POOT

Fantagraphics: *4 issues 1997-1998*

It's rare that a title promises so much and fails to deliver quite in the manner of *Poot*. Walt Holcombe's previous work had been immensely promising, but this tale of lovesick bugs and snails (and, in 3, a naked man in a barrel) simply fails to connect, despite some beautiful artwork. Holcombe is clearly a major talent, but needs a different direction to bring that talent to fruition. The comics are almost pamphlet-like productions in odd sizes.~DAR

POP GUN WAR

Absence of Ink: *4 issues + 2001 to date*

Farel Dalrymple is a very talented artist capable of producing intriguing imagery in a variety of styles. What he's not managed to do is work his characters into any kind of cohesive narrative. Looks great, reading not advised.~FP

POP LIFE

Fantagraphics: *5 issues 1998-2001*

This anthology of stories by Ho Che Anderson and his associate Wilfred Santiago sets out, quite immodestly, to change comics history. Writer Anderson fancies this as a latter-day *Love and Rockets* with the main features being about the social life of a bunch of struggling musicians ('Naked Girls') and a girl's first time away from the family nest ('Miles From Home'). Santiago does a good, expressive job drawing 'Naked Girls' when he's interested (in 2 and in 5's 'Faith At 30') and Anderson's beautiful mix of woodcut-style chiroscuro and an excellent design sense never fails to impress. The first page of 4's stark 'Scream Queen' appears to be on the inside back cover of 3. The bottom line is that Anderson's writing just doesn't have the chops to deliver. *Pop Life* is full of strong visuals that are pissed away on his undisciplined, self-regarding witterings.~SW

POPCORN

Discovery: *One-shot 1993*

The term 'wholesome children's comic' is likely to cause grimaces in these days of political correctness, indicating an item devoid of any intellectual content or amusement value. Thankfully, *Popcorn* is precisely the opposite. In the manner of the best Disney material it's an absolutely delightful tale, to be enjoyed by everyone. Scott Deschaine's simple layouts and Bob Donovan's expressive cartooning ensures the younger readers won't be alienated, while Deschaine's plot about a department-store salesman working for a tyrannical, child-hating owner is sentimental in the best sense of the term. If only everything that can be categorised under old-fashioned values was as much fun.~FP

* Available in a collected edition

The Complete E.C. Segar POPEYE

Fantagraphics: *11 volumes 1986-1990*

In 1919 Elzie Crisler Segar started a newspaper strip for William Randolph Hearst called *Thimble Theatre*. Initially a gag strip about members of the theatre, it soon developed a strong cast, including Olive Oyl, Castor Oyl and Ham Gravy, and began to include longer adventures, without, however, neglecting the need for humour and a daily joke. Rumoured to be published by Hearst because he liked it (like *Krazy Kat*) rather than because it had a large initial following, all that changed with the introduction of an ugly sailor in January 1929.

In this story Popeye is employed as a one-man crew to take Ham and Castor (and a stowaway Olive) to a Pacific island that has a gambling den, where Castor intends to break the bank with the help of a magic whiffle hen. After he's done so, the boat is bordered by the villain, Jack Snork, who shoots Popeye fifteen times and takes the others captive. Rather than his famous spinach, it is rubbing the head of the whiffle hen that restores Popeye and gives him his wondrous strength. Popeye then quickly beats Snork and, after getting everyone home, leaves the strip. Just over a month later, however, he's back to rebuff one of Olive's suitors – and the strip would never be the same again.

The first four volumes of Fantagraphics' reprint series are large-size books that contain all Segar's Sunday pages featuring Popeye. The Sundays were kept as a separate continuity from the daily pages and normally contained single gag strips, but occasionally longer stories were included, such as those involving the Sea Hag (the marvellous 'Plunder Island', December 1933 to July 1934, which introduces Alice the Goon and Popeye's old friend, Bill Barnacle) and a sequence with the cast out West, both in volumes 2-3. Volume 5 starts a series of more traditional-sized paperbacks, and begins with the sequence that introduces Popeye in the dailies, and successive volumes, each containing about sixteen months of strips, run through to Segar's final episode on 17 February 1938.

Segar takes Popeye through his paces as a prize-fighter, and feats of strength become an important element of the strip, but not to the detriment of storytelling or humour. Along the way we're introduced to J. Wellington Wimpy, a scoundrel forever looking for a free meal or handout, Swee'Pea, a child delivered in a wooden crate whom Popeye adopts, Eugene the Jeep (*Popeye* not only named the first major hamburger franchise, it also added the words 'jeep' and 'goon' to the English language), an orchid-eating creature that is able to move through dimensions and has magical abilities. Later, Popeye's father Poopdeck Pappy arrived to dominate much of the action in Segar's final year, and was even more anti-social than Popeye himself. Snork returns for the 'Mystery House' (vol 6), while King Blozo and the nation of Nazalia are featured in several episodes in 6, 7 and 9. Vols 9 and 10 contain an eleven- month story ark which sees Popeye the dictator of Spinachola, while 'The Search for Popeye's Poppa' rounds off volume 10.

Segar's *Thimble Theatre* is a great work by a true master of the medium. His stories are elaborate adventures full of drama, romance and humour, and if the plot drifts for the sake of some joke then it's well worth the detour. His drawings might seem simplistic to those who expect more 'realism' in their artwork but Segar understood his craft completely – no lines are wasted. Few comics have bettered this.~NF

Recommended: 2, 3, 5-10

PORTIA PRINZ

Eclipse: *6 issues 1986-1987*

"The World's Foremost Pseudo-Intellectual Super-Heroine" is the somewhat misleading tagline for Richard Howell's witty and loquacious series. Certainly, the pseudo-intellectual appellation is appropriate, though Portia herself would dispute the 'pseudo'. The 'super-heroine' line is inapt, as the Princess of the Glamazons doesn't don a distinctive outfit and fight crime, but devotes herself to the pursuit of social engagements and philosophical debates, in which she can show off her education and accomplishments. Those who don't like Portia hate it a lot. They find the oratorical and declamatory style pretentious and off-putting. Others warm to the charm and engagingly flawed characters. Don't expect any brain-busting battle scenes in what is probably the single most word-crammed comic to date.~HS

George Komninos' PORTRAIT OF A YOUNG MAN AS A CARTOONIST

Hammer & Anvil: *8 issue limited series 1996-1997*

Those who complain that too many non-fantasy oriented comics are navel-gazing works of self-absorption and little consequence are directed here for ammunition. From the arrogance of the title (and the ignorance to admit he's never read its source) George Komninos invites invidious comparison, and the tedium of two days in the life of whining wannabe comic artist Mark Hampton comes off second best by an immense distance. Sketchily drawn and paced at a comatose level, one can only marvel at Komninos' misguided faith and tenacity in publishing eight issues.~FP

POSSIBLEMAN

Blackthorne: *2 issues 1987*

William Van Horn's humorous superhero. Comic fan Dexter Smeal becomes the 'puffacious' Possibleman, defender of Squatsburg, USA. Charming, lightweight stuff from the future star of Disney's Duck strips in the 1990s.~SW

Those Annoying POST BROTHERS

Vortex: *18 issues 1985-1990*

Rip-Off: *20 issues (19-38) 1991-1994*

Aeon: *25 issues (39-63), 3 Annuals 1994-1998*

Ron and Russell Post are the two people most of us would least like to meet, any time, anywhere. Inhabitants of Bugtown (where, if you die, you just regenerate), with the ability to shift effortlessly between all possible realities, they're mad, bad, dangerous to know and extremely trigger-happy sadists. On the plus side they are fond of the Bulldaggers, a musical combo that includes their friend Savage Henry, as well as the great god C'thulu, which makes touring interesting, to say the least. Initially co-scripted by Lou Stathis, from 5 Matt Howarth took complete control. Shorter stories are mixed with epics such as 'The Shell Game' (10-14), which involves among other things Ron being sealed in his girlfriend's house by the landlord, Big Al, who's about the only person the brothers respect. 'Video Party' (17-20) leads to Ron and Jeri's marriage and 21-26 has a rematch with the very nasty Hiroshima, who used to be in the Bulldaggers but was ejected for being power-mad. A later story (54-58) begins with a simple scheme to kidnap a debt defaulter on the world of Lysurgia, but becomes something more sinister when reality is warped and mind parasites make people forget each other's existence.

The Post Brothers reputation makes them hated and feared wherever they go. Russell is always looking for the angle to gain any sort of advantage, and Howarth continues to create imaginative ways for them to kill, be killed or be transformed as they (mis)use their reality-shifting powers. It's all good fun, but becomes repetitive once you know the characters, although Howarth's humour and musical references (a very important part of the work) help keep it fresh. In the final issue, Ron and Russell decide to kill the readers, but Professor Ed unplugs them from the matrix (a term used long before the film) and declares that they'll have no more adventures. Howarth's artwork is unique with tight, spiky lines heavily and roughly cross-hatched with few blacks, which gives the book an other-worldly feel. It's not for the squeamish, and not to all tastes, but it's worth sampling. Try the 1995 annual, co-written by Nancy A. Collins or 27, set at a comic convention.~NF

POST MORTEM

Red Hills: *1 issue 1999*

"Slice and dice, baby!!! Any way you cut it you're goin' down!" What else would the response be but "Shut-up and fight, bitch!!!". With class dialogue, and no genre cliché unused in this story of an armed black bounty hunter coping with an outbreak of zombies, it might be expected this is a tongue in cheek blaxploitation movie pastiche. Sadly, it's just crap.~FP

POTENTIAL

Slave Labor: *6 issues 1998-1999*

Ariel Schrag produced autobiographical minicomics about her bisexual romantic/sex life, and this is a magazine sized continuation, with each issue labelled a unit, rather than numbered. The cartoon style art has a crude appeal, but the succession of "we went there with a, b, and c and met d, e, and f, and this happened" very quickly bores, particularly as few details are omitted, superfluous or not. The constant forced incorporation of the title into the narrative in early issues is another minus. Leanne Franson's self-produced minicomics run over the same territory with far more wit and elan.~FP

The POUND

Radio Comix: *One-shot 2000*

Kat and Caleb hijack an arms shipment, but when they're double-crossed and left unpaid, they decide to assault Danus' penthouse suite looking for recompense. Richard Moore's sexy, science fiction, anthropomorphic action adventure is drawn in his usual big-hair style, and, though slight, is a fun read. The characters have also appeared in more adult situations in *Genus*.~NF

POUNDED

Oni Press: *3 issue miniseries 2002**

Heavy Parker considers himself the king of Vancouver punks. In reality he's manipulative and shallow, but maintains a social standing via a significant inheritance. He deceives a high-school girl just before she goes to college in New York, but she returns with some real hardcore types in tow, vowing revenge on Parker. Brian Wood is very good at telling stories about small-time wannabes, but Parker is hardly likeable, so any feeling of identification is largely absent. Steve Rolston's art, very reminiscent of Paul Grist, but not quite of that standard, brings Parker's world to life.~WJ

POWDER BURN

Antarctic: *One shot 1999*

A futuristic cop story drawn in a manga/Image style, but a reliance on close-up detail and facials permits no sense of scale. The page design gives huge panels to simple contents at the expense of the well designed technology being established. Originally solicited as a colour comic, Antarctic went with disappointing mono due to low initial orders. At least they had their heads screwed on right.~SW

POWDERED TOAST MAN!

Marvel: *One-shot 1994, one-shot 1995*

Displaying no shame following the success of their *Ren and Stimpy* comics, Marvel issue comics starring the preposterous superhero from the cartoon, created to satirise mundane superheroes. The wackiness doesn't work on the printed page, and the idea of encompassing film pastiches is daft. The best sections are the 'ad' pages featuring Ren and Stimpy.~WJ

POWER Comics

Eclipse/Acme: *4 issues 1988*

Both Brian Bolland and Dave Gibbons cut their professional teeth on the Nigerian superhero strip collected herein. Each issue features a story from both artists, and it's surprisingly confident and competent work. The tales of Powerman (or Powerbolt as he was called for the US market), however, are aimed at a very young audience, so don't expect much in the way of intellectual stimulation.~FP

POWER & GLORY

Bravura: *4 issue miniseries 1994*

The American government creates their own superhero, A-Pex, The American Powerhouse, but make the mistake of choosing Allan Powell, whose phobia of being touched is simply magnified during the process. Assigning Michael Gorski to do all the real work seems like a good idea (as long as he doesn't find out that Powell is sleeping with his estranged wife). Howard Chaykin's irreverent satire on American morality has its moments, but both script and artwork seem rushed and half-hearted after *American Flagg*.~NF

THE POWER COMPANY

DC: *One-shot ('Bork') 2002, one-shot ('Josiah Power') 2002, one-shot ('Manhunter') 2002, one-shot ('Sapphire') 2002, one-shot ('Skyrocket') 2002, one-shot ('Striker Z') 2002, one-shot ('Witchfire') 2002, 9 issues + 2002 to date*

In San Francisco, Josiah Power creates a mercenary super team to act as a security, recovery and investigation service for individuals or organisations that need more protection than the regular police force can offer, set up like a law firm with partners and associates. The one-shots provide an introduction and background for the mostly new characters (Bork's a reformed villain from *The Brave and the Bold* 81, while Manhunter is the surviving clone of the Archie Goodwin and Walt Simonson version of Manhunter). Josiah Power himself was a lawyer given powers by the metagene bomb, Sapphire a girl living on the streets until she stole the Serpents Egg during a battle between Kobra and the JLA. Skyrocket is meant to be an experienced, if lone, superheroine, who uses the Argo Harness to give her powers. Striker Z is a Hong Kong stuntman, whose powers came from a vat of fuel plasma and Witchfire finds a book of spells and uses magic to become a celebrity (singer, stuntwoman, magician). Written by Kurt Busiek, while none are outstanding, all of these are well drawn by different artists, and most have guest stars from elsewhere in the DC Universe.

Co-Creators, Busiek and Tom Grummett begin the regular series with the recruitment of Skyrocket and conflict with Dr Cyber and the Strikeforce (1-4). Manhunter confronts some clone-hunters in 5, Green Arrow and Black Canary show up in a tale of chemical company, Biospheer, from Power's past in 6, which leads into a clash with Biomax in 8-9, after a Striker Z solo mission in 7. Busiek has put together a good mix of characters, who are still being developed, and provided a source of internal conflict in their different motives, from the heroic zeal of Skyrocket to the mercenary Manhunter, and celebrity-seeking Witchfire. Grummett's artwork is pleasingly detailed and dynamic without being fussy.~NF

POWER FACTOR

Wonder: *2 issues*

Innovation: *3 issue miniseries, 1 Annual 1990-1991*

A rather disjointed series, but with several good ideas among the chaos. It introduces a new world with plenty of superheroes, a place where the term 'organised crime' has a more literal meaning than usual, as the superheroes are murdered one by one in the first issue. The few survivors gather some time later, and begin swapping costumes to instil the idea that there are more of them around than anticipated. Carmine Infantino's art in 2 and 3 is a treat.~WJ

POWER GIRL

DC: *4 issue miniseries 1988*

Following *Crisis on Infinite Earths*, the former alternate Earth Supergirl needed a new identity, background and history. No longer Superman's cousin, she becomes instead Karen Starr, business woman and granddaughter of Arion, Lord of Atlantis, in one of DC's more ludicrous continuity rewrites. Four issues of battling fourth-rate villains are little more than pointless fight scenes to remind readers that she exists. It might have been kinder to let us forget.~JC

POWER MAN

Marvel: *33 issues (17-49), 1 Annual, 1 Giant-Size 1974-1978*

Changing the title from the presumably less commercial *Hero For Hire* didn't do much for the quality, with cliché and conflict the order of the day. To his credit, writer Don McGregor attempted to bring a more poetic and introspective quality to the title, but it only stands out

---

* Available in a collected edition

because the remainder is so dire. His peak was in 28, 30 and 31, the best issues until the arrival of Chris Claremont and John Byrne with 48. In a story reprising and repeating the experiment that created Luke Cage, Power Man, and introducing Iron Fist to the title, they provide more tension and excitement than in the entirety of the run to that point. The editors recognising a good thing, Iron Fist stayed and the title was changed to *Power Man and Iron Fist* with 50.~FP
Recommended: 48, 49

POWER MAN AND IRON FIST

Marvel: *76 issues (50-125) 1978-1986*

With the cancellation of his own title Iron Fist and supporting cast moved in with Power Man as the two ran their own investigations agency. Having revitalised the title, Claremont and Byrne turn in a good story in 50 before a rapid exit, and after some floundering Jo Duffy and Kerry Gammill combined for serviceable material. Any issue between 59 and 85 is likely to be of a reasonable standard. Duffy's characterisation played off the awkward mixture of white, rich-kid martial artist Iron Fist and the black, ghetto-born Power Man, used to surviving on his wits, and Gammill's art is solid and consistent. After their departure, the title sank back into mediocrity, and although there's a spark of improvement over the final year of the run it's too little too late. 66 has an early appearance of Sabretooth, but a better sampler by far is 72's story of Oriental gang wars.~FP
Recommended: 60, 67, 72, 74, 75

POWER OF PRIME

Malibu: *4 issue miniseries 1995*

A tedious six-part origin of Prime (parts 2 and 3 are issues 25 and 26 of the regular *Prime* series), which sees lots of characters with Prime-like powers (i.e., god-like bodies of slime around a mortal frame) fighting on the planet that first created the Prime process. Gerard Jones and Len Strazewski must have written this in their sleep.~NF

POWER PACHYDERMS

Marvel: *One-shot 1989*

At the height of the fad for multi-adjectival anthropomorphic features, Marvel published their cash-in, attempting to make doubly sure of success by parodying their own superheroes. And, surprise, there are quite a few giggles to be had. If the thought of an elephant version of Cyclops who has to plug his trunk doesn't raise a smile, stay well away.~WJ

POWER PACK

Marvel: *62 issues, 1 Graphic Novel 1984-1991, 1 Special 1992, 4 issue miniseries 2000*

Behind *Power Pack* lies a very stupid idea, and possibly a rather dangerous one. The four Power children – yes, their father has a convenient surname – are given superpowers by a dying alien resembling a horse, in order to destroy the anti-matter device their father has created. The cute-looking aliens, Kymellians, are warring against a nasty lizardy race, who periodically attack the team. The kids bicker and have problems getting their homework done, and many of the stories come out of childish things like trying to rescue a kitten.

It requires a certain suspension of disbelief when the youngest (and most powerful) character has just started kindergarten. However, if you can activate your sense of wonder, the early issues are rewarding. Louise Simonson's scripting is fresh, with particularly strong interaction between the characters, although she does have a tendency towards sentimentality – witness 19, where Katie causes havoc by inviting their superhero friends over for Thanksgiving while their mother's in hospital. Yes, many superheroes know about them, but none of them seem concerned about five-year-olds fighting crime. There are frequent co-stars, and they often go adventuring with Franklin Richards of the Fantastic Four.

1-21, largely illustrated by June Brigman with occasional issues and art assists from Brent Anderson, are probably the only comics in which young children are drawn with the bodies of children, rather than as shrunken adults. Brigman is a delicate penciller, as adept at action sequences as she is at conversations. With the miniseries, Marvel had a go at reviving the junior quartet in a story full of sibling bitching, school problems and galaxy saving, as the Snark returned to threaten the known universe and their mum became very ill. The plot and characterisation are very simple with little to engage an adult, but the art by Colleen Doran with tight inks from Terry Austin to add polish, is very lush.~FJ

POWER RANGERS Zeo

Image: *1 issue 1996*

Tom and Mary Bierbaum, with competent artwork from Todd Nauck, attempt to breathe some life into a comic based on the popular television series. The Power Rangers travel to Gamma-Vile, under attack by King Mondo, who's unhappy about Rita and Zedd having the Power Rangers' power coins (they use Zeo crystals now, apparently). There's a big fight between Scrap Heap and the Rangers in Megazord, but, alas, the conclusion was never published.~NF

POWERLINE

Marvel/Epic: *8 issues 1988-1989*

Lenore and Victor share an energy field that allows them to fly, to project a force shield and, potentially, far more. They have an adult guardian in Vic's uncle Tyler Ripley who has a metallic hand and wears a jacket with Ripper emblazoned across its shoulders. There's a whole previous generation of supernatural beings referred to as Shadows that all three appear to be related to. Being young, beautiful and traumatised by the recent deaths of their parents, its unsurprising that Vic and Lenore are also gradually falling in love. Written by Dan Chichester and Margaret Clark in an engaging but not very helpfully structured style, this is part of the 'Shadowline' trilogy of titles along with *Doctor Zero* and *St George*. The initial artwork is by David Ross before Gray Morrow comes aboard with 4, giving the characters some human scale and actual expressions. Without the related titles to refer to, this series makes little sense.~SW

POWERLORDS

DC: *3 issue miniseries 1983-1984*

Another toy-based series, this time from Revell. Drawn by a young Mark Texeira, it's of no interest to comics buffs whatsoever, even if you do like his artwork.~NF

POWERPUFF GIRLS

DC: *31 issues +, 2 Specials ('Double Whammy', 'The Powerpuff Girls Movie') 2000 to date*

Vibrant, funny, action-packed tales for all ages that fully do justice to the cartoon show they're based on. Blossom, Bubbles and Buttercup are little girls who live in an ordinary little city that is plagued by a host of monsters, natural disasters and even supervillains! Good thing the girls are super-powered! The three artificial tots are the result of an experiment by All-American suburban genius Professor Utonium. When they're not doing little girl stuff they're saving the city of Townsville from their usual rogues gallery of foes like Mojo Jojo, Princess, Gang Green, Fluffy Lumpkins and the diabolically indeterminate Him as well as marauding monsters and devastating disasters. The stories blend a wry nostalgia for the bygone silliness of the 1960s superhero craze (such as 3 where a meteor gives everyone in Townsville superpowers, or the invasion of monsters in 25) with an obvious admiration for the excessively stylized violence of Japanese animation and comics (4, 24 or 27). Best of all, though, it never loses sight of the fact that young kids and bemused parents are the intended readership. Keen viewers will be happy readers and comic art fans should see the pin-up gallery in 25 with the likes of John Byrne, Mike Mignola, Jaime Hernandez, Michael Allred and Kyle Baker. The 'Double Whammy Special' reprints 1 and 2 with *Dexter's' Laboratory* 7, while the Movie Special is an extra-long adventure that recaps

their origin and first encounter with evil lab chimp Mojo Jojo and recounts how they came to be accepted as the guardians of Townsville. Splendid family entertainment. ~WW

POWERS

Image: *25 issues +, 1 Annual 2000 to date*

Homicide detective Christian Walker lives in a dark city where superheroics have been outlawed, specialising in murder cases that are "powers related". The comic traces Walker and his new partner Deena Pilgrim's growing relationship, complicated only slightly by his super-girlfriend. 1-6* start with the murder of squeaky-clean superheroine Retro-Girl, and Walker and Pilgrim investigate, getting to know each other as they struggle to take care of an abandoned child. Walker's familiarity with Retro Girl's associates rouses Deena's suspicions and he's forced into a possibly not so surprising admission. 7 features a cartoon version of comic writer Warren Ellis sitting in on a far from routine patrol, while 8-11* see the corpses of youngsters dressed in outlawed superhero costumes littering the streets as Walker and Pilgrim pursue teleporting gang boss Johnny Royale. An investigation into the death of superhunk The Olympia in 12-14* reveals he has a thing for redheads ' lots of them, while the annual features a thirteen page interrogation of a prisoner followed by a twenty-six page transcript of the court proceedings. In 15-20 a manufactured super group literally self-destructs when one of them breaks his contract. Suspecting a cover-up Walker soon regrets meeting another former colleague who is now an FBI agent. In 21-24 Deena and her luckless new partner, Detective Argento, investigate more superhero deaths linked to 'Chaotic Chic' graphitti. Walker's resignation in 20 doesn't keep him out of the action for long. Walker and Deena are back together for 25's new story arc about another super-team: The Sell-Outs

Writer Brian Michael Bendis shows his mastery of expository dialogue strings and compelling emotional impetus in this series. Michael Avon Oeming takes some chances with the art style that really pay off, especially where visual pacing is concerned. The characters and the city are simplified down to icon level, but given dimension by the ever-present shadows providing as much depth as the writing does. They won a well-deserved Eisner Award for best new series in 2000.~SW
Recommended: 15-20

POWERS THAT BE

Broadway: *6 issues 1995-1996*

The cover star of the first issue is the big-bosomed, all-powerful Fatale, who has the interesting ability to drain the energy from anyone she touches to enhance her own capacities. Hmm... Certainly an interesting date. Fatale's introduction is a witty, fast-paced, action-packed adventure, reading like a *James Bond* script, with operatives appearing right, left and centre to apprehend her. Her story continued in *Shadow State*, then her own title. This title's lead feature, 'Star Seed', also had a great start. It's an excellently paced story of a young man who's trying to locate his alien father. He has impressive superpowers, but he's apparently not the only one. All the intrigue and an interesting supporting cast combine for a well-plotted and executed series, but you'd expect nothing less from guiding force Jim Shooter. The title changed to *Star Seed* with issue 7.~HY
Recommended: 1-6

PPV PAY PER VIEW

Antarctic: *3 issue miniseries 2002*

Jerzy Drozd turns in some decent manga style art for this generally entertaining series with a very good schlock science-fiction premise. Aliens seal off a high school and every two minutes thereafter give one of the students super powers. The resulting chaos is then beamed back to their planet as TV entertainment. The story plays out predictably from that point, with the smarmy four times class president standing in the way of sanity via four times electoral loser Evan, but this is fair low level enjoyment.~WJ

PRAIRIE MOON and other stories

Dark Horse: *One-shot 1992*

Rick Geary is one of the great eccentrics of the comics world. He uses simple but elaborately decorated images, which often make his strips feel more like illustrated stories than sequential comics. When he wants to, however, he can do marvellous things with simple images. This collection of three longer strips and a number of single-pagers is a good showcase for his odd sense of humour. 'Prairie Moon', for example, is about a travelling sheet-music salesman whose demonstrations of popular songs bring about various natural disasters, but who is welcomed wherever he goes. Another highlight is 'A Survey of the Twentieth Century', a single page of twelve panels, each one labelled with a year, each image suggesting that the years are entirely interchangeable.~NF

PREACHER

DC/Vertigo: *65 issues, 5 Specials 1995-2000**

The Reverend Jesse Custer is searching for God, in a literal rather than symbolic sense, since God has abrogated his responsibilities and gone walkabout. Complicating matters is that Custer has been united with the celestial offspring of angel and demon and is possessed of the ability to compel people to do what he says. At least that's the set-up. Don't expect quick solutions. Along for the ride, for the most part, are Custer's former girlfriend Tulip, and Cassidy, an Irish vampire whose early days are covered in 25-26.

Stunning Glenn Fabry covers welcome readers to each issue, while inside Garth Ennis and Steve Dillon combine to produce a mélange of sex, violence and horror that attracted frequent criticism, with most critics failing to notice the violence is generally used to very comic effect. What astonishes is the capability of Ennis and Dillon to shock and surprise from beginning to end. Throughout the run there are scenes that should have eyes popping out on stalks, and jaws dropping to the floor in almost cartoon fashion. Don't come to *Preacher* expecting a dense plot, though, as it's very much in road-movie style with detours. The wonder of the title is in the dialogue, the comedy, the bonding and the shocks. A testament to its strength was Custer's convenient talent being almost sidelined from about the halfway point, no longer required to provide the trappings of a fantasy title. Even in the early days, it was used more often than not for comic effect. Ennis also showed a fine instinct for when *Preacher* was starting to become formulaic, switching direction wholesale with 41 to concentrate on Custer almost exclusively, and freshening the title considerably.

There are few dud issues, although, having backed himself into a corner in 10, Ennis cops out in 11 in the certain knowledge he's presented his characters so well the readership wouldn't have it any other way. And mention must be made of a disappointing finale. Plots not being Ennis' strength, when it came to a conclusion he takes the easy route, while remaining true to the western ethos that's fueled the series. Most stories are multi-part, with only 18 and 50, both atypical Vietnam stories, being relatively complete in themselves. Those not wanting to start with expensive early issues or one of the collections are directed to issue 41. It's more or less a new beginning requiring little knowledge of previous events, and while restraining the violence imparts an otherwise full portion of *Preacher* charm.

Ennis also created an absorbing supporting cast, from adversaries to friends, and several graduated to one-shot specials extrapolating on their backgrounds. The most readable concerns an episode in Cassidy's past, in which vampire cults are treated with deserved contempt. Others feature Arseface (cover titled "The Story of You Know Who!"), a teenager who blew off half his face in an abortive suicide attempt, 'The Good Old Boys', unsavoury redneck members of Custer's family, and military/religious despot Starr in 'One Man's War'. There's also 'Tall in the Saddle', set in Custer's past. While only 'The Good Old Boys' is poor, all the specials fall beneath the high standards set by the regular series. By way of compensation, though, Vertigo had the good sense to issue a collection of Glenn Fabry's remarkable covers complete with witty commentary from Fabry and Ennis.~FP

PREDATOR

Dark Horse: *4 issue miniseries 1989-1990*, 2 issue microseries (Predator 2) 1991, 4 issue miniseries ('Big Game') 1991*, 4 issue miniseries ('Cold War') 1991-1992*, 2 issue microseries ('The Bloody Sands of Time') 1992, 2 issue microseries ('Predator Vs Magnus') 1992-1993, 5 issue miniseries (0-4) ('Race War') 1993, 4 issue miniseries ('Bad Blood') 1993-1994, one-shot ('Invaders from the Fourth Dimension') 1994, one-shot ('Jungle Tales') 1995, 4 issue miniseries ('Dark River') 1996, one-shot ('Strange Roux') 1996, 4 issue miniseries ('Kindred') 1996-1997*, 3 issue miniseries ('Hell and Hot Water') 1997*, 2 issue microseries ('Primal') 1997, 3 issue miniseries ('Predator vs Judge Dredd') 1997*, 2 issue microseries ('Nemesis') 1997-1998, 2 issue microseries ('Hell Come A Walkin') 1998, one-shot ('Captive') 1998, 4 issue miniseries ('Homeworld') 1999, 4 issue miniseries ('Xenogenesis') 1999*

The Predators are deadly alien hunters who stalk humans for the challenge, and in the first film Arnold Schwarzenegger was on the menu. *Predator* is set after that movie, and plays safe by introducing Big Arnie's brother. Mark Verheiden's script is an engaging blend of hokey dialogue and over-the-top violence; very cinema action film in fact, and far superior as such to the eventual sequel adapted in two ordinary issues. He returns his cast and formula for 'Cold War', largely set in Siberia, for another action-packed romp. Ron Randall's not the penciller Chris Warner is, but he's adequate, as is the same team on 'Dark River'. Warner inking Dan Barry on 'The Bloody Sands of Time' provides better art, but the story of a Predator interfering in World War I's trench warfare is ordinary, as is 'Hell Come a-Walkin' with Frank and Jesse James during the Civil War. Set in Victorian England, 'Nemesis' features a strangely fallible Predator and strangely stiff Colin MacNeil art, leaving 'Strange Roux' as the best Predator story set in the past, with Louisiana swamp men coming across what they think is a local legend, the Gollywomp in 1931. Brian McDonald has a laugh with the script, and there are Mignolaesque touches to the art of Mitch Byrd and Jasen Rodriguez. The battle between Predator and Magnus has decent art from Lee Weeks. 'Big Game' is neither John Arcudi nor Evan Dorkin at their best as a Predator targets a desert military base, and Race War switches the action inside to a tinder-keg prison. Considering the scenario and that it's plotted by crime writer Andrew Vachss, tension is minimal. 'Bad Blood' is little other than a four issue massacre, and would have been better restricted to its preface in Dark Horse Comics 12-14. By 'Invaders from the Fourth Dimension' the basic hunters-and-killers plot has worn threadbare, and 'Jungle Tales' reprints stories from *Dark Horse Comics*. It's the best of the one-shots. 'Hell and Hot Water', though is both a surprise and artistic treat with Mark Schultz covers and interior art by Gene Colan reproduced directly from his pencils. Schulz also provides a claustrophobic locale and extra element of danger with an undersea setting for a decent thriller. *Predator Vs Judge Dredd* is more the latter than the former, with neither John Wagner nor Alcatena extending themselves beyond the familiar hunter and hunted scenario. While possibly commercially imprudent, the angular distorted pencils of Toby Cypress, effectively coloured by Dave Stewart, convey a dark otherworldly feel to 'Homeworld', and writers James Vance and Kate Worley take their cue from *X-Files*. It's the most satisfying *Predator* since the Verheiden-written stories, but is immediately followed by the very poor 'Xenogenesis', introducing a squad of unappealing Predator hunters. All miniseries are available as collections from Dark Horse.~WJ

Dave Cooper's PRESSED TONGUE

Fantagraphics: *3 issue miniseries 1994*

The title sounds like a cheap sandwich filling, and Cooper has a talent for depicting the disgusting elements of life. His art appears influenced primarily by John Pound's bubblegum cards, but there are also aspects of Rick Geary, and the whole almost oozes off the page. It's matched by the sordid goings on as we have a voyeuristic block super who believes baby shit can cure his eczema, a moralistic do-gooder, the entire cast inflicted with acne, and the very fabric of the block squishing about. Having set up several potentially interesting scenarios, though, Cooper cops out with the resolution. Very disappointing.~FP

PREZ

DC: *4 issues 1974*

DC/Vertigo: *One-shot 1994*

After the failure of *Brother Power, The Geek*, Joe Simon, a true visionary if there ever was one, returned to DC with artist Jerry Grandenetti, and created one of the most original series ever seen in comics, as the eighteen-year-old Prez Rickard becomes President of the USA. To an audience used primarily to superhero, war and mystery comics Prez was a bizarre departure. Naturally his term in office was fraught with danger, and those wanting him out off office included Boss Smiley (a man with a smiley badge head) and a crippled vampire. How weird and wonderful! The 1970s Prez made one other appearance in *Supergirl* 10.

His revival was in the more mystery-oriented *Sandman* 54. This led to a Vertigo special in 1994. This was a coming-of-age road movie in which three young men travel across the USA to locate the long-disappeared Prez, whom one of them firmly believes to be his father. This is a far cry from the Simon issues, with the whimsy replaced by a haunting and powerful plot from Ed Brubaker and excellent art from Eric Shanower. Don't come expecting anything like the wackiness of the original series, but as a homage to that and an exploration of 1960s and 1990s values it's very good.~HY

Recommended: 1-4, one-shot

PRICK COMIX

Fantagraphics: *1 issue 1995*

Despite its 'shocking' title (and shockingly awful cover illustration), the magazine-sized *Prick Comix* is an anodyne funny animal farce that owes a considerable debt to R. Crumb's early 'Fritz the Cat' strips. Creators Sean Brennan and Tom Giansante cast themselves as two cat-like bad boys who embark on a meandering quest to rescue their friend Pedersen from the clutches of a mad scientist. It's all a bit too 'wacky' and 'zany' (there's even an obligatory Elvis/Flying Saucers subplot), but it's an amiable enough read, with plenty of panel-packed pages that contain the odd nice drawing or faintly funny gag.~AL

PRIDE AND JOY

DC/Vertigo: *4 issue miniseries 1997*

Kavanagh thought he'd escaped from the things he'd done in his New York youth, but of course he was wrong, and he and his family have to go on the run. It's crude and unoriginal, but Garth Ennis and John Higgins supply a certain raw power that keeps you reading, and it's clever enough not to get really, really stupid until the very end.~FC

PRIEST

Maximum Press: *3 issue miniseries 1996*

Whether he read it or not, Rob Liefeld couldn't have been unaware of *Preacher*'s success. It therefore speaks volumes for his level of incompetence or integrity that he issues a comic with the ludicrous concept of a priest by day becoming a bloodthirsty armed vigilante by night. Liefeld's obviously working through some confused feelings about organised religion, with Mafia-style bishops and dying nuns. There is one redeeming factor in the pencils of Mark Pajarillo, who has the makings of a dynamic action style.~FP

PRIMAL

Dark Horse: *Graphic Novel, 2 issues 1992*

In the early 1990s it seemed as if comic companies were bidding to adapt anything written by Clive Barker. These half-baked stories about creatures embodying fear are a notch above his shopping list. It's meagre fare indeed, with cut-and-paste artist John Van Fleet trying his utmost to obfuscate the slim element of plot present.~FP

PRIMAL FORCE

DC: *15 issues (0-14) 1994-1995*

An uneasy blend of mysticism and superheroics uniting a deliberately tenth-rate collection of characters. Until the arrival of Black Condor, Red Tornado is the best known, in this incarnation oddly mute and battered. They're allied with a new Claw, a novice Jack O'Lantern, the Golem and a previously unseen character called Meridian. Tying in the team with old Earth beliefs and superstitions is an interesting idea that never quite gels in practice. Writer Steven Seagle seems as uncomfortable with the required superhero action as he is well-versed in supplying small characterisation slots.~WJ

PRIME

Malibu: *Series one 26 issues, 1 Annual 1993-1995, series two 15 issues 1995-1995*

Prime is a superhero whose adult, heavily over-muscled body is actually a mass of green slime encasing the thirteen-year-old Kevin Green. The body is very strong, but susceptible to breaking down after too much strain, and retains the mind of Kevin whose attempts at superheroics are subject to temper tantrums and inexperience. The major villains are the military and Doctor Gross, who wants to discover why Prime's body is 'perfect' when all his previous attempts have resulted in hideous monsters. A crossover with Mantra (8) established a rapport between them and attempted to give Kevin someone that he could call on for advice. Kevin persists with a spoiled-brat attitude until he and Hardcase defeat Doctor Gross together in the annual and Kevin begins to understand what it means to be a hero, rather than just someone with a lot of power who does whatever he pleases.

One of his old skins gains a life of its own, as Primevil and he discovers a couple of friends, Turbo Charge and Phade, who vie for his attentions before the final two issues see them all involved in a crossover with *Power of Prime*, which answers some questions about his true origin. Written by Len Strazewski and Gerard Jones, 1-12 are drawn by Norm Breyfogle, but after that it's practically a different artist on every issue. Prime and Kevin are both very unsympathetic as written and neither the supporting characters nor the artwork are good enough to overcome the scripts' faults. 'Prime Infinity' (1995) sets up the second series by having Prime so impressed by Spider-Man that he adopts a similar form and then takes on the Lizard. By 13 his secret identity as Kevin has been broadcast to the world after a long struggle with Aladdin. Frankly, not worth the paper it's printed on.~NF

PRIME CUTS

Fantagraphics: *10 issues 1987-1988*

A lacklustre anthology for intellectuals, which has its moments but lacks consistency. Editor Gary Groth used it to showcase various other Fantagraphic projects to great effect; thus in various issues you'd get some *Polly & Her Pals* reprints, or a story from the *Complete Crumb* series. Generally this material was among the most desirable in the collections. Gabriel and F. Solano Lopez's harrowing *Ana** is serialised in 6-9, and there are occasional appearances by then newcomers such as Susan Catherine and Chester Brown, but on the whole the anthology concentrates on a central rota of contributors like Drew Friedman, Richard Sala, Michael Dougan and Dori Seda (whose contributions are uncharacteristically poor). Groth takes a multi-media approach to magazine editing, reprinting Flaubert's chucklesome *Dictionary of Received Ideas*, illustrated by Rick Geary and including short stories. While contributions by the likes of Herman Hesse and Djuna Barnes shore up the mag's literary pretensions they can't help but show up the quality of most of the strips' scripts.~FJ

PRIME SLIME TALES

Mirage: *4 issues 1986*

In which a new genre is conceived: Mirage give you the unfunny animal comic.~FP

PRIME8 Creation

TwoMorrows: *One-shot 2001*

Bizarrely humourless ape superteam are pursued by evil scientists who kill their creator. What is it about apes and superhero comics? This is obviously an attempt to produce comics just the way they used to be, but there's a reason comics aren't the way they used to be.~DB

Comico PRIMER

Comico: *6 issues 1982-1984*

The first Comico title was essentially a fan publication. A very basic black and white anthology, it introduced Az, Skrog and Slaughterman, all of whom graduated to their own titles and disappeared quickly, and Mr Justice, who never got even that far. If the title is to be remembered it's for the first Grendel story in 2 and the first appearance of The Maxx in 5. Unless you've got more money than sense only Matt Wagner and Sam Kieth completists are advised to search out the issues in question. Both display early talent, but *Neutro* would sparkle amid some of the other material present.~FP

Leonard Nimoy's PRIMORTALS

Tekno: *16 issues, 2 issue miniseries ('Origins') 1995-1996*
Big Entertainment: *8 issues 1996-1997*

It transpires we are not alone, and our forebears were a group of mammals genetically mutated to increase intelligence and then removed from Earth. Now they've returned, bringing their conflicts with them. Despite his name being part of the title, Mr Spock has little to do with anything beyond the concept (although he did plot the 'Origins' spin-off). It's left to an ever-changing cast of artists and writer Christopher Manley (from 3) to tell this story of Earth's first contact. It's all competent enough, but only really comes to life with the final issues of the Tekno series. A company change of name serves as an excuse to re-start the series, and Doug Wheeler writes the first six issues. 1 and 2 tie-up loose ends from the previous story and 3-6 have an alien plague loose on Earth, with little involvement from the aliens. Poor sales render cancellation with no resolution.~WJ

PRIMUS

Charlton: *7 issues 1972*

The undersea adventures of Ivan Tors' TV hero Carter Primus, "the first man of the sea". Accompanied by his lovely assistant Toni, Primus deals with foreign intrigue and marine mysteries in his mini-submarine, The Orca. The paper-thin stories by Joe Gill boast some of Joe Staton's earliest comic art, and that's about as interesting as it gets. The appearance of a presidential stand-in named Richard N. Mixon in 7 has some curiosity value.~SW

PRINCE: Alter Ego

Piranha Press/Titan: *One-shot ('Alter Ego') 1991, one-shot ('Three Chains of Gold') 1994*

Beneath a Brian Bolland cover on 'Alter Ego', Dwayne McDuffie constructed an awful fantasy come morality play featuring The Artist Then Known As Prince. He wanders his city on his motorbike, recognised and respected by all, but his band has been seduced away by Gemini who uses the power of music to fuel his anger. Of course, Prince uses his music for love so it's all going to work out. Denys Cowan's pencils are innocent in this embarrassingly obvious, farrago of nonsense. 'Three Chains of Gold' is a more conventional action adventure from McDuffie as Prince helps a Princess regain her rightful throne. This time it takes three artists, David Williams, Steve Carr and Deryl Skelton, whose cleaner lines help make this at least an enjoyable romp.~NF

---

* Available in a collected edition

PRINCE VALIANT

Pioneer: *17 issues, 1 Annual, 1 Giant-Size, 1 King-Size 1988-1989*

Fantagraphics: *45 volumes + 1984 to date*

These reprint the weekly newspaper strips begun by Hal Foster in 1937. The Pioneer efforts are horrible, removing the colour, resizing some art, and cutting and pasting other artwork to accommodate the format of traditional comics. We'll dwell no more on them. The altogether more alluring Fantagraphics colour volumes reprint every strip Hal Foster drew in 1-40, and continue from halfway through 40 with the strips laid out by Foster, but drawn by John Cullen Murphy. The intention is to produce fifty volumes in total, continuing until the last script Foster contributed on his 1982 retirement. In the strictest sense, *Prince Valiant* isn't a comic, being illustrations accompanied by blocks of text, but it's nevertheless stylish, an exceptional body of work and enormously influential on a generation of comic and newspaper strip artists. A skilful blend of imagination, legend and reality, Valiant is a 5th-century adventurer, travelling the known world, usually as part of a mission for either King Arthur or for his father, who rules the Northern kingdom of Thule. A rare instance of the passage of time being incorporated into a comic strip, over the years Val develops from a hotheaded youth into a respected knight and leader, and then a doting father. In later years his children are often the focus.

While already an accomplished artist before starting to work on *Tarzan* in 1929, Foster is still developing on *Prince Valiant*. His earliest work on the strip, while good, doesn't compare with what was to come, although there's a greater fluidity to his art, which becomes more static as the series continues. The first six months was prepared pre-publication, and the development from that point is noticeable, as Foster eschews cluttered small panels for a more expansive layout. His illustrative background is apparent from the start. Meticulous depictions of castles, battles, pageantry, scenery and sweeping panoramic views, the strong repertoire of postures and expressions, and the extraordinary detail characterising the feature are all in place by the end of his first year. During the second year there are more reflective moments to counterpoint the action, and by volume 5, 'The Sea King', reprinting stories from 1940, the art has begun to hit a peak from which Foster never falls. 9 and 10, otherwise good starting samplers as Valiant first meets his wife Aleta, see the lead strip reduced to two-thirds of a page by the introduction of a second feature, 'The Medieval Castle', depicting life as it was at the time.

Foster's artistic mastery reduces the attention given his writing. The collections over-emphasise the skeleton upon which Foster hung his stories, with Valiant forever embarking on a new quest or mission, a weakness that wouldn't have been apparent reading the strips weekly over a period of years. The plots are well-conceived, exotic travelogues, with Foster never condescending towards other nations in the manner typical of the time at which they were created. He sets up tough problems and provides ingenious solutions, whether researched or imagined, and while his depiction of 5th-century life may diverge from reality, particularly in the area of cleanliness, it falls well within the bounds of artistic licence. He convinces by the well-researched artefacts and weaponry and the engagingly portrayed day-to-day life: small details such as mosquitoes being attracted by the damp animal skins being used for canoe-building characterise the extraordinary thought behind *Prince Valiant*, although Foster's own adventurous youth provided depth. He's not above a chuckle at the superstitions of the past, and most mystical menaces introduced are revealed to have prosaic origins, unless Merlin is involved. The application of hindsight in those instances serves to authenticate the remainder of the strip.

There's week-to-week continuation of stories, although campaigns and missions are generally punctuated by less monumental activities. These ideal jumping-on points rarely coincide with the start and finish of individual collections, but events are easily picked up, meaning that one volume is as good a sample as another. Volumes relatively complete in themselves are 12, 'The New World', in which Valiant arrives in North America, 15's story of a youngster introduced to Camelot and a war with the Picts, or 33 as Arn returns to North America. 12 and 15 reprint pages from the late 1940s, whereas 33 dates from 1965, although you'd be hard pressed to distinguish.

Despite the astounding amount of work involved in each weekly page, it was fifteen years before Foster resorts to reprinting (for four pages in 18), and even then it's framed with some new material. Thereafter Foster used assistants on backgrounds and inking: his son Arthur for over ten years from the early 1950s, followed by Tex Blaisdell and Wayne Boring. Arthritis slowed him down, leading to pages drawn by others, and when it left him unsatisfied with the work he was creating in 1971, Foster stopped drawing the strip. The cover to 40 is the last panel of page 1788, the final *Prince Valiant* strip Foster drew. After trying others, Foster settled on John Cullen Murphy to illustrate his scripts from his layouts, at first occasionally, his debut page being 1760, then permanently from page 1789. Foster knew what he was doing, and Murphy, although at first working very much in Foster's style, is his equal. His early work in 41 shows him just as confident with a comedy sequence in which Val's daughters hide a fugitive bridegroom and full-out battle scenes. This is another self-contained volume making a good sample. Unfortunately, limited access to the original art or good-quality copies means there's the occasional lapse in reproduction standards in the early volumes, but Fantagraphics are to be commended for a high-quality reprint package befitting the material. *Prince Valiant* is rightly regarded among the top tier of American comic strips, and should be sampled by anyone interested in great art.~FP

Recommended: 5-45

Hal Foster's PRINCE VALIANT

Marvel: *4 issue miniseries 1994-1995*

As he dies, King Arthur asks that Excalibur be returned to the lake. Before he can do so, however, Gawain is set upon and the sword is taken by Morgause, who has also abducted Ingrid, Valiant's granddaughter and heir to the throne of Camelot. It's extremely faithful to the newspaper strip, to the extent of working with captioned illustrations: surely Foster couldn't have asked for better successors than Charles Vess, Elaine Lee and John Ridgway. There's a darker tone prevalent in this story, though, and the glory of battle is subsumed by its effects. Vess plots well enough to allow for plenty of diversions to interrupt the main quest, acknowledging the passage of time, and Ridgway's art is sumptuous.~FP

Recommended: 1-4

PRIORITY: WHITE HEAT

AC Comics: *2 issues 1986-1987*

White Heat's a female James Bond type, who gets mixed up with Nazis trying to revive the Third Reich. Competent but uninspired.~NF

THE PRISONER

DC: *4 issue miniseries 1989**

A familiarity with cult TV series *The Prisoner* is essential here, but you'll be disappointed if you're looking for adaptations of episodes, because, although the title is based on the series, there's a new prisoner. The action takes place twenty years after the conclusion of the TV story. The mysterious village is now abandoned except for the sole occupant, the former number six. It doesn't stay that way for long, though, as back in the hush-hush world of the secret service, a female agent resigns and arrives at the Village. She's joined by the midget butler and the former number two, just released from prison. Meanwhile, back in London, the new prisoner's husband, also a secret agent, has been researching the secrets of the Village, and plans to rescue her. Fans of *The Prisoner* may not appreciate new characters being added to the scenario, but the known cast are excellently portrayed by writers Dean

Motter and Mark Askwith, and Motter's imagery captures the mood of the series perfectly. The final issue reveals the real secret of the Village, but then is anything what it appears to be?~HY

PRIVATE BEACH

Antarctic: *3 issue miniseries ('Fun and Perils in the Trudyverse') 1995**

Slave Labor: *7 issues + 2001 to date*

The plot of the miniseries concerns a young woman's search for an extra-dimensional being who has forgotten who and what he is. Prodded by voices in her head, Trudy has always been regarded as a bit of a freak by her friends. In the second series, Trudy's still hanging out with Siobhan and Sharona, but she's also been approached on the street by two strange young men who offer her a job in a new nightclub. In 6, Trudy decides to crack open her Magic Eight Ball to see if the die inside really says "We are watching you". 7 begins a three issue story that puts Trudy, Sharona, and Siobhan on a cross country road trip. Creator, David Hahn's storytelling abilities have visibly improved by the second series, in which he devotes more time and space to character, including Trudy's friends while the nagging sense persists that there's something either very strange or very mundane going on here. The first miniseries may be too cute for some people's tastes, but the lightness of touch and stylish cartooning are endearing. Some of the Slave Labor issues include short stories as backups, including one by Alex Robinson in 4.~NF

Recommended: Slave Labor 1-6

The Double Life of PRIVATE STRONG

Archie: *2 issues 1959*

Jack Kirby and Joe Simon rework their *Captain America* concept of an army joe with a secret costumed identity to revamp 1940s hero The Shield. Kirby's gone by the second issue, and George Tuska is not an adequate replacement. Ordinary stuff from all concerned.~WJ

The PRO

Image: *One-shot 2002*

Dedicated to Jim Steranko, who was outraged just by its solicitation, the Pro is a foul-mouthed, single mother and prostitute, given superpowers as part of a wager between the Viewer and his robotic assistant. He then lets the League of Honor know, so that they can offer her a place in their team, (though it takes a stipend to make it worth her while, and even then she doesn't give up her night job, just does it faster). However, her abrasive manners and 'take no prisoners' fighting style soon offend the rest of the team. As the Knight says, "we do not urinate over a vanquished foe on the floor of the United Nations! In full view of the assembled Ambassadors!"

Amanda Conner's drawings are cartoony, but stylish and attractive, despite not flinching from the script, which Garth Ennis delivers as a satirical punch to the superhero genre and post September 11 America (not that he isn't really just having a bit of fun, of course). Hilarious.~NF

Recommended

PROBE

Imperial: *2 issues 1987*

Eternity: *1 issue (3) 1987*

Vise, Minal, Castor and Pollux are members of the Interstellar Security Division, whose job it is to prevent alien invasions throughout the galaxy. In this unfinished series, they are trying to identify a threat to Earth, but their enemies are always one step ahead of them, with fatal consequences. Frank Turner's artwork has some of the smoothness of John Byrne, though faces in particular can be inconsistently drawn. This is otherwise a somewhat complexly plotted superhero thriller with a science fiction setting.~NF

THE PROFESSIONAL Gogol 13

Viz: *4 issue miniseries 1991*

James Hudnall adapts a story from one of the earliest manga successes by Takao Saito, drawn in what now looks quite a primitive style which, nonetheless, allows the story to flow smoothly. The Professional is a master assassin, here called upon to execute a man who, we are told, is a Nazi war criminal, now in a sanatorium. Like all good thrillers, nothing is what it seems. Initially Saito concentrates on the procedure of assassination as his hero grows on you, so that when the dénouement comes it will mean something.~FJ

PROFESSOR OM

Innovation: *2 issue microseries 1990*

Repackaged reprints of a popular newspaper strip from the Australian *Sunday Mirror* with story and art by animator and storyboard artist Paul Power. Professor Om comes from the planet Agron and is the most perfect physical specimen in the universe. Whilst bodybuilding, he is kidnapped to become a gladiator on the despotic planet Ozz. Dated and tedious, although Rupert Murdoch claimed it to be a personal favourite during its initial run in the 1970s. Consider yourself warned.~WW

PROFESSOR X & The X-MEN

Marvel: *17 issues, 1996-1997*

Marvel cancelled the successful reprint series *X-Men: The Early Years* series to make way for this soulless MTVisation of the early *X-Men* stories, complete with broken-backed Image-style art and mindless posturing. Most annoying is the participation of Jan Duursema on the early issues. Judging from her work elsewhere, she's someone who can draw, but, judging by this, was ordered not to. Fortunately, the comics world failed to take this drivel to its collective bosom.~HS

PROGENY

Caliber: *One-shot 1989*

THE PROJECT

Paradox Press: *2 issue microseries 1996*

These two paperbacks are an ambitious work telling connected stories from a twenty-year period of an inner-city housing project, with characters seen at various stages of their lives. Surely writer John Figueroa kept charts, such is the complexity. The largely depressing stories are illustrated in appropriately gritty style by Kirk Albert, and while heartfelt, the first book doesn't move beyond similar material from countless TV shows. The only individual flavour is the narrative leaping back and forth through time. The best of the first volume concerns a woman deciding that the atrocities in her apartment block have gone on too long, and the time has come to take a stand, although the outcome is predictable. The second book is a vast improvement. Figueroa moves beyond examining crack dealers, junkies and gangsters and on to the system that lets them proliferate. There's less predictability, a greater emphasis on caring and a far more warmth and understanding from both characters and author.~FP

For this purpose Ben Dunn concocts an information and flashback heavy plot that boils down to who'll accompany Jeremy to the Prom. If you enjoy *Ninja High School* you'll enjoy this, and if you don't, you won't.~WJ

PROMETHEA

ABC: *23 issues + 1999 to date*

The female incarnation of inspiration and her relationship with her newest host, schoolgirl Sophie Bangs is set in a divergent present-day New York protected by science heroes

---

* Available in a collected edition

The Five Swell Guys. The ultra-modern city, generously sprinkled with neon signs and TEXTure screens with their constant public news broadcasts, has little room for magic. 1-3 form an introduction to the extended origins of Promethea, running to 7, which go back to 5th Century Egypt. Beyond reality, in the Immateria, we meet previous Prometheae: Barbara, Bill, Grace, Margie and Anna who give Sophie first-hand accounts of various legends. In 8-10 there's a dramatic showdown closing the first story arc. 11 is the only self-contained issue. Promethea and The Five Swell Guys battle a threat at the turn of the millennium. 12's interpretation of The Tarot is a contents page for the next story arc, which stretches to 23. Sophie decides to find the departed Barbara beyond The Immateria and sets out on a trip of self-discovery resulting in a new costume in 21. In Sophie's absence from reality Bill's barbarian version of Promethea has inhabited Sophie's best friend and causes havoc with science villains and heroes alike. Agents Lucille Ball (no relation) and Karen Breughel of the FBI are on the case.

Illustrator J. H. Williams III, alongside inker Mick Gray and colourist Jeromy Cox, creates exhaustively varied scenery for a complex set of stories from writer Alan Moore. The incredibly well-realised artwork often gives the impression of being an accompanying illustration upon which to float Moore's dense script, but when action is called for the team rallies forth. Changing colour schemes and linework are key parts of the journey during the second story arc. Risks are being taken here and an innovative approach abides. Not an easy read and very adult in places but any concerted effort is rewarded. Two collections gather 1-14.~SW

Recommended: 8-11

PROMETHEUS' GIFT

Cat-Head Comics: *One shot 1992*

An underground-style poke at pop philosophy from Steve Lafler. The freely-associated sermon includes snippets of a hand-typed personal account of an encounter with a UFO. Lafler's unhelpful artwork cannot even achieve consistent ugliness. There's an extra five pager called 'Radio Jill' where dreams about money are hijacked by the radio being left on.~SW

PROPELLER MAN

Dark Horse: *8 issue limited series 1993-1994*

Propeller Man has huge gaps in his memory, armour in place of skin, and he flies with the aid of the propeller on his back and his wing-shaped jet-board. When a heavily armed monster escapes from an Antarctic lab and rampages through the city, Propeller Man feels that he knows it, and the monster seems to know him too, and, as events develop, Propeller Man starts to reconstruct his past. This makes the series sound far too interesting. When Matthias Schultheiss tells the story, it's a lot of gratuitous violence, corporate conspiracies, endless scenes with Propellor Man's friends (smug gits, to a man), and preposterous dialogue along the lines of "Since she found that paper swallow with the poem on it, she's changed' and 'Eat my rotating blade". Damn, it sounds too interesting again. Avoid.~FC

PROPHET

Image/Extreme: *Series one 11 issues (0-10) 1993-1995, series two 8 issues, 1 Annual, 1 Special 1995-1996, 2 issue microseries ('Super Soldiers') 1996*

Awesome: *1 issue 2000*

Prophet is a supersoldier empowered by a satellite, created in 1940s Germany and then left in suspended animation until revived in *Youngblood* 4. Rob Liefeld acknowledges this theft of *Captain America* and *Omac* via a supporting character named Kirby, but that doesn't excuse it. The forced biblical allegories of series one wear thin, and Stephen Platt's art in 5-10 is distorted and gruesome. 1-7 are collected. Series two, written by Chuck Dixon, recasts Prophet and reveals him as more than originally conceived, and Platt's reined in to better effect. It's still no masterpiece, but much improved. Pompous and overbearing villain Drakmordrid is a hoot and a half, offering self-obsessed soliloquies without a hint of irony. Try 8 for a particularly spectacular session. The microseries teams Prophet with Chapel, as the pair of musclebound gun-heavy clods take down a Japanese warlord and his followers. Robert Loren Fleming refuses to take dialoguing this at all seriously, and delivers some hilarious lines at the characters' expense while playing up the contrast between Chapel's natural offensiveness and Prophet's presbytarian nature. Still no gem, it's far better than you might expect. The Awesome comic deals with two Prophets a century apart, but only in taster episodes, and the character hasn't been seen since. Cue tickertape parade.~WJ

PROPOSITION PLAYER

DC/Vertigo: *6 issue miniseries 1999*

Joey Martin plays poker for the house in Vegas: something he hates but must do to raise the stake he needs to play in a 'real' game. That's the plan, anyway, until he accidentally purchases the souls of some of his work buddies for the price of a beer each, when everything changes. God's agents arrive, followed by other deities, with varying offers for the souls he now owns. Bill Willingham tells a very readable story with wit and pace, dealing with issues such as religion, death and, most importantly, how to play your cards when the Big One comes along.~DB

Recommended: 1-6

PROTECTORS

Malibu: *20 issues 1992-1994*

A group of extremely obscure 1940s superheroes revived and banded as a team. 1-9 are moderately intriguing, with enough mystery to ensure readers return for more, and 5 has a tacky novelty bullet-hole drilled through the entire comic to commemorate the death of a team member in the best possible taste. Beyond that, the plethora of characters and an intrusive crossover ensure that little time is devoted to anything other than fighting. Full credit, though, for a final issue that runs contrary to all expectations.~WJ

PROTHEUS

Caliber: *2 issue microseries 1996*

In the days before Mike Deodato Jnr was elongating women's bodies for his current art style he was tracing photographs back home in Brazil for this story of seedy private eye Leo Protheus. It's brainless nonsense in which Sting features heavily as the lead. The covers have nothing to do with the contents, and the entire package is best left alone.~WJ

PROTOTYPE

Malibu: *19 issues (0-18), 1 Giant Size 1994-1995*

It's hard to believe it took two writers, Len Kaminski and Tom Mason, to conceive this lame knock-off of Marvel's Iron Man. Naïve teenager Jimmy Ruiz is Prototype, the 'corporate spokesman' for devious organisation Ultratech. Ruiz, a superpowered 'Ultra' with a fondness for steroids, replaced original Prototype Bob Campbell, a crippled ex-stunt man now bearing a healthy grudge against his former employers. The first four issues were drawn by the team of David Ammerman and James Pascoe, before Ammerman left to plot and draw the crappy *Wrath* (another Ultraverse hero who first appeared in *Prototype* 4). After that, slightly more pleasing penciller Roger Robinson hung on until almost the bitter end. The idea of superhero as media darling dates back at least as far as Grant Morrison's *Zenith* circa 1987, and Kaminski/Mason don't have anything very new to say on the subject. In other words, a modish gimmick is used to prop up more witless superhero fisticuffs.~AL

PROWLER

Eclipse: *4 issue miniseries 1987, 4 issue miniseries (Revenge of the Prowler) 1988*

Prowler is an ambitious attempt to create a new character that retains the mystery and adventure of the early pulps but that is capable of bearing some of the weight of 'modern' questioning of motives. Leo Kragg, the original Prowler, takes on a young apprentice, Scott, who's not at all ready for the violence and ruthlessness that being around the Prowler entails. Faced with an old adversary who commands an army of zombies and children, Scott does his best to avoid killing his enemies, nearly getting Leo killed in the process. Tim Truman's script is taut but occasionally obvious, while John K. Snyder III's artwork is mechanical and rather soulless. He obviously knows all the tricks of the trade and he captures expression well, but his figures never seem quite right. Tim Truman continues the adventures of his modern pulp hero in *Revenge of the Prowler*. Unfortunately, though working hard on characterisation, he includes too much daft technology to make the plot work. Snyder's artwork looks rushed. As an added bonus, issue 2 has a flexidisk soundtrack to accompany the story.~NF

The PROWLER

Marvel: *4 issue miniseries 1994-1995*

Long-time occasional Spider-Man ally is forced to ask some soul-searching questions as to his priorities in life. Complicated by a murderous doppelgänger using his technology and a familiar villain, the miniseries only rises slightly above its company contemporaries.~FP

PRUDENCE AND CAUTION

Defiant: *2 issues 1994*

Written by Chris Claremont and drawn by Jim Fern, this ties in with *Warriors of Plasm*, starring Rick Tietz from that series. Prudence is a strange creature, perhaps the deadliest in the Universe, and is accidentally freed by Tietz in *Warriors* 6. Starting on Earth she has an interest in Rick, but she's not the only one. It's professional, but not outstanding.~HY

PRYDE AND WISDOM

Marvel: *3 issue miniseries 1997*

A spin-off from *Excalibur* starring Kitty Pryde and Pete Wisdom as Steed and Mrs.Peel in London, basically. No superhero costumes, powers featured discreetly. They're called in to investigate a disappearance and a series of bizarre murders. The victims appear to have been fossilised so mutant foul-play is suspected. Along the way we also get to meet Pete's family, notably his sister Romany and his dad who looks just like a white haired version of Wolverine. Startlingly innovative (not). Warren Ellis' script is entertaining and the closeness of the lovers really comes across, but the art by Terry Dodson relies almost entirely on portraits, pin-up shots and close-in detail. There are so few distinguishable backgrounds that the story could've happened anywhere (there's the clichéd drive off an opened Tower Bridge in 1 and a silhouette of Big Ben but that's about it). The tube train that's part of 3's climax is completely fudged.~SW

PSI-FORCE

Marvel: *32 issues, 1 Annual 1986-1989*

Marvel's 'back to basics' thrust in 1986 created the New Universe, the concept of which strove for even more realism than the mainstream Marvel Universe did in 1961. The New Universe is based on the real world until the White Event (see *Starbrand* 12) induced paranormal powers in two out of every million people. In *Psi-Force*, Emmett Proudhawk assembles five altered and unwilling teenagers. He dies at the end of issue 1, but collectively they are able to summon his spirit as a giant psionic hawk. Refreshing as it is to encounter characters without secret identities and code names, and who wear their underpants on the inside, crafting quality stories about superheroes without the trappings of a superhero universe is highly demanding, and the creators fail to rise to the challenge. There is plenty of characterisation, background and emotional angst in the first fifteen issues, mainly written by Danny Fingeroth, but dreary plots reiterate attempts by political and corporate entities to subvert the kids' abilities for their own goals. Furthermore, Wayne Tucker's mind-wiping powers mirror those of the *X-Men*'s Professor X, are used with far less restraint and are far too convenient.

Fabian Nicieza writes all issues from 16, initiating a new and downhill direction from 18 as the team is involuntarily disbanded for six issues and reformed with changed personnel. The kids' streetwise maturity with their powers dissolves any charm of the earlier issues, where tentative fumblings often produced unpredictable results. The title rolls on like a telephone book but without the plot, until cancellation strikes mercifully in 32.~APS

PSI JUDGE ANDERSON

Fleetway/Quality: *15 issues 1989-1990*
2000AD Books: *1 Graphic Novel ('Shamballa') 1991*
Mandarin: *2 Graphic Novels ('Childhood's End', 'Satan') 1993, 1995*

Judge Anderson was the first series spun-off from *Judge Dredd*. She's a free-thinking woman whose individuality is indulged by the repressive Judge system due to her prodigious mental abilities. Alan Grant has written (or co-written with John Wagner) all her solo stories way beyond what's reprinted here, and from the start advisedly adopts a completely different tone to *Dredd*. Anderson's stories are action adventure, and the few moments of humour are to contrast the dark mood. There's also no doubt that she's the focus of the stories.

Brett Ewins illustrates the earlier issues, but is uninspired by weak material, then one of Mega-City One's greatest foes returns in 6 and 7, illustrated by Barry Kitson, with Anderson having premonitions of a wolf. 'Helios' in 8 and 9 is the first really good Anderson story. Exquisitely drawn in neo-realist fashion by David Roach, it offers more of Anderson's character beyond the uniform amid a disturbing tale of revenge. 10 and 11's 'Triad', illustrated by Arthur Ranson, continues a fine run, touching on child abuse as childhood nightmares prove a very real threat to Anderson and the city as whole. Ranson's illustrative, almost photographic, art style is astoundingly detailed, yet fluid and emotional, and elevates the story, shaking loose any remaining tenuous associations with Dredd. 13-15 are actually a below-par *Judge Dredd* story in which Anderson plays a large part. 'City of the Damned' had already been reprinted as *Judge Dredd* 15-18. The entire series suffers from shoddy reproduction, blurring the artwork. Interested readers are directed instead to the better-quality Titan reprint volumes.

Only three collections of later stories are available. In them the spiritual side of Anderson's nature comes increasingly to the fore, and she becomes disenchanted with the system the Judges uphold. The Arthur Ranson-drawn 'Shamballa' proves him to be as masterful in colour as he is in pen and ink. Manifestations of strange phenomena allied with brutal deaths lead to a teaming of Anderson and a Soviet counterpart on a mission to a long-hidden subterranean city. In 'Childhood's End' Anderson investigates a pyramid on Mars in a story offering a solution to life on Earth. It's weak, and the substitution of Ranson's Anderson by Kev Walker's more muscly figure is initially jarring, although it's equally well drawn. 'Satan' has Anderson back on Earth, and Ranson back on the art, for a story involving an alien claiming to be Satan, an improvement on its predecessor, but not up to the best material.~FP

Recommended: 8-11, 'Shamballa'

PSI-LORDS

Valiant: *10 issues 1994-1995*

The Psi-Lords are ageless beings who've set themselves up as protectors of the universe. They're aloof, detached and feared. 1's introduction to the team (also known as Starwatchers) is very well handled, and despite 3 tying into 'The Chaos Effect' crossover, more information about the team is imparted, filling in most essential background detail. A fallen Starwatcher returns in 4, and 6 and 7 have an invasion by the frog-like Sirians, revealing an alternative agenda on the part of the Psi-Lords. This intriguing plot is dropped for 8-10, which are a great disappointment, as they're nothing more than standard action material. The success of the early issues is very much to do with writer Anthony Bedard choosing to have the reader see the Psi-Lords through the eyes of Earth ambassador Danae Del Sol.

Her narrative, experiences and interpretations give a unique viewpoint for the title, and artist Mike Leeke is excellent throughout 1-7. All of those are worth your time, but start at the beginning.~WJ

THE PSYBA-RATS

DC: *3 issue miniseries 1995*

The Psyba-Rats are criminal computer hackers led by Razor, who was given superpowers when bitten by an alien during DC's 'Bloodlines' saga. With Hackrat and Channelman (who is trapped in Cyberspace) Razor sets out to find the formula for Zesti-Cola. A guest appearance from Robin helps set the series firmly amongst DC's youth titles. The story's not without its pleasures and the artwork, by Michael Dutkiewicz and Andrew Kent, is a delightful mix of old and new influences.~NF

PSYCHO

Skywald: *24 issues, 1 Annual, 1 Yearbook 1971-1975*

A horror anthology set up in the mold of Warren's successful bi-monthlies *Eerie* and *Creepy*, Skywald brought out this title to alternate every other month with *Nightmare*. The contents are similar to Warren's although the freelance talent is not always top shelf, but this leaves room for newcomers to take their turn stirring the vatful of entrails. Comics' first marsh monster, The Heap (formerly of *Air Fighters/Airboy Comics* 1942-1953), returned in 2 drawn by Ross Andru and Mike Esposito. Tom Sutton (signing himself Sean Todd) added *Frankenstein Book* II to the line-up in 3-4 as a follow-up to Dan Adkins' feature in 2. Early issues feature work by many familiar names including Gray Morrow, Gardner Fox, Dennis Fujitake, Bill Everett, Marv Wolfman, Ernie Colon (as Jack Purcell), Rich Buckler, Bruce Jones, Ralph Reese and Doug Wildey. There was an eight month gap in Skywald's black and white output from late 1971 to the Summer of 1972 where 7 sees a new name in the editorial credits: Al Hewetson. He pretty much guided the title through its increasingly demonic and bloodthirsty subject matter over the next three years. The Heap is last seen in 8 by Hewetson and Pablo Marcos whilst the contents gradually become swamped by Spanish and Filipino artwork from the likes of Serg Moren, Domingo, Xirinius, Ramon Torrents, Villanova, Zesar, Borrell, José Gual and Suso. There are early stories by Dave Sim and Gene Day in the last issue. The two annuals ran reprints of choice strips from past issues. It continued to resemble a poorer quality Warren title to the end.~SW

THE PSYCHO

DC: *3 issue miniseries 1991*

James Hudnall spins a tale of what might have happened if a superpowered being had killed Hitler, shortening World War II and changing the political future of the West. Jack Riley is a non-powered spy sent to keep tabs on one country's stockpile of superbeings. When his cover is blown and his girl-friend, Sonya, captured he takes a drug that might or might not kill him and emerges as The Psycho, determined to rescue Sonya and clear his name. The story is uncompromising in its depiction of the lack of respect for life exhibited by both government and superbeings as they jostle for power in a world heading for a bloody war, where the country with the most superhero soldiers will win. Dan Brereton's painted artwork is stunning and his character designs are clearly precursors of his own *Nocturnals* series – he seems particularly taken by amphibian characters. These 'heroes' are the stuff of nightmare.~NF

PSYCHOANALYSIS

EC: *4 issues 1955**
Gemstone: *4 issues 1999**

Public pressure closed down EC's mainstay horror and crime titles, and this was the oddest of their replacements. Future author Daniel Keyes made use of his psychiatry degree with a fair proportion of the writing, but this wasn't the ideal choice of material for a comic, although the stories do become more involving as they continue. Three patients are psychoanalysed, each having one session per issue. Freddy Carter resents his parents' attitudes towards him, Ellen Lyman is plagued by nightmares, and Mark Stone, ostensibly a successful writer, fears he's a hack and is overly concerned with death. Jack Kamen makes a sterling attempt at injecting excitement and variety into a dry topic requiring plenty of talking-heads shots, but can only cope with so many of them no matter how good he is. The Gemstone issues reprint the originals, and are available as a bound collection that's a cheaper alternative to the sumptuous black and white hardbound volume.~WJ

PSYCHOBLAST

First: *9 issues 1987-1988*

Psychoblast can do almost anything with the power of his mind, making him a desirable item for plenty of folk. Unfortunately he only exists when his host body, Brian Burke, sleeps. There's blood and thunder galore, but it all amounts to little in the end.~WJ

PSYCHONAUT

Fantagraphics: *2 issues 1996*
MonsterPants Comics:*1 issue (3) 1997*

A strange, and not entirely successful marriage of fact and fiction from Serbian cartoonist Sasa Rakezic, who writes and draws in English under the name of Aleksander Zograf. The bulk of the first two issues is devoted to Zograf's 'Visual Report', a comic strip diary that moves between three different narrative strands: fairly straightforward reportage on the political upheaval in former Yugoslavia at the start of the 1990s, flashbacks to unusual incidents in the author's childhood, and a bizarre record of the hypnagogic visions and lucid dreams that Zograf has of animated Walt Disney characters. Perhaps the cartoonist is making a point about the surrealism of Bosnian conflict, or about the way that, in Wim Wender's phrase, "America has colonised our subconscious". Things might be a little clearer if the artwork wasn't so generally flat and inexpressive.~AL

PSYCHONAUTS

Marvel/Epic: *4 issue miniseries 1993-1994*

Motofumi Kobayashi, Alan Grant and Tony Luke cobble together a half-baked and derivative tale of superpowered agents sent from floating space cities to see whether the devastated planet Earth is suitable for rehabitation. Crammed full of mutants, dinosaurs, mad scientists, evil politicians and hoary old clichés. Even *Planet of the Apes* does it better than this.~WW

PSYENCE FICTION

Abaculus: *1 issue 1999*

A private agency employs a variety of supernatural entities to solve weird mysteries in this spirited take on the *X-Files* phenomenon.~WW

PSYLOCKE AND ANGEL: CRIMSON DAWN

Marvel: *4 issue miniseries 1997*

Ben Raab and Salvador Larocca churn out stock plot number three as Ninja/Telepath Psylocke must fight to salvage her soul from the demonic extra dimensional cabal, the Crimson Dawn. Helping her out is live-in lover and winged mutant the Angel, aided and abetted by a sawn-off wizard and the inevitable Wolverine. Decorative but mindless.~WW

PTERANO-MAN

Kitchen Sink: *One-shot 1990*

A superhero parody on a grand scale, Don Simpson's *Bizarre Heroes* include Pterano-Man, The Phantom Jungle Girl, Megaton Man and the See-Thru Girl. The one-shot prelude to the regular Bizarre Heroes series features three stories introducing the first two characters above. Pterano-

Man battles ecological disaster and a man-dinosaur while Phantom Jungle Girl gets her mind switched with the Cowboy Gorilla's. Good, mostly clean fun.~NF

PUKE & EXPLODE

Northstar: *2 issue microseries 1991*

Dave Cooper's unsophisticated, grotesque, gory satire on the American dream as represented by the rise and fall of a rock star. Drug-fuelled, audience mangling and obsessive, Tiffin eventually decides that prosthetic limbs are the best way forward, but finds no-one to follow his lead.~NF

PULP

Viz: *Vol one 1 issue 1997, vol two 12 issues 1998, vol three 12 issues 1999, vol four 12 issues 2000, vol five 12 issues 2001, vol six 8 issues 2002*

This anthology of adult-themed manga translations doesn't use 'adult' in the sense of 'wanky comics' – though fairly frank sexuality is often a major component – but in the sense of 'grown up', proving that manga can, after all, be more than big-eyed waifs and martial artists. Among the main features are *Strain*, the story of an ephebically beautiful assassin, the female street waif he befriends, and the consequences thereof, illustrated by Ryoichi Ikegami. In Naoki Yamamoto's *Dance Till Tomorrow*, in which college student Suekichi will inherit $4.5 million if he graduates, but keeps getting hindered and distracted in his academic goals by the mysterious beauty Aya. Akimi Yoshida's *Banana Fish* tells of a young gang leader, Ash, who is trying to solve the enigma of the eponymous new street drug, but keeps falling foul of his old boss, and lover, Papa Dino. *Black & White*, by Taiyo Matsumoto, is best described as *Ren & Stimpy* with human street urchins. Without the funny bits. Or the plots. Hideo Yamamoto's *Voyeur*, has Ko, under the tuition of an experienced voyeur, spying on his girlfriend Satomi, not knowing that the two of them are also under surveillance. Intended to be some sort of tense psychodrama, the substandard art and plodding storyline have failed to impress. All the above series have been continued in a series of paperback books, and are dealt with in greater depth as separate entries.

A regular filler feature is Masahiko Kikuni's *Heartbroken Angels*, a series of disconnected scatological nonsense strips, as frequently disgustingly hilarious as they are utterly incomprehensible. *Bakune Young*, by Toyokazu Matsunaga, is a savage, ultra-violent satire about a man who wants world domination, but has nothing to offer but his rage. Junko Mizuno's *Cinderalla* is a retelling of the classic fairy tale, but the stepsisters are zombies, and our heroine has to make a gory sacrifice to win the heart of Prince charming. This superficially cute, fluffy series is reminiscent of the *Powerpuff Girls*, but with nipples and self-mutilation. *Uzumaki*, by Junji Ito, details the story of a small town, Kuroazu, where the populace are apparently obsessed by spirals. Described by many as a 'horror manga', that's... rather too simplistic a description. It's suspenseful, tense, strange and disturbing, but not, generally, explicitly horrific.

Looking for a career change? Read *Even a Monkey Can Draw Manga!*, by Koji Aihara and Kentaro Takekuma, a mock-instructional series that will teach you how to become rich, famous, and sexually potent beyond your wildest dreams by drawing comics! After the frequently grim and nihilistic fare in the rest of the issue, *Even..* always comes as a hilarious change of pace.

Like most anthologies, *Pulp* is not going to appeal to everyone, and its uneasy pandering to the 'adult' comics market, with its 'sexy' pin-up covers and occasional posters, makes it look like a 'wanky comic', when it actually runs several mature series, and will reward any unprejudiced reader. The anthology format and diversity of features, plus the policy of gathering them into affordable paperback compilations, makes recommendation problematic, but any issue of *Pulp* will feature something that you'll want to see more of. Despite generally poor sales for anthologies, *Pulp* managed a respectable run, but eventually gave in to diminishing audiences and was cancelled. The paperback compilations of popular series such as *Banana Fish* will continue with newly-translated material, and the experiment has at least given Viz sufficient confidence in offbeat manga that they plan to 'pilot' similar series straight into the paperback format.~HS

PULP FANTASTIC

DC/Vertigo: *3 issue miniseries 1999**

When lecherous private eye Vector Pope is asked to locate a missing society girl he soon finds he's involved in more than a missing persons investigation. Generous helpings of sex, drugged androids, corrupt cops, more sex, transvestites, religion, even more sex, violence, betrayal and an ornamental bird are borne by the hero. Vector is helped by his frisky holographic secretary Ayesha, his partner Wulf, his altar-boy stoolie Jewd and his gorgeous old flame Kiko. Writers Howard Chaykin and David Tischman produced a futuristic make-over of *The Maltese Falcon* with numerous gender changes and modernisations of equipment and social morés. The artwork by Rick Burchett is spare, slick and well laid-out although the size of the heads often makes characters appear to be five feet tall. High geared and lascivious.~SW

PULP FICTION

A List: *7 issues 1997-1998*

Anthology reprinting a mix of out-of copyright adventure strips such as *Tugboat Tessie* with padded out with short text fiction taken from pulp magazines. Historically interesting and frustrating, as none of the material is attributed or credited.~WW

PULPATOON PILGRIMAGE

AdHouse Books: *One-shot 2002*

Bull, Delaware Thistle and Rowbot are animal, vegetable and mineral, wandering a mostly deserted landscape with interludes to explain, in part, who they are and how they met. Joel Priddy examines themes of friendship and the relationships between birth, life, death and nature, with simple, yet clear cartooning. The leisurely journey is agreeable, if ultimately inconclusive.~NF

PUMA BLUES

Aardvark One International: *17 issues 1986-1988*
Stephen Murphy & Michael Zulli: *3 issues (18-20) 1988*
Mirage: *3 issues (21-23) 1989*

In the year 2000, Gavia Immer is a soldier sent out into the wild to observe and sample nature. It's a world where racist fantasies have nuked the Bronx and the rivers need regular doses of alkalines in order to offset the effects of acid rain. A flying mantra ray has stirred political interest and Gavia is beset by memories of his father (whom he re-encounters through videos) and conversations with a trespassing cowboy, which are recorded by a wandering robotic chauffeur.

Puma Blues is a complex, increasingly abstract work, undoubtedly heartfelt. At times it seems there's no plot, just a series of observations on nature, human or otherwise. It's also an intense plea for the protection of the environment from future depredation. Michael Zulli's artwork is detailed, like Barry Windsor-Smith's, but he has also picked up the scratchiness of an Eddie Campbell. It's certainly very illustrative, particularly in 5, a wordless trip through the forest at night, with short vignettes about the creatures still abroad. 20 is a benefit issue (with contributions from Dave Sim, Steve Bissette, Chester Brown, Peter Laird, Tim Truman, Tom Sutton, Alan Moore, Kevin Eastman and Rick Veitch) to show solidarity in a dispute between publishers and distributors.~NF

PUMPKINHEAD

Dark Horse: *4 issue miniseries 1993*

An ages-old entity is summoned by magic in the backwoods to take revenge for murder. Throw in a superstitious local community, some teenage hoods, a woman with arcane abilities, and a mysterious stranger with a secret and you have all the ingredients of a horror plot. The trouble is that it's a plot used to excess through the ages, and there's nothing new added here, although Shawn McManus, as ever, produces functional and decorative artwork. Despite the name, though, the head of the title creature only resembles a pumpkin in colour. Very disappointing.~FP

PUNCTURE

ComX: *3 issues 2001*

Meandering cybercafe psycho-thriller as secret societies and serial killers vie with a new kind of bloodsucker and good old fashioned gun toting thugs in a visually effective but narratively confused jumble.~WW

THE PUNISHER

Marvel: *5 issue miniseries 1985-1986*, series one 104 issues, 7 Annuals, 10 Specials 1987-1995, series two 18 issues 1995-1997, 4 issue miniseries 1998-1999, 12 issue limited series 2000-2001*, series three 17 issues + 2001 to date*

Introduced in *Amazing Spider-Man* 129, The Punisher spent over a decade as a supporting character, before the first miniseries transformed him into a headliner. He's composite lifted from popular 1970s paperback fiction: Vietnam vet becomes heavily armed hitman driven to kill criminals, having seen his family wiped out by gangsters. If you can accept the debatable ethics, until a recent resurgence, *The Punisher* usually provides base level entertainment without ever being outstanding.

For fifteen years the exception was the first issues of the miniseries. Steve Grant and Mike Zeck explain previous inconsistencies in the Punisher's behaviour, have him settle a few scores in jail, and escape with the complicity of the warden. Thereafter the story slipped, but reflected a trend towards more violent comic heroes. Its success seemed to catch Marvel on the hop, who waited over a year before publishing an ongoing title (although they made up for lost time, as the plethora of other *Punisher* titles testifies). Retaining Grant's first-person narrative as exposition, Mike Baron writes most issues to 62 of the first series. He provides action thrillers with the requisite high body count, initially liberally adapting contemporary news. The likes of the Reverend Jim Jones, blackmailers tampering with pharmaceutical products and insider traders all get theirs in suitably brutal fashion. Stories rarely stretch beyond two parts, and there's little continuity, making sampling relatively simple. The best of the earlier issues is the Whilce Portacio and Scott Williams-illustrated cat-and-mouse with the Kingpin in 15-18, but none match the power of the miniseries. At the height of the character's popularity Marvel issued *The Punisher Magazine*, a black and white title reprinting the miniseries and early issues of this and *Punisher War Zone*.

That Baron was running out of ideas after nearly five years can be seen by the conclusion to 59, in which The Punisher is transformed into a black guy, albeit only for three issues. New writers Dan Abnett and Andy Lanning (and penciller Dougie Braithwaite to 75) offer more multi-part stories, starting with the Punisher in Europe in 64-70, and while maintaining the body count their stories aren't so relentlessly grim. 'Fire Fight' in 82-84, well pencilled by Hugh Haynes, is their best effort, and it also features Vigil, the New York anti-vigilante squad who've been after Castle since 72. 86-88 are this title's chapters of 'Suicide Run', which crosses over with both other Punisher monthlies, and leaves an assortment of Punishers running around in the wake of Frank Castle's apparent death. He's not dead, of course, and after 'Suicide Run' there are different creative teams almost every issue to the end of the run, with Frank Teran's astoundingly distorted art in the brutal 94-95 worthy of note. Bullseye turns up in 102 to set in motion events that have far-reaching consequences for both the Punisher and S.H.I.E.L.D., and end the first ongoing series.

The second series by John Ostrander and Tom Lyle sees the Punisher take control of a crime family to fight the war from within, but business outstanding with S.H.I.E.L.D. comes to occupy the title. Surely low sales were the only reason for the anti-mutant hysteria of 'Total Xtinction' in 12-16, a plot traditionally the exclusive province of X-Men titles. That story apart, this abruptly curtailed series is consistently more interesting than any Punisher since the first miniseries, given the intrinsic limitations of the character. The second miniseries is a poor attempt to address those limitations by modifying the *Punisher* and involving him in a war between heaven and hell. It's tedious, misguided and a waste of Bernie Wrightson's talents.

The 12 issues by Garth Ennis and Steve Dillon provide Tarantino-style comics that play a cast of quirky losers off the Punisher's one-track personality for a winning formula. The instant success led to a reprinting of 1-2 in a collected edition, but Marvel cottoned on quick, sordidly charging extra for the advertising material bagged with 3. The only other downside is the lack of variety to Tim Bradstreet's covers. The running plot has the Punisher tracked by the most useless detective in New York while destroying a crime family, which inspires assorted other vigilantes. Within that frame there are numerous memorable sequences, such as the Punisher dealing with hired killers in 2, Daredevil's dilemma in 3, the appalling Ma Gnucci from 4 and her inevitable demise in 12, the off panel introduction of The Russian in 8, the beautifully set-up killing in 11 and many more. Be warned, though, the black humour means it's not for the soft of heart or those with refined tastes. Ennis and Dillon return for 1-6 and 13, 14 and 18 of the third series, but turn out largely plotless comics equivalents of the action movie. There's a novel use of Spider-Man in 2, but 18 is the standout, with the Punisher in Belfast finally providing a Marvel comic with an accurate representation of the situation there. A decent effort by Tom Peyer and Manuel Gutierrez occupies 9-12, falling apart at the end, and Ennis with Darick Robertson sees out 2002 with slightly better, albeit very silly, ideas.~WJ

Recommended: First miniseries 1, limited series 1-3, 5, 7-12, series three 18

PUNISHER Graphic Novels and one-shots

Whether Marvel believed that banging out Punisher stories in a more expensive format would introduce the character to a new audience or whether they just wanted more money from the already captured punters is debatable. They certainly maintained a hectic schedule from 1987 to 1991. The best of the bunch is the oversized 'Assassins Guild', a well-plotted story from Jo Duffy in which our man teams with the titular guild to eradicate a company protecting rich criminals. It's lifted to great heights by the excellent Jorge Zaffino artwork, and if another Punisher movie script is ever required Hollywood could do far worse than this. Zaffino returns in fine form in the company of Chuck Dixon for the less successful Kingdom Gone. 'Blood on the Moors' shows none of the creators at their best, and the idea of transporting the Punisher to the Scottish highlands is daft. That said, it's a rare story by John Wagner and Alan Grant that lacks any leavening humour, and Cam Kennedy is never less than professional, which ranks this near the top of the list. It's a shame, then, that Marvel only ever published the story in expensive hardback format. Dan Chichester, John Romita Jr and Klaus Janson turn in an acceptable exercise in compare-and-contrast in *Punisher/Batman*.

Jim Starlin's decent plot combats Tom Grindberg's shockingly distorted figurework in the two-part 'Ghosts of the Innocent' with an interesting twist on the school-bus-caught-in- gangster-shootout scenario, and The Punisher's creator, Gerry Conway, returns with Dave Cockrum and Jeff Albrecht for a somewhat predictable but nonetheless spirited 'Bloodlines'. The Grant/Zeck team that elevated the Punisher to star status provide 'Return to Big Nothing'. It's taut and well constructed from a string of clichés including (but not limited to) the guy who was always tougher than Frank Castle in Vietnam, the matchbook clue, the whore with the heart of gold, the Saigon withdrawal and the fixed casino. Divorced from the idea that it was originally intended to occupy three issues of Marvel's restrained and sober *The 'Nam*, Castle romping around the jungle in *The Punisher Invades The 'Nam* has its moments, although it's little more than a shoot-'em-up. Absolutely nothing more than a shoot-'em-up is *The Punisher Kills The Marvel Universe*. Not literally, you understand, but he does off almost every superhero and supervillain. Switch off your brain before entering Garth Ennis' first Punisher story. His second one-shot, the curiously unpunctuated *The Punisher Painkiller Jane*, is far better, with 11 pages of Joe Jusko art followed by eleven decent David Ross pages, all well inked by Joe Rubenstein. The daft plot concerns Jane falling for the Punisher. It's a decent bargain box cheapie.

Of the less memorable series and one-shots, 'Blood and Glory' might have worked in one issue, but drags over three, contrasting the Punisher with Captain America as they forge a mutual respect, and also featuring Terror. It's better, though, than the meeting with Cap's more gung-ho counterpart, the USAgent, in 'No Escape', in which Paladin has to assassinate our man. Strangely, he fails. 'The Origin of Microchip' tells in rather prosaic fashion how the Punisher's techy pal hooked up with him, in what would at any other time have been two issues of a regular title, as would 'G Force.' Slim plot sees off 'Die Hard in the Big Easy' and the team-up with Black Widow in 'Spinning Doomsday's Web', while there's a fine twist to 'The Prize', but getting to it through dull story and pedestrian art is hard work. The same applies to 'Intruder', with its strained religious symbolism and stupid plot, from Mike Baron and Bill Reinhold on autopilot. Their efforts on 'Empty Quarter', the Punisher in the desert, are only marginally better. Teaming the Punisher and Archie was an idea best left in the bar, while 'A Man Called Frank' is a pointless reworking of the Punisher's origin in 1910 to create a late Western version of the character.~FP

Recommended: The Assassins Guild

PUNISHER P.O.V.

Marvel: *4 issue miniseries 1991*

Jim Starlin and Berni Wrightson concoct a better-than-average Punisher story in which pragmatism allies him with the Kingpin's men. This is to deal with the son of an industrialist, hideously mutated by toxic waste, with a penchant for draining women's blood. Plot complications ensue with the involvement of a deranged vampire-hunter, prompting the interest of Nick Fury.~FP

PUNISHER 2099

Marvel: *34 issues 1993-1995*

You've got to have some sympathy with the guy who wipes out Jake Gallows' family. As caricatured by writers Pat Mills and Tony Skinner they're the most saccharine bunch this side of the Care Bears. Sadly, this shorthand characterisation extends to the entire cast. Despite some inventive wrinkles on the Punisher legend, like Gallows keeping a prison complete with molecular disintegrator chair in his basement, it's little more than line-them-up-and- blow-them-away in 1-27. With 28 Doom's takeover of the USA in *Doom 2099* has repercussions here, as the Punisher is appointed to head an anti-criminal squad called S.H.I.E.L.D. The final few issues, by Chuck Dixon and Rod Whigham, are a marginal improvement as Gallows has to fight his robotic alter ego and escape Doom.~WJ

PUNISHER WAR JOURNAL

Marvel: *80 issues 1988-1995*

Since his earliest appearances, a narrative format used for The Punisher is captions detailing his 'War Journal' entries, or 'Punisher's Diary', with the pretence stripped away. "Dear Diary, today I protected the innocent (apart from the ones killed in the crossfire), thwarted the guilty (apart from the ones who are smarter than me, which is most of them), and made the country safe (after everybody pulled themselves out of the smouldering wreckage)." Exaggeration perhaps, but certainly not by much. In what was touted before its début as the 'quality' *Punisher* title, Frank Castle goes around the world having adventures in picturesque foreign parts, reducing them to rubble in partly-successful attempts to right wrongs. Jim Lee drew most of 1-19, presumably the reason for the title's misapplied 'quality' tag. His presence, though, doesn't disguise the rushed, slipshod, second-rate nature of most of the stories. Once he leaves, the most notable issues artistically are the teaming of Andy Kubert with father Joe in 31-33. Most superheroes look out of place in Punisher's gritty urban milieu, but that doesn't stop the writers trying to sneak them in. There's the inevitable Wolverine (6, 7*), Daredevil (2, 3*, with Nomad in 45-47), Ghost Rider (29-30, 57-58), and Daredevil and Ghost Rider (57,58). 61 begins the 'Suicide Run' story, which crosses through numerous issues of both other ongoing *Punisher* titles before concluding here with 64. It begins with Castle's apparent death, and, adopting the similar idea from the Superman titles, four surrogate Punishers appear to take his place, a frightening equation. Thankfully the market for obsessive gun-toting murderers appeared to have declined by 1995, sweeping most of the Punisher's titles away.~HS

PUNISHER WAR ZONE

Marvel: *41 issues, 2 Annuals 1992-1995*

Punisher exploitation hit a peak with the launch of this third ongoing title. Its distinguishing aspects are a monopoly of multi-issue storylines and avoidance of superhero guest stars. Only Wolverine, in 19, breaks the rule, and even then stays out of longjohns. All the stories reflect Punisher's violent, obsessive vendetta against the criminal fraternity and many have some degree of merit, but the run suffers from repetition.

Chuck Dixon writes the majority (1-11, 26-37, 41, both annuals) and leads the field, mainly by endowing Frank Castle with curt, black humour. 1-6 set a standard that the book never subsequently regains. Punisher goes undercover, has a domestic with Microchip and confronts a chilling new nemesis, Thorn, whose major reappearance in Annual 2 sadly disappoints. Dixon's sequel in 7-11 is still reasonable, although lessened by John Romita Jr's departure from pencils. Dan Abnett and Andy Lanning break the formula in 12-16, but their narrative of Punisher's brain-washing does not quite hang. Writing *Punisher* requires a fine art in displaying his escapes from certain death cliffhangers – after all, the man has no superpowers – and Larry Hama's run (20-25) overstretches suspension of disbelief. His 'Suicide Run' (23-25) and 41's 'Countdown' are the only stories to directly crossover with *Punisher*'s other ongoing titles.~APS

Recommended: 1-6

THE PUNISHER YEAR ONE

Marvel: *4 issue miniseries 1994-1995*

Picking up with the murder of Frank Castle's family, this is really the first couple of weeks for the Punisher, and it's not until the final issue that he dons the skull shirt. Feeling betrayed by the law he resolves that those seemingly beyond judgement will be punished. Adequate, but Dale Eaglesham's covers apart, not spectacular.~WJ

PUNX

Valiant: *4 issues, 1 Special 1995*

Keith Giffen masterminded this parody comic, centred nonetheless firmly in the Valiant Universe. A bunch of the most futile and occasionally disgusting paranormals imaginable, (Ma'am Marie? The Crimson Pigeon? P.M.S. The Para-Military Shrew?) offshoots of the Harbinger programmes, thwart (mostly inadvertently) the plans of an evil collective creature, the Veil. Some cute touches, including sarcastic digs at Valiant's increasingly desperate 'relaunch' attempts, but largely muddy and incoherent. The *Manga Punx* special, printed back to front, followed, and subsequent one-shots were solicited, but never issued.~HS

PUPPET MASTER

Eternity/Full Moon Entertainment: *4 issue miniseries 1990-1991, 2 issue microseries ('Children of the Puppet Master') 1991*

David DeVries and Glenn Lumsden's first series provides an origin of sorts for the murderous puppets and their master dating back to Nazi Germany and ancient Egypt. Fans of the films should find plenty to enjoy here, as the 1930s portions of the original film are given a new context and many elements found their way into *Puppet Master III*. The microseries is a steamy story of lust and betrayal, but the storytelling sometimes confuses, flashing between recent past and present. By this time Lumsden's art has evolved, from a poor man's Paul Gulacy, incorporating elements from Gulacy's most obvious influence Jim Steranko. Again, Lumsden's not as good as Steranko, but his growth over six issues is remarkable.~FP

PUPPY ACTION

Northstar: *One-shot 1990*

Imagine a more frenzied *Dilbert*, but aided by dogs instead of people, and you have some idea of the unique charms of *Puppy Action*. Created by *Amy Papuda* maestro Michael Pearlstein, the comic features minimalist artwork and ancient jokes, but just about gets away with it by its sheer exuberance. As a bonus there is a back-up with yet more puppies wrecking a science fiction convention, a soft target but fun anyway.~DAR

PURGATORI

Chaos!: *One-shot ('Prelude') 1996*, 3 issue miniseries ('The Vampires Myth') 1996*, one-shot ('The Dracula Gambit') 1997*, one-shot ('The Dracula Gambit Sketchbook') 1997, 7 issues 1998-1999*, 4 issue miniseries ('Goddess Rising') 1999, 4 issue miniseries ('Collected Edition') 2000, One-shot ('Purgatori vs. Vampirella') 2000, 3 issue miniseries ('Empire') 2000, one-shot ('Purgatori vs. Chastity') 2000, one-shot ('Untold Tales of Purgatori') 2000, one-shot (½) 2000, one-shot ('Purgatori vs. Lady Death') 2001, one-shot ('0') 2001, one-shot ('Love Bites') 2001, 2 issue microseries ('The Hunted') 2001, 2 issue microseries ('Darkest Hour') 2001, one-shot ('Mischief Night') 2001, one-shot ('Heartbreaker') 2002, 2 issue microseries ('God Hunter') 2002, 2 issue microseries ('God Killer') 2002, one-shot ('Re-Imagined') 2002*

All that's bad about "Bad Girl" comics is prominently displayed in a bewildering series of outings from instigator Brian Pulido and a plethora of creators. Originally conceived as a foil to the surprise hit *Lady Death* it's the story of Sakkara, a harem-slave in ancient Egypt, who becomes a vampire, goes to hell, becomes a consort of Satan, sucks up some of his power and becomes a Vampire Goddess. That's basically all the sense there is, as an interminable parade of badly drawn, busty naked women and improbably proportioned monsters conquer and are defeated in turn by the batwinged bitch-queen. Especially bewildering is the ploy of turning her human and having her fight to regain her powers and status. A ghastly blur of titillation, male-fantasy lesbianism, cat-fights and blood-letting. How sad must you be to buy this?~WW

PURGATORY USA

Slave Labor: *1 issue 1989*

Début for Ed Brubaker, with vignettes about the fictional Maynardville, middle USA. Although it's well drawn, the enduring feeling is "so what?" The one story with the potential to avoid this, 'The Rain', begins with six pages of unnecessary exposition, and the chapter ending occurs as the story had taken off, never to be completed. Brubaker left this behind for the more successful *Lowlife*.~WJ

The Twisted Tantrums of THE PURPLE SNIT

Blackthorne: *2 issues 1986*

The purple snit is the rage-filled social observer in all of us, but whereas most of us just moan to our friends after an incident, the Snit is pro-active. This is a decent idea, but the results aren't really that funny.~FP

Q

QUACK

Star*Reach: *6 issues 1976-1977*

Mike Friedrich's Star*Reach Productions did much to pave the way for the independent boom of the early 1980s. Giving creators copyright and creative freedom, the aim was to try to reach a more mature audience but retain some of the sense of fun that brought them into the comics business in the first place. *Quack,* nominally a funny-animal anthology that features ducks, never bothered too much about keeping to the rules. Three strips stand out from the series. Michael T. Gilbert's 'The Wraith' began life as a Spirit parody/homage and quickly improved as Gilbert's art skills developed, and all Wraith stories from here and elsewhere are available in a collection. 'Newton the Wonder Rabbit' from 2 is a madcap space adventure written by Sergio Aragonés and drawn by Steve Leialoha, and 'The Beavers' is an early, very rough Dave Sim strip commenting on Canadian stereotypes and taking potshots at family life. No single issue has enough meat to make you feel it's a great title, but there are many interesting contributions from the likes of Frank Brunner, Mark Evanier, Scott Shaw and Dave Stevens.~NF

QUADRANT

Quadrant: *8 issues 1983-1986**

If you like sword-and-sorcery and naked women there's a chance you'll enjoy this half-arsed, sub-John Norman tale of warrior women, elven thieves, dire gods and dim (or undead) swordsmen. What separates *Quadrant* from most other strips in the genre is the scattershot attempt to make it sexy, with everything from open-crotch shots to bondage and lesbian encounters. Its utter triviality is demonstrated by the concept of hordes of women going into battle wearing nothing but high heels.~NF

Ninja High School's QUAGMIRE U.S.A.

Antarctic: *3 issue miniseries 1994*

Following characters from *Ninja High School,* the innocent Jeremy is targeted by a potential girlfriend who's not all she seems. Luckily the witch Mimi is on hand to look out for him. Slim of plot and content, only someone completely immersed in the world of *Ninja High School* should consider trying this.~WJ

QUANTUM & WOODY

Acclaim: *23 issues (0, 1-21, 32) 1996-1998 (1-17) 2000 (18-21)*

Eric Henderson (Quantum) and Woodrow Van Chelton (Woody) grew up together, nearly inseparable despite their vast temperamental differences, due to their fathers working in the same research facility. Fifteen years later the pair are reunited when their fathers' deaths in a seeming accident lead them to discover two gauntlets that grant them great power. The downside is that the gauntlets cannot be removed, and unless they're connected every twenty-four hours, the bodies of their wearers will dissipate into energy. Two fundamentally incompatible personalities, whose eccentricities and irritating traits have become honed over the years, are linked for life. Trying to unravel their accumulated emotional baggage while dealing with megalomaniac super-villains, death threats and a peripatetic teleporting goat (no, really), this oddest of couples (although they're not a couple, as they frequently protest) constitute the world's worst superhero team. The highlight of the careers of writer Christopher Priest and artist Mike Bright to date, *Quantum & Woody* is a sitcom with guts, placing the action third in line after comedy and the emotional shenanigans. The humour appears to be broadly slapstick, but is cleverly balanced, arising intrinsically from the characters and their shared experiences, illustrated by the liberal use of flashbacks. And for all the comedic thrust of the series, the creators don't shy away from poignancy, maturity or raw emotion when it's appropriate. Check out the 'Magnum Force' story in 14-17 for one of the better illustrations of this. The oddly numbered 32 is a "flashforward" to our heroes' possible future, a gimmick that can safely be ignored. Culling that gives you a top notch series. Of course, the ending is unsatisfying, but then it's hard to think of an ending that wouldn't be unsatisfactory. Four reprint volumes collect almost all issue.~HS

Recommended: 0-21

QUANTUM LEAP

Innovation: *12 issues, 1 Special 1991-1993*

This is the comics version of the TV series, telling additional stories of Sam Beckett as he leaps from life to life, inhabiting each person's body for long enough to "put right what once went wrong"'. The comic captures the characters and the feel of the series very well, and with each story limited to a single issue (or half-issue), even the weaker ideas don't make unreasonable demands on your patience, which is more than can be said for the series. Of the stronger ideas, some explore the rules of the format (6, where Sam becomes one of a pair of twins), whereas others tackle particular issues (9, on the gay rights movement, written by Andy Mangels). During the first flush of popularity the first issue was reprinted with some extra pages of text material.~FC

QUASAR

Marvel: *58 issues 1988-1994*

One of the many series which manages to be entertainingly average without rising far enough above that to receive any recognition, *Quasar* was written for most of its run by the reliable Mark Gruenwald, and is a bargain-box gem. The soap-opera plot, centring around the title character and his friends – including his girl-friend Kayla and the (never actually stated but obviously gay) Eternal, Makkari – always trotted along with an air of light-hearted fun. The plots were never as cosmic as they aspired to be but were nonetheless never dull, augmented by a plethora of jokes milked out of the fact that in his civilian identity of Wendell Vaughn, Quasar rented office space in the Fantastic Four's Baxter Building headquarters. It was the perfect cover: if a villain attacked at an inopportune moment, Vaughn would protect his identity by claiming they were after the FF instead. 17, featuring a race to determine the fastest character in the Universe, is full of great in-jokes for sad old fanboys.~JC

QUEEN & COUNTRY

Oni Press: *12 issues + 2001 to date, 3 issue miniseries ('Declassified') 2002-2003*

After performing the assassination in Kosovo of a Russian mafia member, British intelligence agent, Tara Chace is wounded, but manages to escape. However, friends of the deceased, put a bounty on her head and Tara must act as bait to capture her hunters (1-4*). The second storyline, 'Morningstar' (5-7*) begins with Tara on a psychiatrist's couch, coming to terms with the assassination, while her fellow agents look for missing information in Afghanistan. 'Crystal ball' (8-12) has Tara checking the story of an informant, who claims that there will soon be a terrorist attack on British citizens. Interrupting the regular series, 'Declassified' centres on the past of Director of Operations, Paul Crocker, Tara's boss, with a mission to bring a defector out of Prague. Writer, Greg Rucka, credits the British TV series T*he Sandbaggers* for many of the ideas here, as well as his love of espionage generally. Certainly, his scripts contain all of the intrigue and paranoia that one could want in a spy story. Artistically, the series fares less well, lacking detail, but Leandro Fernandez (8-12) has a more European style, uncluttered and stylish.~NF

* Available in a collected edition

QUEST FOR DREAMS LOST

Literary Volunteers of Chicago: *One-shot 1987*

As the publisher suggests, this was intended to raise money to promote the importance of literacy, with many creator-owned properties occupying short chapters in which they must locate a well-known fictional object. The most prominent among them are the Teenage Mutant Ninja Turtles, by Eastman and Laird, retrieving Arthur's legendary sword Excalibur, but of most interest is the early artwork from Mike Parobeck and Guy Davis and a *Silent Invasion* short.~WJ

THE QUESTION

DC: *Series one 36 issues, 2 Annuals 1987-1990, series two 5 issues 1990-1992, one-shot 1997*

An excellent and vastly underrated series. Continuing the premise of the Question's previous solo outing almost twenty years previously in *Mysterious Suspense*, the editorial aim was to present the real world. The only anomalies are the minor scientific gimmicks used to transform crusading TV journalist Vic Sage into the crimefighting Question. Astonishingly, *The Question* lived up to the promise, becoming a compulsive drama that can stand with the best TV output. Even bit-players are multi-faceted, with motivations consistent with their actions. Sage himself is exceptionally well drawn, a far from likeable individual who nonetheless cares deeply about the disintegrating industrial wasteland his city is becoming.

The first series can be broken down into four distinct phases, with 1-5* filling in Sage's background and giving him a philosophy about life, while remaining consistent with the 1960s Steve Ditko stories about the character. Issues up to 14 have the Question confronting a variety of unsavoury individuals as plots address social concerns such as pollution, military patriotism, TV evangelists and ubiquitous drugs, while Sage rekindles his relationship with old flame Myra Fermin, now married to Hub City's drunken and ineffective mayor.

The third phase of the series starts with 14, as Myra announces her candidacy for mayor of the city she runs in all but name anyway. The election is decided in 24, and from that point the ongoing and seemingly irrevocable decay and corruption in the pseudonymous Hub City (Detroit?) underscore the remainder of the title's first run to an unpredictable conclusion (although most stories occupy only one or two issues). That writer Denny O'Neil (all issues) and penciller Denys Cowan (most issues) stuck with the title throughout its run goes a large way to explaining why, after a no better than average introductory phase, almost every issue is worth a look. Worthwhile sample issues are the spotlight on a racist investigator in 15, or 32's story about someone trying to redeem a mistake made during the Vietnam war.

The gap between first and second series (titled *The Question Quarterly*) is bridged by an appearance in *Green Arrow Annual* 3. The first new issues see Sage in South America, and facing a new challenge. He returns to Hub City, but the undercurrent of political intrigue is underplayed, and the stories suffer as a result. The best is 3, in which a movie crew hits town. The Question is next seen in *Showcase '95* 3. The 1997 one-shot, titled *The Question Returns*, almost reaches the standard of the initial series, although purists may carp that the Question's distinctive featureless face-mask now has eye slits. Several years have passed since the conclusion of the previous series, and O'Neil pens a tale requiring Sage to return to Hub City, illustrated in fine, restrained fashion by Eduardo Barreto.~FP

Recommended: 7, 8, 12-16, 20-24, 26, 28-36

QUESTPROBE

Marvel: *One-shot 1983, 3 issues 1984-1985*

A bizarre attempt to promote computer games featuring Marvel characters. In each issue a superhero passes through a portal that probes, assesses and drains their power, at which point you're supposed to rush off and buy the computer game to discover what happens next. Infrequent publication tied into the release of the games and bog-standard comics ensured an early cancellation, although the planned fourth issue eventually turned up as *Marvel Fanfare* 33.~FP

Star Wars QUI-GON & OBI-WAN

Dark Horse: *3 issue miniseries ('Last Stand on Ord Mantell') 2000-2001, 2 issue microseries ('The Aurorient Express') 2002*

Taking place five years before *The Phantom Menace*, an assassination attempt on Baroness Omnino of Vena fails. The investigation by Jedi Knight, Qui-Gon Jinn and his padawan (apprentice), Obi-Wan Kenobi, leads to her son, who's found dead, and to Taxer Sundown, who, displaying Jedi-like powers, has established a harsh rule over the planet of Ord Mantell. Ryder Windham creates a good sense of adventure and mystery, while Ramon F. Bachs' artwork is quite pleasant, but facial expressions (attempting to capture the actors' likenesses) are a weakness. 'Aurorient Express', by Mike Kennedy and Lucas Marangon is very enjoyable. It takes place a year earlier on a luxury cruise liner that's sinking into a planet's atmosphere. This becomes the scene for a comedy thriller as various parties all have reason to be involved in the ship's sabotage and the race is on to find a bomb on board.~NF

QUICKEN FORBIDDEN

Cryptic Press: *11 issues † 2000 to date*

Quirky blend of *Alice in Wonderland, Tomb Raider* and *Sliders.* Jax Epoch is sixteen, a bookworm, a kleptomaniac and suddenly very out of her depth when she chases a rabbit into a wormhole, scores some mystical artifacts and returns to a world no longer hers. As weirdness breaks out all over she is kidnapped by a secret society of scientists who try her for crossing dimensions without a permit. After the first storyline concludes (1-5*) the style changes for shorter, though no less eccentric tales involving the Quicken, a worm that eats reality, loads of twins -evil and otherwise, and a fimbulwinter that threatens to destroy New York. Engaging fantasy from John Green and Dave Roman.~WW

QUICKSILVER

Marvel: 13 issues, 1 Annual 1997-1998

For a super speedster Quicksilver was lethargic in graduating into his own title. The thirty-three year gestation period between his 1964 debut in X-Men 4 and his ongoing title, all the while being a regular supporting player or team member, must be a record. So was it worth the wait? Not really, there's some florid writing from Tom Peyer, enough artists in 1-7 to invade Nicaragua, and Quicksilver's affiliation to a team of evolved humanoid animals in New York, perhaps a tacit admission he's not popular enough to carry his own title. Quicksilver's wife Crystal returns (don't ask) in 3, and Quicksilver being a Marvel mutant, there's just enough *X-Men* related material to drag in the readers of that title. John Ostrander writes from 7, turning in a rambling search for a medical cure that crosses over with *Heroes for Hire*, concluding in a shared annual.~WJ

QUIVERS

Caliber: *2 issues 1991*

The revelation of *Quivers* is Brian Michael Bendis' artwork. Far removed from the dark photographic style he would evolve, this is more reminiscent of Guy Davis, complete with letratone. This is Bendis' first published series, but it's risible stuff about the descendents of Amazons setting men to rights. Thank goodness he was given another chance.~FP

Q-UNIT

Harris: *1 issue 1993*

For the dangerous mission of retrieving a stolen computer chip, the Braxis form Q-Unit, a team of prisoners with psi powers offered the choice between Q-Unit and execution. The storytelling is cluttered, needlessly convoluted, and very hard to follow, and for 'characterisation' we have the male members of Q-Unit staring each other down, and the female members reminiscing about their lives as slaves. Had it run for a few more issues all would have become crystal-clear and endearing. Maybe.~FC

RACE OF SCORPIONS

Dark Horse: *2 issue microseries 1990, 4 issue miniseries 1991*

Race of Scorpions is a series of stories about characters in a far future where most animals no longer exist and water is the most precious commodity. Pirates, tales from the past and a mine manned by children are the major features of Leo Duranona's unsettling adventure. The artwork's like a loose Moebius in style, but not as compelling. The first series reprints the appearances from Dark Horse Presents 23-27 and 30-34.~NF

RACER X

Now: *Series one 11 issues, 1 Special 1988-1989, Series two 10 issues 1989-1990*

Launched with an oversize special before beginning a regular series, Racer X is the ridiculous combination of top racing-car driver and global peace agent. Complicating matters further, he's also Speed Racer's older brother, long believed dead, and can't reveal his real identity for fear of compromising his security. Whereas the *Speed Racer* companion title just about passes muster, *Racer X*'s first run insults the intelligence, even of the pre-pubescent readers it's aimed at. The second series is slightly more successful, with Chuck Dixon's scripts dispensing with the neither-fish-nor-fowl aspect of the title and concentrating on the action adventure aspects.~WJ

RACER X

WildStorm: *3 issue miniseries 2000*

Rex Racer is invited to race on Kapetapek, an Indo-Chinese island under political and military threat from the Khmer Noir. Tommy Yune's script does its best to include an adventure, some romance and as many car races as possible in only three issues, but the plot's nonsense, despite being attractively drawn, in manga-style, by Jo Chen.~NF

RACK AND PAIN

Dark Horse: *4 issue miniseries 1994*
Chaos!: *4 issue miniseries ('Killers') 1996-1997*

Lobo clone teams with Terminator clone as their exploits are beamed back for the viewing pleasure of millions. Except ratings are slipping, so Rack and Pain are set up against foes they can't beat. Maybe. Cartoon violence, so don't expect a lot of plot, but Leopoldo Jimenez's art is extraordinarily detailed in places. The Chaos! series is more mayhem and brutality, this time with the pair framed for the murder of the ruler's brother.~WJ

RADICAL AMERICA KOMIKS

Print Mint: *1 issue 1969*

Despite being a spin-off from *The Journal of U.S. Radicalism*, this is for the most part not particularly political. Apart from several minor strips from underground stalwarts like Rory Hayes and Jack Jackson, the bulk of the comics is given over to Gilbert Shelton, who thoroughly entertains with an early Freak Brothers strip and the unique 'Smiling Sergeant Death and his Merciless Mayhem Patrol'!~DAR

RADICAL DREAMER

Blackball Comics: *2 issues (0-1) 1995*
Mark's Giant Economy Size Comics: *7 issues 1995-1996*

Very good, rough artwork from Mark Wheatley combines with a dunderheaded plot, unfortunately also by Mark Wheatley, to produce a comic only worth looking at. In the 30th century the ultra-rich control everything and the underclass are very repressed indeed. They even have their dreams piped in, via DreamNet. Our hero (its inventor), full of ideas about uprisings and educating the masses, enters his own virtual-reality world in order to try to reach them through their dreams, but once there comes under attack from all sides. The script is by turns histrionic and didactic. Turn the sound down for this one.~FJ

RADIOACTIVE MAN

Bongo Comics: *6 issue miniseries 1993-1994, 1 Annual 1995, 5 issues + 2001 to date*

Playboy Claude Kane III gains his largely undefined powers (and a lightning bolt sticking out of the top of his head) in a nuclear accident. As Radioactive Man he jumps on any bandwagon going. Claude attempts to date Gloria Grand, a radio reporter for WZEN with very little interest in the jerk – she's in love with the superhero. In 2 (#88) we meet Fallout Boy, the kid sidekick who shares his powers, as well as RM's super team-mates in The Superior Squad. If this sounds at all clichéd bear in mind that the title is really a vehicle for satirising superhero comics over the years, and the series is presented as if genuine comics from years gone by, complete with issue numbers. Steve Vance scripts the miniseries and lays it out for artist Bill Morrison. Targeted comic trends are 1950s Superman and Batman in 1, 1960s Marvel in 2 (#88), the 'socially aware' Green Lantern/Green Arrow in 3 (#216), the 'Dark Phoenix' saga from *X-Men* in 4 (#412), an amalgam of *Watchmen, Dark Knight* and *Crisis on Infinite Earths* in 5 (#679) and finally Spawn and a few inspired pages of 1940s Captain Marvel in 6 (#1000). The Annual, resembling a DC 80 Page Giant, features numerous creative teams, but Morrison and inker Bob Smith dominate. The second series is solidly scripted by Batton Lash. The first issue features Hilary Barta artwork on a DC-style 'Gala 100th Issue' with Mike DeCarlo drawing the balance of the series which pokes fun at 1970s Marvel in 2 (#222), the 'high camp' Mighty Comics in 3 (#136), 1950s Atlas horror anthologies in 4, *American Flagg* in 5 (#575) and the Gold Key Turok in 6. Not only are these very entertaining but to any collector of comics there's an added dimension to the parodies, the in-jokes and even the mock adverts in later issues.~SW

RADISKULL & DEVIL DOLL

Devil's Due: *One-shot ('Super Summer Fun Special') 2002*
Image: *One-shot ('Hate Christmas Special') 2002*

If you like feeble jokes with a vaguely nihilistic flavour, boy have we found the comic for you!~WJ

RADIX

Image: *3 issues 2001-2002*

Valerie Fiores is a heavily-armoured future policewoman with a forgotten past, and plenty of people interested in either having her remember it, or ensuring it remains forgotten. Ray and Ben Lai created a fast-paced and impressively drawn action thriller. So impressively drawn, in fact, that images were appropriated to illustrate an application that resulted in a $50,000,000 government research grant. At this point the comic ground to a halt while legal action was pursued. What's been issued intrigues more than explains, but it looks as if something good was going to happen here.~WJ

RAGAMUFFINS

Eclipse: *One-shot 1985*

Don McGregor and Gene Colan look back on incidents from a 1950s childhood in stories originally published in Eclipse Magazine. What makes these more than nostalgia-fests is the ending to each, contrasting the childhood experience with an event in the lead character's adult life. The first two stories lack bite, but the third is excellent. In 1951 Bobby McIlroy weighs being forbidden to cross the road against the toy shop on the other side, while fifteen years later he has to visit his dying aunt. It's a story raising familial ethical dilemmas,

with no real correct answer, and all the more satisfying for doing so. Further Ragamuffins tales appeared in *Eclipse Monthly*, but none were as powerful as this.~FP
Recommended

RAGGEDY MAN

Brave New Worlds: *1 issue 1992*
Cult Press: *5 issues (2-6) 1992-1994*

Set in a world comprised of corporate super-rich and a ubiquitous underclass, this complex cyberpunk thriller involves the hunt for a missing secret agent who is also the lover of a major corporate big-wig. Mannheim, the executive "hires" the eccentric Rainger Salazar, a private eye known as the Raggedy man to find her, neither aware that an illegal cyborg named Kensuke is stalking them all in an effort to recover his missing hand and lost face. Set against a backdrop of business intrigue and espionage, the plot is further complicated by an escaped new silicon life-form and covert entities manipulating events from within cyberspace. Classy adventure with no padding, and worth a look.~WW

RAGMAN

DC: *Series one 5 issues 1976-1977, series two 8 issues 1991-1992, 6 issue miniseries ('Cry of the Dead') 1993-1994*

The Ragman was created as a hero for the common man, set in a ghetto where he protected the poor, hungry and homeless. His civilian life was spent as Rory Reagan, pawnshop owner, endowed with extra strength, agility and fighting ability through an origin explained in the first issue. Robert Kanigher writes human-interest stories about the harsh realities of living in the ghetto, with a sparse cast, and he weaves a fine mystery throughout the series concerning an abandoned mattress stuffed with $1,000,000. As assorted crooks attempt to retrieve it they're confronted by Ragman, who is unaware of the secret hoard. The final fate of the money is well considered and in keeping with the unusual tone of the series. The art is largely by the Redondo Studios, with co-creator Joe Kubert chipping in for the final two issues, and is excellent throughout.

The themes and cast of the original series are reworked entirely for the second series. This Ragman was rooted in Jewish folklore, with his abilities now in the suit, not the person, and the rags comprising the suit entities in themselves. Writers Keith Giffen and Robert Loren Fleming reveal Reagan wasn't the first Ragman, merely the latest in a succession. Besides the local Mob wanting to turn the pawn shop into a front for drugs, Ragman must also confront an old Jewish legend, the Golem. This was a well-constructed story, and decently drawn, although Pat Broderick's art over Giffen's breakdowns was stiff when it came to a fluid character like Ragman.

The third series has Rory Reagan established in New Orleans, a town with a mystique suited to Ragman. Of course, it's an unwritten rule that every comic set there has to introduce voodoo at some point, and writer Elaine Lee isn't slow off the mark. Despite the clichés, Gabriel Morrisette's art captures the eerie mysticism of New Orleans. The Golem returns, and numerous people and objects are possessed in an interesting, but convoluted, plot. All three series have their points of interest, but the original remains the best.~HY
Recommended: Series one 1-5

RAGMOP

Planet Lucy: *Series one 10 issues 1996-1997*
Image: *2 issues 1998*
Planet Lucy: *1 issue (3) 1998*

We open with the escape of a trio of dinosaurs from the ice age in a convenient spaceship, and swiftly segue into corporate manoeuvres, political intrigue, the search of Thrill Kitten, aka Alice Hawking, for a lucrative gig as a comic-book villain, and the imminent collision of an asteroid with the Earth. Only the 0-Ring, a Kirbyesque device conferring complete dominion over the laws of nature, can save humanity! Meanwhile, during a heated debate over who is the definitive Bugs Bunny director, an angel falls to Earth. Things don't get any less complex in the second issue.... With the addition of a rampant lobotomist, a millionaire pope and his teenage flagellant son, sundry Nazis, The Tetragammaton, Piltdown Man, and scores more characters, the resultant trans-universal chase is sly, snide, perceptive, exciting, gut-bustingly funny, and utterly indescribable. Artist/writer Rob Walton keeps all the balls in the air and still manages to include numerous sideswipes at comics personalities and clichés. The final issue can't tie-up everything, but knowing there would be no more, Walton provided a precis of how the story would have ended. Nevertheless, despite its unsatisfactory and only partial resolution, *Ragmop* is a work of frenetic brilliance.~HS
Recommended: Series one 1-9, series two 1-3

RAGNAROK

TokyoPop: *4 issue miniseries ('Into the Abyss') 2002, 5 volumes + 2002 to date*

Korean creator Myung-Jin Lee produces a compelling take on Norse mythology as the end of the Gods approaches and the doomed deities aren't prepared to quit yet. Desperate to forestall their fate for another thousand years, they dispatch the Valkyries to Midgard to destroy emerging humanity who hold the key to the gods' demise. Many heroes gather to fight the crisis, and Fenris Fenrir searches for the reincarnation of Balder. If she loses him to the Valkyries of Freya the Death Goddess, Ragnarok will not come and man will be forever doomed. Epic tale-telling, and very readable.~WW

RAI

Valiant: *34 issues (0-33) 1992-1995*

Introduced in the flip-book format *Magnus* 5-8, Rai was the hereditary protector of Japan in Valiant's 41st century, a samurai infused with nanite-rich blood empowering him. The first (or, to be precise, 42nd) Rai in 0-8 is extremely dull, and in recognition of this Valiant give him an early demise in suitably heroic fashion, although 0-4 were collected. The next Rai, Takao Konishi, is able to influence people through force of belief, and from 9 the title changes to *Rai and the Future Force* as Rai is joined by assorted other super-types battling to rid the planet of robot invaders. They face off against one lot of robots here and another bunch there, and when variety is required cyborgs are served up. It took Valiant a little longer to realise this Rai was also terminally dull, and he lasted until 22 before shuffling off the old mortal coil. The novice Rai in 23-33 encounters sibling rivalry, a harsh teacher and the X-O armour in the best of the run, but by that point the damage had been done.~FP

RAIJIN Comics

Coamix Inc: *5 issues (0-4) + 2002 to date*

This is a weekly, two hundred and forty page anthology produced in Japan in an attempt to offer the diversity of its progenitors. 0 is a preview of the regular series and 1 begins with just four strips. 'Slam Dunk' is a story about basketball players and the usual romantic entanglements. 'Fist of the Blue Sky' is a prequel to *Fist of the North Star*, playing on the political tensions between China and Japan in 1935, and full of martial arts violence. 'City Hunter', by Hojo Tsukasa, has an annoying lead, Saeba Ryo, who works as a professional gun for hire, part private detective, part assassin, but bears watching. 'Bomber Girl' is a comedy, with lots of guns, about a rogue hero, who extorts a reward from the victims of crime once she's rescued them.

2 adds the terrible, 'Baki the Grappler', which is all karate matches, and 'The First President of Japan', a political thriller by Tsugihara Ryuji and Hidaka Yoshiki. It posits an American-style leader of Japan facing the threat of U.S. intervention into a new conflict between North and South Korea, while the Chinese prepare to invade Taiwan. 'Guardian Angel Getten' joins in 3, as the magical, Shao Lin, appears out of an amulet to protect the young Shichiri Tasuke, who doesn't feel he needs protecting, except from Shao Lin's ignorance of real life. 'Revenge of Mouflon' is added in 4, a thriller that begins with a comedian being

forced to take the controls of a hijacked plane, while another new strip, about climbing, is promised for 5.

There's a lot of story for your money, mostly produced to a decent quality, and there should be something to interest most readers, although none of these series so far represents essential reading.~NF

RAIL

Image: *One-shot 2001*

An adventure strip set in an apocalyptic wasteland where steam trains are the main form of transportation. The nicely coloured artwork, from Dave Dorman, betrays the influence of such European comics artists as Moebius and Francois Schuiten, but an over-elaborate back-story and a lack of engaging characters makes for a ponderous read.~AL

RAIN

Tundra: *6 issues 1991-1993*

Rolf Stark's largely autobiographical *Rain* is a bleak and uncompromising look at unpalatable topics. If you can work through the apparently deliberately confused storytelling and cluttered, ugly art, there are some harrowing autobiographical glimpses of a German childhood towards the end of World War II and a mercenary career in Africa thereafter.~WJ

RAISIN PIE

Fantagraphics: *1 issue + 2002 to date*

Ariel Bordeaux and Rick Altergott co-produce this double feature. Altergott's 'Blessed Be' opens the story of a drug dealer who seeks revenge on the judge who incarcerated him. In a subplot, Altergott's previously established character Doofus searches for his old sidekick Henry Hotchkiss. The story's okay, though hardly enough to make a real judgement, and Altergott's artwork, a hybrid between Wally Wood and Ralph Reese, lends the narrative a weight it hasn't actually earned yet. Bordeaux's half of the title features two stories, 'Maple Valley Public Library', a censorship struggle that intrigues but barely has space to get off the ground, and 'Ladies' Line', a self-contained vignette about the joys of shallow friendship. Everything's fine, as far as it goes, and it does leave the reader wanting to see more, but two continuing sagas on a twice-yearly schedule is going to be frustrating for readers.~HS

RALPH SNART ADVENTURES

Now: *3 issue miniseries 1986, Series one 9 issues 1986-1987, series two 31 issues, 1 3-D Special 1988-1992, 3 issue miniseries 1992, 3 issue miniseries ('The Lost Issues') 1993, series three 12 issues, 1 Special 1993-1994, one-shot 1994*

Ralph Snart is short, stupid, ugly, socially inept and... no, that's about it. Somehow this slender premise has been stretched into sixty-four issues. Creator Marc Hansen's work certainly looks as if it ought to be funny; his bigfoot cartoony style is very appealing, but sitting stony-faced and bored witless throughout the run is easily achieved. If there is any appeal, and there must be given the number of issues, it's on a Three Stooges level. Imagine sitting through an entire series of the worst sitcom you've ever seen – *Bottle Boys* or *Comfort and Joy*, for example: that numbness, ennui and lack of desire to go on living. That's what reading *Ralph Snart* does. Masochists can search out two collections reprinting 1-7 of the second series.~HS

RAMBA

Eros: *14 issues 1992-1994**

These sexually explicit adventures of a female assassin offer far more than the usual Eros fare. Although the nature of the product demands several pages of detailed sex each issue, there are action-oriented plots, and Ramba herself has a nice sense of eye for an eye justice. Most issues are exceptionally well drawn by the presumably pseudonymous Marco Delizia, and even those he doesn't illustrate maintain a reasonable standard. If you like sexually oriented comics, they don't come better drawn than *Ramba*. Tying in with the questionable association of sex and violence, 14 features possibly the most bizarre and offensive execution seen in comics.~FP

Recommended: 9, 13, 14

RAMBLIN' DAWG

Edge: *One-shot 1994*

Sherm, a gag artist for porn mags such as *Hustler*, tells a mildly involving story of thwarted inter-species romance between a jaildog and a pussycat with disapproving parents. The art is a sharpish pastiche of Harvey Kurtzman.~GK

Mike Deodato's RAMTHAR

Caliber: *One-shot 1996*

Two short strips, originally published in the mid-1980s in Brazil and drawn by Mike Deodato Jr, with his Steranko influences showing. The first is written by Mike Deodato Sr and concerns a sword-wielding wanderer, Ramthar, in a post-apocalyptic landscape. The second 'Platoon', written by Julio E. Braz, features a killer retrained to be a super-soldier and shipped to Vietnam. Intended as a reference point before Caliber published Ramthar as one of a number of characters by Deodato, this could hardly have been seen as encouraging.~NF

RANA 7

NGNG Studios: *2 issue microseries ('Warriors of Vengeance') 1995-1996*

Utterly bizarre tale of an age-old rivalry for which Dyradom the Terrible created the Rana warriors to exterminate the Aura Masters and their descendants. Only seven (Zeus, Ares, Apollo, Artemis, Poseidon, Athena, Hermes) survived. In a confusing timeframe, they appear to have been dead before they lived, until found by Dimitriades, new born and free from Dyradom's control. Told as if it were an epic, but almost completely personality free and impersonal, while drawn in a sub-standard superhero style.~NF

RANDOM THOUGHTS

Caliber: *One-shot 1992*

Having come up with a potentially absorbing idea, for reasons best known to himself writer Steve Csutoras then wraps layers of obfuscation around it ensuring all but those i solitary confinement will never bother finishing the comic. The good idea is a society in which everyone is immortal, yet suicide is outlawed and near impossible. The only way around it is an annual lottery for death shortly to be discontinued. Sound good, eh? What a wasted opportunity.~WJ

RANGER BOB

Laszlo Press: *One-shot 1997*

A stripping away of the façade of glamour to glimpse into the sad and lonely life of kids TV presenter Ranger Bob. As success grows around him, all Bob wants is a relationship with the librarian he occasionally meets. This is a curiously stilted piece of whimsy from Tom Galambos, with a detached view of Ranger Bob. The idea is there, and it's not badly executed, but fails to gel as either black humour or slice of life.~FP

RANKLECHICK AND HIS THREE-LEGGED CAT

Amaze Ink: *2 issues 2000-2001*
